PPLPMDL0020000001	Cleveland	OH	44106	7/12/2011	I talked to dr about his patients taking tramadol,daily,but calling in early every month requesting more pills and perhaps considering Butrans for those patients if they are appropriate.dr said he has a lot of those patients and its just easier to refill their pills when they call into office than bring them into office and discuss a new product.I showed dr Butrans visual aid,appropriate patients section and asked dr if he could start 2 patients,per our discussion,on Butrans and NOT refill their tramadol? dr said he will do that its been tough because he's been traveling so much and out of office.dr asked if Butrans was a CII,I showed Butrans visual aid noting Butrans was a CII which meant he could call in 5 refills up to 6months,dr said that was good to know and he'll put initiation/titration guide in front of him to remember Butrans.
PPLPMDL0020000001	Cleveland	OH	44113	7/12/2011	dr said he remembers that Butrans is a patch dosed once a week and is for more moderate chronic pain patients that are taking tramadol,vicodin or percocet and not controlled.I told dr that was correct,showed Butrans visual aid and discussed appropriate patients section.I asked dr if he had patients taking tramadol,daily,that arent controlled and calling office for refills earlier every month? dr said yes but the problem is that 60% of his practice is medicaid,then uninsured,medicare and small percentage of commercial plan patients.dr said his chronic pain patients that would be right for Butrans are medicaid and most of them havent tried 2 long-acting opioids so he couldnt meet medicaid's prior authorization requirements to get approval for Butrans.dr said his small percentage of commercial patients tend to be working and overall healthy.dr said if the healthy patients get injured,have chronic pain and lose jobs,they end up on medicaid or cash paying so it will be tough for him to prescribe Butrans.we discussed OxyContin being an option after Butrans 20mcg,7 tablet strengths,showed Challenging flashcard for OxyContin and discussed conversion and titration with dr.dr said he has some patients on OxyContin and those patients are controlled and happy with their regimen so no need to change them.we talked about OxyContin formulary coverage.I recommended Senokot-S
PPLPMDL0020000001	Solon	OH	44139	7/12/2011	Spoke with nurse, Deborah, who said that Dr Zaidi is out of the office all week. She asked that I come back next week to see him. Reviewed Butrans & OxyContin savings cards, neither of which she needed more of. Also checked her stock of OTC samples, but she did not need any more of them either.
PPLPMDL0020000001	Cuyahoga Falls	OH	44223	7/12/2011	Quick call through the window. Dr. Bicak said that she still had not initiated Butrans therapy but would keep it in mind. She took the initiation guide and left. No new info learned.
PPLPMDL0020000001	Westlake	OH	44145	7/12/2011	Quick call, I asked Dr if he had all the info he needed regarding Butrans, he said he did, but he has not prescribed it yet. He said he does have some patients in mind and he will give it a try. I gave him interact invite and encouraged him to register on line.
PPLPMDL0020000001	Cuyahoga Falls	OH	44223	7/12/2011	I asked Dr. Crawford if he had changed his prescribing habits and felt anymore comfortable prescribing chronic pain and he said he did not. He said that he is primarily just maintaining patients and RARELY starts anyone on a pain med long term.
PPLPMDL0020000001	Akron	OH	44310	7/12/2011	Dr. Cremer said patients were doing well on Butrans and he was pleased he was having success. No new info learned.
PPLPMDL0020000001	Cuyahoga Falls	OH	44221	7/12/2011	I asked Dr. Dilauro if she was able to identify any patients coming in this week as Butrans patients. She mentioned that she had several patients in mind but was unsure of when they were coming in.
PPLPMDL0020000001	Westlake	OH	44145	7/12/2011	I reminded Dr about key Butrans messages and I asked Dr if Butrans would offer a benefit for his patients. He said it would but some of his patients might not want to give up their short acting. I reviewed that he can use short acting as supplemental analgesia so they don't have to give their short acting completely. He said he will give it a try. Reminder about OxyContin as an option when Butrans may not provide adequate analgesia.
PPLPMDL0020000001	Parma	OH	44129	7/12/2011	Spoke with MA Karen who said that Jen is gone all this week & will return Monday. I discussed Butrans "Initiations" invitation & explained the program. I asked if she thought Jen may be interested in doing it & she said she might be & that she would give the invitation to her when she returns. Also asked about their supply of Ryzoil savings cards but they have an ample amount. Karen promised to give Jen the information I left & confirmed lunch for the following week.
PPLPMDL0020000001	Westlake	OH	44145	7/12/2011	I asked Dr about his success so far with Butrans, he said it seems t o be working fine and he hasn't had much feedback. I reviewed the managed care and savings cards and Juan left the cards on his desk as a reminder for him to prescribe Butrans today. Reminder that OxyContin is still an option that is covered on Med D AARP and Medicaid.
PPLPMDL0020000001	Cleveland	OH	44109	7/12/2011	worked pm&r dept-see call notes and booked lunch for Friday July 15th with attendings and residents
PPLPMDL0020000001	Parma	OH	44129	7/12/2011	Spoke with MA Shari & discussed Butrans "Initiations" invitation. She said that Dr Paat will not do online programs because he is not very technologically savvy. I let her know that we may be able to do it together & she recommended my next lunch as a possible time to do this. I asked her to give Dr Paat Butrans invitation & "Special Report" sealed article & she agreed, saying she would remind him about Butrans & the savings cards.

PPLPMDL0020000001	Cuyahoga Falls	OH	44223	7/12/2011	Dr. Pitt said the one patient he had tried on Butrans was still doing good. He said the he did not mind me continuing to work with Liz in an effort to identify additional patients however managed care is definitely an issue. Reminded him of OxyContin for patients passed the point of Butrans and of managed care.
PPLPMDL0020000001	Cuyahoga Falls	OH	44223	7/12/2011	I saw Dr. Raniol quickly through the window and asked how often she was treating patients with a low dose SAO and she said more often then she would like. I explained Butrans utilizing the initiation guide and explained it may be an option for those types of patients.
PPLPMDL0020000001	Parma	OH	44129	7/12/2011	Spoke with Georgia (technician) who said Jackie was not in & a floater pharmacist was there today. I reviewed details of Butrans savings program/e-voucher with her & also discussed OxyContin & Ryzoft savings cards. She checked stock & said they are OK on their supply. She said to stop back another day to catch Jackie.
PPLPMDL0020000001	Cleveland	OH	44106	7/12/2011	worked pain management dept-see call notes, worked family medicine dept-left Butrans fpi's, initiation guides, patient information booklets, formulary grids and my business cards for each doctor in family medicine-had to leave with front desk receptionists as dept doesnt do lunches and doctors dont see reps unless they call you for appointments
PPLPMDL0020000001	Cleveland	OH	44121	7/12/2011	I asked doc where he would likely prescribe Butrans. He said for opioid naive -or patients that he does not want to put on a stronger opioid. I explained that 5mcg would be the appropriate starting dose for those patients. I asked him to focus on commercial patients and give a savings card. He admitted that he had not given any out. I asked what hesitations he had about trying Butrans. He said nothing (his initial concern was cost). He said he is still having good success with oxycontin and in fact, he has to sell it to some of his patient. I reviewed the preferred formulary coverage.
PPLPMDL0020000001	Cleveland	OH	44113	7/12/2011	I talked to Maria Geier,Nurse Manager,about Butrans fpi,initiation guide and showed her Butrans visual aid.Maria said Metrohealth Medical Center(they are a part of this hospital)cancelled all lunches.Maria said dr is gone for next 2 months on vacation and returning to work in september but she thinks the other physicians:Dr.Van Auker,Dr.Gillespie,Dr.Cicec would all be interested in speaking with me about Butrans. Maria asked me to give her a Butrans fpi,initiation guide,patient information booklet and my business card for each physician and said to follow-up in a week with her.
PPLPMDL0020000001	Cleveland	OH	44105	7/12/2011	I talked to Debra,Receptionist,who said they arent doing lunches anymore and all i could do was leave information for the dr.Debra said if dr is interested in speaking with me,he will contact me.I was able to leave Butrans fpi,initiation guide,patient information booklet,formulary grid,OxyContin fpi,OxyContin formulary grid and OxyContin conversion guide with my business card
PPLPMDL0020000001	Cleveland	OH	44130	7/12/2011	Spoke with Allison (pharmacist) & reviewed appropriate Butrans patient type & savings program/eligibility. She said she has not seen any prescriptions for it yet. She said it is possible that when the changes with the higher doses of acetaminophen with combo medications takes place, Butrans will have a better opportunity. Reviewed OxyContin & Ryzoft savings programs & gave her a package of OxyContin cards per her request.
PPLPMDL0020000001	C. Falls	OH	44223	7/12/2011	Spoke with the pharmacist Larry to see if they had any further questions about Butrans. I explained the core messages I had been discussing with local physicians. Larry said there had no movement for some time.
PPLPMDL0020000001	Westlake	OH	44145	7/12/2011	I reviewed the key messages and reviewed a previous conversation where she had concerns about managed care. I reviewed the managed care and asked if she has just a few patients on tramadol or short acting around the clock that she can try Butrans. She said she will give it a try.
PPLPMDL0020000001	Cleveland	OH	44114	7/13/2011	dr said he started another patient on Butrans.I asked dr why he started that patient on Butrans? dr said Butrans was taking a couple percocet a day and not controlled and wanted more pills so dr told patient Butrans was only option and he would give percocet for breakthrough pain,patient agreed to try Butrans.I showed dr butrans visual aid,appropriate patients and application/rotation of Butrans in patient information booklet. We discussed Butrans formulary coverage
PPLPMDL0020000001	Middleburg Heights	OH	44130	7/13/2011	Introduced myself to MA Nicole & let her know that Amy had instructed me to come in to see Dr Tenpenny to tell her about Butrans per her request. Reviewed appropriate patient type with Nicole & also managed care/savings cards. Worked with Nicole to set up an appointment to meet with Dr Tenpenny & her staff to go over Butrans details in more depth as she indicated that she has at least one patient in mind who she would like to try to switch to Butrans. Also asked Nicole to give Dr Tenpenny Butrans information, which she agreed to do.
PPLPMDL0020000001	Cleveland	OH	44128	7/13/2011	Spoke with pharmacist Mark & inquired about Butrans stocking. He said that he does not stock it & that this location is a very high Medicaid store. Reviewed e-voucher & discussed eligibility. Also discussed OxyContin stocking, which he said he does carry there but had no time to check the exact strengths. He said he does not stock Ryzoft. Offered a package of OxyContin savings cards & reviewed details & eligibility requirements.
PPLPMDL0020000001	Brooklyn	OH	44130	7/13/2011	Spoke with pharmacist Danielle who said she has at least 2 customers on Butrans. I asked her if they were getting refills or if these were just "one timers". She said the two she is thinking of are filling refills. She said she stocks the 5 & 10mcg as these are the doses the patients are on & she has heard no feedback from either of them. Discussed titration ability every 3 days if necessary & reviewed savings program. I asked her to check her stock on OxyContin savings cards- she said she has enough for now. I offered Ryzoft value cards & she accepted them.
PPLPMDL0020000001	University Heights	OH	44121	7/13/2011	Reminded doc of the Butrans indication, 7 day delivery and CII status. I asked him to prescribe Butrans after tramadol failures or before going to vicodin ATC. Again, he said patients like taking tablets all day. I asked him to think of butrans for those that prefer not to take tablets. I reviewed the commercial formulary coverage and the initiation dosing.
PPLPMDL0020000001	Maple Heights	OH	44137	7/13/2011	Spoke with Kathy (MA) & discussed Butrans "Initiations" program, handing her an invitation for Dr Dale. She said I should schedule a lunch to go over it with him. I reviewed Butrans appropriate patient type, dosing, delivery system, & savings cards with her. She said she has not heard anyone in the office talk about it so she does not think they are using it. I asked if they see patients who fit the appropriate patient type we talked about & she said they see them frequently. I asked her to give Dr Dale the invitation along with the "Special Report" sealed article & she agreed to do this.
PPLPMDL0020000001	Maple Heights	OH	44137	7/13/2011	I spoke with MA Kathy & reviewed Butrans "Initiations" invitation & asked if she thought Dr Gene may want to go through it during a lunch. She said he might & that she would give him the invitation. I also asked her to give him a sealed "Special Report" article & she agreed to do this. I reminded her of Butrans appropriate patient type, dosing, delivery system, & savings cards. She said she does not think either doctor has used it yet. I asked her to please remind him by giving him the information I left with her & she agreed & said she does think they see patients there frequently who fit the appropriate patient type we talked about.
PPLPMDL0020000001	Akron	OH	44320	7/13/2011	I asked Dr. Dupstadt if she thought there was any benefit to initiating Butrans therapy to the appropriate patients at her practice. She agreed there was a benefit but said that managed care was a huge obstacle but committed to keeping it in mind for appropriate patients who have a private insurance.
PPLPMDL0020000001	Independence	OH	44131	7/13/2011	Dr Jack said he was glad to see I hadn't given up on them on writing Butrans yet. I told him I had no intention of doing so & that I would continue to bring him weekly insight as to how Butrans may fit into his practice & to find out how it may benefit some of his patients. He asked me to tell him "how well it works". I told him the best way to find that out was to find one or two appropriate patients like the ones we have been talking about to try on it so that he could get his own clinical feedback. He said, "That's right, one or two is all you need, right?" I told him it was not a matter of my needs, but rather a matter of if he saw a benefit in Butrans for his patients. He said he is going to prescribe then walked away. Worked with Maria to schedule a lunch & reminded her of delivery system & appropriate patient type.
PPLPMDL0020000001	Maple Heights	OH	44137	7/13/2011	Spoke with Marge (MA) & discussed Butrans "Initiations" invitation. I asked if she thought Dr Yager would be more likely to want to go through it with me during an appointment or if he would want to do it online on his own. She said she was not sure but she would ask him about it. I also asked her to give him the sealed "Special Report" article. Reminded her of Butrans once weekly application & appropriate patient type. She said she would give Dr Yager the information & scheduled a lunch.
PPLPMDL0020000001	Cleveland	OH	44114	7/13/2011	I talked to dr about her patients taking 1-2 tabs,vicodin 5mg,every day,and not controlled asking for something different,considering Butrans. I showed Butrans visual aid,discussed appropriate patients and dr said she will consider Butrans for those patients if patients want to try something different.dr said her patients taking Butrans are doing well,so no complaints.we talked about BWC and commercial plan patients being focus for dr when starting patients on Butrans<font color=blue><b>CHUDAKOB's query on 07/28/2011</b></font>Amy, there is no reason for you to write in your call notes "showed visual aid", or "discussed appropriate patients. These general statement just make more writing for you and do not satisfy any compliance requirements. You would be better served by writing the specific point in the visual aid you used to emphasize your point in the conversation, or the specific appropriate patient you discussed.<font color=green><b>BROOKAM's response on 07/31/2011</b></font>ok thank you for pointing this out.)<font color=blue><b>CHUDAKOB added notes on 08/02/2011</b></font>No problem! I hope it helps!
PPLPMDL0020000001	Cleveland	OH	44113	7/13/2011	Dale,PA,was at lunch with Dr.Shen,RMP target,so he discussed 4 case studies with us and if Butrans was appropriate.Dale said if patients have chronic pain they shouldnt be taking short-acting analgesics around the clock,they should be taking a long-acting opioid.Dale said he's started a few patients on Butrans and these were all patients taking short-acting analgesics that werent controlling their pain so patients asked him for something different.I showed Dale Butrans visual aid,appropriate patients section,asked if he would ever consider Butrans for an opioid naive patient,so not going to short-acting analgesics if patient has chronic pain? dale said yes he would as he believes chronic pain should be treated with a long-acting opioid.I showed Dale Butrans initiation guide,discussed Butrans 5mcg for opioid naive patients and showing patients Butrans patient information booklet noting application/rotation of Butrans,Dale said he does give booklets to patients but will be sure to discuss that section with patients.I asked dale what his thoughts/feedback were from May 24th Butrans peer group dinner? Dale said he liked the speaker,the presentation with case studies was helpful BUT he did NOT like the Peer Group Moderator and was confused as to why this person was even at the dinner as the Moderator is not a Clinician and really had no place in discussing the information with them.I told Dale I appreciated his honest feedback.
PPLPMDL0020000001	Cleveland	OH	44113	7/13/2011	presented initiations to dr,discussed 4 patient case studies,dr said she wouldnt consider Butrans for opioid naive patients,I asked dr to tell me more about that,dr said she would start with short-acting analgesics first as many patients like to "feel" the medication immediately and since long-acting opioids take longer to reach steady state there are a lot of patients who dont like long-acting opioids for that reason, of not "feeling" the medication right away.I asked dr who was the appropriate patient in her mind then? dr said patients taking low dose vicodin,when thats not controlling patients pain,go to Butrans right there instead of going to percocet.I told dr that that was great she has that patient in mind and could she continue starting those patients on Butrans? dr said yes,we discussed importance of Butrans patient information booklet to discuss application/rotation of Butrans,dr said she and Yasmin,MA,do give the booklets and they help patients understand Butrans more.we discussed butrans formulary coverage and patient savings cards for commercial plan patients.I recommended Senokot-S
PPLPMDL0020000001	Akron	OH	44320	7/13/2011	Misty said she had taken some patients off Butrans because they felt it was not efficacious. She did say that she would continue to trial Butrans and remains an advocate.
PPLPMDL0020000001	Copley	OH	44321	7/13/2011	I stopped back in to find out where Dr. Heim initiated Butrans therapy since he showed up on early view. I asked how he was able to identify that patient as a Butrans patient and he said they weren't stable on their SAO's and thought it would be a good opportunity to trial Butrans. I asked if he had other patients he could continue to trial it at and he said he thought so.
PPLPMDL0020000001	University Hts	OH	44118	7/13/2011	Window call...Reminded doc of the Butrans indication, 7 day delivery and CII status. I asked him to prescribe Butrans after tramadol. Gave him formulary grids for oxycontin and butrans and informed him that both are covered by BWC.
PPLPMDL0020000001	Parma	OH	44129	7/13/2011	Quick call- Dr Gigliotti said he was running too far behind today & that he had to get out of the office as early as possible tonight. He said he "is still looking" for a Butrans patient. I handed him a Butrans "Initiations" invitation & let him know that the interactive program would help him with this. I let him know I would return at another time to go through it with him.
PPLPMDL0020000001	Cleveland Heights	OH	44118	7/13/2011	Doc could not stay for the entire lunch. I did go over the case study of Evelyn with him. He said he thought butrans was like a fentanyl. I explained that there is no head to head with duragasic and that butrans is a 7 day, CII. I asked him if he has patients that could benefit from Butrans. He said sure and that he is going to try it. I reviewed the formulary coverage and the dosing.
PPLPMDL0020000001	Cleveland	OH	44106	7/13/2011	talked to dr about the few patients he started on Butrans,dr said he's not gotten feedback and just saw Andrea yesterday and told her the same thing, he hasn't heard back from patients so that's probably a good sign that it's working well for them. I talked to dr about considering patients who take tramadol,daily,but not controlled and starting them on Butrans and showed butrans visual aid for discussion.we discussed insurance coverage and patients using Butrans patient savings cards.
PPLPMDL0020000001	Norton	OH	44203	7/13/2011	Talked to Dr. Rucker quickly through the window as I left the OxyContin cards he requested. I mentioned that Butrans was now on the market and introduced the indication and once a week dosing via the FPI. He said he would read the info if I left it behind which I did.
PPLPMDL0020000001	Cleveland	OH	44106	7/13/2011	worked pain management dept - see call note

PPLPMDL0020000001	Cleveland Hts	OH	44118	7/13/2011	Opened the call by discussed the butrans indication and explained how the presentation would show patients that are appropriate and those that are not appropriate. I started with Evelyn's case study and he thought that her scenario was unrealistic. He said that he had a patient in mind...she was on tramadol and it was not working. She started her on duragesic but she could not tolerate it. He believes she may be a medicare patient though. I reviewed the formulary grid and explained the possible cost with the savings cards. he said the problem has been identifying the right patient. He said he would try it. I clarified that 20mcg is only a titration dose. A patient needing more than that is likely a patient for low dose oxycotin.
PPLPMDL0020000001	Bedford	OH	44146	7/13/2011	I asked Dr Moufawad what types of patients he is considering "Butrans patients" at this point. He said mostly new patients. I asked him if he could tell me more about those patients. He said that most recently, he had a male patient who had been abusing Percocet & alcohol but was in pain. Dr Moufawad said that he put the patient on 5mg & then titrated him to the 10mcg. He said he told the patient that Butrans was the only medication he was willing to give him & so far the patient is happy with his pain relief. Dr Moufawad added that the patient's insurance would not cover it but he did not remember the plan. Reminded him of savings cards & he said he did give that patient one. I also reminded Dr Moufawad that Butrans is indicated only for pain & also that it is an opioid & therefore is abusable. He said he is aware & is monitoring this patient closely. Gave him Butrans "Initiations" invitation & asked him to take part in the interactive program. He said he does not have time.
PPLPMDL0020000001	Parma	OH	44134	7/13/2011	Spoke with Dave (pharmacist) who confirmed that they do stock Butrans & have a few patients on it regularly. I asked if they now have all 3 strengths & he said yes. Reviewed savings program & e-voucher with him. Also discussed OxyContin stocking. He said the demand they have seen at that location for OxyContin has "diminished substantially because now Opana is the abused drug of choice". I asked what he meant & he said that since the OxyContin reformulation, he has seen a decrease in OxyContin prescriptions & increase in Opana demand because "Opana is more abusable". I told him we have no data to suggest that the reformulated OxyContin is less abusable & that we ask physicians to be just as cautious. He said he understands. Reviewed savings cards for OxyContin for eligible patients.
PPLPMDL0020000001	Cleveland	OH	44102	7/13/2011	I talked to Vince, Pharmacist, he said they haven't seen any scripts for Butrans and isn't going to order any strengths of Butrans until he sees that 1st script. We discussed importance of stocking but Vince said this is business and he doesn't want Butrans to sit on shelf. I gave Butrans initiation guide, showed Butrans visual aid and asked Vince what he felt were some important features of Butrans? Vince said once weekly dosing is a benefit for some patients. Lisa, pharmacy tech, asked about Butrans adhesion to skin and if it fell off a lot? I showed Lisa Butrans medication guide and patient information booklet discussing use of first aid tape or dressings over Butrans if there is an adhesion issue. Lisa said ok because that's usually patients concern when they hear transdermal/patch. Vince said to check back next month on Butrans scripts/stocking.
PPLPMDL0020000001	Norton	OH	44203	7/13/2011	Presented Butrans briefly through the window to both Dr. Grady and Rucker. My time was limited so I introduced Butrans via the FPI and focused on the once a week dosing. Both docs requested I leave info for their review, which I did.
PPLPMDL0020000001	Cleveland	OH	44113	7/13/2011	I talked to Justin, Pharmacist and Maria, Pharmacy Tech, about Butrans stocking and Justin said they have all 3 dosage strengths but he hasn't seen a script for Butrans since May and that was from Dr. Shen. We discussed Butrans 5 core messages and I asked Justin what he felt were some important features about Butrans? Justin said transdermal, once weekly dosing and the fact that Butrans is a CIII so hcp's can call in refills makes it easier on hcp offices. I asked Justin if he would recommend Butrans, to physicians, if patients are telling him their short-acting opioids aren't controlling their pain anymore? Justin said he'll do that but he doesn't hear that statement too often, usually patients like their pills and want more from dr. I showed Justin Butrans patient information booklet, discussed application/rotation of Butrans and asked Justin to focus his discussions with patients on that area, he said ok he would do that. We discussed OxyContin stocking, Q12H dosing and formulary coverage. Justin said they have seen less scripts for OxyContin and more Opana ER but that's due to the reformulation and he felt good.
PPLPMDL0020000001	Independence	OH	44131	7/13/2011	Quick call: Dr Rob said he was in a hurry & "not in the mood" for talking. I let him know I would return at a better time & handed him a Butrans "initiations" invitation & explained the interactive nature of the program to him. I let him know we could sit down together to go through it in the office or he could log on at his leisure to go through it. He thanked me & walked into a room.
PPLPMDL0020000001	Cleveland	OH	44104	7/14/2011	I asked dr what she recalled about Butrans? dr said she didn't remember anything. I showed dr Butrans visual aid, 5 core messages and asked dr if she has any patients taking tramadol every day for their chronic pain but aren't controlled? dr said her patients taking short-acting opioids have acute pain and are controlled, when patients get to the point of having to take short-acting opioids daily and have chronic pain dr will convert patients from tramadol to vicodin and if they still need more she'll refer to pain management. dr said a lot of her patients go to Cleveland clinic pain management for blocks, stimulants and injections and don't continue on chronic opioid therapy. I asked dr if Butrans would be an option, after tramadol didn't control patients pain, instead of converting patients to vicodin? dr said maybe, she'll keep Butrans in mind but transdermal systems work for some patients and others it doesn't. I agreed with dr that Butrans won't work for everyone but she at least had an option to go to after tramadol, dr said that made sense. dr said she doesn't have a lot of patients that she would consider chronic pain. I showed dr Butrans visual aid, appropriate patient section discussed Butrans 5mcg for patients taking less than 300mg tramadol a day and we discussed titration of Butrans and patient savings cards for commercial plan patients and BWC coverage for Butrans as dr said she has some BWC patients.
PPLPMDL0020000001	Cleveland	OH	44104	7/14/2011	dr said he has 2 patients that are taking percocet every day and not controlled and he wants to start them on Butrans. I asked dr how much percocet patients are taking, dr said 1 patient is taking 20mg and other patient takes 40mg daily of percocet. dr said both patients need a long-acting opioid and he thinks Butrans could be an appropriate option. I showed dr Butrans visual aid, appropriate patients section and initiation of Butrans, we discussed proper tapering of percocet and initiation of Butrans. We discussed formulary coverage for Butrans and patient savings cards for commercial patients. I recommended Senokot-S.
PPLPMDL0020000001	Cleveland	OH	44130	7/14/2011	Dr Fedorko told me that he doesn't have any more patients who he could put on Butrans. I asked him what he meant. He said that he only has patients who need pain control for two or three weeks at a time. I agreed that because these are not chronic pain patients, they may not be appropriate. I asked him if he had any patients who take Vicodin or tramadol every day. He said his Vicodin patients only need Vicodin because they "are hooked on it." He said he thinks Butrans is a good product because it is "more convenient" for the patient to apply a patch once a week than to take pills around-the-clock. He said he wishes he had more patients to put on Butrans but he just does not. He asked me what other products I have & I reminded him of Ryzolet q24h & value program. He said he has managed care issues with Ryzolet. Reviewed Butrans managed care grid with Maryann & asked her to give Dr Fedorko the Butrans "Initiations" program invitation.
PPLPMDL0020000001	Cleveland	OH	44113	7/14/2011	I discussed Butrans fpi, initiation guide, showed dr Butrans visual aid discussing appropriate patients, dr wanted to know if we had conversions from other long-acting opioids to Butrans? I told dr we didn't and that would be her clinical judgment but showed conversion table in Butrans initiation guide looking at short-acting opioids and what the initiating Butrans dosage strength would be, dr said ok she understood that and asked about insurance coverage. dr said majority of patients here at this clinic are Medicaid but she does have commercial plan patients and she goes to Metrohealth medical center's main campus and Asian plaza so there are commercial patients there too. We talked about Butrans patient savings cards and dr said she's excited to see buprenorphine as a transdermal medication and has been waiting for this and will start prescribing. I recommended Senokot-S for opioid induced constipation.
PPLPMDL0020000001	Independence	OH	44131	7/14/2011	Spoke with Dr Faiman's MA who said that he was not in today but would be in the office tomorrow. She asked what products I carried. I shared Butrans information with her including indication, dosing, delivery system, & appropriate patient type. I let her know that Dr Faiman had expressed interest in it before when we have spoken & may have a few patients on it. She asked that I come back tomorrow to see if he has time to see me.
PPLPMDL0020000001	Parma	OH	44129	7/14/2011	Dr Kushnar said that she has not yet prescribed Butrans. I reminded her of our previous conversation when she told me that she had thought of a few patients who may be appropriate. She said she did not remember. Reviewed appropriate patient type & invited her to participate in the "Initiations" interactive program. She said she might log on & do it later. I let her know the program would assist her in identifying potential Butrans patients & would give her practice on virtual patients. She said she likes doing those types of online activities, so she would log on. She said she just does not have many patients on chronic pain medications & that she avoids opioids when possible or refers out. She asked about Medicare coverage, so I reviewed managed care. She said many of the patients she has thought of have been Medicare patients. Discussed OxyContin as an option for appropriate patients beyond Butrans 20mcg.
PPLPMDL0020000001	Barberton	OH	44203	7/14/2011	I asked Dr Patel about the success of Butrans in his practice and he said overall it has been a great therapy. I asked what his patients liked best about therapy and he said that it was once a week. He said he will continue to keep Butrans in mind for appropriate patients.
PPLPMDL0020000001	Cleveland	OH	44103	7/14/2011	I talked to dr about her patients taking 1-2, 5mg percocet, every day that aren't controlled and asking for something else, dr said she hears that and is considering Butrans for those patients but sometimes they don't want to stop their percocet and try a patch. I talked to dr and showed Butrans fpi, noting that dr can give percocet to patients while they are taking Butrans. dr said the couple patients taking Butrans seem to be doing well so she's happy. I asked dr if there are any patients taking 1-2, 5mg Vicodin, daily, but pain isn't controlled? dr said she hears that all day and usually will max the vicodin out and then go to percocet. I showed dr Butrans visual aid, appropriate patients and told dr she could start patients on Butrans right after vicodin isn't controlling pain anymore instead of converting patients to percocet. dr said ok and she will keep it in mind. We discussed OxyContin being appropriate for patients after Butrans 20mcg isn't controlling patients pain anymore and 7 tablet strengths available to allow for flexibility in titration, dr said she writes a lot of OxyContin and thinks it's a good long-acting opioid option for the right patients. We discussed OxyContin and Butrans formulary coverage. I recommended Senokot-S.
PPLPMDL0020000001	Parma	OH	44129	7/14/2011	Lucy asked me to remind her what Butrans is. Reviewed indication, dosing, delivery system, CIII, & abuse/addiction potential. She said that she has not prescribed it & does not have very many patients who she maintains on chronic pain medications. She asked about managed care coverage, so I reviewed with her coverage & savings program. She said a \$15 co-pay was very reasonable. Discussed the appropriate patient type & asked if she would consider Butrans for patients on chronic Vicodin requesting an increase in dose or dosing interval & she said she would do this. Also discussed Ryzolet, q24h dosing, & titration.
PPLPMDL0020000001	Cleveland	OH	44103	7/14/2011	talked to dr briefly about Butrans being an option for his commercial patients who have chronic pain and are taking tramadol every day but not controlled. I showed dr Butrans visual aid, discussed appropriate patients and initiation of Butrans in case dr sees any patients that he feels are appropriate for Butrans. dr said he likes that Butrans is transdermal and dosed once a week but its not covered on Medicaid so that's what's preventing him from prescribing. We talked about OxyContin being appropriate for patients with 7 tablet strengths to give him flexibility in titration of OxyContin and we discussed formulary coverage for OxyContin. I recommended Senokot-S.
PPLPMDL0020000001	Cleveland	OH	44102	7/14/2011	dr said he hasn't started anyone on Butrans, remembers Butrans is a transdermal medication but couldn't remember if it was a CII or CIII? I showed dr Butrans visual aid, discussed 5 core messages and asked what was most important to him about Butrans? dr said transdermal technology, once weekly dosing is good for some patients not all and CIII so he can call in refills. I showed dr Butrans visual aid, appropriate patients section, and asked if dr has patients taking 1-2, 5mg vicodin, every day for their chronic pain and that dose isn't controlling their pain? dr said yes he hears that a lot and usually patients want more pills. I showed dr initiation guide, discussed proper tapering of short-acting opioids if patients are above 15mg hydrocodone, and then initiation of Butrans. dr said because he's newer to practice he doesn't know patients that well yet but he'll keep Butrans in mind if appropriate. dr asked about insurance coverage so we discussed dr focusing on BWC and commercial patients.
PPLPMDL0020000001	Parma	OH	44129	7/14/2011	Spoke with pharmacy manager, Rick, who said his time was limited. I reviewed with him Butrans appropriate patient type & savings program/e-voucher. Also discussed OxyContin & Ryzolet savings cards & reviewed eligibility requirements, including that they cannot be used for any type of government insurance. He requested a package of Ryzolet cards & said he has a couple of customers on it. He said he has an ample supply of OxyContin cards.
PPLPMDL0020000001	Highland Heights	OH	44143	7/14/2011	Conducted the Butrans patient selection presentation with doc and Debbie (NP). They thought it was helpful to identify appropriate patients. Doc asked if supplemental analgesics. I referenced the FPI that they can be used. I explained how to taper down if patients are on higher doses of opioids or consider low dose oxycotin. He also considered a patient currently on duragesic. He would like to convert him to butrans. The patient likes transdermals but does not need as strong an opioid. I explained that there is no exact conversion but showed him the initiation guide approximations. Doc said patients are doing well on Butrans. Debbie asked what is recommended if they complain that the patch is coming off. I explained the use of first aid tape or tegaderm. I reviewed the formulary coverage for butrans and oxycotin.
PPLPMDL0020000001	Highland Heights	OH	44143	7/14/2011	Conducted the Butrans patient selection presentation with doc and Debbie (NP). They thought it was helpful to identify appropriate patients. Doc asked if supplemental analgesics. I referenced the FPI that they can be used. I explained how to taper down if patients are on higher doses of opioids or consider low dose oxycotin. He also considered a patient currently on duragesic. He would like to convert him to butrans. The patient likes transdermals but does not need as strong an opioid. I explained that there is no exact conversion but showed him the initiation guide approximations. Doc said patients are doing well on Butrans. Debbie asked what is recommended if they complain that the patch is coming off. I explained the use of first aid tape or tegaderm. I reviewed the formulary coverage for butrans and oxycotin.

	Brooklyn	OH	44144	7/14/2011	Spoke with MA Audrey who said Dr Deeb was not in the office today. I asked her if I could leave a Butrans "Initiations" invite for him but she said he will not take any information. I explained the interactive program to her, but she said he does not do online activities. She said the only thing he will accept are dinner invitations. I told her that I had requested a lunch a few times but had not heard back. She asked for another card & promised to request a lunch when he comes back to the office. She said he goes through phases of allowing lunches & then not allowing them, so there is really no set schedule of when they might do them. I asked if there was any other way to talk to him but she said lunches are all for now.
PPLPMDL0020000001	Mayfield Heights	OH	44124	7/14/2011	Window call....provided interact invite and formally grid reminder. no savings cards needed. Nothing learned.
PPLPMDL0020000001	Euclid	OH	44119	7/14/2011	Opened the call by reviewing the indication, CIII status, and 7 day delivery of Butrans. I explained the positioning - before going to vicodin ATC. He asked if Butrans can be called in. I confirmed that it could and is a CIII similar to vicodin only that it is once weekly. I reminded him of the formulary coverage and savings cards. Scheduled a lunch to discuss further.
PPLPMDL0020000001	Mayfield Heights	OH	44124	7/14/2011	Window call....brief review of the Butrans patient type, formulary grid and the savings cards. Nothing learned.
PPLPMDL0020000001	Mayfield Hts	OH	44124	7/14/2011	Quick call....doc was still supplied with Butrans savings cards. Reminded him of the covered insurance plans and BWC coverage. Oxycontin coverage and savings cards reminder. Gave interact invite
PPLPMDL0020000001	Fairlawn	OH	44333	7/14/2011	I asked Dr. Paris if he the patients he had originally put on Butrans had been taken off therapy and he said he was not sure. I asked how long he had expected patients to stay on Butrans therapy and he said long term.
PPLPMDL0020000001	Akron	OH	44333	7/14/2011	I asked if his prescribing have changed and he said he is still not prescribing meds for chronics pain. I told him Butrans may not be the right therapy for his patients at the time.
PPLPMDL0020000001	Stow	OH	44224	7/14/2011	Introduced Butrans and she said she is already familiar with it from the other NPs, We reviewed FPI, indication, dosing and titration, boxed warning and managed care coverage. She said she likes it for the reasons that it i once a week and it is schedule 3. I explained savings cards. She said she would write it in more opioid experienced and she also sees alot of Bwc who she can write it in
PPLPMDL0020000001	Stow	OH	44224	7/14/2011	Dr said he has tried a couple of people on Butrans and I asked how it is working and what dose did he start them on and he said they are doing well and he started them on 10mcg. HE requested to be a speaker but needed to get more Butrans under his belt. HE asked bout the PK profile and if it is a agonist antagonist and I showed him the FPI and said it is a partial agonist and he read the description and said it still has anagonist effects at the kappa receptors and he said that is good. HE thinks it is a good product and would like to start using it more. Gave him invite for program and webinar.
PPLPMDL0020000001	Akron	OH	44333	7/14/2011	I asked Linda if she was still considering Butrans as a therapy for patients failing on their current SA therapy and she said she was. I asked if she had seen any recently or would see any today that may be Butrans candidates and she said she would have to look through the charts but would prescribe it if a patiien presented.
PPLPMDL0020000001	Stow	OH	44224	7/14/2011	Dr said he has not started anyone on Butrans, he said he has lost 2 of his PAs and he is now doing only injections so he hasnt had the chance. HE said summers are like this and back into the fall he will start seeing some patients, but probably till more procedures. HE asked about the managed care coverage and said he thought that was good for a new drug. HE also asked about dosing and what is the most common dose written. Invited to speaker program as well as initiations program. RMEInded of OxyContin in his patients who may be on doses higher than 80mg morphine equivalent
PPLPMDL0020000001	Parma	OH	44134	7/14/2011	Dr Hernandez asked me how much buprenorphine is actually in each strength Butrans patch. I told him I did not know the answer to this question & told him we could either submit his question on my computer or he could call Medical Services. He said he would call as he needs an answer quickly. He said he sits on the BWC board or directors & that they are reviewing products, specifically pain medications, to determine what they will pay for & what they will not. Dr Hernandez said they want to stop paying for all pain medications including Butrans & all buprenorphine-containing medications. He said he believes in the molecule & disagrees with this plan, so he is gathering information about buprenorphine & products which contain it to present to the board in effort to get them to continue to pay for them. He said his patients do well on Butrans & that he believes they are less likely to become addicted to it than other medications. He said he believes each Butrans does not contain enough medication that it would cause addiction. I reminded him that this is not consistent with the Butrans FPI & that we have no data to suggest this. He said his statement is based on his clinical experience. I invited him to take part in the "Initiations" program. He said he might look at it later but couldn't do it right now. *Returned later in the day to show Dr Hernandez FPI Section 11/Table 5 to show him the total buprenorphine content per strength patch.
PPLPMDL0020000001	Stow	OH	44224	7/14/2011	Sharon came back briefly, said she is really busy since they lost 2 of their PAs. She said she has not written Butrans but patient load is increasing so sshe will have more opportunity with new patients. Reviewed dosing and managed care
PPLPMDL0020000001	Stow	OH	44224	7/14/2011	Dr said he has 3 patients on Butrans. I asked if they were new patients and were they previously on a short acting and he said they were existing patients who were on Duragesic who were not getting the pain control for 3 days and felt like the patients were getting a boost every time they took it. HE said his patients were doing well, he likes it. HE asked about managed ccare again and we reviewed that and he said he has to remember BWC, that is 25% or more of their business. He said he is mainly starting patients on 10mcg unless they are elderly than he may try 5mcg on them.I gave him invite for initiations program as well as speaker program and he said too
PPLPMDL0020000001	Independence	OH	44131	7/15/2011	Spoke with Denise (MA) & told her about Butrans "Initiations" interactive program. I let her know that it is a useful tool to help assist physicians in appropriate patient selection for Butrans. Also reviewed appropriate patient type with her. I asked her to give Dr Boose the invitation with my card & she agreed to do this. I asked if they needed any OxyContin savings cards but she & Janelle said they don't need any as that is not prescribed there. I told them that the cards can be used for patients who are already on OxyContin when they come to see him but they still declined.
PPLPMDL0020000001	Woodmere	OH	44122	7/15/2011	Spoke with pharmacist Raul & inquired about Butrans stocking. He said they do have it in stock. I asked him what strengths. He said they have 5 & 10mcg. Reviewed appropriate patient type & savings program through e-voucher. Also asked about OxyContin stocking. He said he does not know off the top of his head which strengths they have, but that they only have a few patients on it. He said he has enough savings cards. I offered Ryzolt savings cards & he said he could use some.
PPLPMDL0020000001	Chagrin Falls	OH	44023	7/15/2011	Spoke with Wendy, floater pharmacist, & Grace, technician. Confirmed that this location does have Butrans stocked (all 3 strengths). Reviewed appropriate patient type & savings through e-voucher. Also reviewed OxyContin & Ryzolt savings cards. Wendy said they could probably use the OxyContin cards but she did not think they carry Ryzolt. She said she would leave all my information for the regular pharmacist.
PPLPMDL0020000001	Cleveland	OH	44113	7/15/2011	talked to dr about his patients taking tramadol every day but not controlled and calling into office earlier every month asking for refills,dr said he has a lot of those patients.i showed dr Butrans visual aid,appropriate patients and said thats where he can start patients on Butrans,instead of refilling same amount of tramadol or giving them more,dr said ok he could only remember that Butrans was transdermal and that was it,so we talked about 5 Butrans core messages and dr said he will start a few patients.dr asked if it was covered on medicaid as he has a lot of medicaid patients.we discussed dr focusing on commercial plan patients and prior authorization requirements for medicaid patiien,dr said he'll try it in a few patients and see what happens.i recommended Senokot-S
PPLPMDL0020000001	Westlake	OH	44145	7/15/2011	Quick call with Deanna, she said that the Butrans is not moving in this store. I asked which primary care Dr might have appropriate patients. She said tri city north ridgeville has some. We reviewed the Butrans initiation guide and that OxyContin is an option when Butrans may not provide adequate analgesia.
PPLPMDL0020000001	Cleveland	OH	44115	7/15/2011	talked to dr about her patients taking tramadol every day that arent controlled and are calling into office earlier every month asking for refills,dr said she does have some patients that do that,i asked dr to consider Butrans right there instead of refilling tramadol or going to vicodin,dr said she could consider that for some patients but not every patient wants to put a patch on.i showed dr Butrans visual aid,discussed appropriate patients section,discussed initiation dosage strengths either 5mcg or 10mcg and dr said most of her patients are taking less than 300mg tramadol,so i asked dr to consider Butrans 5mcg,for patients taking less than 300mg,dr said she'll keep Butrans in mind.dr said she only has a handful of patients that really are "chronic" pain,most are taking tramadol and other short-acting analgesics for acute pain,so i told dr that was fine just focus on chronic pain patients for Butrans.dr asked about insurance coverage,we discussed commercial plan patients trying Butrans and using Butrans patient savings card.i recommended Senokot-S
PPLPMDL0020000001	Lakewood	OH	44107	7/15/2011	Dr said that he did try a patient on Butrans, but she said that she prefers taking the short acting PRN. He said that this was a difficult patient and that he will try other patients. I reviewed the appropriate patient types and asked him to prescribe for a few more patients to gain some experience and he agreed. I invited him to the speaker program and he said he will try to make it. I reminded him that Butrans is still an option when patients are on higher doses of opioids around the clock.
PPLPMDL0020000001	Parma	OH	44134	7/15/2011	Spoke with Marko (pharmacy manager) who said he does not understand why he has not seen more Butrans activity. Reviewed appropriate patient type & discussed patients who may not be appropriate (ie if they are on high doses of opioids). Marko said he has seen an increase in prescriptions for Subutex for pain lately. He asked if I called on physicians who write it. I asked him who he would recommend. He said Dr Popa on W 130th Street, Dr Saridakis & Dr Charles Webb. He said that was all he could think of now but that he would try to think of more before my next visit. He said he still has OxyContin savings cards so he did not need more.
PPLPMDL0020000001	Chagrin Falls	OH	44022	7/15/2011	Quick call- Caught Dr Hudson in the kitchen & handed her Butrans "Initiations" invitation, explaining the interactive program. She said she does online programs occasionally. Offered to go through it with her but she declined. I let her know that the program would assist her in identifying who was & who was not appropriate for Butrans. She said she would have a look then walked away.
PPLPMDL0020000001	South Russell	OH	44022	7/15/2011	Only saw Dr Kale briefly- I gave her a Butrans "Initiations" invitation & explained the interactive nature of the program & let her know she could log on at her leisure to go through it or I could go through it with her. She said she didn't have time & would look at it later then walked away.
PPLPMDL0020000001	Independence	OH	44131	7/15/2011	Spoke with Jill (MA) who said that Dr Reddy was not in today. She said that he has been changing his hours around lately but has not set anything permanent yet. I gave her a Butrans "Initiations" invitation & described the interactive nature of the program. I told her it would assist him in identifying who may be appropriate for Butrans & who may not. She said he usually does not do them but that she would leave it for him.
PPLPMDL0020000001	Uniontown	OH	44685	7/15/2011	I introduced Butrans and FPI. I asked if she thought there was a place for Butrans in her practice and she said she thought there was. I asked how she would identify a patients and she mentioned that she would feel most comfortable with an opioid naive patient to avoid conversions.
PPLPMDL0020000001	Uniontown	OH	44685	7/15/2011	Spoke to the pharmacist about the core messages I was discussing with local physicians. I asked if they had seen any movement and they said no.
PPLPMDL0020000001	Euclid	OH	44119	7/15/2011	Quick call....told doc about the butrans indication - a different option for patients that could use a long acting CIII. He said he des not have patients like that. I told him I scheduled a lunch to discuss further and gave him an initiation guide and formulary grid.
PPLPMDL0020000001	Westlake	OH	44145	7/15/2011	I asked if the patients that he started on Butrans had success. He said he had a hard time with managed care and one patient tried it but then said it was too expensive. He said that she did have a copy card. We reviewed the commercial insurance for Butrans and I asked Dr if he would continue to try it on other patients to give it a fair trial. He agreed. Reminder that OxyContin is an option that is covered on most insurance at a low copay and I reviewed the savings cards.
PPLPMDL0020000001	Euclid	OH	44119	7/15/2011	Spoke to Kevin about the stocking and movement of Butrans. He said that he still has it but has not seen any scrips in a while. I explained the him how we are positioning Butrans with the doctors - before going to vicodin ATC. Also reviewed the proper application and potential sites. Gave him a savings card brochure and talked about the relay health option.
PPLPMDL0020000001	Uniontown	OH	44685	7/15/2011	Spoke to the pharmacist and explained the core messages that I was discussing with physicians.
PPLPMDL0020000001	Akron	OH	44319	7/15/2011	I asked why he was not comfortable prescribing Butrans and he said because it was still new. I asked if he was familiar with Buprenorphine and explained it had been around for some time. He said he would read up on it before prescribing it.
PPLPMDL0020000001	Euclid	OH	44119	7/15/2011	Quick call....briefly introduced butrans to doc. Discussed the indication and positioning, dosing options, and commercial formulary coverage. He wanted to know how much it cost. I showed him the FPI with pricing info and explained the wholesale cost. Scheduled a lunch to discuss further.
PPLPMDL0020000001	Akron	OH	44312	7/15/2011	Quick call through the window. I asked Dr. Manning how often he was treating patients with moderate to severe chronic pain and he said he was every so often. I quickly reminded him that Butrans was an option for those patients and that it is schedule 3 and once a week dosing.
PPLPMDL0020000001	Akron	OH	44312	7/15/2011	I asked Dr. McRoberts if he had a chance to review the Butrans lit that I left and he said briefly. I reminded him it was a once weekly patch indicated for chronic pain. I asked he had any patients he thought would benefit from a schedule 3 LAO like Butrans. He said he would read a little more about it and would keep it in mind.
PPLPMDL0020000001					

	Cleveland	OH	44109	7/15/2011	worked internal medicine - left Butrans fpj,initiation guide,patient information booklet,formulary grid,interact card and business card for Dr.Lindheim, Dr.Harrington,Dr. McCreery,Dr.Falk-Ytter,Dr.Jones,Dr.Ricanati and Dr.Eisen- as you cant see the doctors unless the doctors call you for an appointment. worked rheumatology dept-left Dr.Ballou Butrans fpj,initiation guide,patient information booklet,formulary grid and Butrans dinner program invitation,as dr was seeing patients and i couldnt see him today,left each dept senokot-S protocol pads for each physician to give patients.
PPLPMDL0020000001	Euclid	OH	44119	7/15/2011	Spoke to Kathryn, fill in pharmacist from the Madison store, about Butrans and oxycontin. She was not familiar with Butrans or whether the store sees scripts. I explained the indication, dosing, positioning, and the savings cards. Also explained how to properly apply butrans. She would forward the literature to Dave who is off today.
	Cleveland	OH	44109	7/15/2011	i talked to Ron,Pharmacy Manager,about any scripts for Butrans and Ron said nothing at this point but he has the 5mcg in stock.we talked about Butrans patient information booklet,application/rotation of Butrans and i asked Ron to discuss with patients when they do come for Butrans, Ron agreed.we talked about insurance coverage,electronic savings cards at Rite Aid for Butrans and i showed Ron Butrans visual aid,discussed 5 Butrans core messages and Ron said once weekly dosing and transdermal delivery are 2 benefits he see's in Butrans.i asked Ron if he would recommend Butrans to any doctors,if patients tell him their pain isnt controlled by short-acting opioids? Ron said he would do that but it depends on physician relationship but he's willing to do that.i recommended Senokot-S
PPLPMDL0020000001	Euclid	OH	44119	7/15/2011	Quick call as doc was leaving early. I reviewed the Butrans indication and patient type. He said he really wants to talk about it but does not have time. I gave him an initiations invite, guide, and formulary grid for butrans and oxycontin. Said he will be on vacation next week but the week after would be better.
	Independence	OH	44131	7/15/2011	Quick call- Caught Dr Pai through the window. He said he did not have time today. I handed back a Butrans "Initiations" invitation & described the interactive nature of the program to him. He said he would have a look at it later. Spoke with MA Jill who said they have been unusually busy lately & that the new computer training they are doing is backing things up. I told Jill about the "Initiations" program & asked her to remind Dr Pai to have a look at it. She said she would do her best.
PPLPMDL0020000001	Uniontown	OH	44685	7/15/2011	I asked Dr. Keith how often she was treating chronic pain and she mentioned more often than she liked but mostly prescribed SA therapy. I asked if she often had patients who were asking to be titrated on their SA therapy and she said she did and the call was cut short.
PPLPMDL0020000001	Cleveland	OH	44113	7/15/2011	i talked to dr about his patients taking tramadol every day for chronic pain but not controlled and asking him for something different,dr said if patients are taking tramadol and thats not working he'll typically convert them to vicodin.i showed dr Butrans visual aid,opioid experienced patients and asked dr if he would consider Butrans right after tramadol instead of starting patients on vicodin? dr said he might if patients are willing to apply a patch and he could trust patients to rotate patch once a week.dr asked about insurance coverage i showed dr Butrans formulary grid,focused dr on commercial plan patients and discussed Butrans patient savings cards.i recommended Senokot-S
	Cleveland	OH	44114	7/15/2011	i asked Dave,Pharmacy Manager,if he's recommended Butrans to any doctors or patients? Dave said he's not recommended it to doctors,but has talked to a couple of patients who were complaining about their vicodin and percocet not lasting long enough so he thought a long-acting opioid could be appropriate,dave said he gave patients Butrans patient information booklet and told them to talk to their doctors.i asked dave to focus discussions with patients on application/rotation of Butrans,if they are getting scripts filled,he said yes he's been doing that and thinks its helping some patients.we talked about OxyContin stocking,7 tablet strengths and i showed dave OxyContin conversion guide and asked Dave to recommend OxyContin to physicians when he feels it could be appropriate for patients.dave said he could do that with a few physicians,but not many as it relates to OxyContin.i recommended Senokot-S
PPLPMDL0020000001	Westlake	OH	44145	7/15/2011	Spoke with Darrel, i asked what is most important for him to know, and he said what to tell the patients. I reviewed the medication guide and went over application site, steady state in three days. I reviewed the savings program for both Butrans and OxyContin.
PPLPMDL0020000001	Lakewood	OH	44107	7/15/2011	I reviewed the key messages and Dr asked about the doses. We reviewed the doses, initiation and PK profile, Dr asked about managed care for Butrans and I reviewed the coverage and savings program. I invited Dr to come learn more at a speaker program but he said he does not go to them.
PPLPMDL0020000001	Westlake	OH	44145	7/15/2011	Quick call, I asked about his success with Butrans recently and he said that everything has been going well for the majority of patients. I invited Dr to the Butrans speaker program and he will do his best to attend.
PPLPMDL0020000001	Chagrin Falls	OH	44022	7/15/2011	I reminded Dr Rood of our previous conversations about his patient who he has put on Butrans & asked him how that patient is doing. He said that due to the nature of her condition, she has ups & downs as far as pain severity. He said she is still doing well on Butrans & he has recently started supplementing with immediate-release narcotics for her breakthrough pain. He said he just does not have a lot of patients in the office on chronic long-acting opioids. I asked him what the difference was between patients who he refers out & patients who he maintains himself for chronic pain. He said he is careful who he refers because sometimes pain management bounces the patient back to him on high doses of multiple narcotics which is what he tries to avoid. He said the ones he maintains are those which he does not think pain management will do anything for. I asked when he uses long-acting opioids vs short-acting. He said he tries to treat chronic conditions with long-acting medications, but sometimes will keep a patient on short-acting if they are older. I asked him if he thought any of them would benefit from Butrans. He said he had not thought of that before but that he does think so. Reviewed managed care & let him know that he would have to prior-authorize Butrans for Medicare Part D patients. He said he is used to it & will have his nurse do them if he feels it is the best medication for a patient. Also discussed OxyContin as an option for more severe pain patients.
PPLPMDL0020000001	Parma	OH	44129	7/18/2011	Dr Ortega said that about 50% of the patients he has put on Butrans have "not liked it" & have not gotten good results. I asked him to elaborate & tell me more about the patients. He said they have not been patients on high doses of opioids, so he does not know why it hasn't worked. He also said that one of the patients who he had started on 5mcg & titrated to 10mcg complained that the 10mcg "made him feel loopy", so he put him back on the 5mcg. Asked where patients were applying the patch & he said he didn't know about all of them, but one put it on his back. Discussed application & sites as well as medication guide & let him know i would leave more booklets at local pharmacies since he said it is too hard to remember to give them out. Asked how long the patients tried Butrans before discontinuing & he said each tried it for about a month. He added that he thought the right patient is one who is taking 2-3 Vicodin steadily. Let him know that someone who is steady on their current medication may not be ideal to switch. Asked him to consider those who are asking for an increase in dose or frequency of current medication. He agreed to try this. He said he would not give up on Butrans.
PPLPMDL0020000001	Lakewood	OH	44107	7/18/2011	I told Dr it had been awhile since i was able to talk to him about Butrans. I asked what he remembered. He knew that it was a patch for pain. We reviewed the key messages and appropriate patient types. I reviewed the dosing and how to initiate Butrans. I asked if he would give it a try, and he asked about the insurance. I reviewed the managed care for Butrans and that OxyContin is still an option that is covered on Medicaid. I invited him to our dinner discussion to talk to his peers about how they are using Butrans. He does not usually attend anything after hours.
PPLPMDL0020000001	Cleveland	OH	44113	7/18/2011	i talked to dr about his chronic pain patients taking tramadol every day but arent controlled and wanting something different,dr said he does a lot more procedures so he doesnt have a lot of patients that are taking narcotics.i asked dr if he had at least 2 patients like we discussed that Butrans could be an option for? dr said he might,i showed dr Butrans visual aid,appropriate patients,discussed initiation of Butrans and showed dr Butrans initiation guide.we talked about insurance coverage for Butrans.i talked to dr about OxyContin being an option,showed appropriate patients flashcard and dr said he has a few patients on OxyContin but not many,we talked about 7 tablet strengths available and formulary coverage.i asked dr to consider 2 patients to start on OxyContin 10mg and 15mg,if appropriate,dr said okay.i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	7/18/2011	worked family medicine dept-left Dr.Krofina,Dr.Liu and Dr.Forde-Butrans fpj's, initiation guides,patient information booklets,formulary grids and my business cards for each dr.i also left each dr OxyContin fpj,conversion guide,challenging flashcard and formulary grid for OxyContin. worked internal medicine dept- left OxyContin fpj,conversion guide,appropriate patients flashcard,formulary grid and my business card for Dr.Lindheim, Dr.Jones,Dr.Ricanati,Dr.Eisen,Dr.Falk-Ytter and Dr.Harrington as i couldnt see any doctors had to leave information.I also left a Butrans fpj,initiation guide and patient information booklet for each doctor in the internal medicine dept listed here too.
PPLPMDL0020000001	CLEVELAND	OH	44109	7/18/2011	i talked to Rod,Pharmacy Manager,about appropriate patients for Butrans and showed Butrans visual aid for discussion,Rod said he's not seen scripts for Butrans but does like that its transdermal and once weekly dosing is easy for some patients.i asked Rod if he recommended Butrans to any doctors yet? Rod said no and that depends on relationship with dr.i asked Rod if he would tell patients about Butrans that might not be getting their pain controlled by their short-acting opioids. Rod said he does do patient counseling and would do that if appropriate. i showed Rod Butrans patient information booklet and asked him to focus on application/rotation of Butrans,Rod said ok he would do that.i recommended Senokot-S
PPLPMDL0020000001	Parma	OH	44129	7/18/2011	Dr Taylor asked why OxyContin has a higher street value than other drugs & asked how the reformulation changed the tablets to "make them harder to abuse". Let her know that OxyContin was reformulated with the intent to make it less easy to manipulate, however there is no data to suggest that that is the case. Asked that she be just as cautious in prescribing as she always was. She asked what the street value of Butrans is. I told her that while i know of no specifics, Butrans is an opioid & still carries abuse/addiction potential & is a CII opioid. Began "Initiations" program & discussed appropriate patient type, box warning, dosing, titration, & supplemental analgesia. She said that she thinks i finally got through to her & she is thinking of patients she can use it for. She said she has a lot of older patients with low back pain who she would use it in. Discussed managed care & dr said he started a couple patients on Butrans but 1 patient had problems with pharmacy not stocking Butrans.dr said he's concerned that patients will go to pharmacy and not be able to get Butrans.i reassured dr that im working with pharmacies to discuss stocking of Butrans,appropriate patients,Butrans patient savings card program and patient information booklet so pharmacy can discuss application/rotation of Butrans with patient.dr said ok he'll consider writing Butrans again.dr said the 2 patients on Butrans seem to be doing well,no call backs or complaints so thats a good sign.i showed dr Butrans visual aid,page 11 and asked dr how he treats patients with some of the pain conditions listed,we discussed arthritis patients.dr said he starts with a NSAID,then arthritis medicine and if patients are still experiencing pain he'll give them a narcotic.dr said for patients with chronic low back pain he starts with NSAID,muscle relaxer,exercise,diet and if that doesnt work starts with tramadol,then vicodin and percocet.i asked dr how Butrans could play a role for his arthritis patients? dr said after short-acting analgesics dont work,he would consider a long-acting opioid. I showed dr Butrans initiation guide,discussed Butrans initiation dosage strengths for those patients taking less than 300mg tramadol and for dr to start 2 patients on Butrans instead of refilling tramadol or converting them to vicodin,dr said he'll do that.we discussed insurance coverage for Butrans
PPLPMDL0020000001	Lakewood	OH	44107	7/18/2011	I asked Dr if he would try Butrans instead of vicodin around the clock for just a few appropriate patients this week. He said he would try. We reviewed the managed care for Butrans and that OxyContin has coverage for Medicaid and Med D AARP patients. Asked him to come talk to his peers about how they are prescribing Butrans at the speaker program.
PPLPMDL0020000001	Parma	OH	44129	7/18/2011	Spoke with pharmacist Heath who said he has Butrans 5 & 10mcg in stock & has not yet dispensed any. I reviewed with him the appropriate patient type & savings program. I asked him what prescribers in the area he would recommend me speak to more about Butrans & he recommended Jen Hula's office. He said he gets a lot of prescriptions for their patients on Vicodin & tramadol chronically. Reviewed OxyContin savings cards which he said he could use more of. Offered Ryzolt savings cards but he said he did not need any because he never dispenses it.
PPLPMDL0020000001	Cleveland	OH	44113	7/18/2011	worked pain management- see call notes on dr davoud and dale novak,pa
PPLPMDL0020000001	Cleveland	OH	44195	7/18/2011	worked pm&r dept-left Dr.Reddy and Dr.Jedlicka Butrans fpj's, initiation guides,formulary grids,patient information booklets and my business card.also left them OxyContin "challenging" flashcards,conversion guides and formulary grids for OxyContin and 1 Senokot-S protocol pad for each physician. worked pain management dept-left Dr.Mekhal,Dr.Minzter,Dr.Cheng,Dr.Vrooman,Dr.Katyal,Dr.Stanton-Hicks and Dr.Wang Butrans fpj,initiation guide,patient information booklet,formulary grid,patient savings card flashcard for Butrans and my business card for each doctor
PPLPMDL0020000001	Lakewood	OH	44107	7/18/2011	Quick follow up, I reviewed our last conversation about the patient he tried on Butrans. I asked if he had a few other patients in mind who might benefit from Butrans and he said he will give it another try. Reminder about the upcoming dinner discussion and he will think about it.
PPLPMDL0020000001	Arlington	OH	45814	7/18/2011	presented butrans info and asked where he would use. he stated he would do some research and get back to me.
PPLPMDL0020000001	Lakewood	OH	44107	7/18/2011	Quick call, I asked Dr if he would attend our upcoming dinner discussion on Butrans so that he can see how his peers are using Butrans. He said he will try to make it. I asked Dr if there is any other info I can provide for him to try Butrans on just a few patients, and he said no, he will give it a try.
PPLPMDL0020000001	Lakewood	OH	44107	7/18/2011	Quick call with Megan, I reviewed the patient information and the important info for her to tell the patients, steady state, how to apply and what to do if the patch falls off per the medication guide. Reminder that OxyContin is still an option when Butrans may not provide adequate analgesia.

PPLPMDL0020000001	Cleveland	OH	44113	7/18/2011	i talked to Dale,PA,about patients he see's that are taking tramadol,daily,for chronic pain and NOT refilling their tramadol when patients tell him their pain isnt controlled with their tramadol dose.i asked Dale to think of patients this week,like this,that he can start on Butrans and showed Dale Butrans visual aid to discuss initiation of Butrans.Dale said it makes sense to start patients on a long-acting opioid earlier in therapy instead of having them on short-acting opioids chronically for years. We discussed insurance coverage and i recommended Senokot-S
PPLPMDL0020000001	Parma	OH	44129	7/18/2011	Spoke with Debbie in purchasing who gave me Kevin Zupancic's contact information (director of pharmacy). Also spoke with Stella Lewis (nurse), who said that the nurses of all departments within the hospital are typically educated about new products through pharmacy. Also discussed Butrans indication, usage, dosing, & delivery system. Stella also said that there has been a new conglomerate of hospitals that is joining together (EMH, Parma, & Southwest). What this means in terms of the future of these hospitals is unknown at this time.
PPLPMDL0020000001	Cleveland	OH	44102	7/18/2011	i talked to Gurjeet,Floater Pharmacist,about Butrans stocking and Gurjeet said they only had 1 script for Butrans and they gave that patient the only Butrans 5mcg carton they had in stock.Gurjeet said Butrans is too expensive to order and sit on shelf so when they see scripts for Butrans they will order it for patients.We discussed importance of stocking all dosage strengths so patients arent waiting 24hrs or going to another pharmacy but Gurjeet said that's their policy.i asked when Vicky,Pharmacy manager would be returning to this store so i could talk to her about Butrans and Gurjeet said next monday.Gurjeet said they have Butrans initiation guide and formulary information but he took Butrans pharmacy flashcard.
PPLPMDL0020000001	Lakewood	OH	44107	7/18/2011	Quick call at window, I asked if there was any other info she needed to try Butrans for her patients. She said she will look over the initiation guide again. I reviewed the key messages and asked if she would try just a few patients instead of giving vicodin around the clock. She will try. Reminder that OxyContin is an option when Butrans may not provide adequate analgesia. I asked her to come and see how her peers are using Butrans at our upcoming dinner program.
PPLPMDL0020000001	Lakewood	OH	44107	7/18/2011	Spoke with Joe, we reviewed the medication guide and the important info to tell the patients. We discussed steady state and that patients should wait 3 days to titrate. Reminder that OxyContin is still an option when Butrans may not provide adequate analgesia.
PPLPMDL0020000001	Lakewood	OH	44107	7/18/2011	Spoke with Kim, she said they do have Butrans in stock but she did not know who many scripts they have been getting. We reviewed the medication guide and how to instruct patients on proper use and application. We reviewed the dosing, initiation guide and steady state. We reviewed the conversion guide and savings cards for OxyContin.
PPLPMDL0020000001	Westlake	OH	44145	7/18/2011	I reviewed our last conversation and asked if all of his questions have been addressed regarding Butrans. He asked again about the dosing and we reviewed the invitation guide and dosing. I asked invited Dr to speaker program to learn from his peers about how they are prescribing Butrans. Reminder about managed care for Butrans and OxyContin.
PPLPMDL0020000001	Lakewood	OH	44107	7/18/2011	I asked how his Butrans patients are doing and if they are seeing success. He said yet they are doing fine. He said that the only problem has been managed care and we once again reviewed managed care for Butrans and the savings program. I reminded him that OxyContin is also an option that is covered on Medicaid and Med D AARP.
PPLPMDL0020000001	Brooklyn	OH	44144	7/19/2011	Spoke with Clarissa (MA) who said Dr Hilton was on vacation all week. I reviewed Butrans "Initiations" invitation with her & gave her an overview of Butrans, including indication, dosing, & appropriate patient type. I asked if she thought Dr Hilton would be interested & she said she had no idea but would leave it for her when she gets back. I also discussed savings cards with Clarissa & reviewed eligibility requirements.
PPLPMDL0020000001	Westlake	OH	44145	7/19/2011	Spoke with Amid, he wanted to hear about both what to tell patients and what we are talking to Drs about. We reviewed the invitation guide and appropriate patients for Butrans. We discussed how to properly apply Butrans and that patients should wait 3 days for steady state before titrating. Reminder that OxyContin is still a long acting option when Butrans may not provide adequate analgesia.
PPLPMDL0020000001	Parma	OH	44134	7/19/2011	Spoke with floater pharmacist & discussed Butrans overview as she had not yet dispensed any. Discussed appropriate patient type & savings program. Also asked if they needed savings cards for OxyContin or Rylozt. She said she has not seen any of either here, so she asked for one package of each. She said to come back another time to see the regular pharmacist as she was so busy she could not spend any more time talking to me.
PPLPMDL0020000001	Westlake	OH	44145	7/19/2011	Dr said that he does have a patient in mind for Butrans. I asked him to tell me more and he said it is a female who is currently taking 30mg of oxycodone per day. We discussed how to taper and initiate this patient on Butrans. I asked what the insurance is and he said Medicaid. I let him know this will be a prior auth and he said he wanted to still try to get it through because she has been on other long acting in the past. I reviewed managed care for Butrans and that it will be best to start BWC or patients who have commercial insurance. We discussed that OxyContin is still an option when Butrans may not provide adequate analgesia. He said he has dismissed some OxyContin patients but still has many patients that he maintains. We reviewed that OxyContin is covered on Medicaid and Med D AARP.
PPLPMDL0020000001	Waterford	OH	45786	7/19/2011	W - Miral said she would like to utilize Butrans because she likes the idea of a 7 day therapy. Getting patients that wouldn't have coverage issues may be the only concern. She said Dr. Waters sees most of the BWC patients. I - Butrans review of indication and 7 days of buprenorphine therapy in 1 application with a CII scheduling. Use of placebo Butrans as a visual for the her to see what it looks like and that the adhesive covers the entire surface of the transdermal itself. Review of formulary coverage - BWC and commercial plans with a 3T status. Savings Card program eligibility.
PPLPMDL0020000001	Westlake	OH	44145	7/19/2011	Spoke with Lisa, She would prefer to hear about what to tell patients about Butrans, we reviewed the medication guide and how to apply Butrans. We reviewed steady state in 3 days. I asked how often she would consult with a new patients, she said only if they asked for her or have questions the techs can't answer. Reminder that OxyContin is still a long acting option.
PPLPMDL0020000001	Solon	OH	44139	7/19/2011	Spoke with nurses Julie & Deborah who said that Dr Zaidi was doing a procedure & had just come back from 2 weeks of vacation so he was not in a good mood & it was not a good time to see him. I asked when a better time would be & they suggested I schedule a lunch. Delivered Butrans overview (dosing, usage, delivery system) & asked if they knew if Dr Zaidi has tried any patients at all since he indicated at our last lunch that he was ready to try it. They both said they do not think he has started anyone. Reviewed appropriate patient type & asked them to give Dr Zaidi an "Initiations" invitation. They agreed.
PPLPMDL0020000001	Cleveland	OH	44103	7/19/2011	i talked to dr about her patients taking tramadol every day for their chronic pain but not controlled and perhaps a long-acting opioid like Butrans would be appropriate instead of refilling tramadol or converting to vicodin.dr said she's talked to a few patients and given Butrans patient information booklets if patients arent sure about wearing a patch for a week and it seems to be working.dr said she likes long-acting opioids and will keep this option in mind.we talked about OxyContin being appropriate after Butrans 20mcg isnt controlling patients pain or if she has patients on vicodin or percocet that she wants to convert to OxyContin,we discussed insurance coverage and 7 tablet strengths and i showed appropriate patients flashcard for OxyContin.i gave dr August dinner invitations.i recommended Senokot-S
PPLPMDL0020000001	Parma	OH	44129	7/19/2011	Spoke with Marion & reviewed appropriate patient type for Butrans. She said she thinks it is a good option but she has not dispensed any yet. She had no specific recommendations of who may be interested in hearing more about it in the area. Also discussed OxyContin & Rylozt savings cards, which she said she could use.
PPLPMDL0020000001	Cleveland	OH	44103	7/19/2011	i talked to dr about Butrans being an option for commercial plan patients that have chronic pain and take short-acting opioids every day but arent controlled.dr said he only has a few commercial plan patients and most of them dont have chronic pain.dr said its the uninsured and medicaid patients that have chronic pain and he's not willing to do the PA for Butrans.we talked about OxyContin being appropriate when patients are taking percocet and thats no longer controlling patients pain.dr said he knows its available on medicaid so its easy for him to write OxyContin and he likes that.i showed dr appropriate patients flashcard for OxyContin and i recommended
PPLPMDL0020000001	Independence	OH	44131	7/19/2011	I asked Dr Jack at what point he considers a condition "chronic". He said that after a couple of months, he would consider something chronic. I asked him what the difference are between patients who he would refer to pain management vs patients he would maintain himself in his office. He said he usually maintains patients unless he notices that the person is repeatedly not getting adequate pain control from whatever medication he gives them. He said if someone asks repeatedly for an increase in dose or frequency, he would refer to pain management. He said he tries to match a patient's personality with an a pain management specialist who would compliment it. I asked if he notices that patients get bounced back to him & he said they usually stay in pain management. Discussed appropriate Butrans patient type, including those who are taking 2-3 Vicodin per day for a chronic issue, who call or come in asking for an increase in their medication. He said he is "still thinking about it". Also discussed OxyContin as an option for appropriate patients suffering with more severe pain.
PPLPMDL0020000001	Cleveland	OH	44144	7/19/2011	Dr Paul said she does not remember much about Butrans so she asked me to give her the details again. Reviewed Butrans indication, dosing, delivery system, & appropriate patient type. She said that they do see a lot of patients who have conditions such as low back pain or spinal issues causing pain who take around-the-clock pain medication chronically. She asked if it is less abusable than Vicodin. I told her we have no comparative data but that Butrans is an opioid & therefore does have abuse/addiction potential, so she should be just as cautious in prescribing Butrans as she would any other opioid. Discussed various appropriate patient types, including those already on opioids, asking for an increase in dose or those who she is ready to start on an opioid for a chronic condition. She said many of these patients are older. Reviewed managed care coverage & savings program. She said they will not do a prior authorization, which is why they prescribe mostly tramadol or Vicodin. Asked her to think of her working patients who fit the indication. She said she does have a few. Also discussed OxyContin q12h as an option for patients on the more "severe" pain side. She said they usually don't start patients on OxyContin but will continue them if needed. She asked if Butrans can be used for cancer pain or acute pain. Reviewed indication & let her know that Butrans is contraindicated for acute pain.
PPLPMDL0020000001	Westlake	OH	44145	7/19/2011	Dr told me that he started a new patient on Butrans this week. I asked how they are doing, he said very well, He said that overall he has received good feedback and he is happy with Butrans. I asked if he will continue to prescribe and he agreed. (He will be on vacation next week in the DR. He will not be attending dinner due to religious fasting)
PPLPMDL0020000001	Euclid	OH	44132	7/19/2011	I asked doc what benefits he sees in Butrans. He said he likes that its a patch and that he does not have to write a bunch of pills. He said its not covered on medicaid though. I showed him the formulary grid and reminded him fo the BWC coverage. I asked him to try butrans for those patients.
PPLPMDL0020000001	Cleveland	OH	44124	7/19/2011	Quick call.....I asked doc if he sees a place for a long acting CII like Butrans in his practice. He said maybe. I gave him an initiation guide a formulary grid. He said he would try it.
PPLPMDL0020000001	Akron	OH	44319	7/19/2011	Introduced Butrans and FPI utilizing the FPI. I explained the message I was delivering to Dr. Wu and other physicians.
PPLPMDL0020000001	Westlake	OH	44145	7/19/2011	Saw Dr through window while leaving her invitation for the dinner discussion. She will try to make it or will call to set something up so we can talk further about Butrans.
PPLPMDL0020000001	Mayfield Hts	OH	44094	7/19/2011	Window call.....I reminded doc that there is an alternative to hydrocodone several times a day. I showed him an example of the demo of Butrans and explained that one patch last for and entire week. Also told him that it could be refilled and called in to pharmacies. Scheduled lunch.
PPLPMDL0020000001	Cleveland	OH	44113	7/19/2011	i talked to dr about his patients taking tramadol every day,for their chronic pain,yet not controlled and asking him for something else.dr said he has hundreds of patients on tramadol,some do well with short-acting tramadol and some dont.dr said he likes long-acting opioids and thinks Butrans would be an option for some patients but he has to remember Butrans is there.dr asked about medicaid coverage as thats the majority of patients here.we talked about PA for medicaid patients and Butrans and dr said he'll think of a couple patients and talk to them and will let me know,dr asked me to follow-up at end of week.i recommended Senokot-S
PPLPMDL0020000001	South Euclid	OH	44121	7/19/2011	Window call.....I reviewed the butrans indication, positioning and the CII status. Gave him an engage invite and a butrans formulary grid. Nothing learned.
PPLPMDL0020000001	Independence	OH	44131	7/19/2011	Started to discuss various conditions causing chronic pain that Dr Sundaram treats in his office, but then he got 2 phone calls & 4 pages, so I told him I would come back another time to continue the discussion. He said he really appreciated it. Spoke with Lisa & June & reviewed savings cards for Butrans & OxyContin.
PPLPMDL0020000001	Waterford	OH	45786	7/19/2011	W - Waters said that he hasn't written for Butrans, but is keeping it in mind as an option for patients. He shared that a lot of patients will put up a fight to be switched from what they are currently taking or those that will be hesitant to use a patch. I - Butrans review of indication and 7 days of buprenorphine therapy in 1 application with a CII scheduling. Use of placebo Butrans as a visual for the physician to see what it looks like and that the adhesive covers the entire surface of the transdermal itself. Review of formulary coverage - BWC and commercial plans with a 3T status. Savings Card program eligibility.
PPLPMDL0020000001	Akron	OH	44319	7/19/2011	I asked Dr. Wu if he had many patients who had been on SAO for more than 3 months and he said yes. I asked him if he felt those patients needed to be on a LAO and he said yes. I explained that Butrans may be an option for those patients and that it was a LAO and a schedule 3. He agreed and said he just needed more reminding.
PPLPMDL0020000001	Cleveland	OH	44130	7/19/2011	Quick call- Discussed titration ability every 3 days to a maximum dose of 20mcg. Dr Diab asked me to put the initiation guide on his desk to help remind him. Spoke with Barb & discussed savings cards for Butrans & OxyContin. She said they have enough of both of them for now.

PPLPMDL0020000001	Parma	OH	44134	7/19/2011	I asked Dr Hernandez if he finds that he uses Butrans now in patients for whom he would have prescribed OxyContin. He said that if the patient would need only a low dose OxyContin, he might choose Butrans instead, but he uses them both in different types of patients. He said that patients have been very pleased with their results with Butrans & that keeps him pleased as well. I asked if he finds the need to titrate often & he said sometimes, but not always. He said he feels there is a big different between the 5mcg & 10mcg, so patients may need more than 5 but less than 10mcg. He also said some patients have requested Opana more now. He said Opana used to "not have a street value", but "now it does because of the OxyContin reformulation." I asked what he does with those patients. He said it depends, but he usually doesn't give patients what they ask for, although he added that sometimes patients are "allergic" to medications they do not want. He said he sent the information about how much buprenorphine Butrans contains to BWC & has not heard back from them yet. He said he is ready to defend medications as patients need an advocate. I agreed. Also discussed Senokot-S for opioid-induced constipation.
PPLPMDL0020000001	Cleveland	OH	44103	7/19/2011	I talked to Michael, Pharmacists, as Amy, Pharmacy mgr was out today, about Butrans scripts and he said that Dr Patel did have a patient go to their store and get a refill for Butrans, patient started on Butrans 5mcg and was titrated to 10mcg, no problems. I confirmed stocking, discussed 5 Butrans core messages and asked Michael to focus patient discussions on application/rotation of Butrans, Michael said he is doing that and giving patients the Booklets if they are complaining that their pain isn't controlled with short-acting opioids and telling them to speak with their physicians about Butrans. I recommended Senokot-S
PPLPMDL0020000001	Akron	OH	44319	7/19/2011	Dr. yee said that there was a definite place for Butrans in his practice for both opioid naive and experienced patients. I explained how to initiate therapy in both those patient types by using the initiation and titration guide.
PPLPMDL0020000001	Cleveland	OH	44195	7/19/2011	worked apm dept-left Butrans fpi, initiation guide, patient information booklet and Butrans dinner invitations for Dr. Mekhal, Dr. Minzter, Dr. Katyal, Dr. Frost, Dr. Schaefer and Dr. Vrooman. talked to Kathy kraus, PA and Anne Crawford, NP, in APM dept-see notes. worked neurology dept-had to leave Butrans fpi, initiation guide, patient information booklet and dinner invitations for Dr. Krieger, Dr. Mays, Dr. Stillman and Dr. Spears. Worked Rheumatology dept-left Butrans fpi, initiation guide, patient information booklet and dinner invitations for Dr. Calabrese, Dr. Chatterjee, Dr. Deal, Dr. Mazanec and Dr. Long. left Butrans fpi, initiation guide, patient information booklet and my business card for Betsy Kirchner, NP, works with Dr. Calabrese and Patty Paczos, PA, works with Dr. Long
PPLPMDL0020000001	Mayfield Village	OH	44040	7/19/2011	Spoke to Danielle about the stocking of Butrans. She said they do have one patient on it and they are stocking. She did not recall if patient uses a savings card but believe the cost was reasonable. I explained the savings cards program and how it can be used for commercially insured customers. She has a few oxycontin patients and and patients can generally afford it as well. Provided medical education catalog for CEs.
PPLPMDL0020000001	Waterford	OH	45786	7/19/2011	W - She said that normally Doc Waters handles the chronic pain medication therapy, but likes that it has a CII scheduling. Most patients in her practice are either medicaid or medicare covered so the options are limited for her. I - Butrans review of indication and 7 days of buprenorphine therapy in 1 application with a CII scheduling. Use of placebo Butrans as a visual for the her to see what it looks like and that the adhesive covers the entire surface of the transdermal itself. Review of formulary coverage - BWC and commercial plans with a 3T status. Savings Card program eligibility.
PPLPMDL0020000001	Cleveland	OH	44121	7/19/2011	Window call.....reminded doc of the butrans positioning and asked him to try one patient that has failed on tramadol. Gave him formulary grid reminder and "a week ahead" reminder.
PPLPMDL0020000001	Westlake	OH	44145	7/19/2011	Dr said that he is still trying to find the right candidate for Butrans. He said many of his patients are patients on higher doses opioids who would be better for OxyContin. I asked if he has started any patients on tramadol or vicodin recently and he said he has but they are more acute pain. I asked if he has patients who are taking 2-3 5mg vicodin per day whose pain is not well controlled. He said he does, and I asked him to start them on Butrans instead of increasing their dose of short acting. He said he will try. I asked if he would come to our dinner discussion to talk to his peers about how Butrans is benefiting their patients. He will check to see if he can come to the Westlake program since he lives close.
PPLPMDL0020000001	Independence	OH	44131	7/19/2011	Quick call- Discussed Butrans as a long-acting CII opioid & reminded Dr Rob that he had said that he thought he might prescribe Butrans for a patient who is not well controlled on Vicodin instead of putting them on Percocet.
PPLPMDL0020000001	Sagamore Hills	OH	44067	7/19/2011	Dr Scanlon came into breakfast & said that he was excited to tell me that he has been writing Butrans for a few patients. I asked him to tell me a little bit about the patients he was selecting. He said he has been using it on patients who are already on some dose of opioids. He said that he has heard back from one patient that he likes it & is doing well but has not had a follow-up visit with the others. He added that he even called in some of the prescriptions because he has that ability since Butrans is CII. He said that he likes being able to call in something that is long-acting. Dr Scanlon said that he plans to continue to prescribe Butrans so that he can get more experience. I asked him his thoughts on using it in patients for whom he is ready to start on Vicodin if he knows their condition is chronic & he said this is an area he will start to consider as well. Started to go through Initiations presentation but he said he did not have time to finish it. He requested more savings cards. Also reminded Dr Scanlon of OxyContin q12h with 7 available tablet strengths. He also asked for savings cards for
PPLPMDL0020000001	Hudson	OH	44236	7/20/2011	Reviewed with Dr Seiple appropriate Butrans patient type. He said that he feels like he knows where to position Butrans now whereas before he thought it was for patients on higher doses of opioids. He said that when he thinks of patients who he would like to switch from their current medication, it is usually patients who are on high doses of opioids. Discussed OxyContin q12h as a potential option for some of those appropriate patients. I asked how often he sees patients who are taking 2-3 Vicodin or tramadol per day month after month requesting an increase in dose or saying their medication is wearing off too quickly. He said often. I told him those would be potential patients to think of Butrans for. I asked him to switch them to Butrans 5mcg/hr, if appropriate, instead of refilling their Vicodin or tramadol. Also asked him to remember commercial insurance patients & reminded him of savings cards. He said he is willing to try Butrans for appropriate patients.
PPLPMDL0020000001	Hudson	OH	44236	7/20/2011	I reminded Dr Tosino of our previous conversation when he told me that while he does not generally like to prescribe opioids, he does have some patients who he trusts who he would feel comfortable doing this for. He said that is true. I told him that patients who are steady on their current medication & who are doing well may not be the patients to consider for Butrans, but rather to think about those who are on 2-3 Vicodin or tramadol per day month after month who call or come in & say their medication is wearing off too quickly or requesting an increase in dose. I asked him what having a long-acting CII medication meant for him. He said he knows that it makes more sense to have patients with chronic issues on long-acting medications, but that usually the prescriber "gets trapped" into a cycle of just continuing them on their short-acting. He said to be honest that it is easier to just refill a medication for a patient than to think about starting them on something different & then take the time to explain it to the patient. He said he knows that is not always right for the patient though. I showed patient information booklet & asked if having that as a tool to help give the patient information would be of value to him & would help take that burden away. He said yes. Reviewed appropriate patient type & he said he will try it for that patient type. Also reviewed 7 available tablet strengths of OxyContin.
PPLPMDL0020000001	Cleveland	OH	44104	7/20/2011	I talked to dr about her patients this week that have chronic pain and are taking tramadol or vicodin every day but not controlled and considering Butrans as an option, dr said since our lunch last week she's considering Butrans for patients but hasn't had anyone complain to her that their tramadol or vicodin isn't working, dr said she will keep Butrans in mind and asked about initiating dosage strengths and insurance coverage. I showed dr Butrans visual aid, initiating dosage strengths, 5mcg and 10mcg, and appropriate patients section and asked dr to focus on commercial plan patients, dr said ok. I recommended Senokot-S
PPLPMDL0020000001	Mayfield Heights	OH	44124	7/20/2011	Quick call.....reminded her of the appropriate patient for Butrans and the initiation dosing. Gave her an interact invitation and formulary grid.
PPLPMDL0020000001	Cleveland	OH	44106	7/20/2011	talked to dr about his chronic pain patients taking Ultram every day and still not controlled and asking him for more pills or wanting something else, dr said he does hear that from patients. I asked dr to consider Butrans for those patients at that point, instead of refilling ultram or increasing pills, dr said he might do that if patients were appropriate. I showed dr Butrans visual aid, discussed appropriate patients and told dr patients taking less than 300mg tramadol a day can start on Butrans 5mcg, dr said ok. we talked briefly about insurance coverage and I asked dr to discuss application/rotation section in Butrans patient information booklet when he does start more patients, dr said ok. I recommended Senokot-S for opioid induced constipation.
PPLPMDL0020000001	Cleveland	OH	44104	7/20/2011	I talked to dr about his patients with chronic pain taking tramadol every day and not controlled and considering Butrans for these patients instead of refilling their tramadol or converting them to vicodin, dr said he has a few patients on Butrans and they are well controlled, he does like the long-acting opioid action of Butrans and likes that its a patch dosed once a week. dr said his challenge is that he has a lot of medicare in his office and medicare's not covering Butrans. I asked dr to focus on a couple commercial plan patients like we discussed and start on Butrans, dr said ok if he has any coming in this week, he'll remember Butrans for them. I showed dr OxyContin appropriate patients flashcard and we discussed OxyContin being an option for patients with 7 tablet strengths and I showed dr OxyContin formulary grid with UHC/AARP preferred coverage for Butrans, dr said ok he has a handful of patients on OxyContin. I recommended Senokot-S
PPLPMDL0020000001	BEDFORD	OH	44146	7/20/2011	Spoke with Marcus, pharmacy manager, who said he has not seen any prescriptions for Butrans yet. Reviewed appropriate patient type, dosing, & titration ability every 3 days to a max 20mcg dose. He also said that he has seen a major drop-off of OxyContin prescriptions & that he has not filled an OxyContin script in weeks. I asked why he thinks that is. He said he has no idea but it might have to do with the reformulation. I asked if he has seen an increase in anything to counter the decrease of OxyContin. He said he basically only Percocet at this point. He said he would keep an eye out for any changes.
PPLPMDL0020000001	Warrensville Heights	OH	44122	7/20/2011	Introduced myself & Purdue's products to Dr Desiato. She said she had not yet heard of Butrans. Reviewed indication, dosing, appropriate patient type, CII, & abuse/addiction potential. I asked her what she would do with a patient with a chronic issue causing pain who was failing on NSAID's or COX-2's. She said in the past she has tried the patient on tramadol or Vicodin & has also prescribed fentanyl. She said that she likes the "patch technology". Discussed appropriate patient type further. Dr Desiato said that she doesn't have a high confidence & comfort level with opioids yet, but she likes hearing about new options. Also discussed OxyContin q12h
PPLPMDL0020000001	Warrensville Heights	OH	44122	7/20/2011	I reminded Dr Kessler of our previous conversation when he told me that because he trains residents most of the time, he does not prescribe a lot of opioids. I asked him what the residents are taught to go to when a patient fails or cannot tolerate NSAID's or COX-2's. He said it depends on the resident's comfort level. He said each is different, but typically they would go to tramadol or Vicodin. He said he himself is more comfortable, but not nearly as comfortable as he used to be. He added that he has seen some patients coming in on Butrans, so he is glad that it is being used by various physicians & specialists. He said as he sees it being used more, he will probably start prescribing also, when he sees the right patient. I asked him what he would consider "the right patient". He said someone with a chronic issue who is not being well-controlled on short-acting medication. He said he likes once weekly dosing & that it is transdermal & CII. Discussed abuse/addiction potential because Butrans is an opioid & went over managed care. Also discussed OxyContin q12h for appropriate patients on the more "severe" side. He said he "got burned" a few years back by a patient who overdosed on opioids, so he is more cautious. I agreed that he should be cautious & discussed importance of appropriate patient selection. Started "Initiations" presentation but did not get to finish it.
PPLPMDL0020000001	Mayfield Hts	OH	44124	7/20/2011	I asked doc how his patients are doing on Butrans. He said the ones that he has are doing fine. He admitted that he could prescribing more because there is definitely a niche for it.....the problem is he has a lot of medicare/medicaid. I reviewed the commercial plans. I explained the initiations invite and how he could learn more about appropriate patients. He asked about being a speaker for butrans. I told him I forward his name on and that it is out of my hands now.
PPLPMDL0020000001	Westlake	OH	44145	7/20/2011	Met Henny the NP, she was filling in for Dr Bashnab today and said that she fills in several times per month. I reviewed the Butrans key messages and she liked the fact that it is a CII and she can prescribe it. We discussed the initiation guide and the appropriate patients for Butrans. We discussed OxyContin could be an option for her to recommend once patients are on higher doses of opioids and Butrans may not provide adequate analgesia. I reviewed managed care for Butrans. I spoke with Angela and she said she recently had a hard time getting a prior auth for Medicaid. We discussed BWC and commercial would have coverage.
PPLPMDL0020000001	Warrensville Heights	OH	44122	7/20/2011	Reminded Dr Mueller of our previous conversation when he told me that he avoids prescribing opioids. He said this is true, now more than ever with the legislation going through the House. I asked him if he has any patients at all who he does trust who he does have on opioid therapy. He said a few. Discussed the importance of appropriate patient selection & asked him to use the same caution in prescribing Butrans. He asked the exact indication, so I went through it with him. He asked how it shows up in urinalysis. I told him to check with their lab for testing for buprenorphine. Discussed delivery system & Butrans as a long-acting CII. He said he prefers long-acting opioids for patients if they do need them chronically because it gives a more steady release of the drug which he said "is better" for the patient. Showed PK profile. He said that he is finding that now pain management doesn't even want to prescribe pain medications because they only want to do procedures, so patients end up back at his office, which is frustrating to him. He asked where patients should apply Butrans. Discussed application & rotation. He asked how young a patient he could use it on & I told him Butrans is only for adults 18 & older. <font color=blue><b>CHUDAKOB's query on 07/28/2011</b></font>-<font color=blue><b>Ashleigh, when a physicians refers to a long-acting giving a more steady release of the "drug" and it being "better" for the patient, it is up to you to correct that statement by telling him that we have no data to suggest that the release of our medication is better in any way or provides any better pain relief than any other opioid including short-acting. By showing him our PK profile, in that situation, you are in essence agreeing with his statement.</font color=green><b>APSEGA's response on 07/29/2011</b></font>-OK. I will be certain to make sure to communicate this with him at my earliest opportunity.<font color=blue><b>CHUDAKOB added notes on

	Warrensville	OH	44122	7/20/2011	Dr Rakowsky reminded me that she does not prescribe opioids when I was talking to Dr Mueller about Butrans. She added that this is because she "got burned" by a patient. Discussed the importance of appropriate patient selection & empathized with her position as a physician trying to do the right thing. Reviewed Butrans indication, dosing, delivery system, & appropriate patient type & told her I wanted her to at least have the information so that if someone comes to her already on it, she is prepared to answer questions if necessary. Also reminded her that Butrans is a CIII opioid & therefore does have abuse/addiction potential. I asked if she uses OARRS & she said she does. I agreed that this is a great way to protect her practice.
PPLPMDL0020000001	Cleveland	OH	44122	7/20/2011	Introduced myself & Purdue's products to Dr Wolkoff. I asked him what he typically does, or would do, if a patient with a chronically painful condition was not being well-controlled on NSAID's or COX-2's. He said he would probably go to tramadol from there, after which he would probably try them in Vicodin. Discussed Butrans indication, dosing, appropriate patient type, CIII, & abuse/addiction potential.
PPLPMDL0020000001	Akron	OH	44320	7/20/2011	I asked Misty if she was still having the success with Butrans that she has mentioned form previous calls. She said she she was having success in terms of efficacy but did not have a huge opportunity to write it because of the Medicaid population.
PPLPMDL0020000001	Cleveland	OH	44143	7/20/2011	Quick call....asked doc if he has patients that might be taking hydrocodone several times/day to manage their pain. He confirmed that he does. I asked him if he would consider Butrans for those types of patients - Butrans is a CIII like vicodin and can be called in or refilled. Plus Butrans is just a once weekly dose. Gave him a formulary grid and initiation invite.
	Cleveland	OH	44104	7/20/2011	I talked to dr about her patients taking percocet every day for chronic pain but not getting pain controlled with percocet and asking her for something else.dr said she has hundreds of those patients.I discussed 5 Butrans core messages,showed Butrans visual aid to dr and asked dr how Butrans could be an option for those patients when asking for something else? dr said once weekly dosing is a good thing for some patients and transdermal delivery.dr asked if Butrans was a CII,I showed dr Butrans core messages in visual aid,noting that Butrans is a CIII and what that meant was that dr could call in 5 refills of Butrans up to 6months.dr said that was a good thing as its easier to call a medication in for patients.I asked dr if she had 2 patients,commercial insurance,this week that she could start on Butrans? dr said she will think about it and asked me to follow-up with her and keep reminding her of the initiating dosage strengths of Butrans and how to write the script.I showed dr Butrans initiation guide with dosage strengths on back cover and example of a Butrans script.dr took that and said that what I talked to Laura,Pharmacy manager,briefly as she hasn't seen any Butrans scripts and isnt going to stock Butrans until she gets a script.I showed Laura Butrans visual aid,5 core messages and asked her what were a couple features she felt were important to patients? Laura said Butrans being transdermal and patients wearing a patch for once a week were features she thought a lot of patients would really like.Laura asked who i worked with in area and i told her all of the major institutions and surrounding physician offices.I asked Laura to give patients the Butrans patient information booklet,if they tell her their short-acting opioids arent controlling their pain,Laura said she would do that.I recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44120	7/20/2011	talked to Stewart,Narcotics buyer/pharmacist,about Butrans stocking and confirmed that,we talked about doctors writing Butrans in area and he's only seen a few Butrans scripts get filled and he could only recall seeing some from Dr.Sahgal and Dr.Rosenfield but knows they have had more doctors write Butrans.Stewart said he'll check for me next time i stop in but didnt have time today.I asked Stewart to focus his patient discussions on Butrans application/rotation in Butrans patient information booklet,Stewart said he will do that as they have been giving booklets to patients.I recommended Senokot-S
PPLPMDL0020000001	Euclid	OH	44117	7/20/2011	I showed doc the demo Butrans patch and asked him if he knew it's what I've been trying to get him to prescribe. He said yes what I have been trying to get him to prescribe. I confirmed that it is also an alternative to 2 tabs of vicodin/wk or 3 tabs per day. Explained that Butrans is a CIII and can be called in/refilled similar to vicodin. He said he is having dinner with Moufawad this evening and he is going to talk about butrans. He asked me to check back with him. Told him I would come back on friday.<font color=blue>-<b>CHUDAKOB's query on 07/28/2011</b>-</font>Charmaine, you do not want to discuss Butrans being an option to a number of pills as this could imply superiority of our product and as you know we have to data comparing Butrans to any other products.<font color=green>-<b>SMERTOK's response on 08/03/2011</b>-</font><font color=blue>-<b>CHUDAKOB added notes on 08/03/2011</b>-</font>I asked Dr. Sahgal and Dr. Rosenfield but knows they have had more doctors write Butrans. Stewart said he'll check for me next time i stop in but didnt have time today. I asked Stewart to focus his patient discussions on Butrans application/rotation in Butrans patient information booklet,Stewart said he will do that as they have been giving booklets to patients.I recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44104	7/20/2011	dr said he has 2 patients he wants to start on Butrans and wants to talk to me about that to ensure he has all of the information he needs but doesnt have time to talk to me today.dr asked if i could come back on Friday,around 11:30am as he'll have some time to talk? i told dr that was fine and i could return to his office on friday morning.
PPLPMDL0020000001	Cleveland	OH	44106	7/20/2011	talked to dr about his patients taking vicodin,5mg,1-2 tabs a day, and not controlled and asking him for something else or more pills.I asked if dr Butrans would be an appropriate option for patients at that point,dr said he might consider starting them on Butrans but in the past he would just increase vicodin to the 7.5mg dosage strength and see if that controls pain.I showed dr Butrans visual aid,discussed Butrans once weekly dosing and asked if patients would be interested in knowing there's an option like Butrans available? dr said some patients like the patch and some just want their pills.I asked dr to focus on commercial pain patients,per our discussion that arent controlled and starting them on Butrans instead of refilling vicodin or increasing dosage strength,dr said ok he'll consider that.we talked about Butrans patient savings cards for commercial pain patients and Butrans patient information booklet.I recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44106	7/20/2011	worked pain management dept-see call notes on dr khali and dr sahgal
PPLPMDL0020000001	Parma	OH	44129	7/20/2011	Dr Gioglietti said he has had a horrible headache for two weeks straight & was preparing for a 2 week trip overseas, so he was very short on time. I told him that all that travel time would give him a lot of opportunity to go online to check out the "Initiations" interactive program to assist him in identifying who is & who is not appropriate for Butrans. I let him know that I could tell it was not a good time for him so I would return after he gets back to have a good Butrans discussion. He said he would be returning August 1st & would talk to me then.
PPLPMDL0020000001	Copley	OH	44321	7/20/2011	Dr. Machado said that he had prescribed Butrans for at least 2 patients one of which was Medicaid. He said that patients were getting adequate pain relief and he felt confident prescribing it moving forward. I reminded him of titration and of our coverage, explaining that getting it covered on a commercial insurance should be easier.
	Cleveland	OH	44109	7/20/2011	I talked to Adam,Pharmacy Tech and Naser,Pharmacist,about Butrans 5 core messages.Both Adam and Naser said they like that Butrans is transdermal and is a patch for patients to wear once a week but they have seen any scripts for Butrans.Naser said he's not ordering Butrans until he see's his 1st script,then he has no problem order the Butrans 5mgc and 10mgc,we discussed importance of stocking so patients dont have to wait 24hrs but Naser said that's where he stands on this topic,he needs to see the 1st script.Naser asked who i was working with in the area,told him major institutions and surrounding physician offices,Naser said he would tell doctors about Butrans if he hears any patients complaining of their short-acting opioids.I left 2 Butrans patient information booklets and asked Naser and Adam to tell patients about application/rotation of Butrans once they see scripts,both agreed. I gave Naser the Medical Education Catalog flyer for Pharmacists Role in REMS training and Naser said that was great and he appreciates any educational materials we have available.
PPLPMDL0020000001	Akron	OH	44333	7/20/2011	I asked Dr. Griffiths if she was still focused on prescribing Butrans for patients who were failing on their Percocet and Vicodin. She said she was and was focused on prescribing it for the 20 percent of her patient population that has coverage and she committed to continuing that habit.
PPLPMDL0020000001	Bedford	OH	44146	7/20/2011	I asked Dr Haddad how his patients who he selected for Butrans are doing. He said that overall, he is getting a good response. He also told me again about the patient who pays out-of-pocket because she is so happy with the pain relief she gets. I asked if he gave her a savings card & he said he did. I asked him what it was about these patients that made him think of Butrans. He said he really didn't know, but he looks for patients who are not well-controlled on their current therapy. He told me that he just tried to write it again, but the insurance wanted a fentanyl failure first. I reminded him of commercial coverage & also BWC. He said he had forgotten about BWC. I said that might be an area he he could focus on so that he does not get managed care push-back & so that he can gain more clinical experience with Butrans. He agreed that this would be a good patient population to focus on. Discussed "Initiations" program with him & invited him to participate. He said he could not do it in the office but he might check it out at home. Also reminded him of 7 tablet strengths of OxyContin & savings available to discussed Initiations presentation with dr.4 patient case studies and dr shared thoughts on each case study.dr said for opioid naive patients, she wouldnt rule out but might start patients on Ultram first.dr said based on the fact that tramadol has some serotonergic actions that block pain,she has been prescribing tramadol first,then would consider a long-acting opioid like Butrans if the tramadol wasn't controlling patients pain.dr said for patients who are older than 65,like 1 patient case study in presentation,she would consider Butrans 5mgc for that patient but the problem would be insurance coverage since medicare doesnt cover Butrans.dr said if patients are taking 1-2 tabs of vicodin 5mg,daily for chronic pain she would look at any other comorbid conditions and probably prescribe a Cymbalta or other medication for patient first,then if thats not working on pain,she'll prescribe a narcotic like Butrans.we talked about Butrans patient information booklets being an education tool and dr said she is showing patients application/rotation section in Butrans booklet and patients appreciate that.I asked dr to continue starting patients on Butrans,perhaps those taking tramadol every day where thats not controlling their pain,instead of refilling tramadol or converting them to vicodin.dr said that makes sense and if appropriate she will do that.I recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44143	7/20/2011	Quick call....showed doc the Butrans article and asked him if had a chance to learn more about Butrans. he said he didnt think so. I explained that it may answer some of his questions about the product. I gave him an initiations invite and told him I would discuss with him over lunch.
PPLPMDL0020000001	Cleveland	OH	44114	7/20/2011	discussed 4 patient case studies with dr,from initiations presentation,dr said he wouldnt start an opioid naive patient on Butrans or any other long-acting opioid.I asked dr to tell me more about that and why his decision was that? dr said he would feel more comfortable giving that patient a short-acting analgesic like tramadol initially to see if that controls the pain or look at injections from specialists so he would get a few consults first.dr said after tramadol or vicodin doesnt control pain,he would then consider a long-acting opioid like Butrans.we talked about patients older than 65yrs old,as this was the 1 case study,dr said he doesnt have any patients older than 65 taking Butrans and isnt sure if he would due to safety concerns with long-acting opioids,I showed dr Butrans fj,geriatric use section and dr was surprised with clinical results in geriatric patients taking Butrans.dr said medicare probably doesnt cover Butrans so that would be an obstacle as well,I confirmed that at this time Medicare isnt covering Butrans but he can focus on BWC and commercial pain patients to start on Butrans.dr said he will,he's not had any complaints from patients taking Butrans and their pain seems to be better controlled now that they are taking Butrans.I asked dr to continue starting patients on Butrans and focus discussion on once weekly dosing and application/rotation information in Butrans patient information booklet,dr said he is giving that to patients.
PPLPMDL0020000001	Solon	OH	44139	7/20/2011	Mike said Dan Best has been the Director of Part-D for Caremark CVS for Manufacturer/Trade and Mike has maintained his position. The person over Part-D now will maintain Commercial contracts. They'll still use Caremarks P&T Committee but they'll have alot less impact over their decisions. Once all decisions are final, they'll send a confirmation email. He'll meet with Tony to discuss OxyContin rebate but they now have problems with duplicate claims. He's waiting for P&T decision for Butrans and said there's still a chance for 2011 coverage as well as 2012. He asked that I send an email regarding the length of time we're waited for MKT pieces approval. It'll go to compliance for approval then to Caremark.
PPLPMDL0020000001	Bedford	OH	44146	7/20/2011	I asked Dr Moufawad what kind of opioid dose a typical patient is already on when they come to see him for the first time. He said that it varies from patients on Tylenol 3 to patients on high doses of Methadone or 80mg q8h. I reminded him that OxyContin is only indicated for q12h dosing & he said he is aware. He added that being a pain management specialist is difficult because he feels under constant pressure & scrutiny from the Medical Board & law enforcement when his only intention is to do what is best for each patient. He said that he is sometimes able to taper patients who come to him on very high doses of opioids down & the patients tell him usually that while they are in some pain, they feel much better overall on their lower dose because they do not feel so "drugged up" all the time. I agreed that balancing analgesia with tolerable side effects was a good goal to have. I asked him if his ultimate goal is to taper all his patients. He said it is only possible for some. He went on to say that he thought Butrans would be the future of his practice but then he "got burned" & that is why he stopped for awhile. However, he said that he is now trying it on patients "here & there" when appropriate. He said he hopes the issues with the OH Medical Board get resolved soon so that he would make him more comfortable prescribing. He also requested a type of training company can offer on usage of Butrans. Also reviewed Butrans & OxyContin formulary grids with Amber.<font color=blue>-<b>CHUDAKOB's query on 07/28/2011</b>-</font>The relationship marketing program can provide a lot of training for him. Are you selling him on this?<font color=green>-<b>KPSEGA's response on 07/29/2011</b>-</font>I have told him about it. He has said that he does not have time, but I have a lunch with him in a few weeks, so I plan to run through it with him at that point.<font color=blue>-<b>CHUDAKOB added notes on 07/30/2011</b>-</font>Great. You will need Quick call....reminded doc that he only expressed concern about cost of butrans. I explained the potential \$15-20 co pay for commercially insured patients. Showed him where the savings cards. I talked to dr about Butrans 5 core messages,appropriate patients for Butrans and dr asked if he could give Butrans to a patient that has never started an opioid? i told dr yes,showed dr Butrans visual aid with opioid-naive information and showed dr Butrans initiation guide discussing Butrans 5mgc for the opioid naive patient.dr said he understands Butrans is for patients with moderate to severe chronic pain but low dose short-acting opioids every day,told dr yes,showed Butrans initiation guide and asked dr if he has a couple patients that are taking tramadol every day for chronic pain,but not controlled? dr said yes he does and he'll try Butrans in those patients.we talked about Butrans insurance coverage.I recommended Senokot-S
PPLPMDL0020000001	University Heights	OH	44121	7/20/2011	
PPLPMDL0020000001	Cleveland	OH	44102	7/21/2011	
PPLPMDL0020000001					

PPLPMDL0020000001	Cleveland	OH	44102	7/21/2011	i talked to Nagla,PA,about appropriate patients for Butrans and Nagla said she knows dr celeste started 2 patients on Butrans and both seem to be doing well.nagla said both patients have seen them for a follow-up visit and their pain seems to be controlled with Butrans.i showed Nagla Butrans visual aid,5 core messages and asked her what were the top 3 features of Butrans that stood out? Nagla said she likes transdermal delivery and the fact Butrans is a patch dosed once a week that's easy for some patients.i asked Nagla if she could think of a few patients today and tomorrow,that are taking tramadol every day for their chronic pain but not controlled,and start them on Butrans.Nagla said she will consider that but she consults with each dr before making final medication decision.we discussed Butrans formulary coverage.i recommended Senokot-s
PPLPMDL0020000001	Independence	OH	44131	7/21/2011	Spoke with Sue (nurse) who said that Dr Faيمان would not be able to see me today. She asked that I return in two weeks. Reviewed with Sue Butrans indication, dosing, appropriate patient type, delivery system & showed savings cards. I asked if they needed any but she said she did not think so. I asked her to give Dr Faيمان Butrans information with my card & she agreed to do this.
PPLPMDL0020000001	Cleveland	OH	44113	7/21/2011	I talked to dr about his patients taking tramadol every day for chronic pain but not controlled and asking for something else.dr said he hasnt thought of those patients but it made sense to think earlier in therapy.i showed dr butrans visual aid,appropriate patients,and we talked about patients taking less than 300mg tramadol/daily,could be started on Butrans 5mcg,dr said ok he'll see if he has any patients like this and could try Butrans in them.we discussed insurance coverage,i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44106	7/21/2011	talked to dr about patients that are taking tramadol every day for chronic pain yet not controlled and asking him for something else,dr said they see a lot of those patients,i asked dr to start a few patients like that on Butrans instead of refilling their tramadol or increasing their tramadol dose,dr said he will start some patients on Butrans as he likes transdermal medications and prefers them over short-acting opioids.i showed dr Butrans visual aid,discussed 5 Butrans core messages,appropriate patients and initiation sections of visual aid and we discussed insurance coverage.i told dr i would follow-up next wednesday as we have lunch together and see how many patients he's started on Butrans,dr said ok.
PPLPMDL0020000001	Bedford	OH	44146	7/21/2011	Spoke with pharmacist Shay & reviewed Butrans indication, dosing, & appropriate patient type. She said she has not yet dispensed any. Reviewed savings program & asked her if she has customers with commercial insurance & she said she does. Offered OxyContin & Ryoltz savings cards. She said she does not stock OxyContin or Ryoltz. She said their generic tramadol is \$4, so branded tramadol products just do not get filled there.
PPLPMDL0020000001	Cleveland	OH	44113	7/21/2011	i talked to dr about Butrans 5 core messages and dr said he keeps forgetting about Butrans and asked who was the appropriate patient and what were starting dosage strengths? i showed dr Butrans visual aid,appropriate patients section and showed Butrans initiation guide too for titration information.I asked dr to think of a few patients that are taking tramadol every day for their chronic pain but not controlled and considering Butrans right there for those patients instead of refilling tramadol or increasing dosage strength of tramadol,dr said ok he will have to think about it as many patients like taking their pills.i showed dr Butrans fpi,discussed maintenance of therapy section,told dr he can start patients on Butrans and still give short-acting opioids or non-opioid therapy,dr said ok.dr asked if medical covered Butrans? we discussed butrans formulary coverage.i recommended
PPLPMDL0020000001	Warrensville Heights	OH	44122	7/21/2011	Dr Brooks said he was running too far behind for a conversation. Delivered Butrans dosing reminder & asked him to think about patients who are on Vicodin 2-3 times per day month after month who call in too soon for refills or ask for an increase in dose. He said he had not thought of using it here before, but will now. Spent time with Jaz talking about the appropriate patient type for Butrans. I asked her about getting calls from patients on Vicodin who are asking for refills too soon or an increase in dose. She said she gets those calls every day. Discussed dosing, delivery system CIII, & abuse/addiction potential. She said she is going to ask Dr Brooks to switch some of them to Butrans when she gets these calls. She said she knows he has been trying to use it more often & said she would help remind him. She added that she just got one of these calls yesterday & she is going to write her name down & ask Dr Brooks about switching her. Discussed managed care & savings.
PPLPMDL0020000001	Maple Heights	OH	44137	7/21/2011	Spoke with technician as the pharmacist was too busy to see me. Reviewed with her Butrans dosing, usage, & appropriate patient type. Also discussed patient counsel & questions that patients may ask when filling a Butrans prescription, especially for the first time. Discussed application, rotation, & disposal. Offered OxyContin & Ryoltz savings cards, but they declined.
PPLPMDL0020000001	Cuyahoga Falls	OH	44221	7/21/2011	I asked the physician how often patients are calling in complaining about their current SA therapy? How often are they asking for more of it? She said patients are calling in often complaining of both. I asked if she would feel comfortable initiating therapy to those patients and she agreed she would.
PPLPMDL0020000001	Cuyahoga Falls	OH	44221	7/21/2011	I asked Dr. DiLauro about the success patients were having with Butrans and she said she felt patients were having success for the most part. She said that based on the success rate with Butrans she would feel confident continuing to prescribe for opioid experienced patients. I reminded her that Butrans had also been studies in opioid na /nve patients.
PPLPMDL0020000001	Cuyahoga Falls	OH	44221	7/21/2011	I asked the physician if she felt there was truly a place for Butrans in her practice and if she could see herself prescribing Butrans moving forward. She said yes. No new info learned.
PPLPMDL0020000001	Cleveland	OH	44130	7/21/2011	Dr Kansal said he switched the patient he had put on Butrans over to OxyContin. I told him this sounded like the right thing to do since he had said that the patient was beyond Butrans 20mcg. He said he did not have time to talk today & walked into a room. Spoke with Dorothy who asked about OxyContin formulary coverage as the patient Dr Kansal had told me about has Medical Mutual insurance. Showed her formulary grids for Butrans & OxyContin & reviewed savings cards for eligible patients. Also asked Dorothy the "Initiations" invitation, which she agreed to do but added that she doubts he will actually do it. Told her about interactive nature of the program & that it might help him identify who is & who is not an appropriate Butrans patient.
PPLPMDL0020000001	Barberton	OH	44203	7/21/2011	I asked Dr. Patel about the success patients were having with Butrans and he said he felt patients were having success for the most part. He said the based on the success rate with Butrans he would feel confident continuing to prescribe for opioid experienced patients. I reminded him that Butrans had also been studies in opioid na /nve patients.
PPLPMDL0020000001	Cleveland	OH	44113	7/21/2011	talked to Laura,NP,about considering Butrans for any patients she see's that are taking tramadol,every day,for their chronic pain but not controlled and asking her for something else.Laura said she knows dr nickels has some patients on Butrans so she's waiting to see how those patients respond to Butrans.i asked Laura if the Butrans Patient information booklet would be helpful to educate patients? Laura said yes she's seen them in exam rooms but she still would have to take 5 minutes to explain to patients about Butrans and she doesnt have that time.gave Laura initiations presentation invite and told her i would see her monday at lunch to discuss some patient case studies and would love to get her thoughts to see if Butrans would be appropriate or not.
PPLPMDL0020000001	Independence	OH	44131	7/21/2011	Quick call- Dr Trickett said she hasn't seen the patient we talked about yet for Butrans & I reminded her that because it is CIII, she can call it in. She then said she had to run as she was behind & had patients waiting. Spoke with Steve & offered savings cards for Butrans, OxyContin, & Ryoltz. He said they had enough of all but Ryoltz, so gave him one package. Also asked him to give Dr Trickett the "Initiations" invitation & explained the interactive
PPLPMDL0020000001	Cleveland	OH	44106	7/21/2011	worked apm dept-see call notes on dr hayek and henry,fellow in apm
PPLPMDL0020000001	Cleveland	OH	44106	7/21/2011	dr said he hasnt started anyone on Butrans lately but does have some patients in mind.i asked dr to tell me more about those patients he's thinking of that are appropriate for Butrans.dr said patients taking tramadol every day but not controlled and asking him for more pills,he's thinking of Butrans there.dr asked about initiation dosage strengths again for Butrans,i showed dr Butrans visual aid and initiation/titration guide as he wanted something for his reference.i told dr if patients are taking less than 300mg tramadol/daily, and still not controlled,these were the patients he could start on Butrans instead of increasing tramadol dose,dr said okay and we discussed insurance coverage. i recommended Senokot-S
PPLPMDL0020000001	North Royalton	OH	44133	7/21/2011	Spoke with Cheryl & reviewed with her patient information booklets for Butrans. Discussed patient counsel. Also reviewed application, rotation, & disposal of Butrans. Also discussed taping the edges with first aid tape if necessary. She said she thinks she only has one person on it right now but would either use the booklet for reference or give it to the next person. She then got called away to speak with a customer.
PPLPMDL0020000001	Munroe Falls	OH	44262	7/21/2011	I explained the ideal type of Butrans patient to Dr. Kolacowski. She agreed that she had many of those patients and because it is a LA agent would be a better choice for many patients currently taking several SAO&#8217;s each day.
PPLPMDL0020000001	Barberton	OH	44203	7/21/2011	I explained the ideal type of Butrans patient to Dr Minich. She agreed that she had many of those patients and because it is a LA agent would be a better choice for many patients currently taking several SAO&#8217;s each day.
PPLPMDL0020000001	Beachwood	OH	44122	7/22/2011	Spoke with MA Melissa who said that Jim will be out of the office for 8 weeks. She also said Dr Tabbaa could not see me today. I told her about the Butrans "Initiations" program & asked her to give Dr Tabbaa the invitation. She agreed. I also told her about Butrans indication, dosing, delivery system & abuse/addiction potential as she did not know what Butrans was.
PPLPMDL0020000001	Parma	OH	44134	7/22/2011	Spoke with Mercedes (pharmacist) & reviewed Butrans appropriate patient type, indication, dosing, & savings program through e-voucher or savings cards. She said she would keep an eye out for any prescriptions & would order it if/when she gets one. Also discussed OxyContin & Ryoltz savings cards. She requested a box of Ryoltz cards.
PPLPMDL0020000001	Lyndhurst	OH	44124	7/22/2011	Spoke with doc and patricia about the butrans patients type and asked how patients are doing on butrans. What has been the feedback from patients that have tried it. DOc said that its has been positive for those that have tried it but she is having a harder time than expected identifying appropriate patients. I gave them an interact invite and explained the case studies identifying those patients that are/are not appropriate. She said she would keep trying. Provided more savings cards and formulary reminder for Butrans and oxycontin.
PPLPMDL0020000001	Independence	OH	44131	7/22/2011	Jill said Dr Pai is out until 8/18 with the exception of being in the office for a few hours on 8/4. I asked her if she gave him the "Initiations" invite that I had left last time & she said she did but that doesn't mean he will log on. Reviewed Butrans appropriate patient type. She agreed he has a lot of patients who fit that profile but does not know why he is not switching any of them. She said to come back when he gets back from vacation to talk to
PPLPMDL0020000001	Lyndhurst	OH	44124	7/22/2011	Spoke with doc and patricia about the butrans patients type and asked how patients are doing on butrans. What has been the feedback from patients that have tried it. DOc said that its has been positive for those that have tried it but she is having a harder time than expected identifying appropriate patients. I gave them an interact invite and explained the case studies identifying those patients that are/are not appropriate. She said she would keep trying. Provided more savings cards and formulary reminder for Butrans and oxycontin.
PPLPMDL0020000001	Twinsburg	OH	44087	7/22/2011	Introduced myself & Purdue's products to Dr Pia. Reviewed with her indication, dosing, delivery system, CIII opioid, abuse/addiction potential, managed care, & savings cards. Dr Pia said she really doesn't do a lot of maintenance for patients on chronic opioids. I asked her if she has any patients who she does maintain & she said yes. I asked her what the differences are in patients who she refers out vs the ones she maintains herself. She said she refers out if/when she notices that they are not being well-controlled on their current medication or if they ask for a higher dose. Reviewed Butrans appropriate patient type & presented initiation/titration guide. She asked how Butrans compares with fentanyl & with Vicodin's abuse potential. I told her we have no comparative data & showed initiation guide pg 6 to help position Butrans for the more moderate pain side & discussed OxyContin q12h for appropriate patients beyond Butrans. Also told her Butrans is a CIII opioid like Vicodin & that she should be just as cautious when prescribing Butrans as she is with other opioids. She said Butrans sounded interesting & that she was glad to know about it even if she does not do a lot of pain management. She said she refers to Dr Moufawad. Dr Pia requested savings cards for Butrans, so I gave her one package.
PPLPMDL0020000001	Twinsburg	OH	44087	7/22/2011	Introduced myself & Purdue's products to Dr Brese. Discussed Butrans indication, dosing, delivery system, CIII, abuse/addiction potential, appropriate patient type, managed care, & savings cards. Also discussed importance of appropriate patient selection. She said as a family practice physician, she does not prescribe a lot of chronic opioids & added that her husband is a pain management specialist in Stow. She said she was familiar with buprenorphine as a molecule & recognizes it from drugs used to treat addiction. Told her Butrans has no indication for the treatment of addiction. I asked her when she would refer a patient to pain management vs maintaining them herself & she said it depends on the patient. She said that with the new House Bill, it is mandatory to run OARRS every 4 months for patients on opioids for longer than one month. She said this can become time-consuming & therefore she may be doing even less maintenance. She said Butrans did sound like something that she may utilize if she had a patient she was choosing to maintain herself. Also discussed OxyContin q12h as an option for appropriate patients beyond Butrans.
PPLPMDL0020000001	Twinsburg	OH	44087	7/22/2011	Dr Hillard asked for a Butrans reminder as he forgot most of the details. Reviewed indication, dosing, delivery system, appropriate patient type, & CIII/abuse & addiction potential. He said that House Bill 93 has made him even more cautious in prescribing pain medications that are CII or CIII. I asked him what about patients who are in legitimate pain. He said it is difficult & that he sympathizes with those patients, but he is not willing to treat them himself. He said he refers out to Dr Moufawad. Dr Hillard added that because he does not have "proper" pain management training, he feels it is best for every patient who needs chronic opioid therapy to see a specialist. He also added that the new law would require him to run an OARRS report more frequently. I asked him if he thought OARRS was a good tool to utilize to protect him & he agreed that it is, however he said it is just one more step that takes time that he can not afford to spend doing that. He also added that by law, it has to be the physician who runs the OARRS, not a medical assistant or nurse due to HIPAA. He said it could cost a medical license. Discussed appropriate patient type for Butrans further & went over initiation guide. He said he likes to know this information & that he would be willing to recommend it to a patient when he refers them to Dr Moufawad.
PPLPMDL0020000001					Discussed OxyContin for appropriate patients on the more severe side of pain.

	Parma	OH	44129	7/22/2011	Spoke with Janet (pharmacist) & reviewed Butrans indication, dosing, delivery system, & appropriate patient type. She said she thinks Butrans would be a good option for some of the many patients she sees daily who are getting too much acetaminophen with their current medications. She said she is always concerned with patients damaging their livers by taking too much acetaminophen. She said most people aren't even aware that they are taking more than they should. I asked what she does when she notices that happening & she said in some cases she will call the doctor to alert them to this. She said some physicians do not seem to care. Discussed Butrans as a CIII opioid & therefore carries abuse/addiction liability. Also discussed ability to print savings cards online. Offered OxyContin & Ryolt savings cards but she did not need any. Also discussed appropriate patient selection & using OARRS to help protect the pharmacy & physician.
PPLPMDL0020000001	Cuyahoga Falls	OH	44223	7/22/2011	I asked Dr. Dinsmore how often patients are calling in complaining about their current SA therapy? How often are they asking for more of it? He said patients are calling in often complaining of both. I asked if he would feel comfortable initiating therapy to those patients and he agreed he would.
PPLPMDL0020000001	Akron	OH	44333	7/22/2011	Checked for movement and explained application using the patient education guides.
PPLPMDL0020000001	Akron	OH	44310	7/22/2011	I asked Dr. Blaser if she felt there was truly a place for Butrans in her practice and if she could see herself prescribing Butrans moving forward. She said yes. No new info learned.
PPLPMDL0020000001	Cleveland	OH	44113	7/22/2011	worked pain management dept
PPLPMDL0020000001	Westlake	OH	44145	7/22/2011	Dr said that he tried to write Butrans for 5 or 6 patients, but it has not gone through for some. For those patients who did get it, he has not heard back from so he thinks they are doing ok. We reviewed the managed care for Butrans and that OxyContin is an option that is approved on Medicaid.
	Cleveland	OH	44114	7/22/2011	talked to Horace, Pharmacist, about 5 Butrans core messages. Horace has sent new scripts for Butrans here. I asked Horace what he felt were some important features about Butrans? Horace said transdermal delivery and once weekly dosing. I asked Horace to give Butrans patient information booklets, to any patients that are taking short-acting opioids yet telling him their pain isn't controlled. Horace said ok he could do that. We talked about insurance coverage for Butrans and I recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44112	7/22/2011	Spoke to Melanie about doc's prescribing of butrans. She was not aware of any recent prescriptions. Doc is on vacation. Gave her an interact invite for doc.
PPLPMDL0020000001	Mayfield Heights	OH	44124	7/22/2011	Window call....Reminded doc of the Butrans indication, 7 day delivery and CIII status. Provided initiation guide, formulary grids for butrans and oxycontin, and initiations invite.
PPLPMDL0020000001	Westlake	OH	44145	7/22/2011	Quick follow up, I asked Dr if he has been happy with the patient feedback for Butrans. He said he has not seen the patients back yet, but he thinks they were able to get Butrans approved so far. We reviewed the managed care for Butrans and OxyContin. I asked if he would continue to try patients on Butrans and he agreed.
PPLPMDL0020000001	Berea	OH	44017	7/22/2011	I asked Dr if he is happy with the results for Butrans and he said he is. I asked what the patient feedback has been and he said that they are doing fine. Reminder that OxyContin is still a long acting option as well.
PPLPMDL0020000001	Cleveland	OH	44109	7/22/2011	worked family medicine dept-left Dr. Forde, Dr. Krofina and Dr. Liu-Butrans fpi, initiation guide, patient information booklet, formulary grid and my business card with initiations invite. worked pm&r dept-talked to Vanessa O'Malley, dept secretary to dr harris and other physicians and she said to call Jodi Smneda, Clinic Coord, next week as Dr. Clark hasnt allowed any Rep appt's in past week, but she said I can leave info for doctors and she'll be sure they get it in their boxes and said to call Jodi and set-up appt with Dr. Clark to discuss Butrans and importance of me meeting individually with each attending. Vanessa also recommended I call Randa Karim, book in-hospital lunches/in-services for residents on Butrans and OxyContin. Left Dr. Harris, Dr. Huang, Dr. Jaffer, Dr. Greenwood and Dr. Malkamaki Butrans fpi's, initiation guides, patient information booklets and formulary grids for Butrans with my business card. worked internal medicine dept-left Dr. Spinelli, Dr. Lindheim, Dr. Ricanati, Dr. Eisen and Dr. Harrington Butrans fpi's, initiation guides, patient information booklets and formulary grids for Butrans. Dr said he has 2 patients taking vicodin every day for their chronic pain but they aren't controlled and are asking him for something different so dr thought butrans would be a good idea. dr couldn't remember initiation dosage strengths, so i showed dr Butrans visual aid, discussed 5mg and 10mcg starting dosage strengths for Butrans. dr asked how to write Butrans, showed him Butrans visual aid back page we discussed insurance coverage and i asked dr to think of patients taking 10-15mg vicodin daily for their chronic pain that aren't controlled and starting them on Butrans instead of refilling vicodin or increasing dosage strength, dr said he will but he wants to see what happens with these 2 patients. i told dr to give these 2 patients the Butrans patient information booklet, discuss application/rotation of Butrans before patients leave office, dr said ok. i recommended Senokot-S
PPLPMDL0020000001	Akron	OH	44333	7/22/2011	I asked Dr. Richter if his prescribing habits had changed and if he felt like there was a place for Butrans in his practice yet. He explained that he still was not treating chronic pain.
PPLPMDL0020000001	Fairlawn	OH	44333	7/22/2011	I checked to see if the pharmacist had seen any movement with Butrans and she mentioned Dr. Shah. I asked about coverage and she said patients were not having issues getting it through.
PPLPMDL0020000001	Highland Heights	OH	44143	7/22/2011	Window call....Showed doc the demao of the Butrans patch and reviewed the proper sites and how to apply to a clean dry site. He said he's got it. No savings cards needed. Provided formulary reminders for butrans and oxycontin.
	Garfield Heights	OH	44125	7/22/2011	Spoke with Denise (nurse) & asked her about the changes she had told me were going to effect the Marymount Pain Management clinic. She said everything should be figured out by September & asked me to check back with her as there have been multiple changes & more things will change. She said they added a physician, Ben Abraham, MD. I showed her Butrans Westlake dinner program invitation & asked her if she would give it to Dr. Samuel. She said she would do so & would also make a copy for the other pain management specialists. Discussed savings cards for Butrans & OxyContin. She verified that they have plenty. She said she does not know why Butrans has not been utilized by their physicians more & said she would schedule something with the doctors for me when things become more stable.
PPLPMDL0020000001	Cleveland	OH	44113	7/22/2011	i talked to dr about her patients taking vicodin 5mg, 1-2 tabs, daily and not controlled and asking dr for something else. i asked dr to start those patients on Butrans, showed dr Butrans visual aid and dr said she will do that. we discussed Butrans formulary coverage and savings cards. i recommended Senokot-S
PPLPMDL0020000001	Akron	OH	44333	7/22/2011	I asked Dr. Z if his prescribing habits had changed and if he felt like there was a place for Butrans in his practice yet. He explained that he still was not treating chronic pain.
PPLPMDL0020000001	Akron	OH	44333	7/22/2011	Dr. Ahmad said that head prescribed Butrans for a few patients and was pleased that he had not heard back from them. I explained steady state takes 72 hours to achieve and told him if he had call backs prior to that to encourage patients to remain on therapy. He asked about titration which i explained using the initiation guide.
PPLPMDL0020000001	Cleveland	OH	44104	7/22/2011	i talked to dr about her patients taking vicodin every day for their chronic pain, and asking her for something else and that she has Butrans as an option instead of refilling vicodin or increasing dose of vicodin. dr said she knows she is just forgergetting about Butrans. dr said to leave her the initiation guide so she can remember who's appropriate and the initiating dosage strengths. we discussed formulary coverage and i asked dr if she can think off 2 patients today or monday that she'll see who are like we discussed that she can try Butrans? dr said yes. i recommended Senokot-S
PPLPMDL0020000001	Akron	OH	44310	7/22/2011	I asked Dr. Schukay if he had been initiating Butrans therapy to patients failing or asking to be titrated on their current therapy like we had previously talked about. He said that he was keeping it in mind for those patients and would continue to do so. I reminded him that Butrans was 7 days.
PPLPMDL0020000001	Independence	OH	44131	7/22/2011	Quick call- Invited Roman to Westlake Butrans program & told him how to register. He said that he would attend & that Lisa, the other PA would attend with him. He said he is glad that he will be able to hear other physicians with experience with Butrans speak about how they utilize it in their practice to see if it is something that he will use as well.
PPLPMDL0020000001	Cuyahoga Falls	OH	44223	7/22/2011	I explained the ideal type of Butrans patient to the Physician. He agreed that he had many of those patients and because it is a LA agent would be a better choice for many patients currently taking several S/AO&#8217;s each
PPLPMDL0020000001	Parma	OH	44129	7/22/2011	Spoke with Terri who said Dr Roheny is not seeing reps today due to being behind. Asked her if she has received any feedback or information from the patient Dr Roheny had prescribed Butrans for but she said she has not.
PPLPMDL0020000001	Garfield Hts	OH	44125	7/22/2011	Reviewed Butrans indication, delivery system with her as she did not remember what Butrans was. She asked me to come back next week as they were all too busy today.
PPLPMDL0020000001					I asked Dr Sadowski how he determines who he will maintain on chronic opioid therapy & who he refers to pain management. He said if anyone needs opioids for longer than one month he refers out because "he is afraid of drug seekers". I asked him if he would treat a patient himself if he knew the patient was appropriate & was legitimately in pain & was an established patient. He said he would still refer out & then walked away. Spoke with Dina who said that Dr Sadowski did not tell me the truth because she knows of many of his patients who he maintains on chronic opioids. She said he is just "in a mood" & said to keep working on him. She promised to continue to try to help me by mentioning Butrans to him when she gets a phone call from a patient who she thinks might be appropriate.
PPLPMDL0020000001	Fairlawn	OH	44333	7/25/2011	I asked the physician their thoughts on Butrans therapy and how he felt about the molecule Buprenorphine. He said he liked the idea of this medication and felt comfortable with the molecule. I asked if there was anything more he felt like he needed to know before prescribing for the first time and he said no and that he would keep it in mind.
PPLPMDL0020000001	Lakewood	OH	44107	7/25/2011	I asked Dr if he has other patients like the one we discussed last time who he tried on Butrans. I asked if he will let appropriate patients know that a 7 day patch is an option instead of hydrocodone around the clock. He agreed. I reviewed the managed care for Butrans and OxyContin.
PPLPMDL0020000001	Sagamore Hills	OH	44067	7/25/2011	Spoke with MA Diana & reviewed Butrans indication, delivery system, & appropriate patient type. I also discussed the Butrans "Initiations" interactive program & asked Diana if she would give Dr Maguire the invitation. She said that Dr Maguire does not accept any form of literature from reps. I asked her if lunces were the only way to access him & she said yes. I asked her if they needed any Butrans or OxyContin savings cards but they had
PPLPMDL0020000001	Beachwood	OH	44122	7/25/2011	I asked Dr Warren what he does with a patient on chronic Vicodin who asks for an increase in dose or says it is wearing off too quickly. He said usually he will increase the dose. He added that usually he prescribes Vicodin for his patients twice per day, so he will step them up to three times per day if they say they need more. He said that after that, he would refer them to pain management. I asked him if this is his usual trigger to send to pain management (Vicodin three times per day). He said yes, unless he switches them to something else. I asked if he thought Butrans may be a potential option for those patients on Vicodin twice per day who are asking for an increase, instead of giving them more hydrocodone. I added that Butrans is a once weekly CIII opioid. He said that could be an option & that he had not thought of that. He said that he does not like to have patients on opioids if necessary. I agreed he should be cautious & discussed importance of appropriate patient selection.
PPLPMDL0020000001	Cleveland	OH	44109	7/25/2011	i talked to dr about Butrans 5 core messages and dr said he likes transdermal delivery, but couldn't remember anything about Butrans and asked me to review the medication information with him. i showed dr Butrans visual aid, discussed appropriate patients and asked if dr had patients taking percoet every day for their chronic pain but not controlled and asking him for something else? dr said yes but usually patients want more pills. dr said he likes once weekly dosing and the fact its a CIII makes it easier for him. we discussed refills of Butrans and BWC and commercial plan patients trying Butrans. dr said he will keep Butrans in mind as he is starting to see more chronic pain patients. <font color=blue><b><b>CHUDAKOB's query on 08/04/2011</b></b></font>Two areas to think about:1) Using the visual aid to discuss disease states rather than number of pills a patient is taking2) Challenge him on patients want more pills. Why does he think they want this? Would he want to take pills around the clock?<font color=green><b>BROOKAM's response on 08/10/2011</b></font>thank you for your thoughts, just a couple comments: I do agree that the visual aid, pain conditions/disease states is an area we are focusing on so thats good the next time i see him. "patients want more pills" isnt a new comment by physicians, that's a common answer amongst doctors.<font color=blue><b><b>CHUDAKOB added notes on 08/12/2011</b></b></font>i know that is a very common answer. The point i was making is, are you challenging that answer or accepting it? Spoke with Anita (MA) & Lynn (nurse) to plea my case for an appointment with Dr Gallagher to follow up on Butrans. I reviewed with them indication, delivery system, appropriate patient type, CIII, & abuse/addiction potential. I let them know that when i initially introduced Butrans to Dr Gallagher, he expressed interest & wanted me to follow up. I told them i did not need a lot of time & that even 5 minutes with him would be of benefit. Lynn asked me to return at 4:30 tomorrow for a 5 minute appointment with Dr Gallagher. Also reviewed with them OxyContin & Ryolt savings cards.
PPLPMDL0020000001	Maple Heights	OH	44137	7/25/2011	Spoke with pharmacist Antunina & discussed appropriate Butrans patient type. Also reviewed indication, delivery system, CIII, & abuse/addiction potential. She said she definitely sees a place for Butrans & believes that switching appropriate patients to Butrans may benefit them more so than increasing their current opioid. Also presented patient information booklet & discussed patient counsel. She said she would keep the booklet as reference. Discussed 7 available OxyContin tablet strengths & she said they really do not dispense a lot of OxyContin. She said most customers they have on it have Medicaid or Medicare, so they did not need savings cards.
PPLPMDL0020000001	Mayfield Heights	OH	44124	7/25/2011	Window call....reminded doc of the Butrans presentation/case studies. I asked him if he recalls and if he found it beneficial. He said 'oh yes' but he said he forgets because he is not used to it. Gave him an initiation guide and formulary grid. I asked him to try try an appropriate patient with commercial coverage.

	Parma	OH	44129	7/25/2011	Spoke with pharmacist, Fred & reviewed Butrans appropriate patient type. He asked if it is being prescribed & I told him Butrans has been well-received by a variety of specialties. He said that makes sense because there are so many patients on chronic pain medications. Discussed CIII & abuse/addiction potential. Also discussed OxyContin 7 tablet strengths. He said they really don't dispense it due to the pharmacy manager not wanting to carry opioid products in stock.
PPLPMDL0020000001	Mayfield Heights	OH	44124	7/25/2011	Window call....gave doc an interact invite and asked her to participate. She said she does not have much time for these things. She did say her patients are liking butrans though.
PPLPMDL0020000001	Cleveland	OH	44109	7/25/2011	talked to dr about his patients taking tramadol,daily,but not controlled and considering Butrans as an option for them instead of refilling tramadol.dr said he doesnt have a lot of chronic pain patients but would consider Butrans if patients had insurance coverage.i showed dr Butrans visual aid,discussed 5 Butrans core messages and told dr to start a couple patients on Butrans,telling patients this is once weekly and showing them Butrans patient information booklet with application/rotation information,dr said ok if he has any patients that are appropriate he will consider Butrans.discussed BWC and commercial insurance patients.
PPLPMDL0020000001	Mayfield Heights	OH	44124	7/25/2011	Spoke to Jesse about the stocking of Butrans. He said that he has the 5 and 10mcg stocked but he has only seen one or two scripts and nothing recently. I explained to him the proper application and the sites for Butrans. I also discussed the savings card available for eligible patients. Provided patient info guides. <font color=blue><b>CHUDAKOB's query on 08/04/2011</b></font>What happened to the discussion on our work session about discussing what is important to the pharmacist? I don't see that in this call note<font color=green><b>SIMERTOC's response on 08/17/2011</b></font>i did that a couple of times. I don't do it always.<font color=blue><b>CHUDAKOB added notes on 08/18/2011</b></font>OK.
PPLPMDL0020000001	Cleveland	OH	44109	7/25/2011	dr said he remembered Butrans was a patch and that was it.i showed dr Butrans visual aid,discussed 5 Butrans core messages and asked dr if he had patients taking vicodin,every day for their chronic pain but not controlled? dr said yes a lot of them.dr asked if Butrans was covered on Medicaid as he has a lot of medicaid patients? I told dr that if he's asking about medicaid coverage then does that mean he has patients in mind to start on Butrans and is ready to prescribe? dr said no he was just wondering because if the coverage isnt there for Butrans he wouldnt prescribe the medication.i told dr he can prescribe Butrans for his BWC and commercial plan patients and asked dr if he saw a benefit in once weekly dosing? dr said he didnt know because there's already a patch,fentanyl and patients dose once every 3 days.dr said to leave information and he'll look it over.
PPLPMDL0020000001	Lyndhurst	OH	44124	7/25/2011	I asked doc if he has treated patients for pain that might not have tolerated hydrocodone. No response. I showed him the butrans demo and explained how Butrans may be an alternative for those patients. He said that I want them to get hooked on butrans instead of vicodin. I told him I did not want that at all. I discussed the CIII status of Butrans similar to vicodin but is just a once weekly dosing. He said he tried it a couple of times but has not heard from those patients. He said he would give it try. I asked him to focus on commercial patients and give them a savings card.
PPLPMDL0020000001	Cleveland	OH	44109	7/25/2011	worked internal med dept-left dr eisen,dr falck-vtter,dr mccreery,dr gelehrter,dr jones,dr lindheim,dr ricanati and dr harrington-Butrans fpi,initiation guide,formulary grid and patient information booklet. worked family medicine-left same Butrans info for dr krofina,dr forde and dr liu
PPLPMDL0020000001	Cleveland	OH	44109	7/25/2011	was able to see a couple attending physicians in Physical Medicine&Rehabilitation through Jodi Smneda,Amputee Clinic coordinator-see call notes on dr fox,dr harris and dr distler
PPLPMDL0020000001	Parma	OH	44129	7/25/2011	Caught Dr Moss at the window & reminded him of our previous discussion on Butrans, the once weekly transdermal system of buprenorphine. He said, "No thanks" & then walked away. Spoke with Pauline & discussed Butrans managed care & savings cards, along with savings eligibility requirements. Pauline said to try back another day to see if Dr Moss would have time for more of a discussion.
PPLPMDL0020000001	Lakewood	OH	44107	7/25/2011	I reviewed the 7 day dosing for Butrans and asked if he had just a few patients in mind to give Butrans a try. He said he will try it and we reviewed the invitation guide. Reminder about the managed care for Butrans and OxyContin as an option that is covered on Medicaid.
PPLPMDL0020000001	Cleveland	OH	44113	7/25/2011	did initiations presentation,discussed patient cases,dr said he tells patients that Burans is their baseline of medication and if they have any incident pain they can still take their vicodin.dr said most patients are responsive to that verbage and he also discusses potential side effects of Butrans so patients are aware of this information ahead of time.dr said majority of his patients need to be started on Butrans 10mcg,will stay on medication for 6 weeks,thats their trial period,if that dose works they'll stay on 10mcg if not they will go to the 20mcg Butrans.dr discusses application/rotation section in Butrans patient information booklet and gives Butrans patient savings cards to commercial plan patients. I recommended Senokot-S
PPLPMDL0020000001	Lakewood	OH	44107	7/25/2011	I reviewed the key Butrans messages and asked Dr if she would try just a few patients on Butrans before going to vicodin around the clock. She said she will try.
PPLPMDL0020000001	Akron	OH	44333	7/25/2011	I asked Dr. Shah about the success patients were having with Butrans and he said he felt patients were having success for the most part. He said the based on the success rate with Butrans he would feel confident continuing to prescribe for opioid experienced patients. I reminded him that Butrans had also been studies in opioid na /nve patients.
PPLPMDL0020000001	Uniontown	OH	44685	7/25/2011	I asked Dr. Stetler about the success patients were having with Butrans and he said he felt patients were having success for the most part. He said the based on the success rate with Butrans he would feel confident continuing to prescribe for opioid experienced patients. I reminded him that Butrans had also been studies in opioid na /nve patients.
PPLPMDL0020000001	Cleveland	OH	44115	7/25/2011	I talked to dr about her chronic pain patients,commercially insured, that are taking tramadol daily but not controlled? I asked dr to consider Butrans for those patients that are asking for something else instead of refilling their tramadol or increasing the dose of tramadol.dr said she'll consider but majority of her patients have acute pain so she cant consider Butrans but will keep it in mind for chronic pain patients.dr said she likes transdermal delivery and once weekly dosing option of Butrans,i gave dr Butrans initiation guide,discussed initiation dosage strengths of Butrans and discussed formulary coverage for Butrans.i recommended Senokot-S
PPLPMDL0020000001	Fairlawn	OH	44333	7/25/2011	I asked Dr. Weidman how often patients are calling in complaining about their current SA therapy? How often are they asking for more of it? She said patients are calling in often complaining of both. I asked if she would feel comfortable initiating therapy to those patients and she agreed she would.
PPLPMDL0020000001	Cleveland	OH	44130	7/25/2011	Dr Fedorko said he had a patient in a room right now that might have been a Butrans candidate, but "she has fibromyalgia, so that won't work". I asked him why Butrans would not be an option for a patient with fibromyalgia. He said that fibromyalgia "isn't real" & that for those patients, they are always in pain & really the pain is "in their head". He said they always "want drugs" for this pain that does not exist & then they say none of the drugs work. He showed me the Lidoderm & said that is what he was going to give her, then walked into the room.
PPLPMDL0020000001	Akron	OH	44333	7/25/2011	I asked Dr. Brown if she had been initiating Butrans therapy to patients failing on SAO's or asking to be titrated on their current therapy like we had previously talked about. She said that she was keeping it in mind for those patients and would continue to do so. I reminded her that Butrans was 7 days.
PPLPMDL0020000001	Akron	OH	44333	7/25/2011	Dr. Ross said that head prescribed Butrans for a few patients and was pleased that he had not heard back from them. I explained steady state takes 72 hours to achieve and told him if he had call backs prior to that to encourage patients to remain on therapy. He asked about titration which I explained using the initiation guide.
PPLPMDL0020000001	Mayfield Heights	OH	44124	7/25/2011	I asked doc how often she sees patients in pain that can not tolerate hydrocodone. She said sometimes, its not uncommon. I asked her to consider Butrans as an alternative to vicodin ATC. Explained that one butrans 5mcg can be an alternative to 21 tabs of vicodin every week. She said she has not had an opportunity to try it. I explained the two initiation doses, formulary coverage for butrans and oxycontin.<font color=blue><b>CHUDAKOB's query on 08/04/2011</b></font>I believe this was commented on in previous call note. We should not be discussing number of tablets and how Butrans can compare to those. There are potential implications of superiority. If you have questions on this, let me know<font color=green><b>SIMERTOC's response on 08/17/2011</b></font>I know. I did this several times before you sent the first query. I have since stopped.<font color=blue><b>CHUDAKOB added notes on 08/18/2011</b></font>OK. Thanks!
PPLPMDL0020000001	Parma	OH	44129	7/25/2011	Jen said that she just learned that Butrans comes up in urine drug screens. I told her this was correct & to check with her lab for specifics. I also asked how she discovered this. She said that within the last few days, "a handful" of patients have tested positive for buprenorphine. I asked them if these patients were on Butrans from another doctor. She said that none of the patient had any history on their OARRS report for Butrans. She said she is waiting to find out from her lab if there is a way to determine if the buprenorphine is from Butrans or from Suboxone. Jen said if a drug does not show up on OARRS but the patient tests positive for it, it means they are getting it "off the street". I asked if they had questioned any of the patients. She said one admitted to taking a friend's Suboxone & the other admitted to applying a Butrans, but the others have not confessed to anything. I asked if any of the patients complained of withdrawal symptoms. She said no, but that they wouldn't probably tell her that anyway because they would not want her to know they were taking drugs that we not prescribed to them. Dawn said she is surprised that Butrans "hit the streets" so early. I reminded her that Butrans is an opioid & is abusable, so if someone had inappropriate intentions with it, they could abuse it. Jen said that Dr Nickles does have a few patients on Butrans but he has not given the "green light" to NP's to prescribe yet.
PPLPMDL0020000001	Lakewood	OH	44107	7/25/2011	Dr said he just forgets about Butrans since it has to be the right patient who is willing to use a patch and someone who's insurance covers it. I asked if he sees any merit to Butrans and he said the 7 day dose, but he will have to gain experience to see how well it works. I asked if there is anything I can do to remind him and he said he will leave the initiation guide on the counter. I reviewed managed care for Butrans and OxyContin. He said he does still have patients on OxyContin.
PPLPMDL0020000001	Mayfield Hts	OH	44124	7/25/2011	Reviewed the butrans positioning and the other selling messages. Doc asked about the use of supplemental agent and BWC coverage. Confirmed that supplementals can be used. I showed the FPI and showed the graph of steady state reached after 72 hours. He also asked about BWC coverage. I confirmed BWC as well as commercial coverage. He said he would try to remember.
PPLPMDL0020000001	Parma	OH	44134	7/25/2011	I asked Dr Mandat if he would describe for me the difference between a patient who he would refer to pain management vs a patient who he would treat himself in the office. He said he does no pain management there at all. I asked him if that means that anyone who has any type of pain whatsoever gets referred. He said he only treats patients in hospice for pain. He said he has 120 hospice patients who he deals with & that is where he prescribes pain medications. He then added that he "might have one or two" who he does have in the office & then walked away.
PPLPMDL0020000001	Cleveland	OH	44102	7/25/2011	I talked to Vicky,Pharmacy manager,about Butrans stocking and she confirmed that they dont have any strengths in stock and until they see more Butrans scripts they arent ordering Butrans.we discussed importance of stocking and I showed Vicky Butrans 5 core selling messages and asked her what were some important features of Butrans that she liked? Vicky said transdermal delivery and once weekly dosing option for patients are 2 benefits she likes but doctors have to find a place for Butrans and prescribe,then she'll stock Butrans.i gave Vicky Butrans initiation guide and asked her to speak with physicians,if she hears from patients that their short-acting opioids arent controlling their pain,about Butrans.Vicky said she will do that.i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44113	7/25/2011	discussed initiations presentation,4 patient case studies with Laura,NP.Laura said she answered the questions based on the clinical information presented but she's still not started anyone on Butrans,she does talk to dr nickels about his patients that he started on Butrans and wants to wait and see what results they get from Butrans.Laura said she just doesnt have the time to explain Butrans to patients.I showed Laura Butrans patient information booklet and showed application/rotation section of Butrans noting this was the most important information to tell patients,knowing she has limited time,then give patient Butrans patient savings card for commercial patients.Laura said she'll think about it.I recommended Senokot-S
PPLPMDL0020000001	Mayfield Heights	OH	44124	7/25/2011	Quick call....asked doc if he has identified any patients that might be appropriate for butrans. He said he forgets about it. I gave him an interact invite and asked him to participate as I think it would help him identify the right patient. He said he would as he is interested in learning more.
PPLPMDL0020000001	Waterford	OH	45786	7/26/2011	W - Miral hasn't written, but says that she is favorable to writing Butrans for patients when a short acting medication is no longer controlling pain for patients. She said that Butrans is also favorable for patients who do not want to take an oral medication every 4-6 hours. Use of Butrans may provide patients with the ability to have pain control for an entire week without worrying or forgetting about taking a pill. She said that formulary coverage and her lack of knowledge about the ability for an NP to prescribe Butrans is her only issues holding her back. I - Butrans follow up and review of indication and 7 days of buprenorphine in 1 application with a CIII scheduling. Use of initiation guide to discuss appropriate patient selection based on patients current therapy. Formulary coverage review and savings card program eligibility.<font color=blue><b>BROWNMA1 added notes on 08/08/2011</b></font>Mark - it sounds like the NRP's in this practice had favorable things to say about Butrans. Is there a way that they can write Butrans, by recommending to the physician in the practice and he agrees it is an appropriate therapy based on the FPI? See if you can help bridge this gap on your next call. Thanks, Mark
PPLPMDL0020000001	Shaker Heights	OH	44122	7/26/2011	Spoke with Michelle (MA) & Stephanie & delivered Butrans overview. They said Dr Agarwal was too far behind to see reps today & suggested I come back Thursday. I told them about Butrans "Initiations" program & asked them to give Dr Agarwal an invitation. They agreed to do this.

PLPMDL0020000001	Cleveland	OH	44104	7/26/2011	talked to dr about her patients taking percocet,5-10mg every day but telling her that dose isnt controlling their pain and asking for something else,i asked dr to start a couple of these patients on Butrans instead of refilling their percocet.dr said she will do that just hasnt had any luck with patients wanting to try a patch.i talked to dr about patients starting on Butrans but still taking short-acting opioids like percocet if need be,i showed dr butrans fpi,maintenance of therapy section,and showed dr butrans visual aid with appropriate patients info.dr said ok she'll try talking to some more patients and see what happens.i recommended Senokot-S
PLPMDL0020000001	Cleveland	OH	44103	7/26/2011	discussed 4 patient case studies with dr,dr said the couple patients she started on Butrans were taking percocet every day and not controlled so she thought of Butrans.i asked dr if she had some patients taking vicodin,daily,that werent controlled and asking her for something different? dr said yes she does have a lot of patients taking vicodin,not everyone is willing to take a patch but she is talking to patients about Butrans and giving them a Butrans patient information booklet to look at and follow-up with her on Butrans if they want to try it.we discussed formulary coverage for Butrans.i talked to dr about OxyContin being an option,showed appropriate patients flashcard,showed dr OxyContin conversion guide for patients taking vicodin or percocet that she feels are appropriate to convert to OxyContin.we discussed medicaid,medicare and commercial insurance coverage for OxyContin.i recommended Senokot-S
PLPMDL0020000001	Cleveland	OH	44106	7/26/2011	Steve,Pharmacy manager,is on vacation and Matthew,Pharmacist,was at lunch,so i talked to Deana,Pharmacy tech,who confirmed they dont have any Butrans in stock and she hasnt seen any Butrans scripts.Deana said Steve will be back monday from vacation and i should talk to him about ordering Butrans again as she doesnt think any patients have filled scripts here.i told Deana i was under the impression Steve had ordered in the past and they had scripts filled here but i will follow-up next week with him.i showed Deana Butrans initiation guide,discussed appropriate patients for Butrans and gave her the initiation guide,fpi and patient information booklet to leave
PLPMDL0020000001	Cleveland	OH	44109	7/26/2011	talked to Jaime,Pharmacy Tech and Nathan,Pharmacist,both stated that they have seen scripts for Butrans but didnt have time to pull up names of physicians prescribing.i showed both Jaime and Nathan the Butrans initiation guide,discussed appropriate patients and initiating dosage strengths for Butrans, we talked about Butrans formulary coverage and i asked Jaime and Nathan to focus patients on application/rotation section of Butrans,in Butrans patient information booklet,both agreed to do that.
PLPMDL0020000001	Waterford	OH	45786	7/26/2011	W - Vickie hasn't written but likes the idea of Butrans and 7 days of coverage. She said that she would prescribe for patients if she has the ability based on her NP license and if patients have favorable coverage. I - Butrans follow up and review of indication and 7 days of buprenorphine in 1 application with a CII scheduling. Use of initiation guide to discuss appropriate patient selection based on patients current therapy. Formulary coverage review and savings card program eligibility.
PLPMDL0020000001	Cleveland	OH	44130	7/26/2011	Spoke with John (pharmacist) who said that they still have the Butrans auto shipment in stock as none has been dispensed to his knowledge. Discussed Butrans savings program through e-voucher & savings cards. Also let him know he could go online to Butrans.com to print savings cards as needed. Reviewed appropriate patient type. John also said they are out of OxyContin savings cards, so I gave him a new package & reviewed eligibility.
PLPMDL0020000001	Cleveland	OH	44195	7/26/2011	talked to dr about his patients with chronic pain taking tramadol,daily,but not controlled and asking him for something else and to consider Butrans right there instead of refilling tramadol.dr said a lot of patients like their pills so he's not sure about a patch but he'll consider talking to a few patients and see what they say.dr asked about insurance coverage,told dr to focus on commercial plan patients that can use Butrans patient savings cards or bwc patients.i talked to dr about patients that he feels are appropriate for OxyContin,showed appropriate patients flashcard and discussed formulary coverage for OxyContin.i recommended Senokot-S
PLPMDL0020000001	Cleveland	OH	44103	7/26/2011	discussed 4 patient case studies in initiations presentation,dr said he's not started anyone on Butrans due to medicaid requiring a prior authorization.dr said he only has a few patients with commercial insurance so its hard to remember that Butrans is covered on commercial plans.i asked dr if he could keep Butrans initiation guide,patient information booklet and patient savings card information by him in case he has anyone he feels is appropriate? dr said he would do that.we discussed OxyContin being an option,i showed appropriate patients flashcard and discussed OxyContin insurance coverage.i recommended Senokot-S
PLPMDL0020000001	Cleveland	OH	44195	7/26/2011	i talked to jessica,Dr vrooman's medical secretary,about Butrans 5 core messages,appropriate patients was focus of discussion and i asked Jessica if patients call her for refills? jessica said yes she gets 15-30 calls a day from patients wanting refills or something new i asked if Jessica could recommend Butrans to dr vrooman,if patients are taking tramadol,vicodin or percocet and not controlled based on the information in Butrans initiation guide? jessica said she will do that and took Butrans fpi,initiation guide and butrans patient information booklets we discussed butrans formulary coverage and patient savings cards.
PLPMDL0020000001	Waterford	OH	45786	7/26/2011	W - Waters discussed patients that he would consider appropriate for Butrans. He shared that patients suffering from pain due to OA may be a great patient type for Butrans when an NSAID or even tramadol isn't taking care of the pain. I - Butrans follow up and review of indication and 7 days of buprenorphine in 1 application with a CII scheduling. Use of initiation guide to discuss appropriate patient selection based on patients current therapy. Formulary coverage review and savings card program eligibility. Review of patient information booklet with Waters and staff to discuss appropriate application sites as well as disposable methods. OxyContin as an option for pain control when patients meet the indication. Review of OxyContin formulary coverage - medicaid and medicare plans with coverage -<font color=blue><b>BROWNMA1 added notes on 08/08/2011</b></font>-Mark - it sounds like you had a good discussion here, helping the doc identify a specific patient type that can benefit from Butrans. If you used the inclusion data within the core sales aid, you may also want to include this in your call notes. This will help you plan your next call. Thank you, Mark
PLPMDL0020000001	Cleveland	OH	44109	7/26/2011	I talked to dr about the couple of patients he started on Butrans and dr said they are both doing well and haven't called him back with any issues so thats good.dr said he wanted to be sure pharmacies had Butrans in stock as 1 patient had an issue getting Butrans at the pharmacy.i told dr i am working with pharmacies on stocking but some CVS and Rite Aid pharmacies dont want to order Butrans until they see their 1st script so i told dr if he wanted to speak with some pharmacies,when starting patients on Butrans,to confirm stocking thats up to him,he said ok.i showed dr Butrans visual aid,discussed appropriate patients and i asked dr if he had a couple patients on tramadol,with chronic pain and dosing every day but not controlled and asking him for something else? dr said yes he has a lot of those patients.i asked dr to start those patients on Butrans instead of refilling tramadol or converting them to another short-acting opioid,dr agreed,focused on BWC and commercial plan patients.we discussed OxyContin being an appropriate option,showed flashcard with this information,discussed 7 tablet strengths for titration and discussed medicaid,medicare and commercial insurance coverage for OxyContin.i recommended Senokot-S
PLPMDL0020000001	Parma	OH	44129	7/26/2011	Dr Gallagher apologized & said that he does not remember much about Butrans. Reviewed indication, dosing, delivery system, CII & abuse/addiction potential. Also discussed appropriate patient type, including patients on chronic Vicodin or tramadol, especially those calling in too soon for refills or saying their medication is wearing off too soon. I asked if he felt it made sense for those patients to switch them to a different molecule or different delivery system instead of increasing the amount of current medication they are taking. He said this does make sense & he is glad now to have a different option for those patients. He said he does have a lot of patients who fit the profile. He asked me about adverse event rates, specifically for constipation. I showed him rates. He said he thought they seemed low. Discussed starting dose for different patient types & titration ability every 3 days. Also discussed supplemental analgesia & let him know patients could take opioid or non-opioid medication for breakthrough & as Butrans reaches steady state. Reviewed patient information guide & discussed application, rotation, & disposal. Also reviewed managed care, asking him to think of commercially insured patients who fit the description of what we have talked about. He agreed to try Butrans & said he is looking forward to trying it & is happy to have a different option. Began "Initiations" presentation but did not complete it.
PLPMDL0020000001	Independence	OH	44131	7/26/2011	Dr Sundaram said he just doesn't think he has patients to try on Butrans. I asked him what the differences are in patients who he treats vs those he refers to pain management. He said he does not refer. Reviewed with him the appropriate patient type & discussed patients taking Vicodin or tramadol chronically. I asked what he goes to after NSAID's or COX-2's fail for a chronic pain patient. He said tramadol or Vicodin. I asked what he does if that doesn't work. He said Percocet. He said he guesses that is where he could try Butrans. He asked if it "gives the same high". Told him that Butrans is a CII opioid that has abuse/addiction potential. Showed him pK profile page on main visual aid. He said he likes that plasma levels seem to remain more constant than with a short-acting around-the-clock opioid. He asked about cost. I asked if he meant for insured patients. He said yes & also cash price. Discussed managed care coverage & reviewed savings cards for eligible patients. He said he thought a \$15-\$20 co-pay was reasonable. Discussed titration ability every 3 days & possible use of supplemental analgesia for breakthrough & initial 3 days. He said he thinks he knows better now the types of patients he should be looking for. He said he thinks the ideal place would be for naive patients, but many times those are acute pain patients. Also discussed OxyContin q12h for appropriate patients beyond Butrans.<font color=blue><b>CHUDAKOB's query on 08/04/2011</b></font>-Ashleigh, when the physicians starts talking about constant blood levels with Butrans and comparing it to short-acting opioids, it is our responsibility to correct that by telling them that this graph is only plasma levels in the blood and we do not have data to show that Butrans is any more efficacious or safe than any other opioid. If you do not correct this, then the implication is you agree with it. Does this make sense?<font color=green><b>APSEGAS's response on 08/09/2011</b></font>-Yes, this makes sense. I plan to see him today so I will rectify this right away.<font color=blue><b>CHUDAKOB added notes on 08/12/2011</b></font>-Thank you! Let me know how you corrected this!
PLPMDL0020000001	Cleveland	OH	44109	7/26/2011	i talked to Tenia(pronounced TINA),Pharmacy tech,confirmed no Butrans scripts here but pharmacy staff is aware of Butrans and what it is,i showed Butrans initiation guide,discussed appropriate patients and initiating dosage strengths,Tenia said they get a lot of scripts from dr carson and dr celeste and dr nickels patients,but no Butrans yet.we discussed importance of stocking Butrans but tenia said Ray,Pharmacy manager wont order butrans until they see 1st script.we talked about insurance coverage,savings cards and i showed Tenia the Butrans pharmacy fact sheet.we discussed OxyContin stocking and Tenia said only a few strengths are stocked here of reformulated OxyContin.Tenia said majority of patients are BWC or commercial and they dont use OxyContin savings cards and they dont have any cash paying patients for OxyContin.i recommended Senokot-S
PLPMDL0020000001	Cuyahoga Falls	OH	44223	7/26/2011	I asked the Dr. Pitt how often patients are calling in complaining about their current SA therapy? How often are they asking for more of it? He said patients are calling in often complaining of both. I asked if he would feel comfortable initiating therapy to those patients and he agreed he would/
PLPMDL0020000001	Cuyahoga Falls	OH	44223	7/26/2011	Discussed the patient education guide. Went over how and where to apply the patch.
PLPMDL0020000001	Westlake	OH	44145	7/26/2011	I asked Dr what types of patients does he think would benefit from Butrans. He said it is a different option for patients when other medications don't work well. We reviewed that opioid naive patients can start with 5mgc Butrans. I asked Dr to come and learn moer about Butrans at our upcoming dinner discussion.
PLPMDL0020000001	Cleveland	OH	44130	7/26/2011	Quick call- I asked Dr Diab if he knew he could write refills for Butrans. He responded, "OK, thank you" & then walked into a patient room. Left sealed "Special Report" article on his desk for his review.
PLPMDL0020000001	Cuyahoga Falls	OH	44221	7/26/2011	I asked Dr. DiLauro about the success patients were having with Butrans and she said she felt patients were having success for the most part. She said that based on the success rate with Butrans she would feel confident continuing to prescribe for opioid experienced patients. I reminded her that Butrans had also been studies in opioid na rve patients.
PLPMDL0020000001	Cuyahoga Falls	OH	44221	7/26/2011	I asked Dr. DiLauro her thoughts on Butrans therapy and how she felt about the molecule Buprenorphine. She said she liked the idea of this medication and felt comfortable with the molecule. I asked if there was anything more she felt like she needed to know before prescribing for the first time and she said no and that she would keep it in mind.
PLPMDL0020000001	Cleveland	OH	44121	7/26/2011	Window call....provided doc an interacte invitation and asked him to participate as it may help identify the right patients for butrans. Gave him a formulary grid reminder for butrans and oxycontin.
PLPMDL0020000001	Cleveland Heights	OH	44118	7/26/2011	I explained the positioning of butrans to doc and asked him to consider butrans as an alternative to prescribing vicodin 3 or mroe times per day. I explained how butrans is a CII similar to hydrocodone and that it can be called in/refilled. He asked about medicaid coverage. I explained that it is not covered and focused him on the commercial plans. He asked about the starting dose if patients are on 5 or 10mg of hydrocodone. I explained that 5mgc/hr would be the starting dose and showed him the demo of a 5mgc patch.He said he would try it.
PLPMDL0020000001	Cleveland Hts	OH	44118	7/26/2011	Quick call....reminded doc that he previously said that butrans might be good for patients that can not tolerate hydrocodone. I asked him how often he see patients that can not tolerate vicodin. He said all the time. I asked him to try those patients on Butrans instead as long as they meet the indication.
PLPMDL0020000001	Berea	OH	44017	7/26/2011	I reviewed the Butrans savings cards and asked him to try Butrans instead of increasing hydrocodone or percocet. He said OK, left invite for our upcoming dinner discussion.
PLPMDL0020000001	Westlake	OH	44145	7/26/2011	I asked Dr if he is having success so far with his Butrans patients. He said he has not heard much feedback but it's just another option for him to try. We reviewed the managed care for Butrans and that OxyContin is covered on Medicaid. I invited Dr to upcoming dinner discussion.
PLPMDL0020000001	Berea	OH	44017	7/26/2011	Dr said that he forgot about Butrans, but he will keep it in mind as an option. I asked if he had any patients taking vicodin around the clock who he feels may benefit from 7 day dosing. He said he will keep Butrans in mind for those types of patients. I reviewed the savings cards for Butrans and OxyContin. Dr will not be able to attend our dinner program.
PLPMDL0020000001	Westlake	OH	44145	7/26/2011	I reviewed the key messages for Butrans- 7 day dose and CII. I asked Dr to come talk to other Drs at our upcoming dinner discussion about Butrans and he will try. He said he lives a few minutes away from Crocker Park and will try to attend this location. Reminder about OxyContin is still an option when Butrans may not provide adequate analgesia.

PPLPMDL0020000001	Mayfield Hts	OH	44094	7/26/2011	Window call....I explained to doc that if he has any patients taking a short acting opioid like vicodin 3 times per day once weekly butrans provides an alternative to tablets. He said he does not use patches. I explained that Butrans is the first long acting CII and like vicodin can be called in or refilled. No comment from doc. Left him and engage invite.
PPLPMDL0020000001	Westlake	OH	44145	7/26/2011	Spoke with Amy, Katy was not in today. I reviewed Butrans key messages and asked if she would invite Stephanie and the other NPs to our upcoming dinner discussion. She will let her know about it.
PPLPMDL0020000001	Cuyahoga Falls	OH	44223	7/26/2011	Quick call through window. I asked Dr. Raniol if her prescribing habits had changed and if she felt like there was a place for Butrans in her practice yet. She explained that she still was not treating chronic pain.
PPLPMDL0020000001	Highland Heights	OH	44143	7/26/2011	Quick call. Gave doc patient info guides and explained the importance of proper application. Doc said patients probably would not read it but to leave them with marianne. Reminded doc of the formulary coverage for Butrans and oxycotin.
PPLPMDL0020000001	South Euclid	OH	44121	7/26/2011	Window call.....provided doc with the butrans initiation guide and a formulary reminder. nothing earned.
PPLPMDL0020000001	Cleveland Heights	OH	44118	7/26/2011	Quick call.....spoke with Mukul who confirmed that they have butrans. He has not seen any scripts. He asked if it is being covered by medicaid. Told him not on medicaid but well covered on commercial plans. Explained the savings cards program.
PPLPMDL0020000001	Cuyahoga Falls	OH	44221	7/26/2011	I asked the Dr. Azem if she had been initiating Butrans therapy to patients failing or asking to be titrated on their current therapy like we had previously talked about. She said that she was keeping it in mind for those patients and would continue to do so. I reminded her that Butrans was 7 days.
PPLPMDL0020000001	Cleveland	OH	44195	7/26/2011	worked rheumatology dept-left dr calabrese,betsy kirschner,np,dr chatterjee,dr deal,dr long and patty paczos,pa-butrans fpi's,initiation guides,patient information booklets,dinner invitations for 8/10/11 and formulary grid for Butrans; worked aneseth/pain management-left dr stanton-hicks,dr cheng,dr vrooman,dr kataly,dr samuel and dr ningegowda-Butrans fpi,initiation guide,formulary grid,patient information booklet for all doctors.
PPLPMDL0020000001	Akron	OH	44310	7/26/2011	I explained the ideal type of Butrans patient to the Physician. He agreed that he had many of those patients and because it is a LA agent would be a better choice for many patients currently taking several SAO&#8217;s each
PPLPMDL0020000001	Parma	OH	44134	7/26/2011	Dr Hernandez asked me if I knew of any type of street value of Butrans. I told him I did not know any specifics but that because Butrans is an opioid & is abusable, someone with inappropriate intentions could abuse it or use in inappropriately. He said he has not heard of anything either & that he really doesn't know how someone could abuse it because the doses are "so low". I again told him that it is abusable & carries addiction liability. I asked him if he has noticed Butrans showing up on OARRS reports. He said he has not noticed one way or the other but would try to pay attention to that when he runs a report next. I asked him if there were any conditions causing moderate to severe chronic pain that he would not treat with Butrans. He said none that he can think of. Discussed OxyContin 7 available tablet strengths.
PPLPMDL0020000001	Parma	OH	44129	7/26/2011	Quick call- Dr Ortega said he is still trying patients on Butrans but has no new information for me. I asked him if my last visit helped clarify the type(s) of patients he may want to look for & he said it did help. He said he would let me know when he has more feedback. Let him know that I brought patient information guides for his office & that I went through them with Cindy, so she will hand them out so that he does not have to worry about it. Spoke with Cindy & showed her patient guides & discussed how she can use them for patient questions. She said that one of the patients who was taking Butrans was diabetic & had pre-admission testing done before a surgery. The patient had to postpone the surgery because his blood sugar was too high. Cindy said that prior to this, his diabetes had been well-controlled & she asked if Butrans could cause the elevated blood sugar. Showed her FPI section 6 & did not see this listed in the adverse events. I asked her if the patient was definitely taking Butrans during the testing & she said she does not know for sure but thinks so. She also said he is on multiple other medications, so it could have been something else. I let her know I would report it just in case.
PPLPMDL0020000001	Parma	OH	44129	7/26/2011	Dr Roberny said he still has not gotten feedback from his patient for whom he prescribed Butrans & he is not sure that she even filled the script. Reviewed with him the appropriate Butrans patient type (around-the-clock chronic Vicodin or tramadol) & asked him if that sounds like any of his patients. He said a lot of them. I also added that patients calling too soon for Vicodin or tramadol refills or who say their medication is wearing off too soon may be good candidates & asked him if that describes anything familiar to him. He said he gets them frequently. Reminded him of focusing on commercial insurance. He said that eliminates 3/4 of his patients. I asked if he thought he might have 1 or 2 working patients who fit the profile we spoke about & he said "maybe". I told him that there was something holding him back from prescribing Butrans & that I want to uncover what that is & asked if he has any questions. He asked if patients can take oral pain medications with Butrans. Told him patients can take supplemental analgesia in the form of opioid or non-opioid medication. Also added that Butrans is the only once-weekly CII medication. He asked what that meant. Told him prescriptions can be called in & refills can be written. Also added that Butrans is an opioid & he should be just as cautious in prescribing it as he is with other opioids. Also reviewed OxyContin q12h as a CII. He said he will see if he has any patients for Butrans.
PPLPMDL0020000001	Euclid	OH	44119	7/27/2011	Showed doc the butrans demo and how one butrans can be an alternative to 21 tabs of vicodin. Explained the CII status similar to vicodin and can be called in/refilled. He asked about medicaid. Showed him formulary grid and and the commercial plans. He complained about the 3rd tier status. I explained the savings card program to help with out of pocket costs. He suggested that the patch come in fashion colors or more skin tone colors. I told him I would pass that along. I asked him to try butrans for appropriate patients.
PPLPMDL0020000001	Cleveland	OH	44114	7/27/2011	talked to dr about the couple of patients she started recently on Butrans,all of them were taking vicodin or percocet every day for their chronic pain but not controlled and asking dr for something else,dr said she talked to patients about Butrans and they were willing to try the medication we discussed Butrans patient information booklet,application/rotation section and log book in booklet and dr said she does discuss this info with patients.i
PPLPMDL0020000001	Cleveland	OH	44106	7/27/2011	showed dr Butrans visual aid,appropriate patients section,asked her to continue starting patients on Butrans,dr agreed and we discussed bwc and commercial plan patients trying Butrans. dr said he started a couple patients on Butrans,i told dr that was great seeing that i thought he only started 1 patient on butrans and i asked dr to tell me more about why he chose butrans for those patients?dr asked if i really wanted to know that information,did i really care? i told dr yes i did,as sometimes physicians are the one's who tell patients this is their only choice(starting on Butrans) and others tell me that patients are the one's asking their physicians for something else. dr said ok,it was the patients who were asking for something else,i patient was taking vicodin and methadone and the patient stopped taking methadone and really didnt want to continue taking vicodin,so he suggested this patient try Butrans and take vicodin for break through pain as needed.i showed dr Butrans visual aid,discussed appropriate patients for butrans and asked dr to consider Butrans for those patients taking tramadol or vicodin,daily,but not controlled,dr said ok.
PPLPMDL0020000001	Cleveland	OH	44114	7/27/2011	talked to dr about his patients taking vicodin,10mg daily,for their chronic pain and not controlled,asking him for something else,i asked dr to start them on Butrans instead of refilling vicodin,dr said he will consider that if patients are appropriate,dr said for most of the patients he's started on Butrans,it was because they were maxed on orals and wanting more pills and dr wasn't comfortable refilling their short-acting opioids,so Butrans was their only option.i showed dr butrans visual aid,appropriate patients section and initiation of Butrans information and asked dr to focus on more BWC patients,per our discussion,to start on Butrans,dr said he will do that.i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	7/27/2011	worked internal medicine:left dr.lindheim,dr eisen,dr ricanati,dr harrington,dr falck-ytter and dr mccreary-OxyContin,fpi,formulary grid,conversion guide,appropriate patients and challenging flashcards for OxyContin and my business card. worked family medicine:left same info as above for dr ll,dr forde and dr krofina and for the residents.
PPLPMDL0020000001	Broadview Heights	OH	44147	7/27/2011	Spoke with Angela (MA), who said that Dr Samuel would not be able to see me today. Reminded her of previous Butrans lunch & refreshed her memory on indication, delivery system, & appropriate patient type. I gave her sealed "Special Report" article & "Initiations" invitation & asked her to give them to Dr Samuel. She agreed. She said he will still be at this location on Wednesdays despite changes with the group at the Marymount & SouthPointe locations.
PPLPMDL0020000001	Broadview Heights	OH	44147	7/27/2011	Spoke with Angela (MA), who said that Dr Samuel would not be able to see me today. Reminded her of previous Butrans lunch & refreshed her memory on indication, delivery system, & appropriate patient type. I gave her sealed "Special Report" article & "Initiations" invitation & asked her to give them to Dr Samuel. She agreed. She said he will still be at this location on Wednesdays despite changes with the group at the Marymount & SouthPointe locations.
PPLPMDL0020000001	Warrensville Heights	OH	44122	7/27/2011	Dr Zivic said that OxyContin is straightforward for him but Butrans is "more difficult". I asked him what he meant. He said he is just not familiar enough with it or used to it. I told him we would work on that together today to make him more comfortable. Discussed appropriate patient type (patients taking around-the-clock Vicodin or tramadol who say it is wearing off too quickly or who call too soon for refills.) He said that already has made him think of many specific patients. I asked him of those patients, how many he thought could benefit from a once weekly transdermal system of buprenorphine, a different molecule. He said he thinks all of them could potentially. I asked him how many of them have commercial insurance. He said some of them. I told him those were his potential first Butrans patients. Reviewed savings program, application, rotation, & adverse event rates in main visual aid. Discussed titration ability every 3 days to a maximum 20mcg dose & also CIII, abuse/addiction potential, & the ability to call in prescriptions & refills. He said by the next time I come in he will have tried it on some of these patients. I let him know I would be following up within two weeks to hold him to that. He agreed. Discussed Ryzolt q24h & OTC products. Reviewed Senokot-S dual MOA & recommended it for opioid-induced constipation. Reviewed savings cards for all products with Michelle.
PPLPMDL0020000001	Parma	OH	44129	7/27/2011	Dr Chagin said that he did put one patient on Butrans but has not had any feedback yet. I asked him to tell me about the patient. He said it was a patient who was newer to him who had been on Vicodin around-the-clock for awhile but was no longer being well-controlled on his dose. I asked Dr Chagin if he has other patients who fit this profile as well & he said he does. He said he likes to use new drugs & likes having different options, especially for this type of patient. Discussed Butrans as the only once weekly CII. Reminded him of abuse/addiction potential due to Butrans being an opioid. He asked how Butrans compares to Vicodin as far as abuse potential is concerned. I told him we have no comparative data. He said he plans on trying Butrans on more patients. I asked him to focus on commercially insured patients & reviewed savings program. Also invited him to participate in "Initiations" program, but he said he didn't want to go through it now. Gave him info to log on. Also discussed OxyContin q12h for appropriate patients & 7 available tablet strengths. Discussed Ryzolt q24h, managed care, & 3-2-1 messaging. He requested some literature to keep on hand as a reminder so that he would remember to use it.
PPLPMDL0020000001	Cleveland	OH	44105	7/27/2011	talked to Abdul about Butrans 5 core selling messages,showed abdul butrans visual aid and asked what he thought were a couple features of Butrans that really stood out to him? Abdul said he likes that Butrans is a patch and dosed once a week,but he's not seen any scripts for Butrans yet,abdul said once he gets that 1st script,he'll order Butrans.Abdul said he gets a lot of dr nickels and dr raheja's patients that fill vicodin and tramadol scripts and metro doc's send a lot of patients to him.abdul wanted to be sure im working with all of these mentioned,i told him yes,showed Butrans initiation guide,discussed appropriate patients and told Abdul that as long as he has the 2 initiating dosage strengths of Butrans stocked,it will be easier for patients when they DO come see him with a script instead of turning them away and waiting 24hrs.Abdul agreed that this was better for the patients and said he would think about it,we discussed bwc and commercial insurance coverage for Butrans and we discussed OxyContin stocking and savings cards.i recommended Senokot-S
PPLPMDL0020000001	Bedford	OH	44146	7/27/2011	Reviewed savings cards with technician as pharmacist was not available. Also discussed Butrans appropriate patient type & asked her to leave Butrans information for the pharmacist- she agreed & asked me to return next week to speak with the pharmacist.
PPLPMDL0020000001	Cleveland	OH	44104	7/27/2011	I talked to dr about his patients on Butrans and how they are doing in follow-up,dr said he's seeing improvement in patients pain,more controlled now that they are taking butrans.dr said the couple patients he started are in hospice but he's got some patients in mind that see him in his office.i showed dr Butrans visual aid,discussed appropriate patients section,focus on commercial insurance but dr has majority of medicaid patients so he said he wants to see what happens in 2012 with medicaid and if they cover Butrans.dr said he likes Butrans seeing that its transdermal and dosed once a week but doesnt have a lot of commercial plan patients he see's in his office,but he is sold on Butrans so no questions there.i recommended Senokot-S
PPLPMDL0020000001	Fairlawn	OH	44333	7/27/2011	I asked Dr. Parisi how often patients are calling in complaining about their current SA therapy? How often are they asking for more of it? He said patients are calling in often complaining of both. I asked if he would feel comfortable initiating therapy to those patients and he agreed he would.
PPLPMDL0020000001	Akron	OH	44304	7/27/2011	I asked Dr. Amamunif if he felt there was truly a place for Butrans in his practice and if he could see himself prescribing Butrans moving forward. He said yes. No new info learned.
PPLPMDL0020000001	Akron	OH	44320	7/27/2011	I asked Misty about the success patients were having with Butrans and she said she felt patients were having success for the most part. She said the based on the success rate with Butrans she would feel confident continuing to prescribe for opioid experienced patients. I reminded her that Butrans had also been studies in opioid na /ive patients.
PPLPMDL0020000001	Maple Heights	OH	44137	7/27/2011	Spoke with Kathy (MA) who said that Dr Dale was out of town all this week. Reviewed Butrans formulary grid & savings cards with her. Also discussed eligibility requirements. Worked with her to schedule next available lunch. I asked her to give Dr Dale Butrans information & "Initiations" invitation upon his return & she agreed to do this.

PPLPMDL0020000001	Maple Heights	OH	44137	7/27/2011	Quick call- Caught Dr Gene at the window. He said he had forgotten about Butrans & asked what it is. Reminded him of indication, dosing, & delivery system. He said he did not have time to discuss it today but asked for information & suggested I schedule another lunch. Spoke with Kathy (MA) & reviewed Butrans managed care grid & savings.
	Cleveland	OH	44104	7/27/2011	dr said she's keeping Butrans in mind but hasn't had any patients with chronic pain that are taking short-acting opioids every day and not controlled. showed dr Butrans visual aid and asked her what features stand out the most to her? dr said transdermal technology, a patch and once weekly dosing. dr said she likes that Butrans is a CII and can be called in, but again she has a lot of acute pain patients and not a lot of chronic pain patients so she may not be the person to talk to a lot about Butrans. I told dr I understood that and as long as she considers Butrans for a couple patients, commercially insured, who are taking tramadol or vicodin daily but not controlled, she at least has all of the information. dr said ok she will keep butrans in mind.
PPLPMDL0020000001	Euclid	OH	44119	7/27/2011	Spoke to Lisa, fill-in pharmacist from the eastlake store. She was not familiar with the butrans script volume but she confirmed the had it. I explained the savings cards program and discussed the positioning, what we are telling doctors.
PPLPMDL0020000001	Akron	OH	44320	7/27/2011	I asked Dr. Duppstandt her thoughts on Butrans therapy and how she felt about the molecule Buprenorphine. She said she liked the idea of this medication and felt comfortable with the molecule. I asked if there was anything more he felt like she needed to know before prescribing for the first time and she said no and that she would keep it in mind.
PPLPMDL0020000001	South Euclid	OH	44121	7/27/2011	Spoke to tech, Barbara, about the stocking of Butrans. She confirmed that they have the 5 and 10mcg but she has not seen any scripts for it. I explained the positioning - in lieu - of starting vicodin ATC. I also explained the savings cards program and the WAC costs, per the FPI.
PPLPMDL0020000001	Twinsburg	OH	44087	7/27/2011	Spoke with Nicole (technician) who said that they only had a floater pharmacist in today. Discussed savings cards & eligibility for Butrans & OxyContin programs & asked her to give the Butrans savings leaver & my card for Lou- she agreed. She also said they have not yet dispensed Butrans at that location to her knowledge.
	Cleveland	OH	44106	7/27/2011	talked to dr as he's PGY-1 Resident in pain dept, dr said he's only worked 1/2 day in another pain clinic so he has no experience writing for transdermal medications, as we were discussing Butrans 5 core messages, I showed dr Butrans visual aid and asked him what were some features of Butrans he liked? dr said he liked that Butrans was a patch and dosed once a week. I asked dr as he starts to treat chronic pain patients here, to consider Butrans for those patients taking short-acting opioids but not controlled, showed Butrans initiation guide and discussed formulary coverage for Butrans, dr agreed to keep Butrans in mind and said he would talk to fellows and attending physicians about Butrans.
PPLPMDL0020000001	Cleveland	OH	44106	7/27/2011	discussed 4 patient case studies with dr, initiations presentation, dr said he wouldn't start an opioid naive patient on Butrans, most likely would start on tramadol and see if that controls pain 1st. dr said he started 1 patient on Butrans who was taking a couple vicodin daily and not controlled. I asked dr if this patient was in or out-patient? dr said patient was out-patient. dr asked if you could call in refills of Butrans? I told dr 5 refills up to 6 months, showed butrans initiation guide to show example of script, dr said ok he'll start more patients. dr asked about patients taking 2-3 vicodin a day, could he start them on Butrans? showed dr butrans initiation guide with dosage ranges and showed hydrocodone section and discussed initiating dosage strengths of Butrans. I asked dr to focus on a couple patients taking less than 300mg tramadol every day, for their chronic pain and not controlled, those are the patients dr can consider starting on Butrans, dr said ok he wasn't thinking of tramadol patients but made sense. we talked about insurance coverage and dr said he'll start some more patients and see
PPLPMDL0020000001	Euclid	OH	44119	7/27/2011	Quick call....introduced butrans to doc. Explained the indication, CII status, dosing, and positioning. He mentioned to his MA that butrans might be an option for her. he said he usually refers to pain mgmt for things like this. Nothing else learned. Gave him an invite, formulary grid, and initiation guide.
PPLPMDL0020000001	Euclid	OH	44119	7/27/2011	Quick call as doc just back from vacation. I reminded him of the butrans patient type - after NSAIDs or tramadol or before going to ATC vicodin. He apologized for not having more time. Gave him an interact invite to learn more about the right butrans patient.
PPLPMDL0020000001	Cleveland	OH	44106	7/27/2011	discussed 4 patient case studies with dr, from initiations presentation, dr said he probably wouldn't start opioid naive patients on Butrans as he prefers short-acting opioids for those patients, even if they have chronic pain and over time if patients aren't controlled then he'll consider a long-acting opioid. I talked to dr about considering Butrans, earlier in therapy, instead of waiting until they are taking percoct daily and not controlled. dr said he has some patients on Butrans and they seem to be doing well. I asked dr how he is explaining Butrans? dr said he tells patients this is easy for them with once weekly dosing, only 4 patches a month, dr tells them they can take an aspirin or ibuprofen if they have breakthrough pain, and for many patients dr feels he isn't comfortable increasing the short-acting opioid dose, he tells these patients this is your only option and it seems to work with these patients so far that he's started on Butrans we talked about butrans formulary coverage and savings cards. I recommended Senokot-S.
PPLPMDL0020000001	Warrensville Heights	OH	44122	7/27/2011	Spoke with Debbie (Lead Nurse) who said that changes continue to come to South Pointe Pain Management & Dr Shin will be leaving to go to Wooster & Medina offices starting in September. She said that more changes will come along with that & she would keep me updated as they happen. I reminded her of Butrans indication, dosing, delivery system, & savings program. She said she does not know why it has not been utilized with their doctors. They are still not allowing reps back still but hopes that will change at some point. I asked her to give Dr Shin Butrans "Initiations" invitation & August Butrans Cleveland area program invitations. She promised to do this & asked me to return on a Thursday when she would have more time to discuss things with me.
PPLPMDL0020000001	Cleveland	OH	44106	7/27/2011	worked pain management dept-see call notes as I had lunch with dept, worked family medicine-got updated list of attending physicians in dept that practice at main campus and left Butrans fpi, initiation guide, patient information booklet and dinner invitation for 8/10/11 for Dr. Marsh and Dr. Truax
PPLPMDL0020000001	Cuyahoga Falls	OH	44223	7/27/2011	I asked Dr. Saunders if he had been initiating Butrans therapy to patients failing or asking to be titrated on their current therapy like we had previously talked about. He said that he was keeping it in mind for those patients and would continue to do so. I reminded him that Butrans was 7 days.
PPLPMDL0020000001	Akron	OH	44310	7/27/2011	Dr. Schukay said that head prescribed Butrans for a few patients and was pleased that he had not heard back from them. I explained steady state takes 72 hours to achieve and told him if he had call backs prior to that to encourage patients to remain on therapy. He asked about titration which I explained using the initiation guide.
PPLPMDL0020000001	Euclid	OH	44119	7/27/2011	Introduced Butrans to Judy discussing the key selling messages, positioning, CII status similar to vicodin. I explained the insurance coverage and the savings cards. She said that she really does not have the right patients but dr. Lin would want to hear about it.
PPLPMDL0020000001	Euclid	OH	44119	7/27/2011	Lunch. Introduced the butrans indication/positioning and other selling messages. she was shocked to learned that the butrans patch last for 7 days, She said she does not prescribe a lot of narcotics but she wanted information to learn more about it. Provide initiation guide, formulary grid.
	Euclid	OH	44119	7/27/2011	Lunch. Spoke with doc and his MA about the butrans indication, positioning, CII status, etc. He asked if it is used for addiction. I explained that butrans is only indicated for pain, per the fpi, as it is a much lower dose. He said he likes to use caution when prescribing narcotics so he wants to read more about it. He asked how it compares to vicodin. I explained that there are no head to head studies however butrans is a CII similar to vicodin but one dose last one week. He asked what clinical studies we have. I reviewed the studies measuring pain score improvement. gave him an invite, formulary grid, and initiation guide for him to review. No commitment.
PPLPMDL0020000001	Cuyahoga Falls	OH	44223	7/27/2011	I explained the ideal type of Butrans patient to the Physician. He agreed that he had many of those patients and because it is a LA agent would be a better choice for many patients currently taking several SAO&#8217;s each
	Euclid	OH	44119	7/27/2011	Introduced butrans to doc and explained the positioning and the CII status as well as other selling messages. She said she does not have many chronic pain patients and probably would not use the savings cards. Provided her with an initiation guide,
PPLPMDL0020000001	Euclid	OH	44119	7/27/2011	I discussed the butrans positioning and 5 selling messages with doc and his MA. I asked if he sees a place for it in his patient population. He said no as he does not like to hear presentations about narcotics. He said they cost too much and insurance companies will not pay for them. I explain the commercial plans and the savings cards. I gave him the invite and he said he would take a look at it. Nothing else learned.
PPLPMDL0020000001	Bedford	OH	44146	7/27/2011	Quick call- Dr Moufawad said he did not have time today & was very busy but he stopped to shake my hand. I handed him a Butrans webcast invitation. He stopped & put the time & date (Aug 4) into his calendar on his phone & thanked me for the information. He said he is looking forward to hearing the Butrans talk & would let me know how the webcast goes.
PPLPMDL0020000001	University Heights	OH	44121	7/27/2011	Doc asked if I was still pedaling the Butrans patch. I commended him for remembering Butrans and asked if he has tried it. He said he has not found the right patient. I explained the positioning and how one 5mcg could replace approx 21 tabs of hydrocodone. His assistant, audra, asked about the abuse potential. I explained that Butrans is still a narcotic and has the risk potential for abuse/diversion. She also asked if its covered on BWC. Confirmed that it was. Asked doc to focus on commercially insured patients and to give a savings card. Reminded him of the oxycontin patient type as well and the difference from butrans.
PPLPMDL0020000001	Cleveland	OH	44109	7/27/2011	talked to Andy, Pharmacist, about Butrans stocking, scripts for Butrans and who's prescribing in area, and I asked andy if he or other pharmacists have recommended Butrans to any patients? andy said there were a couple patients that were telling them their tramadol wasn't lasting long enough and a couple people who were taking vicodin and same response, so they gave Butrans patient information booklets and asked them to speak with their doctor about Butrans. I asked if Andy and other pharmacists could continue doing that and also recommend Butrans to doctors, if their patients tell them their short-acting opioids aren't lasting long enough or controlling their pain, Andy said he would do that with doctors if the relationship is good. I said ok. I left more Butrans patient information booklets and I asked Andy to recommend Senokot-S for opioid induced constipation and I left
PPLPMDL0020000001	Cleveland	OH	44106	7/27/2011	I talked to dr about Butrans 5 core selling messages, asked dr what he felt really stood out about Butrans. dr said he loves transdermal technology and once weekly dosing is easier for some patients. dr said he's not started any patients yet on Butrans but will do so as he thinks this is a great option for patients regardless if they take short-acting opioids for breakthrough or take non-opioids with Butrans. we discussed patient information booklet, importance of discussing application/rotation of Butrans weekly and we discussed butrans formulary coverage.
PPLPMDL0020000001	Cleveland	OH	44130	7/28/2011	Dr Rogers said that he remembers that he was excited about Butrans when I first told him about it, but thinks he must have forgotten about it. He asked for a "refresher". Reviewed with him indication, dosing, & delivery system. Also spent time going over appropriate patient type & CII/abuse/addiction potential. Discussed patients who are not being well-controlled on short-acting opioids, calling in too soon for refills, or asking for increases in dose. Dr Rogers said he definitely wants to find some patients to try on Butrans & asked his nurse, Terry, to actively look for patients who fit the description & alert him when they call or come in. She agreed. Dr Rogers said that he is familiar with buprenorphine as a molecule from years ago having experience with Buprenex. He said he believes that buprenorphine is an effective pain reliever. He said that he thinks it can be difficult to transition a patient from a short-acting to a long-acting medication & therefore thinks setting their expectations & mindset up front were of extreme importance. I told him I could not agree more. Discussed ability to supplement with opioid or non-opioid medications, especially during the first 3 days of Butrans therapy. Reviewed titration ability every 3 days to a maximum 20mcg. Also discussed OxyContin q12h for patients beyond Butrans 20mcg.
PPLPMDL0020000001	Westlake	OH	44145	7/28/2011	Quick follow up, I asked Dr if he had tried the patient we talked about last time. He said that he will when he sees her next and will let me know how it goes. I asked if he can think of any other patients that may be appropriate for Butrans and he said he is starting to think of Butrans more often and will see who else he can start today. Remind about OxyContin as an option when Butrans may not provide adequate analgesia.
PPLPMDL0020000001	Barberton	OH	44203	7/28/2011	I explained the ideal type of Butrans patient to the Dr. minich. She agreed that she had many of those patients and because it is a LA agent would be a better choice for many patients currently taking several SAO&#8217;s each day.
PPLPMDL0020000001	Shaker Heights	OH	44122	7/28/2011	Quick call- I stopped Dr Agarwal by handing him a Butrans "Initiations" invitation & asking him to participate in the interactive program. He said he has no time today & walked away. Spoke with MA Michelle who said that he was over an hour late & was just not "in the mood" today. I told her about the program & asked her to remind him about it when the timing is better. She agreed. Also reviewed with her Butrans & OxyContin formulary grids. She said the Butrans grid would be especially helpful because she does not know the coverage yet. Discussed commercial insurance & savings cards. She asked me how Butrans compares with fentanyl. I told her we have no comparative data & discussed the appropriate patient type. She said she would give me information to Dr Agarwal.
PPLPMDL0020000001	Cleveland	OH	44102	7/28/2011	dr said he's not started anyone on Butrans yet and the hardest part for him is finding 1 patient and just getting in the habit of writing Butrans and feeling comfortable with Butrans. told dr I understood and asked what he needed from me to feel comfortable starting 1 patient? dr said nothing at this point, just keep telling him who the appropriate patient is and how to write Butrans. I showed dr butrans visual aid, appropriate patients section and initiation guide discussing dosage ranges of short-acting opioids and starting patients on Butrans. dr said ok, we discussed BWC and commercial plan patients trying Butrans. I recommended Senokot-S for opioid induced
PPLPMDL0020000001					

PPLPMDL0020000001	Cleveland	OH	44102	7/28/2011	talked to Nagla,PA,about appropriate patients for Butrans and showed her Butrans visual aid for discussion.Nagla said she does recommend Butrans to doctors and likes that its a patch and once weekly dosing,we talked about Nagla recommending Butrans right after tramadol isnt controlling patients pain instead of converting them to vicodin,Nagla agreed and said that makes sense,we talked about application/rotation section in Butrans patient information booklet and i asked Nagla to be sure this information is discussed with patients when starting on Butrans,Nagla said ok.we discussed BWC and commercial insurance patients trying Butrans.
PPLPMDL0020000001	Parma	OH	44129	7/28/2011	Spoke with Shari (MA) & asked her if they needed any Butrans savings cards. She said Dr Paat has not started using it yet. I asked if she knows why not. She said she is not sure other than it takes him awhile to start using newer products as he has old habits with writing the same drugs over & over. Discussed appropriate patient type with her & mentioned patients who call in too soon for refills of their short-acting opioids. She said she would try to alert Dr Paat to when she gets those calls & will "do her best" to get him to consider Butrans for the appropriate patients.
PPLPMDL0020000001	Parma	OH	44129	7/28/2011	Spoke with Edie (nurse) & Brittney (MA) & reviewed Butrans appropriate patient type. They showed me the empty Butrans savings cards but said they do not know where all the cards went because Dr Rossi is not yet using Butrans, at least to their knowledge. They agreed that she does have patients who fit the Butrans description. Told them about the Butrans "Initiations" program & asked them to give Dr Rossi the invitation. They agreed. Also worked with them to schedule next available lunch appointment.
PPLPMDL0020000001	Cleveland	OH	44130	7/28/2011	Introduced myself & Butrans to Dr Plecha. Delivered 5 core messages & reviewed box warning. Discussed importance of appropriate patient selection & talked about patients taking low-dose Vicodin or tramadol chronically. I asked him as a Vascular Surgeon, what role, if any, he thought a medication like Butrans would play in his practice. He said he does see a place for it & has patients who come to mind as potential candidates. He said that he has one who is taking 3 tramadol every day for back pain. He asked me if this could be a Butrans patient. I told him he sounds like the right type of patient clinically. He asked about side effects. Showed adverse events in main visual aid & asked if any of them surprised him. He said no. He asked about use in the elderly. Pointed out on that page that older patients had slightly higher incidences of adverse events & told him he should be cautious in this population as he always is. Also reviewed managed care & savings program. He said he has a patient taking 8 Percocet per day & said that he had just switched her to OxyContin. I told him she sounded more like an OxyContin candidate than a Butrans one & discussed 7 available strengths. He said he believes in using long-acting medications for patients, especially if their need for pain control will last for a longer period of time. He said he will keep an open mind & will try to utilize Butrans when he sees the kind of patient we spoke about.
PPLPMDL0020000001	Beachwood	OH	44122	7/28/2011	Jennifer said that she really hasn't had the opportunity to start a patient on Butrans. She said that she does not typically switch a patient's medication as this would be more Dr Yokiel's area. She added, however, that she can make recommendations or suggestions to Dr Yokiel for patients she sees & that she would like to get some experience with Butrans. Reviewed with her the importance of appropriate patient selection & discussed patients on the more moderate side. I asked her how frequently she gets calls from patients saying their short-acting medications are wearing off too quickly or who call too soon for refills. She said she gets them so frequently that she has a running list of patients to call just like that on her desk. I asked her what an example of a patient's dose of short-acting might be. She said probably 4 Percocet per day. I showed her initiation guide & walked her through initiation, including taper. Also reviewed titration ability every 3 days to a max 20mcg. Also talked about use of supplemental analgesia in either opioid or non-opioid medications. She said she thinks there is a place for Butrans & she will try to find some patients to suggest to Dr Yokiel as well.
PPLPMDL0020000001	Cleveland	OH	44113	7/28/2011	showed dr Butrans initiations presentation,discussed 4 patient case studies as dr said he didnt remember much about Butrans.i asked dr if he had patients taking tramadol,daily for chronic pain,that arent controlled? dr said yes he has a lot of those patients.i showed dr Butrans visual aid,discussing appropriate patients and talked to dr about patients taking less than 300mg tramadol,daily,for their chronic pain that arent controlled,starting them on Butrans 5mcg,discussed side effects and showed butrans fpi and visual aid for this information,discussed titration,showed Butrans fpi with steady state graph and discussed Butrans application/rotation section in Butrans patient information booklet.dr asked who covered Butrans? i told dr to focus on BWC,commercial and Tri-care as these are the 3 biggest payors here.dr said ok he'll start a couple patients and see what happens.i
PPLPMDL0020000001	Cleveland	OH	44130	7/28/2011	Dr Kansal said he has not tried any more patients on Butrans. He said the problem still remains of transitioning a short-acting around-the-clock medication to a long-acting agent. Reminded him that patients can take supplemental analgesia & asked him what made him try Butrans on the one patient that he did try it on (even though it did not end up being a patient in the right opioid range). I said that he must have seen some value in it if he prescribed it for one person. He said that nothing else had worked for that person, so he figured he would try it. Reviewed the appropriate patient type. He also said he is discharging patients from his practice who show up on OARRS as getting medications from multiple physicians. I told him it sounds like he is doing the right thing. Reminded him that some patients truly do need pain relief & said those are the patients he should think of with Butrans as well. He said we really should be talking to ER physicians because they are the ones who start patients on these short-acting around-the-clock medications. I told him we do not call on EM specialties because they prescribe for short-term & our medications are intended to be used for an extended period of time. He said he would try to identify some patients who may benefit from Butrans.
PPLPMDL0020000001	Beachwood	OH	44122	7/28/2011	Spoke with Shelly (pharmacist) & reviewed Butrans patient information booklet. Discussed patient counsel & answering questions first-time users may have. Shelly said she wishes it would "move" & she has seen no activity at all. I let her know I had just had breakfast with Dr Yokiel & Jennifer Dehlman. She said that they do get a fair amount of prescriptions from them. Reviewed appropriate patient type & discussed importance of appropriate patient selection.
PPLPMDL0020000001	Barberton	OH	44203	7/28/2011	I asked Dr. Patel how often patients are calling in complaining about their current SA therapy? How often are they asking for more of it? He said patients are calling in often complaining of both. I asked if he would feel comfortable initiating therapy to those patients and he agreed he would.
PPLPMDL0020000001	Cleveland	OH	44113	7/28/2011	talked to dr about his patients taking vicodin or percocet,daily,but not controlled and asking him for something else,dr said he hasnt seen a lot of patients as he does more procedures but he'll keep Butrans in mind.i showed dr Butrans visual aid,discussed 5 core messages and asked dr to start 2 patients,commercially insured,on butrans,if they are taking vicodin or percocet every day but not controlled,instead of refilling their vicodin or percocet,dr said he'll consider it but doesnt have anyone in mind at the moment for Butrans.
PPLPMDL0020000001	Copley	OH	44321	7/28/2011	I asked Dr. Heim about the success patients were having with Butrans and he said he felt patients were having success for the most part. He said the based on the success rate with Butrans he would feel confident continuing to prescribe for opioid experienced patients. I reminded him that Butrans had also been studies in opioid n rve patients.
PPLPMDL0020000001	Westlake	OH	44145	7/28/2011	Dr just got back from Lebanon, I asked about the success his Butrans patients are having and he said everything is going great. He said he is still trying to get Butrans on formulary and that he is not going to give up. He said that he will continue to go to P&T committee meetings until he is able to write it in the hospital. Dr cannot attend the Westlake dinner program due to the date, but may be able to come to the Cleveland program.
PPLPMDL0020000001	Beachwood	OH	44122	7/28/2011	I reminded Dr Yokiel of our last discussion regarding Butrans & asked him if his concerns about the molecule have been settled or if there is information I could provide him with that would help alleviate any concerns he still has. He asked me if people are using Butrans with success. I told him that it has been well-received & that patient selection is of paramount importance with Butrans. Discussed the scale of moderate to severe pain & different doses of current opioid therapy that patients may already be on. Let him know that someone on a higher dose of opioids may not get adequate relief from Butrans. He said that he sees mostly patients on multiple medications & higher doses but said he does see a good amount of patients on the lower end. I told him those were his potential Butrans patients. Discussed starting dosages & titration every 3 days. He said he will try it on some of those patients. Reviewed savings opportunities where eligible. Discussed OxyContin 7 available tablet strengths. He said that he sometimes forgets about the intermediate strengths but that he likes to be able to titrate more gradually now instead of taking a patient from 40mg q12h to 80mg q12h.
PPLPMDL0020000001	Cleveland	OH	44145	7/28/2011	Irene said they're having 2 conference - 12/6 & 12/7 in Philly and also 1/18-1/20. She's looking for a speaker to talk about diversion. Check with Ed Cartwright for openings. She liked Safeguard my meds brochure so determine if it's available in PDF. Determine which online webinars are available to post to their website and also check to see if has to be the link or actual video. When time allows, schedule Pain PACT initiative. Confirm appointment on Tues, Aug. 9 to discuss contracting with Toni and Irene.
PPLPMDL0020000001	Cleveland	OH	44106	7/28/2011	i talked to Amy,Pharmacist,about Butrans scrips and Amy said there have been some scrips for Butrans filled here.i asked Amy if she could pull the list and share with me the doctors prescribing Butrans? Amy said she couldnt do that today as she had too much to do.we talked about Butrans patient information booklets being given to patients when they get their scrips and i asked Amy to focus patient discussion on Application/rotation of Butrans,Amy said she usually just gives booklet but will talk about this information with them.i asked Amy if she could recommend Butrans to any patients that are taking short-acting opioids,daily yet their pain isnt controlled and wanting something else? Amy said she'll give the Butrans patient information booklet to a few patients and tell them to speak with their physicians.i recommended Senokot-S
PPLPMDL0020000001	Parma	OH	44129	7/28/2011	Caught Dr Tolentino at the window & asked her if the Butrans information I had left for her answered her questions. She said she has no questions & is waiting to see the right patient & then walked away. I spoke with Kathy, her MA, & asked what Dr Tolentino is looking for in "the right patient". She said it is difficult because target patients like those on low dose Vicodin or Percocet are difficult to transition to a long-acting medication like Butrans. She said she will help Dr Tolentino identify the right patient & will make suggestions to her as she sees them come in or takes phone calls from them. I mentioned patients who call her too soon for refills. Kathy said this may be a possible area of opportunity & said she would keep me posted.
PPLPMDL0020000001	Independence	OH	44131	7/29/2011	Spoke with MA Diana & asked her to give Roman a Butrans program reminder to register. Also discussed savings cards for Butrans & OxyContin & asked her to check their stock. She said they have enough of both types of cards for now. Discussed eligibility requirements (ie no government insurance). Also went through formulary grids with her. She said she would give the info to Roman & Dr Keppler.
PPLPMDL0020000001	Uniontown	OH	44685	7/29/2011	I explained the ideal type of Butrans patient to Dr. Keith. She agreed that she had many of those patients and because it is a LA agent would be a better choice for many patients currently taking several SAO's#8217;s each
PPLPMDL0020000001	Solon	OH	44139	7/29/2011	Spoke with floater pharmacist & reviewed Butrans appropriate patient type, including patients on chronic Vicodin or tramadol. Also reviewed savings program & gave her savings leaver, letting her know savings cards could be printed from Butrans.com. Also discussed OxyContin 7 available tablet strengths & reviewed savings cards for eligible patients. She said she would leave the information for the regular pharmacist.
PPLPMDL0020000001	Chagrin Falls	OH	44023	7/29/2011	Spoke with Ben (pharmacist) & reviewed Butrans appropriate patient type. He said he does stock it but has not yet dispensed it. Discussed savings program & let him know about savings cards that can be printed from Butrans.com. He said he will keep the literature on hand to reference for when he gets prescriptions. Also gave him OxyContin savings cards & reviewed eligibility for use. He said that the customers he has on it will be very Dr said that he finally has prescribed Butrans for a patient. He said he thought she had commercial insurance, he gave her a savings card and she was previously taking tramadol. I asked about her success, but he has not heard back. I reviewed Butrans initiation presentation and we discussed appropriate patients for Butrans. I asked if he has any others who might benefit from Butrans. He said he has a hospital patient and he asked me if he can write it at Lakewood hospital. I asked him how I would get it on formulary, he said I should talk to John on the P&T Committee, Dr Khuri is on the executive board that makes the final decision. He said that they do not have to follow the CCF main campus formulary. We reviewed OxyContin as an option when Butrans may not provide adequate analgesia. I asked Dr to join us for the upcoming dinner in Westlake. He said it will be a last minute decision but he will try to go. (8 week old twins, Lila, George, Anna is other daughter)
PPLPMDL0020000001	Cleveland	OH	44113	7/29/2011	i talked to dr about pg 11,butrans visual aid,discussing specific pain conditions with dr and how often she see's these pain conditions,dr said it varies as she see's all of them and she would consider Butrans for these pain conditions.dr said she doesnt look at butrans for specific pain conditions,its about patients asking for more pills or telling their current short-acting opioids not working and then she'll consider Butrans. i asked dr to think of a couple patients today that have these conditions,that she can start on Butrans,showed appropriate patients section in visual aid and talked about 5mcg and 10mcg being the initiating dosage strengths of Butrans.dr said ok and we discussed formulary coverage.i recommended Senokot-S
PPLPMDL0020000001	Northfield Center	OH	44067	7/29/2011	Spoke with pharmacist Kate & reviewed Butrans appropriate patient type. Gave her a patient information booklet & discussed patient counsel & answering patient questions, especially if Butrans is their first transdermal medication. She said they are not stocking Butrans at this time as they have not seen any prescriptions for it but she said she would keep the booklet just in case. I inquired about OxyContin stocking. She said they do carry some of the strengths & have a few customers on it. Reviewed savings cards with her & gave her one package of cards.
PPLPMDL0020000001	Brooklyn	OH	44144	7/29/2011	Dr Miguel asked me if OxyContin still had a generic. I told him that most of my pharmacies have told me they are out of it by now. Showed him OxyContin conversion guide & pointed out conversions from Percocet & Vicodin to OxyContin q12h. He said that he did not realize this could be done. Discussed Butrans as an option for the more moderate side of pain. Reviewed delivery system, CII, abuse/addiction potential, & appropriate patient type. He said he has a lot of patients on chronic Vicodin or tramadol because "there is nothing else to give them". I asked him if he felt there was any benefit to now having a once-weekly transdermal CII as an option for some of those patients. He said he never really thought of that. Discussed application sites, rotation, & disposal & showed him a demo with a patch disposal unit & demonstrated how the patch could be disposed of. He said that he would like to try Butrans on some patients to get some clinical experience. Reviewed appropriate patient type again & he said he plans to try a few patients on it to see how they do.
PPLPMDL0020000001					

PPLPMDL0020000001	Independence	OH	44131	7/29/2011	Spoke with MA Denise & reviewed Butrans patient information booklets. She said that either they usually give out patient information with savings cards if they have them, but Dr Boose actually discusses the medications with them. Told her about application & rotation of Butrans. She said Dr Boose has not started using Butrans as far as she knows. I asked her if there were any other times to get an appointment with him other than lunches but she said they do not do that. I asked her to give Dr Boose the sealed "Special Report" article & she agreed.
PPLPMDL0020000001	Uniontown	OH	44685	7/29/2011	I asked Dr. Lohmeyer how often patients are calling in complaining about their current SA therapy? How often are they asking for more of it? She said patients are calling in often complaining of both. I asked if she would feel comfortable initiating therapy to those patients and she agreed she would.
PPLPMDL0020000001	Chagrin Falls	OH	44022	7/29/2011	Spoke with Dr Hudson's nurse, Karen, & reviewed formulary grids for Butrans & OxyContin. Also showed her savings cards for both products & reminded her of eligibility requirements for usage. She said she does not think Dr Hudson prescribes OxyContin, so she would not accept the savings cards. I told her they could even be used for patients who are being continued on it but she still said no. I asked her to give Dr Hudson Butrans information & she agreed.
PPLPMDL0020000001	Lakewood	OH	44107	7/29/2011	Found out that Josie no longer has an office in the hospital all of their education has been moved to the Madison Ave education building. I spoke with Mary Ann Tilow, she is in charge of coordinating grand rounds and is interested in brining in a LELE program the end of this year. I will coordinate this with her.
PPLPMDL0020000001	Lakewood	OH	44107	7/29/2011	I asked Dr to tell me about the patients that he started on Butrans. He said he did not know how they are doing. Dr asked me how Duragesic compares to Butrans. I let him know that we do not have head to head studies to compare the two. I reviewed the initiation guide for Butrans and that he can start Butrans for patients who are opioid naive. I invited Dr to join our upcoming dinner discussion and he will try to make it. Reminder that OxyContin is still an option when Butrans may not provide adequate analgesia.
PPLPMDL0020000001	Lakewood	OH	44107	7/29/2011	Dr came in while Dr Khuri and I were looking at initiations presentation and joined us. She said she just has not remembered to prescribe Butrans, but she will keep it in mind. I asked if she sees a benefit to Butrans and she said yes, the 7 day dosing instead of vicodin around the clock. We reviewed the initiation guide and medication guide for patients. She agreed to give Butrans a try.
PPLPMDL0020000001	Chagrin Falls	OH	44022	7/29/2011	Caught Dr Rood at the window & asked how his Butrans patient was doing. He said she is doing well but added that he has not put anyone else on it yet before walking away. Spoke with Sherry (MA) & Karen (nurse) & reviewed savings cards/eligibility for Butrans & OxyContin. They said they did not need any more savings cards. Discussed managed care coverage, focusing on commercial insurance for Butrans & Medicare coverage for OxyContin. I asked them to give Dr Rood the information & they agreed. Also scheduled another appointment for follow-up.
PPLPMDL0020000001	Cleveland	OH	44109	7/29/2011	I talked to Erin, Pharmacist, about Butrans stocking and if she's seen any scripts of Butrans. Erin said noone has filled scripts here yet, but she has been giving Butrans patient information booklets to patients. I asked Erin to continue recommending Butrans to patients, if they arent controlled on their short-acting opioids and also to recommend Butrans to physicians, for these types of patients. Erin said she would do that. I showed butrans visual aid, 5 core messages and discussed them with her and discussed formulary coverage for butrans.
PPLPMDL0020000001	Akron	OH	44319	7/29/2011	I asked Dr. Wu his thoughts on Butrans therapy and how he felt about the molecule Buprenorphine. He said he liked the idea of this medication and felt comfortable with the molecule. I asked if there was anything more he felt like he needed to know before prescribing for the first time and he said no and that he would keep it in mind.
PPLPMDL0020000001	Cleveland	OH	44113	7/29/2011	I talked to dr about butrans visual aid, 5 core selling messages and talked to dr about what was most important to him about Butrans? dr said he likes that Butrans is transdermal and dosed once weekly. we talked about Butrans being a CII and calling in refills which could be easier for dr and staff. I asked dr if he had a couple patients taking tramadol every day for their chronic pain and not controlled? dr said yes he probably has some like that. I asked dr to start them on Butrans 5mcg as long as they are taking less than 300mg tramadol a day. dr said ok. we discussed patient information booklets and insurance coverage. I recommended Senokot S.
PPLPMDL0020000001	Cleveland	OH	44113	7/29/2011	I talked to dale about specific pain conditions, pg 11 butrans visual aid and if he see's these conditions? dale said yes they see everything and these conditions included, but they choose Butrans based on patients telling them their current medications not working. dale said dr shen wont change patients medication if its working, so she's only going to start patients on butrans if they complain to her or him. I asked dale if he would consider starting patients on butrans, if they call in early every month for refills so perhaps thinking a long-acting opioid like butrans could be appropriate? dale said he will think about that as that does make sense. I asked dale to think of a couple patients taking tramadol, that arent controlled and those perhaps are the one's calling in early for refills, to convert them to butrans. dale said he will consider this option. we talked about insurance coverage.
PPLPMDL0020000001	Copley	OH	44321	7/29/2011	I asked Dr. Machado if he had been initiating Butrans therapy to patients failing or asking to be titrated on their current therapy like we had previously talked about. He said that he was keeping it in mind for those patients and would continue to do so. I reminded him that Butrans was 7 days.
PPLPMDL0020000001	Akron	OH	44319	7/29/2011	I asked Dr. Yee if he had been initiating Butrans therapy to patients failing or asking to be titrated on their current therapy like we had previously talked about. He said that he was keeping it in mind for those patients and would continue to do so. I reminded him that Butrans was 7 days.
PPLPMDL0020000001	Akron	OH	44319	7/29/2011	I explained Butrans using the FPI. I explained what type of message I was discussing and focusing on with physicians in the area and ideal patient types.
PPLPMDL0020000001	Akron	OH	44319	7/29/2011	Spoke with John, I have continued to work with him on identifying ideal Butrans patients and have explained the types of patients I have been focused on with Dr. Wu.
PPLPMDL0020000001	Brooklyn	OH	44144	7/29/2011	Dr Detwiler asked me how Butrans compares with other pain medications. I reminded him that we do not have comparative data. Reviewed buprenorphine as a partial agonist at mu opioid receptor & showed him FPI section 12.1. Also discussed transdermal delivery system & CII, along with abuse/addiction potential. He asked me if it would be for someone on OxyContin. I showed initiation guide pg 6 & pointed out that someone on over 40mg per day of oxycodone would not be considered a Butrans patient & told him that OxyContin q12h may be an option for some of those patients. I described patients taking 2-3 Vicodin or tramadol per day who call in too soon for refills, tell him their medication is wearing off too quickly, or asking him for an increase in dose. He said that he "unfortunately" has many patients who fit that description. I told him that it is a common patient type & that for some of them, Butrans may provide an answer. I asked him if he thought any of the patients he was thinking of may benefit from a once-weekly transdermal system of buprenorphine. He said possibly & asked the cost. Discussed commercial insurance & told him this would be the path of least resistance with managed care & that those patients could also use savings cards, bringing them down to a \$15 co-pay, which he agreed was reasonable. He said he usually prescribes generics. I reminded him of patients who are not well-controlled on them & he said that is where he would think of Butrans.
PPLPMDL0020000001	Lakewood	OH	44107	7/29/2011	Dr just returned from vacation. I asked if he is happy with the success his patients are getting with Butran and he said that seem to be doing fine and he likes Butrans as another option to try. He has not had issues with managed care so far and I spoke to the staff and they said everything seems to be going smoothly and no managed care issues. I reviewed OxyContin as an option that is covered on Medicaid and Med D AARP.
PPLPMDL0020000001	Cleveland	OH	44111	7/29/2011	Spoke with Dan, we reviewed Butrans medication guide and what to tell the patients about Butrans. We discussed application sites, steady state in 3 days and heat warning. We discussed the savings cards and managed care for both Butrans and OxyContin.
PPLPMDL0020000001	Cleveland	OH	44130	7/29/2011	Introduced myself to Melissa in Materials Management & Tammy, the Pharmacy Secretary. They said that Stacey, the pharmacist, was busy with inventory & other logistical tasks & could not meet with me today. Introduced Purdue's product portfolio & requested a meeting with Stacey to discuss Butrans in more detail. Tammy gave me her card & asked me to give them a few weeks before I call to set up the appointment because of a busy schedule over the next few weeks. She said after that, she would be happy to connect me with Stacey.
PPLPMDL0020000001	Cleveland	OH	44106	8/1/2011	showed dr butrans initiations presentation, discussed 4 patient case studies and dr said he wouldnt start an opioid naive patient on a long-acting opioid. dr said he would probably start them on tramadol, after an NSAID doesnt work, then after tramadol he would convert patients to vicodin. I asked dr to stop and consider Butrans right after controlling patients pain before starting them on vicodin. dr said he could consider that if patients are comfortable starting on a patch. I showed dr butrans visual aid, appropriate patients section, discussed initiating dosage strengths of butrans and asked dr to focus on commercial and BWC patients. dr said ok he will talk to a few patients this week and see what happens. I showed dr butrans patient information booklet, asked him to focus on application/rotation of butrans. dr said ok. we talked about OxyContin being an option, showed "appropriate patients" flashcard for OxyContin, discussed 7 tablet strengths available and insurance coverage for OxyContin. dr said he has a couple patients on OxyContin but doesnt start many people on OxyContin. I reviewed the 7 day dosing and asked Dr if he would try just a few patients. He asked about managed care and we reviewed where Butrans is covered. Spoke with Sam and she will look for appropriate patients for Butrans and help reminder the Dr. Reminder that OxyContin is an option that is covered on Medicaid.
PPLPMDL0020000001	Westlake	OH	44145	8/1/2011	I talked to dr about Butrans being an option right after tramadol isnt controlling patients chronic pain. I showed dr Butrans visual aid for discussion of appropriate patients and dr said if patients are taking tramadol and arent getting pain control he typically goes to vicodin, but he will consider Butrans for some patients right there if they have a negative MRI. I showed dr Butrans initiation guide, discussed initiation and titration of Butrans and asked dr to focus patient discussion on once weekly application and rotation of Butrans and give patients Butrans patient info booklet. dr agreed and I asked dr to focus on BWC and commercial patients to start on Butrans. dr said ok he'll think of a couple more patients as he only has 2 patients on Butrans and they seem to be doing fine no complaints. I recommended Senokot-S <font color=blue><b>CHUDAKOB's query on 08/12/2011</b></font> Just curious. Did he say why they have to have a negative MRI for him to consider Butrans instead of Vicodin? <font color=green><b>BROOKAM's response on 08/15/2011</b></font> yes he has in past because he feels there's legitimate pain- <font color=blue><b>CHUDAKOB added notes on 08/17/2011</b></font> I would think a negative MRI would not be an indication of pain. That would be a positive MRI.
PPLPMDL0020000001	Cleveland	OH	44103	8/1/2011	I talked to Nick Seitz, Pharmacist, about Butrans fpi. nick said he's new and didnt know anything about Butrans, we discussed 5 Butrans core messages and showed butrans visual aid with this info. nick said he's not seen any scripts lately for butrans but he thinks transdermal technology and once weekly dosing are 2 features of butrans that are important. we discussed appropriate patients for butrans, showed initiation guide and discussed tapering of short-acting opioids and initiation of butrans 5mcg or 10mcg, we talked about butrans formulary coverage and patient savings cards. gave nick butrans patient savings card flashcard as they have electronic savings cards here. I gave nick 2 butrans patient info booklets and asked him to discuss application/rotation of butrans with patients, nick agreed.
PPLPMDL0020000001	Cleveland	OH	44113	8/1/2011	talked to Laura, NP, briefly about her patients taking tramadol, less than 300mg daily, and not controlled, and her considering Butrans as an option before she starts them on Vicodin. I showed Laura butrans visual aid, appropriate patients section, discussed these patients with her and Laura said she might start some patients down the road after she see's how dr nickels patients are doing on butrans, at this point she's not giving any thought or time to discussing butrans with patients. I told Laura I understood time was limited and to recall that the Butrans patient info booklet can be an educational tool to assist her in educating patients on butrans, Laura said ok. I asked her to think of bwc or commercial plan patients and she said ok she had to go. I recommended Senokot-S.
PPLPMDL0020000001	Cleveland	OH	44115	8/1/2011	I talked to dr about her chronic pain patients taking less than 300mg tramadol, daily, and still not controlled and asking dr for something else. dr said she has a handful of patients like that and will consider Butrans if appropriate. dr asked about initiating dosage strengths. I showed butrans visual aid, appropriate patients and initiation sections and asked dr to focus on commercial plan patients to start on Butrans, per our discussion. dr said she will keep Butrans in mind but noone has asked for anything different recently. I talked to Lisa, MA, and told her about Butrans 5 core selling messages and asked Lisa to recommend Butrans to dr when patients call in early for refills of tramadol, instead of refilling tramadol. Lisa said ok. I talked to dr and Lisa, MA, about insurance coverage for commercially insured patients and use of Butrans patient savings cards. I recommended Senokot-S.
PPLPMDL0020000001	Lakewood	OH	44107	8/1/2011	I asked Dr his thoughts about Butrans. He said it seems like it might be a good option for some patients, but that new drugs are a pain to prescribe due to managed care. We reviewed the key messages and I asked if he sees commercial insurance patients who he thinks might benefit. He said he will keep it in mind. We reviewed the managed care and savings cards for Butrans. Reminder that OxyContin is still an option that has coverage on Medicaid and Med D AARP.
PPLPMDL0020000001	Lakewood	OH	44107	8/1/2011	I reminded Dr of our last conversations where he thought Butrans would benefit his patients. I asked Dr what other info he needs to feel comfortable prescribing Butrans. He said he will prescribe. Reminder that OxyContin is also a long acting option when Butrans may not provide adequate analgesia.
PPLPMDL0020000001	Lakewood	OH	44107	8/1/2011	Quick call, I reviewed the key messages for Butrans and asked if he had any patients today who he thought might benefit from Butrans. He said he will keep it in mind. I reviewed managed care for Butrans and OxyContin is an option that is covered on Medicaid.
PPLPMDL0020000001	Lakewood	OH	44107	8/1/2011	Quick follow up at window. I reviewed the Butrans 7 day dosing and asked if he would try Butrans for patients on low dose hydrocodone who's pain is not well controlled. He agreed to keep it in mind. I reviewed the savings cards for Butrans as well as OxyContin.

PPLPMDL0020000001	Fairlawn	OH	44333	8/1/2011	I asked Dr. Oyakawa his thoughts on Butrans therapy and how he felt about the molecule Buprenorphine. He said he liked the idea of this medication and felt comfortable with the molecule. I asked if there was anything more he felt like he needed to know before prescribing for the first time and he said no and that he would keep it in mind.
	Cleveland	OH	44113	8/1/2011	I showed dr Butrans initiations presentation, discussed 4 patient case studies and dr said he really isn't comfortable prescribing Butrans because it's a CIII and he doesn't write any CIII narcotics. dr said he liked that Butrans was transdermal and dosed once a week but he just didn't see himself ever writing Butrans based on it being a CIII. I asked dr what happens when patients are maxed on their daily tramadol dose, how does he manage their chronic pain at that point? dr said he refers to dr Nickels, anesthesiologist, down the hall from him. dr said he has maybe prescribed OxyContin 1 or 2 times in past few years and he's not comfortable with that either based on OxyContin being a CII. dr said he will write Ryloft because he prescribes a lot of tramadol and likes Rylofts dosing of 1 x a day, dr asked for Ryloft savings cards so I left 1 box and we discussed Ryloft savings card program for commercial insurance plans and BWC patients trying Ryloft. I recommended Senokot-S.
PPLPMDL0020000001	Parma	OH	44134	8/1/2011	Dr Scanlon said that he started some more patients on Butrans. I asked him to tell me more about the patients. He said that both have chronic pain & that one was not being well-controlled on Vicodin & the other was a new start. He said that he is trying to get more & more experience with it & definitely sees a place for Butrans. I showed him main visual aid page 11 & pointed out the chronic conditions that Butrans has been studied in. I asked him how frequently he treats these conditions. He said that he sees patients with these conditions every day. He said, in fact, that some of the patients he has put on Butrans have had spinal stenosis. I told him it sounds like he is choosing the right type of patients for Butrans since that was the type of patients it was studied in with success. He showed me that he keeps his initiation guide in his mailbox & pointed out that it is the only piece of literature from any pharmaceutical reps that he keeps. He said he will continue to look for Butrans patients & he tries to choose those who will be more receptive to the idea. Dr Scanlon returned to ask me for more Butrans savings cards, which I provided to him. He then told me that he just prescribed Butrans for a patient who has rheumatoid arthritis & who was taking Vicodin chronically. He said that the patient asked him for a medication that would "be more steady", so he prescribed Butrans 5mcg for her & gave her a savings card. He did not know what type of insurance she had.
PPLPMDL0020000001	Akron	OH	44333	8/1/2011	I asked Dr. Shah about the success patients were having with Butrans and he said he felt patients were having success for the most part. He said the based on the success rate with Butrans he would feel confident continuing to prescribe for opioid experienced patients. I reminded him that Butrans had also been studied in opioid na/rve patients.
PPLPMDL0020000001	Parma	OH	44129	8/1/2011	Dr Taylor said that while she has not yet prescribed Butrans, she is thinking of it more. She said that she now has a plan & is evaluating her practice to see just how many chronic pain patients she has to see if it is near 50%. She said that she is "paranoid" about prescribing pain medications. Asked her what she is paranoid about. She said she does not want to prescribe too many pain medications. She added, however, that because Butrans is CIII, that is a benefit because she can call in prescriptions & write refills. Reminded her that patients who are not being well-controlled on Vicodin around-the-clock may be candidates for Butrans, & those who are beyond Butrans may be candidates for OxyContin. She said she will keep Butrans in mind going forward.
PPLPMDL0020000001	Cleveland	OH	44106	8/1/2011	worked pm&kr dept-see call note on dr baig, worked family medicine-left Butrans dinner invitations and butrans "engage" and "experience" cards for doctors.
PPLPMDL0020000001	Akron	OH	44333	8/1/2011	I asked Dr. Lababidi how often patients are calling in complaining about their current SA therapy? How often are they asking for more of it? He said patients are calling in often complaining of both. I asked if he would feel comfortable initiating therapy to those patients and he agreed he would.
PPLPMDL0020000001	Akron	OH	44333	8/1/2011	Dr. Brown said that she had prescribed Butrans for a few patients and was pleased that she had not heard back from them. I explained steady state takes 72 hours to achieve and told her if she had call backs prior to that to encourage patients to remain on therapy. She asked about titration which I explained using the initiation guide.
PPLPMDL0020000001	Cleveland	OH	44113	8/1/2011	I talked to dr about his patients taking 1-2.5mg vicodin tabs, daily for their chronic pain but not controlled and considering Butrans right there instead of increasing dose of vicodin to 7.5, 10mg and then maxing patients out on 40mg daily of vicodin, dr said he agreed that earlier was better to start patients on butrans but he's not had anyone like that recently where he feels butrans is appropriate, but he'll keep it in mind. dr said he likes that butrans is dosed once a week and patients only get 4 patches a month, we talked about dr focusing on bwc and commercially insured patients. I recommended Senokot-S.
PPLPMDL0020000001	Cleveland	OH	44113	8/1/2011	talked to dr about his patients taking vicodin, 1-2 tabs, 5mg vicodin, daily and not controlled, and patients are asking dr for something else, I asked dr how a long-acting opioid could be appropriate? dr said usually after vicodin strengths are maxed out he'll prescribe percocet and if that doesn't control patients pain levels he'll go to OxyContin or Duragesic. I showed dr butrans visual aid 5 core messages, asked what features really stood out to him? dr said transdermal technology, once weekly dosing application and CIII status of butrans. I talked to dr about why these features stood out and dr said CIII was easier for him as his staff can call in refills, dr said he's not used to having a long-acting opioid option as a CIII so this will take him a bit to get in habit of writing for Butrans. I showed dr Butrans initiation guide, discussed tapering of vicodin, if above 15mg daily, and starting patients on Butrans 5mcg or 10mcg, discussed titration of Butrans and giving patients Butrans patient info booklet focusing on application/rotation of Butrans, dr said ok he'll see if he has any patients to start on Butrans. dr asked about insurance coverage, I talked to dr about Tri-Care, BWC and commercially insured patients. dr said he has a lot of BWC and a decent amount of Tri-Care so I told dr to focus on those patients and get some clinical experience with Butrans instead of refilling patients vicodin doses. dr agreed we talked about OxyContin being appropriate after Butrans 20mcg and I font color=blue><b>CHUDAKOB added notes on 08/12/2011</b></font>Amy, This looked like a really good call. You asked some good questions and gained some good information. Nice job!
PPLPMDL0020000001	Akron	OH	44333	8/1/2011	I explained the ideal type of Butrans patient to the Dr. Ahmad. He agreed that he had many of those patients and because it is a LA agent would be a better choice for many patients currently taking several SAOs&#8217;s each
PPLPMDL0020000001	Parma	OH	44129	8/1/2011	I reminded Jen of our lunch conversation where we talked about trying patients who were not adequately controlled on 3 5mg Vicodin per day on Butrans. She said she remembers that. I asked her what exactly she is waiting for- does she need to hear feedback from other clinicians or Dr Nickels before she will prescribe? She said that she would feel better hearing that it is working for other practitioners. I asked her if the fact that Butrans is long-acting is a benefit or a hurdle for her. She said that she thinks that ultimately, a long-acting medication would be better for this type of patient, but that a lot of it is getting the patient to buy-in to the idea of a patch. She said that patients tend to believe that they must take a pill every few hours in order to get pain relief once they have been started on short-acting medications around-the-clock. Spoke with Dawn to follow-up on our conversation at lunch about patients testing positive for buprenorphine when they do not show Butrans or Suboxone on their OARRS report. She said they will be monitoring these patients very closely to try to uncover what the patient is taking & how they are obtaining it. She said most patients are already on too high a dose of opioids. Asked her what percentage of patients fall into the 3-5 mg Vicodin per day range. She said maybe 10%, but many have Medicare or Medicaid. Asked what percentage of them have commercial insurance. She said maybe 5%.
PPLPMDL0020000001	Parma	OH	44134	8/1/2011	Dr Loyke said chronic narcotic therapy does not work for anyone. He said that he does not prescribe chronic opioids & he is very glad that the state has come up with more strict mandates on prescribing narcotics. I agreed that physicians should be cautious in prescribing opioids & added that he should be just as cautious in prescribing Butrans. He requested a copy of the full prescribing information, which I provided.
PPLPMDL0020000001	Parma	OH	44134	8/1/2011	I reminded Dr George of our previous lunch conversation when I introduced Butrans to him. He said that he remembers being excited about it & then the state came up with House Bill 93 & he "got scared" of prescribing narcotics. He said that now, if he is treating a patient with chronic opioids, he is only allowed to prescribe for 3 months for a patient before he is required to refer patients to pain management. I asked him what he goes to after NSAID's or COX-2's. He said he usually goes to Vicodin. Positioned Butrans for patients who he is either ready to start on Vicodin or for those who are not well-controlled on a low dose of Vicodin around-the-clock. He agreed that this would be a good place for it, but said again that he is reluctant to prescribe "any of them" due to the new bill. He added that he does think that Butrans has a place, but he is waiting to see how the laws roll
PPLPMDL0020000001	Fairlawn	OH	44333	8/1/2011	I explained the ideal type of Butrans patient to Dr Weidman. She agreed that she had many of those patients and because it is a LA agent would be a better choice for many patients currently taking several SAOs&#8217;s each
PPLPMDL0020000001	Mayfield Heights	OH	44124	8/2/2011	Window call....Doc said she is still getting success with butrans....she just wishes that it was covered on medical/medicare. I sympathized with her but stressed the broad commercial coverage. Gave her an invite and explained how participating can define appropriate patients.
PPLPMDL0020000001	Solon	OH	44139	8/2/2011	I reminded Dr Zaidi of our multiple previous Butrans conversations & how we have discussed how to use it, who it may be appropriate for, & who it might not be appropriate for. I asked him if he feels comfortable with the information & knows how to use it. He said yes. I asked him what is missing. He said he was missing in the month of July & was out of the country for two weeks, so he was not in the office. I reminded him of appropriate patient type (ie not on a high dose of opioids) & he agreed, saying that it was more for patients on lower doses of opioids. I asked him how frequently he sees patients like that. He said sometimes. I handed him sealed "Special Report" article. He opened the article & thanked me for the information. Mentioned OxyContin as a potential option for some of his patients who are beyond Butrans appropriate range & asked him if he uses all 7 strengths of OxyContin tablets. He said most patients are on between 20 & 60mg. He said he does have a few on 10mg & a few on 80mg, but most of them fall within the 20-60mg range.
PPLPMDL0020000001	Cuyahoga Falls	OH	44221	8/2/2011	I asked Dr. Azem how often patients are calling in complaining about their current SA therapy? How often are they asking for more of it? She said patients are calling in often complaining of both. I asked if she would feel comfortable initiating therapy to those patients and he agreed she would.
PPLPMDL0020000001	Mayfield Heights	OH	44124	8/2/2011	Quick call....asked Debbie how patients are doing on Butrans. She said that patients really like it. Now that she knows what insurances cover butrans, patients can get it an afford it. I reminded her of the weekly rotation of the patch not to be repeated in less than 21 days.
PPLPMDL0020000001	Mogadore	OH	44260	8/2/2011	Window call, Dr said he is writing and needed more savings cards but explained patient education books and giving those with other scripts and reminded of writing in commercial patients and BWC.
PPLPMDL0020000001	Lyndhurst	OH	44124	8/2/2011	Spoke to Erin about the stocking of Butrans. She confirmed that they still have it but she one has 1 or 2 patients taking it. I asked if she recalls who has written. She could not remember. I asked if she knows about the saavings cards and if customers are presenting it. She was not sure. I explained the monthly savings of up to \$40/month for commercially insured patients.
PPLPMDL0020000001	Cuyahoga Falls	OH	44221	8/2/2011	I asked Dr. DiLauro about the success patients were having with Butrans and she said she felt patients were having success for the most part. She said the based on the success rate with Butrans she would feel confident continuing to prescribe for opioid experienced patients. I reminded her that Butrans had also been studied in opioid na/rve patients.
PPLPMDL0020000001	Cuyahoga Falls	OH	44221	8/2/2011	I asked Dr. DiLauro her thoughts on Butrans therapy and how she felt about the molecule Buprenorphine. She said she liked the idea of this medication and felt comfortable with the molecule. I asked if there was anything more she felt like she needed to know before prescribing for the first time and she said no and that she would keep it in mind.
PPLPMDL0020000001	Lakewood	OH	44107	8/2/2011	Spoke with chuck, we reviewed the medication guide for Butrans and he will hand them out to patients. He said that he has seen some movement but did not know who wrote. We discussed that OxyContin is still an option when Butrans may not provide adequate analgesia and he said they still carry all strengths of OxyContin.
PPLPMDL0020000001	Westlake	OH	44145	8/2/2011	I reviewed the key messages for Butrans and asked if he has any patients coming in this week who might benefit from the 7 day dose. He said that he will keep it in mind, and in encouraged him to gain experience and see how Butrans fits into his practice. We discussed OxyContin as an option when Butrans may not provide adequate analgesia.
PPLPMDL0020000001	Westlake	OH	44145	8/2/2011	Quick call, I encouraged Dr to come to our upcoming dinner program. I asked if there was anything I can help with regarding getting Butrans on formulary and he said he will not give up and it will happen.
PPLPMDL0020000001	Westlake	OH	44145	8/2/2011	Quick call with Dr and Juan, I asked Dr if he would continue to use Butrans when patients on not well controlled on their current therapy. He said he will. Reminder about managed care for Butrans and that OxyContin is an option approved on Medicaid. Dr will not be attending our upcoming dinner programs.
PPLPMDL0020000001	Mayfield Hts	OH	44124	8/2/2011	Window call....I asked doc to try 2 new patients on butrans when he sees patients needing more than a couple of short acting tablets per day. He said he knows he has to do better. Gave him an initiation guide. Denise said they still have savings cards.
PPLPMDL0020000001	Twinsburg	OH	44087	8/2/2011	Spoke with Gay Grafiger, RPh, the Pharmacy Director for PharMerica. She said that Suzanne Sopko, the Regional Consulting Director for this area would be one of my main contacts going forward & said she would forward her contact information to me. Discussed Butrans & OxyContin & let her know about educational opportunities/in-services that Purdue can offer for their staff & facilities they serve. She said that she will be going to a Consultant's Meeting & will pass along our contact information so that we can partner in this area. Gay also said that usually Medicare Part A pays for patients' medications if they are skilled, & Part D pays if the patient is not a skilled patient. She said Medicare offers patients 100 skilled days per year.
PPLPMDL0020000001	Cuyahoga Falls	OH	44223	8/2/2011	I explained the message I had been focusing on in the field with my physicians and the ideal Butrans patient type utilizing the initiation and titration guide. I asked about movement and they said there had been a little but none recently.

PPLPMDL0020000001	Cuyahoga Falls	OH	44221	8/2/2011	I explained the message I had been focusing on in the field with my physicians and the ideal Butrans patient type utilizing the initiation and titration guide. I asked about movement and they said there had been a little but none recently.
PPLPMDL0020000001	Akron	OH	44310	8/2/2011	Dr. Cremer said that head prescribed Butrans for a few patients and was pleased that he had not heard back from them. I explained steady state takes 72 hours to achieve and told him if he had call backs prior to that to encourage patients to remain on therapy. He asked about titration which I explained using the initiation guide.
PPLPMDL0020000001	Cleveland	OH	44143	8/2/2011	Introduced the butrans indication and positioning. Before conducting the presentation doc expressed concern about the senate bill 93. He has a lot going on in his practice and would just as well refer to pain management. I explained that butrans is the first long acting CIII. He asked about the maximum dose....explained the 20mcg and only as a titration dose. He also asked if 2 patches could be used at a time. I told him its not recommended. I explained the savings cards and formulary coverage. He asked me to leave literature for both offices and "we'll see".
PPLPMDL0020000001	Parma	OH	44134	8/2/2011	Dr Hernandez said that his patients are getting good pain relief with Butrans, so he continues to put more patients on it. He said that he is trying to phase out insurance & become a more cash-pay practice because insurance plans are paying less & less as his costs go up & up. I reminded him of a previous conversation when he told me that he writes Butrans for one month at a time instead of writing refills. I asked him why he does this. He said that he likes to have contact with each patient once per month to see how the patient is doing & to stay "on top" of their issues. He said that helps eliminate any surprises that may come up if he went months without seeing a patient. I asked if this is his policy with all medications or just Butrans. He said it is his office policy & that he has this rule for anything he prescribes.
PPLPMDL0020000001	Munroe Falls	OH	44262	8/2/2011	I explained the ideal type of Butrans patient to the Physician. She agreed that she had many of those patients and because it is a LA agent would be a better choice for many patients currently taking several SAO's & #8217;s each day.
PPLPMDL0020000001	Lakewood	OH	44107	8/2/2011	Quick call with Shaw, we reviewed Butrans medication guide and the important things to tell the patient- steady state in 3 days, how and where to apply Butrans. Reminder that OxyContin is still an option when Butrans does not provide adequate analgesia.
PPLPMDL0020000001	Parma	OH	44129	8/2/2011	Reminded Dr Roheny of our previous Butrans conversation when he told me that he has many patients taking 2-3 Vicodin or tramadol per day who call too soon for refills or say their medication is wearing off too quickly. I also reminded him that he said that 3/4 of them have Medicare or Medicaid. I asked him what we can do to make him remember Butrans for the other 1/4. He asked me if those patients could use the coupons to help them save \$25 per month. I told him the savings cards take \$40 off the co-pay, bringing most commercial insurance patients to a \$15 co-pay. I asked him if he felt that \$15 was reasonable & he said yes. He asked if Butrans was for acute pain like Nucynta. I told him Butrans is indicated for moderate to severe chronic pain. He said the Nucynta rep told him that Nucynta is not abusable & "has no street value". I told him I could only speak to Butrans & that Butrans is an opioid & therefore does have abuse/addiction potential & is CIII. He said that by my next visit, which he imagines will be by Friday, he might be able to find a patient or two to try on Butrans.
PPLPMDL0020000001	Akron	OH	44319	8/2/2011	Dr. Wu said that he had initiated therapy to a Butrans patient but still felt unsure about how to identify a patient. I explained that the most ideal patients were those currently failing on their low dose SAO's and he agreed this would be an easy population to hone in on. I also covered managed care.
PPLPMDL0020000001	Stow	OH	44224	8/2/2011	Spoke with Marcy in prescriptions and she said Dr Yang and Dr Bressi are writing Butrans and they are not going through. I asked if they are medicare and they said yes. I reiterated managed care coverage in commercial and BWC coverage. she said she will remind them. I let her know about speaker program as well as online details that the Drs and the NPs can take advantage of. She said she will work on reminding them.
PPLPMDL0020000001	Parma	OH	44129	8/3/2011	Dr Gigliotti told me that he really needs to try "my stuff". I asked him what he meant. He said that he needs to put some patients on Butrans. I agreed that he probably sees a lot of patients who may be appropriate candidates for Butrans. Spent time going over various types of appropriate patient types, focusing on moderate pain & discussing OxyContin for those on the more severe side. I mentioned patients who take 2-3 Vicodin per day chronically, who are calling too soon for refills. He pulled out an initiation guide from the middle of a stack of magazines & papers on his desk. I told him I was impressed that he knew exactly where it was in the pile. He said he really has been thinking of it. I asked him to turn to page 6 & referred back to the patient on low-dose Vicodin calling too soon for refills & showed him that he could start that patient on 5mcg, the lowest starting dose & could titrate, if necessary, after the 3rd day. Also reminded him that the patient could keep supplemental analgesia on board. He asked me to remind him about insurance coverage. Reviewed Butrans formulary grid & discussed savings cards, letting him know that Jaz is aware of the cards & how to instruct patients how to use them. I asked Dr Gigliotti if he thought it was fair of me to ask him to identify one or two patients like we talked about with commercial insurance to switch to Butrans. He said he thinks "this is the week" for him to do just that. Let him know I'd be following up for feedback.
PPLPMDL0020000001	Westlake	OH	44145	8/3/2011	Met Dr and introduction. I reviewed the key messages for Butrans and asked Dr his thoughts. He said that he does like the 7 day dosing, but many of his patients come into him already "loaded" up on opioids. We reviewed the appropriate patients for Butrans and asked Dr if he would prescribe Butrans after tramadol or instead of increasing their hydrocodone. We reviewed managed care and the savings cards for Butrans. Dr said that he independently reviews patient cases for BWC.
PPLPMDL0020000001	Independence	OH	44131	8/3/2011	Spoke with Shelly, a floater pharmacist, who said that she had heard of Butrans & knew it was a transdermal narcotic, but has never seen a prescription for it. I reviewed with her the appropriate patient type, including patients who take Vicodin chronically around-the-clock. Also discussed automatic savings via e-voucher. Reviewed with her that Butrans is CIII & still carries abuse/addiction potential. She said she thought it was CII.
PPLPMDL0020000001	Akron	OH	44304	8/3/2011	I asked Dr. Amambun his thoughts on Butrans therapy and how he felt about the molecule Buprenorphine. He said he liked the idea of this medication and felt comfortable with the molecule. I asked if there was anything more he felt like he needed to know before prescribing for the first time and he said no and that he would keep it in mind.
PPLPMDL0020000001	Akron	OH	44320	8/3/2011	I asked Misty about the success patients were having with Butrans and she said she felt patients were having success for the most part. She said the based on the success rate with Butrans she would feel confident continuing to prescribe for opioid experienced patients. I reminded her that Butrans had also been studied in opioid naïve patients.
PPLPMDL0020000001	University Hts	OH	44118	8/3/2011	Window call....reviewed the Butrans patient indication, positioning, and CIII status and 7 day delivery. Gave him an initiation guide and an invite to the edetail. Nothing learned.
PPLPMDL0020000001	Warrensville Heights	OH	44122	8/3/2011	Spoke with Jaz (MA) & reminded her of our discussion at breakfast about patients taking low-dose Vicodin chronically who call her too soon for refills & how we discussed them as possible Butrans candidates. She said she had forgotten but thanked me for reminding her. She said she will try to make a note for herself to serve as a reminder by her phone so that she can help Dr Brooks in identifying Butrans patients. Also reviewed Butrans & OxyContin savings cards. She said she did not need any more of either.
PPLPMDL0020000001	South Euclid	OH	44121	8/3/2011	Window call....Briefly reviewed the butrans indication. CIII status, 7 day delivery. Gave her a formulary grid reminder and e-detail invite. Nothing learned.
PPLPMDL0020000001	Akron	OH	44312	8/3/2011	I asked Dr. Kile if he felt there was truly a place for Butrans in his practice and if he could see himself prescribing Butrans moving forward. He said yes. No new info learned.
PPLPMDL0020000001	Bedford	OH	44146	8/3/2011	Quick call- Dr Moufawad said that he is just too far behind today to stop. He said that everything with Butrans is "fine" & he is still prescribing. He said he is looking forward to the Webcast tomorrow evening & said he will tell me about it next week. Spoke with Melina & reviewed Butrans patient type & savings information as well as OxyContin savings cards.
PPLPMDL0020000001	Independence	OH	44131	8/3/2011	Dr Jack started to walk by me & said "I know, you're here to remind me about Butrans." I told him I actually wanted to ask him his thoughts on something & showed him pg 11 of the main visual aid. I asked him to look at the inclusion criteria & asked him how frequently he sees patients with pain caused from these conditions. He pointed to each one, telling me that he sees each of them "all the time" & said he even had a patient just leave who had spinal stenosis. He started to walk away & said "You will get me to do it sooner or later, I just get stuck in my old habits" & then walked into a room. OxyContin savings cards reminder.
PPLPMDL0020000001	Westlake	OH	44145	8/3/2011	Spoke with Marlene (3rd fl). We reviewed the key messages, the initiation guide, demo for Butrans. She does see a benefit in having Butrans available in the hospital and she would like to have me do some in-services with the nursing staff for her floor in September when the new construction is done. She found the in-services regarding OxyContin and the conversion guide helpful.
PPLPMDL0020000001	South Euclid	OH	44121	8/3/2011	Window call....Reviewed doc of the butrans indication/positioning and the formulary coverage. Gave him a butrans e-detail invite. Nothing learned. Asked Lisa, the MA, if she was aware of doc's interest or use of Butrans. She said she did not but that he does like to try different things.
PPLPMDL0020000001	Akron	OH	44320	8/3/2011	I explained the message I had been focusing on in the field with my physicians and the ideal Butrans patient type utilizing the initiation and titration guide. I asked about movement and they said there had been a little but none recently.
PPLPMDL0020000001	Fairlawn	OH	44333	8/3/2011	Dr. Parisi said that head prescribed Butrans for a few patients and was pleased that he had not heard back from them. I explained steady state takes 72 hours to achieve and told him if he had call backs prior to that to encourage patients to remain on therapy. He asked about titration which I explained using the initiation guide.
PPLPMDL0020000001	Akron	OH	44320	8/3/2011	I explained the ideal type of Butrans patient to Dr Duppsandt. She agreed that she had many of those patients and because it is a LA agent would be a better choice for many patients currently taking several SAO's & #8217;s each day.
PPLPMDL0020000001	Parma	OH	44134	8/3/2011	Spoke with Allene (pharmacist) who said they were especially busy over the last couple of days due to it being the beginning of a new month. I asked her if this is due to Medicaid & she said yes. I asked her how much of her population there was Medicare or Medicaid. She said a vast majority, perhaps 70% of her customers are Medicare or Medicaid. She said probably roughly 30% do have commercial insurance. She also let me know that she noticed Butrans on an order recently. She said she was not sure who had prescribed it, but she knows they did have one. Reviewed automatic savings for their customers, if eligible, due to e-voucher & offered OxyContin savings cards. She said that the one customer they had on OxyContin recently was switched to Opana ER per his own request. I asked her why. She said the customer claimed that OxyContin was no longer working for him & he asked his doctor to switch him to Opana ER instead. Allene added that she cannot tell if the customer is lying or not.
PPLPMDL0020000001	University Heights	OH	44121	8/3/2011	Quick call....reminded doc to think of Butrans for tramadol failures or former darvocet patients. I asked him to try for a BWC patients as Butrans is being covered. I gave him a formulary grid showing the covered plans.
PPLPMDL0020000001	Independence	OH	44131	8/3/2011	Oxycontin coverage reminder and provided e-detail invite.
PPLPMDL0020000001	Independence	OH	44131	8/3/2011	Quick call- Dr Rob said he didn't have time to stop today. I handed him an E-Detail invitation & told him it would be a good opportunity for him to gain additional Butrans information. He said he didn't have time to hear about it & went into a room. Spoke with MA Amanda & reviewed Butrans dosing & delivery system. Also discussed savings cards.
PPLPMDL0020000001	Akron	OH	44310	8/3/2011	Dr. Schukay said that he had initiated therapy to a Butrans patient but still felt unsure about how to identify a patient. I explained that the most ideal patients were those currently failing on their low dose SAO's and he agreed this would be an easy population to hone in on. I also covered managed care.
PPLPMDL0020000001	Independence	OH	44131	8/3/2011	Caught Dr Trickett at the window. She said that she has actually put 2 patients on Butrans since she saw me last. I asked her to tell me more about the patients but she said she didn't have time today. She said that she has not gotten any feedback yet, but Butrans is in her mind & she will probably start prescribing more once she starts getting some patient feedback. Spoke with Steve & asked him to check her stock on savings cards for Butrans & OxyContin. Discussed eligibility requirements & asked him to try to keep an eye out & give out savings cards if Dr Trickett forgets. He agreed. He also ran through Dr Trickett's upcoming schedule with me to try to help me find days when she might have more time to discuss Butrans.
PPLPMDL0020000001	Cleveland Heights	OH	44118	8/4/2011	I reminded doc that of his expressed interest in Butrans. I reminded him of the appropriate patient. He said he has not started anybody yet but he is going to. I reminded him to give patients a savings card.
PPLPMDL0020000001	Shaker Heights	OH	44122	8/4/2011	Spoke with Doug, a new pharmacist at this location. Introduced Butrans to him as he had never heard of it. Delivered 5 core messages & let him know about favorable commercial insurance coverage. Discussed appropriate patient type, including those on low-dose Vicodin around-the-clock chronically who call too soon for refills. I asked what his thoughts were about Butrans after hearing the overview. He said he feels that if a patient is truly committed to getting pain relief, they would be willing to try a switch to Butrans. He said that some "like the flavor" of Vicodin. I alerted Doug to the fact that Butrans is a CIII opioid with abuse & addiction potential so I caution prescribers to be just as careful when prescribing Butrans as they would be with any other opioid. Reviewed OxyContin savings cards.
PPLPMDL0020000001	Barberton	OH	44203	8/4/2011	I asked Dr. Kim his thoughts on Butrans therapy and how he felt about the molecule Buprenorphine. He said he liked the idea of this medication and felt comfortable with the molecule. I asked if there was anything more he felt like he needed to know before prescribing for the first time and he said no and that he would keep it in mind.
PPLPMDL0020000001	Euclid	OH	44117	8/4/2011	Quick call....I asked doc if he ever consulted with Dr. Moufawad as he said he would. He said that he did talk to him about butrans. He said that Moufawad is not using butrans much but he has a better idea where to prescribe butrans. I gave him an e-detail invite and explained that it might provide further direction on where to prescribe butrans. He said he would look at it.

PPLPMDL0020000001	Sagamore Hills	OH	44067	8/4/2011	Dr Gemma came back to lunch & said she could not stay to talk today. Reviewed Butrans indication, dosing, delivery system & appropriate patient type. She asked me to leave information for her so that she could look at it later & said she will try to start using Butrans.
	Northfield	OH	44067	8/4/2011	Spoke with Donna, MA. Reviewed Butrans indication, delivery system, & appropriate patient type. She asked about managed care coverage, so I went over formulary grids for Butrans as well as OxyContin. Dr Sevier asked me to leave information about Butrans for Dr Lango because he said she sees a lot of patients who may be appropriate for Butrans. He said that recently, she was out on vacation & he covered for her. He said during this time, he got many calls from patients on Vicodin requesting refills too soon. Dr Sevier said that he thinks Dr Lango would be very interested in Butrans for those patients.
PPLPMDL0020000001	Barberton	OH	44203	8/4/2011	Dr. Patel said that he has continued to initiate Butrans therapy to appropriate patients. He said that when he talks with certain patients they prefer oral medications. I asked if he always lets the patients choose their medications and he said he just didn't want of complaints and call backs.
PPLPMDL0020000001	Garfield Hts	OH	44125	8/4/2011	Deena (MA) said that Dr Sadowski is on vacation this week. I asked her what her thoughts were on how I could get him to try Butrans on a few appropriate patients. She said she can think of several patients who could benefit from a once weekly transdermal system instead of their current around-the-clock regimen of oral pain medications. Reviewed with her the appropriate patient type & dosing as well as managed care. I stressed commercial insurance coverage. I asked Deena if she would ask Dr Sadowski directly to switch appropriate patients who she gets calls from asking for refills too soon or asking for increases in dose to Butrans instead of increasing their dose or dosing interval. She agreed to do this & said she will start thinking of patients to ask him about when he returns from vacation.
PPLPMDL0020000001	Independence	OH	44131	8/4/2011	Spoke with MA Jill who said Dr Pais was way too busy today to talk to me. Reviewed with her Butrans online interactive program & asked her to share the information & give the invite to Dr Pai. She agreed. Discussed Butrans appropriate patient type & stressed commercial insurance. She said she would pass it along to Dr Pai. Also discussed OxyContin savings cards & reminded her about commercial insurance or cash paying patients eligibility.
PPLPMDL0020000001	Sagamore Hills	OH	44067	8/4/2011	Introduced myself to Penny, the new NP at Nordonia Hills Clinic. Introduced Butrans, delivering 5 core messages & alerting her to box warning, CIII, & abuse/addiction potential. She said it was nice to have the option of something long-acting to treat patients who she would normally have to have on something short-acting like Vicodin or tramadol. Discussed appropriate patient type, including those with moderate to severe chronic pain who take short-acting opioids around-the-clock, calling too soon for refills or asking for an increase in dose. She said she would keep this in mind as she sees patients who fit the indication.
PPLPMDL0020000001	Independence	OH	44131	8/4/2011	Spoke with MA Kathi who asked me to remind her what Butrans is & who it is for. Reviewed with her dosing, delivery system, indication. Also spent time going over appropriate patient type, including those who are calling her too soon asking for Vicodin or tramadol refills or who say it is not lasting long enough. Discussed them as possible candidates for Butrans. She asked me about insurance coverage. I stressed commercial insurance plans. She said she would give Dr Reddy the invite & information I left & that she would remind him for me. Also discussed OxyContin formulary grid.
PPLPMDL0020000001	Mayfield Heights	OH	44124	8/4/2011	Spoke to Aaron, tech, about the stocking and movement of butrans. He confirmed stocking and that he has only seen a couple of scripts over the past couple of months. I explained the savings cards program and he did recall that patients came in with savings cards. He asked for extra cards in case customers did not have them. Told him that they can go online to print them out. I reviewed the proper application and disposal of butrans for best
PPLPMDL0020000001	Cleveland Hts	OH	44118	8/4/2011	Quick call....I reminded doc that he said he might use Butrans for patients that can not tolerate hydrocodone. I asked if he has had an opportunity to do so yet. He said no and asked about the dosing again. I explained 5mcg for opioid naive patients, 10mcg for those patients already on a low dose of a short acting. Nothing else learned.
PPLPMDL0020000001	Mayfield Heights	OH	44124	8/4/2011	Spoke to Warren about the movement of Butrans. He said he has not seen too many scripts - he does have a couple of patients that have been taking it. I explained to him about the proper application for the best results. I also explained the eligibility and discounts with the savings cards. I asked him about the oxycontin volume. He said he still has regular patients on oxycontin has not had any issues.
PPLPMDL0020000001	Mayfield Heights	OH	44124	8/4/2011	Spoke to Denise about Butrans and asked if she was familiar with doc's prescribing on a daily basis. She said she does not really see what he writes until there is an issue. I reviewed the butrans patients type and she was not aware if he had prescribed it yet. Doc is on vacation until the week of 8/15.
PPLPMDL0020000001	Mayfield Heights	OH	44124	8/4/2011	Spoke to Marsha about the butrans indication and positioning. She said they did receive an initial shipment but sent it back when they did not get a script. I explained the savings card program, dosing, and proper
PPLPMDL0020000001	Barberton	OH	44203	8/4/2011	I asked Dr. Minich if she felt there was truly a place for Butrans in her practice. She said she thought there was a place for it but still did not feel entirely comfortable prescribing it. I asked what more she felt like she needed to know before prescribing it and she said she would review the FPI.
PPLPMDL0020000001	Euclid	OH	44119	8/4/2011	Conducted the Butrans RM presentation. Asked doc which patient type he mostly sees. he said he sees them all. He said it was helpful at describing the patient type. He asked about the side effects and the difference from fentanyl. I referred to the AE section of the sales aid and showed the incidence of nausea, dizziness, headache, application site pruritis. I explained that there is no head to head data with fentanyl but butrans can be used as a first line opioid, is 7 days delivery, and is a CIII. He asked about coverage - medicaid & BWC. Told him no medicaid coverage but BWC is covering. Savings cards discussed. Oxycontin patient type after Butrans max dose, formulary coverage reminder.
PPLPMDL0020000001	Mayfield Heights	OH	44124	8/4/2011	I reviewed the butrans indication and positioning and asked doc if she has any patients that might be appropriate candidates for butrans. She said probably, she just has not used it yet. She asked about the various available doses. I explained the 5mcg for opioid naive or low dose short acting and 10mcg for those taking higher than 15mg of a morphine equivalent. I told her that 20mcg is only a titration dose. I asked her to participate in the e-detail. Reminded her of the formulary coverage for butrans as well as oxycontin.
PPLPMDL0020000001	Sagamore Hills	OH	44067	8/4/2011	Opened call by explaining Initiations program & letting him know it may assist him identifying who is & who is not a Butrans candidate with specific case studies. I asked him to participate. He agreed. Spent time going through different patient types & case studies. During the patient profile that the patient was on too high a dose of opioids to be a candidate for Butrans, I asked him if he would consider OxyContin q12h for that type of patient & he said that was the type of patient he typically does think of for OxyContin (on multiple opioids, several times per day). When I asked him what dose of Butrans he would start each patient on, it was apparent that he was clear on what dose to start patients on. Discussed titration ability after 3 days. Dr Sevier asked if, for the patient taking 400mg tramadol per day, he could initiate treatment with Butrans but still allow the to take tramadol as needed for breakthrough. I told him patients can take opioid or non-opioid medications as supplemental analgesia. Asked him about the various conditions that were presented in the profiles & he agreed that these are the types of conditions he treats daily. He said he has one patient in particular who he wanted to start on Butrans but the patient had just filled a 90 day Rx for her short-acting, so she asked him if she could start it after those ran out. He said he is ready to start putting patients on Butrans & wants to gain clinical experience.
PPLPMDL0020000001	Cleveland	OH	44125	8/4/2011	Spoke with technician who said that the pharmacist was busy working with the regional director of pharmacy & would not be able to see me today. She said she is not aware of any Butrans activity. Discussed automatic savings through e-voucher as well as savings cards available for Butrans & OxyContin. Reminded her that they cannot be used for any type of government insurance. I asked her to leave the pharmacist my information & card & she agreed to give it to her.
PPLPMDL0020000001	Cleveland	OH	44111	8/5/2011	We reviewed the key messages, invitation guide and managed care for Butrans. She has not had a chance to prescribe yet, as she has been working a lot in the hospitals, but she does see a benefit in the 7 day dosing. I asked if she would give it a try or recommend it to the Drs and she agreed. We reviewed OxyContin as an option when Butrans may not provide adequate analgesia. Invited her to our upcoming dinner discussion.
PPLPMDL0020000001	Middleburg Heights	OH	44130	8/5/2011	Spoke with Tracey (MA) who said that Dr Saboori was on vacation this week. I told her about Butrans (indication, usage, delivery system, positioning) & asked her if it would be possible to get an appointment to see him. She said that sometimes he will see reps without a lunch & asked what information I could leave that she could present to him to request an appointment. Gave her my card & FPI. She said Butrans sounded like something he would be interested in & that she would let me know what she can find out. She also said sometimes Wendy from Siedman Cancer Institute located in the hospital building books lunches for Dr Saboori's office as well.
PPLPMDL0020000001	Lyndhurst	OH	44124	8/5/2011	Conducted the initiations presentation with Dr. Reed, Karen Steffey, and Patricia Moran. They agreed that they can identify with some of the case study patients but they do not treat back pain (its a migraine center). Doc correctly identified those that were appropriate and those not appropriate for Butrans. She correctly answered the dosing for those patients. Patricia thought that a patient on tramadol would be considered opioid naive. I explained the positioning - after tramadol or ryzolt or before starting on vicodin or a low dose of oxycontin. Doc said that the problem is the insurance because she has a lot of elderly patients that have medicare that would be perfect but butrans is not covered for them. I reviewed the proper application sites for butrans and the savings cards program. Karen and Patricia agreed that the presentation helped clarify the right patient.
	Cleveland	OH	44130	8/5/2011	Patricia asked if Butrans could be called in. I confirmed that it could and could also be refilled. Doc said she just needs patients with the right coverage. She said she has prescribed with refills and has not heard back from those patients so she assumes everything is fine.
PPLPMDL0020000001	Cleveland	OH	44130	8/5/2011	Opened call by asking Dr Diab if I could ask him a question about his patient population & the conditions he treats as a rheumatologist. He said yes. I showed him the inclusion criteria for Butrans studied & asked him if he treats these conditions regularly. He said yes. I asked if the patients with these disease states usually have pain. I asked him to describe for me how the treatment process for that pain goes. He said they start on NSAID's or COX-2's & then he would prescribe tramadol or Vicodin if the NSAID's/COX-2's were not controlling their pain. I pointed out to him that this is the type of patient who we studied Butrans for efficacy in. I asked him how his patients on Butrans are doing & he said he really hasn't had much clinical feedback lately & the only "feedback" he hears is managed care not covering it. I told him I was surprised to hear that with the commercial insurance coverage as favorable as it is & asked if it has been Medicare/Medicaid that he has gotten pushback from. He said he doesn't know & that it will "take time" & then he walked away. Spoke with Barb (nurse) & Dina (MA) & reviewed Butrans delivery system, appropriate patient type, & savings cards. They both said that they have not heard any feedback at all from patients about Butrans & knew of no managed care problems.
PPLPMDL0020000001	Cleveland	OH	44130	8/5/2011	Spoke with technician who said no pharmacist was available. Discussed Butrans savings via e-voucher or savings card & also OxyContin savings cards. Also reviewed with her eligibility requirements & reminded her that they cannot be used for any type of government insurance plans. She said she would pass this information along to Ron & Dave.
PPLPMDL0020000001	Cleveland	OH	44130	8/5/2011	Quick call- Dr Fedorok said he was having a horrible day & did not have time today. I handed him E-Detail invite & told him that it might cheer him up to go online to participate in the Butrans program. I also let him know that we could explore one together at an upcoming lunch. Discussed Butrans managed care with Mindy, focusing on commercial insurance. She said she has not had any issues thus far.
PPLPMDL0020000001	Cleveland	OH	44121	8/5/2011	Window call...I reminded doc of the butrans patient type/positioning. I asked him if he has any patients that could benefit from a long acting CIII delivered on 7 days. He said maybe. I gave him an e-detail invite and asked him to participate. No commitment.
PPLPMDL0020000001	Independence	OH	44131	8/5/2011	Confirmed with Roman that he & Lisa will be attending the program in Westlake next Wednesday. He said that this will help him because even though they have had one successful Butrans patient, he feels like the others that he tried were not successful because he thinks he "under-medicated" them. He said that he wants to go to the program so that he can learn about what patients can take for breakthrough & what dose to give. I reminded Roman that I can provide that information to him myself but he said it is more assuring coming from a specialist or someone with personal prescribing experience. I told him I understand & that I hope the program clears that up for him but I also let him know that patients can take supplemental analgesia in the form of immediate release opioids or non-opioids. I also discussed OxyContin 7 tablet strengths & asked if he needed more savings cards.
PPLPMDL0020000001	Lyndhurst	OH	44124	8/5/2011	He said he did need more cards so I gave him a pack. Quick call....I reviewed the butrans indication and the positioning after non-opioids or low dose short acting and before ATC therapies. I asked him if he has any patients like that. He said they are already on too many meds. I asked him for consider butrans for its once weekly dosing in a CIII.<font color=blue><b></b></font>CHUDAKOB's query on 08/12/2011<b></b></font>-Perhaps you might think about discussing disease states rather than switches. What do you mean "before ATC therapy." Butrans is ATC therapy. Please clarify.<font color=green><b></b></font>SIMERTOC's response on 08/17/2011<b></b></font>-Before ATC therapy with short acting opioids dosed frequently.<font color=blue><b></b></font>CHUDAKOB added notes on 08/18/2011<b></b></font>-Thanks for the clarification.
PPLPMDL0020000001	Mayfield Hts	OH	44124	8/5/2011	I asked doc if he has any patients that could benefit from a CIII opioid for ATC moderate to severe pain delivery in a once weekly dose. He said "butrans, right?" Told him yes and that patients can take supplemental analgesics if necessary. I asked him to try for his BWC patients. He said ok.
PPLPMDL0020000001	Lakewood	OH	44107	8/5/2011	I asked Dr if he could think of an other patients who might benefit from 7 day Butrans. He said that he will continue to think of Butrans as an option. I reviewed managed care for Butrans and reminder that OxyContin is an option that is covered by Medicaid.
PPLPMDL0020000001	Cleveland	OH	44130	8/5/2011	Spoke with pharmacist Dawn & reviewed Butrans savings information & gave her the lever giving information about Butrans.com & printing savings cards. She said she still has not ordered it. Discussed managed care coverage & also reviewed OxyContin savings cards. She said she has plenty.

PPLPMDL0020000001	Beachwood	OH	44122	8/5/2011	Spoke with Yvonne (MA) & Tom (RN) who said Dr Tabbaa was in a meeting & couldn't see me today. They said that I should come back next Wednesday to try to see Dr Tabbaa or his new resident who has been helping out in Jim's absence. I reminded Yvonne of Butrans & OxyContin savings cards & asked if Dr Tabbaa needed any additional cards. She said the cabinet was locked so she cannot check their supply. I asked if either of them had heard any patient feedback about Butrans but neither of them had. Discussed transdermal delivery system.
	Lyndhurst	OH	44124	8/5/2011	Conducted the initiations presentation with Dr. Reed, Karen Steffey, and Patricia Moran. They agreed that they can identify with some of the case study patients but they do not treat back pain (its a migraine center). Doc correctly identified those that were appropriate and those not appropriate for butrans. She correctly answered the dosing for those patients. Patricia thought that a patient on tramadol would be considered opioid naive. I explained the positioning - after tramadol or ryolt and before starting on vicodin or a low dose of oxycodone. Doc said that the problem is the insurance because she has a lot of elderly patients that have medicare that would be perfect but butrans is not covered for them. I reviewed the proper application sites for butrans and the savings cards program. Karen and Patricia agreed that the presentation helped clarify the right patient. Patricia asked if Butrans could be called in. I confirmed that it could and could also be refilled. Doc said she just needs patients with the right coverage. She said she has prescribed with refills.
PPLPMDL0020000001	Lyndhurst	OH	44124	8/5/2011	Conducted the initiations presentation with Dr. Reed, Karen Steffey, and Patricia Moran. They agreed that they can identify with some of the case study patients but they do not treat back pain (its a migraine center). Doc correctly identified those that were appropriate and those not appropriate for butrans. She correctly answered the dosing for those patients. Patricia thought that a patient on tramadol would be considered opioid naive. I explained the positioning - after tramadol or ryolt and before starting on vicodin or a low dose of oxycodone. Doc said that the problem is the insurance because she has a lot of elderly patients that have medicare that would be perfect but butrans is not covered for them. I reviewed the proper application sites for butrans and the savings cards program. Karen and Patricia agreed that the presentation helped clarify the right patient. Patricia asked if Butrans could be called in. I confirmed that it could and could also be refilled. Doc said she just needs patients with the right coverage. She said she has prescribed with refills.
PPLPMDL0020000001	Maple Heights	OH	44137	8/5/2011	Reminded Dr Yager of our previous conversations about Butrans & told him I wanted to further discuss his patients who are suffering from conditions that are chronic & cause pain & his treatment algorithm for that pain. He agreed. I told him I realize he does not like to prescribe a lot of opioids, so during this discussion I asked him to focus only on those who were in legitimate pain & who were committed to getting rid of pain. He said he usually refers to pain management for chronic narcotics. I asked what the difference is between a patient he refers vs one who he maintains in his office. He said if they are not well-controlled on tramadol or keep asking for increases in medication, he refers. I asked him to take a look at the inclusion criteria on pg 11 of core visual aid & asked him if he treats patients who have conditions such as osteoarthritis, spondylolysis & spinal stenosis. He said yes. I asked him what his treatment typically is for the pain associated with those conditions. He said NSAID's/COX-2's & then tramadol. He said if someone needs something "more" than that, he would probably send them to pain management. I asked him to elaborate. He said if they need something scheduled more than Vicodin, he would refer. He asked if patients could take tramadol with Butrans. Showed FPI 2.4. Also reviewed side effects. He said none of them surprised him. Also discussed titration & dosing. He said he will keep it in mind. OxyContin 7 tablet strength reminder.
PPLPMDL0020000001	Macedonia	OH	44056	8/5/2011	Reminded Dr Sherigo of our previous Butrans conversations. I asked her to look at the inclusion criteria for Butrans studies & asked if those were conditions she treats. She said yes. I asked how she usually manages the pain associated with those conditions. She said that after NSAID's or COX-2's she usually prescribes tramadol. I asked her what she does if the patient says it is not working. She said either Vicodin or she refers to pain management. I asked how she determines who goes to pain management & who she keeps in her office. She said it depends on the patient. Reviewed Butrans indication, dosing, CIII, abuse/addiction potential. She asked about adverse events. Showed main visual aid AE section & asked if anything surprised her. She said she was a little surprised to see the peripheral edema rates & they seemed a little high. I asked if that was of concern to her & she said no. She asked about application, rotation, steady state, & supplemental analgesia. Used initiation/titration guide to show sites & discussed steady state in 3 days. I told her that while she may not have a huge place for Butrans in her practice, it is important to know about medications in case patients come to her already on them. She agreed & said that she actually just had a patient come to her who is on Butrans from another provider. I asked what the patient said about the analgesia she gets. She said the patient said she feels great & that she will keep Butrans in mind.
PPLPMDL0020000001	Cleveland	OH	44111	8/5/2011	We reviewed the key messages and the invitation guide for Butrans. He said he has not tried it yet but does think it will have a place in his practice. He is now working with the oncology dept across the street as their pain management Dr and he thinks that it may have a place over there too. We discussed OxyContin as an option and he said he does prescribe OxyContin mostly for cancer patients and older patients. We reviewed the managed care for Butrans and OxyContin. I asked Dr to come to our upcoming dinner discussions and he may be able to make the Cleveland dinner.
PPLPMDL0020000001	University Heights	OH	44121	8/5/2011	I opened the call discussing the Butrans indication, CIII status and 7 day delivery. He asked how it compares to fentanyl. I explained no head to head data, Butrans can be a first line opioid, and butrans is 7 days. He studied the initiation guide and the dosing equivalent. He said that 80mg of oxycodone/oxycodone would not be appropriate for butrans. He asked if Butrans is more for mild to moderate. I told him technically, mod to severe. I explained the positioning and asked him if he has patients appropriate for butrans. He said maybe if there are patients that dont want to take pills. I asked him to participate in the e-detail to learn more about the product.
PPLPMDL0020000001	Northfield	OH	44067	8/8/2011	Spoke with pharmacist Sun Ji who said that she thinks they are stocking Butrans. I asked her if she could check to confirm but she said she was already behind this morning & couldn't take the time. Reviewed savings program & e-voucher. Also discussed OxyContin savings cards, use, & eligibility requirements, including that they cannot be used for any type of government insurance.
PPLPMDL0020000001	Parma	OH	44129	8/8/2011	Spoke with nurse, Lynn, & reminded her of the Butrans meeting/conversation I had with Dr Gallagher two weeks ago. She said that he has not "found a use for it yet". I reviewed appropriate patient type/positioning with her. She said she would remind Dr Gallagher. I also asked her to give him the REMS packet for Butrans & she agreed. Discussed savings cards for Butrans & OxyContin & let her know I would return to follow-up on his Butrans showed dr Butrans visual aid, 5 core messages and asked dr what really stood out to him about Butrans? dr said transdermal delivery and once weekly dosing. dr said he doesn't prescribe new drugs right away. I asked dr how long is a fair amount of time for him to wait before prescribing Butrans? dr said he didn't have an answer for me on that. showed dr appropriate patients page, butrans visual aid, asked if he had any patients with chronic pain, taking tramadol daily but not controlled? dr said he does see those patients. I asked dr if he could start a couple patients on Butrans instead of refilling their tramadol? dr said he might consider it for a couple patients that he's not comfortable giving them anymore tramadol or converting to another narcotic. I talked to dr about initiation of Butrans, showed initiation guide and asked dr to focus on anthem BCBS and BWC patients, discussed patient savings cards for commercial plan patients, dr said ok. I recommended senokot-S.
PPLPMDL0020000001	Beachwood	OH	44122	8/8/2011	Quick call with Dr Warren as he only came up to the window for a moment. Positioned Butrans for patients calling too soon for refills of chronic low-dose opioids or who are saying their medication is wearing off too quickly. He waved & thanked me. Spoke with Peggy (MA) & Donnie (nurse) & reviewed Butrans appropriate patient type. Donnie said he does not know why Dr Warren has not tried anyone on Butrans as he does have patients who seem to fit the indication. I asked him to mention Butrans to Dr Warren if he gets a call from someone who he thinks could benefit from Butrans & he agreed.
PPLPMDL0020000001	Parma	OH	44129	8/8/2011	Spoke with Linda (nurse) & Donna & introduced myself & Butrans. Discussed indication, usage, dosing, delivery system, & appropriate patient type. I asked Linda to give Dr Laluk a Butrans FPI & initiation/titration guide. She said she would but that he would probably throw it away. I asked her to please ask him to take a look at it as he may not have heard of it yet & he may have patients who come to see him already on it. She said she would try. Scheduled next available lunch in December. Asked about a short 5 minute appointment, just to introduce Butrans to him, but Linda said he would not do this.
PPLPMDL0020000001	Cleveland	OH	44195	8/8/2011	talked to dr about his patients taking vicodin, daily, for their chronic pain, yet asking him for something else as their pain isn't controlled. dr said he has a lot of those patients, I showed dr butrans visual aid, discussed appropriate patients and asked dr to focus on a couple of these patients to start on Butrans instead of refilling their vicodin or converting to percocet, dr said he could consider that he just hasn't thought of Butrans lately. I asked dr what really stood out to him about Butrans, looking at 5 Butrans core selling messages? dr said transdermal delivery and once weekly dosing. dr asked if Butrans was a CII? told dr Butrans was a CIII, showed that information in Butrans fpi black box warning and 5 core selling messages. told dr to focus on Medco and BWC patients to start on Butrans, dr said ok he will and told me to make an appointment with his NP, Mai, because she sees the majority of doctors patients. I told dr I have requested an appointment with her a few times, but no response but will try again. dr said ok. I recommended senokot-S.
PPLPMDL0020000001	Bedford	OH	44146	8/8/2011	Oleg (pharmacist/pharmacy manager) said he really did not have time today but said he would give me a couple minutes. He said that Butrans has still been "quiet" with only seeing the one script that did not get filled due to the office not doing the prior authorization. I asked if he knew who wrote the prescription n8 he said it was Dr Moufawad. He said that OxyContin is moving, but that he has seen some switches to Opana ER, although he added that those may have been inappropriate patients in the first place. Discussed importance of appropriate patient selection & agreed that caution should be exercised with all opioids.
PPLPMDL0020000001	Lakewood	OH	44107	8/8/2011	I reviewed the appropriate patient types for Butrans and asked Dr if he had a few patients this week to start Butrans on. He said he will but he was concerned about managed care and we reviewed commercial insurance. We discussed OxyContin is still an option that is covered on Medicaid and Medicare. I asked Dr to come to our upcoming dinner discussions.
PPLPMDL0020000001	Cleveland	OH	44102	8/8/2011	I talked to Pat, Pharmacy Tech and Gurjeet, Floater Pharmacist, as Vicki, Pharmacy Manager was off work today, about Butrans stocking. 5 core selling messages and both Pat and Gurjeet said they like that Butrans is a patch and dosed once a week but they haven't seen any scripts for Butrans recently. Pat said they had 1 box of Butrans 5mg in stock and a patient filled their script for that box and that was it, nothing ever since. both Pat and Gurjeet said I have to speak with Vicki, about ordering Butrans because until they see another script for Butrans they don't want to order it and have it sit on shelf. we discussed importance of stocking and I asked if they ever see patients that are taking short-acting opioids but not controlled and tell them that? Pat and Gurjeet said they do hear that occasionally from patients. I showed appropriate patients section in Butrans visual aid and asked each of them to give a Butrans patient information booklet to patients that say this to them and have these patients speak with their dr about Butrans. Pat said she will do that and Gurjeet said he will if he thinks they are appropriate for Butrans. discussed formulary coverage-focused on commercial plans, BWC and TriCare. I recommended Senokot-S for opioid induced constipation.
PPLPMDL0020000001	Parma	OH	44129	8/8/2011	Spoke with Ellie (head nurse) & asked her about getting an appointment with Dr Salewski. She said that he is "not interested" at this time. I asked her if she knew why. She said no, but that he has a very busy schedule, so that probably has something to do with it. I told her that I could present the information to him in a short, 5-10 minute appointment, but she said he would only do a lunch. I reviewed indication, dosing, delivery system, & appropriate patient type with her again & asked her to give Dr Salewski information. She agreed & said to check back in a few months for an appointment.
PPLPMDL0020000001	Cleveland	OH	44135	8/8/2011	Spoke with Ken, they still have not seen Butrans moving and they feel it is due to their patient population and managed care. We reviewed what to let the patients know when they come in for their Butrans script. They have the medication booklets and will hand them out to the patients. We discussed OxyContin as an option when Butrans may not provide adequate analgesia.
PPLPMDL0020000001	Westlake	OH	44145	8/8/2011	I reviewed the 7 day dosing and asked if he's given any further thought to where Butrans may fit in. He said he will give it a try and we reviewed managed care. I reminded him about the upcoming Butrans dinners. We discussed that OxyContin is also a long acting option with managed care coverage.
PPLPMDL0020000001	Lakewood	OH	44107	8/8/2011	Quick call, I asked Dr about the success of his Butrans patient and he said it's going well. I asked if he could try a few more patients to gain some more experience and he agreed. Reminder that OxyContin is still an option. I asked Dr if he would come to our upcoming dinner program and he will try.
PPLPMDL0020000001	Lakewood	OH	44107	8/8/2011	Quick call at window, I asked Dr to come to our upcoming dinner discussion to learn more about how his peers are using Butrans. He said the westlake location would be closer to home and he would think about it.
PPLPMDL0020000001	Bedford	OH	44146	8/8/2011	Quick call as Dr Haddad came to the window. Positioned Butrans for patients who are not well-controlled on their current chronic opioid therapy who have BWC as agreed upon during my last call. He said he has been on vacation, so he has not prescribed lately, but will keep an eye out for this patient type now that he is back. Spoke with MA Echo & reviewed savings cards for Butrans & OxyContin & discussed eligibility, including that they cannot be used for patients with any type of government insurance.
PPLPMDL0020000001	Lakewood	OH	44107	8/8/2011	I asked Dr if he had success with the patient he put on Butrans. He said that he has not heard anything yet. I asked if he would try a few more patients to gain experience and he agreed. I asked Dr to come to the Westlake program and he will try. Reminder about OxyContin as an option that is covered on Medicaid.

	Cleveland	OH	44109	8/8/2011	worked pm&r dept-left Butrans fpi,initiation guide,formulary grid,"experience" cards,Butrans program dinner invitations,patient information booklets and my business cards for Dr.Harris,Dr.Huang,Dr.Jaffer,Dr.Malkamaki,Dr.Fox,Dr.Greenwood and Dr.Clark(Director of Amputee clinic who shut down all lunches with rep's last month)-talked to Jodi,Assist to Dr.Clark and she said he's still "thinking about letting Representatives conduct lunches again",Jodi said to try back end of the week and see if she has any updates. WORKED:internal medicine dept-left Butrans fpi,initiation guide,patient information booklet,formulary grid,"experience" cards,Butrans program dinner invitations and my business card for Dr. Lindheim,Dr.Falk-Ytter,Dr.Harrington,Dr.Gelehrter,Dr.Ricanati,Dr.Jones and Dr.Eisen as I couldn't see any doctors,I was told to follow-up next week with Dr.McCreery as she reviews all information from pharma reps and shares with doctors and they make a decision if rep can come into dept and give presentation on products.
PPLPMDL0020000001	Lakewood	OH	44107	8/8/2011	I asked Dr if the patients are having success with Butrans and he said they are. He said he has not heard a lot of feedback but no news is good news. We Dr said he was not sure now if he was going to be able to make the dinner program, but he did register. He said he might be able to come to one next month. Reminder that OxyContin is an option that is covered on Medicaid when Butrans may not be covered.
PPLPMDL0020000001	Lakewood	OH	44107	8/8/2011	We reviewed Butrans 7 day dosing and I asked if he had any patients coming in this week who might benefit. He said he will give Butrans a try. I reminded him to look for commercial insurance. We reviewed OxyContin as an option that is covered on Medicaid.
PPLPMDL0020000001	Lakewood	OH	44107	8/8/2011	I asked Dr if there was anything I could provide to help him feel comfortable prescribing Butrans. We reviewed the 5 key messages and he agreed to give Butrans a try. He said he would most likely prescribe for a patient who is already on hydrocodone. I reviewed Butrans and OxyContin managed care.
PPLPMDL0020000001	Parma	OH	44129	8/8/2011	Spoke with Cindy (MA) who said that Dr Ortega was not in the office today. She said that she received a letter from Purdue about the patient who I submitted an adverse event on who she had inquired about Butrans lowering blood glucose. Cindy said she was pleasantly surprised at how quickly she received a response & information. I asked her how Dr Ortega's Butrans patients are doing. She said she has not heard from any of them recently. I made sure they had enough savings cards & reminded her to give out savings for Butrans & OxyContin patients. Also asked her to give Dr Ortega the E-Detail invitation & she agreed.
PPLPMDL0020000001	Parma	OH	44129	8/8/2011	Spoke with pharmacist who said she has not seen any Butrans activity. I let her know that I wanted to share some information with her that may assist her in patient instruction when they do dispense it, especially if it is the patient's first prescription. Gave her patient information guide & showed her application, rotation, & disposal. Let her know she could use it in patient counsel or give them out to patients. She said it would be helpful if they get phone calls also. Also discussed OxyContin savings cards & reminded her that patients with no insurance can utilize them every 14 days if they have a prescription written that way.
PPLPMDL0020000001	Lakewood	OH	44107	8/8/2011	Quick call, I asked Dr if he had any patients coming in this week who might benefit from the 7 day dosing of Butrans. She said he will give it a try. Reminder to look for commercial insurance and give the savings cards. I reminded her about our upcoming dinner discussions for Butrans.
PPLPMDL0020000001	Cleveland	OH	44115	8/8/2011	I showed dr pg 11, butrans visual aid, discussed specific pain conditions that dr treats, dr said she does see these pain conditions in her patients and hasnt thought about Butrans for any specific pain conditions. I asked dr if she had patients with chronic pain, taking tramadol daily and not controlled with I of these pain conditions? dr said yes she's sure she does, I asked dr to start a couple of those patients on Butrans instead of refilling their tramadol, dr said she will consider that option. we talked about Butrans patient savings cards for commercial plan patients and BWC coverage. I recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44195	8/8/2011	WORKED:Neurology dept-had to leave information with medical secretaries for dr krieger, dr mays, dr stillman and dr spears:left Butrans fpi,initiation guide,patient information booklet,"experience" cards,formulary grids and my business card.Also left OxyContin fpi,formulary grid and conversion guides for each of these neurologists, WORKED:Anesth/Pain management dept-left Dr.Vrooman,Dr.Syed,Dr.Samuel and Dr.Katyal and Dr.Stanton-Hicks-Butrans fpi's,initiation/titration guides,formulary grids,"experience" cards,patient information booklets,8/10 and 8/16 Butrans Dinner Program invitations and my business cards for each of the doctors listed as I couldn't see them today.Did see a few physicians,briefly so see call notes. WORKED:PM&R-Left Dr.Capulong,Dr.Schaefer and Dr.Zachary-Butrans fpi's,initiation/titration guides,patient information booklets,formulary grids,"experience" cards,Butrans Dinner program invitations for 8/10 and 8/16th programs in Westlake and Cleveland,OH.
PPLPMDL0020000001	Cleveland	OH	44195	8/8/2011	talked to dr in hallway about his patients on Butrans, dr said he only started a couple patients, they seem to be controlled and dr said he doesn't have a lot of patients on short-acting opioids that he can consider appropriate for Butrans. showed dr Butrans visual aid, 5 core selling messages and asked him what really stood out to him about Butrans? dr said he likes that Butrans is a patch, dosed once a week and is a CII, but he doesn't have a high volume of patients taking short-acting opioids that complain to him about their pills and asking for something else. told dr if he does have patients on tramadol, hydrocodone or oxycodone combo's, taking these medications daily and not controlled, to consider starting them on Butrans, dr said he will do that and took initiation guide and patient information booklets. I gave dr formulary grid and discussed Butrans patient savings cards for commercial plan patients. I recommended Senokot-S
PPLPMDL0020000001	LAKEWOOD	OH	44107	8/8/2011	Spoke with Pam, She has seen a little bit of movement of Butrans she did not know who wrote. We discussed making sure the patients are aware of steady state in 3 days so they do not give up on Butrans before 3 days. I discussed OxyContin as a long acting option when Butrans may not provide adequate analgesia.
PPLPMDL0020000001	Beachwood	OH	44122	8/8/2011	Spoke with Yvonne (MA) who said that Dr Malkamaki would not be able to see me today as promised. She said that he was running very far behind & that I will need to come back another day. She said she would call me with another date & time since this appointment did not work out. I reviewed Butrans information with her & asked if it sounded like something he may want to discuss & she said yes, just not today. Reminded her of savings cards & she said someone with a key to the cabinet will have to check those & they were out to lunch. I asked her to give Dr Malkamaki Butrans information & she agreed.
PPLPMDL0020000001	Parma	OH	44134	8/8/2011	Quick call- Dr Mandat said he had no time to talk today. I handed him Butrans REMS packet & asked him to please review the information within the packet as it has important information about the safe use of Butrans. He said he would look when he had time. Discussed savings cards with Rebecca (nurse) & reviewed eligibility requirements.
PPLPMDL0020000001	Cleveland	OH	44135	8/8/2011	Spoke with Lisa, we reviewed Butrans medication guide and what is important to let the patients know about when they first get a script. We reviewed the application sites, rotation and steady state in 3 days. We discussed OxyContin as an option when Butrans may not provide adequate analgesia.
PPLPMDL0020000001	Westlake	OH	44145	8/9/2011	I asked Dr what benefits he sees in Butrans. He said for some patients it would be a good option, but some patients it may not be adequate analgesia. I asked if he would let appropriate patients know it is an option and he agreed. We reviewed OxyContin as an option
PPLPMDL0020000001	Cleveland	OH	44113	8/9/2011	talked to dr about the patients he has on Butrans and how they are doing, dr said Butrans is working for most of the patients he started. I asked dr if he was considering Butrans for those patients taking less than 15mg hydrocodone daily for their chronic pain? dr said he hasn't seen anyone like that yet, he's still thinking of patients between 15-40mg hydrocodone, but said it makes sense to start them on Butrans earlier so he'll keep that in mind. I asked dr to focus on BWC and commercial plan patients, per our discussion, showed visual aid with appropriate patients info and asked him to start a couple patients like this, dr said he will do his best as he does like Butrans and he's waiting to see how patients do long-term on Butrans as its too early to tell. we talked about application/rotation section in Butrans patient information booklet, asked dr to focus discussions with patients on this info, dr said okay he gives them booklet to read. I recommended Senokot-S <font color=blue>b</font>CHUDAKOB's query on 08/17/2011</b></font>What is "long-term" in Dr. Nickels mind? He tells you this every time. Asking him to tell you what he means by "long-term" may give you a better indication of what he is looking for. <font color=green>b</font>BROOKAM's response on 08/17/2011</b></font>ok will ask maybe I missed this and didn't ask previously but it could be he needs to see a specific number of patients on Butrans and get pain controlled before he will think earlier in therapy? I don't know something to look at <font color=blue>b</font>CHUDAKOB added notes on 08/19/2011</b></font>Even if you asked earlier, ask again!
PPLPMDL0020000001	Parma	OH	44129	8/9/2011	Spoke with Georgia & reviewed Butrans appropriate patient type. Also gave her a patient information booklet & discussed patient counsel. Reviewed application, rotation, & disposal. I offered to give a few booklets for them to keep on hand, but she said one should be enough considering they have not dispensed any yet. Reminded her of savings cards for Butrans & OxyContin as well as eligibility requirements.
PPLPMDL0020000001	Parma	OH	44129	8/9/2011	Dr Tolentino said that she has "sometimes" thought of using Butrans but that insurance won't let her. I asked if she knew what plans. She did not, nor did Kathy, her MA. Reviewed managed care coverage & savings cards for those eligible. I asked if she had any patients with commercial insurance (ie working patients) who also met the indication for Butrans. She said she does. I asked how common conditions such as spondylolysis, spinal stenosis, & osteoarthritis were in her patient population. She said very common. I asked if she treats those patients with opioids for their pain. She said sometimes. Discussed patients who she is either ready to start on an opioid around-the-clock or who are already taking 2-3 Vicodin or tramadol per day but are not well-controlled, calling too soon for refills. Kathy said she does get calls like that. I let them know that those patients could start on 5mg system. Discussed titration ability & supplemental analgesia. Also showed Butrans sample carton, 4 patches, medication guide & disposal units to show what a patient would get at the pharmacy. I asked if she could think of a few patients who would be good Butrans candidates who have commercial insurance. She said yes. I asked her to switch those patients. She agreed. Spent time with Kathy going over appropriate patient type & walking her through initiation guide. She said she will actively look for candidates & will alert Dr Tolentino when she sees or hears from them. OxyContin 7 tablet strengths
PPLPMDL0020000001	Cleveland	OH	44109	8/9/2011	I talked to dr about his patients taking vicodin, daily for chronic pain but not controlled and asking him for something else, to consider starting these patients on Butrans. showed appropriate patients section in visual aid and Butrans initiation guide-discussed Butrans 5mg or 10mg for these patients instead of refilling vicodin or converting to percocet, dr said he'll consider that but he only has 2 patients on Butrans and wants to see how they do before starting anyone else. focused dr on BWC and commercial plan patients. I recommended Senokot-S <font color=blue>b</font>CHUDAKOB's query on 08/17/2011</b></font>What does he expect to see and how long does he have to see it before trying someone else on Butrans? <font color=green>b</font>BROOKAM's response on 08/17/2011</b></font>what are you saying? I hear that answer from doctors ALL the time, if they start 1-2 patients they tend to wait and see how patients tolerate butrans and how their pain is controlled (ie: improvement) so this wasn't a shocking statement to me? Not sure I understand what you are asking. Now asking him what timeframe, how long these 2 patients have to be on Butrans before he starts anyone else, that's a valid question. However Barry, he has started another patient recently, thanks <font color=blue>b</font>CHUDAKOB added notes on 08/19/2011</b></font>You validated my point. You hear this from physicians all the time. How often do you ask them "How long they have to be on it before he is comfortable trying more?" This is a smoke screen answer that we have to challenge a physician on. So perhaps the question is "What do you expect to see from Butrans before you will start another patient?"
PPLPMDL0020000001	Parma	OH	44129	8/9/2011	Quick call- Caught Dr Chagin at the window. Positioned Butrans for patients who take chronic Vicodin or tramadol who call too soon for refills or say their medication is not lasting long enough. He thanked me & walked away. Spent time with Debbie reviewing appropriate patient type for Butrans. She agreed that he does have patients who fit this profile, & said it is just a matter of getting him to think of it. I asked her to give him the E-Detail invite & she agreed. Also reviewed savings cards for Butrans & OxyContin.
PPLPMDL0020000001	Brooklyn	OH	44144	8/9/2011	Spoke with MA Carol & reminded her of previous lunches when we discussed Butrans. Also reviewed appropriate patient type, including those who call too soon for refills of their chronic opioid medication. Discussed CIII & abuse/addiction potential as well as managed care & savings cards. Discussed savings cards for OxyContin but she said they would not take them. I asked her to give Dr Hilton an E-Detail invitation & Butrans sealed article & she agreed.
PPLPMDL0020000001	Cleveland	OH	44144	8/9/2011	Spoke with Wendy, nurse, who said she does not think Dr Paul has prescribed Butrans as it does not sound familiar. I reviewed Butrans appropriate patient type with her & asked if it sounded like any of Dr Paul's patients. She said yes. Reminded her of CIII & abuse/addiction potential. I asked her to give Dr Paul an E-Detail invite & encourage her to participate. Also asked her to give her the Butrans sealed article. She agreed. She said they did not need any savings cards for Butrans & that Dr Paul doesn't have anyone on OxyContin so they did not need cards for that either.
PPLPMDL0020000001	Cleveland	OH	44113	8/9/2011	I talked to dr about her patients taking less than 15mg hydrocodone, daily for their chronic pain but not controlled, showed Butrans visual aid discussing appropriate patients and asked dr to not refill vicodin or increase dosage strength but to start them on Butrans. dr said she will consider that if he feels patients are appropriate. dr said some patients ask her for something else, other than pills, so she's thinking of Butrans for them. I showed dr Butrans initiation guide, discussed tapering if patients are taking more than 15mg hydrocodone daily up to 40mg and then initiating Butrans, dr said ok. focused dr on BWC and commercial plan patients. I recommended Senokot-S
PPLPMDL0020000001	Westlake	OH	44145	8/9/2011	Dr just returned from vacation. I asked if he would have patients to see this week who might be appropriate for Butrans. He said he would start more patients. I made sure he had savings cards at his middleburg location. Dr may be interested in coming in a future dinner program next month.
PPLPMDL0020000001	Mayfield Heights	OH	44124	8/9/2011	Window call....Asked Debbie how patients are doing on Butrans. She said patients are loving it and certain patients like not taking pills. Gave her an e-detail invite and explained that it talks more about butrans. Provided more savings cards and formulary reminder.
PPLPMDL0020000001	Mayfield Heights	OH	44124	8/9/2011	Window call....Reminded doc of the butrans and oxycontin formulary coverage. Provided savings cards and gave e-detail invite. Nothing learned.

PPLPMDL0020000001	Westlake	OH	44145	8/9/2011	I asked Dr if he has started any new patients on Butrans, he said yes and they are doing fine. I encouraged Dr to come to our upcoming dinner discussion.<font color=blue><b>CHUDAKOB added notes on 08/17/2011</b></font>Remember, it is about the patient. Asking the Dr. if he started new patients on Butrans sounds like you want him to do that for you!
PPLPMDL0020000001	Cleveland	OH	44143	8/9/2011	Quick call.....reminded doc of the Butrans presentation from last week's lunch. Also reviewed the indication and positioning and asked him if he has given any further thought to prescribing butrans or reviewed the literature. He said he has not had an opportunity. Gave him an e-detail invite and an initiation guide.
PPLPMDL0020000001	Westlake	OH	44145	8/9/2011	Quick call, I asked Dr if he would join for our upcoming Butrans dinner to learn more about how his peers are using Butrans. He said he will try. I asked if I could provide any other info for him to give Butrans a try, no, he is still not one to try new medications when they first come out. I reviewed the key messages.<font color=blue><b>CHUDAKOB's query on 08/17/2011</b></font>So, how long does he have to wait?<font color=green><b>HOLLUBA's response on 08/18/2011</b></font>I will ask him. Thanks.<font color=blue><b>CHUDAKOB added notes on 08/19/2011</b></font>We have to start challenging our physicians on their answers if we are going to move them forward.
PPLPMDL0020000001	Mayfield Heights	OH	44124	8/9/2011	Spoke to Giovanni and tech, Michael, about the movement of Butrans. They both said they are not seeing any scripts. I explained the positioning and the application sites. I also discussed the savings cards program. Giovanni said he is not seeing much oxycontin anyone - only a few regular customers. They dont get the calls about the OCs anymore. Provide a medical education resource catalog for CEs.
PPLPMDL0020000001	Parma	OH	44129	8/9/2011	Dr Tolentino said he is not sure why he hasn't prescribed Butrans. I asked if he commonly sees patients who have spinal stenosis, osteoarthritis, or spondylolysis. He said yes. I asked if he treats their pain with opioids. He said he does. I told him some of them may be Butrans candidates. Reviewed initiation guide & focused on low-dose Vicodin or tramadol around-the-clock who are not well controlled or those he is ready to start on an opioid around-the-clock. Discussed titration ability every 3 days & supplemental analgesia. He asked where it should be applied. Reviewed 4 sites & rotation & max dose 20mcg. Also discussed managed care coverage, asking him to focus on his working patients or those with commercial insurance. I asked if he has patients like the ones we have talked about who have commercial coverage. He said he does. I asked him to switch patients if appropriate when they call too soon for refills or say their current medication is wearing off too quickly. He agreed. He asked if Butrans was less abusable or more efficacious than Vicodin. I told him we have no comparative data & that because Butrans is an opioid it can be abused like any other opioid. Shari (MA) asked if it could be used post-op. I told her Butrans is for chronic pain & is not for post-op use, for acute pain, or for prn. Dr Paat said he will try Butrans on some patients. Reviewed OxyContin 7 tablet strengths.
PPLPMDL0020000001	Akron	OH	44310	8/9/2011	I asked Dr. Cremer how often patients are calling in complaining about their current SA therapy? How often are they asking for more of it? He said patients are calling in often complaining of both. I asked if he would feel comfortable initiating therapy to those patients and he agreed he would.<font color=blue><b>CHUDAKOB added notes on 08/17/2011</b></font>What type of patients is he currently initiating on Butrans, as he is prescribing? Is he titrating? Is he happy with the therapy? Are his patients happy? What made him think of Butrans for the patients he has tried it on. There are many questions still to ask to get more specific about his
PPLPMDL0020000001	Akron	OH	44312	8/9/2011	I asked Dr. Lababidi if he had been initiating Butrans therapy to patients failing or asking to be titrated on their current therapy like we had previously talked about. He said that he was keeping it in mind for those patients and would continue to do so. I reminded him that Butrans was 7 days.
PPLPMDL0020000001	Solon	OH	44139	8/9/2011	met with Denny and Chuck to discuss DDM and Marcs accounts. Reviewed Senokot-To-Go, vertical packaging, and 2012 promotional plan. Chuck asked to check how elderly who can't use computers can get access to coupons. Determine demographics of e-coupon users. DDM will have 73 stores after adding 3 new ones. Cost is \$1000 slotting fee for placing Senokot-To-Go on laxative shelf. They have a small trial/travel section. Possibly could be put on pharmacy end cap too.
PPLPMDL0020000001	Shaker Heights	OH	44122	8/9/2011	Dr Agarwal put his head in his hands when he saw me & said "I know, I know, I need to use this". I reminded him of our lunch & how he told me that he would use it in patients who were not getting relief from tramadol around-the-clock for a chronic condition. He said he still wants to use it in those patients but keeps forgetting. Reminded him of once-weekly dosing. Spoke with Michelle (MA) & reviewed patient information booklets & appropriate Butrans patient type.
PPLPMDL0020000001	Cleveland Heights	OH	44118	8/9/2011	Conducted the initiations presentations with Doc. He just wanted me to tell him where to write it. I explained the position butrans after NSAIDs/tramadol or before going to vicodin ATC. He asked if patients can be switched from vicodin. I told him yes, as long as they are not on too high a dose of vicodin. If they are they may be more appropriate for low dose oxycontin. Showed the approximate doses for patients taking 3 tabs of hydrocodone.
PPLPMDL0020000001	Parma	OH	44134	8/9/2011	Explained the insurance coverage and the savings cards. He said he would start writing it. I asked Dr Hernandez what his typical trigger is to talk to a patient about Butrans. He said that usually he offers it to patients who come to him as referrals from a chiropractor's office. I asked him to elaborate. He said those patients "don't like to take medicine". I reminded him that although Butrans is not an oral medication, it is a CII opioid which carries abuse/addiction potential. He said he knows but patients feel like they are not taking medication if it is transdermal. I asked what else he looks for. He said that when he asks patients what their pain level is & they respond with "3-4", he considers them a Butrans candidate. He said patients with levels higher than that he usually does not consider as he does not think they will get enough relief. He said
PPLPMDL0020000001	Mayfield Hts	OH	44124	8/9/2011	Window call.....I reviewed the Butrans indication and positioning - before going to hydrocodone ATC. I asked him to participate in the E-detail about butrans. He asked about being a speaker again,. I explained to him that I previously submitted his name. He said he needs to remember Butrans
PPLPMDL0020000001	Cleveland	OH	44109	8/9/2011	worked rheumatology dept-talked to Linda,RN,about Butrans 5 core selling messages,showed visual aid and gave initiation guide to Linda.Linda said she knows Dr.Ballou and Dr.Magrey have a lot of chronic pain patients who are taking tramadol every day and arent controlled and could benefit from trying Butrans.Linda booked me a lunch with both doctors and rest of rheumatology dept on Aug 29th. worked internal medicine-left dr lindheim,dr harrington,dr ricanati,dr falck-ytter,dr ryan,dr rosenberg,dr geleherter-OxyContin fpi's,conversion guides,formulary grids and Butrans dinner invitations,with my business card. worked family medicine dept-see Theresa Slagle on Friday,Aug.12th,to book appt with her and nursing staff to discuss Butrans and OxyContin.i had to leave Butrans fpi,initiation guide,experience card,formulary grid,patient information booklet,august dinner program invitations and my business card for dr forde,dr krofina and dr ili; worked pm&R-Jodi,clinic coordinator was out today but left August dinner invitations for her to give all residents and fellows; left Butrans fpi,initiation guide,experience card,Butrans August dinner invitations for Dr.Malkamaki,Dr.Harris,Dr.Huang,Dr.Greenwood,Dr.Jaffer and Dr.Fox
PPLPMDL0020000001	Parma	OH	44129	8/9/2011	Met with Kevin Zupancic (Pharmacy Director) & Stan Fabianich (Clinical Coordinator) to introduce Butrans. Reviewed indication, dosing, usage, delivery system, CII, abuse/addiction potential. Kevin asked about adverse events. Showed section 6 of FPI to review rates. He said he noticed that it was on the Premier contract & was not inexpensive, although he acknowledged that one dose lasts one week. Reviewed patient type who would be considered appropriate. I asked what would happen if a patient came to them on Butrans. He said he would educate ER staff & hospital nurses to ensure they are aware of what it is. He said if a patient came in on it & did not have their supply with them, they would order it in for that patient. Kevin said the P&T Committee just met last week, so another review would not occur for a few months, at which point he will review Butrans with the committee. He said that if it passes there, it would go on to 2 other committees before it could be on the hospital formulary. Showed him sample box with 4 demo systems, patch disposal units, & medication guide. Kevin said he feels that one of the ideal places they could start with Butrans would be in the hospices. He asked what Dr Gallagher's thoughts on Butrans were. I told him he was interested in using it & had mentioned hospice patients & I encouraged him to call him. Also mentioned Dr Taylor's interest. Discussed OxyContin 7 tablet strengths in hospital unit dosing.
PPLPMDL0020000001	Cleveland	OH	44145	8/9/2011	Discussed Purdue contracting with GPOs for hospital and LTC. They're interested in contracting laxative/Rx meds in LTC as well as Specialty Pharmacy. Reviewed current Purdue strategy for LTC as well as maybe in the future because of Butrans usage in that market. He provided standard rebate %s requested and services they can provide down to the patient level. Ash told Irene to work for a speaker program for a ML presentation at the Specialty Conference because pain management is important for cancer care. Check with MLs for this type of speaking engagement.
PPLPMDL0020000001	Westlake	OH	44145	8/9/2011	Provided Deanne webinar flyer for Aug presentation Disparities in Pain Care which she will make copies and put in the Consultant RPHs mailboxes. Gave her Med Ed catalog which she requested 10 copies for the RPHs. Also, reviewed the Safeguard my meds brochure which she'd like to provide to the customer service person to distribute to customers as a resource.
PPLPMDL0020000001	Akron	OH	44333	8/9/2011	I explained the ideal type of Butrans patient to Lisa. She agreed that she had many of those patients and because it is a LA agent would be a better choice for many patients currently taking several SAO&#8217;s each day.
PPLPMDL0020000001	Cleveland	OH	44106	8/9/2011	I talked to Amy,Pharmacist,about Butrans stocking and scripts she's seeing for Butrans.Amy said she knows they are filling some Butrans,not a lot,but doesnt have time to look up names of specific doctors who have prescribed.showed Amy Butrans visual aid,5 core selling messages and asked her what really stood out to her about Butrans? Amy said transdermal delivery and once weekly dosing.I asked if Amy could recommend Butrans,to patients that are taking short-acting opioids and not controlled? Amy said she will do that if she feels they are appropriate,gave Amy Butrans patient information booklets to give patients.we discussed formulary coverage and patient savings cards for commercial plan patients.i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44113	8/9/2011	spoke to Laura,NP,briefly,asked her what features of Butrans stood out to her,showed Butrans visual aid with 5 core selling messages? Laura said transdermal delivery,once weekly dosing and she likes that Butrans is a CIII.Laura said she's waiting to see how dr nickel's patients do on Butrans and she really doesnt have time to explain Butrans to patients at this time,its easier to refill and get them out the door.i asked Laura to consider a couple patients taking tramadol,daily for chronic pain,that arent controlled and she's thinking about converting to hydrocodone combo's,stop and think of Butrans for them and focus on BWC and commercial plan patients,Laura said ok she'll think about it.<font color=blue><b>CHUDAKOB's query on 08/17/2011</b></font>Why don't you get Dr. Nickels and Laura together and have him tell her about his success. He surely has had some by now.<font color=green><b>BROOKAM's response on 08/17/2011</b></font>he has had success,she's acknowledged them but barry she doesnt care. you have met her and heard her speak openly so not a surprise here.<font color=blue><b>CHUDAKOB added notes on 08/19/2011</b></font>Your call note says she is waiting to see how Dr. Nickel's patients do. If she said this, did you challenge her on this? She might not care, but we don't have to accept her answers. If she knows you won't accept this same answer every time, she will stop giving it to you!
PPLPMDL0020000001	Parma	OH	44129	8/9/2011	Spoke with pharmacist Heath & presented patient information booklet. Discussed application, rotation, disposal. Also let him know patients could tape edges with first aid tape if the edges start to loosen. He said the booklet would be useful in patient counsel. I let him know he could also give them out to patients to help save calls back to him asking him questions that the booklet can answer. Started to discuss OxyContin 7 tablet strengths, but he got a phone call that he had to take. He said to stop back.
PPLPMDL0020000001	Akron	OH	44304	8/10/2011	Dr. Amanambu said he thought there was a place for Butrans in his practice but had too many challenges with managed care. He said he would try to keep it in mind for appropriate patients with the right insurance but it would not be easy.
PPLPMDL0020000001	Independence	OH	44131	8/10/2011	I showed Dr Jack the sample carton of Butrans & told him I brought "show & tell" today. I opened the carton & showed him the 4 demo patches & disposal unit, explaining how patients would use it. He asked to see a demo patch. He felt the adhesive & said that it was interesting to see what they look & feel like & that this would help him remember Butrans. I positioned Butrans for patients not being well-controlled on their current chronic opioid around-the-clock therapy.
PPLPMDL0020000001	Westlake	OH	44145	8/10/2011	Spoke with Jamie and tech, we reviewed the patient medication guide and important things to tell the patients. I asked if they usually consult with patients, he said that no unless they have specific questions, but a lot of patients do have questions when they first get a medication. We discussed managed care for both Butrans and OxyContin.
PPLPMDL0020000001	Parma	OH	44134	8/10/2011	Spoke with Alicia, pharmacist, briefly. She said she was short-staffed today so she could not stop to talk. Butrans e-voucher & savings reminder & also OxyContin savings card reminder. She said to come back another day & she would give me more time. I gave her my card & asked her to call if she has questions on either product.
PPLPMDL0020000001	Independence	OH	44131	8/10/2011	Spoke with Dave (pharmacist). Reviewed Butrans appropriate patient type & discussed patient counsel on application, rotation, & disposal. Also discussed savings available for eligible patients for Butrans & OxyContin. He said he had to go answer a patient phone call.

PPLPMDL0020000001	Parma	OH	44129	8/10/2011	Quick call- Caught Jen between patients. She said she had to run because she was too far behind to stop. Positioned Butrans for patients taking 3 Vicodin per day who say it is wearing off too quickly. She said she'd keep it in mind, then walked into a room. Spent time with Dawn. Reminded her of the appropriate Butrans patient type we have been talking about. She said she still does not think Dr Nickels has given approval for NP's to prescribe. She asked if I call on Caryn & I told her I do not. She said that she would call her to see what her thoughts on prescribing Butrans were. She said that Jen will be the last NP to "get on board". She said Jen isn't comfortable enough with the practice to start trying the patients on new medications. I asked Dawn what there was to lose if the patient is complaining that their current medication isn't controlling them either. She said she does think it is a good option for some patients but they have to be careful of managed care since they have so much Medicaid & self-pay. I reminded her that they do not need to switch all of their patients to Butrans but rather identify a handful of appropriate patients to try on it. She said she would see what she could find out. Also asked her to check her supply of Ryzolt savings cards & she said they are OK on them for now.
PPLPMDL0020000001	Broadview Heights	OH	44147	8/10/2011	Dr Samuel said that to be honest, he has not prescribed Butrans recently. I asked him if there was any specific reason for this. He said "not really" but that he did not have very positive results the first time he prescribed. He went on to say that he does not think he tried it on the right patient. Spent time discussing the appropriate patient type. He said that he thinks that the real ideal patient would be an "opioid virgin". I agreed that opioid naive patients are an ideal patient type to consider. He said that the earlier he starts Butrans, his chances for success are probably increased. I discussed patients who are taking short-acting medications around-the-clock who are not well-controlled. He said that Margaret has already come to him with ideas of patients to try on Butrans since I had already talked to her. He said he is ready to give it a try in a few more patients that may be more fitting. Also discussed OxyContin q12h for appropriate patients beyond Butrans & gave one package of savings cards.Spent time with Margaret (nurse), going over appropriate patient type for Butrans, including patients on chronic opioids around-the-clock who are not well-controlled. She said she is thinking of one patient in particular. I asked her to tell me about them. She said it is a woman with chronic hip pain who was on 3 Percocet per day but is not well-controlled. She added that the patient is very committed to getting relief. Discussed initiation/titration.
PPLPMDL0020000001	Broadview Heights	OH	44147	8/10/2011	Dr Samuel said that to be honest, he has not prescribed Butrans recently. I asked him if there was any specific reason for this. He said "not really" but that he did not have very positive results the first time he prescribed. He went on to say that he does not think he tried it on the right patient. Spent time discussing the appropriate patient type. He said that he thinks that the real ideal patient would be an "opioid virgin". I agreed that opioid naive patients are an ideal patient type to consider. He said that the earlier he starts Butrans, his chances for success are probably increased. I discussed patients who are taking short-acting medications around-the-clock who are not well-controlled. He said that Margaret has already come to him with ideas of patients to try on Butrans since I had already talked to her. He said he is ready to give it a try in a few more patients that may be more fitting. Also discussed OxyContin q12h for appropriate patients beyond Butrans & gave one package of savings cards.Spent time with Margaret (nurse), going over appropriate patient type for Butrans, including patients on chronic opioids around-the-clock who are not well-controlled. She said she is thinking of one patient in particular. I asked her to tell me about them. She said it is a woman with chronic hip pain who was on 3 Percocet per day but is not well-controlled. She added that the patient is very committed to getting relief. Discussed initiation/titration.
PPLPMDL0020000001	Independence	OH	44131	8/10/2011	Quick call- Dr Rob said "no time". Positioned Butrans for appropriate patients with chronic conditions whose pain is not being well-controlled on their current around-the-clock opioid medication. He said he would try to remember. Spoke with Cameo (MA) & discussed savings cards for Butrans & OxyContin. She said they have enough for now but may need OxyContin cards soon.
PPLPMDL0020000001	Akron	OH	44320	8/10/2011	Misty said she was maintaining the patients she had on Butrans and would continue to imitate therapy. She said she liked Butrans therapy mostly because it was once a week and a schedule 3.
PPLPMDL0020000001	Westlake	OH	44145	8/10/2011	Quick call, I confirmed that Dr was attending our Butrans dinner program tonight and he is looking forward to it. I reviewed Butrans as an option and he is still trying to learn where it will fit into his practice. He will learn more tonight.
PPLPMDL0020000001	Cleveland	OH	44122	8/10/2011	Spoke with Lina who said Pam Troppiano is out on Medical Leave and won't be back for a few months. Donna Childress, Director of Case Management CFC, is no longer with the company. Sheila Putnam moved to Dayton and is now Director of the CFC division. Marcia Lange is still over Case Management ABD.
PPLPMDL0020000001	Fairlawn	OH	44333	8/10/2011	I asked Dr. Domdera his thoughts on Butrans therapy and how he felt about the molecule Buprenorphine. He said he liked the idea of this medication and felt comfortable with the molecule. I asked if there was anything more he felt like he needed to know before prescribing for the first time and he said no and that he would keep it in mind.
PPLPMDL0020000001	Cleveland	OH	44106	8/10/2011	I showed dr Butrans visual aid,pg.11,asked how often dr see's pain conditions listed,dr said often,asked how he treats these conditions and at what point an opioid is appropriate,dr said he will treat each of the pain conditions listed first without narcotics,then if patient has to be started on a narcotic,he would consider Butrans to be appropriate,dr said he started another patient on Butrans that was taking 2-3,5mg vicodin,daily and not controlled so he thought Butrans would be an appropriate option,dr said he couldnt get Butrans approved and thought it was Medicaid patient had,dr asked about Medicaid coverage as majority of practice at Main Campus is Medicaid/Medicare,we discussed formulary coverage and asked dr to focus on commercial patients that can use Butrans patient savings cards,discussed savings card program with dr,dr said ok.
PPLPMDL0020000001	Copley	OH	44321	8/10/2011	I asked Dr.Machado about the success patients were having with Butrans and he said he felt patients were having success for the most part. He said the based on the success rate with Butrans he would feel confident continuing to prescribe for opioid experienced patients. I reminded him that Butrans had also been studies in opioid na /rve patients.
PPLPMDL0020000001	Cleveland	OH	44114	8/10/2011	dr said he's writing Butrans and patients seem to be doing well on it.I asked dr since he writes hydrocodone and oxycodone combo's every day for his chronic pain patients,why not start more patients on Butrans every day? dr said thats a good point,he hasnt thought of that on a daily basis.I asked dr how many patients he see's every day,dr said 30-35,and asked how many of them complain their medications not controlling their pain? dr said a lot of them,told dr those are the Butrans patients potentially,confirmed dr is going to dinner program august 16th.
PPLPMDL0020000001	Bedford	OH	44146	8/10/2011	Spoke with MA Cassie who said that Dr Moufawad is out of the office all week. I went through Butrans overview with her as she did not know what it was. Also discussed managed care & savings cards for Butrans & OxyContin. I asked her to leave him an E-Detail invitation & she agreed.
PPLPMDL0020000001	Cleveland	OH	44106	8/10/2011	i talked to dr about how he explains Butrans to his patients,dr said he tells them its easy,once weekly dosing and convenient for them.dr said most patients are fine with that information.dr said he gives aspirin/ibuprofen as supplemental analgesia.
PPLPMDL0020000001	Cleveland	OH	44130	8/10/2011	Dr Kansal said he has not had any further experience with Butrans. I asked if he felt that the one patient, who he had admitted was probably not a good candidate, was a fair trial. He said probably not. I asked why not try other patients to at least see if he thinks it is a good product. He told me that he is not taking any new pain patients. I asked what about patients who have a chronic condition & are not well-controlled on their current therapy. He said none of them want to switch. I asked if any of them ever ask for an increase in dose. He said if they do, he "kicks them out". I asked him isn't it possible that a patient has legitimate pain & has built up a tolerance, which causes them to ask for an increase in dose, & the patient is not asking for it due to misuse or diversion. He agreed there is a difference clinically between tolerance & addiction. He added that to lawyers, they are both the same & if he increases the dose of opioid he gives a patient, they will prosecute him for bad prescribing practices. I showed him inclusion criteria for Butrans studies & asked him if he sees patients with those conditions. He said intervertebral disc disease does not cause pain, but acknowledged that spondylolysis & spinal stenosis could cause chronic pain. I asked if he has patients with these conditions. He did not answer. He started talking about patients who get surgeries & then cannot afford to take the time off work to properly recover, leading to chronic pain.
PPLPMDL0020000001	Akron	OH	44320	8/10/2011	I asked Dr. Dupstadt if she had been initiating Butrans therapy to patients failing or asking to be titrated on their current therapy like we had previously talked about. She said that she was keeping it in mind for those patients and would continue to do so. I reminded him that Butrans was 7 days.
PPLPMDL0020000001	Akron	OH	44320	8/10/2011	I explained the message I had been focusing on in the field with my physicians and the ideal Butrans patient type utilizing the initiation and titration guide. I asked about movement and they said there had been a little but none recently.
PPLPMDL0020000001	Akron	OH	44320	8/10/2011	I explained the message I had been focusing on in the field with my physicians and the ideal Butrans patient type utilizing the initiation and titration guide. I asked about movement and they said there had been a little but none recently.
PPLPMDL0020000001	Cleveland	OH	44106	8/10/2011	Introduced myself to dr,asked if he was aware of Butrans? dr said no,he's not heard of it and he's a PGY-3 Resident in Anesthesia.I gave dr Butrans fpi,discussed 5 butrans core selling messages and gave dr Butrans initiation guide,dr said ok he only has experience with Duragesic,as it relates to patch technology,i told dr this was the first and only transdermal analgesic delivered over 7 days in the CIII class,dr said sounds good he will read the information,i told dr i would follow-up with him to see if he had any questions from Butrans fpi and any patients that may be appropriate to start on Butrans,dr said ok.
PPLPMDL0020000001	Parma	OH	44129	8/10/2011	Dr Gigliotti jumped up when he saw me saying, "I wrote one! I wrote one!". I asked him to tell me about the patient. He said she is an "older" woman with lumbar stenosis. I asked what she was taking before he switched her. He said 3-4 Percocet every day. I told him it sounded like he chose an ideal patient clinically & that my only concern was if the patient had Medicare, it would likely not get covered. He said that he wrote the prescription last Thursday & that this patient would have definitely called them by now if the prescription did not go through. I asked him if he would also know if her insurance required prior authorization for it & he said yes. I asked him if he planned to wait for her feedback before prescribing for more patients & he said no. He said her feedback will have no bearing on him continuing to prescribe. I asked him if that meant that he has more patients who he is thinking of to switch & he said he does have more. I told him it was interesting that he had chosen a patient with lumbar stenosis as that was one of the conditions in the inclusion criteria for Butrans studies. I showed him the criteria on pg 11 of core visual aid. I asked if these were conditions he was used to seeing in his office & he said, "definitely". I told him those were exactly the types of patients that Butrans was evaluated in during trials. He said he will keep prescribing Butrans & reminded me that it took him awhile to get on board with OxyContin as well.
PPLPMDL0020000001	Brooklyn	OH	44144	8/11/2011	Spoke with Nancy, nurse, who said Dr Deeb was not in today. I asked if I could schedule an appointment to discuss Butrans with him. Delivered Butrans overview to her, including indication, dosing, usage & let her know that he had been interested when I first introduced him to it, although I have not been successful in seeing him since my initial conversation with him. Nancy said she will try to see if he will allow me to schedule a lunch. She said I was not allowed to leave any information.
PPLPMDL0020000001	BEACHWOOD	OH	44122	8/11/2011	Spoke with Bill (pharmacist) & presented patient information guide. Discussed application, rotation, & disposal. Let him know he could use it in patient counsel or he could give them to patients who are picking up prescriptions. He said they would be very helpful. Discussed savings through e-voucher & also went over OxyContin savings cards & usage/eligibility for those. Gave him one package of cards.
PPLPMDL0020000001	Cleveland	OH	44130	8/11/2011	Spoke with Fran (MA) to follow-up on lunch where we discussed Butrans. She said Dr Rogers was not available. Reviewed indication, dosing, & usage with her. Also discussed savings cards. She said they did not need any for Butrans or OxyContin yet. I asked her to give Dr Rogers Butrans information & she agreed to do this. Also scheduled lunch for further follow-up.
PPLPMDL0020000001	Cleveland	OH	44102	8/11/2011	dr said Butrans dinner program was helpful to understand appropriate patients for Butrans,dr still was thinking of Duragesic patients being the same for Butrans,i talked to dr about his patients taking low dose hydrocodone or oxycodone daily,for chronic pain,yet asking for something different and to consider Butrans there. showed dr Butrans initiation guide with dosage ranges,dr said its taking him some time as he needed to understand the right patient and insurance coverage,told dr to focus on commercial and BWC patients and asked dr if he can think of 1-2 patients today or tomorrow,per our discussion,that he can start on Butrans? dr said ok he will do that.talked to dr about OxyContin,Q12H dosing,being an appropriate option for patients after Butrans 20mcg,dr said he hasnt started anyone on OxyContin yet as he's inherited all these patients being new to the practice,but he will remember Q12H dosing.
PPLPMDL0020000001	Beachwood	OH	44122	8/11/2011	Introduced Butrans to Dr Bonomo, delivering 5 core messages & alerting her to box warning. Discussed CII & abuse/addiction potential. Spent time going over the appropriate patient to try Butrans on, including those with chronic conditions causing pain such as spondylolysis, intervertebral disc disease, & osteoarthritis. Discussed application, rotation, & disposal & showed demo patch. She said it has a nice feel & she feels it would be comfortable. I asked if she saw a place for a once weekly transdermal system for their chronically painful condition. She said maybe. Discussed OxyContin q12h for appropriate patients beyond Butrans. She said she really does not like to prescribe opioids in general. I agreed she should be cautious but asked if she would agree that some patients have pain that warrants use of opioids & who would not divert or abuse the medication. She agreed. I asked her to consider Butrans for appropriate patients who are not well-controlled on short-acting medication. She said she would keep it in mind.
PPLPMDL0020000001					

	Parma	OH	44129	8/11/2011	Dr Roheny said he "wanted to prescribe Butrans for a patient..." I told him I sensed a "but" coming. He said "but, she had Medicare." I asked him what it was about that particular patient that made him think of Butrans. He said she is a 70 year-old woman with pain due to osteoarthritis. He said he had given her a prescription for Vicodin months ago, but she did not fill it because she did not want to take oral narcotic medication. I reminded him that Butrans is a CIII opioid & does still have abuse/addiction potential. He said he knows & that her main concern was taking pills. I told him that he chose an ideal patient clinically & asked if he has any patients with commercial insurance who may also fit the profile. He said "maybe". Reviewed commercial insurance & showed formulary grid. I also showed him a demo & asked his thoughts. He said he liked the way it was structured.
PPLPMDL0020000001	Beachwood	OH	44122	8/11/2011	Reviewed appropriate patient type again. He said he would see. Introduced myself & Purdue's products to Dr Eckstein. He asked me to tell him about Butrans. Delivered 5 core messages & discussed CIII/abuse/addiction potential. Spent time going over appropriate patient selection. Emphasized importance of selecting the right patients & thinking of the more "moderate" pain side of the scale. He said he was thinking it was for more severe patients, such as those on fentanyl. Showed initiation guide to provide further clarity. Discussed titration every 3 days to a max 20mcg dose. Advised to not go higher than 20mcg due to increased risk of QTc interval prolongation. He asked why he would use Butrans over OxyContin or Duragesic. Re-visited appropriate patient type & let him know that Butrans is only long-acting CIII. He said he understands now where to use it. I asked if he would use in opioid-naïve patients. He said he probably would not as he would want to ensure tolerability to an opioid via short-acting before introducing long-acting. Discussed ability to take supplemental analgesia, managed care, & savings cards. I asked if he thought it was something he could put to use in treating his patients with conditions like intervertebral disc disease & spondylolysis. He said cost is an issue. I reiterated commercial insurance & \$15 co-pay when using cards. Discussed OxyContin q12h for appropriate patients beyond Butrans.Ryzolt 3-2-1 messaging & recommended Senokot-S for opioid-induced constipation.
PPLPMDL0020000001	Cleveland	OH	44130	8/11/2011	I stopped Dr Diab in the hallway by showing him the sample Butrans carton & telling him that I thought he might be interested in seeing what his patients get when they pick up their Butrans prescription. He said it was interesting. I asked him if he thought any patients who take around-the-clock short-acting opioids may benefit from the once weekly dosing. He said maybe & walked into a patient room.
PPLPMDL0020000001	Barberton	OH	44203	8/11/2011	I asked Dr. Patel how often patients are calling in complaining about their current SA therapy? How often are they asking for more of it? He said patients are calling in often complaining of both. I asked if he would feel comfortable initiating therapy to those patients and he agreed he would/
PPLPMDL0020000001	University Hts	OH	44118	8/11/2011	Window call....reminded doc of the appropriate butrans patient type and indication. Discussed the formulary and BWC for butrans and oxycontin.
PPLPMDL0020000001	Cleveland	OH	44103	8/11/2011	talked to Abdul,Pharmacist and Hakeem,Pharmacist,about Butrans stocking,Abdul said they only saw 1 script from a Cleveland Clinic doctor and nothing since.Abdul said majority of patients are taking percocet,2-4/day,60-120/month.Abdul said I should work to dr agras,as she might be interested in talking to me about Butrans.told Abdul my focus is commercial insurance and BWC when talking to doctors about starting patients on Butrans.asked Abdul if he would recommend Butrans to patients,if patients are taking 2-4 tablets daily and not controlled and give them Butrans patient information booklets? Abdul said he does patient counseling and will recommend a long-acting opioid to patients when appropriate,so he agreed to recommend Butrans.gave Abdul Butrans initiation guide.we discussed OxyContin stocking,Abdul said he still see's a lot of scripts for OxyContin and wanted 1 more pack of savings cards.
PPLPMDL0020000001	Beachwood	OH	44122	8/11/2011	Spoke with Ashley (pharmacist) & reviewed patient information booklet with her. Discussed application, rotation, & disposal. She asked if patches could be cut. I told her this is not recommended & has not been studied. She asked what to advise patients to do if the patch "falls off". I told her the patient should notice edges loosening before it would just fall off, in which case they can cover it with Bioclusive or Tegaderm or tape the edges with first aid tape. I told her if the patch falls off completely before the 7 day dosing interval is up, a new patch would need to be applied. She said she can think of at least 2 patients who get Butrans regularly. I asked where most of the prescriptions they see come from- just the building, or the community? She said they can fill all prescriptions written by Cleveland Clinic physicians & all prescriptions for Cleveland Clinic employees. She said they would not fill prescriptions from physicians outside the Clinic/from the community. I asked what managed care plans she sees most frequently. She said mostly Caremark because that is what Clinic employees have, but she also sees Medical Mutual, Anthem, etc. along with Medicare. She said they do not fill prescriptions for Medicaid patients there. Discussed OxyContin savings cards which she said she has enough of.
PPLPMDL0020000001	Cleveland	OH	44102	8/11/2011	talked to Nagla,PA,about the couple patients she started on Butrans,with dr celeste, and Nagla said these were patients taking vicodin and percocet and telling them their medication wasnt controlling their pain.nagla said they tell patients this is your only choice,with some short-acting medication for breakthrough pain, and its easy with once weekly dosing Nagla said this verbiage works with patients and they are bringing patients back for follow-up 1month after starting on Butrans.i asked Nagla if she's discussing application sites/rotation of Butrans with patients? Nagla said no,they give script to patient and Marian,MA,gives patients Butrans patient information booklet.i talked to Marian,MA,about application sites/rotation information in booklet and asked her to focus her discussions on this section.i asked Nagla to focus on commercial and BWC patients to start on
PPLPMDL0020000001	Cleveland	OH	44121	8/11/2011	Doc said she tried a patient on Butrans. She said,"we'll see. She has not heard anything so far. I asked her to keep butrans in mind after NSAIDs or tramadol ATC. Provided an e-detail invite.<font color=blue>-b>CHUDAKOB's query on 08/17/2011</font>I am confused! The physician is a male and yet all references are to the physician being a female? Please explain!<font color=green>-b>SIMERTOC's response on 08/18/2011</font>I am confused too. I believe this was supposed to be Dr. DeJoseph. these two are in the same office and I enter their calls back to back. I guess I clicked on the wrong name-<font color=blue>-b>CHUDAKOB added notes on 08/19/2011</font>it might serve you well to re-read your call notes before submitting them. Thanks!
PPLPMDL0020000001	Barberton	OH	44203	8/11/2011	I asked Dr. Kim if he felt there was truly a place for Butrans in him practice. She said he thought there was a place for it but still did not feel entirely comfortable prescribing it. I asked what more he felt like he needed to know before prescribing it and he said he would review the FPI.
PPLPMDL0020000001	Barberton	OH	44203	8/11/2011	I asked Dr. Minlich her thoughts on Butrans therapy and how she felt about the molecule Buprenorphine. She said she liked the idea of this medication and felt comfortable with the molecule. I asked if there was anything more she felt like she needed to know before prescribing for the first time and she said no and that she would keep it in mind.
PPLPMDL0020000001	Euclid	OH	44117	8/11/2011	I asked doc if he had an opportunity to participate in the e-detail about butrans. He said not yet and asked for another reminder about it. I explained that it would help him identify the right butrans patient. Reminded him of the BWC coverage.
PPLPMDL0020000001	South Euclid	OH	44121	8/11/2011	Window call....Reminded doc of the Butrans coverage with commercial plans and BWC. Provided formulary grid reminder and patient information booklets. Nothing learned.
PPLPMDL0020000001	Akron	OH	44333	8/11/2011	Dr. Brown and I discussed Butrans patient and then covered the Butrans initiation program which she thought helped her identify patients and also gave her a good idea of where to start patients on therapy. She had a patient who experienced an AE and thought it may have been because she started them on the 10 mcg.
PPLPMDL0020000001	Highland Heights	OH	44143	8/11/2011	Window call....asked doc how patients are doing on Butrans. He said no problems. Some patients cant afford it but for the most part, fine. Reminded him of the formulary coverage with commercial plans and the savings cards. He said he is giving them out.
PPLPMDL0020000001	Norton	OH	44203	8/11/2011	I explained the message I had been focusing on in the field with my physicians and the ideal Butrans patient type utilizing the initiation and titration guide. I asked about movement and they said there had been a little but none recently.
PPLPMDL0020000001	Barberton	OH	44203	8/11/2011	I explained the message I had been focusing on in the field with my physicians and the ideal Butrans patient type utilizing the initiation and titration guide. I asked about movement and they said there had been a little but none recently.
PPLPMDL0020000001	Copley	OH	44321	8/11/2011	I asked Dr. Heim if he had been initiating Butrans therapy to patients failing or asking to be titrated on their current therapy like we had previously talked about. He said that he was keeping it in mind for those patients and would continue to do so. I reminded him that Butrans was 7 days.
PPLPMDL0020000001	East Cleveland	OH	44112	8/11/2011	Doc was just back from vacation and very busy. I reminded him of Butrans indication and other selling messages. Gave him an e-detail invite and asked him to log on. No commitment.
PPLPMDL0020000001	Cleveland	OH	44105	8/11/2011	talked to dr about Butrans 5 core selling messages,showed initiation guide and gave Butrans fpi,dr said she hasnt heard of Butrans,asked if there was abuse potential with Butrans? I told dr yes Butrans has abuse potential like other opioids. told dr if she has patients taking 2-3 percocet a day,that meet Butrans indication, and not controlled,she could start them on Butrans,discussed initiation dosage strengths.we discussed BWC and commercial insurance.
PPLPMDL0020000001	Cleveland	OH	44130	8/11/2011	Dr Fedorko asked me if he could put a patient with chronic pancreatitis who was taking Dilaudid prn & MS Contin on Butrans. I told him that this would probably not be a Butrans patient due to the range of opioids that patient is currently taking & showed initiation guide pg 6. A medical student who he was training asked me if Butrans is "that partial agonist". I told her she was astute to remember that & she said they test students on it in the boards now. She asked if Butrans can cause a patient to go into withdrawal. I showed her initiation guide & said that it is possible for that to happen. I showed Dr Fedorko the inclusion criteria & asked if he saw the conditions listed in his practice but he did not answer. He said he would try to find more patients & started to walk away into a room. He then stopped me & asked if he could switch a patient who was taking 80mg q12h OxyContin to Butrans. I told him this patient was also out of the range & to think of patients on the more moderate end of pain, such as those taking 3-4 Vicodin per day & are not well-controlled. Also reminded him of Ryzolt
PPLPMDL0020000001	Beachwood	OH	44122	8/11/2011	Spoke with Laura & Chris, nurse. Discussed Butrans delivery system & once-weekly dosing. Also reviewed savings cards for Butrans & OxyContin. Reminded them that OxyContin savings cards can be used every 14 days if they are cash-pay & have the prescription written that way. Chris said she had forgotten that & that that may be very helpful to some of their patients.
PPLPMDL0020000001	Cleveland	OH	44111	8/12/2011	I asked her if she would feel comfortable recommending Butrans for a patient. She said she would, she does understand the appropriate patients for Butrans and thinks it would be a good option instead of increasing a patients dose of vicodin. Reminder that OxyContin is still an option when Butrans may not provide adequate analgesia.
PPLPMDL0020000001	Macedonia	OH	44056	8/12/2011	Spoke with Nancy, pharmacy manager, who checked her shelf to see if they still had Butrans. She said she really had not heard of it & was surprised that she had it. Let her know it was auto shipped for most stores. Reviewed indication, dosing, & usage with her & spent time going over appropriate patient type. Discussed CIII & abuse/addiction potential. She said she thinks it is a great idea & that she would love to have fewer customers on chronic Vicodin & tramadol. She said she worries about abuse of oral medications. Reminded her that Butrans is still abuseable. She said her opinion is that a patch is not as easily abused as oral medications. Showed her a demo & she said she liked how small & thin it was & thought the adhesive seemed effective. Gave her a patient information booklet & discussed application, rotation, & disposal. Also let her know the edges can be taped with first aid tape if it loosens. She said she hopes that Butrans gets a lot of use because she sees a big place for it in the market. Discussed OxyContin savings cards- she said she really does not stock it.
PPLPMDL0020000001	Cleveland	OH	44111	8/12/2011	Spoke with John, we discussed Butrans medication guide and how to instruct patients on proper use. We reviewed the initiation guide and I asked if he sees patients who come in on low dose vicodin month after month. He said that they see them every day, but patients do not like to give up their pills. We discussed Butrans as an option for opioid naïve patient. Reminder that OxyContin is still an option.
PPLPMDL0020000001	Fairlawn	OH	44333	8/12/2011	I asked Dr. Parisi what he felt the biggest benefit of Butrans was for his patients. He said he liked the fact that it delivered the medication for 7 days and that it was a schedule 3. He said he would keep it in mind for appropriate patients
PPLPMDL0020000001	Akron	OH	44319	8/12/2011	Dr. Wu said that he has continued to initiate Butrans therapy to appropriate patients. He said that when he talks with certain patients they prefer oral medications. I asked if he always lets the patients choose their medications and he said he just didn't want of complaints and call backs.
PPLPMDL0020000001	Cleveland	OH	44103	8/12/2011	showed dr butrans visual aid,pg.11,pain conditions,discussed patients with chronic low back pain and how dr treats these patients.dr starts with muscle relaxers,manipulation,physical therapy,nsaid's and if all of that doesnt work,he'll start patients on tramadol,then vicodin and finally percocet before she considers a long-acting opioid.dr said now that Butrans is available,she's got a lot of patients who have taken percocet for years and are always asking her for something else,so she's thinking of them to start on Butrans.i showed dr Butrans initiation guide,discussed dosing ranges and initiation of butrans.asked dr to focus patient discussions on application/rotation of butrans.dr said she's giving booklets to patients but will be sure to show that info.we discussed formulary coverage and talked about OxyContin being an option,for appropriate patients,after Butrans 20mcg. dr said she still prescribes a lot of OxyContin,post the reformulation and doesnt have any insurance problems with medicaid and medicare.i recommended Senokot-S
PPLPMDL0020000001	South Russell	OH	44022	8/12/2011	Caught Dr Kale in the hallway. Reminded her of Butrans dosing & delivery system & handed her REMS packet, explaining that it contains information on the safe use of Butrans. She thanked me & walked away. Spoke with Sherry & Lucy & discussed Butrans indication, delivery system, & appropriate patient type. They said they have enough savings cards for now.

	Chagrin Falls	OH	44022	8/12/2011	Spoke with Karen (nurse) & reminded her of previous Butrans conversations. Reviewed indication, dosing, delivery system. I asked if they needed savings cards but she said they are okay for now. I discussed appropriate patient type with her. She said they have some patients who fit the indication. I asked her to give Dr Rood the Butrans REMS packet, explaining that it contains information on the safe use of Butrans. She agreed to give this to him & remind him.
PPLPMDL0020000001	Garfield Hts	OH	44125	8/12/2011	Dr Sadowski said he has "rare occasion" to use Butrans. I told him I was not asking him to change all of his patients, but rather identify one or two who may benefit. I asked if he thought that was fair. He said yes. Spent time going over the appropriate patient type. I showed him the inclusion criteria & asked him if he treats those conditions-he said yes. He asked how Butrans compares with fentanyl. Told him we have no comparative data & that fentanyl patients were excluded from studies. Re-visited appropriate patient type. Tried to get him to focus on the more "moderate" pain patients. He said if his patients say they need more than 2 Vicodin per day, he refers them to pain management. I asked him what if instead of doing that, or increasing the amount of hydrocodone he gives the patient, he switched them to Butrans, a long-acting & different molecule. I reminded him that Butrans is still an opioid & can still be abused & has addiction potential. He said he could think of a few patients who he could do that for. Discussed managed care & asked him to think of working patients/those with commercial insurance who could use the co-pay cards, saving them money each month. I asked if it was fair of me to ask him to identify one or two patients like this (with a chronically painful condition, on 2 Vicodin per day, not well-controlled & with commercial insurance) & start them on Butrans 5mg. He agreed. Discussed this with Deena. OxyContin 7 tablet strengths reminder.
PPLPMDL0020000001	Cleveland	OH	44113	8/12/2011	confirmed dale is attending dinner aug.16th on butrans,asked if dale has seen any patients taking tramadol,daily,that arent controlled and have any 1 of the pain conditions listed on pg.11,butrans visual aid? dale said yes he has and he's recommended Butrans for dr shen to start patients on instead of refilling tramadol.we talked about application/rotation info in butrans patient info booklet and insurance coverage.i asked dale to start a few patients,per discussion,on Butrans instead of increasing tramadol,refilling or converting to another short-acting opioid,dale said he'll do that.i recommended Senokot-S
PPLPMDL0020000001	Garfield Hts	OH	44125	8/12/2011	Spoke with Sarah (pharmacist) & inquired about Butrans stocking. She said she does have it in stock now. I asked her what strengths, she said she did not know off hand & did not have time to look. Discussed patient information guide & savings. Also asked if they needed additional OxyContin savings cards but she said they were stocked on them for now.
PPLPMDL0020000001	Brooklyn	OH	44144	8/12/2011	Stopped Dr Detwiler in the hallway by showing him the sample carton of Butrans, telling him I brought him "show & tell". I asked if it looked like what he expected. He said he hadn't thought about it but it was "interesting". I showed him one of them demo patches & disposal units. He said again that it was interesting & then walked into a room. Discussed managed care & savings with Tiffanie.
PPLPMDL0020000001	Cleveland	OH	44107	8/12/2011	Spoke with Nick, we discussed the medication guide and important things to let the patients know about. He asked about the managed care and we reviewed the coverage and savings cards. We discussed that OxyContin is an option covered on Medicaid and some Med D plans
PPLPMDL0020000001	Cleveland	OH	44111	8/12/2011	I asked Dr if he has thought about where Butrans may fit into his practice. He said he does think it might be good for some patients, but many of his patients may be past the point of Butrans. I asked if he sees pain patients seen in the inclusion criteria and he said he sees all of it. I asked him to try Butrans for his patients instead of vicodin around the clock and he agreed. Reminder that OxyContin is an option when Butrans may not provide adequate analgesia.
PPLPMDL0020000001	Lyndhurst	OH	44124	8/12/2011	Quick call.....asked doc if he has had more feedback from the patient started on butrans. He said not yet. I asked him to try another patient on butrans Gave him an initiation guide. Not commitment.
PPLPMDL0020000001	Akron	OH	44319	8/12/2011	I asked Dr. Katrij his thoughts on Butrans therapy and how he felt about the molecule Buprenorphine. He said he liked the idea of this medication and felt comfortable with the molecule. I asked if there was anything more he felt like he needed to know before prescribing for the first time and he said no and that he would keep it in mind.
PPLPMDL0020000001	Berea	OH	44017	8/12/2011	Quick call, I asked Dr if he would come to our upcoming dinner program to learn more about how his peers are prescribing Butrans. He said he would try to make it.
PPLPMDL0020000001	Mayfield Hts	OH	44124	8/12/2011	Quick call.....reminded doc of the appropriate butrans patient type and indication. Gave him an e-detail invite and formulary grid. Asked him to log on.
PPLPMDL0020000001	Cleveland	OH	44125	8/12/2011	Spoke with Angie (pharmacist). She said she has not seen any Butrans activity. She said she thought it would have been more utilized. I told her a variety of physicians/specialties have been prescribing it & I just had lunch with Dr Samuel, who had a positive response. She said she will keep an eye out. Discussed patient savings cards for Butrans & OxyContin.
PPLPMDL0020000001	Cleveland	OH	44109	8/12/2011	worked pm&r dept - see call notes on greenwood,huang and harris; worked internal medicine-left business card for dr Jones to call me as he attended dinner program on butrans,aug10th and said to stop and give card so we can set-up time to meet and discuss butrans fpi
PPLPMDL0020000001	Brooklyn	OH	44144	8/12/2011	Caught Dr Miguel on his way out. Positioned Butrans for patients with chronically painful conditions who are not well-controlled on short-acting medications. Also reminded him of savings cards for Butrans & OxyContin.
PPLPMDL0020000001	University Heights	OH	44121	8/12/2011	Window call.....reminded doc of the appropriate butrans patient type and indication. Gave him an initiation guide and formulary grid. Nothing learned.
PPLPMDL0020000001	Akron	OH	44333	8/12/2011	I asked Dr. Rictor what his definition of chronic pain was and he mentioned that he considers a patients chronic when he feels he needs to prescribe a LAO. He said at that point he typically refers them to Pain Management.
PPLPMDL0020000001	Cleveland	OH	44109	8/12/2011	I talked to Andy,Pharmacist,about Butrans stocking and scripts they are getting for Butrans.i asked Andy if they do any patient counseling for patients taking opioids? Andy said yes,they do that and I asked if he ever hears patients say that their short-acting opioids arent controlling their pain? Andy said yes that does happen occasionally.i asked Andy to recommend Butrans to these patients and give them Butrans patient information booklet,Andy said he will do that and share with other pharmacists.we talked about insurance coverage for BWC and commercial patients for Butrans.recommended Senokot-s
PPLPMDL0020000001	Sagamore Hills	OH	44067	8/12/2011	Quick call- Caught Dr Scanlon at the window. He said he is still thinking of Butrans patients & then walked away. Spoke with Karen, nurse, & reviewed savings cards for Butrans & discussed commercial insurance coverage.
PPLPMDL0020000001	Akron	OH	44333	8/12/2011	I asked Dr. Z if his prescribing habits had changed and if he felt like there was a place for Butrans in his practice yet. He explained that he still was not treating chronic pain.
PPLPMDL0020000001	Cleveland	OH	44113	8/12/2011	talked to dr about attending Butrans dinner on aug16th,dr said she might go and i could follow-up tuesday with her.i showed dr butrans visual aid,pg.11,discussed pain conditions and we talked about chronic low back pain patients and how dr treats this condition,asked dr when she knows an opioid is appropriate,how does she choose between a short-acting and long-acting opioid,dr said she probably wouldnt start patients on long-acting opioid she would give patients tramadol to start then if they arent controlled,convert to Butrans 5mgc,i showed dr Butrans initiation guide,discussed dosing ranges and initiation of butrans and showed dr butrans patient info booklet,asked dr to focus patient discussions on application/rotation,dr agreed.i recommended senokot-s
PPLPMDL0020000001	Cleveland	OH	44109	8/12/2011	dr said he's not prescribed Butrans,its another patch like Duragesic,showed dr butrans visual aid and discussed 5 key selling messages with dr and asked him what really stood out about these messages? dr said he liked it was once weekly dosing and a CII but didnt think there was medicaid coverage? we discussed medicaid coverage and i told dr to focus on BWC and commercial insurance. i asked dr if he had patients with chronic low back pain taking tramadol every day but not controlled and asking for something different? dr said he does.i asked dr to focus on these patients and start them on Butrans,not refill tramadol or convert to another short-acting opioid,dr said he'll think about it and leave him butrans initiation guide. i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	8/12/2011	dr said butrans dinner program was very informative and she liked the speaker dr.platto.i asked dr if there was anything she heard that was new to her,dr said not really as i have told her all of the same clinical information,she was more interested in speaking with physicians that have real world clinical experience with Butrans.i asked dr if she can think of a couple patients taking vicodin,daily,for their chronic pain but asking for something else? dr said yes and she's going to start a few patients on Butrans and see what happens.told dr to focus on BWC and commercial plans.i recommended Senokot-S
PPLPMDL0020000001	Lyndhurst	OH	44124	8/12/2011	Reminded doc that Butrans is a CII and can be called in and refilled. I asked if she is prescribing with refills. She said she has once she determines that patients are stable on it and at the right dose. I also reminded her that steady state is reached in 72 hrs and titration can be done at that point.
PPLPMDL0020000001	Akron	OH	44319	8/12/2011	I explained the message I had been focusing on in the field with my physicians and the ideal Butrans patient type utilizing the initiation and titration guide. I asked about movement and they said there had been a little but none recently.
PPLPMDL0020000001	Cleveland	OH	44111	8/12/2011	Spoke with Jim, we reviewed the Butrans medication guide and the important things to tell patients when they first get Butrans. We discussed the application and rotation and steady state in 3 days. He agreed to give medication guides to the patients. We reviewed OxyContin as an option when Butrans may not provide adequate analgesia.
PPLPMDL0020000001	Independence	OH	44131	8/12/2011	Caught Roman at the window. I handed him Butrans savings cards. He thanked me & said he had wanted those. He added that he did not have time today to talk & to stop back another time so we could discuss Butrans & the program. I agreed & gave him my card, asking him to call me if he had any questions.
PPLPMDL0020000001	Cleveland	OH	44135	8/12/2011	We reviewed the key messages for Butran. I showed the inclusion criteria and Dr said that he treats all of those conditions. He said that he sees a big place for Butrans in his practice and asked about use in geriatric patients. We reviewed the FPI regarding geriatric patients but I let him know that managed care for Medicaid and Med D patients will be a pain. He said that he does have many medical mutual patients that that he would still be able to prescribe Butrans for them. We reviewed the savings cards and medication guide for patients. I also discussed this with Erica the office manager and she will make sure that Butrans patients get a savings card and medication booklet. Dr said that he prefers not to prescribe OxyContin due to risk of abuse and diversion. He said he does have a few patients who he feels comfortable maintain OxyContin. We reviewed the OxyContin
PPLPMDL0020000001	Beachwood	OH	44122	8/12/2011	Spoke with Yvonne (MA) who said that Dr Tabbaa was running much too far behind today to see reps. I requested the nurse or resident but she said they are also in with patients & it was simply not a good day.I discussed with her the patient information guides, along with application, rotation, & disposal. She said she would take some guides & give them to Dr Tabbaa & his nurse. I asked if she has heard any patient feedback or questions regarding Butrans, but she said she has not. She promised to give Dr Tabbaa the Butrans information & remind him & said to try back another time. She also said they are still not doing lunches there. I asked if they needed OxyContin savings cards but she said they were well-stocked for now.
PPLPMDL0020000001	Cleveland	OH	44109	8/12/2011	talked to Erin,Pharmacist,about Butrans stocking,any scripts she's filled for Butrans and Erin said she's not seen any lately for Butrans.i asked if Erin would recommend Butrans,to patients and give Butrans patient information booklets,if they arent controlled on their short-acting opioids and asking for something different? Erin said she will do that as they provide patient counseling for patients taking opioids.i showed Erin Butrans 5 core selling messages,in Butrans visual aid,erin liked that Butrans has 7 days of buprenorphine delivery and is a patch so we discussed both,discussed formulary coverage for Butrans and i recommended Senokot-S
PPLPMDL0020000001	Bedford Heights	OH	44146	8/15/2011	Spoke with Susan, office manager. She said she would request an appointment for me with Dr Hochman. She asked me to remind her what Butrans was so that she could tell him when she was requesting the appointment. Reviewed Butrans indication, dosing, delivery system, & appropriate patient type. She said she knows that the nature of the practice will be changing somewhat with the new House Bill, although she could not be more specific. I asked her to give Dr Hochman Butrans literature when she was requesting the appointment & she agreed to give it to him. Also discussed OxyContin savings cards & eligibility requirements for all savings programs (ie no government insurance).
PPLPMDL0020000001	Rocky River	OH	44116	8/15/2011	Quick call with Katrina, we reviewed the Butrans medication guide and import things to let the patients know. She still has not seen movement of Butrans at this location. We discussed appropriate patients for Butrans and OxyContin and she said that they do have some patients who might benefit from long acting instead of vicodin month after month. She would not usually call a Dr to recommend unless they were taking more than the allowed pill amount.
PPLPMDL0020000001	Parma	OH	44129	8/15/2011	Spoke briefly with Linda & reminded her of previous Butrans conversations. She said she does not understand why she has never seen any activity for it. Reviewed appropriate patient type & asked her thoughts on what area practitioners may be interested in hearing more about it based on that patient type. She said she did not have any specific recommendations. Reviewed savings program & discussed OxyContin cards, although she reminded me that they do not stock it there.
PPLPMDL0020000001	Uniontown	OH	44685	8/15/2011	Dr. Stetler said that he has continued to initiate Butrans therapy to appropriate patients. He said that when he talks with certain patients they prefer oral medications. I asked if he always lets the patients choose their medications and he said he just didn't want of complaints and call backs.
PPLPMDL0020000001	Parma	OH	44129	8/15/2011	Quick call- Positioned Butrans for appropriate patients who are not well-controlled on their short-acting around-the-clock treatment for chronic pain. Dr Ortega said he is still finding patients & then walked away. Spent time with Cindy, reviewing appropriate patient type & savings eligibility for Butrans & OxyContin. She said she has not heard anything from any of the patients nor has had any managed care concerns.

PPLPMDL0020000001	Lakewood	OH	44107	8/15/2011	Dr told me he has not saw the right patient for Butrans. I showed the inclusion criteria and asked if he sees any of these conditions. He said he does. I asked why those might not be to try Butrans. He said that they would be but many times they are already on other opioid and it will be hard to switch them. I asked him to switch them when they are asking for a change- either in dose or medication and he said he will keep it in mind. We reviewed OxyContin is still an option when Butrans may not provide adequate analgesia.
PPLPMDL0020000001	Akron	OH	44333	8/15/2011	I asked Dr. Ahmad how often patients are calling in complaining about their current SA therapy? How often are they asking for more of it? He said patients are calling in often complaining of both. I asked if he would feel comfortable initiating therapy to those patients and he agreed he would/
PPLPMDL0020000001	akron	OH	44333	8/15/2011	I asked Dr. Bashor if he would feel confident initiating Butrans therapy instead of low dose hydrocodone for patients with the right type of managed care and he agreed he would.
PPLPMDL0020000001	Cleveland	OH	44106	8/15/2011	talked to dr about Butrans fpi,dr said he hasnt had time to go through all of the fpi but he does understand that Butrans is transdermal and dosed once a week,dr said his only exposure to patch technology is Duragesic.we talked about who the Butrans patient is,showing Butrans visual aid,and i asked dr if he has patients taking tramadol,daily for chronic pain and perhaps having 1 of the conditions listed on pg.11 butrans visual aid? dr said yes they see a variety of pain conditions and most patients are taking opioids.i asked dr if he would start a couple patients,per our discussion,on Butrans instead of refilling tramadol or converting patients to another short-acting opioid? dr said he'll consider it but needs to still read through Butrans FPI and feel more comfortable with this medication.dr asked about insurance coverage,told dr to focus on commercial patients and discussed Butrans patient savings cards.i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44106	8/15/2011	talked to Sue,Medical Receptionist,about seeing dr and Sue said dr only meets with reps if he wants to, i can leave info and she'll pass along to dr.i gave Butrans fpi,initiation guide,patient info booklet,formulary grid,webcast invites,8/16 dinner invitation,OxyContin fpi,conversion guide,formulary grid and my business card.
PPLPMDL0020000001	Lakewood	OH	44107	8/15/2011	Quick reminder about Butrans. I asked if there was anything i could do to help remember Butrans, he said he has the savings cards out on his counter and he will keep it in mind. Reminder to use the savings cards for OxyContin as well.
PPLPMDL0020000001	Lakewood	OH	44107	8/15/2011	Quick call, asked Dr if he saw any benefit to Butrans, He said he will think about it and took the invitation guide. I asked if there was any other info i could provide he said he will let me know. Reminder that OxyContin is also still a long acting option and gave an OxyContin conversion guide.
PPLPMDL0020000001	Garfield Heights	OH	44125	8/15/2011	Spoke with Dave & discussed Butrans patient type. He said after the initial prescription, he has not seen any more. He said there were no particular area physicians that came to mind as having a lot of patients fitting that indication. He said he does see chronic Vicodin & tramadol patients though. Also discussed OxyContin savings cards, which he said he has enough of for now.
PPLPMDL0020000001	Fairlawn	OH	44333	8/15/2011	I asked Dr. Oyakawa his thoughts on Butrans therapy and how he felt about the molecule Buprenorphine. He said he liked the idea of this medication and felt comfortable with the molecule. I asked if there was anything more he felt like he needed to know before prescribing for the first time and he said no and that he would keep it in mind.
PPLPMDL0020000001	Cleveland	OH	44109	8/15/2011	talked to Ron,Pharmacy Manager,about Butrans scripts and Ron's not seen any Butrans scripts.i asked Ron if he provides patient counseling to those patients taking opioids for their chronic pain? Ron said yes he does provide some patient counseling.i asked Ron if he would recommend Butrans to patients taking short-acting opioids, for chronic pain, and arent controlled and perhaps asking for some advice from Ron,for another medication? Ron said he will do that and asked what he could give to patients about Butrans.i showed Ron the Butrans patient information booklet,asked him to focus discussion on application/rotation of Butrans and have patients talk to doctors about Butrans.Ron agreed to do this.i asked him to recommend Senokot-S for patients with opioid induced constipation.
PPLPMDL0020000001	Cleveland	OH	44106	8/15/2011	I talked to Ann,Receptionist,who said dr doesnt meet with reps,i can leave information and she'll look at it and will call me if interested.I gave Ann Butrans fpi,initiation guide,formulary grid,webcast invites,dinner program invitation,patient information booklet and my business card also left OxyContin fpi,conversion guide,formulary grid for dr too.
PPLPMDL0020000001	Independence	OH	44131	8/15/2011	Dr Trickett saw me at the window & said she has had no feedback from her latest Butrans patients but is still looking for more. She then walked away. Spoke with Steve & asked him to give her the E-Detail invite, which he agreed to do. Also discussed appropriate Butrans patient type & savings cards/commercial insurance coverage. Confirmed lunch with him where he said he is sure i will get more time to discuss Butrans with her.
PPLPMDL0020000001	Cleveland	OH	44106	8/15/2011	worked pain management dept and oncology
PPLPMDL0020000001	Fairlawn	OH	44333	8/15/2011	I asked Dr. Weidman if she felt there was truly a place for Butrans in her practice. She said she thought there was a place for it but still did not feel entirely comfortable prescribing it. I asked what more she felt like she needed to know before prescribing it and she said she would review the FPI.
PPLPMDL0020000001	Cleveland	OH	44106	8/15/2011	i talked to Roger,Pain Fellow,about Butrans fpi and 5 core selling messages in Butrans visual aid.Roger said he's seen info here in clinic about Butrans but hasnt started anyone on Butrans yet and asked if the attending physicians were prescribing,we discussed all of that information and i asked Roger how he treats his patients with some of the conditions listed on pg.11? Roger said if patients have osteoarthritis he'll give muscle relaxers,arthritis medications first,non-opioid therapy at first,but if patients have chronic pain he's typically given them tramadol.dr said if pain is persistent and tramadol doesnt work then he'll go to vicodin,just how he's been trained.i asked dr based on Butrans 5 core selling messages,what stood out to him? dr said once weekly dosing option and transdermal delivery.i asked dr if he had a couple patients he would see today or tomorrow,taking tramadol daily but not controlled,where he could start them on Butrans instead of refilling tramadol? dr said he's sure he'll see patients like that and will consider Butrans.dr asked about insurance coverage so we discussed commercial insurance and BWC.i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44114	8/15/2011	gave dr Butrans dinner invitation for 8/16 and dr said she is going to attend and is looking forward to hearing the physician speak about Butrans.i asked dr when she see's certain pain conditions,showed pg.11,butrans visual aid,how is she deciding when an opioid is appropriate? dr said she tries all non-opioid options first for patients with osteoarthritis,thats the condition she talked about.dr said if patients have chronic pain,he'll give tramadol first and if that doesnt work she would consider Butrans.we talked about initiation of butrans,showed initiation guide and i asked dr to start a couple patients like we discussed on Butrans instead of starting them on tramadol,dr said she might consider it but usually starts with short-acting opioids and if that doesnt work now she's thinking about Butrans after that.we talked about BWC and commercial patients trying Butrans.i showed dr pg.11,butrans visual aid,discussed pain conditions listed dr focused on patients with chronic low back pain and his treatment algorithm.dr said when patients say NSAID's arent controlling pain,he starts them on tramadol 50mg,1-2 pills q6h.i asked dr what he does when that regimen isnt working for patients? dr said he'll either increase dosing interval to Q4h or increase tramadol dosage strength to 100mg.i told dr right there is the Butrans patient,so these same patients that meet Butrans indication that are taking their 1st initial dose of tramadol when that doesnt control pain,dont increase dosing interval to q4h or increase dosage strength but start them on Butrans.dr said ok,earlier in therapy makes sense as he normally will max patients out on tramadol and go to vicodin after that and then percocet and then if patients need a long-acting opioid,he'll start patients on OxyContin.we talked about OxyContin being appropriate for patients,but before OxyContin and right after the 1st dose of tramadol isnt controlling patients pain,i asked dr to start a few patients on Butrans.dr agreed saying he'll consider that option as he does like patch technology but keeps forgetting Butrans is a CIII.dr asked about insurance coverage on medicalid? i told dr to focus on BWC,commercial as these are 2 biggest plans for his practice and Tricare patients.dr said ok.i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44113	8/15/2011	showed Dale,PA,Butrans visual aid,pg.11,discussed pain conditions listed and focused on patients with chronic low back pain and dale shared with me his treatment plan for most patients that starts with no opioids then as patients disease progresses and chronic pain is present he normally starts patients on tramadol,but now that Butrans is an option he's considering Butrans for them.i asked Dale if he had a few patients in the hospital or out-patient that are taking tramadol,daily and not controlled? dale said yes he has a lot of these patients and is considering Butrans,we discussed initiation of Butrans showed initiation guide and discussed formulary coverage,focused on BWC and commercial patients. i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	8/15/2011	talked to dr about pg.11,butrans visual aid,asked how he treats the pain conditions listed,dr talked about osteoarthritis and giving non-opioid therapy first,dr said he'll give muscle relaxers,arthritis medications,physical therapy and if patients are having chronic pain he would probably start with tramadol.i asked dr how Butrans fits into this algorithm? dr said he tells patients if they sleep 6 hours a day,they are awake for 18hrs/day and have to work,function in life so that means they should only be taking their pills,like tramadol,as prescribed,which could be 1-2 pills BID,dr said when he hears patients say they are taking more pills on bad days and those days are more often during week,he's thinking of Butrans for them.i asked dr how he describes Butrans to patients? dr said he tells them its easy,once weekly dosing application,shows Butrans patient information booklet and tells them 4 patches a month.i asked dr if he had a couple patients coming in this afternoon or tomorrow,like we discussed,that he can start on Butrans and not refill their tramadol? dr said yes he does and will consider Butrans.focused dr on BWC and commercial patients.we talked about OxyContin being an option,with 7 tablet strengths for titration and formulary coverage. i recommended Senokot-S
PPLPMDL0020000001	Akron	OH	44333	8/15/2011	I asked Dr. Shah if he had been initiating Butrans therapy to patients failing or asking to be titrated on their current therapy like we had previously talked about. He said that he was keeping it in mind for those patients and would continue to do so. I reminded him that Butrans was 7 days.
PPLPMDL0020000001	cleveland	OH	44135	8/15/2011	I asked Dr if he has been seeing success with the few patients he started on Butrans. He said he has but the biggest problem is that he sees mostly Medicaid and Med D patients. I asked him to focus on commercial and BWC and he said he does have some BWC patients and he agreed to keep it in mind. I asked Dr if he would come to our dinner tomorrow and he will see.
PPLPMDL0020000001	Cleveland	OH	44103	8/15/2011	talked to April, receptionist, about Butrans 5 core selling messages and April said she thinks both doctors would be interested in speaking with me about Butrans but right now they arent allowed to book any appointments or lunches, all she can do is take my information and give to doctors and if they are interested in speaking with me, they will contact me. i asked April to tell me what really stood out to her after looking at 5 Butrans core selling messages? April said the fact Butrans is a patch and dosed once a week, she thinks some patients might prefer that over pills every day. i told April i appreciated her time and would follow-up in a few weeks to see what doctors said about Butrans fpi, initiation guide, left webcast invitations, Butrans 8/16 dinner program and patient information booklet with my business card.
PPLPMDL0020000001	Rocky River	OH	44116	8/15/2011	Spoke with Elani, we reviewed the Butrans medication guide and import things to tell the patients who start on Butrans. We reviewed steady state in three days and where and how to apply the patch. We discussed appropriate Butrans patients per the invitation guide and other patients who might be appropriate for OxyContin
PPLPMDL0020000001	Bedford	OH	44146	8/15/2011	I showed Dr Haddad inclusion criteria for Butrans studies & asked if these are conditions he treats regularly. He said they are very common in his practice. I asked him to tell me more about each of them. He went on to explain spondylolysis & spondylolysis. I asked if it is common that they are treated with opioids. He said usually NSAID's/COX-2's are used first, along with physical therapy. He said if someone is still in pain, opioids may come into play at that time. I let him know that these are the types of conditions Butrans was studied in for safety & efficacy. I asked him if he could see himself using Butrans in patients like this. He said if they have the right insurance. He also said that we "have a new competitor". I asked what he meant. He said Nucynta. I told him i can only speak to Butrans, which is used for chronic moderate to severe pain. I also reminded him of once weekly dosing & seven days buprenorphine delivery in one application. He said he does think Butrans is a good product.
PPLPMDL0020000001	Lakewood	OH	44107	8/15/2011	Quick call at window, i told Dr that i know managed care for Butrans is a concern for him based on previous discussions. I reminded Dr to give patients a savings card for Butrans and that commercial patients should have a low as a \$15 copay each month. Reminder that OxyContin is an option that is covered on Medicaid.
PPLPMDL0020000001	Parma	OH	44129	8/15/2011	I showed Dr Taylor the Butrans study inclusion criteria & named some of the conditions to her, asking if these were consistent with the types of patients she treats in her office. She said "absolutely- all of them". I asked if they commonly present with pain & she again said yes. I told her these were the inclusion criteria in Butrans studies for safety & efficacy & asked her thoughts. She said she could see herself using Butrans in that type of patient. She also added that she actually talked about Butrans with a patient recently & offered it as a treatment option, but the patient declined. I asked why. Dr Taylor said the patient did not want to come off Vicodin. I asked Dr Taylor if she thought this patient may be receptive to the idea of Butrans if she did not have to immediately stop taking Vicodin, but rather could keep a reduced supply on-hand for breakthrough pain. Dr Taylor said that was a possibility & that she would mention that to the patient next visit. She said that she "has been thinking of Butrans more", which she said was a good sign for me. I reminded her that it was not me, but her patients, who she had originally told me she thought could benefit from Butrans.

	Cleveland	OH	44106	8/15/2011	talked to dr about patients taking 50mg tramadol,1-2 pills daily,for chronic pain and when thats not working,how does he make decision as to next step in therapy? dr said if its the first time patients are saying their tramadol isnt working anymore,he'll usually refill tramadol but increase dosing frequency,if its several times patients have said their medication isnt lasting long enough,working,etc,he'll consider increasing dosage strength of tramadol until he's maxed patients out on tramadol.dr said he knows butrans is a great option for patients early on in therapy as he prefers long-acting medications and likes transdermal technology.i asked dr if he could think of a couple patients like we discussed that he could start on Butrans and not refill tramadol? dr said he will consider Butrans for some patients and has been recommending Butrans to the attending physicians here at UH/Pain Management focused dr on commercial patients to give Butrans patient savings cards to them.i recommended Senokot-S
PPLPMDL0020000001	Beachwood	OH	44122	8/15/2011	I showed Dr Warren the inclusion criteria for Butrans studies & asked if they were conditions that he saw in his practice. He said he sees them all frequently. He asked if that meant those were the types of conditions that Butrans would be effective in. I told him yes & that they were the inclusion criteria for Butrans safety & efficacy studies for moderate to severe chronic pain. He looked surprised & said that he will definitely keep that in mind for those patients, then walked into a room. Spoke with Donnie & Alisa (nurses) & reviewed this data with them. Also discussed Senokot-S for medication-induced constipation & gave samples.
PPLPMDL0020000001	Brooklyn	OH	44144	8/16/2011	Spoke with Audrey (MA) in effort to get a lunch, appointment, or any time at all with Dr Deeb. She said she would move my card to the front of the pile, but that was all she could do to try to get me to see him. I reviewed the Butrans appropriate patient type, dosing, & delivery system. I asked if I could leave some literature for him, but she said I could not leave any information for him as he would not accept any literature at all. I reminded her that I have only seen Dr Deeb one or two times since launch in January. She said she would do her best. Also discussed OxyContin savings cards, but she said they did not need any.
PPLPMDL0020000001	Westlake	OH	44145	8/16/2011	Dr not happy today. He told me that the owners of his practice want his schedule filled with patients even if some of the patients are not trustworthy or seeking pain meds. He said he can't take seeing these types of patients any longer and he is miserable. I asked if I could do anything to help choose the right patients for opioids and he already does everything that he can. He has dismissed patients, but then his schedule is not as full and he gets yelled at by the owner. Spoke with Angela and Daniele and they have done a few prior auths to get Butrans through on Medicaid.
PPLPMDL0020000001	Cuyahoga Falls	OH	44221	8/16/2011	I asked Dr. Axem what she felt the biggest benefit of Butrans was for her patients. She said he liked the fact that it delivered the medication for 7 days and that it was a schedule 3 and said he would keep it in mind for appropriate patients.s
PPLPMDL0020000001	Cleveland	OH	44130	8/16/2011	Spoke with MA Kim & reviewed Butrans appropriate patient type, including those who call too soon for refills or who say their short-acting medication is wearing off too quickly. She said she would remind Dr Lash & would give him the Butrans information I left behind. Also reminded her of insurance coverage & savings cards for Butrans & OxyContin & reviewed eligibility requirements.
PPLPMDL0020000001	Independence	OH	44131	8/16/2011	Spoke with MA Kathi & reviewed Butrans appropriate patient type. I asked if she gets calls from patients saying their medications such as Vicodin or tramadol are wearing off too quickly or who call too soon for refills. She said she gets these calls frequently. Discussed this as a potential Butrans patient type. She said I could leave information for Dr Reddy as a reminder, so I gave her an initiation guide to give to him. Discussed OxyContin savings cards & OTC products.
PPLPMDL0020000001	Lakewood	OH	44107	8/16/2011	I asked Dr to come to tonight's program, she does not usually go. We reviewed the appropriate patients for Butrans and I asked if she would give it a try. Reminder that OxyContin is an option when Butrans may not provide adequate analgesia.
PPLPMDL0020000001	Cleveland	OH	44106	8/16/2011	talked to dr about pg.11 butrans visual aid,pain conditions and dr talked about his chronic low back pain patients and how he treats them with NSAIDs,muscle relaxers,injections,etc,before he'll start patients on opioids.I asked dr how he treats chronic pain for these patients when they do need an opioid? dr said tramadol,50mg,1-2 tabs,q6h.i asked dr to start a couple patients on Butrans when that first tramadol dose isnt controlling patients pain and not refill tramadol or increase dosage strength.dr said ok and he has started a few patients on Butrans recently.I asked dr to focus on commercial insurance patients and discussed patient savings cards.i recommended Senokot-s<font color=blue><b>CHUDAKOB added notes on 08/26/2011</b></font><font>Some different types of questions to ask might be:"Dr. what do you expect to happen if you prescribe Butrans for a patient or two?" " Dr. what drawbacks do you see to prescribing Butrans"? Dr. what is the downside to prescribing Butrans for the appropriate patient?"
PPLPMDL0020000001	Cleveland	OH	44130	8/16/2011	Spoke with Brenda, Dr Peleg's RN. She said he would not come back to lunch as he does not like to talk to reps. Discussed Butrans with her, delivering 5 core messages & discussing CII & box warning. Also reviewed abuse/addiction potential. Spent time going over initiation guide & appropriate patient type. She said Dr Peleg has many patients who sounded like they might be good candidates. Discussed managed care & savings cards. She said she would tell Dr Peleg about Butrans & recommend it for a few patients because she thought it seemed like a good option. Showed her demo kit & sample carton. Also discussed OxyContin managed care & savings
PPLPMDL0020000001	Independence	OH	44131	8/16/2011	I showed Dr Sundaram the PK profile page of the main visual aid again & reminded him of our previous conversation where he had told me that he liked that Butrans offered a constant delivery of drug over the dosing interval. He said he remembered & that is a feature he likes. I told him that this does not suggest, (nor do we have data that suggests), that that means Butrans is more safe, efficacious, or "better" in any way. He said he didn't think that's what we were talking about. I explained that it was important that I make sure to tell him this as I did not want to mislead him in any way. He thanked me but said he didn't think anything of it. Discussed appropriate patient type, including those who are not well-controlled on their short-acting around-the-clock opioid medication. Reminded him of conditions such as spondylolysis & spinal stenosis as possible Butrans patients. He said that he has tried a couple of patients but not very many & asked if it is "catching on" with other area physicians. I told him a variety of physicians/specialties have had success with Butrans in treating patients' pain, although it, like any other medication, will not work for everyone. Reminded him of CII & abuse/addiction potential. Also discussed OxyContin q12h as a long-acting option for patients beyond Butrans 20mcg.
PPLPMDL0020000001	Cleveland	OH	44130	8/16/2011	Introduced Butrans to Dr Volweiler, delivering 5 core messages & alerting her to box warning. Discussed CII & abuse/addiction potential. She asked how it compares to fentanyl. I told her we have no comparative data & that fentanyl patients were excluded from studies. Showed initiation guide & spent time going over appropriate patient type. Discussed adverse events & showed FPI. She asked if absorption depends on the amount of adipose tissue a patient has. I told her no specific studies have been done to study this & asked to submit her question to medical services, but she declined, saying she would read the FPI, although I told her the information is not there. Showed her sample carton & demo kit. She said the adhesive seemed like it would be effective for the full 7 days. Discussed managed care & savings cards. I asked if she has patients who she can think of who may be good candidates for Butrans & she said she does have some. She said having a long-acting CII medication fills an area no other medication has. Discussed OxyContin 7 available tablet strengths, including intermediate strengths of 15, 30, & 60mg. She said she usually doesn't think of those doses. Also reviewed managed care & savings.
PPLPMDL0020000001	Cleveland	OH	44130	8/16/2011	Introduced Butrans to Dr Warren, delivering 5 core messages & alerting him to box warning. Discussed CII & abuse/addiction potential. I asked if he, in his specialty, sees patients on the more moderate pain side in addition to more severe pain & he said he does as not all cancer is severely painful. Discussed appropriate patient type at length & asked his thoughts on transdermal systems. He said he finds that they can be effective. He asked how Butrans compares with fentanyl. I told him we have no comparative data & that fentanyl patients were excluded from studies. Showed initiation guide pg 6 & spent more time on patient type, focusing on more "moderate" pain as well as commercial insurance. He said he likes the idea of the medication being delivered constantly over the 7 days. Told him this does not mean Butrans is any more efficacious or safe than short-acting & he said he understands that. Discussed savings cards for commercial insurance patients. I asked if he has patients who he can see himself prescribing Butrans for & he said he does. He asked about use in hospice. I told him cost can be an issue but I have had physicians tell me they use it in hospice patients. He said he plans to prescribe. Discussed OxyContin 7 tablet strengths, including intermediate doses. He said he forgets about those. Also discussed savings cards & went over them with nurses.
PPLPMDL0020000001	Akron	OH	44310	8/16/2011	I asked Dr Cremer how often patients are calling in complaining about their current SA therapy? How often are they asking for more of it? He said patients are calling in often complaining of both. I asked if he would feel comfortable initiating therapy to those patients and he agreed he would/
PPLPMDL0020000001	Cleveland	OH	44104	8/16/2011	talked to Wanda,Receptionist,who said Dr.Barry is NOT doing lunches with rep's this year,i can leave info on our products and if the dr wants to meet with me she'll call me.left Butrans fpi,web cast invitations,initiation guide and patient info booklet with my business card.<font color=blue><b>CHUDAKOB's query on 08/26/2011</b></font>Amy, a non-HCP call is only on a health care professional such as a nurse, or an MA. A receptionist is not considered a health care professional and therefore should not be entered as a call. Thank you for checking out Dr. Barry as we discussed.<font color=green><b>BROOKAM's response on 08/29/2011</b></font>oh okay thanks i thought they were included for whatever reason, thanks for pointing that out.<font color=blue><b>CHUDAKOB added notes on 08/30/2011</b></font>Thank you!
PPLPMDL0020000001	Cleveland	OH	44195	8/16/2011	left dinner program invitations for Butrans dinner tonight for Dr.Calabrese,Dr.Long,Dr.Chatterjee,Patty Paccos and Betsy Kirschner,NP-rheumatology dept,left invites for Dr.Davis,Dr.Budd,Dr.Pelley-Oncology dept, left invitations for Dr.Kriegler,Dr.Mays,Dr.Spears and Dr.Stillman-Neurology dept - all for Butrans dinner program tonight
PPLPMDL0020000001	Cuyahoga Falls	OH	44223	8/16/2011	I asked Dr. Crawford his thoughts on Butrans therapy and how he felt about the molecule Buprenorphine. He said he liked the idea of this medication and felt comfortable with the molecule. I asked if there was anything more he felt like he needed to know before prescribing for the first time and he said no and that he would keep it in mind.
PPLPMDL0020000001	Richmond Heights	OH	44143	8/16/2011	SPoke to Mel about the stocking and movement of butrans. He confirmed "both" strengths. He has a patient (medicaid) that got it for about \$4(supplemental) insurance. I explained the savings card program and the patient info guide. He wanted savigns cards. I explained the positioning of butrans and the indication. Reviewed the formulary grid.
PPLPMDL0020000001	Cuyahoga Falls	OH	44221	8/16/2011	I asked Dr. DiLauro about the success patients were having with Butrans and she said she felt patients were having success for the most part. She said that based on the success rate with Butrans she would feel confident continuing to prescribe for opioid experienced patients. I reminded her that Butrans had also been studies in opioid na rive patients.
PPLPMDL0020000001	Cuyahoga Falls	OH	44221	8/16/2011	I asked Dr. DiLauro if she felt there was truly a place for Butrans in her practice. She said she thought there was a place for it but still did not feel entirely comfortable prescribing it. I asked what more she felt like she needed to know before prescribing it and she said she would review the FPI.
PPLPMDL0020000001	Parma	OH	44134	8/16/2011	I asked Dr Hernandez what a typical patient is already on when they come see him for the first time. He said it depends on the patient & can range anywhere between Tylenol or Advil to Vicodin, Percocet, & OxyContin. I reminded him how he had told me that he usually thinks of Butrans for patients who say their pain is a 3-4 on the pain scale. He said this is correct. I asked him if he asks each patient that question on every visit & he said yes. He said he finds Butrans to be effective in the patients who he has chosen for it so far, so that has been his criteria. He said he plans to continue doing so & also said he will continue to prescribe OxyContin for patients in low doses, like the 15mg, which he said he likes to use.
PPLPMDL0020000001	Westlake	OH	44145	8/16/2011	I asked Dr to come to tonight's dinner program, he said he will probably not make it since he is fasting. Kelly told him that he should try to go to more events in order to network with Drs. He said maybe next month would be better but not a Wed night. I asked if I can do anything to help support Butrans on formulary, he said they are all set and he will keep me posted. He said the couple of patients he has on Butrans are doing well and he will continue to prescribe.
PPLPMDL0020000001	Lakewood	OH	44107	8/16/2011	I tried to get commitment from Dr to come to tonight's Butrans program, he will not be able to make it this time. We discussed Butrans as an option instead of vicodin for patients that have pain conditions in the inclusion criteria. He agreed to give it a try. He had not heard anything from the patient he prescribed for. Reminder that OxyContin is an option when Butrans may not provide adequate analgesia.
PPLPMDL0020000001	Cleveland	OH	44143	8/16/2011	Showed doc the Butrans demo patch and reminded him of our lunch 2 weeks ago. He immediately said he wrote a couple of scripts. No time to ask him more. Spoke to Angela who was not aware of any scripts written. I reviewed the formulary coverage and the positioning. Gave her e-detail and formulary grid.
PPLPMDL0020000001	Lakewood	OH	44107	8/16/2011	I asked Dr how his current patients are doing on Butrans and if he is happy with it, he said he thinks he still has a few patients on it. He said to ask Pat, she had stepped out. I asked if he would continue to try Butrans instead of increasing the dose of short acting and he agreed. Asked Dr to come to tonight's program and he will think about it. Reminder that OxyContin is still a long acting option.
PPLPMDL0020000001	Cuyahoga Falls	OH	44223	8/16/2011	I asked Dr. Pitt if he would feel confident initiating Butrans therapy instead of low dose hydrocodone for patients with the right type of managed care and he agreed he would.
PPLPMDL0020000001	Cleveland	OH	44106	8/16/2011	worked pain management dept-see call notes on sahjal and hayek, worked family medicine dept-left Butrans dinner invitation for 8/16th and webcasts for dr marsh and dr truaxx
PPLPMDL0020000001	Brooklyn	OH	44130	8/16/2011	Spoke briefly with Renee* (pharmacist) & her technician Nicole. Renee* said they have not seen any increase in Butrans activity, but do have a few customers on it regularly. She said she has seen one or two prescriptions that have been for Medicaid or Medicare that have not gone through, however. Reminded her of insurance coverage & savings for Butrans & OxyContin. She said she would let me know if she sees any changes with Butrans between now & my next visit.
PPLPMDL0020000001					

	Cleveland	OH	44113	8/16/2011	talked to dr about patients he's considering appropriate for Butrans,dr said patients he's started on Butrans have been taking 40mg vicodin/daily and not controlled and wanting something else so he's only tried Butrans there.showed dr Butrans visual aid,pg.11,pain conditions and asked dr if he see's some of these pain conditions? dr said he see's them all and treats with appropriate medications for each pain condition,such as osteoarthritis he would prescribe an arthritis medication,low back pain he would prescribe muscle relaxers,request patients go to physical therapy,etc.dr said when patients come to him majority of time they have already tried tramadol or other narcotics.i asked dr if patients come to him with osteoarthritis and have tried tramadol and thats not controlled pain,will he consider starting these patients on Butrans? dr said he would if patients were willing to wear a patch once a week.dr said he thinks Butrans should be used earlier in therapy so he'll consider that option.asked dr to focus on BWC and commercial insurance patients and patient savings cards.
PPLPMDL0020000001	Cleveland	OH	44106	8/16/2011	showed dr butrans visual aid,pg.11 pain conditions and asked dr how he treats these specific types of pain conditions,dr focused discussion on osteoarthritis patients and said he would give arthritis medications,send patients to physical therapy,NSAID's,etc and when that doesn't work and patients have persistent chronic pain he will prescribe an opioid. dr said in past he would have given patients a short-acting opioid analgesic but now with Butrans he will consider it an option for patients earlier in therapy.i asked dr to think of patients like this that are taking tramadol every day and instead of refilling tramadol or converting to another short-acting opioid,to start them on Butrans? dr said he will consider that option,we talked about how he explains butrans to patients and dr said he thinks its easy to sell patients on Butrans with once weekly dosing option,we talked about insurance coverage and i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44113	8/16/2011	i talked to dr about 5 core selling messages,dr focused on Butrans being transdermal and once weekly dosing option,dr said she is finding it easy to explain to patients and patients are getting their pain controlled with Butrans.dr said she still gives short-acting opioids,but less monthly.showed dr butrans visual aid for discussion,then discussed pg.11,pain conditions and asked dr how she treats patients with spinal stenosis,dr said she will explore all non-opioid therapies(injections,acupuncture,physical therapy,NSAIDS) and when all other options fail and patients have pain,she'll consider an opioid like tramadol since its short-acting and she'll give patients 1-2 pills daily,thats it.i asked dr how she handles the situation when these patients arent controlled on 1-2 pills? dr said at that point she'll give tramadol more frequently to patients and if need be convert them to vicodin.5mg.i asked dr to not convert those patients to vicodin and start them on Butrans.dr said she might consider it after tramadol,but she's not comfortable starting patients out on a long-acting opioid.we discussed formulary coverage for BWC and commercial insurance and patient savings cards.i recommended Senokot-S<font color=blue><b>CHUDAKOB's query on 08/26/2011</b></font>isut a thought..if she is starting patients on tramadol, she is not starting patients on a long-acting opioid with Butrans. They have already been on an opioid in tramadol. Perhaps she doesn't realize this?<font color=green><b>BROOKAM's response on 08/29/2011</b></font>she does but thanks for comment-<font color=blue><b>CHUDAKOB added notes on 08/30/2011</b></font>-Ok.
PPLPMDL0020000001	Cleveland	OH	44114	8/16/2011	confirmed dr attending dinner program tonight for Butrans discussion,dr said he's continuing to think of patients that would be appropriate for Butrans,i asked dr to tell me who those patients were,dr said patients on percocet or vicodin telling him their pills arent controlling their pain,he's talking to them about Butrans.i showed dr butrans visual aid,5 core selling messages and asked dr what really stood out to him about Butrans? dr said once weekly dosing and the fact Butrans is a patch,he likes these features and being a CIIl it makes it easier for him and his staff to call in refills.i asked dr to start a few more patients this week,with BWC or commercial insurance,that perhaps have chronic low back pain and are taking short-acting opioids daily but not controlled,dr said he will do that as a lot of their patients have chronic low back pain.i recommended Senokot-S
PPLPMDL0020000001	Cuyahoga Falls	OH	44223	8/16/2011	i explained the message i had been focusing on in the field with my physicians and the ideal Butrans patient type utilizing the initiation and titration guide. I asked about movement and they said there had been a little but none recently.
PPLPMDL0020000001	Cuyahoga Falls	OH	44221	8/16/2011	i explained the message i had been focusing on in the field with my physicians and the ideal Butrans patient type utilizing the initiation and titration guide. I asked about movement and they said there had been a little but none recently.
PPLPMDL0020000001	Parma	OH	44134	8/16/2011	Spoke with James (pharmacy manager) & discussed patient information booklets. Let him know he could use it in patient counsel or give it to customers if they have questions. He said he would have to dispense it before a customer would have any questions about it. He said he has only dispensed one script. I asked if he knew who wrote it but he said he did not remember & it had been awhile ago. Discussed OxyContin savings cards as well. He said he already has most of his customers who are on it set up with savings cards, so he has not given many out lately & did not need more. He said he had no more time to talk today.
PPLPMDL0020000001	Euclid	OH	44117	8/16/2011	I asked doc what he remembers about butrans. He said that he wrote one script and the script was not covered by workers comp. He said the patient was an RTA employee who was previously on about 3 tabs of vicodin. I explained the state BWC coverage for most scripts and asked him to continue to try to prescribe. I explained the initiation dosing and that 10mcg might be appropriate for those currently taking 3 tabs of vicodin. P0stion butrans after tramadol but before vicodin ATC. If they are taking higher doses of vicodin, they may be more appropriate for Oxycontin.
PPLPMDL0020000001	Parma	OH	44134	8/16/2011	Spoke with Judy (technician) who said Marko was not available as he was busy with customers. Discussed Butrans patient type & savings program via e-voucher. Also went over OxyContin savings cards & eligibility requirements for savings programs. I asked her to give Marko Butrans information & she agreed to do this. She said to stop back another time to see Marko as he may have more information for me than she does.
PPLPMDL0020000001	Woodmere	OH	44122	8/17/2011	Spoke with pharmacist, Angie, & discussed Butrans appropriate patient type. I asked her if any practitioners in the area come to mind as having a lot of patients who seemed to fit the indication. She said no one in particular. I asked about the managed care mix that she sees at this location. She said it is probably an equal mix of Medicare, Medicaid, & commercial plans. Discussed savings for Butrans & OxyContin.
PPLPMDL0020000001	Hudson	OH	44236	8/17/2011	Spoke with Cherie (technician). She said she does not think they have dispensed any Butrans at all. Discussed Butrans appropriate patient type (including those who try to refill their prescription too soon for Vicodin or tramadol). She said they have many customers who fit that description. She also said that Beth will, on occasion, call a doctor & make a recommendation for them to consider changing the patient's medication. She said she will ask Beth to do this for patients for Butrans when she identifies those customers. Also discussed OxyContin savings cards which Cherie said they have enough of.
PPLPMDL0020000001	Hudson	OH	44236	8/17/2011	Spoke with technician & discussed Butrans E-Detail program. Also gave her Butrans overview (indication, dosing, delivery system, & appropriate patient type). She said she would give the information to Dr MacCallum. She said they still only accept literature & have a no access policy for reps, even if they have a product that was recently launched.
PPLPMDL0020000001	Cleveland	OH	44113	8/17/2011	followed up with dr,post 8/16th Butrans dinner program to get dr thoughts and dr said he really enjoyed the discussion and liked the speaker.dr said he started 1 patient on Butrans recently because the patient was taking tramadol daily for chronic pain and uncontrolled and he thought he would give Butrans another try,told dr that was great,we discussed appropriate patients to start on Butrans,showed butrans visual aid,and initiation of butrans.told dr to focus on BWC and commercial patients,dr said ok.
PPLPMDL0020000001	Hudson	OH	44236	8/17/2011	Spoke with MA Melissa & reminded her of Butrans indication, dosing, & delivery system. Also spent time going over appropriate patient type. She said she does not understand why Dr Seiple hasn't used more of it as it sounded like something he would prescribe. Discussed CII & abuse/addiction potential. She asked if it has liquid in it like fentanyl patches. Discussed adhesive matrix. I asked her to give Dr Seiple Butrans information, including REMS packet & she agreed to remind him of Butrans & give him the information.
PPLPMDL0020000001	Independence	OH	44131	8/17/2011	Spoke with Kathy (office manager) & Marie (MA) & reviewed Butrans indication, dosing, & appropriate patient type in effort to get a lunch or appointment. Kathy said they "do not do a lot with pain". I let her know that it may be helpful for them to at least learn about the product in case one of their patients comes to them already on it from another prescriber. Kathy said she asked Dr Sustersic & he said he is not interested in hearing anything about it. I asked Kathy to keep my card & to call me if they should have any questions about Butrans down the road.
PPLPMDL0020000001	Hudson	OH	44236	8/17/2011	Spoke with Kathy (MA) & inquired about savings card inventory for Butrans & OxyContin. She said they have not used any of either yet, so they did not need any. She added that she does not know why they haven't started using Butrans & asked me if it was for pain. Discussed indication, appropriate patient type (including those who call too soon for refills or say their short-acting is wearing off too quickly), CII, & abuse/addiction potential. Also discussed once weekly dosing & transdermal system. She said it sounds like a good option for a lot of their patients & that she is going to start mentioning it to Dr Tosino when she identifies a good patient for it.
PPLPMDL0020000001	Akron	OH	44304	8/17/2011	I asked Dr. Amamanbu his thoughts on Butrans therapy and how he felt about the molecule Buprenorphine. He said he liked the idea of this medication and felt comfortable with the molecule. I asked if there was anything more he felt like he needed to know before prescribing for the first time and he said no and that he would keep it in mind.
PPLPMDL0020000001	University Hts	OH	44118	8/17/2011	Quick call.....I reviewed the Butrans indication, CII status and once weekly dosing. I asked him if he has any patients that could benefit from butrans. He said maybe and asked me to just leave some information. Provided the e-detail invite.
PPLPMDL0020000001	Hudson	OH	44236	8/17/2011	Spoke with Bob who said that the patient who was using one Butrans 5mcg + one 10mcg system is now on the 20mcg strength. He said it was just called in a few days ago. He would not tell me who prescribed. I reminded him that we do not recommend wearing more than one system at a time. He said he knows, but that doctors don't always follow those guidelines. He said that is the only customer they have on Butrans at this time. Discussed OxyContin savings cards which he said he has enough of. I asked if he stocks all 7 strengths, including intermediate & he said he does.
PPLPMDL0020000001	Cleveland	OH	44114	8/17/2011	talked to Laura about butrans stocking and she's not seen any scripts for butrans so still not ordering the product.we discussed importance of stocking but laura said i know how she feels about this topic as we've discussed many times.i asked Laura if she provides patient counseling,when they are taking opioids for chronic pain and Laura said sometimes she does,i asked Laura to give patients Butrans patient information booklet and have patients discuss with dr,she said ok she would do that.i told Laura i would follow-up next month.i recommended Senokot-S
PPLPMDL0020000001	Fairlawn	OH	44333	8/17/2011	I asked the physician if he felt there was truly a place for Butrans in his practice and if he could see himself prescribing Butrans moving forward. He said yes. No new info learned.
PPLPMDL0020000001	Parma	OH	44129	8/17/2011	Dr Giogliotti said the patient he had prescribed Butrans for has not been in or called to give feedback on how she is doing so far. I asked him if he considers that good or bad. He said it must be good because he knows this patient would have called if she was not happy with the way she was doing. He checked his computer & said the patient is actually scheduled to come in this afternoon for a follow-up, so he will have an update for me the next time I come by. I asked if this meant he would continue to look for more patients to gain more clinical experience. He said yes & showed me that his initiation guide is still out on top all his magazines & paperwork so that he has it ready to go. I told him about the Initiations program & encouraged him to go through it with me. He said there was not time now. I gave him an invite for E-Detail & encouraged him to log on at his leisure. He said he I asked Dr about the types of patients that he has started on Butrans, he said that most of them are already taking vicodin. We reviewed the initiations presentation and the initiation guide. I asked if he see these types of patients in his practice and he said he does. He said overall he is having success with Butrans. He did just start a new patient on Butrans who is BWC. Another patients he wanted to try was 85 years old and on Medicare so he decided not to give her Butrans after all. We reviewed that OxyContin is an option for patients when Butrans may not provide adequate analgesia.<font color=blue><b>CHUDAKOB's query on 08/26/2011</b></font>-What was the AE? You should include these in your call notes and how you responded to them.<font color=green><b>HOLUBA's response on 08/30/2011</b></font>He said he had a female patient who became unresponsive and went to the ER who was on butrans.<font color=blue><b>CHUDAKOB added notes on 09/01/2011</b></font>-OK. Thank you for the clarification.
PPLPMDL0020000001	Fairlawn	OH	44333	8/17/2011	I asked Dr. Parisi about the success patients were having with Butrans and he said he felt patients were having success for the most part. He said he based on the success rate with Butrans he would feel confident continuing to prescribe for opioid experienced patients. I reminded him that Butrans had also been studies in opioid na. rve patients.
PPLPMDL0020000001	CLEVELAND	OH	44195	8/17/2011	talked to Jodi,Medical secretary,to dr,who said i can leave my business card and product information and if dr is interested in meeting with me,he'll contact me.i left Butrans fpi,initiation guide,patient information booklet,formulary grid and webcasts for August 2011,left OxyContin fpi,conversion guide and formulary grid for dr.
PPLPMDL0020000001	University Heights	OH	44121	8/17/2011	Quick call...I showed doc the Butrans demo and asked him what he remembers about it. He said that Its butrans, the 7 day patch. I asked him try butrans before starting a patient on vicodin ATC. Oxycontin reminder. Nothing more learned.
PPLPMDL0020000001	Cleveland	OH	44113	8/17/2011	dr said she hasnt started any patients yet on Butrans as the couple she wanted to start are Medicaid and they couldnt get Butrans covered,so we talked about dr focusing on BWC and commercial plan patients.dr said she will do that.showed dr Butrans visual aid,discussed 5 core selling messages and asked dr what really stood out to her about Butrans? dr said transdermal technology and once weekly dosing option.dr said she will start some patients on Butrans,just depends on insurance coverage.i showed dr pg.11,pain conditions and asked how she treats these types of conditions? dr focused on chronic low back pain and we talked about what therapies,non-opioid,she follows and when she needs opioids she'll go to tramadol and then vicodin.i asked dr to think of a couple patients with chronic low back pain,taking tramadol daily but not controlled,that she can start on Butrans instead of refilling tramadol or converting to vicodin,dr said she'll consider that.i recommended Senokot-S

PPLPMDL0020000001	Cleveland	OH	44114	8/17/2011	talked to dr about his thoughts/feedback on Butrans dinner program 8/16th and dr said he liked dr cheven,speaker,but was very surprised when dr cheven told him he doesnt have any clinical experience with butrans as he closed his practice and isnt seeing any patients now.dr said he will continue starting patients on Butrans as he thinks its easy for patients with once weekly dosing and its a CII so its easy to call it in for refills.showed dr pg.11,pain conditions and discussed patients with chronic low back pain and how he treats this condition.i asked dr if he would consider Butrans 5mcg before starting patients on tramadol? dr said he might if patients were willing to wear a patch for once a week and he would probably give tramadol for break through pain.showed dr butrans initiation guide and asked him to start a couple patients,as we discussed,on butrans instead of starting them on tramadol.dr said ok focused on BWC and commercial plan patients and i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44104	8/17/2011	talked to dr about pg.11,butrans visual aid,pain conditions,dr talked about patients with chronic low back pain.dr said she treats them with muscle relaxers,sends to physical therapy and most patients tend to do well and are controlled on tramadol or vicodin as they dont need to take it daily,dr said she doesnt have a lot of chronic pain patients taking short-acting opioids daily.i asked dr if she had a couple patients taking tramadol every day,for chronic low back pain? dr said yes she's sure she does.i asked dr to stop refilling the tramadol or converting these patients to vicodin,and start Butrans.dr said she will consider it and asked about insurance coverage for medicaid as thats majority of patients here.told dr to focus on commercial patients dr said ok.i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44114	8/17/2011	talked to dr about dinner program,8/16th with dr cheven and dr said she liked dr cheven as a person but was really surprised to hear him say that he has no clinical experience with Butrans. dr said she wondered WHY Purdue would have a speaker like dr cheven giving talks on butrans when he hasnt even prescribed the medication to any patients.i told dr i wasnt sure about that and would share this feedback with my manager.i asked dr if she will do anything differently post the program,dr said she will continue to start patients on Butrans and is thinking earlier in therapy for patients instead of waiting so long.we talked about butrans patient information booklet and focusing discussion on application/rotation and dr said she does discuss this with patients,i asked dr if she could focus on a couple patients this week that she could start on butrans instead of refilling vicodin? dr said she will do that.i recommended Senokot-S
PPLPMDL0020000001	Akron	OH	44320	8/17/2011	I asked Misty if she had been initiating Butrans therapy to patients failing or asking to be titrated on their current therapy like we had previously talked about. She said that she was keeping it in mind for those patients and would continue to do so. I reminded her that Butrans was 7 days.
PPLPMDL0020000001	Copley	OH	44321	8/17/2011	Dr. Machado said that head prescribed Butrans for a few patients and was pleased that he had not heard back from them. I explained steady state takes 72 hours to achieve and told him if he had call backs prior to that to encourage patients to remain on therapy. He asked about titration which I explained using the initiation guide.
PPLPMDL0020000001	Cleveland	OH	44195	8/17/2011	was able to meet dr briefly,introduce myself as Purdue rep,gave Butrans fpi,initiation guide and Butrans patient information booklet to dr as he said he didnt have time to talk longer today but would review the materials and i could follow-up next week.i shared the 5 Butrans core selling messages with dr and formulary coverage information showing grid.dr said we could talk more another time.i told dr i would follow-up next week and appreciated his time.told dr that OxyContin was still an option for patients,gave OxyContin fpi,conversion guide and formulary grid. recommended Senokot-S for opioid induced constipation
PPLPMDL0020000001	Bedford	OH	44146	8/17/2011	Dr Moufawad said that he is still trying patients on Butrans & has not given up. I asked what was really holding him back. He said that his encounter with the Pharmacy Board really is what his issue has been. I asked him if it was the Medical Board or Pharmacy Board. He said they "run together", but the Pharmacy Board really. I asked him if, going forward, this would continue to hinder his prescribing of Butrans. I added that my goal was to ensure that he was confident in prescribing Butrans & to work with him to make this happen. I asked him if he attended the webcast. He said yes. I asked him his thoughts on it. He said it was "OK", but was not as helpful as he wanted it to be. I asked what he meant. He said when he or any other physician would ask a question, the speaker, who he said was just reading a script, would say it was off-label & that he could not answer the questions. I told Dr Moufawad that it is our policy to have conversations, whether they be in an office or at a program, always be on-label. I encouraged him to phone other physicians or specialists who he respects to speak with them to find out their experience with Butrans. He said he has no time. I let him know about upcoming dinner programs, but added that this discussion will also be on-label. He said he may go depending on when they are. Started Initiations, but he said he had to go to a staff meeting & could not continue.
PPLPMDL0020000001	Cleveland	OH	44114	8/17/2011	talked to john,pa,about his feedback post Butrans dinner program 8/16th,john said he liked the speaker dr cheven,smart man and has years of clinical experience in pain management/oncology but was very suprised to hear that he doesnt have any clinical experience with Butrans,john said he's recommending Butrans to both dr katz and dr marshall and thinks its easy to get patients started on butrans if you tell them its once weekly dosing and its a patch.we talked about BWC and commercial plan patients starting on Butrans.i recommended Senokot-S
PPLPMDL0020000001	Bedford	OH	44146	8/17/2011	Spoke with Mikah (technician) who said Shay had just come in & was too busy to see me today. Presented patient information guide & discussed using it in patient counsel or giving it to customers if they have a prescription for Butrans. Also reviewed Butrans indication, dosing & delivery system. Mikah said she would give this information with my card to Shay.
PPLPMDL0020000001	Warrensville Heights	OH	44122	8/17/2011	Quick call- Caught Dr Zivic up front briefly. Positioned Butrans for patients on chronic Vicodin or tramadol who are not well-controlled. He said he would try to remember. Spoke with Stephanie & Michelle (MA) & went over savings & managed care. They said they are in the process of computer training, so their time & Dr Zivic's time were limited.
PPLPMDL0020000001	Maple Heights	OH	44137	8/18/2011	Spoke with MA Arlene & reviewed Butrans appropriate patient type. Also discussed commercial insurance coverage & savings cards for those patients. I told her about the online E-Detail program & asked her to give Dr Yager the invitation. She agreed to do this. I also told her about OxyContin savings cards but she said he does not prescribe OxyContin for anyone.
PPLPMDL0020000001	Westlake	OH	44145	8/18/2011	Quick call today, I asked Dr if he has patients coming in today who would benefit from 7 day Butrans. He said he will see and agreed to start any new appropriate patients.
PPLPMDL0020000001	Brooklyn	OH	44144	8/18/2011	Spoke with Matthew (pharmacist) & discussed Butrans patient information booklets. He said he has really only had seen one or maybe two prescriptions for it so far. I asked if either had refills or if they were just one month prescriptions. He said he doesn't think he has seen anything for refills. Discussed CII & appropriate patient type. He said they are stocked on all 3 strengths & asked me to tell physicians they have it. I told him they were on the list of pharmacies that I tell physicians stock Butrans. Offered OxyContin savings cards but he said they have some still as most of their customers on it have Medicare, Medicaid, or Worker's Comp.
PPLPMDL0020000001	Barberton	OH	44203	8/18/2011	I asked Dr. Patel what he felt the biggest benefit of Butrans was for his patients. He said he liked the fact that it delivered the medication for 7 days and that it was a schedule 3. He said he would keep it in mind for appropriate patients.
PPLPMDL0020000001	Solon	OH	44139	8/18/2011	I asked Dr Zaidi what is really holding him back from prescribing Butrans. He said he just has not seen the right patient. I asked him what he meant by that. He said that when patients come to him, they are not only already on a high dose of opioids already, but they are on multiple opioids at high doses. He said for example, some patients have come to him on OxyContin 80mg 3x per day with 6 Percocet per day for breakthrough. I reminded him that OxyContin is only approved for q12h dosing & asked what he usually does with these patients. He said he tells them that he will not continue them on that high a dose & then decreases them to what he finds to be a more "reasonable" level. He went on to say that for Butrans, he wants a patient who is taking perhaps a few Vicodin per day or maybe a few Percocet, but he simply does not have patients come in like that very frequently. I told him it did sound like he has the right idea of who the appropriate patient for Butrans might be. He said he really does not have any clinical issues with it all, it is just a matter of someone in more "moderate" than severe pain coming to him. Discussed OxyContin savings cards. He said he would like to give one to a patient who he writes 14 days of treatment at a time, so that patient would be especially grateful.
PPLPMDL0020000001	Independence	OH	44131	8/18/2011	Spoke with Natalie (MA) who said Dr Faيمان had too busy an afternoon to see me today. I asked if it would be possible to schedule a lunch. She said she would give my card & information to Dr Faيمان to request it, although she said they rarely do them. She also suggested I go to the 7th floor to submit a request with administration as well. (They were closed for the day). Discussed Butrans E-Detail program & gave her an invite to pass along to Dr Faيمان. Also discussed appropriate patient type for Butrans as she did not know what it is. She said she would leave the information for Dr Faيمان.
PPLPMDL0020000001	Brooklyn	OH	44144	8/18/2011	Spoke with pharmacy manager, Dave, who said he has not seen any more Butrans activity since my last visit. I asked if the prescription he had filled had refills on it. He said he did not remember. Discussed CII & abuse/addiction potential & spent time reviewing appropriate patient type. He asked what to advise a patient if they say the patch is coming off or loosening. I told him they could tape the edges with first aid tape or cover with Bioclusive or Tegaderm. Also discussed heat warning & advising patients of that as well. Dave said he is surprised he has not seen more activity for it. Also checked stock of their OxyContin savings cards & Dave said he has plenty for now as he has not used any since my last visit.
PPLPMDL0020000001	Independence	OH	44131	8/18/2011	Quick call- Dr Jack said he is still "thinking of" Butrans. He added that he would prescribe it "soon". I gave him an E-Detail invite & asked him to check it out online just to see what he thought of it & if it taught him anything surprising. He said he would have a look.
PPLPMDL0020000001	Mayfield Heights	OH	44124	8/18/2011	Window call....Reminded Debbie of the appropriate butrans patient - after tramadol or before going to short acting ATC. Gave her an e-detail invite and formulary grid reminder.
PPLPMDL0020000001	Westlake	OH	44145	8/18/2011	I asked Dr if he has been having success getting Butrans through for commercial insurance patients. He said he hasn't started many new patients, since it seems so many of his chronic pain patients are Med D and Medicaid. I reviewed managed care for Butrans and asked if he would continue to prescribe for appropriate commercial patients, he said that the would. at that OxyContin is an option that is covered on Medicaid.
PPLPMDL0020000001	Mayfield Heights	OH	44124	8/18/2011	window call....i asked doc if she is still having success with butrans. She said its going well and has not really had any complaints. I asked her if she still has savings cards. She told me to check with Denise. Spoke with Denise and confirmed that they are stocked. Provided e-detail invite and formulary.
PPLPMDL0020000001	Westlake	OH	44145	8/18/2011	Quick call, Dr just returned from Canada, I reviewed the key messages for Butrans and asked if he can think of any patients who might benefit from 7 day dosing. He said he will try to find a few patients, I reminded him to focus on commercial insurance for Butrans and that OxyContin is an option covered on Medicaid.
PPLPMDL0020000001	Cleveland	OH	44130	8/18/2011	Quick call- Dr Fedorko said he really had no time today. Positioned Butrans for patients who are not well-controlled on their short-acting around-the-clock opioid regimen. He said he does not have a lot of patients but will try to find some.Spoke with Mindy (MA) & Maryanne (MA) & discussed managed care status for Butrans & Ryzolt.
PPLPMDL0020000001	Cleveland Heights	OH	44118	8/18/2011	Showed doc the Butrans demo patch and reminded him of the 7 day delivery and how to properly apply the patch. Dr. Grant came in and said he wrote 2 scripts for butrans but it was not covered. I asked if he remembered if it was medicare/medicaid because Butrans is covered on most commercial plans. He could not recall. I explained the positioning of butrans to both docs and asked them to try butrans for patients that have insurance through work - either through their employer or BWC and remember to give them a savings card. Provided formulary reminder for butrans and oxycontin.
PPLPMDL0020000001	Cleveland Hts	OH	44118	8/18/2011	Showed doc the Butrans demo patch and reminded him of the 7 day delivery and how to properly apply the patch. Dr. Grant came in and said he wrote 2 scripts for butrans but it was not covered. I asked if he remembered if it was medicare/medicaid because Butrans is covered on most commercial plans. He could not recall. I explained the positioning of butrans to both docs and asked them to try butrans for patients that have insurance through work - either through their employer or BWC and remember to give them a savings card. Provided formulary reminder for butrans and oxycontin.
PPLPMDL0020000001	Parma	OH	44134	8/18/2011	Quick call- Stopped Dr Mandat in the hallway with Butrans savings cards. I told him I did not see his stock of cards & asked if he thought I should leave more. He said that while most of what he does with Butrans is in his hospice pateints, he may be able to use "a few" in the office. He then walked into a patient room. Spoke with Rebecca (nurse) & discussed Butrans savings cards & managed care coverage.
PPLPMDL0020000001	Cleveland	OH	44109	8/18/2011	worked oncology dept - left my business card,Butrans fpi,initiation guide,formulary grid and patient information booklet for Dr.Snell,Dr Hergenroeder,Dr.Tray and Dr.O'Brien and also left OxyContin fpi,conversion guides and formulary grids for doctors-had to leave all materials with medical secretaries and they show doctors and doctors decide if they want to meet with me.
PPLPMDL0020000001	Barberton	OH	44203	8/18/2011	I asked Dr. Minich if she felt there was truly a place for Butrans in her practice. She said she thought there was a place for it but still did not feel entirely comfortable prescribing it. I asked what more she felt like she needed to know before prescribing it and she said she would review the FPI.
PPLPMDL0020000001	Lyndhurst	OH	44124	8/18/2011	Quick call.....just asked doc how her current patients are doing on Butrans. She said everything is ok and she is still looking for more patients that are right for it. She was still good on savings cards. Reminded her of the formulary coverage of butrans and oxycontin.
PPLPMDL0020000001	Highland Heights	OH	44143	8/18/2011	Window call.....I reminded him of the butrans patients and asked if he needed savings cards. He said he still had Butrans and oxycontin savngs cards. I gave him patient information guides and explained how it teaches proper application and care for Butrans.

PPLPMDL0020000001	Cleveland	OH	44113	8/18/2011	dr said he started a few patients on Butrans and they seem to be doing well as their pain is controlled and he's giving them short-acting opioids for breakthrough.dr said he had 2 patients this am that he spoke to about Butrans but they are taking their pills and didnt want to stop them.asked dr how is he explaining Butrans to patients? dr said he tells them its a patch and you put it on once a week.dr said its hard as many patients like their pills,even if he started them on Butrans and gave short-acting opioids for breakthrough,they still like the thought of more pills.dr said he needs a sensible patient for Butrans.i asked dr if his chronic pain patients,which are the majority of his practice are "sensible" that he could talk to about Butrans? dr laughed and said you make a good point,probably none of them are "sensible".i told dr to think of patients with chronic low back pain,showed pg.11 visual aid,that arent getting pain controlled with short-acting opioids,to start them on Butrans and still give short-acting for breakthrough pain.dr said he will do that and is looking every day at his patients coming into office to see who's a candidate for Butrans.told dr to focus on BWC patients.
PPLPMDL0020000001	Cleveland	OH	44105	8/18/2011	talked to dr about patients with chronic low back pain,pg.11 pain conditions we discussed in Butrans visual aid,we talked about how dr treats this pain condition and at what point she will go to an opioid.dr said all non-opioid therapy choices are 1st,example is muscle relaxers,physical therapy,etc.,then if that doesnt work for patients and they have pain,dr will start them on tramadol.we talked about Butrans being an option right before she goes to tramadol,so opioid naive patients and right after patients take 1st tramadol dose and thats not controlling pain anymore,i asked dr if she had a couple patients,per our discussion,that she could start on Butrans instead of giving tramadol or increasing dose of tramadol? dr said yes she'll think of a few patients as she likes that Butrans is a patch and dosed once a week.told dr to focus on BWC and commercial patients.recommended Senokot-S talked to Abdul,Pharmacist,about Butrans stocking and Abdul hasnt ordered Butrans yet as he's waiting for 1st script of Butrans.we discussed importance of Butrans stocking but Abdul said he cant order it until he see's 1st script otherwise it'll just sit on shelf like it has at Church Square Pharmacy(he is part owner of this pharmacy too).showed Abdul Butrans 5 core selling messages and asked what really stood out to him about Butrans? Abdul said he likes that Butrans is a patch,dosed once a week and is a CIII so doctors can call in refills he thinks doctors will really like that. i asked Abdul to recommend Butrans to patients that are taking short-acting opioids but not controlled and give them butrans patient info booklet,Abdul agreed to do this.we discussed BWC and commercial plan patients.we discussed OxyContin stocking and formulary coverage for OxyContin.
PPLPMDL0020000001	Cleveland	OH	44109	8/18/2011	talked to Nasr,pharmacist,about Butrans 5 core selling messages and asked if he has recommended Butrans to any patients? Nasr said he gave Butrans patient info booklet to a few patients after they were saying their short-acting opioids werent controlling their pain.No scripts for butrans yet.i asked Nasr to continue recommending Butrans to patients and focus on application/rotation of butrans if patients come in with scripts.Nasr said ok.asked Nasr if he has any relationships with doctors where he would recommend Butrans to patients,if he hears them say their short-acting opioids arent controlling pain,Nasr said a couple doctors he could talk to about Butrans but not many its up to the doctor to make medication changes. discussed BWC and commercial plan patients.
PPLPMDL0020000001	Cleveland	OH	44130	8/18/2011	I asked Dr Diab when he has a patient who's pain is not controlled on a short-acting around-the-clock opioid, how he determines whether he would increase the patient's dose of current opioid or change them to a long-acting option like Butrans or OxyContin. He said that in medicine there is no "black & white" & asked me what I was told in training. I told him that it seems to be completely physician-dependent & that each practitioner has his or her way of practicing. He said for him, it depends on the patient- for example, he said what other medications they are on, what comorbidities they may have, what dose they are on currently. I thanked him for teaching me more about how he practices. Also recommended Senokot-S for opioid-induced constipation.<font color=blue><b><b>CHUDAKOB added notes on 08/26/2011</b></b></font>Very good next call objective!!
PPLPMDL0020000001	Westlake	OH	44145	8/18/2011	I told Dr I know he's said in the past he just can't find the right patients for Butrans. I showed the inclusion criteria and asked if he sees these disease states. He said he does and that he will work on gaining experience with Butrans. He said he was concerned that the patch would not stick for 7 days and we discussed the proper application and what to do if it comes off or starts to come off. We reviewed the initiating guide and how to start a new patient. I asked for his commitment to start a patient this week and he agreed. Reminder that OxyContin is still an option when Butrans may not provide adequate analgesia.
PPLPMDL0020000001	Cleveland	OH	44111	8/18/2011	Spoke with John, He said that he has several patients on Butrans. Most of which come from Cleveland Drs. We discussed the importance of letting the patients know about steady state in three days. We discussed that patients may take short acting for supplemental analgesia. Reminder that OxyContin is an option when Butrans does not provide adequate analgesia.
PPLPMDL0020000001	Copley	OH	44321	8/18/2011	Dr. Heim said that he had initiated therapy to a Butrans patient but still felt unsure about how to identify a patient. I explained that the most ideal patients were those currently failing on their low dose SAO's and he agreed this would be an easy population to hone in on. I also covered managed care.
PPLPMDL0020000001	Independence	OH	44131	8/18/2011	Quick call- I asked Dr Rob if I could just ask him a question. He apologized & said he is really far behind & couldn't talk. I handed him an E-Detail invite & asked him to go online at his leisure to see if there was any information regarding Butrans that he didn't already know. I told him one never knows what they might learn from a few minutes on the computer. He said he would look at it if he had time.
PPLPMDL0020000001	Beachwood	OH	44122	8/19/2011	I asked Dr Yokiel what kind of challenges he faces when switching a patient from short-acting opioid to a long-acting option like OxyContin. He said converting their dose is not difficult & can be done with simple math, but discussing this change to some patients can be difficult. I asked him to clarify. He said some patients switch to long-acting & they like it because it is convenient for them to take fewer doses of medication, while others are convinced that something long-acting won't work as well since they don't have to take it as often. He said other patients feel like long-acting options don't work because they do not always get a "euphoria" from them like they would the short-acting. Discussed the importance of appropriate patient selection & abuse/addiction potential of opioids. He also said that it is largely the physician's job to educate the patient to get them to buy-in to the idea of a long-acting medication. I asked what happens if he starts switching a patient & they say the long-acting medication is not working- does he make them stick with it or does he change their medication. He said it depends, but he might try them on a different long-acting option. Discussed Butrans as a once-weekly transdermal option for patients in moderate to severe chronic pain, focusing on "moderate" & commercially insured
PPLPMDL0020000001	Beachwood	OH	44122	8/19/2011	Spoke with Chris (nurse) & discussed Butrans appropriate patient type, managed care coverage, & savings cards. Also reviewed OxyContin savings cards & discussed managed care. I asked Chris to give Jennifer Butrans information upon her return from vacation & she agreed to do this.
PPLPMDL0020000001	Cleveland	OH	44130	8/19/2011	Spoke with Lauren who said that she does not think they have seen any prescriptions at all for Butrans. Discussed appropriate patient type, including patients who are not well-controlled on their current short-acting around-the-clock therapy. Also went through patient information booklet & let her know she could either give it to a patient when they fill a prescription or she could use it in patient counsel. Discussed OxyContin savings cards but she said they are OK for now.
PPLPMDL0020000001	Cleveland	OH	44109	8/19/2011	followed up with dr on butrans dinner program 8/10/11,dr said he really enjoyed Butrans discussion and was happy to see dr platto as they worked together in PA years ago.dr said he started 2 patients on Butrans,no issues with insurance,i asked dr why he chose Butrans? dr said both patients tried all non-opioid therapies,which are his 1st choice for any pain condition and after trying tramadol and vicodin,patients pain wasnt controlled.dr told patients Butrans is a patch and apply once a week and rotate application sites.showed dr Butrans visual aid,discussed appropriate patients for dr to continue starting on Butrans and dr said he will be starting more patients.dr said he doesnt have a lot of patients on narcotics and isnt sure if he would start someone on Butrans who's "opioid naive".told dr to focus on BWC and commercial insurance and told dr to be sure to give patients Butrans patient info booklet and discuss application/rotation of Butrans,dr said he will do that.recommended Senokot-s
PPLPMDL0020000001	Independence	OH	44131	8/19/2011	Quick call- caught Dr Reddy at the window. Positioned Butrans once-weekly transdermal system for appropriate patients who are not well-controlled on short-acting around-the-clock opioids for chronically painful conditions. He waved & thanked me. Spoke with Kathi & reviewed Butrans patient type & managed care as well as managed care information for OxyContin.
PPLPMDL0020000001	Cleveland	OH	44109	8/19/2011	dr said he's not started anyone on Butrans yet and hasnt remembered much about Butrans other than its a transdermal medication.i showed dr 5 Butrans core selling messages and asked what were a couple features that stood out to him? dr said transdermal,once weekly dosing and Butrans being a CIII.dr said he likes that Butrans is a CIII as its easier to call in refills.dr asked about appropriate patients,showed butrans visual aid and asked if he had patients with osteoarthritis taking tramadol daily for their chronic pain? dr said yes,i showed pg.11,discussed that pain condition and dr considering Butrans as an option for these patients instead of refilling tramadol or converting them to vicodin.dr said he will think of a couple patients and talk to them about Butrans.dr asked about insurance coverage,focused dr on BWC and commercial insurance. recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44103	8/19/2011	talked to dr about patients she's starting on Butrans and how dr is explaining butrans to patients,dr said its easy to explain once weekly dosing of Butrans, 4 patches a month but some patients are just resistant to a patch and want only their pills.dr said she knows dosage ranges and starts patients on either 5mcg or 10mcg Butrans.i asked dr when she's treating chronic low back pain,pg.11 butrans visual aid,how is she treating this pain condition? dr said she starts with non-opioid therapy options first such as muscle relaxers,NSAID's,physical therapy,etc and when that doesnt work and patients have pain,she will prescribe tramadol. i asked dr to start patients on Butrans.before going to tramadol,dr said she will do that but majority of her patients have been taking short-acting opioids for years so she's looking at patients like that who arent controlled and talking to them about Butrans.focused dr on commercial insurance plans and patient savings cards.discussed OxyContin being an option for patients,appropriate patient flashcard and formulary coverage for OxyContin.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44102	8/19/2011	talked to Amol,Pharmacist,about any butrans scripts,he's not seen any here.Amol said majority of patients are medicaid and asked what that coverage was like for Butrans? we talked about PA required for Butrans and discussed BWC and commercial plan patients being my focus with HCP's,Amol said ok he only has a few commercial patients but does see BWC.showed Amol 5 Butrans key selling messages,discussed once weekly dosing and showed initiation guide as Amol asked about dosage ranges for short-acting opioids and what patients would start out on for Butrans.i asked Amol if he's recommended Butrans to anyone,he said no but would after talking today.i gave Amol Butrans patient information booklets and asked him to discuss once weekly dosing,application and rotation of Butrans,Amol agreed to do this with a couple patients if they tell him their short-acting opioids arent controlling their pain.discussed OxyContin stocking,appropriate patients flashcard and formulary coverage for OxyContin.i recommended Senokot-S
PPLPMDL0020000001	Independence	OH	44131	8/19/2011	Spoke with Jill (MA) who said to try back next week to see if I could get a moment with Dr Pal. Discussed Butrans & patients she could help identify as potential appropriate patients. She said she does get calls from patients on Vicodin or Percocet who say it is not lasting long enough. She said she gives the messages to Dr Pal & lets him make the decision as to what to do. Discussed managed care & she reminded me how much Medicare they see. Also discussed OxyContin & managed care coverage for Part D. Jill said she would give the E-Detail invite to Dr Pal.
PPLPMDL0020000001	Parma	OH	44129	8/19/2011	Dr Roheny said he still has not found a Butrans patient because he does not "ever" see anyone with commercial insurance. I asked him if managed care did not exist what would be holding him back. He said nothing. He said he knows the dosing & delivery system & how to start a patient, it is just a matter of not seeing the right patient with the right insurance. He asked if he could write it for a Medicaid patient. I told him he could, but that there would be a prior authorization & it might not get approved. He asked if Purdue was still a privately held, small company. I told him Purdue is physician founded & owned. He said he was surprised to hear that. He asked if it was OxyContin that "put the company on the map". I told him that Purdue has had a variety of successful products, including Buprenorphine, Senokot & Colace, as well as OxyContin. Discussed OxyContin as an option for appropriate patients in legitimate pain. He agreed that some patients benefit from it. Dr Roheny looked at his list of patients & said not one of them had commercial insurance. I told him I come see him frequently to ensure that he is ready when that right patient presents. He said he would work on finding a patient.
PPLPMDL0020000001	Sagamore Hills	OH	44067	8/19/2011	Dr Scanlon said although he has not gotten feedback from the patient he put on Butrans during my last visit, he has gotten feedback from another who he put on Butrans & that patient has had positive results. I asked if that makes him want to prescribe for more appropriate patients & he said yes. I reminded him that during our last conversation, he had told me that he usually thinks to offer it to patients who he thinks will be more receptive to it & asked him what makes someone appear more receptive. He said they have to be willing to switch from short-acting to long-acting. I asked him if he feels that patients who are not being well-controlled on short-acting are more willing to switch to long-acting considering what they are on is not working for them or else they would not be telling him they need more. He said usually & that this is where he will find patients. I showed him the kit of patient information booklets & asked what he thought. He said it would be very helpful. I asked if they would be more useful for him in patient rooms or with savings cards. He said with the savings cards & said he will definitely put them to use. OxyContin 7 patch strengths, including intermediate doses, reminder & discussed OxyContin q12h for patients beyond Butrans who may benefit from a long-acting option.
PPLPMDL0020000001	Cleveland	OH	44130	8/19/2011	Caught Dr Kansal up front for a quick call. Positioned Butrans for patients with conditions like spondylolysis & spinal stenosis who need chronic opioid therapy. He said he will keep it in mind. Spent time with Dorothy & Sharon reviewing Butrans patient type in effort to get them to help Dr Kansal identify potential Butrans candidates. They said they both take patient phone calls from those saying their medication is wearing off too fast. They said they would try to help me when they can.
PPLPMDL0020000001	Brooklyn	OH	44144	8/19/2011	Spoke with Kristen & reviewed Butrans patient type. She said she might have filled one script for it but that is all. Discussed managed care & emphasized commercial insurance coverage. Also discussed Butrans.com where savings cards can be obtained. Reviewed patient information booklets, letting her know she could use it in patient counsel or if they got a question about Butrans or she could give it to the patient. She said they would use it once they start seeing more prescriptions. Reviewed OxyContin savings cards.

PPLPMDL0020000001	Independence	OH	44131	8/19/2011	Quick call- Caught Dr Keppler briefly at the window. Positioned Butrans for patients who are candidates for long-acting opioids over an extended period of time or those who are not being well-controlled on short-acting around-the-clock opioids. He thanked me & walked back to take a phone call. Spoke with Diane & reviewed patient savings cards for Butrans & OxyContin.
	Independence	OH	44131	8/19/2011	Spoke with Lisa to follow-up on Butrans dinner program. She said she felt like it was a great experience & she & Roman gained a lot of information from attending. I asked her what she liked most about it. She said to be able to talk to physicians who have experience prescribing something new to them was exactly what both she & Roman needed to help them better identify who is/who is not a good candidate for Butrans. She said that they are ready to prescribe now that that has been clarified for them. Discussed savings cards for Butrans & OxyContin. She said she has enough of both of them for now but thanked me for the post-program follow-up.
PPLPMDL0020000001	Cleveland	OH	44113	8/19/2011	showed dr pg.11,pain conditions,discussed patients with osteoarthritis and dr said he does treat that pain condition,dr said he'll start with anti-inflammatory,arthritis medicine,physical therapy,all non-opioid therapies first,then if patients have pain that needs to be treated he will usually start them on tramadol.I asked dr if he felt Butrans would be appropriate? dr said he didnt know as he would probably try vicodin first and if that didnt work maybe go to a long-acting opioid.dr said this is a new medication to him,no comfort level with it yet.I asked dr to start a couple patients,per our discussion,on Butrans instead of refilling tramadol or converting to vicodin.dr said he will consider it.focused dr on commercial insurance plans and patient savings cards.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44109	8/19/2011	talked to dr about Butrans 5 core selling messages,dr focused discussion on transdermal technology and once weekly dosing option for patients.showed dr pg.11,pain conditions and asked how often he see's these conditions? dr said he see's all of them listed especially osteoarthritis and low back pain.I asked dr how he treats these types of pain conditions? dr said all non-opioid therapy then opioids when necessary.dr said he'll take Butrans initiation guide and think of patients he could start on Butrans.told dr patients that have chronic low back pain,taking vicodin daily and thats not controlling their pain,dr can start them on Butrans instead of refilling vicodin or converting to percocet,dr said ok made sense and he would start a few patients.dr asked about insurance coverage,focused dr on BWC and commercial plan patients.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44113	8/19/2011	dr said she's starting more and more patients on Butrans,she's seeing results in patients improvement on pain scales when she follows-up with them after starting on Butrans.dr said patients feel better and she's pleased.I asked dr how she's explaining Butrans to patients,dr said she tells them this is once weekly dosing and is a patch.dr said she gives some short-acting for breakthrough pain but other patients just take ibuprofen or aspirin.dr said its been easy to start patients on Butrans and no problems with insurance so she's happy.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44109	8/19/2011	dr said he's not started anyone on Butrans but he likes the patch technology.I showed dr Butrans visual aid,5 core selling messages and asked dr what really stood out? dr said transdermal delivery and once weekly dosing.dr asked if Butrans was covered on medicaid? I asked dr if he had patients in mind that he wanted to start? dr said he's just wondering,told dr to focus on BWC and commercial insurance plans.showed dr pg.11 pain conditions and asked how he treats these conditions? dr said he couldnt talk more and would see me next week.gave dr OxyContin reminder and formulary coverage message.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44109	8/19/2011	I have talked to dr several times about Butrans since launch,but since lunches have been cancelled at main campus,dr hasn't thought about Butrans lately.dr asked what plans covered Butrans? showed dr Butrans 5 core selling messages in visual aid and initiation guide,dr took guide and wrote on it that BWC and commercial plans were focus for Butrans.talked to dr about once weekly dosing,transdermal technology and the fact that Butrans is a CII dr can call in refills,dr said ok he'll review the info again and he had to go.gave dr webcast for Butrans 8/24/11
PPLPMDL0020000001	Cleveland	OH	44103	8/19/2011	talked to Amy,Pharmacy manager,about 5 Butrans core selling messages,asked Amy what features of Butrans really stood out to her? Amy said she thinks patch technology is great,she likes once weekly dosing and she thinks doctors will like that Butrans is a CII so they can call in refills.Amy said biggest challenge here is they have almost all medicaid and medicare and Butrans isnt covered on those plans.Amy said she had a few patients get Butrans,for medicaid after a PA was completed so it has happened but not often.we discussed BWC and commercial plan patients and I asked Amy if she could recommend Butrans to patients that have chronic pain conditions and take short-acting opioids daily but arent controlled. Amy said she'll do that and took butrans patient info booklets.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44114	8/22/2011	talked to dr about treating chronic low back pain patients and starting them on Butrans earlier instead of refilling tramadol or vicodin,showed pg.11 butrans visual aid and discussed initiation of Butrans showed guide,dr said she'll consider a couple patients like we discussed,told dr to focus on BWC and commercial patients. discussed OxyContin appropriate patients,showed flashcard,conversion guide discussed conversions and discussed formulary coverage and recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44109	8/22/2011	talked to Ray,Pharmacist,about 5 core selling messages and asked Ray what stood out to him? Ray said he likes the transdermal technology and Butrans being dosed once a week as some patients may really like that option.I asked Ray if he provides patient counseling? Ray said yes they do that.I asked Ray to recommend Butrans to those patients taking short-acting opioids but not controlled and give butrans patient info booklet? Ray said he will do that,told ray patients can then discuss Butrans with their doctors.we talked about importance of Butrans stocking and BWC, commercial plan coverage for Butrans.discussed OxyContin being an option for patients,showed appropriate patients flashcard,conversion guide discussed a few of the conversion examples and gave OxyContin formulary grid.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44130	8/22/2011	Dr Fedorko said he just does not see a lot of patients who would be good candidates for Butrans. I showed Dr Fedorko the Butrans inclusion criteria & asked if he sees patients with those conditions regularly. He said yes. I told him these were the types of patients that Butrans was studied for safety & efficacy in. I asked him to tell me about patients with these disease states & to tell me more about the conditions in general. He went on to define each condition & tell me what the differences between them were. I asked what types of challenges these patients present. He said that often times it is difficult to even diagnose them & it is difficult to determine exactly what is causing the pain. I asked how the treatment plan for these patients' pain generally goes- what is after NSAID's or COX-2's? He said tramadol or Vicodin if he has to, but he tries to go non-narcotic whenever possible. Discussed importance of appropriate patient selection. Reminded him that Butrans is a CII opioid & does have abuse/addiction potential. Positioned Butrans for patients with these chronic conditions after NSAID's or COX-2's or tramadol instead of Vicodin. He said he does see a place for Butrans for these patients & would like to prescribe for a patient for 1-2 months at first to see how they do. I asked what he considers "chronic". He said 2 months. Also emphasized commercial coverage. Discussed OxyContin for patients beyond Butrans.
PPLPMDL0020000001	CLEVELAND	OH	44109	8/22/2011	talked to Rod,Pharmacist,about 5 Butrans core selling messages and Rod focused on once weekly dosing option saying he liked that about Butrans.I asked Rod if he provides patient counseling to patients taking opioids? Rod said he does.I asked Rod if he could talk to patients about Butrans and give patient info booklet so patients can see doctors? Rod said he will do that and we discussed Butrans formulary coverage. we talked about Butrans stocking and importance of stocking.we discussed OxyContin stocking,appropriate patients showed flashcard and discussed formulary coverage. recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44195	8/22/2011	Worked neurology dept-left Butrans fpi,initiation guide,formulary grid and patient info booklet for Dr.Kriegler,Dr.Mays,Dr.Spears,Dr.Stillman
PPLPMDL0020000001	Parma	OH	44129	8/22/2011	Spoke with Keith & John (pharmacists). Reviewed Butrans patient type, indication, dosing, & delivery system. Also discussed patient information booklet & let him know it could be used in patient counsel or can be given to patients should they come in with a script. I also asked Keith what types of information I could bring that could be useful for him & his staff regarding my products. He said that nothing in particular is more helpful- just any new information is useful for him. I agreed to keep him updated on Purdue's products.
PPLPMDL0020000001	Solon	OH	44139	8/22/2011	Spoke with Tony who said he sent the utilization report for OxyContin to IMS on Aug.8. IMS responded that they never received the data so Tony is mailing the data to them overnight.
PPLPMDL0020000001	Cleveland	OH	44130	8/22/2011	Spoke with Renee' & Dawn (MA's) & discussed office procedures & protocols. Also introduced Prude's product line. Discussed nature of the practice. I asked if they have established patients or walk-ins only. Renee' said they have mostly established patients but do take some walk-ins. Discussed Butrans indication, dosing & delivery system. They said Dr Popa will see some reps if she likes them & they are not aggressive. I let them know I would respect the office & doctor & was there to partner with them to help them with pain management for the office. Discussed savings cards available & OTC samples. Scheduled next available lunch.
PPLPMDL0020000001	Cleveland	OH	44109	8/22/2011	talked to dr about his patients with chronic low back pain,showing pg.11 butrans visual aid,and asked how he is considering Butrans an option for these patients? dr said right now he's only thought of Butrans for those patients taking short-acting opioids like vicodin or percocet where they complain to him that they want something different or more pills.asked dr to consider Butrans right after that 1st dose of tramadol or vicodin doesnt control patients pain.dr said he will do that and has been thinking of more patients to start on Butrans,showed initiation guide and discussed initiation of Butrans,asked dr to start a couple patients per our discussion that have BWC or commercial insurance this week,dr said he will.we talked about OxyContin being appropriate option for patients,showed flashcard,conversion guide discussed conversions and formulary grid.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44114	8/22/2011	talked to dr about patients he's considering appropriate to start on Butrans and dr said he's waiting to hear from patients that the vicodin or percocet isnt controlling their pain,then he's considering Butrans.I asked dr to think of patients with chronic low back pain,where he can start on Butrans,instead of refilling vicodin or percocet,dr said he will do that. focus on BWC and commercial plan patients.recommended Senokot-5
PPLPMDL0020000001	Parma	OH	44129	8/22/2011	I told Dr Gallagher that I had spoken with Kevin & Stan at the hospital's pharmacy & that they had inquired as to what his thoughts were on Butrans. I told him that I was there to follow up with him personally to get his feedback & thoughts as to where he was with Butrans. He said that he actually just ran into Stan at the hospital last week & that Stan asked him about Butrans. Dr Gallagher said he actually just put a patient on Butrans at the end of last week. I asked him to tell me about the patient. He said it was a woman with low back pain who had tried various other medications & was not well-controlled. He said that he offered her Butrans & she agreed to try it. He said he started her on 5, although he had considered starting her at 10 due to her condition. I reminded him of titration ability after 3 days up to a max 20mcg. I asked how patient expectations are set for pain relief. He said that for this patient, she was at a 8-9 on a pain scale of 0-10 & that together they agreed that a 4-5 would be a great place to be. I told him it sounds like he is doing exactly what he should be doing & asked if he is comfortable enough to identify other patients who may be candidates. He said yes & that he cannot think of specific patients, but as they come in, he has no issues with starting more patients on Butrans to increase his talked to dr and asked him if he started anyone on Butrans last week,post our lunch? dr said he had a few patients he talked to about Butrans and gave Butrans patient info booklets to them to read and follow-up with dr dr said he tells them Butrans is a patch and dosed once a week and some patients like this and others dont and all they want is their pills. asked dr to think of a few patients with chronic low back pain,that he can discuss Butrans with and start them instead of refilling short-acting opioids or give short-acting as the supplemental analgesia and Butrans once weekly,dr said he will continue talking to patients and do his best.recommended Senokot-5
PPLPMDL0020000001	Parma	OH	44129	8/22/2011	Reminded Jen of our previous conversations regarding Butrans & our discussions about patients who are taking 3 Vicodin per day but saying it is not lasting long enough. She said she recalls discussing this. Positioned Butrans as a once weekly transdermal option for these patients. I also reminded her of how she has shared with me that it can be challenging to get a patient to buy-in to switching from short-acting to long-acting. She agreed. I asked her if she felt like patients who were not well-controlled on their short-acting might be more receptive to this change considering what they are taking is not controlling their pain anyway. She said probably. I reminded her that patients could take supplemental analgesia with Butrans & asked her if she thought she would keep their short-acting on board at a reduced supply for breakthrough. She said she doesn't think she would feel comfortable having them on two opioids simultaneously. I reminded her that non-opioids can also be used, such as acetaminophen or ibuprofen. Reminded her that Butrans is the only CII that is long-acting. She said she would keep it in mind. She said they are having a meeting with Dr Nickles in a few weeks & they will probably discuss his Butrans results at that time. Spent time with Dawn who confirmed they are having a meeting in September. She said she will try to get Butrans information for me then.
PPLPMDL0020000001	Cleveland	OH	44125	8/22/2011	Spoke with pharmacist, Betsy Johnson, & reviewed Butrans patient type & patient information booklet. She said she has not dispensed any & still has the 10mcg strength on her shelf. Discussed patient counsel, the ability to tape edges with first aid tape if it loosens, & application sites. Also showed her that there is a tracker for patients to chart what location site they used & which side of the body. She said she thought the booklets seemed patient-friendly & like something patients would be more likely to read instead of a black & white medication guide. Also let her know she could give the book to a patient if they have a prescription. Discussed OxyContin savings cards & gave her a package of cards. She said they do not have a lot of patients on it who have a high co-pay. Let her know that anyone with cash-pay or commercial insurance & a co-pay over \$25 would be able to use the card to save money every month.
PPLPMDL0020000001	Parma	OH	44129	8/23/2011	Dr Ortega said that he has had to titrate 2 patients up from 5 to 10mcg. He said one of those patients discontinued treatment because they did not like the way the 10mcg made them feel. He said the other patient opted to step back down to the 5mcg instead of continuing on 10mcg, again because the patient said the 10mcg was too strong for them. I asked if he felt that he has a good grasp of the appropriate patient type for Butrans now. He said that he does, but that since most of his patients are steady on their medication, that rules out a lot of his patients for Butrans. He went on to explain that his ultimate goal is to get his patients off all medication & he feels that the first step of doing that is taking them off oral medications. I asked him to elaborate. He said when patients take pills, it forces them to think of pain. He feels there is a psychological connection. Reminded him Butrans still has abuse/addiction potential & is CIII. He said he knows. Discussed offering Butrans to patients as an option instead of pushing a switch on patients who are well-controlled. He agreed this was a good idea. He also shared a great success of a Butrans patient who has remarked that everyone in his life notices a big difference in how he acts now that he has pain relief. I asked what the patient's pain was from. He said spondylolysis.
PPLPMDL0020000001					Showed inclusion criteria, discussing these as potential Butrans patients. OxyContin q12h as option for patients beyond Butrans.

PPLPMDL0020000001	Maple Heights	OH	44137	8/23/2011	Spoke with Gutjeert (pharmacist) & reviewed Butrans with him. Discussed indication, dosing, & delivery system. Also discussed patient information booklets & patient counsel. He said he has seen some "move" at his regular location (W 65th St) & the technician verified that they usually have 3 boxes on hand & now have only 1, so two have been dispensed recently there. Gutjeert said he will be moving to this location permanently. Also discussed OxyContin q12h.
	Cleveland	OH	44113	8/23/2011	talked to dr about pain conditions he treats,pg.11 butrans visual aid,dr focused on chronic low back pain patients as he said thats a large majority of his patients and they tend to be BWC patients.dr told me how he treats chronic low back pain with muscle relaxers,NSAIDs,physical therapy,all non-opioid therapy choices 1st,then if pain persists,he'll give patients tramadol.I asked dr how a long-acting opioid like Butrans would be appropriate for these patients? dr said early on,he would only give short-acting opioids as patients have good and bad days,but if short-acting opioids didnt provide pain relief over time,he would consider a long-acting opioid.dr said he writes OxyContin for these patients when they need a long-acting opioid.i told dr Butrans is an option before he converts patients to OxyContin.talked to dr about initiation of butrans,right after the 1st dose of tramadol isnt controlling patients pain,showed initiation guide and visual aid for discussion.asked dr if he has a few patients like this that he can start on Butrans? dr said he didnt know would have to think about it and look at patients coming into office this week.dr said he does like once weekly dosing and patch technology of Butrans so he will consider it an option.told dr to focus on BWC,tricare,commercial plans.discussed OxyContin being an option,showed appropriate patients flashcard,discussed conversions and showed conversion guide and discussed formulary coverage.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44106	8/23/2011	talked to dr about Butrans fpi,showed visual aid to discuss appropriate patients,dr said he's seen all 3 attending physicians prescribe Butrans but didnt know much about the medication.asked dr what features of Butrans really stood out to him? dr said he likes the patch technology and once weekly dosing.showed dr Butrans initiation guide,discussed initiation of Butrans and titration and asked dr if he has a couple patients with chronic low back pain that are taking tramadol or vicodin daily for their pain yet not controlled? dr said yes they have a lot of patients taking tramadol who call in monthly for refills wanting more pills or requesting another opioid.i asked dr to stop and not refill the short-acting opioid and start patients on Butrans,dr said he will consider this option as he needs to get clinical experience with Butrans.dr asked what plans cover Butrans? told dr to focus on commercial plans and discussed patient savings cards.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44195	8/23/2011	talked to Cynthia,Pharmacist,as David,Pharmacy Mgr was off today,about Butrans 5 core selling messages and what really stood out to her.Cynthia said once weekly dosing and Butrans being a patch were 2 features that stood out.I asked Cynthia if they provide patient counseling to patients taking short-acting opioids? Cynthia said they will do that if patients have questions or are complaining their medication isnt lasting long enough.asked Cynthia if she could recommend Butrans to those patients and give Butrans patient info booklets to them so they can talk to their doctors? Cynthia said she will do that but i should follow-up with david,pharmacy mgr,to discuss this info with him too.we talked about Butrans stocking and importance of stocking Butrans,discussed OxyContin stocking,appropriate patients and formulary coverage for Butrans and OxyContin.recommended Senokot-S
PPLPMDL0020000001	Parma	OH	44134	8/23/2011	Dr Hernandez said that effective September 1st, Worker's Comp will no longer be paying for Suboxone due to cost. He said he fears that Butrans will be next, since it has one of the same molecules, buprenorphine. He said he has tried to plead his case to BWC, but to no avail. He said he plans to call our Medical Services department to ask them if they can make any recommendations on switching a patient from Suboxone for pain to Butrans for pain. Reiterated to him that Butrans is only indicated for pain. He said he knows. I agreed that Medical Services would be a good place to call. I reminded him of previous conversations where he told me that a Butrans patient for him is one who is at a pain number of 3-4 when they come see him, especially if they are taking NSAID's or COX-2's at that point. He agreed. I asked him what if that patient is at a pain number of 5-7- what medication would that patient get. Dr Hernandez said that that is also a Butrans patient for him. He said Butrans is the first line long-acting pain medication he goes to. He said he would continue to prescribe for this type of patient. Also discussed OxyContin q12h for appropriate patients beyond Butrans
PPLPMDL0020000001	Cleveland	OH	44124	8/23/2011	Quick call....I reviewed the butrans 7 day delivery and CII status. I asked him to log onto the interactive presentation to learn more. He simply said he does not prescribe many patches. I told him that butrans is the first of its kind and let him know its covered on BWC. Provided oxycontin coverage reminder also.
PPLPMDL0020000001	Cleveland	OH	44195	8/23/2011	worked apm dept-left Butrans fpi,initiation guide,webcast invites,patient info booklets,formulary grids and my business cards for Dr.Vrooman,Dr.Katyal,Dr.Cheng,Dr.Mekhaill,Dr.Mintzer,Dr.Syed-couldnt see any doctors so had to leave info at front desk and Tonda,Receptionist,said she'll give to doctors.
PPLPMDL0020000001	Mayfield Heights	OH	44124	8/23/2011	Window call....I reminded doc of the appropriate Butrans patient - low dose IR narcotics of opioid naive patients. Provided formulary grid and and e-detail invite.
PPLPMDL0020000001	Mayfield Hts	OH	44124	8/23/2011	Window call....Reminded doc of the Butrans coverage with commercial plans and BWC. Provided formulary reminder and patient information booklets. Nothing learned.
PPLPMDL0020000001	Mayfield Hts	OH	44094	8/23/2011	I showed doc a demo of the butrans patch and reminded him that it is the first 7 day delivery of an opioid and a CIII. I asked him to log onto the butrans e-detail to learn more about butrans. I reminded him that butrans and oxycontin are both covered on BWC. Nothing learned.
	Cleveland	OH	44106	8/23/2011	talked to dr about patients with specific pain conditions,pg.11 visual aid,dr focused on chronic low back pain patients.dr said when they need opioids he typically starts them on tramadol then goes to vicodin or percocet,dr said the problem is once these patients start taking pills they dont want to stop taking them they want more.i asked dr how he thinks a long-acting opioid like Butrans is appropriate for these patients? dr said he likes that Butrans is once weekly and is a patch,dr said he thinks its easy for patients and will give them ibuprofen or aspirin as choices for breakthrough pain.asked dr if he's considering Butrans as an option,earlier in therapy so right after tramadol isnt controlling patients pain? dr said most of the patients he started on Butrans have been taking percocet for years and he's not comfortable refilling percocet anymore so he's telling these patients about Butrans.i asked dr to think of a couple patients,with chronic low back pain,that are taking tramadol daily but pain isnt controlled,and start them on Butrans instead of refilling tramadol or converting to another short-acting opioid,dr said he will do that,focused dr on commercial plan patients and patient savings cards. recommended Senokot-S
PPLPMDL0020000001	Parma	OH	44129	8/23/2011	Followed up with Dr Chagin as to his thoughts on Butrans. He said he does have a few patients on it. I asked him to tell me about the patient(s). He said each of them has been someone with a chronic condition who is taking short-acting opioids. He mentioned one patient with low-back pain. I showed him Butrans inclusion criteria & asked if those were some of the conditions he treats frequently. He pointed out spinal stenosis & said that he actually has a patient in the hospital now who has it & is taking Percocet for it. I positioned Butrans for patients who are not well-controlled on their low-dose short-acting opioid & asked if he felt those patients would be more receptive to a medication switch to a long-acting than those who are steady on their short-acting. He said yes & added that he thinks Butrans is a good option for patients with chronic conditions. I asked him what at what point a condition becomes chronic. He said 2 months. I referenced inclusion criteria & asked him to think of those types of disease states more so than "chronic pain" & he said this makes sense & will keep thinking of Butrans for this type of condition. Also let him know I left Senokot-S & Colace samples.
PPLPMDL0020000001	Cleveland	OH	44195	8/23/2011	talked to Janet,Pharmacy Mgr,about Butrans stocking and Janet said noone has prescribed Butrans but they still write a lot of short-acting opioids.showed Janet 5 Butrans core selling messages and asked what really stood out to her? Janet said once weekly dosing and transdermal delivery of Butrans.i asked Janet if she provided patient counseling to those patients taking short-acting opioids? Janet said yes.asked Janet if she will give patients Butrans patient info booklet and discuss Butrans with them and have them speak with their doctors,Janet said she would do that.we discussed stocking of Butrans,OxyContin,discussed formulary coverage for Butrans and OxyContin and i recommended Senokot-S
PPLPMDL0020000001	Mayfield Heights	OH	44124	8/23/2011	I reviewed the butrans patient type and the other selling messages. SHe said she has written for it a couple of times with good results. SHe is leaving the clinic (today is her last day) as she is moving out of state. I wished her well and reminded her to remember Butrans.
PPLPMDL0020000001	Parma	OH	44129	8/23/2011	Spoke with technician who said pharmacist was very busy & unable to talk today. I reviewed patient information booklet with her & let her know I would return to go over details with the pharmacist as well. Discussed common questions patients might have & let her know that patients should allow 3 days to decide whether or not Butrans is working for them. Also discussed OxyContin savings cards.
PPLPMDL0020000001	Cleveland	OH	44113	8/23/2011	talked to dr about Butrans,if it would ever be an option for patients he treats with chronic pain conditions,showed pg.11 butrans visual aid,dr said probably not because he doesnt write for CIII OR CII medications.dr said he will prescribe tramadol and has no problem writing for Ryzolt as he's getting it covered on insurance plans and its easy once a day dosing for patients,dr said Butrans isnt going to be an option for his patients as he's not comfortable with CIII or CII opioids.we talked about OxyContin,showed challenging flashcard and dr said again he doesnt write for OxyContin but appreciated info.dr said he will prescribe Ryzolt and keep sharing info with him about Ryzolt and give him the value cards.
PPLPMDL0020000001	Cleveland	OH	44109	8/24/2011	showed dr butrans visual aid,discussed 5 core selling messages and gave dr Butrans fpi,dr said he's heard of Butrans from his colleagues but didnt know anything about the medication.asked dr what features of Butrans stood out to him,looking at visual aid? dr said once weekly dosing,transdermal and Butrans being a CIII.asked dr why CIII was important? dr said because its easier on him and nursing staff,to write for refills.dr said he only has a few patients on narcotics and he typically starts them on tramadol,long-acting opioids arent considered early in therapy,i showed dr Butrans appropriate patient section,discussed opioid naive and experienced and asked dr to think of a few patients with chronic low back pain,taking short-acting opioids daily but not controlled and starting them on Butrans instead of refilling tramadol or converting to another short-acting opioid,dr said that made sense and he'll consider that option.dr said majority of patients are Medicaid and uninsured,so whats insurance coverage for Butrans? we talked about formulary coverage,told dr to focus on BWC and commercial plans.dr said ok.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	8/24/2011	showed dr butrans visual aid,discussed 5 core selling messages and gave dr Butrans fpi,dr said he's heard of Butrans from his colleagues but didnt know anything about the medication.asked dr what features of Butrans stood out to him,looking at visual aid? dr said once weekly dosing,transdermal and Butrans being a CIII.asked dr why CIII was important? dr said because its easier on him and nursing staff,to write for refills.dr said he only has a few patients on narcotics and he typically starts them on tramadol,long-acting opioids arent considered early in therapy,i showed dr Butrans appropriate patient section,discussed opioid naive and experienced and asked dr to think of a few patients with chronic low back pain,taking short-acting opioids daily but not controlled and starting them on Butrans instead of refilling tramadol or converting to another short-acting opioid,dr said that made sense and he'll consider that option.dr said majority of patients are Medicaid and uninsured,so whats insurance coverage for Butrans? we talked about formulary coverage,told dr to focus on BWC and commercial plans.dr said ok.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	8/24/2011	showed dr butrans visual aid and asked if he recalled anything about Butrans? dr said not really other than Butrans was transdermal,we discussed Butrans 5 core selling messages and i asked dr what features stood out? dr said transdermal delivery,once weekly dosing and CIII,dr said he liked that Butrans was a CIII so he can call in refills he doesnt like CII medications.showed dr pg.11,pain conditions and asked if dr treats these types of conditions? dr said yes,asked dr how he treats chronic pain for these conditions? dr said he starts with all non-opioid options 1st then will turn to opioids,immediate release,if necessary.i asked dr if Butrans would be an option for a patient who's "opioid naive" in his opinion? dr said probably not,he would feel more comfortable starting patients on tramadol and see what happens with patients pain levels.showed dr appropriate patients section,visual aid,discussed opioid naive and experienced,dr said if he starts anyone on Butrans it would be opioid experienced patients.talked to dr about initiating Butrans,titration,showed patient info booklet and discussed formulary coverage for BWC and commercial plan patients,dr asked about Medicaid patients as thats majority of patients here,we discussed this plan too.asked dr to start a couple patients,per our discussion,to just get clinical experience,dr said he will consider Butrans and talk to patients about it.recommended Senokot-S
PPLPMDL0020000001	Independence	OH	44131	8/24/2011	Introduced myself & Butrans to Milos (pharmacist new to this location). Reviewed indication, dosing, & appropriate patient type. Also spent time going over patient information booklet & discussing patient counsel. Also discussed ability to titrate after 3 days & letting patient know to give Butrans 3 days before deciding whether or not it is working. Also discussed application, rotation, & supplemental analgesia. Reviewed savings cards & let him know they can be printed online at Butrans.com. Offered OxyContin savings cards but he said they are OK for now.
PPLPMDL0020000001					

PPLPMDL0020000001	Cleveland	OH	44109	8/24/2011	showed dr butrans visual aid and asked if he recalled anything about Butrans? dr said not really other than Butrans was transdermal.we discussed Butrans 5 core selling messages and i asked dr what features stood out? dr said transdermal delivery,once weekly dosing and CIII,dr said he liked that Butrans was a CIII so he can call in refills he doesnt like CII medications.showed dr pg.11,pain conditions and asked if dr treats these types of conditions? dr said yes,asked dr how he treats chronic pain for these conditions? dr said he starts with all non-opioid options 1st then will turn to opioids,immediate release,if necessary.i asked dr if Butrans would be an option for a patient who's "opioid naive" in his opinion? dr said probably not,he would feel more comfortable starting patients on tramadol and see what happens with patients pain levels.showed dr appropriate patients section,visual aid,discussed opioid naive and experienced,dr said if he starts anyone on Butrans it would be opioid experienced patients.talked to dr about initiating Butrans,titration,showed patient info booklet and discussed formulary coverage for BWC and commercial plan patients,dr asked about medicaid patients as thats majority of patients here,we discussed this plan too.asked dr to start a couple patients,per our discussion,to just get clinical experience,dr said he will consider Butrans and talk to patients about it.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	8/24/2011	dr said he heard about Butrans from his colleagues and had a few questions about receptor binding with Butrans.showed dr Butrans visual aid,discussed MOA of Butrans and dr said that answered his question.dr asked about supplemental analgesia with Butrans,wondering if he could give short-acting opioids with Butrans? showed dr Butrans fpi,supplemental analgesia section,told dr he could give opioid or non-opioid therapy with Butrans. dr asked about half-life of Butrans,showed pharmacokinetics and pharmacodynamics of Butrans.i asked dr if he had patients in mind to start on Butrans,dr said yes but he's not sure if he wants to start patients on Butrans and still give them immediate release opioids,so dr said he'll think about that. showed dr butrans visual aid,appropriate patients section and told him to think of patients with different pain conditions,pg.11 butrans visual aid and asked dr if he could think of a few patients to start on Butrans? dr said he will do that and asked about insurance coverage,discussed formulary coverage and patient savings cards.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	8/24/2011	dr said she remembers Butrans being transdermal but not much else.showed dr Butrans visual aid,discussed 5 Butrans core selling messages and asked her what really stood out to her? dr said transdermal delivery,once weekly dosing and CIII.dr said Butrans being a CIII is easier on her as she can call in refills.dr asked who the appropriate patients are,showed visual aid and discussed opioid naive and experienced patients.asked dr if she can think of a few patients to start on Butrans? dr said yes and asked about insurance coverage for medicaid patients,discussed formulary coverage and asked dr to focus on BWC and commercial plan patients,dr said ok she'll talk to some patients about Butrans and see if they are interested in a patch.i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	8/24/2011	dr said he didnt have a lot of time to talk but remembered our last conversation that this is a long-acting opioid,in a patch,for chronic pain.showed dr Butrans visual aid,5 core selling messages and asked dr what other features stood out to him? dr said once weekly dosing and the fact Butrans is a long-acting opioid with a CIII scheduling.dr said that makes it easier on him and nurses so they can call in refills for Butrans.showed dr butrans appropriate patients section and asked if he could think of a few patients opioid naive or experienced that he could start on Butrans? dr said he will give it some thought but he doesnt write a lot of narcotics for patients.recommended Senokot-S
PPLPMDL0020000001	Independence	OH	44131	8/24/2011	Dr Rob said he couldn't come back to lunch & had no time. Positioned Butrans for patients taking low-dose short-acting opioids around-the-clock for a chronic condition. He waved & thanked me.Spent time with Maria & Cameo going over appropriate patient type for Butrans. Discussed patient information booklets & dosing, application, & disposal.
PPLPMDL0020000001	Cleveland	OH	44109	8/24/2011	talked to dr briefly about Butrans 5 core selling messages,dr said he remembers that Butrans is transdermal but thats it.dr said he doesnt write a lot of narcotics but likes the transdermal delivery of Butrans.i asked dr if he treats patients with pain conditions,pg.11 visual aid? dr said yes he does,discussed appropriate patients-opioid naive and experienced that he could start on Butrans.dr said ok took fpi,initiation guide and a booklet.showed dr application/rotation info in butrans patient info booklet and asked if dr will start a few patients to just get some clinical experience? dr said he will consider it and asked about medicaid coverage? we discussed all insurance plans,told dr to focus on BWC and commercial plans.recommended Senokot-S
PPLPMDL0020000001	North Royalton	OH	44133	8/24/2011	Quick call with Cheryl. She said she did not have time for a discussion. Gave her patient information guide & described how it can be used in patient counsel or given to a patient with a prescription. Also told her to be sure to let patients know to give Butrans 3 days until they decide if it is working for them. E-voucher & OxyContin savings reminders.
PPLPMDL0020000001	Cleveland	OH	44109	8/24/2011	dr said she hasnt started anyone on Butrans,she has the information from my last 2 lunches but really hasnt given much thought to it,dr said her patients are medicaid and medicare so what is coverage for Butrans? we talked about medicaid prior authorization requirements for Butrans and told dr not to start any medicare patients on Butrans as its not covered,dr said ok.dr said she doesnt really prescribe CII medications so she most likely cant get medicaid PA approved for her patients to try Butrans.told dr to focus on BWC,Tricare and commercial plan patients,discussed Butrans patient savings cards for commercial plan patients and dr said she does like that Butrans is a patch dosed once a week but again it comes down to insurance.gave Butrans webcast invite to dr and experience invite card,dr said she will look at both.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	8/24/2011	worked family medicine dept-lunch with residents and attending physicians,worked internal medicine-left Dr. Lindheim,Dr.Falck-Ytter,Dr.Ricanati,Dr.Spinelli,Dr.Harrington and Dr.McCreery Butrans fpi,initiation guide,patient info booklet,formulary grid,OxyContin fpi,conversion guide,formulary grid,and my business card for each physician-couldnt see doctors only leave info
PPLPMDL0020000001	Cleveland	OH	44109	8/24/2011	showed dr Butrans visual aid,pg.11 pain conditions and asked dr how often he see's and treats these pain conditions? dr said he see's a lot of patients with chronic low back pain and osteoarthritis.asked dr how he treats these pain conditions when chronic pain is present? dr said he will prescribe short-acting opioids.i asked dr if he had a couple patients with chronic low back pain that have been taking tramadol daily but their pain isnt controlled? dr said he see's a lot of them and they always want more pills.told dr thats where he could start patients on Butrans,showed initiation of Butrans section and asked dr if he could start a few patients per our discussion on Butrans? dr said he will consider it but depends on insurance.dr said he has a lot of medicaid and uninsured told dr to focus on BWC,Tricare and commercial plan patients,discussed patient savings cards and discussed Medicaid Prior Authorization requirements for Butrans,discussed OxyContin being an option for patients,showed challenging flashcard,gave conversion guide and discussed formulary coverage,dr said he has a small group of patients on OxyContin.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	8/24/2011	discussed 5 Butrans core selling messages,showed visual aid,dr said he heard about Butrans from his colleagues but didnt know much about it.i asked dr what really stood out to him when looking at 5 core messages? dr said transdermal technology,once weekly dosing and CII so he can call in refills which is easier for him than a CII medication.showed dr pg.11,pain conditions,dr focused on chronic low back pain and said he will treat patients with NSAIDs,muscle relaxers,physical therapy,all non-opioid therapies,then if patients still have chronic pain he will start them on tramadol.i asked dr if he would stop and consider Butrans,right after the 1st tramadol dose isnt controlling these patients pain? dr said he might but most patients want their pills,dr asked if patients could take short-acting analgesics with Butrans? showed dr Butrans visual aid,maintenance of therapy section,told dr opioid or non-opioid therapy with Butrans is appropriate,dr said ok asked dr to focus on BWC,Tricare or Commercial plan patients,per our discussion,to get some clinical experience,dr said he will read through all of the materials and think of some patients.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	8/24/2011	dr said she didnt recall much on Butrans other than its a transdermal medication.showed dr Butrans visual aid,5 core selling messages and asked dr what stood out to her? dr said she likes that Butrans is once weekly dosing,is a CIII opioid and transdermal.dr said it makes it easier to write CIII's as she can call in refills.asked dr if she has any patients with osteoarthritis? dr said yes she treats various pain conditions.showed dr visual aid,pg.11,discussed this pain condition,dr said she would give all non-opioid options 1st then if pain persists she would probably start patients on tramadol.asked dr to stop next time and start a few patients on Butrans,instead of refilling tramadol,dr said ok something to consider and asked about insurance coverage for medicaid patients? discussed formulary coverage and told dr to focus on BWC and commercial plans.showed dr initiation of Butrans section in visual aid,showed butrans patient info booklet and discussed application/rotation of Butrans.dr said it seems easy enough for patients and she will talk to some patients and see if she can
PPLPMDL0020000001	Cleveland	OH	44104	8/24/2011	discussed initiations presentation with dr and talked about 4 patient case studies.dr said she thinks Butrans is a good medication,likes that its dosed once a week and is in a patch but the small group of patients she is treating with short-acting opioids they dont have chronic pain,they are acute pain patients.asked dr how she defines acute vs chronic pain? dr said if patients have persistent pain longer than 3 months,thats chronic pain.dr said her patients usually take tramadol PRN so thats acute and not chronic pain.showed dr Butrans visual aid,pg.11 pain conditions,discussed patients with osteoarthritis and asked dr how she is treating these patients chronic pain? dr said all non-opioid therapies first then tramadol.i told dr thats where Butrans could be placed,right after the 1st dose of tramadol isnt controlling patients pain,dr said ok that makes sense and she'll consider Butrans.dr asked about insurance coverage,told dr to focus on BWC,Tricare and Commercial plans for Butrans and we discussed Butrans patient savings cards. recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44104	8/24/2011	discussed initiations presentation with dr,4 patient case studies.dr said he has 4 patients in mind that he would like to start on Butrans.we talked about those patients and dr asked about initiation of Butrans so i showed dr butrans initiation guide,discussed tapering of short-acting opioids if necessary and initiation of Butrans 5mcg or 10mcg.dr said ok that made more sense to him now.showed dr pg.11,visual aid,discussed pain conditions,dr focused on osteoarthritis and said he will prescribe all non-opioid therapies first,then he will start these patients typically on tramadol.i asked dr when tramadol doesnt control pain,whats the next step? dr said usually vicodin or he'll start patients on Percocet.i told dr he could start patients on Butrans,right after the 1st tramadol dose isnt controlling patients pain,dr said ok he will think about that.dr said the 4 patients he wants to start on Butrans are all taking percocet daily for chronic pain.dr asked about insurance coverage for Butrans? told dr to focus on BWC,Tricare and Commercial plan patients,discussed Butrans patient savings cards for commercial plan patients.dr asked about medicaid/caresource coverage,we discussed Prior Authorization requirements for Butrans.we talked about OxyContin being an option for patients,showed challenging flashcard and dr said he only has a small group of patients on OxyContin and really doesnt like prescribing this medication.discussed OxyContin formulary coverage.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	8/24/2011	discussed Butrans 5 core messages,fpi,initiation guide with dr,showed dr pg.11 butrans visual aid and asked dr what pain conditions she treats? dr said she treats all of the conditions listed but a lot of chronic low back pain patients and they tend to be her workers comp patients.asked dr how she treats this pain condition? dr said muscle relaxers,physical therapy,NSAIDs all non-opioid therapies until patients say their pain is too bad and they need an opioid.talked to dr about Butrans being an option for opioid naive patients,showed info in visual aid and also for patients currently taking opioids,we discussed tapering of short-acting opioids if appropriate,initiation of Butrans,titration of Butrans,showed dr Butrans patient info booklet discussed application/rotation of Butrans and dr said it sounded like a great option as she likes transdermal delivery and has been looking for another option besides pills for her patients with chronic low back pain.asked dr if she could start a few patients this week,per our discussion,on Butrans? dr said yes and asked if medicaid covered Butrans? told dr to focus on BWC and commercial plans and showed Butrans patient savings card and also told dr about Prior authorization requirements for medicaid patients to try and get approval of Butrans,dr said she will consider butrans for some patients.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44106	8/24/2011	talked to dr about patients with chronic low back pain as thats what he treats a lot of,showed pg.11 visual aid,dr said he believes in non-opioid therapies first but usually by the time patients arrive to him,they have tried all short-acting opioids and are asking for more pills.dr said he's starting patients on Butrans that have been taking percocet for years and requesting more pills.dr said he will give them Butrans and tell them to take an aspirin or Ibuprofen for break through.asked dr how often he's seeing patients with chronic low back pain,weekly? dr said he has a lot of those patients doesnt have a number in his head but he'll keep Butrans in mind for
PPLPMDL0020000001	Cleveland	OH	44109	8/24/2011	the new discussed commercial plan patients and medicaid for Butrans.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	8/24/2011	discussed Butrans fpi,5 core selling messages with dr,dr is 1st yr resident and said she's not had much experience prescribing narcotics.dr said she likes transdermal delivery and once weekly dosing,dr asked what the scheduling of butrans was? told dr butrans is a CIII,showed Butrans fpi and visual aid,asked dr if she can think of a few patients who have osteoarthritis or low back pain,thats chronic and needs to be treated with an opioid,thats where she can consider Butrans,showed initiation of Butrans info and dr said she'll keep it in mind and asked if medicaid covered butrans? explained Prior authorization requirements for medicaid,told dr to focus on BWC and commercial plan patients to start on Butrans,dr said ok will do.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44106	8/24/2011	dr said he started another patient on Butrans,seems to be easy to discuss with patients and no complaints at this point.showed dr butrans visual aid,pg.11,talked about chronic low back pain patients and how dr treats their chronic pain,dr said he will start patients on tramadol when they need a narcotic. asked dr if he would consider Butrans,right after the 1st tramadol dose isnt controlling patients pain? dr said he might but he will try all non-opioid therapies 1st for low back pain patients then start them on tramadol if they have persistent pain.told dr to focus on commercial patients and dr said he has a lot of medicaid patients at UH main campus so we discussed Prior Authorization requirements for Medicaid patients for Butrans.

PPLPMDL0020000001	Cleveland	OH	44104	8/24/2011	discussed initiations presentation,4 case studies,dr said she hasnt started anyone on Butrans yet as she's very frustrated with her chronic pain patients this month,dr said she's drug screening all of these patients and just doesn't trust them.dr said its not that she dislikes Butrans but she just hasn't thought about anything new like Butrans to discuss with her patients.dr said after talking today she may think of a few patients that she could start on Butrans.we talked about patients with osteoarthritis,that she trusts,where dr is treating their chronic pain with short-acting opioids but they aren't controlling patients pain,dr said she has a lot of them and they call in all the time for refills.i asked dr to start a couple patients like this on Butrans and showed visual aid,discussed initiation of Butrans and titration.dr asked about insurance coverage,told dr to focus on BWC,Tricare and commercial insurance patients.discussed patient savings cards with dr.we discussed OxyContin being an option for some patients and dr said she doesn't prescribe that medication.recommended Senokot-S for patients with opioid induced dr said he's not started anyone on Butrans recently since majority of his patients are medicare and Butrans isnt covered on Medicare.i asked dr if he had any commercial pain patients that he could start on Butrans? dr said a few,so we talked about Butrans patient savings cards.showed dr pg.11 Butrans visual aid,discussed pain conditions and asked dr how he treats patients with osteoarthritis? dr said all non-opioid therapies first,then he'll consider tramadol an option if pain is persistent and patients are asking for something.dr said he would start patients on tramadol and if that's not controlling pain,then he may consider Butrans an option if insurance covers it.asked dr to think of 2 patients with osteoarthritis that are taking tramadol daily but not controlled where he can consider Butrans as an option,dr said he will do that but again insurance is going to be barrier for him.discussed OxyContin as an option,showed conversion guide and discussed conversions from short-acting opioids to OxyContin,discussed formulary coverage.dr said he only has a few patients on OxyContin but does feel its a good medication for patients.recommended Senokot-S
PPLPMDL0020000001	Cleveland Hts	OH	44118	8/24/2011	Spoke to Suraab again about the stocking of butrans. He was quick to say that he has not seen any prescriptions for it so they have not stocked it. I provided the initiation guide and explained the positioning, proper application, and the starting doses. He said he has no problem ordering it when he gets a script for it.<font color=blue><b>CHUDAKOB added notes on 09/01/2011</b></font>Who are the physicians that you should be calling on that fill scripts at this pharmacy. Even if you know, asking him this may show him you are trying to help him with his business.
PPLPMDL0020000001	N Royalton	OH	44133	8/24/2011	Spoke with Jeffery (pharmacist) & introduced myself & Purdue's products. I inquired about Butrans stocking. He said he has it. I asked if he has dispensed any. He said he just recently did. I explained to him Butrans indication, dosing, & delivery system. Also let him know patients may take supplemental analgesia with Butrans in the form of opioid or non-opioid. He said his computer actually brought up a "drug interaction" screen when he put the Butrans script in because the physician had also prescribed Percocet with the Butrans. He added that the computer said that prescribing Butrans with Percocet can put patients into withdrawal. I asked what he did. He said he called the prescriber who told him to go ahead with the prescription. Presented initiation guide & discussed appropriate range of Butrans patients & ability for Butrans to precipitate withdrawal, especially in patients already on high doses of opioids. He said he better understands now. Also discussed patient savings & managed care.
PPLPMDL0020000001	Cleveland	OH	44109	8/24/2011	dr said he remembered our conversation about Butrans that this was transdermal but that's all he could remember.showed dr Butrans visual aid,discussed 5 core selling messages and asked dr what features stood out? dr said once weekly dosing,CII and transdermal delivery.dr said he has patients with various pain conditions that he gives tramadol to so can he give tramadol for breakthrough if he starts patients on Butrans? showed dr Butrans fpi,maintenance of therapy section,stating he can give immediate release opioid or non-opioid therapy with butrans,dr said ok he'll think about some patients and give it a try.dr asked who covers butrans? discussed formulary coverage for Butrans,focused dr on BWC and commercial plans.recommended Senokot-S
PPLPMDL0020000001	Parma	OH	44129	8/24/2011	Dr Gigliotti said the patient he put on Butrans "got sick on it". I asked him to elaborate. He said she became dizzy starting about 2 days after applying Butrans. He said she was on 5mcg & did not want to continue on it. I asked if she had said anything about any type of pain relief. He said she did say she felt less pain, but it was not worth it to put up with the dizziness. I told him that that is understandable. I asked if that would affect him prescribing Butrans for other appropriate patients. He said no & that he "is ready" to prescribe for someone else & that "it will happen". I reminded him of our discussion about patients with conditions such as spinal stenosis & spondylolysis. He said those were potential candidates. OxyContin q12h 7 tablet strength reminder.
PPLPMDL0020000001	Cleveland	OH	44109	8/24/2011	briefly spoke with dr about butrans 5 core selling messages,dr said she doesn't have much experience with opioids as this is her 1st year in residency but she knows there are a lot of patients taking opioids for chronic pain so she needs to know the info.dr said she'll look through fpi but does like that this is a patch and dosed once a week.showed dr pg.11 pain conditions and asked dr if she treated these pain conditions? dr said yes,but didnt have more time to talk.thanked me for the info and she took butrans fpi,initiation guide and patient info booklet with my business card.
PPLPMDL0020000001	Warrensville Heights	OH	44122	8/24/2011	Spoke with Eileen Sell (RN, Office Manager), who said Dr Kessler has moved to North Carolina, is teaching there & is no longer in practice. I asked who is in charge of the residency program in his absence. She said they are not sure yet. I showed medical resources catalog & let her know I thought it could be helpful for her, the other nurses, & the physicians. She looked through it & said she would post it as she felt it had a wealth of useful courses for them. She said they struggle with pain management & how far to treat patients for pain, especially more chronic issues. She added that they sent out guidelines saying they would not be treating chronic pain going forward, but some exceptions are made as this can become a grey area. I asked if they had set out a time limit as far as what they consider to be "chronic". She said no & that that can be part of the difficulty. She said they will continue to treat their established patients, but for newer patients, that is where decisions will need to be made. I let her know I was available as a resource & to partner with her & the staff to assist with pain management & talked to dr about Butrans fpi,5 core selling messages,initiation guide and dr said she loved the idea of transdermal delivery and has been searching for a transdermal option for chronic pain patients.dr said majority of her patients are medicaid,uninsured and BWC.dr said she has a few patients with commercial insurance-we discussed formulary coverage and i asked dr since she's asking about insurance coverage does that mean she's got a few patients in mind to start on Butrans? dr said yes she does there are a lot of patients taking tramadol every day for their chronic pain and when that doesn't control their pain they want percocet and dr isn't comfortable giving that medication so she's willing to try Butrans in these patients and see what happens. showed dr initiation of Butrans info in visual aid and told dr that's great she's got some patients in mind and i'll follow-up with her to see how patients are doing.showed dr Butrans patient info booklet,discussed application/rotation section so dr can discuss this info with patients.recommended Senokot-S
PPLPMDL0020000001	Bedford	OH	44146	8/24/2011	Dr Moufawad said he got an invitation to attend a training in Connecticut. I asked his thoughts. He said he is planning to go & is looking forward to the training. He said everything is "fine" with Butrans. I asked him what types of patients he is identifying now as Butrans patients. He said it is the same patient type as he always was, he is just looking for different options to use for breakthrough pain. He added that he is now giving ibuprofen or Nycynta but has heard of physicians prescribing Percocet for breakthrough pain but he would not do that. I asked why. He said it would not work. I asked him to elaborate. He said clinically it would not work. He then said he had to go & went into a patient room. Spoke with Amber who requested more savings cards. She also said she is having a lot of difficulties getting Butrans covered. I asked what plan(s) & asked if it was Medicare/Medicaid giving her trouble. She said Medicaid. Discussed prior authorization. She said she has tried "everything" to try to get them to cover it but to no avail. Discussed managed care & emphasized BWC & commercial insurance. talked to dr about Butrans fpi,5 core selling messages and dr said he's not heard of Butrans but likes that it's a transdermal medication.asked dr what other features he liked about Butrans? dr said CII so calling in refills is easy and once weekly dosing.showed dr butrans visual aid,pg.11,pain conditions and asked dr if he treats these conditions? dr said yes,asked dr how he approaches these conditions as it relates to treating chronic pain? dr said all non-opioid therapies 1st,then will start patients on short-acting opioids.showed dr initiation of butrans section,discussed opioid naive and experienced patients and asked dr to just think of a couple patients that he can start on Butrans,dr said he will do that and asked who covers Butrans? discussed formulary coverage,told dr to focus on commercial plans and BWC,dr said ok but they have a lot of medicaid patients so he wanted to know coverage for them,discussed Prior Authorization requirements for medicaid patients.recommended Senokot-S
PPLPMDL0020000001	University Heights	OH	44121	8/24/2011	Ask doc for a moment to discuss Butrans. He said the co pay is too high. I reviewed the formulary plans and the importance of giving patients a savings card. Reminded him of the BWC coverage with oxycontin as well as butrans.<font color=blue><b>CHUDAKOB's query on 09/01/2011</b></font>Why does he think the co-pay is too high? What is too high to him?<font color=green><b>SIMERTOC's response on 09/12/2011</b></font>He has poor patients that don't want to pay more than a couple of dollars<font color=blue><b>CHUDAKOB added notes on 09/14/2011</b></font>That sound like a smoke screen to me. Until you get past that, you may have a difficult time getting him to prescribe anything.
PPLPMDL0020000001	Cleveland	OH	44109	8/24/2011	talked to dr about butrans fpi,5 core selling messages,dr is PGY-1,so not much experience prescribing opioids.dr said she likes transdermal delivery and once weekly dosing.dr asked about the molecule buprenorphine and wanted more info,showed dr butrans visual aid,MOA section,dr said ok and asked about insurance coverage for medicaid as that's majority of patients.we talked about insurance for medicaid but told dr to focus on commercial and BWC patients.asked dr if she had a few patients in mind if she's asking about insurance? dr said no just wondering.showed dr pain conditions,pg.11 visual aid and asked if she treats any of these conditions? dr said yes they see all of them but again this is her 1st yr so not much exposure to opioids yet.i asked dr to think of Butrans for either opioid naive or opioid experienced,showed info in butrans visual aid,dr said ok she'll keep it in mind.recommended Senokot-S
PPLPMDL0020000001	Independence	OH	44131	8/24/2011	I asked Dr Jack what it really is that is holding him back from prescribing Butrans. He said he knows I have been working hard on them for awhile now. I reminded him I have been visiting him weekly since January & told him perhaps he just does not see merit in Butrans as I would have to believe he would prescribe if he saw any benefit for his patients. He said that was not it. He said he is used to patches being "the big guns" & thinks of them automatically as strong. I agreed Butrans does have abuse/addiction potential & he should be cautious in prescribing & reminded him it is CII. He said he keeps forgetting that it is CII & thinks of it as a CII. Again told him this does not mean it is less abusable- he said he knows. Reminded him of once weekly dosing which he said he likes. Spent time with initiation guide, especially pg 6. Let him know it is not an option for all his patient, but to consider those with the chronic conditions we have talked about (ie spinal stenosis, spondylolysis). He said he really is going to prescribe now. Discussed managed care & savings. Maria (office manager) told me that one of Dr Jack's patients has been on OxyContin 40mg for awhile, was getting his script filled at a pharmacy in Brecksville. (She said she could not remember which chain it was). A male pharmacist at that pharmacy had been changing the quantity on the prescriptions & pocketing the extra pills. She said he had been doing this for a long time & was just caught two months ago.
PPLPMDL0020000001	Broadview Heights	OH	44147	8/24/2011	Spoke with Margaret, nurse, who said Dr Samuel would not be able to see me this afternoon due to patient load. Discussed with her Butrans patient information booklet & savings information for Butrans & OxyContin. She said they did not need any additional savings cards at this time & that they had no questions about Butrans. I asked her to give Dr Samuel the E-Detail invite & ask him to log on, explaining the interactive nature of the program. She agreed.
PPLPMDL0020000001	Broadview Heights	OH	44147	8/24/2011	Spoke with Margaret, nurse, who said Dr Samuel would not be able to see me this afternoon due to patient load. Discussed with her Butrans patient information booklet & savings information for Butrans & OxyContin. She said they did not need any additional savings cards at this time & that they had no questions about Butrans. I asked her to give Dr Samuel the E-Detail invite & ask him to log on, explaining the interactive nature of the program. She agreed.
PPLPMDL0020000001	Warrensville Heights	OH	44122	8/24/2011	Spoke with Adrienne (MA) who said Dr Zivic was not in. Discussed patient information booklets with her & talked about answering patient questions if they call in since she takes some of the calls. Also reviewed savings information for both products & discussed eligibility requirements. She said it is unfortunate that Medicare & Medicaid patients cannot use the discount cards because they have a lot of those patients in their practice. Reminded her of favorable OxyContin Medicare Part D coverage. She said she would leave Butrans information for Dr Zivic. I asked Dr if he's had success with any Butrans patients who he has started recently. he said he hasn't heard back from the ones he started this month, but if they didn't call back then it's good news. I asked him to focus on commercial insurance and BWC and he said he thinks it has been going through on managed care. Reminder that OxyContin is covered for Medicaid patients.
PPLPMDL0020000001	Westlake	OH	44145	8/25/2011	Dr is still frustrated with managed care for Butrans and has not tried any new patients. I reviewed the managed care grid and asked if he could just focus on appropriate patients who have Medical Mutual and Medco patients to start on Butrans. He said he would. I reviewed the saving cards for Butrans and reminder that OxyContin is an option covered on Med D AARP and Medicaid.
PPLPMDL0020000001	Westlake	OH	44145	8/25/2011	Dr said he knows about Butrans being an option but hasn't had any patients that want to stop pills and start Butrans.showed dr Butrans visual aid,told dr he could still give immediate release opioids to patients with Butrans.i asked dr what he liked about Butrans? dr said he likes that it's a patch and dosed once a week and thinks it is a good option but he hasn't had anyone in mind.dr had to go so told dr to focus on BWC or commercial pain patients when he is ready to start patients on Butrans,dr said ok.recommended Senokot-S<font color=blue><b>CHUDAKOB's query on 09/01/2011</b></font>What do you think he meant when he said he "Hasn't had anyone in mind"?<font color=green><b>BROOKAM's response on 09/05/2011</b></font>Barry,after taking a closer look at this call note and your query, this totally went over my head, so great catch on your part,on the next call with dr i will ask him who HE feels are appropriate patients for Butrans and i will be sure to show the Butrans visual aid, specifically pg.11, and discuss pain conditions.<font color=blue><b>CHUDAKOB added notes on 09/07/2011</b></font>Amy, thanks for having an open mind. I hope it proves useful.
PPLPMDL0020000001	Cleveland	OH	44113	8/25/2011	dr said he knows about Butrans being an option but hasn't had any patients that want to stop pills and start Butrans.showed dr Butrans visual aid,told dr he could still give immediate release opioids to patients with Butrans.i asked dr what he liked about Butrans? dr said he likes that it's a patch and dosed once a week and thinks it is a good option but he hasn't had anyone in mind.dr had to go so told dr to focus on BWC or commercial pain patients when he is ready to start patients on Butrans,dr said ok.recommended Senokot-S<font color=blue><b>CHUDAKOB's query on 09/01/2011</b></font>What do you think he meant when he said he "Hasn't had anyone in mind"?<font color=green><b>BROOKAM's response on 09/05/2011</b></font>Barry,after taking a closer look at this call note and your query, this totally went over my head, so great catch on your part,on the next call with dr i will ask him who HE feels are appropriate patients for Butrans and i will be sure to show the Butrans visual aid, specifically pg.11, and discuss pain conditions.<font color=blue><b>CHUDAKOB added notes on 09/07/2011</b></font>Amy, thanks for having an open mind. I hope it proves useful.

PPLPMDL0020000001	Cleveland	OH	44102	8/25/2011	talked to Nagla,PA,about patients she's seeing with all 3 doctors,that she feels are appropriate for Butrans.Nagla said she understands that if patients have chronic pain and are taking short-acting opioids daily and not controlled,they could be appropriate for Butrans.showed Nagla Butrans visual aid,appropriate patients section and asked Nagla if she can identify a few patients,taking low doses of short-acting opioids and recommend to doctors that these patients get started on Butrans? Nagla said she will do that and knows dr celeste and dr carson have started a few patients on Butrans and patients seem to be doing well.we talked about follow-up with patients,post initiation of Butrans,discussion of application/rotation of Butrans and showing patients Butrans patient info booklet,discussed formulary coverage for Butrans,recommended Senokot-5
PPLPMDL0020000001	Independence	OH	44131	8/25/2011	Quick call as I caught Dr Sundaram between patients. He said he knows I am there to remind him about Butrans. I reminded him of the patient type we have been discussing, mainly those with chronic conditions who are either ready for an opioid for a chronic condition or those who are not being well-controlled on their short-acting around-the-clock regimen of medication. He said he will keep it in mind. Also reminded him of OxyContin 7 tablet strengths, including 15, 30, & 60mg. He said "OK" & walking into a room. Spoke with Lisa, discussing appropriate patient type & savings available.
PPLPMDL0020000001	Parma	OH	44129	8/25/2011	Spoke with Kathy (MA) & discussed Butrans as a follow-up to my last lunch. She said Dr Tolentino actually had gone on medical leave since that last visit & that she just returned today. Kathy said she would remind Dr Tolentino what we had talked about at lunch (ie appropriate patient type) & would try to help her identify patients who may be good candidates. Also discussed E-Detail invite. She said she would give it to her but that she would not do it because she never does them. Told her it was worth a try.
PPLPMDL0020000001	Independence	OH	44131	8/25/2011	Dr Pai said he is having difficulty with Butrans again. I asked him to elaborate. He said insurance is not covering it. I asked if he remembered what plan. He said it was a Medicare Part D plan. I reviewed formulary grid with him, asking him to focus on commercial insurance patients. I asked him to tell me about the patient he had tried to prescribe Butrans for. He said it was a patient taking chronic Vicodin 3-4 times per day. I asked what was causing his pain. He said it was some form of low back pain. I showed inclusion criteria & asked if it was low back pain from any of those conditions. He said probably osteoarthritis. Told him that would have been clinically an ideal patient & he chose a good one to try, it was just that insurance was the hurdle. I asked if he has working patients like that one where he thought he may be able to prescribe. He said he does have a lot of patients, but added that most probably have Medicare Part D or Medicaid drug coverage. Told him even if it is a small part of his practice, he could try to identify a few patients to get a good sense of his thoughts of Butrans clinically. He said he likes buprenorphine as a molecule a lot & really has no objection other than insurance coverage. Gave him a formulary grid, discussed savings cards, & asked if he would keep trying Butrans for appropriate patients who have commercial insurance. He agree. Also discussed OxyContin as an option for patients beyond Butrans.
PPLPMDL0020000001	Northfield	OH	44067	8/25/2011	Followed-up on this lead per Cindy from Dr Ortega's office. Spoke with Maggie (nurse & office manager) & Jackie (MA) & introduced myself & Purdue's products. I let them know I work with Dr Ortega & Cindy & that they had recommended that I come in to see Dr Marshall. Maggie said today would not be a good day to see him. Asked when I could set up an appointment. She gave me his card & asked me to stop back after noon on a Thursday or on a Monday or to call & she would find a less busy day to stop in. Told her about Butrans (indication, appropriate patient type) & asked if she thought it sounded like something he would be interested in hearing more about.
PPLPMDL0020000001	Parma	OH	44129	8/25/2011	She said he does have patients who fit the profile & that she felt it would be worth him hearing about. Let Dr Paat know I was there to follow-up on our Butrans lunch. I reminded him of the patient type we spoke about & asked if he remembered the conversation he said he did but that he has not prescribed yet because he forgot. Reminded him of appropriate patient type, focusing on those with disease states from our inclusion criteria. I showed him the inclusion criteria again & asked if they were conditions he treated frequently. He said yes. I told him someone with one of those conditions who he was ready to start on an opioid & who had commercial insurance would be an ideal Butrans candidate. Also reminded him that patient could use a savings card & pay around \$15 out-of-pocket for their month's prescription of Butrans. He said he will do this for his next patient who fits those criteria & he has no problem with the medication. He asked me if Butrans is once-weekly dosing & I told him yes. Also handed him e-Detail invite. He thanked me & walked away.
PPLPMDL0020000001	Cleveland	OH	44106	8/25/2011	talked to dr about patients he's considering appropriate to start on Butrans.showed visual aid for discussion and showed pg.11 pain conditions.dr said he see's all of these conditions and treats all of them with non-opioid therapies 1st,then if patients still have chronic pain,he'll give them tramadol,he'll give them tramadol we talked about considering Butrans for patients opioid naive or after the 1st tramadol dose didnt provide pain control,dr said he's thinking of Butrans more and has started a few patients.dr asked about medicaid coverage,we discussed Butrans formulary coverage for medicaid and commercial plans.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44113	8/25/2011	talked to dr about patients he's considering appropriate to start on Butrans.showed dr pg.11 pain conditions,discussed treatment plans for a couple of pain conditions,dr said all non-opioid therapy choices are tried 1st then usually by the time they come to him,patients have tried all narcotics,once in awhile he gets "ew" patients that havent tried narcotics.dr said most patients have been taking tramadol or vicodin for years and thats all they want,they want their pills.talked to dr about considering Butrans as an option for patients earlier in therapy,right after tramadol isnt controlling the pain,dr said he is keeping Butrans as an option and will consider Butrans earlier for patients focused dr on BWC and commercial plans for Butrans.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44109	8/25/2011	dr said he hasnt started anyone on Butrans yet but he's reviewing patients charts with Nagla,PA, and seeing what she thinks about Butrans for some patients.dr said he knows Nagla worked with Dr Celeste to get a few patients started on Butrans so he's waiting to get feedback from Nagla on these couple patients before he prescribes.i asked dr what's really holding you back,preventing you from starting a couple patients on Butrans? dr said he thinks majority of patients like taking their pills and will have a hard time understanding that they have to apply a patch once a week,dr referenced the patient population being Medicaid that this was a challenge to understand Butrans and dr said its a lot of time to explain a patch,how it works,what patient has to do,etc.told dr he can put Butrans patient info booklets in exam rooms,which will educate patients,and dr is the 1 who decides what medication is best for patient.dr agreed and said its frustrating as many patients demand what they want and dr just gives them pills.i asked dr to take control of the situation,talk to a couple patients who have 1 of the pain conditions shown on pg.11,butrans visual aid,BWC or commercial insurance,and start them on Butrans.dr said ok he will do that.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44113	8/25/2011	talked to dr about patients he's considering to start on Butrans again,since he stopped writing for a bit.dr said he's thinking of patients taking tramadol or vicodin that have any pain condition but arent controlled.showed dr butrans initiation section in visual aid and dr said he will continue thinking of Butrans and start more patients,we discussed importance of application/rotation sections in Butrans patient info booklet,to share with patients and follow-up with patients to be sure patients are tolerating Butrans and proactively address side effects.dr said he is doing that.told dr to focus on BWC and commercial plan patients.recommended Senokot-5
PPLPMDL0020000001	Strongsville	OH	44136	8/25/2011	Spoke with technician who confirmed Butrans stocking for 5 & 10mcg. She said she thinks they have one or two customers on it regularly. Discussed their ability to print savings cards online at Butrans.com. She said she does not know if the pharmacists remembered that, so she would let them know. Also discussed patient information booklets, patient counsel, & letting patients know to give Butrans 3 days to start working. Reviewed OxyContin savings cards but she said they have enough for now.
PPLPMDL0020000001	Cleveland	OH	44113	8/25/2011	talked to dr briefly as dr said she started 1 patient on Butrans,dr said it was easy to discuss with this patient as patient had been taking percocet daily for chronic pain and not controlled.dr said she has initiation guide which is easy to understand and insurance info with butrans patient savings cards and has a couple booklets so she is good at the moment.i asked dr if she has a couple more patients,like the 1 she started,that she can start on Butrans? dr said yes and she will be doing that.recommended Senokot-5
PPLPMDL0020000001	East Cleveland	OH	44112	8/25/2011	I asked doc if he participated in the Butrans e-detail. He said he does not have time for that and he just wanted me to tell him what he needs to know. He did ask me if there was any stocking issues with oxycontin as patients are complaining that pharmacies are saying that it is on back order. I told him I was unaware of any stocking issues. I asked what he does for those patients. he said he just tells them to wait until it get in or try another pharmacy. Reminded him of the BWC coverage with Butrans and oxycontin.
PPLPMDL0020000001	South Euclid	OH	44121	8/25/2011	Window call....I reviewed the butrans patient type, formulary coverage and the savings card program. Gave her an e-detail invite and initiation guide. . Nothing learned.
PPLPMDL0020000001	Cleveland	OH	44121	8/25/2011	Window call....Reviewed the butrans indication/patient type and dosing. Gave doc an e-detail invite and formulary grid. Nothing learned.
PPLPMDL0020000001	South Euclid	OH	44121	8/25/2011	Window call....Introduction to doc. Gave him an initiation guide and formulary grid. Nothin learned.
PPLPMDL0020000001	Cleveland	OH	44113	8/25/2011	gave dr webcast invitation for Butrans,e-detail invite and asked him to consider Butrans as an option for his BWC patients that have 1 of the pain conditions,pg.11 visual aid,that are taking tramadol daily but not controlled.dr said he will consider it but highly unlikely that he'll prescribe Butrans as its a CIII and he doesnt write CII or CIII medications.dr said he'll start more patients on Ryzoil,as its a once daily dosing option of tramadol and he likes that but thats it.talked about Ryzoil value cards and told dr focus again on BWC for Ryzoil.recommended Senokot-5
PPLPMDL0020000001	Mayfield Hts	OH	44124	8/25/2011	Spoke to Steve Ilko, who replaced Sandy(who has retired). He confirmed stocking of 5mcg but he has not seen any scripts. He was on duty w/o a tech so he didnt have much time. I discussed the 7 day delivery of a CIII narcotic and the contents of the box.
PPLPMDL0020000001	Parma	OH	44129	8/25/2011	Caught Dr Rossi at the window for a quick call. Positioned Butrans once-weekly transdermal system in place of short-acting around-the-clock medication for chronic moderate to severe pain. Also handed back REMS packet & asked her to read its contents. She thanked me & went into a room. Spoke with Britney & reviewed patient savings cards, managed care, & information booklets.
PPLPMDL0020000001	Highland Heights	OH	44143	8/25/2011	Doc said he is having good results with Butrans. He thinks it is great for elderly patients and he asked about medicare coverage again. I reminded him of lack of coverage on medicare/medicaid. He said he has an elderly female patient on it for a couple of weeks and she loves it. She was able to afford it. I explained that medicare may cover it for just one month or she may have supplemental insurance. Spoke to Vickie about a patient on butrans that called Purdue about the patch not sticking well. Purdue sent him something to help the patch stay on. She did not know what the product was. I reviewed the formulary coverage of oxycontin and butrans.
PPLPMDL0020000001	South Euclid	OH	44121	8/25/2011	Window call....Reviewed the butrans indication/patient type and dosing. Gave doc an e-detail invite and formulary grid. Nothing learned.
PPLPMDL0020000001	Westlake	OH	44145	8/25/2011	Dr said that he has been continuing to prescribe Butrans and he's having success with most patients. I reviewed the inclusion criteria and he said that is almost all of his patients. He said he has been trying Butrans before going to methadone and instead of vicodin. I asked if he would start a new patients this week and he agreed. I spoke with the entire staff regarding the patient medication guide and savings cards. I let them know how to instruct the patients about application and that they should wait 3 days before titrating.
PPLPMDL0020000001	Cleveland	OH	44130	8/25/2011	I reminded Dr Diab of our last conversation when we discussed titrating short-acting upward vs switching patients to a long-acting. He said to hold on & he would come back after he saw a patient. When he did return, I asked him what makes someone a good candidate for a long-acting. He said only, "they need it," & then walked into a room. Spent time with Dina going over patient information guides & savings cards. She said she triages patients along with the rest of the MA's. She also finds out if they need refills on their prescriptions.
PPLPMDL0020000001	Akron	OH	44308	8/25/2011	Rupa Shah presented Disparities in Pain Care vs webinar. There was a total of 21-23 Case Managers from BH and Case Management who attended. I distributed the Safeguard my meds brochure after the program as well as 2 Med Ed catalogs for the CEs. Carla and Julie are both interested in another program for the end of Sept or Oct before they get busy in Nov-Jan.
PPLPMDL0020000001	Akron	OH	44308	8/25/2011	National Webinar: The August webinars, Disparities in Pain Care were successfully completed. The questions and dialogue that followed the presentations certainly illustrated the need for this type of information.Attendance records for the programs indicate the following:&#8226;Healthcare professionals in 23 states and DC participated&#8226;64 institutional encounters (over 90% were either Managed Care Organizations or Long-term Care Facilities)&#8226;190 healthcare professionals attended
PPLPMDL0020000001	Cleveland	OH	44103	8/25/2011	talked to Dave,Pharmacy Manager about Butrans 5 core selling messages and Dave said they havent gotten any Butrans scripts lately,asked Dave what really stood out to him about Butrans? dave said once weekly dosing and transdermal delivery.i asked dave if he would give patients Butrans patient info booklets,when he provides patient counseling if patients are taking short-acting opioids and not controlled? dave said he'll do that and patients can talk to their doctors as he's not recommending opioid changes to doctors they have to make those decisions.left booklets and asked dave to recommend Senokot-5
PPLPMDL0020000001	Westlake	OH	44145	8/25/2011	I asked Dr if he's seen any patients this past week who have a condition listed in our inclusion criteria. He said he has not seen any who were not already taking higher doses of opioids. We discussed OxyContin as an option for these patients. I asked if he would find just a few patients for Butrans and he agreed.
PPLPMDL0020000001	Westlake	OH	44145	8/25/2011	Quick call, I asked Dr if he's continuing to have success with Butrans and if he can think of more patients who might benefit. He said everything is going good and it's a good option. I spoke with Kelly and Tina and reviewed the savings cards and managed care for Butrans. They said that there have not been many prior auths for Butrans and everything is going smoothly.
PPLPMDL0020000001					

	Solon	OH	44139	8/25/2011	Had conf call with Dan Best, Dan Doucette any myself to discuss why the rebate owed to Member Health is delayed. Dan Best was told by Tony (rebate analyst)the reason it was held up was that I was holding it because I didn't know how to send it to as a text file. Dan Best didn't believe I would do that so he wanted to speak with us to get the facts. Dan D and I reviewed all of the communications I had with Tony and Mike since May 26 to get the utilization report but hadn't received it until Aug.23 from IMS. Dan Best said there's been alot of changes with the buyout and he knows the rebate dept has been behind and has had problems. He thanked us for our diligence in working with them and also apologized for the delay in getting the MKT pieces approved. I need to follow up with Mike regarding this. Dan Best thanked us for working with them and moving forward. We promised to work more with Tony to provide a timeline of what's due to Purdue to set up the estimated payment and make Dan aware if things are not getting done on time.
PPLPMDL0020000001	Cleveland	OH	44113	8/25/2011	talked to Dale,PA,about patients he's considering appropriate to start on Butrans as Dale said he's started a few patients recently.Dale said these are patients taking tramadol or vicodin daily and asking for more pills and he's starting them on Butrans instead and only giving short-acting opioids for breakthrough pain.Dale said he tells patients this is a patch and its dosed once a week,Dale said he thinks its just how you say it to the patients to gain acceptance.showed pg.11 pain conditions,discussed them and Dale said they see all of these but doctors will always go to injections,blocks,physical therapy,acupuncture,etc.,non-opioid therapies 1st then the doctors will consider opioids and he's recommending Butrans for patients who are opioid naive as well as those taking short-acting opioids daily and have been for years.we talked about insurance coverage,told Dale to focus on BWC and commercial plans.recommended Senokot-5font color=blue>b>CHUDAKOB added notes on 09/01/2011</b></font>Good next call objective Amy! The answer will be interesting!
PPLPMDL0020000001	TWINSBURG	OH	44087	8/26/2011	Introduced myself & Purdue's products to Amy, pharmacist. She said this location just opened two weeks ago & that they do currently have OxyContin but not Butrans. Let her know that several of the other locations do dispense Butrans & reviewed indication, dosing, delivery system, & appropriate patient type. Also discussed CII & abuse/addiction potential. She said it is nice for physicians to have an option for a transdermal system in the CII class. I asked if this building will have a pain management department & she said Dr Ningengowda will be coming here to see patients although she was unsure of the schedule. Discussed savings cards for Butrans as well as the ability to print them online at Butrans.com. Also reviewed OxyContin savings cards & gave her a package. She said she rarely has seen Ryzolt prescriptions so she did not want a package of savings cards. Let her know I spoke with MA Deena who said Dr Sadowski is on vacation this week. I asked her how we are going to get Dr Sadowski to try a few appropriate patients on Butrans. She said she is just going to start asking him when she hears from a patient who may be a good candidate. I asked her how many patients have called her asking for increases in their pain medications or who are telling her their short-acting pain medication is wearing off too quickly. She said "a lot". I told her some of them are potential Butrans patients. She said it would be a good fit in his practice, especially if he could try someone on that before referring to pain management. Reviewed CIII & abuse/addiction potential. She said to come back next week to try to see him.
PPLPMDL0020000001	Garfield Hts	OH	44125	8/26/2011	Spoke with MA Jenny & reviewed Butrans with her. Discussed indication, dosing, & delivery system. I also told her about Butrans E-Detail program & explained interactive nature of it. I asked her to give Dr Hochman a webcast invitation, FPI, & E-Detail invite. She said she would give the information to him & also remind Susan about my appointment request. She said to check back in a few weeks.
PPLPMDL0020000001	Westlake	OH	44145	8/26/2011	Quick call with Lisa, we reviewed the managed care and savings program for Butrans and OxyContin. She said she has not seen a lot of Butrans movement, but she feels comfortable tell new patients about proper use and application. Reminder about steady state in 3 day and that Drs can write refills.
PPLPMDL0020000001	Brooklyn	OH	44144	8/26/2011	Spoke with Tiffanie (MA) who said Dr Detwiler is on vacation this week. Discussed Butrans appropriate patient type & asked if that sounds like any of Dr Detwiler's patients. She said yes. She said she does get phone calls from patients saying they need an increase in their pain medications. She added that she only tells Dr Detwiler about it & then does whatever he tells her for that patient. She said she does not make suggestions or recommendations of medications to him. Discussed managed care coverage for Butrans & OxyContin. She said she would leave the information for him & that I could return next week to try to catch him.
PPLPMDL0020000001	Cleveland	OH	44113	8/26/2011	dr said he hasn't started anyone on Butrans as he couldn't remember much about it other than its a transdermal medication and asked me to review appropriate patients, dosage strengths and insurance info with him today.showed dr Butrans visual aid,discussed 5 Butrans core messages,asked dr what really stood out to him besides transdermal delivery? dr said once weekly dosing and that Butrans is a CIII. asked dr why those features? dr said patch dosed once a week is easier for some people and he could cut down some of the pills he writes every month.showed dr Butrans fpi,maintenance of therapy section discussed option of non-opioids or immediate release opioids with Butrans.showed dr pg.11 visual aid,pain conditions,discussed chronic low back pain and dr said all non-opioid therapies are tried 1st then he'll start patients on narcotics.talked to dr about Butrans being an option for opioid naive or experienced patients,dr said he probably wouldn't start someone on a long-acting opioid he would start with tramadol but if that didnt provide enough pain control he might consider Butrans after that.showed dr Butrans initiation section,discussed titration and how to write script of Butrans and asked dr if he had a couple patients today that he could talk to about Butrans? dr said he's not sure but if he does see some patients that he feels are appropriate,he'll consider Butrans,discussed formulary coverage,BWC and commercial insurance focus.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44109	8/26/2011	talked to dr about the couple patients he started on Butrans and asked dr if he could find more patients like that? dr said yes he thinks after all non-opioid choices are tried and he has patients try tramadol first,he will go to Butrans after tramadol.dr said he's not comfortable starting patients on a long-acting opioid,even knowing they have chronic pain and will need an opioid for an extended period of time.showed dr Butrans visual aid,pg.11,discussed low back pain and then appropriate patients section and initiation of Butrans,dr said he will look for more patients to start on Butrans.focused dr on BWC and commercial insurance for Butrans.recommended Senokot-5
PPLPMDL0020000001	Northfield Center	OH	44067	8/26/2011	Spoke with technician as pharmacist was busy assisting customers. She said they do not have Butrans & she had not heard of it. Discussed indication, usage, appropriate patient type, & delivery system. Also discussed savings available through e-voucher or savings cards. Also discussed OxyContin savings cards & eligibility requirements for savings programs (ie no government plans). She said she would give the information to the pharmacists.
PPLPMDL0020000001	Macedonia	OH	44056	8/26/2011	Quick call- Saw Dr Yager at the window. Positioned Butrans for patients on short-acting around-the-clock opioids who may benefit from once-weekly transdermal option for pain. He waved & thanked me, then walked away.
PPLPMDL0020000001	Westlake	OH	44145	8/26/2011	Spoke with Marge who said they are undergoing the change to EMR, so they are especially behind. Reviewed patient savings information with her. She said she would be sure Dr Yager got the Butrans information I left for.
PPLPMDL0020000001	Warrensville Heights	OH	44122	8/26/2011	Quick follow up. Dr said he thought about Butrans after I left yesterday and started a new patient. I asked if he will start some more today as well. He said he will do his best.
PPLPMDL0020000001					Quick call- Caught Dr Brooks at the window & handed back Butrans webinar & E-Detail invitations. I told him both were interactive in nature & would be valuable sources of Butrans information. I asked him if he thought he would be able to log on. He said he was not sure but he would see, then walked away. Spoke with Beth, one of his MA's & reviewed Butrans formulary information & savings cards. Also discussed OxyContin savings cards. She said they have enough savings cards for both products for now.<font color=blue>b>CHUDAKOB's query on 09/01/2011</b></font>Did Dr. Detwiler move in with Dr. Brooks? Look at your next call objective.<font color=green>b>APSEGAS's response on 09/06/2011</b></font>No, no moving going on. I am not sure what I did there. I probably did not change the name of the physician if my next call objective was the same for both physicians & I copied it over. In looking at Dr Detwiler's next call objective, it appears that is what happens. While I rarely have multiple next call objectives be the same, I will pay better attention to that in the future. Apologies for any inconvenience.<font color=blue>b>CHUDAKOB added notes on 09/07/2011</b></font>No inconvenience. Copy and pasting is probably not advisable in call notes.
PPLPMDL0020000001	Cleveland	OH	44113	8/26/2011	lunch with dr bhiman's office
PPLPMDL0020000001	Cleveland	OH	44109	8/26/2011	talked to Ray,Pharmacy Mgr.about Butrans and Ray said no scripts for Butrans yet.asked Ray what features of Butrans stood out to him? Ray said once weekly dosing and transdermal delivery.asked Ray if he would share Butrans patient info booklets with patients,when he provides patient counseling on opioids if patients tell him they arent controlled on short-acting opioids? Ray said he'll give booklets to patients and they can talk to doctors as he doesnt recommend opioids to patients,discussed formulary coverage for Butrans and talked about OxyContin stocking and formulary coverage.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44125	8/26/2011	Spoke with Emily, pharmacist & reviewed Butrans with her. She said she knows about it but has not dispensed it. Discussed ability to take supplemental analgesia with Butrans in the form of opioid or non-opioid immediate release medications. She said she would imagine a drug interaction warning coming up when trying to dispense Butrans for a patient on other opioids due to the nature of buprenorphine. Also discussed appropriate range of patients & patients beyond Butrans being possible OxyContin candidates. Reviewed Butrans savings via e-voucher & OxyContin savings cards as well as eligibility requirements.
PPLPMDL0020000001	Twinsburg	OH	44087	8/26/2011	Spoke with Jackie (MA) & discussed savings cards for Butrans & OxyContin. Also reviewed eligibility, making sure she knows patients with any type of government insurance cannot use the cards. Also gave OTC samples & worked with Jackie to schedule lunches to meet with the internal medicine group & Dr Leonard. I asked Jackie to be sure Dr Leonard got the Butrans information & invitation & she agreed to get it to her ASAP.
PPLPMDL0020000001	Solon	OH	44139	8/26/2011	Spoke with Mike regarding OxyContin Marketing pieces. We reviewed the feedback he received from his VP of MKT and says there may be more levels of feedback from Caremark. He says their Compliance has not been easy to work with so he will provide feedback next Friday. I summarized his edits and forwarded this to Dan, Lynn, Tim and Todd.
PPLPMDL0020000001	Cleveland	OH	44109	8/26/2011	worked pm&dr dept-see call notes on doctors
PPLPMDL0020000001	Beachwood	OH	44122	8/26/2011	Quick call- Saw Dr Tabbaa at the window. Attempted to stop him by offering Butrans & OxyContin savings cards. He said he did not need any more at this time, thanked me, & walked away. I spoke with Amy, one of his residents, who said he was still seeing patients. Offered to wait to talk to him but she said he would not want to stay. Discussed Butrans with her, reviewing indication, dosing, & delivery system. Also offered to her online education information. She was grateful & also promised to remind Dr Tabbaa about Butrans & give him the information I provided. She said they are in a huge transitional period right now, & with Jim gone, nothing is consistent with them. She said my best bet is to keep returning to try to see him.
PPLPMDL0020000001	Cleveland	OH	44109	8/26/2011	dr said he has a few patients in mind that he wants to speak with about Butrans,dr said he's going to give them Butrans patient info booklet to read and follow-up with them.showed dr Butrans visual aid,discussed pg.11,pain conditions dr talked about chronic low back pain patients and this treatment plan for them and use of opioids,dr said he's conservative and would start patients on tramadol.asked dr to start a few patients like this that tried tramadol and when that wasnt controlling their pain,start them on Butrans.dr said he will consider that option.dr asked about medical aid coverage for Butrans,discussed formulary coverage for Butrans.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44103	8/26/2011	talked to dr about patients with chronic low back pain and how he treats this pain condition,showed inclusion criteria pg.11,visual aid,discussed dr treatment for condition.dr said he starts with muscle relaxers,nsaids,physical therapy,manipulation,injections,etc all non-opioid therapies first then he'll start patients on tramadol or vicodin.I asked dr if he had any commercial insurance patients that could use Butrans savings cards like this and start them on Butrans right before tramadol? dr said he would to short-acting opioids first then consider a long-acting opioid.I asked dr to think of a few patients today that he could start on Butrans right after the 1st tramadol dose if he wouldnt consider an opioid naive patient,dr said ok he had to go.gave OxyContin reminder and formulary coverage reminder.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44113	8/26/2011	dr said she's still starting patients on Butrans and is happy with clinical improvements in patients pain,dr said she's really been focused on patients taking vicodin and percocet daily for their chronic pain that keep asking her for more pills as they arent controlled told dr she could also consider starting patients that take tramadol daily for chronic pain,showed pg.11 pain conditions and discussed a couple of them and dr said she always tries NON-opioid therapies 1st then she'll start patients on tramadol,dr said she's not comfortable starting patients on a long-acting opioid when they are "opioid naive",dr said she understands thats an option but isnt going to do that.told dr that she could consider Butrans right after the 1st dose of tramadol isnt controlling patients pain,dr said she will consider that,discussed formulary coverage,focus BWC and commercial insurance,recommended dr said she has a few patients on Butrans and they are doing well,she's continuing to discuss Butrans with patients that are taking percocet every day for their chronic pain but not controlled and asking her for something else.showed dr pg.11,inclusion criteria and asked her if she treats these conditions? dr said yes,asked dr how she manages chronic pain for these conditions,dr said all non-opioid therapies first and each pain condition is different but when patients need a narcotic,sh'e'll start them on tramadol,asked dr to start a couple patients today,that have 1 of these pain conditions, on Butrans instead of starting them on a short-acting opioid like tramadol,dr said she will think about it,discussed formulary coverage,focus on commercial and dr said she's got a lot of medical aid so she's doing the PA for Butrans and its not a problem.OxyContin reminder,focus on medical aid and medicare for OxyContin and savings cards.recommended Senokot-5
PPLPMDL0020000001	Olmsted Falls	OH	44138	8/26/2011	Spoke with Kelly. We reviewed the medication guide for Butrans, and what to tell patients when they get a script. We discussed steady state and that Drs can call in and write refills since it's CIII.
PPLPMDL0020000001	Maple Heights	OH	44137	8/26/2011	Spoke with pharmacist Antuina & reviewed Butrans. She said she has not seen a single prescription for it. Discussed managed care, reminding her that Medicare & Medicaid would require prior authorization. She said about 1/2 their customers have Medicaid or Medicare coverage. Let her know that supplemental analgesia can be taken in the form of opioid or non-opioid medications which she said she was not aware of & was good to know.
PPLPMDL0020000001					Also discussed steady state in 3 days. Reviewed patient counsel & information booklet. Also discussed savings through e-voucher for Butrans & savings cards for OxyContin.

PPLPMDL0020000001	Mayfield Heights	OH	44124	8/26/2011	I reviewed the Butrans selling messages with doc and asked for his honest opinion - does he have patients in his practice that may be appropriate for butrans. He said probably not a lot. I asked him what keeps him from trying butrans. He said its just finding the right patient. He said he would probably think of it when he thinks of duragesic. I clarified that butrans is a patch similar to duragesic but the two are not interchangeable. Butrans is a CIII,can be prescribed as a first line narcotic, and may be more similar to hydrocodone vs duragesic in terms of analgesia and patient type. I reviewed formulary coverage and the savings cards. I explained that oxycontin may be appropriate for patients already taking 4-6 tabs/day of hydrocodone.
PPLPMDL0020000001	Brooklyn	OH	44144	8/26/2011	Quick call- Dr Miguel said he had very little time because Dr Detwiler was out of the office. Positioned Butrans for patients with chronic conditions who need around-the-clock opioid medication. He said he will try to remember.Also delivered reminder for OxyContin 7 tablet strengths & q12h dosing.
PPLPMDL0020000001	Lyndhurst	OH	44124	8/26/2011	I spoke with Patricia and Karen about the butrans indication and positioning. I asked them what they consider to be benefits of butrans. Patricia said that it is a once weekly patch. She also stated that the problem is the coverage. Most patients taht are ideal can get tramadol or vicodin for cheap. I reminded them of the formulary plans and savings cards. Patricia said they want to write it but they arent having enought opportunity with the patients that they have. Karen agreed and said they would continue to try.
PPLPMDL0020000001	Lyndhurst	OH	44124	8/26/2011	I asked doc how often she has patients that fail or max out on tramadol and she considers putting them on vicodin. She said that it is not uncommon, they may got to vicodin or something else. I asked her if she would consider pputting them on butrans instead, if they meet the indication. She said she has been trying to identify the right patients but the patient may be elderly or not have the right coverage. I reviewed the commercial insurance plans and asked her to try for those pateints. Reminded of the oxycontin patient type and coverage.
PPLPMDL0020000001	Lyndhurst	OH	44124	8/26/2011	I spoke with Patricia and Karen about the butrans indication and positioning. I asked them what they consider to be benefits of butrans. Patricia said that it is a once weekly patch. She also stated that the problem is the coverage. Most patients taht are ideal can get tramadol or vicodin for cheap. I reminded them of the formulary plans and savings cards. Patricia said they want to write it but they arent having enought opportunity with the patients that they have. Karen agreed and said they would continue to try.
PPLPMDL0020000001	Parma	OH	44129	8/29/2011	Dr Taylor asked if the state of Ohio is going to re-open the enrollment option to be registered as a pain clinic. I told her I do not know. She said if they do, she will apply, but if they do not, she will have to change her practice so that she is in alignment with the new laws. She said she is still "considering" using Butrans & that of all the pain medications, she is more likely to prescribe Butrans than any other. I reminded her that she had told me that there was a patient who she offered Butrans to but who declined. I asked her what it was about the patient or Butrans that made her choose it. She said because it is long-acting & CIII. I asked if she would look for other appropriate patients who might be candidates & reminded her that patients do not have to give up their short-acting medication when starting Butrans. She said she will remember that & will offer it to other patients. Invited her to my program but she said she will be in Florida & cannot attend.
PPLPMDL0020000001	Parma	OH	44129	8/29/2011	Jackie said she has not seen any Butrans activity. She added that she does still have the 5mcg strength but she sent back the 10mcg due to inactivity. I asked her if she had a customer who she noticed was requesting refills of their chronic Vicodin or tramadol too soon, if she would ever call their physician to recommend something long-acting like Butrans. She said that she does call those physicians who are "open" to suggestions. She said some physicians, like Drs Susteric & Dr Chagin, are willing to accept suggestions while others, including Cleveland Back & Pain physicians are not. She said Cleveland Back & Pain usually writes Vicodin for 1-2 weeks at a time for patients. I asked if she would ever recommend a product to a customer directly. Jackie said usually not because the patient will not say anything to the doctor. I gave her a tray of patient information booklets & let her know she could give them to patients if she felt Butrans might be something they would want to ask their doctor about. She agreed to put those on her shelf & do this.
PPLPMDL0020000001	Cleveland	OH	44106	8/29/2011	talked to dr about patients that have pain conditions, pg.11, and how he approaches them in pain management, dr said majority of their patients have already tried opioids so they are either changing medications or continuing them, dr said he likes Butrans being transdermal and prefers this delivery system, dr said he's rotating between all 3 locations and is recommending patients to get started on Butrans to the attendings.talked about 5 core messages, appropriate patients and focused dr on commercial plans and savings cards recommended Senokot-5
PPLPMDL0020000001	Independence	OH	44131	8/29/2011	Discussed Butrans appropriate patient type, focusing on those who may benefit from a long-acting option. Reiterated that Butrans is a once-weekly transdermal system of buprenorphine that is CIII. She said she heard they are trying to get a law passed that would allow mid-level practitioners to prescribe Butrans. I told her that as a CIII, she should be able to prescribe now & that others have done so without issue. She said she thought that for whatever reason, NP's & PA's could not prescribe buprenorphine products. Told her I did not know of this restriction. She said she would look into it & I let her know I would let her know if I heard anything further about that. Invited her to September 15 program. She said she is interested in attending. I offered to register her but she said she would do it. She said she likes to learn about products whenever possible & that she recently attended a pain conference that was very helpful for her. Debbie asked if BMI has an effect on Butrans absorption. Completed e-MIRF to get the question answered for her via medical services & told her I have no data that studies this
PPLPMDL0020000001	Cleveland	OH	44106	8/29/2011	talked to dr about 5 Core Butrans selling messages, dr talked about once weekly dosing and transdermal delivery, asked dr if he treats the pain conditions listed pg.11, visual aid? dr said yes they see all of those conditions, asked dr how he manages chronic pain for these conditions? dr said he will consider an opioid if patients pain is persistent and chronic, but usually they start patients on tramadol, asked dr how he would consider Butrans appropriate for patients? dr said if patients have tried short-acting and its not controlled pain, then would consider a long-acting opioid, showed dr appropriate patients section and asked if he had a couple patients with chronic low back pain that are taking short-acting opioids daily but not controlled? dr said he's sure there are some like that, asked dr if he could start these patients on Butrans instead of giving them short-acting opioids? dr asked about insurance coverage for Butrans, specifically Medicaid? talked about formulary coverage, focused dr on commercial plans, recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44113	8/29/2011	talked to dr about pg.11 pain conditions in visual aid, dr talked about chronic low back pain patients saying he will try all non-opioid therapies first, then consider an opioid and many patients he see's have already been on opioids so he's either maintaining that medication regimen or changing medication showed appropriate patients, opioid experienced, and asked dr if he could start a couple patients with chronic low back pain on Butrans? dr said he will consider it and knows Butrans is available, dr asked about insurance coverage, discussed BWC and commercial plans, talked to dr about OxyContin being an option for patients and discussed formulary coverage for OxyContin, recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44109	8/29/2011	discussed initiations presentation with dr, discussed patient case studies and showed dr butrans visual aid, 5 core messages, dr focused on transdermal delivery and once weekly dosing of Butrans, dr said he has patients taking tramadol and some have chronic pain so he thinks this could be an option for them, showed dr pg.11 visual aid, discussed pain conditions, dr focused on osteoarthritis as he treats a lot of patients with this pain condition, asked dr to start a few patients on Butrans per our discussion, dr said he will think about who's coming in this week and who would be appropriate, showed appropriate patients section, discussed initiation and titration of Butrans and butrans patient savings cards for commercial plan patients, recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44109	8/29/2011	showed dr Butrans initiations presentation, discussed 4 patient case studies and dr said majority of her patients with pain conditions dont take their tramadol daily, dr said even though patients have chronic pain, they have good days and bad days so they dont always have to take their tramadol, dr said thats why she's been hesitant to start anyone on Butrans, showed appropriate patients section and asked dr if she would ever consider Butrans for patients with osteoarthritis, who have chronic pain, instead of tramadol, dr said probably not, I asked dr to think of a few patients per our discussion that she knows they are taking tramadol daily for their chronic pain but not controlled and instead of refilling their tramadol, start them on Butrans, dr said ok she will consider it but doesnt have anyone in mind at the moment, dr asked about insurance coverage, discussed formulary plans and talked to dr for a minute, dr was busy with patients but said he hasnt started anyone on Butrans recently and he has mainly medicaid patients here in this office, gave dr Butrans webcast and dinner invitation(9/15/11) dr said he usually doesnt go to dinners because he's so busy but he'll look all the information over, gave dr butrans initiation guide and discussed appropriate patients if he has any commercial plan patients that he feels are appropriate to start on Butrans and left 1 pack Butrans booklets with him, dr said he is only working 1/2 day monday and 1/2 day wednesday's from now on and asked if I ever went to independence office, told dr that independence office was covered only by Ashleigh Aspega who dr knows, dr said ok try to catch him here but will be hard as he's always swamped with patients.
PPLPMDL0020000001	Lakewood	OH	44107	8/29/2011	Spoke with Rick, he has not seen movement of Butrans, we reviewed the medication guide and the important things to let patients know about Butrans when they first get their script. Reminder about savings cards for Butrans and OxyContin.
PPLPMDL0020000001	Lakewood	OH	44107	8/29/2011	Spoke with Pam, she has seen a few Butrans scripts and they have some of the patient medication guides to hand out. We reviewed the managed are and savings program for Butrans and OxyContin. We discussed that OxyContin is still an option and we are still discussing with physicians.
PPLPMDL0020000001	Westlake	OH	44145	8/29/2011	I showed the inclusion criteria and asked if he sees these types of patients, he said he does sometimes. I asked if Butrans might be able to benefit any of these types of patients he sees and he said he will give it a try. We reviewed how to prescribe and the invitation guide.
PPLPMDL0020000001	Lakewood	OH	44107	8/29/2011	I asked Dr if he still had the savings cards on his counter to remember Butrans, he does. I asked if he would start some of the patients we talked about in the past who he felt would benefit and he said he will if he sees them this week.
PPLPMDL0020000001	Lakewood	OH	44107	8/29/2011	Quick follow up, I asked if he found any more patients that could benefit from Butrans, he said he had only started the one and he has not heard back, he agreed to start more patients. We reviewed the savings cards and asked him to had out to commercial insurance patients. We reviewed the OxyContin is still an option covered on Medicaid. <font color=blue><b>CHUDAKOB's query on 09/08/2011</b></font><font color=blue><b>CHUDAKOB's response on 09/12/2011</b></font>-maybe something like- Dr I've been talking to you about Butrans for a while now and I'm surprised that you haven't decided to prescribe it for more of your patients. What types of patients are you thinking would be appropriate for Butrans?<font color=blue><b>CHUDAKOB added notes on 09/14/2011</b></font><font color=blue><b>CHUDAKOB added notes on 09/14/2011</b></font>-Much better! Thanks!
PPLPMDL0020000001	Cleveland	OH	44109	8/29/2011	worked rheumatology dept- call notes on rheumatologists
PPLPMDL0020000001	Lakewood	OH	44107	8/29/2011	Quick call, I asked Dr if he would try just a few patients on Butrans and I showed the invitation guide. He agreed. I spoke with the staff and asked if they had just a few patients with commercial insurance who could benefit from Butrans and they agreed to look for patients who's short acting was not controlling their pain. Reminder that OxyContin is still an option that is covered on Medicaid.
PPLPMDL0020000001	Euclid	OH	44119	8/29/2011	Quick call....Showed doc the butrans demo patch and reminded him of the indication and positioning. I asked him to log onto the butrans e-detail to learn more about the product. Butrans and oxycontin formulary reminder.
PPLPMDL0020000001	Cleveland	OH	44115	8/29/2011	talked to dr about her patients with osteoarthritis, showed pg.11 butrans visual aid, and how dr treats this condition, dr will try all non-opioid therapies first but if patients have persistent pain and its chronic pain, she will start them on tramadol, dr said even though these patients have chronic pain, some days are good and they dont need to take tramadol daily and other days are bad where they do need tramadol, dr said she only has a few patients that she knows take tramadol daily where she could consider Butrans as an option. dr asked about insurance coverage for Butrans, focused dr on commercial plans and patient savings cards, asked dr if she had a couple patients this week, per our discussion, that she could start on Butrans? dr said she might but will have to think about it, recommended Senokot-5
PPLPMDL0020000001	Lakewood	OH	44107	8/29/2011	Quick follow up, Dr told me that he tried to write Butrans for a Humana patients and it did not go through. I reviewed the managed care plans where Butrans is covered and I spoke with the staff. They were very frustrated with the managed care. We reviewed managed care for OxyContin as an option as well. <font color=blue><b>CHUDAKOB added notes on 09/08/2011</b></font><font color=blue><b>CHUDAKOB added notes on 09/08/2011</b></font>-Sounds like you need to do everything possible to alleviate any managed care concerns with the staff.
PPLPMDL0020000001	Independence	OH	44131	8/29/2011	Dr Trickett said she just saw one of her Butrans patients & that she reported that she felt great for the first 3 weeks/patches of Butrans therapy, but two days after she applied the 4th patch, she felt very nauseous & sick. She said the patient reported great pain relief for those first 3 weeks, but the 4th patch "made her sick". She said the patient was on 5mcg Butrans & had taken Vicodin as supplemental analgesia at first, but had since stopped taking it because she was doing well on Butrans alone. Dr Trickett said the patient had applied the first three patches as follows: upper outer arm left, upper outer arm right, upper back, upper chest. It was the patch on the upper chest that caused the problem. Asked if this would affect her prescribing in the future & she said no. Reminded her that the patient had reported good pain relief on Butrans but let her know I would report the adverse event. Discussed inclusion criteria with her. She said she treats patients frequently with these types of conditions. Asked if they are always painful. She said not necessarily- they are all chronic but are not all painful for all people. She said it is patient-dependent & that it can be difficult to treat pain patients because pain is so subjective. She said she will refer to pain management if she notices that a patient needs escalating pain medications.
PPLPMDL0020000001					Dr Trickett said she ended up prescribing OxyContin 10mg q12h for the patient who came off Butrans. The patient had been on Vicodin tid

PPLPMDL0020000001	Parma	OH	44134	8/30/2011	Spoke with Tom, a floater pharmacist & inquired about stocking of Butrans. He checked the shelves & confirmed that this location does stock all 3 strengths of Butrans. They actually had 2 cartons of each & had some open cartons. Discussed appropriate patient type (ie those on chronic Vicodin or tramadol who may benefit from a long-acting or transdermal option), which Tom said is very common. Gave him a patient information booklet & let him know that it can be given to patients. Let Tom know I would return another time to discuss Butrans with the regular pharmacist.
PPLPMDL0020000001	Cleveland	OH	44103	8/30/2011	talked to dr about her patients with some of the pain conditions on pg.11, butrans visual aid, dr said she has a lot of low back pain and arthritis patients, discussed with dr starting these patients on Butrans instead of tramadol. dr said she will consider Butrans earlier in therapy as she's only thought of a few patients that are currently taking percocet and weren't controlled, then she talked to them about Butrans. showed dr appropriate patients section and discussed initiation of Butrans. focused dr on commercial plans and patient savings cards. discussed OxyContin being an option for patients and formulary coverage. recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44105	8/30/2011	dr had questions about the MOA of Butrans, showed visual aid and dr was comfortable with Butrans after discussing this info. dr asked who the appropriate patients were again as she couldn't remember? showed dr Butrans visual aid, appropriate patients and pg.11 pain conditions and talked about inclusion criteria. i asked dr if she treats these pain conditions? dr said yes a lot of low back pain and arthritis. we talked about dr's approach to pain management and dr said once patients get started on pills they just want more and more pills, we discussed initiation of Butrans for a couple patients with low back pain and arthritis so dr could get some clinical experience, dr said ok she will think about who's coming in this week and see if patients will put a patch on and remember to rotate weekly. showed dr Butrans patient info booklet, told dr to focus patient discussions on application/rotation of Butrans, dr said ok. focused dr on BWC and commercial plans. recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44113	8/30/2011	dr said he has some patients coming in this week that he's going to discuss Butrans with, asked dr what types of pain conditions these patients had? dr said a variety, showed pg.11 visual aid and showed pain conditions and asked if they were any of these listed? dr said yes probably a few of them he will see this week, dr said he's thinking more about patients who are always calling their office asking for refills of tramadol or vicodin and he doesn't feel comfortable prescribing more pills, so he wants to discuss Butrans with these patients and see if they are interested. had dr explain how he will describe Butrans to patients, showed patient info booklet and asked dr to focus on application/rotation section and give booklet to patient before they leave his office, dr said ok. showed dr initiation guide, how to write Butrans script and initiation dosage strengths, focused dr on BWC and commercial plans. recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44124	8/30/2011	Quick call....Reminded doc of the butrans patient type and the positioning - before going to short acting opioids ATC. I explained the commercial coverage and savings cards. I also told him that Butrans is covered by BWC similar to Oxycontin. Nothing learned
PPLPMDL0020000001	Parma	OH	44129	8/30/2011	I asked Dr Gigliotti if it was common for patients with chronic conditions who are on short-acting around-the-clock medications for pain to not be well-controlled. He said it is common & this happens all the time. He then said he has "maybe 5" patients who fit that description. I told him those are potential Butrans patients if they have commercial insurance. He said he writes more OxyContin than he wants to & would like to write less. I asked him to focus on Butrans for patients where appropriate & if patients were out of the range for Butrans, he could consider OxyContin. He did not acknowledge this. I invited him to the September program but he said he could not attend. Reminded him of online opportunity with E-Detail which he had posted in his office.
PPLPMDL0020000001	Cleveland Heights	OH	44118	8/30/2011	I reviewed the butrans positioning. Doc said he can do better. He asked about medicare/medicaid. I showed him the formulary grid for commercial coverage. He asked about the 3-tier cost and said that patients won't pay a 3rd tier co-pay. I reminded him that he has savings cards that will save them up to \$40/month. He said he will try and do better. Reminded him of the max dose and that oxycontin might be appropriate after that.
PPLPMDL0020000001	Cleveland Hts	OH	44118	8/30/2011	Quick call....reminded doc of the appropriate butrans patient type, starting dose and coverage with commercial insurance plans. Provided formulary grid reminder for oxycontin and butrans. Nothing learned
PPLPMDL0020000001	Euclid	OH	44117	8/30/2011	Window call...I reminded doc that he would try butrans again for a BWC patient. He said he has not yet. I reminded him of the coverage with state workers comp over employer groups. I explained the 5 and 10mcg initiation dose and showed him the demo patch as a reminder.
PPLPMDL0020000001	Cleveland	OH	44113	8/30/2011	showed dr Butrans initiation presentation, discussed 4 patient case studies and dr said she doesn't really start many people on opioids but does have patients taking tramadol and a few on vicodin and percocet. dr said she likes long-acting opioids and would consider Butrans for patients if they are taking tramadol every day and not controlled and start asking for more pills. showed dr Butrans visual aid, discussed pg.11 pain conditions, dr talked about low back pain and how she focuses on non-opioid therapies first, then she'll start them on tramadol if they still have pain. told dr that's where she could start patients on Butrans, dr said ok and we discussed initiation of Butrans and focused dr on application/rotation of Butrans in patient info booklet. dr asked about insurance coverage, focused dr on BWC and commercial plans. recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	8/30/2011	talked to dr about his patients with low back pain, showed pg.11 visual aid for discussion, dr said he is thinking of Butrans for more patients with low back pain when their short-acting opioids aren't controlling their pain. asked dr if he had a few patients coming to see him today that he could start on Butrans? dr said he might and will look at charts to make notes about discussing Butrans. focused dr on BWC and commercial plans.
PPLPMDL0020000001	Euclid	OH	44132	8/30/2011	I reminded doc that he liked the idea that butrans meant less frequent dosing. He said the problem is the cost and that nobody is covering. He said he tried to write if for workers comp but it was a hassle. I asked him how much of his practice consists of state BWC vs. self-insured. He thought maybe 50/50. I explained that State BWC is where it's covered. I also reviewed the commercial plans and the savings cards. He asked about side effects - I referred to the AE chart in sales aid. I explained how to initiate at the proper dose. He said he would give it another try. Reminded him of the Ryzolt and oxycontin patient types and bwc coverage as well.
PPLPMDL0020000001	Cleveland	OH	44109	8/30/2011	talked to nate, pharmacist, about Butrans and if he's seen any scripts. Nate said not recently, showed Nate Butrans 5 core selling messages and asked Nate what really stood out to him about Butrans? Nate said once weekly dosing and transdermal delivery and Nate said he was surprised that Butrans is a CII as he forgot that and thinks doctors will like that so scripts can be called in for Butrans. asked Nate if he provides patient counseling to patients taking short-acting opioids daily for chronic pain? showed pg.11 visual aid, pain conditions discussed with Nate. Nate said they do provide patient counseling for these types of patients but really no recommendations on medications that's up to dr. gave Nate patient info booklets and asked Nate to hand those to patients and have patients discuss Butrans with their doctors. Nate said ok. discussed formulary coverage for
PPLPMDL0020000001	Euclid	OH	44132	8/30/2011	Spoke to Tim about the recent volume of butrans and oxycontin scripts. He said he has just a couple of patients on butrans (Dr. Marshall is the prescriber). Oxycontin scripts have really tapered off and he is not seeing much these days. I offered savings cards for both but he said he did not really need them.
PPLPMDL0020000001	Parma	OH	44134	8/30/2011	I showed Dr Hernandez the inclusion criteria for Butrans & reminded him of previous discussion regarding patients who are referred to him from chiropractors. I asked him if those patients suffered from conditions such as those listed, like spinal stenosis & spondylolisthesis. He said yes & that those are very common. He said Butrans works & it is his "go-to" medication, especially for those patients. Invited him to September dinner program, but he said he will not attend if he cannot bring his wife. Explained that these are PhRMA guidelines. He said other companies allow it. Told him we abide by these rules with no exceptions.
PPLPMDL0020000001	Mayfield Hts	OH	44124	8/30/2011	Doc said he has been contacted by Purdue about speaker program training. Had said he has been trying to prescribe more Butrans. He said he has one guy on 10mcg and the patient is doing fine. He thought of an elderly female that would be a good candidate and he asked if she had supplemental insurance but she did not. I reminded him to think of the patient with Rx coverage through work. He said he will try to write more.
PPLPMDL0020000001	Parma	OH	44129	8/30/2011	Dr Ortega said he had a question for me regarding Butrans- He told me about a patient who was on 5mcg Butrans but was having breakthrough pain. He said the patient asked the pharmacist if he could take a Percocet for breakthrough pain & the pharmacist said he could do so but to be cautious. The patient took one Percocet for breakthrough pain & felt it really helped the pain. Dr Ortega asked me what he is supposed to do for patients with breakthrough pain on Butrans & asked if it was OK that the patient took a Percocet. Confirmed that this was acceptable & reminded him that per our package insert, patients can take opioid or non-opioid medications for breakthrough pain. He asked why the pharmacist would have advised caution. Reminded him that Butrans can precipitate withdrawal in patients already on high doses of opioids & this is why a taper to <30mg morphine equivalent is recommended before initiating treatment with Butrans. I asked him if patients like the ones we have discussed with conditions like spondylolisthesis are challenging to treat. He said "not really". He said most surgeons consider these surgery candidates, but he tries to manage their pain with medication instead. Supported the way he practices & how he takes time to talk to patients & spends time discussing their medications. He said he has found both Butrans & OxyContin to be effective, good medications. Invited him to program in September. He said he may be able to come, but was not 100% sure.
PPLPMDL0020000001	Cleveland	OH	44103	8/30/2011	dr said he hasn't seen anyone with commercial insurance so he isn't thinking of Butrans. dr said he has limited time and really can't discuss a new product with patients so it's easier for him to just refill patients short-acting opioids. showed dr Butrans visual aid, discussed pain conditions briefly and dr said when Medicaid covers Butrans, with no PA, he'll consider writing it. talked to dr about OxyContin being available on Medicaid and Medicare and an option for patients, dr said he knows and it's easy for him to write so no issues with OxyContin. recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44130	8/30/2011	I told Dr Fedorko I had only one question for him. I asked him if he had a commercial insurance patient who had a chronically painful condition, who was not well-controlled on tramadol, if it made sense to start them on Butrans once weekly instead of prescribing Vicodin. He said it does make sense but he just tried to prescribe Butrans for someone last week & it did not go through due to insurance, who required Duragesic instead. Emphasized commercial insurance coverage. He also said he does not write new Vicodin prescriptions. He said the patients who he has on Vicodin are already on it when they come to him so he does not start them. He also said they are all addicted to it. He added that he would rather start a patient on Butrans than Vicodin because it does not give the "ups & downs" like Vicodin. I told him that Butrans is still an opioid & that it still carries abuse & addiction potential like other opioids. He said he knew that but it is the "ups & downs" of drugs like Vicodin & Adderall that makes them addictive. Told him we have no data that states that Butrans is less addictive or abusable. He said he knows & that this is from his clinical experience. He said Butrans does make sense & he does see a place for it but that insurance doesn't cover it. He agreed to attend the Butrans dinner program in Sept.
PPLPMDL0020000001	Parma Heights	OH	44129	8/31/2011	Worked with Mindy, who explained e-prescribing & emphasized commercial insurance coverage for Butrans.
PPLPMDL0020000001	Parma Heights	OH	44129	8/31/2011	Spoke with Al & gave him the invitation for upcoming pharmacist's webinars for Butrans. He asked me why it isn't "going anywhere". I told him it is at certain locations & I was not sure why his was not one of them. He asked me about some physicians who I do not call on. He also asked me if the Rutkowski's have prescribed. I told him that Dr Jack told me just today that he prescribed for a patient & that he may be willing to listen if Al ever calls to make a recommendation. He said that was good, but he can never get through to them if he calls. Al went on to say that he feels there is a tremendous market for Butrans as a long-acting CII. I agreed there is a place for Butrans. He said he would try to help me when he could. Also checked stock on OxyContin & Ryzolt savings cards.
PPLPMDL0020000001	Maple Heights	OH	44137	8/31/2011	Spoke with Kathy & Arlene (MA's) & reminded them of Butrans usage & appropriate patient. Told them about the upcoming program for Dr Dale & Dr Eugene & asked if they ever come to programs. They said usually not, but sometimes. I let them know they have not yet heard a presentation for Butrans & asked that they give them the invitations & ask them to consider going. They agreed to do this.
PPLPMDL0020000001	Cleveland	OH	44113	8/31/2011	dr said she started 1 patient on Butrans that was taking short-acting opioids for chronic pain, not controlled and had tried all short-acting opioid options so Butrans was a great option for this patient. showed dr Butrans visual aid, pg.11 discussed pain conditions and how dr manages chronic pain for these conditions, dr said all non-opioid therapies are tried 1st then she would start patients on tramadol. asked dr if she would consider Butrans as an option, before tramadol? dr said she might but usually tries short-acting like tramadol 1st to see if that controls the patient's pain and if that doesn't work then she would probably consider Butrans. discussed appropriate patients to start on Butrans, showed visual aid with this info and initiation guide, dr said she'll keep talking to patients about Butrans and start more patients on Butrans. asked dr to focus on BWC and commercial
PPLPMDL0020000001	Mayfield Heights	OH	44124	8/31/2011	Spoke to Warren about the appropriate patient for butrans. He said he gets a couple of scripts for it occasionally and has not had any issues with it. I showed him the patient info guide and explained the proper application of the patch (in case patients ask) and the disposal unit. He thought that that was a good way to discard the used patches. Gave him a savings card sales piece.
PPLPMDL0020000001	Cleveland	OH	44113	8/31/2011	dr said he's still looking for patients to start on Butrans, looks every day at his list to see who's coming in so he can discuss Butrans as an option. dr said some patients don't want to wear a patch for a week and would prefer their pills. showed dr pain conditions, pg.11 visual aid, discussed several conditions and dr said he thinks some patients just need more education on Butrans as it's new to them and new to him, dr said he's giving patients Butrans patient info booklet to read and having them come back for a follow-up discussion and see if Butrans could be an option for them. discussed appropriate patients with dr and asked him to think of a few patients this week that he could discuss Butrans with and start them on Butrans and still give patients immediate release opioids if he feels that's appropriate, dr said ok he'll do his best. focused dr on BWC. recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44104	8/31/2011	showed dr Butrans visual aid, pg.11, discussed inclusion criteria and asked dr how often she sees these pain conditions? dr said she sees most of them, but a lot of low back pain and osteoarthritis patients. dr said she knows Butrans is an option for patients and likes the once weekly dosing but she's not trying to start anyone else on an opioid. dr said she's maintaining the patients that are taking short-acting opioids now but that's what she's asked dr when patients have chronic low back pain and they are taking tramadol and vicodin every day but that doesn't control their pain at some point, how does she manage patients' therapy? dr said most of her patients are controlled on short-acting opioids but if not she'll send them to pain management. showed dr butrans initiation guide, discussed appropriate patients and asked dr if she could discuss Butrans with a couple patients like we discussed and start them? dr said she'll consider Butrans but isn't sure she has anyone in mind. focused dr on commercial plans and patient savings cards. recommended Senokot-S
PPLPMDL0020000001					

	Cleveland	OH	44130	8/31/2011	Introduced Butrans to Dr Popa, delivering 5 core messages & alerting her to box warning. I spent time going over appropriate patient type with her & reviewed Butrans study inclusion criteria. I asked if this sounded like patients in her practice. She said yes, although she "hates" pain management. I told her I understand that it can be difficult & advised to be just as cautious in prescribing Butrans for appropriate patients who she trusts. Discussed CIII & abuse/addiction potential. She asked if it was more/less addictive than other opioids. I told her we have no comparative data & again asked that she is cautious. She said she usually only prescribes pain medications for one month at a time. I showed her the demo kit & showed her the 4 patches in a month's supply. Dr Popa asked the cost. Discussed insurance status & savings cards. She asked cash price. I showed her the WAC information. I asked that she think of commercially insured patients who clinically fit the description we have been talking about. She said she would keep it in mind & then left.
PPLPMDL0020000001	Cleveland	OH	44106	8/31/2011	talked to dr about his patients with osteoarthritis that he can consider starting on Butrans,dr said he see's a variety of pain conditions and is thinking of Butrans,showed pg.11 visual aid,pain conditions,discussed inclusion criteria and discussed appropriate patients section,dr said he will continue starting patients on Butrans,focused dr on commercial insurance patients,talked to dr about OxyContin being an option for patients and focused dr on Medicare and Medicaid coverage for OxyContin.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44104	8/31/2011	talked to dr about pain conditions,pg.11,visual aid,asked dr how he treats his patients with osteoarthritis,discussed all of his non-opioid therapies then dr said when those arent working to control patients pain,he'll consider an opioid,dr said he's very conservative as he has an elderly population,so he usually starts with tramadol but definitely a short-acting opioid initially as he's hoping patients pain will improve and be controlled with short-acting analgesics.showed appropriate patients section,discussed initiation of Butrans and asked dr if he would consider Butrans for the patients we just discussed? dr said he would after tramadol or another short-acting opioid failed,focused dr on commercial plans and asked him to start a few patients like we discussed right after that 1st dose of tramadol isnt controlling patients osteoarthritis,dr said he will consider it more for patients he just has had many in the office that he felt were ready to start on Butrans.recommended Senokot-S
PPLPMDL0020000001	Mayfield Heights	OH	44124	8/31/2011	I reminded doc of our lunch last week and the appropriate patient for butrans. He said he still has not tried it yet. I gave him an invite to the 9/15 speaker program and asked if he thought he would be interested in learning more. I said maybe. Told him I would check back in a week and if he is interested I could register him to attend.
PPLPMDL0020000001	Cleveland	OH	44113	8/31/2011	dr said he started 1 patient today on Butrans because patient was taking vicodin daily and not controlled,so he discussed Butrans with this patient and patient was willing to wear the patch and change it weekly,dr gave patient the Butrans patient info booklet and discussed application/rotation of Butrans,dr said he's got Butrans in his mind,its in his algorithm and is starting more patients,asked dr when he see's these pain conditions,pg.11 butrans visual aid,how he manages pain? dr said most patients with these conditions have already tried short-acting opioids and he's either maintaining or changing their opioids,asked dr to consider Butrans earlier in therapy instead of waiting for them to be taking 40mg daily of hydrocodone combo,dr said he knows earlier is probably better for his patients to start on Butrans so he will give it more thought,focused dr on BWC and commercial plan insurance.recommended Senokot-S
PPLPMDL0020000001	Tallmadge	OH	44278	8/31/2011	Mentioned to the Dr that I was in a pharmacy and they said that they had a script of Butrans from him and I would like to review some information from our FPI and he said that he did write one but is the only dr there and was behind but would like some savings cards. I said I have a lunch with him next week and we can sit down and discuss appropriate patients selection
PPLPMDL0020000001	Bedford	OH	44146	8/31/2011	Spoke with a technician & discussed Butrans overview (usage, dosing, indication). I let her know I had discussed it with John & Andy a few months back & showed her the webinar invitations. I confirmed with her that Andy is now the pharmacy manager & asked her to give him the Butrans webinar invitation for pharmacists. She agreed to do this & also gave him my card. Let her know I would return to follow-up.
PPLPMDL0020000001	Cleveland	OH	44104	8/31/2011	talked to dr about patients with pain conditions,pg.11 visual aid,that were in the inclusion criteria,dr said she see's these pain conditions and does have a lot of patients on opioids,dr said its been very frustrating lately though and her chronic pain patients are driving her nuts because they are so demanding with what pills they want,asked dr to consider Butrans for a few patients,with pain conditions we discussed on pg.11, and get some clinical experience? dr said she will do it at some point,just hasnt been able to think about a new medication like Butrans,showed dr Butrans patient info booklet and told her to give this booklet to patients to discuss application/rotation of Butrans,dr said she liked that as this would help educate them and take up less time,focused dr on commercial insurance plans and Butrans patient savings cards,discussed OxyContin being an option for patients,showed OxyContin conversion guide and discussed a few conversions with her and then focused dr on medicaid and medicare for OxyContin and recommended Senokot-S
PPLPMDL0020000001	University Hts	OH	44118	8/31/2011	Window call...Reminded doc of the butrans patient type, 7 day delivery and CIII status. Provided formulary grid for butrans and oxycontin and an invitation to the butrans 9/15 program. nothing learned.
PPLPMDL0020000001	Cleveland	OH	44113	8/31/2011	worked pain management dept - lunch with dr shen and dale novak,PA
PPLPMDL0020000001	Cleveland	OH	44130	8/31/2011	I asked Dr Kansal if conditions such as spondylolysis & spondylolisthesis were common in his practice. He said yes & that 28% of people over 50 who were studied in one particular study, were asymptomatic even though they had these types of conditions. I asked if he was saying that these conditions are not always painful. He said yes. I asked if they are ever painful. He said yes. I said why not use Butrans in those patients? He said if patients come to him with those types of conditions & request treatment from him first, he would refer out to pain management. He said usually people go to the ER for pain medications first, so they are already on medication when they come to him. He said that is why he can't use Butrans. I asked when he would typically use a long-acting medication. He said "never". I clarified, repeating back to him that he "never" uses any long-acting medications for pain. He said that is correct. I told him it was possible that I was wasting our time & that he may not have a place for Butrans, OxyContin, or Ryzolet if that is really true. I asked if he wanted me to stop calling on him. He said he does not want that & that I am welcome any time. Invited him to dinner program, letting him know what a great opportunity it would be to discuss Butrans with other physicians. He said he probably would not go. dr said she started a few more patients on Butrans,these were patients that were taking vicodin and 1 was taking percocet for chronic pain but the short-acting opioids werent controlling their pain,so dr thought Butrans would be a great option.dr said she explained to patients this was a once weekly dosing option in a patch and she would still give some short-acting medication for break through pain,asked dr if she had more patients like this,that she can start on Butrans? dr said yes she does and is going to continue starting patients on Butrans,focused dr on BWC and commercial plans,discussed OxyContin as an option for patients,focused dr on Medicaid and Medicare for OxyContin,dr asked for Ryzolet value card tray as she does have some patients that would prefer a once daily dosing of tramadol,dr thinks Ryzolet would be a great option,left 1 tray for dr and focused dr on BWC and commercial insurance for Ryzolet.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44143	8/31/2011	I showed doc the butrans demo patch and reviewed the indication, CIII status and 7 day delivery. He said he is writing it and then walked away. I spoke with Angela who confirmed that he is prescribing it and she was not aware of any issues. I asked him where he is using butrans. She could not recall if it was after tramadol or after vicodin. I explained that 'after tramadol' is more appropriate and likely. I gave her a butrans formulary reminder and more savings cards which they needed.
PPLPMDL0020000001	Cleveland	OH	44113	8/31/2011	talked to Dale,PA,about patients he feels are appropriate for Butrans,Dale said whether patients have never taken an opioid or currently taking vicodin or percocet,he's thinking of Butrans as an option.Dale said he thinks if you start patients on a long-acting opioid like Butrans earlier in therapy,its easier for patients to get used to the notion of a longer acting medication versus starting patients on a short-acting opioid where they will always want their pills and it may be tougher to discuss a once weekly dosing medication.showed pg.11 visual aid for discussion,we talked about pain conditions and Dale's approach to pain management with dr shen and dr daoud.asked Dale if he has more patients,like the one's he's started on Butrans,that he'll see today? Dale said probably so.asked Dale to start more patients on Butrans,discuss application/rotation of Butrans and give patients Butrans patient info booklets,focused dale on BWC and commercial insurance plans.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44135	8/31/2011	Followed up with Randy, he said that he knows that Dr Ryan, Tabbaa, & Astley have all written Butrans but he did not have any other feedback so far. Jim will be out for a few more weeks.
PPLPMDL0020000001	Cleveland	OH	44106	8/31/2011	talked to dr about his patients with pain conditions,shown on pg.11 visual aid,discussed inclusion criteria and asked dr if he had more patients coming in to see him today,like the one's he's been starting on Butrans? dr said yes he does and always has Butrans in mind as an option,focused dr on commercial insurance and asked him to find a few patients today that he could start on Butrans,dr said he will do that.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44113	8/31/2011	talked to Laura,NP,briefly about pain conditions,pg.11 visual aid,and asked how she approaches treating chronic pain? Laura said by the time they get to her,patients have already tried several short-acting analgesics and she's either maintaining their current medication or changing their medication.Laura said she knows about Butrans and really just hasnt given time to discuss with patients.Laura said she's leaving the practice in Sept,but appreciated the info on Butrans,told Laura I appreciated her time and if she came across any patients with the pain conditions we discussed,she could consider Butrans as an option,Laura said ok.
PPLPMDL0020000001	Warrensville Heights	OH	44122	8/31/2011	Saw Dr Zivic at the window. I handed back a Butrans dinner program invitation & asked him to attend. He said chances were slim, but he would consider. I asked him what percentage he would say he would give as a probability that he will be there- 10%? He said he wouldn't go that high. He said he will keep the medication in mind, but probably not the program. I asked him about patients who have chronic conditions such as spondylolysis & spondylolisthesis. He looked surprised. I asked if he has patients who have those conditions. He said yes, a lot. I asked if he would prescribe Butrans for patients with those types of conditions who are not well-controlled on tramadol, instead of going to Vicodin. He agreed.
PPLPMDL0020000001	Cleveland	OH	44114	8/31/2011	talked to John,PA,about patients he's recommending to dr katz and dr marshall,that are appropriate to start on Butrans.showed pain conditions,pg.11 butrans visual aid and asked if John treats these pain conditions? John said yes,they see all of them and a lot of low back pain as they have a lot of BWC patients.asked John if he can think of a few patients today and this week that he will start on Butrans and recommend Butrans to dr katz and dr marshall,John said yes he will do that and its been easy to get patients started and no issues with insurance,talked about showing patients Butrans patient info booklets and discussing application/rotation of Butrans and John said he does have that discussion and booklets are helpful to give patients,focused John on BWC and commercial plans.recommended Senokot-S
PPLPMDL0020000001	Bedford	OH	44146	8/31/2011	I reminded Dr Moufawad that he had told me he would not prescribe Percocet for breakthrough pain for a patient who was on Butrans & asked him if he would explain to me why that is, since the package insert states that opioid or non-opioid medications could be used for breakthrough pain. He said it is because of how buprenorphine binds & then said he had to go. I handed him a dinner invitation for September program & asked if he would attend. He looked at the date & said he thinks he will be able to go. I told him this would be an opportunity to speak with other experts about their experience with Butrans. He said he is going to try to be there. He also said he is going to attend the training in Connecticut for sure & that he is looking forward to learning.
PPLPMDL0020000001	Mayfield Heights	OH	44124	8/31/2011	Quick call....I asked doc what she remembers about butrans. She said "Its a patch like tramadol or vicodin". I explained that it is a CIII patch with 7 days delivery. I gave her a invitation to the 9/15 speaker program. I asked if she ever attends programs. She said not too much as she has kids at home. Provided formulary grid as well.
PPLPMDL0020000001	Warrensville Heights	OH	44122	8/31/2011	Spoke with Debbie & Ulianna (nurse) about Butrans, reviewing usage, indication, delivery system, & CIII/abuse & addiction potential. I told them about the upcoming dinner program & asked if they thought he would attend. They said he usually does not. I reminded them that he has not yet heard a formal presentation on Butrans, so that may give him a good reason to go. They both agreed & said they would mention that to him when they give him the invitation & Butrans literature.
PPLPMDL0020000001	Cleveland	OH	44114	8/31/2011	dr said he's got some patients on Butrans,they are doing well and he's happy with pain improvements,some patients are going from an 8-10 pain score down to a 2 so thats a good thing,dr said insurance seems to be covering it so no issues there,asked dr if he has more patients that he'll see today,this week,like the one's he's started on Butrans? dr said he probably will,asked dr to continue starting patients on Butrans to get more clinical experience,dr said he will do that,focused dr on BWC and commercial plans.recommended Senokot-S
PPLPMDL0020000001	University Heights	OH	44121	8/31/2011	I reviewed the butrans patient type - indication and positioning before going to short acting opioids ATC. I asked him if he has any patients in his practice that might benefit from butrans. No comment. I offered him an invite to the 9/15 speaker program. No said, "No. Never". I gave him a formulary grid reminding him of the commercial coverage.
PPLPMDL0020000001	Lyndhurst	OH	44124	8/31/2011	Quick call....I offered doc another opportunity to learn more about butran. I explained the upcoming speaker program on 9/15. She said she is rarely able to go to those things. I explained the e-detail available for 24 hrs access. No commitment.
PPLPMDL0020000001	Independence	OH	44131	8/31/2011	Dr Jack paused when he saw me. He said yesterday he put his first patient on Butrans. I told him I was not surprised he found a patient so soon after our last discussion. He said it was an older woman & he started her on Smcg. He asked if Medicare Part D covers it & I told him it does not. I told him the prescription would likely not get approved if she has Medicare Part D. He said not to be discouraged because he already told her that & that she is "very well off" & will be paying cash for her prescription of Butrans. I handed him a dinner invitation. He said at first he would not go. Then he noticed how close it is to his office location. I told him it would be the a fantastic opportunity to speak with specialists & experts who have experience with Butrans. He said he will consider "for me". He then walked into a room.

PPLPMDL0020000001	Independence	OH	44131	8/31/2011	Dr Rob only stopped quickly on his way into a room only to say that he is still keeping Butrans in mind & he would talk to me another time. Let him know I would leave him a dinner program invitation. He said he would have a look at it & would consider.
	Cleveland	OH	44113	8/31/2011	dr said she's continually starting patients on Butrans,dr said its easy to explain and get patients to start Butrans.dr tells them its a once weekly dosing and its in a patch,dr said she gives them short-acting opioids for breakthrough pain,but less than she was prescribing before so she's happy with that.dr said no problems with insurance and she doesn't see any drawbacks to starting patients on Butrans.asked dr if she has more patients today and this week that are like the one's she started on Butrans? dr said yes she probably does and will continue starting patients on Butrans.discussed patient savings cards for commercial plan patients and
	Waterford	OH	45786	9/1/2011	W - Waters said that he hasn't written for Butrans but likes the idea. He said that he has no reservations about the product and will try and remember in order to gain some clinical experience. I - Butrans follow up and review of indication and 7 days of buprenorphine therapy in 1 application with a CIII scheduling. Use of Core Sales Aid to discuss inclusion criteria and conditions that can cause chronic pain. Discussion of appropriate starting doses depending on patients current therapy. Review of formulary coverage - BWC and commercial plans with a 3T status. No coverage for Medicare Part D plans , but hopefully will have some coverage in 2012. Savings card program eligibility.
	Westlake	OH	44145	9/1/2011	Dr said that he is thinking of Butrans as an option to titrate some of his patients down. We discussed the initiation guide and how to taper patients down before starting Butrans. I asked him to focus on commercial insurance and BWC. We discussed OxyContin as an option when Butrans may not provide adequate analgesia.
	Cleveland	OH	44112	9/1/2011	Introduced doc to butrans and the 5 selling messages. He said he heard something about a new patch. I explained the CIII status and 7 day delivery and the positioning. I gave him an speaker program invite to learn more as well as an e-detail invite. He said he might be interested in attending a program.
	Cleveland	OH	44109	9/1/2011	dr said he's not started any patients on Butrans,still looking for right patient.showed dr butrans visual aid,pg.11,focused dr on patients with the pain conditions listed and if these patients have chronic pain,consider Butrans an option,showed dr Butrans initiation guide and discussed appropriate patients.dr said he'll think of some patients and said its just taking him longer to get started.focused dr on BWC and commercial plan patients for Butrans.recommended Senokot-S
	Independence	OH	44131	9/1/2011	Spoke with Janelle (MA) & reviewed Butrans indication, usage, & appropriate patient type. Also discussed savings cards for Butrans & OxyContin, which she said they have enough of. I told her about the upcoming dinner program in September & asked if Dr Boose ever goes. She said usually not but said she would give him the invitation. I asked her to remind him that this would be the first formal presentation he would be hearing on Butrans & to please consider going because of that. She agreed. She also let me schedule lunch & let me know that they had a new doctor join them, Dr Colleen Clayton.
	Beachwood	OH	44122	9/1/2011	Stopped in to Pain Management area on the 2nd floor. Spoke with MA Jackie & told her about the upcoming dinner program for Butrans in September. I asked her if she would post the invitation in an area where all the pain management physicians would see it & she agreed. She asked what Butrans was, so I reviewed with her the indication, usage, dosing, & appropriate patient type. She said it sounded like something they would be interested in. I asked about an appointment, but she said they still are not doing any. I let her know I would be back to follow-up to see if any of them were interested in attending the Butrans program.<font color=blue>-b>CHUDAKOB added notes on 09/08/2011</font>-b>-</font>Nice job of keeping in contact with them!
	Parma	OH	44134	9/1/2011	Spoke with Margarita (pharmacist) & gave her the online Butrans pharmacists program information. She said she may log on, but probably not. She said she usually only does them when credit is given. She added that she still has not seen any prescriptions for Butrans. I told her some locations stock all strengths as they have seen a lot of activity. I reviewed with her appropriate patient type, focusing on patients taking chronic Vicodin or tramadol & asked if that sounds like a common type. She said yes. Also discussed OxyContin savings cards.
	Waterford	OH	45786	9/1/2011	W - Vickie said that she wrote a script for Butrans for an elderly female patient in the nursing home. She said the patient loved it and it controlled her pain very well, but Medicare Part D would not pay for more than 1 month. She had to switch the patient to another product. I - Butrans review of indication and 7 days of buprenorphine therapy in 1 application with a CIII scheduling. Use of initiation guide to discuss appropriate patient selection and starting doses for patients depending on their current therapy. Review of formulary coverage and savings card program eligibility.
	BEDFORD	OH	44146	9/1/2011	Marcus said I came at a bad time. I gave him the Butrans pharmacist webinar invitation & asked if he thought he could log-on to hear a peer discuss Butrans. He said he usually doesn't if there are no CEU's given. I told him this would be a good opportunity to hear a PharmD talk about Butrans instead of just me. He said he'd keep the paper on it & see. Reviewed Butrans appropriate patient type & reminded him of OxyContin savings cards.
	Hudson	OH	44236	9/1/2011	Dr Seiple told me that he just "inherited" a patient who had been put on Butrans by another doctor. He said the patient reported to him that it "has changed her life". I asked him if he meant for the better & he said yes. He said she loves it & it has made a huge difference in her pain control. I asked what condition the patient had & what treatment she had been on before. He said she had abdominal pain but did not know what medications she was taking for it before. Discussed the indication & let him know it does not specify the etiology of the pain, just that it has to be moderate to severe & chronic in nature. He said he would really like to try Butrans in some of his low back pain patients. I told him some of them may be ideal Butrans patients & showed him the Butrans inclusion criteria & asked him if he treats patients for the pain associated with those conditions in his office. He said he does & that he is going to try Butrans on some of them now & also that he would like to try it in some fibromyalgia patients. I told him this was a great idea & showed inclusion criteria again, asking him to focus on the back pain patients since that is where it was studied. He agreed. Invited him to upcoming program but he said he could not attend due to a scheduling conflict. Discussed OxyContin q12h for appropriate patients beyond
	Waterford	OH	45786	9/1/2011	W - Miral said that she hasn't written for Butrans yet but likes the idea of a CIII long acting agent and will keep in mind for patients. Wishes there were Medicare Part D coverage. I - Butrans follow up and review of indication and 7 days of buprenorphine therapy in 1 application with a CIII scheduling. Review of appropriate patient selection when the indication is met, patients are uncontrolled on current therapy and patients are requesting a change in therapy. Review of formulary coverage - BWC and commercial plans with a 3T status. Savings card program eligibility to help offset copay costs.
	Hudson	OH	44236	9/1/2011	I showed Dr Tosino the inclusion criteria for Butrans & asked if he see patients who suffer from conditions such as spondylolysis & spondylolisthesis. He said he does, but he doesn't usually treat them for the pain associated with those conditions. He went on to say that usually the patients would see an orthopedic specialist or pain management specialist for that part. He said he does, however, sometimes end up maintaining those patients. Discussed Butrans as an option for those appropriate patients with conditions like that. I asked Dr Tosino if he could see himself ever prescribing Butrans & reminded him of the fact that it is the only CIII available that is long-acting, with once weekly dosing. Did remind him also that Butrans is an opioid & carries abuse/addiction potential. He said he never really thought of it as a long-acting CIII & now that I stated it that way, he can see a place for it. He said he needs an option between Vicodin & fentanyl & Butrans seems to fill that void. I told him those sounded like patients who would be candidates for Butrans & asked him to prescribe for those appropriate patients. He agreed. Also discussed OxyContin q12h 7 tablet strengths available for patients beyond Butrans. Invited him to upcoming program but he said he thinks his daughter has a game that night, but did say if she didn't
	Beachwood	OH	44122	9/1/2011	Quick window call with Jennifer- Handled her Butrans dinner program invitation & asked if she thought she could go. She said she wasn't sure but she would at least look at her calendar to find out. She also told me she will be leaving the practice by the end of the calendar year to move to China for her husband's job. She said she would stay until the end & was sorry to leave the practice. She said Dr Yokiell has been using more Butrans since my last visit & she & Chrissy have been working with him to remember it where appropriate.
	Euclid	OH	44119	9/1/2011	Spoke to Rebecca about the stocking of butrans. Stocked but no scripts seen. I reviewed the positioning of butrans and the savings cards program available to eligible customers.
	Westlake	OH	44145	9/1/2011	I showed Dr the 4 demo patches and let him know that his patients will get 4 patches for an entire month. He said he will keep it in mind and asked me about the dosing. We reviewed the invitation guide.
	Beachwood	OH	44122	9/1/2011	Spoke with MA Laura & asked her to post a Butrans dinner invitation in the physician lounge as well as give Dr Eckstein one. She said she would do this. I let her know that this would be the first time any of them would have heard a formal Butrans presentation & that it would be a good opportunity for them to discuss it with area experts. She said she would put a note by it & let them know. She said they are booked with lunches for the year but that I could return next month when she will have a new year's calendar to schedule for 2012.
	Westlake	OH	44145	9/1/2011	I showed the Butrans demo patches and let Dr know that his patients will get this at the pharmacy for a whole month. He said he is still working on finding some patients to try it on. I showed the inclusion criteria and reminded him that these disease states were studied. I asked if he would try just 2 patients and see how they do, he agreed.
	Bedford	OH	44146	9/1/2011	Caught Dr Haddad at the window & handed back a Butrans dinner program invitation. I asked if he thought he would be able to make it & reminded him that he has not yet seen a formal presentation about Butrans. He said he did not think he would be able to make it because he goes to the hospital after 5 on Wednesdays & Thursdays. I asked him to hold on to the invite & consider if possible. He said usually he can only go on Tuesdays but he would come if he can. Positioned Butrans for patients with commercial insurance & who are not well-controlled on their short-acting opioid.
	Parma	OH	44134	9/1/2011	I stopped Dr Mandat in the hallway by handing him a Butrans dinner invitation. He looked at it & I told him this would be a great opportunity to discuss Butrans with other area physicians & experts regarding their experience with it. He said that he sometimes goes to programs & was happy to see that this one is close to him. I asked if he would attend. He said he might & that he definitely could use more Butrans in the nursing homes & hospice patients he sees. He took the invitation, thanked me for the Senokot & Colace samples, & went into a room.
	University Heights	OH	44118	9/1/2011	Spoke to Asari about the stocking of Butrans. They do not have it stocked. I discussed the indication/positioning, CIII 7 day status. Explained that savings card program available to eligible patients. Let Him know about Purude other products in the portfolio as he was unfamiliar.
	Cleveland	OH	44102	9/1/2011	talked to nagla,PA,about patients seen this week and if anyone has been appropriate for Butrans.Nagla said she will work with doctors when they decide to start patients on Butrans,but usually isnt the one making ultimate decision on a new medication.asked Nagla if she see's pain conditions,pg.11 visual aid? Nagla said yes they see most of them and a lot of low back pain patients.Nagla said she likes that Butrans is transdermal and dosed once a week but sometimes patients dont want to try a patch and just want their pills.showed Nagla Butrans visual aid,supplemental analgesia section,discussed starting patients on Butrans but also giving immediate release opioid if dr thinks thats appropriate.Nagla said ok she forgot that and she will mention to other doctors.focused Nagla on BWC and commercial plan patients.recommended Senokot-S
	Berea	OH	44017	9/1/2011	I showed the inclusion criteria and asked if he see these types of patients and he said he sees a few, but is trying not to treat as much of these low back pain patients, I asked him to try Butrans for these patients and he said OK. Reminder that OxyContin is still an option when Butrans may not provide adequate analgesia.
	Cleveland	OH	44113	9/1/2011	talked to dr about the 1 patient he started on Butrans and dr said patient hasnt called back so thats a good thing.showed dr Butrans visual aid,pg.11,pain conditions and talked about patients that have osteoarthritis and considering these patients to start on Butrans,showed initiation section and asked dr if he'll see some patients today like we discussed where he can start them on Butrans? dr said he will see patients this afternoon and will consider Butrans for them,dr said he's only thinking of patients taking vicodin daily for chronic pain that arent controlled,asked dr if he's thinking of patients taking tramadol daily and not controlled? dr said no he's more concerned about patients taking vicodin and not his tramadol patients,dr said they are fine and controlled on tramadol,focused dr on BWC and commercial plans,dr is going out of town for 3wks so wont see patients till after 9/21st.recommended Senokot-S<font color=blue>-b>CHUDAKOB's query on 09/08/2011</font>-b>-</font>Hi Amy. Based on your call notes it sounds like he is happy with tramadol, and wants to get patients off of Vicodin. What do you think of a next call objective relating to prescribing Butrans after tramadol and before Vicodin?<font color=green>-b>BROOKAM's response on 09/12/2011</font>-b>-</font>yes sounds good will focus on that thanks<font color=blue>-b>CHUDAKOB added notes on 09/13/2011</font>-b>-</font>Thank you!
	Euclid	OH	44119	9/1/2011	I reviewed the Butrans key selling messages - CIII opioid, 7 day delivery. Before going to short acting opioids ATC. He said he keeps forgetting about it. I asked him if he would be interested in learning more about butrans at a speaker program on 9/15. He looked at his calendar and said, "we'll see". I reminded him of the commercial coverage and BWC again. I also distinguished the positioning vs. that of fentanyl which he inquired about earlier.
	Cleveland	OH	44113	9/1/2011	talked to dr about patients he see's with pain conditions,pg.11 visual aid, and how he manages chronic pain. dr said he starts patients on tramadol or another short-acting opioid.asked dr if he would consider Butrans for patients? dr said maybe after a short-acting opioid failed.asked dr what drawbacks he see's in starting patients? dr said its a new medication to him so he has to feel comfortable with the med and then the time it takes to explain a new medication.told dr we have Butrans patient info booklets to give patients,gave him a couple and asked him to focus discussion on application/rotation of Butrans,dr said ok he will think about patients today and tomorrow and see what patients say about Butrans.focused dr on BWC,tricare and commercial plans.recommended Senokot-S

PPLPMDL0020000001	Cleveland	OH	44113	9/1/2011	talked to dr about pain conditions he treats, showed pg.11 visual aid, dr said he treats many of the conditions listed but he doesn't write CII or CIII narcotics. dr said he starts patients on tramadol and maintains them, till that's not working and then he'll refer patients to dr nickels, down the hall who's an anesthesiologist. told dr if he has 1 patient, BWC or commercial insurance, who he felt Butrans would be appropriate before sending patients to dr nickels, he could still give tramadol for supplemental analgesia and showed dr butrans fpi with this info, dr said ok he will keep in mind but probably won't happen as he doesn't write CIII medications. we talked about OxyContin being an option for patients, focused dr on Medicaid and Medicare and dr talked about Ryzolet as a once daily tramadol that he will prescribe so i should keep talking to him about Ryzolet. recommended Senokot-S- color=blue><b>CHUDAKOB's query on 09/08/2011</b></font>-Dr, Raheja sound like a physician who is not going to prescribe our product line, except for Ryzolet. Your thoughts?<font color=green><b>BROOKAM's response on 09/11/2011</b></font>-that would be correct<font color=blue><b>CHUDAKOB's query on 09/13/2011</b></font>-Then why keep calling on him with Butrans?<font color=green><b>BROOKAM's response on 09/16/2011</b></font>-i thought I HAD to keep mentioning Butrans, in 1st position, and couldn't put Ryzolet in 1st if i can then that's what i'll do<font color=blue><b>CHUDAKOB added notes on 09/18/2011</b></font>-My suggestion is that you stop calling on him completely. He has told you he is not going to prescribe our promoted products.
PPLPMDL0020000001	Cleveland	OH	44106	9/1/2011	talked to George, Pharmacist, about Butrans stocking and scripts, George said he hasn't seen any scripts for Butrans recently but most of them came from Cleveland clinic doctors. showed George 5 Butrans core selling messages and asked him what features of Butrans really stood out? George said he liked that Butrans was dosed once a week and was transdermal. asked George if he provided patient counseling for patients taking opioids? George said yes, asked George to give patients Butrans patient info booklets and have patients discuss Butrans with their doctors. George said he will do that. discussed OxyContin stocking, Medicare and Medicaid coverage for OxyContin and recommended Senokot-S
PPLPMDL0020000001	Cleveland Hts	OH	44118	9/1/2011	I discussed the butrans selling messages and the commercial coverage. He asked about 3tier. I explained the higher copay but the savings cards offers up \$40 savings/mo. He thought that it was a deal to get patients started. He liked the idea of a 7 day patch. Discussed the initiation doing for opioid naive and opioid experienced patients. Provided e-detail invite as well as 9/15 program invite. He said he would look over the info.
PPLPMDL0020000001	Garfield Hts	OH	44125	9/2/2011	I stopped Dr Sadowski by handing him a Butrans dinner invitation for the 15th. I asked if he thought he would come. He said he doesn't do dinner programs. I told him this would be a great opportunity for him to discuss Butrans with other area physicians & experts. He said maybe. I also reminded him that he has not yet heard a formal presentation on Butrans, so it is not like he has seen this program dozens of times. He said that was a good point. I asked if he would at least consider going so that he could learn more about who Butrans is for & who it is not for. He said he would consider. Spent time with Deena, going over appropriate patient type. She said she knows of at least one specific patient who she thinks would be ideal for Butrans. She pulled her chart & said she has Med Part D AARP coverage. Discussed insurance coverage & asked about commercial insurance patients like her. She said he has some. Also discussed patient information booklet & asked her to put a tray of booklets in some exam rooms. She agreed to do this & put them in the main room in full view of Dr Sadowski to help remind Spoke with pharmacist, Anisa, & told her about Butrans pharmacists webinars, giving her an invitation. She said she would leave one for Shelly as well. Discussed Butrans appropriate patient type, focusing on patients who call too soon for refills of chronic short-acting opioids. She then had to take a customer phone call.
PPLPMDL0020000001	Beachwood	OH	44122	9/2/2011	Spoke with Bob & Donnie (nurse) who said that Dr Warren is running much too far behind to talk today. I told them about the Portal invitation & asked them to give Dr Warren a copy & ask him to log on. They said they would do this. Donnie said he did not think Dr Warren had been using any Butrans lately but wasn't completely sure. Reviewed appropriate patient type, focusing on patients on around-the-clock short-acting who are not well-controlled on current therapy. They promised to remind Dr Warren & said to come back next week.
PPLPMDL0020000001	Mogadore	OH	44260	9/2/2011	Did initiations presentation and she didn't say a whole lot during the presentation with she and Dr Cain. I asked if she sees patients like this and she said yes but she tries not to treat pain as much. I asked if she sees the conditions on page 11 and she said yes. I said when they are no longer controlled on Nsaid she can go to 5 mg of Butrans. We also discussed Oxycontin and potency compared to hydralcodone. She said she will consider
PPLPMDL0020000001	Mogadore	OH	44260	9/2/2011	Did initiations presentation and he said he would start all patients on 10mcg because of experience with his patients. He said he has been writing a lot of Butrans and he said either patients really like it or they don't. I asked what types of patients and he said patients who are on Vicodin. During presentation I showed him 2 other patients one who is opioid naive and one who is not controlled on Tramadol. HE said that makes sense to write instead of Vicodin. When we got to the patient who was not appropriate we discussed how that patient is a good patient for Oxycontin and we reviewed conversions and hydralcodone vs Oxycodone potencies and he said that is what it says on paper but he thinks it is a lot stronger. WE reviewed managed care for Butrans and Oxycontin
PPLPMDL0020000001	Independence	OH	44131	9/2/2011	Quick call as I caught Lisa at the window. She said they have been prescribing Butrans for more patients since the program & then said she had to get back to patients. I handed back a program invitation & asked her to consider going, as there would be different physicians in attendance & she may learn some additional information. She said she would see.
PPLPMDL0020000001	Parma	OH	44129	9/2/2011	I asked Dr Roherty if it is truly only insurance that is holding him back from Butrans. He said yes. I told him I have seen many patients in his waiting room over the last several months who were working patients & who must have commercial coverage. He laughed. I asked him what it really is holding him back. He said he doesn't know. He added that the patient who he had on prescribed Butrans for never ended up coming back. I asked him if he meant that she stopped coming because of Butrans. He said no, her living situation had changed, so she doesn't go there anymore. He said she had chronic back pain from work & was around 40 years old. I told him he had chosen what sounded like an ideal patient & that he must have a few more like her. I asked him to attend the upcoming program & gave him an invitation. He said he probably would not go. I reminded him he has not yet heard a Butrans program, so this would give him the opportunity he has been waiting for to discuss Butrans with other physicians & experts. He said he would consider. Also reminded him of OxyContin for patients beyond Butrans who may benefit from q12h dosing.
PPLPMDL0020000001	Independence	OH	44131	9/2/2011	I asked Roman what his thoughts were on the program he attended for Butrans. He said it was a good program & he got his questions answered. He said he is now prescribing more, but added that he still finds that patients have to take supplemental analgesia. I asked if he had considered titrating upward instead of adding more supplemental analgesia. He said he does that sometimes, but maybe should think of that more often. I agreed this may be a good option for some patients. Invited him to upcoming program, letting him know different physicians would be in attendance for him to speak with & he may learn something new. He said he might go but probably not. Roman said also Butrans is "expensive". I asked what he meant by that. He said patient's co-pays are very large. Discussed commercial insurance coverage, asking him to focus there or BWC. Let him know commercially insured patients could use savings cards, bringing their co-pay to approximately \$15. He said that was great. Also discussed OxyContin savings cards & managed care. Recommended Senokot-S for opioid-induced
PPLPMDL0020000001	Mogadore	OH	44260	9/2/2011	Spoke to Jerry and he said he has seen some Butrans scripts and I asked from who and he said he doesn't pay attention. I reviewed with him application and rotation and safety and gave him patient ed books. HE said they don't do a lot of Oxycontin, very little sched 2s. I reminded of SenS in opioid induced constipation
PPLPMDL0020000001	Woodmere	OH	44122	9/2/2011	Spoke briefly with pharmacist who said she was too busy this morning to talk to reps. I reminded her of e-voucher for Butrans & reviewed OxyContin savings cards. She thanked me & walked away. Gave Stephanie (tech) a patient information booklet & discussed application of Butrans with her. She said she would leave the booklet for the pharmacists.
PPLPMDL0020000001	Chagrin Falls	OH	44022	9/2/2011	Discussed chronic pain & treatment options with Dr Hudson. She said she probably does the most treating with opioids out of any of the doctors in the practice. She said it could be her comfort level or could be her patient population as she deals with musculoskeletal issues since she is an osteopath. Positioned Butrans for patients who call too soon for refills of short-acting opioids or those who are not well-controlled on this type of therapy. She said she thinks Butrans is a good option as it is long-acting.
PPLPMDL0020000001	Mogadore	OH	44260	9/2/2011	New NP at the practice. Discussed indication, patient types, initiation doses, warnings and managed care. Reviewed case studies with initiations. She said this is nice that it is once a week and schedule 3 so she can write. She asked about Oxycontin and if we reformulated it and I said yes and that it is still schedule 2 with all the same risks as any schedule 3 drug. We reviewed potency because she asked in comparison to Vicodin. She also asked how to take someone off of Oxycontin and I said that she needs to taper gradually and she said then down to a short acting and I said that would be fine.
PPLPMDL0020000001	Chagrin Falls	OH	44022	9/2/2011	Dr Rood said he now has another patient on Butrans in addition to the woman he has told me about. I asked him to tell me about the patient. He said he inherited this patient & he was already taking chronic opioid therapy, but was suffering from constant pain even though he was getting these medications. He said the "peaks & valleys" of his short-acting medication were not controlling the pain. I reminded Dr Rood that we have no data that states that Butrans is any better/safer/or more efficacious than any short-acting therapy. He said he knows, but this patient seems to be better controlled now that he is on Butrans. He said the patient is no longer calling too soon for refills or going to the ER for medications & is only taking Butrans. He did say that the patient complained that when he opened his box of Butrans, one of the patches was missing. He reported that when he cut open the pouch where the patch was supposed to be, it was empty. Dr Rood said that this is a newer patient to him, so he is not certain whether or not this patient was telling the truth. He said the patient was trying to explain why he ran out of patches too soon & that was one of his excuses. He said he doesn't remember what was causing the patient's pain. Showed inclusion criteria & asked if he sees patients with those conditions. He said yes but doesn't treat their pain. If he does, he uses any non-narcotic therapy before going to narcotics. He said Cymbalta just got a chronic pain indication. Initiat
PPLPMDL0020000001	Cleveland	OH	44130	9/6/2011	Spoke with Dina (MA) who said Dr Diab is out of the office until September 12th. Discussed Butrans appropriate patient type & savings cards & also reviewed savings cards for OxyContin. Told her about upcoming dinner program & asked her thoughts on whether or not she thought he would attend. She said he probably won't, but he does attend them on rare occasion. I let her know I would return when he gets back from vacation to tell him about the program. She said she would leave him the Butrans information I gave her as a reminder.
PPLPMDL0020000001	Cleveland	OH	44103	9/6/2011	window call - dr said he doesn't do lunches anymore with reps, but saw my info on Butrans and appreciated the info. asked dr what features of Butrans stood out to him? dr said he could only remember Butrans was a transdermal medication. showed dr Butrans visual aid, 5 core selling messages and asked same ? to dr. dr said once weekly dosing is good for some patients and he likes that Butrans is a CIII. dr asked who was appropriate for Butrans? we discussed Butrans indication and showed appropriate patients section in Butrans visual aid. asked dr if he had a couple patients with 1 of the pain conditions. pg.11 visual aid, that he could start on Butrans this week? dr said he probably does, but has to think about it. dr asked about insurance coverage for Medicaid and Medicare for Butrans, focused dr on commercial plan patients and discussed patient savings cards. recommended
PPLPMDL0020000001	Cleveland	OH	44124	9/6/2011	Window call...I remind dr of the butrans patient type, CIII status and 7 day delivery. I offered savings cards for butrans and oxycontin but none needed.
PPLPMDL0020000001	Westlake	OH	44145	9/6/2011	Spoke with Dan, we reviewed the key messages for Butrans and the important things to let patients know about when they first get their script. He has not seen much movement but feels that it could be a good option for many of their patients. We discussed the managed care and savings program for Butrans and OxyContin.
PPLPMDL0020000001	Mayfield Heights	OH	44124	9/6/2011	Window call....I reminded doc of the 5, 10, and 20mcg dosing of butrans and the ability to call in a refill. Provided a invite to the 9/15 program and portal invite.
PPLPMDL0020000001	Parma	OH	44129	9/6/2011	Spoke with MA's Natalie Sheila & told them about the upcoming Butrans dinner program. I asked if Dr Kushnar ever attends programs but they said she very, very rarely goes. Reminded them that this would be the first time she would be hearing a formal presentation about Butrans, so she may be interested. They said they would give her the invitation & would let her know about the opportunity. Checked in with them on savings cards for Butrans & OxyContin. They said they have plenty of both.
PPLPMDL0020000001	Cleveland	OH	44130	9/6/2011	Spoke with Diane who said I came at a bad time. Presented her with Butrans pharmacists' webinar invitation. She said she usually doesn't do things like that unless she gets some sort of credit. I let her know that while she would not get credit, it would be an opportunity to gain valuable Butrans information from a PharmD instead of a rep. She said she would leave the invite for the other pharmacist. She did not need OxyContin savings cards. I showed the inclusion criteria and asked Dr if he sees these conditions, he does. I asked if he would think of Butrans for these types of patients and he agreed. I reminded him to look for commercial insurance to try Butrans. Reminder that OxyContin is still an option that is covered on Medicaid.-<font color=blue><b>CHUDAKOB's query on 09/15/2011</b></font>-Knowing what we know about switches(conversions) how do you think you can revise this next call objective?<font color=green><b>HOLUBA's response on 09/21/2011</b></font>-Dr, would you consider Butrans as an option when patients are no longer controlled on tramadol or NSAIDs?<font color=blue><b>CHUDAKOB added notes on 09/23/2011</b></font>-Better!
PPLPMDL0020000001	Brooklyn	OH	44130	9/6/2011	Renee' said I chose a bad day to come in, given that it was the day after a holiday. I gave her information on upcoming pharmacists' Butrans webinars & explained that it may be a good opportunity to hear about Butrans from a peer. She said she may log on to listen. She said she still has a couple of customers who get Butrans regularly. She said they did not need any additional OxyContin savings cards for now.

	Cleveland	OH	44104	9/6/2011	talked to dr about pain conditions.pg.11 visual aid,asked dr which conditions she saw more than others? dr said she has a lot of chronic low back pain patients and patients with arthritis conditions.asked dr how she manages chronic pain for these conditions.dr said she will start with NSAIDS and when thats no longer working she'll start patients on tramadol.dr said if she can manage patients on tramadol she will but most patients end up on vicodin or percocet,dr said patients just keep wanting more pills.talked to dr about starting patients on Butrans with these pain conditions,dr said she knows Butrans is available but hasnt really thought of it as an option for patients as she's been very frustrated with her pain patients and doesnt feel like talking to them about a new product.showed dr butrans patient info booklet,discussed this booklet being an educational piece for patients so dr doesnt feel like its taking a lot of time talking to patients about Butrans,dr said ok she will think of a few patients,focused dr on commercial plan patients.recommended Senokot-5
PPLPMDL0020000001	Parma	OH	44134	9/6/2011	I asked Dr Hernandez what he thinks are some of the most important details about Butrans that I should be sharing with my primary care physicians to help them better understand the medication are. He said they should know that patients on Butrans are taking "less" medication than those on other narcotics, such as Vicodin. I asked him to elaborate. He said someone on Butrans 5mcg/hr is getting approximately 5mg buprenorphine per week & someone on Vicodin takes more than 5mg hydrocodone in a single day. I told him that we do not have conversion data or comparative data for Butrans & any other product. He said he knows this, but these are his findings. He also said he thinks physicians should know that patients are less likely to abuse buprenorphine. I told him we have no data to suggest that either. He said he knows, but again, these are his findings. I reminded him that I can only speak to what is in our full prescribing information. He said, then, that he would just try to get physicians to realize how effective a medication Butrans is & also to make them understand that the time they spend with their patients when they are first switching them from short-acting to Butrans is very well-spent & can save theming time & "headaches" in the future. I asked how frequently he finds that patients need supplemental analgesia while on Butrans. He said "never". He said Butrans is effective enough alone & that he occasionally titrates, but once the right dose is found, patients do great.
PPLPMDL0020000001	Cleveland	OH	44104	9/6/2011	showed dr pg.11 visual aid,pain conditions,discussed low back pain as thats what dr see's a lot of in practice.dr said she will try all non-opioid therapies then if pain is still there,she'll consider tramadol.dr said most of her patients have acute pain though so she's not thinking of Butrans,told dr that was good as Butrans indication is only for chronic pain,showed dr Butrans visual aid noting indication.asked dr if she has any patients with chronic low back pain,where they have to take tramadol every day for their pain? dr said she didnt know off the top of her head but she might,discussed Butrans as an option for these patients,discussed initiation of Butrans and asked dr to start a few patients as we discussed if she see's anyone this week,dr said ok.focused dr on commercial plans.recommended Senokot-5
PPLPMDL0020000001	Shaker Heights	OH	44122	9/6/2011	Attempted to invite Dr Agarwal to dinner program, letting him know that this would be a great opportunity to speak with area physicians & experts about their experience with Butrans & reminding him that he had told me he wanted to hear what other physicians were doing. He said he does not go to any programs- no exceptions & walked away.Spoke with Michelle, his MA, & reviewed managed care grids for Butrans & OxyContin.
PPLPMDL0020000001	Warrensville Heights	OH	44122	9/6/2011	I asked Dr Brooks how his Butrans patients are doing on it & asked if they are still getting good results as previously reported. He said they are not only doing well, but he just had an experience that reinforced his belief in the product. I asked him to elaborate. He said he had a patient admitted to the hospital who was on Butrans from another physician. He said he continued him on in the hospital because the patient had been doing well. Dr Brooks said the patient suffered from severe metastatic pain & he was shocked that Butrans was controlling the patient's pain. I asked what dose the patient was on-he said 20mcg. He said he only was taking Butrans- nothing supplemental. He said Butrans allowed the patient to be comfortable when they otherwise might not have been. He added that he is now even more of a believer in Butrans. He also said he has inherited many of Dr Webb's pain patients & he will switch some to Butrans.I asked him who I should work with to get Butrans on hospital formulary. He said he sits on the P&T Committee & that he would like to get Butrans on formulary. He also said the pharmacist at SouthPointe/Marymount was "doing harm" to patients by not having it in formulary there. Dr Brooks said he wants to get additional Butrans information, if possible, to present to the other committee members for formulary inclusion. I agreed to find out what information I would be able to provide & let him know I would follow up ASAP. Discussed savings cards.
PPLPMDL0020000001	Akron	OH	44308	9/6/2011	I followed up with Artina from her attendance at the OAHF conference. She is the Director of Community Relations. I presented the Safeguard my meds brochure as a resource for the sales team to distribute to members. She said they have to be cautious with brochures that are branded with product. She'll review this resource with her sales team and get back to me.
PPLPMDL0020000001	Cleveland	OH	44195	9/6/2011	worked anesthesia/pain management dept-left Butrans fpj,initiation guide.patien info booklet,patient invite,9/15 dinner program invitation,formulary grid and my business card for Dr.Vrooman,Dr.Cheng,Dr.Mekhaill,Dr.Mintzer,Dr.Frost,Dr.Syed and Dr.Samuel as i couldnt see any physicians this morning. WORKED:chronic pain-left same info as above for Dr.Covington and Dr.Matthews. WORKED:rheumatology dept-left same info as above for Dr.Calabrese,Betsy Kirchner(NP),Dr.Chatterjee,Dr.Long,Patty Paccos(PA) and Dr.Deal as i couldnt see anyone had to leave info at front desk and receptionist gives info to medical secretaries and puts in HCP's boxes,they will contact me if interested in meeting.
PPLPMDL0020000001	Cleveland	OH	44130	9/6/2011	Quick call- Dr Fedorko said he is definitely coming to the program on the 15th in Independence. I told him this was a great decision as he would be able to discuss Butrans with fellow physicians & area experts to find out their experience. He said he is looking forward to it. Also spoke with Mindy regarding managed care for Ryzolet & Butrans. She had no new information to report & said everything has been running smoothly for them lately.
PPLPMDL0020000001	Westlake	OH	44145	9/6/2011	Quick call w Dr when talking to Juan, I showed the inclusion criteria and asked his thoughts on using Butrans for these patient types. He said that he does see these conditions often and Butrans could be an option when they are not on high doses of opioids already. Reminder that OxyContin is an option when Butrans may not provide adequate analgesia.
PPLPMDL0020000001	Mayfield Hts	OH	44124	9/6/2011	Window call...reminded doc of the commercial insurance coverage, CII status and 7 day delivery. Gave invite to butrans portal and 9/15 speaker program. Nothing learned.
PPLPMDL0020000001	Cleveland	OH	44143	9/6/2011	I asked doc if he has had any feedback from patients on butrans. He said not that he is aware of. I gave him a portal invite and an invitation to the 9/15 speaker program - explaining the 2 opportunities to learn more about butrans. He said he does not have time for those things.
PPLPMDL0020000001	Solon	OH	44139	9/6/2011	Discussed details around Estimated Payment schedule that's to begin 4Q11 - using 2Q11 data versus 3Q11 as well as what the invoice must contain for estimated payments. Reviewed who must receive the data between Kris in Finance and IMS. Jill said they'll send us utilization data for the quarter within days of the end of the quarter so the clock for payment begins then. I agreed to send a confirmation email when all utilization data is received by Purdue or IMS for payments and to also make them aware when payments are about to be made by Purdue to MH. She brought this up to ensure the mistakes of the past 6 months don't happen again. Mike and I discussed the Marketing pieces which he said the edits we're making will help with the approval, however, they must still go through Caremark. Send him one of the updates and parts of the contract as a way to rush for approval. Mike asked that I send pricing for Butrans because he'll probably discuss this with Kevin Wessel. He's unsure what the P&T Committee has decided but should know after he speaks with Kevin. Mike said his team would've added it but their P&T Committee is gone.
PPLPMDL0020000001	Euclid	OH	44117	9/6/2011	Quick call...I reminded doc that he would try butrans for an appropriate BWC patient. He said he has not yet. I reminded him of the 5 and 10mcg starting doses. I gave him an invite to the speaker program on 9/15. He just looked at it. No commitment.
PPLPMDL0020000001	Parma	OH	44129	9/6/2011	Quick call- Dr Ortega said with this being a shortened week, he is really busy. He also said he is getting ready to go out of town for some testing that he has to study for, so that is taking his other time. Reminded him of Butrans program & checked his savings cards for Butrans & OxyContin. He said he is still not entirely sure if he can come to the program since he will be so busy in the upcoming weeks, but he will try to make it. Spoke with Cindy who said she would make sure they register him if he will be attending.
PPLPMDL0020000001	Parma	OH	44129	9/6/2011	Spoke with Shari, Dr Paat's medical assistant, & reviewed Butrans with her. Also gave her a Butrans dinner invitation & asked if he ever goes to them. She said he sometimes does go, especially if Dr Tolentino goes. I asked her to give Dr Paat the invitation & let him know what a great opportunity it would be for him to speak with other area physicians about Butrans & their experience in using it. She agreed. Also gave Portal invite for him to do online, but she said he does not do those. She said they did not need Butrans or OxyContin savings cards.
PPLPMDL0020000001	Cleveland	OH	44103	9/6/2011	talked to Nick,Pharmacist,about Butrans 5 core selling messages and asked Nick what really stood out to him about Butrans? Nick said once weekly dosing and transdermal delivery,asked Nick if he provides patient counseling on opioids? Nick said yes,asked Nick if he would recommend Butrans to patients by giving them a Butrans patient info booklet? Nick said he will do that and patients can discuss Butrans with their HCP's,left booklets and discussed formulary coverage for Butrans.recommended Senokot-5
PPLPMDL0020000001	Westlake	OH	44145	9/6/2011	Quick call with Deanna, I asked if she typically would counsel a patient when they get a new script for a medication like Butrans. She said only if they ask or have questions. She does know how to instruct patients about Butrans. I reviewed that Butrans will reach steady state in 3 days. We reviewed the managed care and savings cards for Butrans and OxyContin.
PPLPMDL0020000001	Parma	OH	44129	9/6/2011	Quick window call- I handed back a Butrans dinner invitation & let her know it would be an ideal opportunity to speak with other physicians & experts about Butrans. Dr Tolentino asked if she could bring her daughter, who is also a physician. I told her that physicians, NP's, & PA's were allowed to attend, but no one else. She said she will check the date & will come if she can. I asked her to register ASAP as spaces were filling up. She agreed to do this & Kathy said she would help her remember.
PPLPMDL0020000001	Sagamore Hills	OH	44067	9/7/2011	Dr Sevier said he just wrote a Butrans prescription for a patient a few weeks ago, but the patient called him from the pharmacy, saying that it was much too expensive. I asked if it was a Medicare/Medicaid patient. He said no, it was someone with insurance. Reviewed coverage & reminded him of savings cards, which he said he had forgotten. I asked him to tell me about the patient (ie condition, prior treatments). He said the patient was a male with chronic low back pain who was taking a few Vicodin daily. I told him he selected a perfect patient & showed him inclusion criteria again to support his decision. Discussed appropriate patient type further. He said he wants to know as soon as Medicare approves it on any of the Part D plans because he has many, many patients with osteoarthritis who he would like to try on it because they are always saying that they are in pain every few hours because the short-acting medication is wearing off too soon. He said some of them have even tried fentanyl because it is long-acting but it is "too much" for them & they feel "too drugged" on it. Discussed prior authorization process for Part D & also discussed OxyContin as a possible option for some of those patients. He said he might try the prior authorization for Butrans for a few of those patients.
PPLPMDL0020000001	Sagamore Hills	OH	44067	9/7/2011	Dr Gemma said she tried Butrans on a patient. I asked her to tell me about the patient. She said it was a male patient with chronic back pain. She said he wanted to stop taking his Percocet, so she put him on Butrans. I told her it sounded like she selected a good patient. I asked what dose she started him at. She said 10mcg & then titrated him up to 20mcg. I told her it sounded like she had done the right thing. She said she has not heard back from him yet, so she will see how he does. I asked if she has more patients like him, also with commercial insurance. She said yes. Closed for those patients. She said she would keep it in mind for those patients, especially if she gets good results from this one. Also discussed OxyContin as an option for appropriate patients beyond Butrans 20mcg.
PPLPMDL0020000001	Sagamore Hills	OH	44067	9/7/2011	Reviewed Butrans 5 core messages with Penny. She said she had forgotten as she is just getting her bearings at her new position. Discussed Butrans appropriate patient type (ie patients calling too soon for refills of short-acting/saying it is not lasting long enough). Reviewed insurance information & asked her to focus on commercially insured patients. She said it is a shame Butrans is not covered on Medicare because that is where she would be likely to use it. I asked if she sees working patients who suffer from back pain due to a condition such as spinal stenosis or spondylolsthesis. She said yes. I asked if they are treated with opioids. She said yes. I told her some of them may be potential Butrans candidates. She said she would keep it in mind for those patients. Reviewed savings cards where eligible.
PPLPMDL0020000001	Cleveland	OH	44114	9/7/2011	dr talked about the patients she has started on Butrans and how many of them are seeing significant improvements in pain levels,showed dr butrans inclusion criteria,asked if she has patients with these conditions? dr said yes,asked dr if she could start more patients on Butrans with these pain conditions and like the one's she's already started? dr said yes she will do that dr said she has some weeks where she doesnt feel anyone's appropriate and others where she see's a few patients that she wants to start on Butrans.dr said she knows who the appropriate patient is and no problems with insurance so she's happy,focused dr on BWC and commercial plans for Butrans.recommended Senokot-5
PPLPMDL0020000001	Northfield	OH	44067	9/7/2011	Dr Langs only came in to grab her lunch & go as she said she was still seeing patients. Reviewed Butrans appropriate patient type & told her about upcoming program, giving her an invitation. She said she would not attend. Reminded her that this would be the first formal presentation on Butrans she would be hearing & it would be a good opportunity to speak with other area physicians & experts about Butrans & their experience with it. She still declined. She said she would keep Butrans in mind for the types of patients we discussed (ie calling too soon for refills of short-acting opioids).
PPLPMDL0020000001	Sagamore Hills	OH	44067	9/7/2011	Dr Lenox said he remembers talking to me about Butrans before but did not recall many details about it. Reviewed 5 core messages with him. When I said that Butrans is a CIII opioid, he said he remembered all the other details but forgot & thought that it was CII. He said that makes a big difference. I asked him why that was such a big deal for him. He said he can call it in & he can write for 6 months at a time. I told him this was correct. Reminded him that Butrans still carries abuse & addiction potential. Spent time reviewing appropriate patient type (ie calling for refills too soon because their short-acting opioid is not working for long enough) & closed for this patient type. He said he would prescribe, especially now that he knows Butrans is CIII. He said that was the most important thing he learned at our lunch today. Discussed OxyContin as an option for appropriate patients
PPLPMDL0020000001					

PPLPMDL0020000001	Bedford	OH	44146	9/7/2011	Spoke with floater pharmacist & presented him with Butrans pharmacists' webinar information. He said he would leave it for Shay, the regular pharmacist. Reviewed Butrans appropriate patient type, focusing on those who call too soon for refills or who complain about their short-acting medication not working long enough. He said he has not dispensed much of it, but has seen it on shelves of different locations. Discussed savings via e-voucher & Butrans.com as well as OxyContin savings cards.
PPLPMDL0020000001	Brooklyn	OH	44144	9/7/2011	Spoke with MA Trish & told her about Butrans dinner program on the 15th. She said Dr Detwiler rarely/never goes to programs. I let her know that this would be the first formal presentation about Butrans he would hear & also that other area physicians & experts will be in attendance to discuss Butrans & their experience with it. She said she would give him the invite & ask him, but that chances are, he will not attend. I told her it was worth a
PPLPMDL0020000001	Cleveland	OH	44109	9/7/2011	showed dr butrans visual aid,pg.11,discussed inclusion criteria and asked dr if he had patients like this where Butrans could be an option? dr said he hasnt really thought of Butrans lately as he was waiting for patients to complain about their short-acting opioids and ask for something else.told dr patients with these pain conditions are appropriate for Butrans and showed initiation section in butrans visual aid.asked dr if he has a few patients this week with these pain conditions,where he can discuss Butrans with them and start them on Butrans? dr said he will have to think about it but he treats these pain conditions every day.focused dr on BWC and commercial plan patients.OxyContin reminder,7 tablet strengths and focused dr on medicaid and medicare coverage for OxyContin.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	9/7/2011	worked rheumatology dept-see call notes on dr ballou,dr magrey,dr singer. worked neurology dept-left Butrans fpi,initiation guide,9/15/11 dinner invitation,portal invite,patient info booklet,formulary grid and patient savings card flashcard for dr winkelman,dr hanna,virginia edwards,NP,worked internal medicine-left same butrans info as noted for neurology dept for all doctors:dr Lindheim,Dr.Eisen,Dr.Falck-Ytter,Dr.McCreery,Dr.Gelehrter,Dr.Harrington,Dr.Jones,Dr.Ricanati and Dr.Spinelli-cant see any of the doctors,no lunches,only appointments with doctors IF they call you,Dr.McCreery is NOT meeting with rep's anymore she used to do that and discuss products with rep's to explain to dept-thats gone not anymore. worked pmkr-see call notes on attending physicians and left Butrans 9/15/11 dinner program invitations with Jodi Simmeda,Amputee
PPLPMDL0020000001	Cleveland	OH	44104	9/7/2011	dr said he's been on vacation for last 10days,so hasnt seen patients.dr said he started 1 patient on Butrans the last time i was in his office before dr vacation.dr said it was easy to get patient started on Butrans,he gave Butrans patient info booklet and patient got Butrans at pharmacy.dr said his staff worked with patient on application/rotation of Butrans.dr said he has more patients in mind to start on Butrans but wanted to know about medical coverage.we discussed PA requirement for Butrans and i asked dr to focus on commercial plans and Tricare patients to start on Butrans.dr said ok.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44104	9/7/2011	showed dr pg.11 inclusion criteria,butrans visual aid,discussed pain conditions and how dr treats chronic pain for them.dr said he has small percentage of patients on opioid in his practice,more patients in nursing homes that are on opioids but in practice they are mostly medicare patients.dr said he likes Butrans and has started a few patients in nursing home and they got Butrans easily from the pharmacy.dr said its easy to explain to patients,dr said he likes once weekly dosing and Butrans being transdermal.i asked dr if he had patients with the pain conditions we discussed,coming this week,where he could start them on Butrans? dr said he didnt know but would consider Butrans for patients with these conditions.we discussed commercial plan coverage for Butrans.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44113	9/7/2011	talked to dr about pain conditions she treats,showed pg.11 visual aid and asked dr if she will see more patients this week that have these conditions where she can start them on Butrans? dr said she will see many of these conditions and is thinking of Butrans for more patients,discussed initiation of Butrans,showed initiation section in visual aid,focused dr on application/rotation of butrans info in booklet and focused dr on BWC and commercial insurance.dr had to go but said she will continue starting more patients on butrans.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	9/7/2011	talked to dr about pg.11 butrans visual aid,inclusion criteria,asked if he treats these conditions? dr said yes.asked dr how he manages chronic pain for these conditions? dr said he will try all non-opioid therapies first when those fail,he'll typically start patients on tramadol even though patients have chronic pain,he hope is that the tramadol will control their pain and eventually through physical therapy,exercise,etc.,patients wont need tramadol for the rest of their lives.dr said he knows that doesnt make sense and he should consider a long-acting opioid earlier in therapy,as these are chronic pain conditions but he doesnt do that,dr said most physicians wont do that asked dr to consider Butrans then for patients after their 1st tramadol dose isnt controlling their pain.dr said he's started a couple more patients on Butrans and will consider Butrans for patients with the pain conditions we discussed-we focused discussion on osteoarthritis and low back pain.focused dr on BWC and commercial plan patients,discussed OxyContin being an option for patients,showed conversion guide and discussed vicodin and percocet conversions to OxyContin,focused dr on medicaid,medicare and commercial plans for OxyContin.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44114	9/7/2011	dr said he just started another patient on Butrans,he's happy with clinical results he's seeing from Butrans and no issues with insurance.showed dr butrans inclusion criteria and asked how often he's treating these pain conditions? dr said he treats a lot of low back pain and osteoarthritis asked dr if he could think of a couple patients this week that have these conditions,to start on Butrans? dr said he will think about it but he's thinking he probably has a few focused dr on BWC and commercial plans.recommended Senokot-S
PPLPMDL0020000001	Sagamore Hills	OH	44067	9/7/2011	Dr Maguire said he put one patient on Butrans & that patient said it did not work. I asked him to tell me more about the patient. He said she was an older woman who had chronic back pain. I asked what medication she had been on before & what starting dose he gave her. He said she had been on 4 Percocet per day & he started her on 5mg. I asked if he had considered titrating upward before taking her off Butrans completely. He said he did & he offered that to the patient, but she declined & said she wanted to go back to her Percocet. He said that maybe she just didn't want to stop taking Percocet. Reminded him that patients can take supplemental analgesia with Butrans, especially during the first few days while Butrans is reaching steady state. He said she really did not want to stay on it. I asked what his thoughts are now on Butrans after that experience. He said no drug works for everyone & that he will continue to find more patients. I told him he had chosen what sounded to be an ideal patient & asked if he had more like her & he said, "sure". Closed for those patients & he said he would keep it
PPLPMDL0020000001	Cleveland	OH	44109	9/7/2011	showed dr inclusion criteria,pg.11 butrans visual aid,discussed pain conditions dr treats,dr talked about low back pain patients and how he will try all non-opioid therapies initially then when thats not controlling pain dr said he will start patients on short-acting opioids like tramadol or vicodin.dr said he was trained to start with tramadol,once patients are maxed on tramadol,start patients on lowest dose of vicodin,max out vicodin and then convert patients to percocet if need be.dr said to put patients on a long-acting opioid is thought to be a failure on doctors part,dr said he knows Butrans is a CII which is different,he likes that Butrans is transdermal and dosed once a week,but dr said he hasnt had any patients complain about their pills not controlling their pain and asking him for something else.i asked dr to consider the pain conditions we discussed and start a few patients with these conditions,on Butrans.dr said if patients complain to him and want something else,he will consider Butrans.focused dr on BWC and commercial plans.gave OxyContin reminder,discussed 7 tablet strengths,gave conversion guide and focused dr on Medicaid,Medicare and commercial plans for OxyContin.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	9/7/2011	showed dr butrans visual aid,pg.11 inclusion criteria discussed this with dr,dr said she was suprised to see some of the pain conditions listed and hasnt thought of Butrans for some patients as she's been waiting to hear from patients that their short-acting opioids arent controlling their pain.asked dr if she has a few patients with low back pain that could try Butrans,this week? dr said she probably does and will consider Butrans.dr said after the Butrans dinner program in August that she attended,she has been discussing Butrans with patients and giving them Butrans patient info booklets to read and she follows up with them to see if they are willing to try Butrans.told dr that was great she was starting there and asked if she could take it to the next step and actually start a few patients on Butrans this week? dr said she will do her best as she knows its taking her longer to start anyone but she feels comfortable with the medication so no concerns there.dr said biggest challenge is medicaid's not covering Butrans.focused dr on BWC and commercial plan patients and talked to dr about medical PA for Butrans if dr is willing to do the PA.discussed OxyContin being an appropriate option for patients,7 tablet strengths,gave conversion guide discussed a few conversions from vicodin to OxyContin and percocet to OxyContin,focused dr on Medicaid and Medicare coverage for OxyContin.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	9/7/2011	talked to dr about inclusion criteria,pg.11 butrans visual aid,asked dr how often he see's these pain conditions? dr said he see's a lot of patients with arthritis,specifically osteoarthritis and rheumatoid.asked dr how he manages their chronic pain? dr said typically after non-opioid therapies are tried,physical therapy,exercise,etc,he will start patients on tramadol.asked dr how he feels Butrans could be appropriate? dr said he usually wouldnt consider a long-acting opioid until all short-acting opioids failed.talked to dr about Butrans being an option for those patients where tramadol isnt controlling their pain,since he wasnt willing to consider Butrans for opioid naive patients.dr said he could talk to a few patients taking tramadol where he knows tramadol isnt controlling their pain and some patients are always asking for something else.we discussed initiation of Butrans,showed initiation section in visual aid,and asked dr if he will see a few of these patients this week? dr said probably so and he will talk to them about Butrans.gave dr Butrans patient info booklets to give patients,focused dr on application/rotation of Butrans.focused dr on BWC,commercial and tricare patients.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44113	9/7/2011	talked to Dale about patients with osteoarthritis and how Butrans could be an appropriate option,dale said they see patients with this pain condition but typically will try all non-opioid therapies 1st,then if that doesnt give patients pain relief,they will usually start patients on tramadol.dale said he thinks Butrans would be a great therapy initially and not tramadol,so he's considering that option for patients but majority of dr shen and dr daoud's patients,both pain management doctors,will be started on tramadol and other short-acting opioids after that before doctors will consider Butrans.discussed application/rotation info in butrans patient info booklet as point of discussion with patients and focused dale on bwc and commercial plan patients.asked dale if he will see more patients this week with osteoarthritis that he can start on Butrans and not tramadol? Dale said he probably will see some patients like this,this week,and will consider Butrans as an option.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44113	9/7/2011	talked to dr about 1 patient she started on Butrans.dr said patient tried all other opioids, nothing worked so she wanted to try Butrans.dr said she see's patient soon for follow-up but is assumeing since patient hasnt called office that medication is working.showed dr Butrans patient info booklet, to be sure she discusses application/rotation of Butrans and discuss titration,side effects,etc,dr said she will do that.showed dr butrans visual aid,pg.11,discussed inclusion criteria and dr said she does treat these pain conditions here but doesnt have a lot of patients on opioids.asked dr if she had more patients to start on Butrans,like the 1 she started in August? dr said she has a lot of patients she would love to start on Butrans but majority of their patients are medicaid and medicare and butrans isnt approved on either plan.we discussed Medicaid's prior authorization requirements for Butrans and told told dr to focus on commercial plans,BWC or Tricare patients.dr said ok she'll have to think about it and see if there is anyone with those plans.recommended Senokot-S
PPLPMDL0020000001	Bedford	OH	44146	9/7/2011	I asked Dr Moutfawad if he ever titrates the patient's Butrans dose if he finds they are taking a lot of supplemental analgesia. He said he does do that. He said he usually waits about a week before titrating & gives Nucynta for breakthrough. I also asked him if he thought he would make it to my program next week. He said he probably will but is not 100% sure yet. I reminded him this would be an ideal opportunity to discuss Butrans with peers & other experts one-on-one. He said he does think he will be there.
PPLPMDL0020000001	Stow	OH	44224	9/7/2011	Chuck said he has not seen scripts for Butrans. I told him Dr Yang has written. HE said he did have it in stock so maybe one of the other pharmacists has filled. I showed application and safety to discuss with the patient. HE does not see Oxycontin scripts. I meinded him of SenS in opioid induced constipation
PPLPMDL0020000001	Cleveland	OH	44103	9/7/2011	talked to Barb,RN,for dr and she said that dr had all of the Butrans info i left before but hasnt said anything to her about meeting.showed Barb Butrans visual aid,discussed 5 core selling messages and asked Barb what features of Butrans really stood out to her? Barb said once weekly dosing and transdermal delivery of Butrans,Barb said dr has a lot of patients on Vicodin and Percocet that are always calling in early every month for refills and arent controlled on these medications so Butrans could be an option but biggest challenge is insurance.medicaid,medicare and self-insured patients are majority here.discussed Medicaid PA requirements with Barb and focused her on BWC,commercial and Tricare patients,Barb said ok and she will give Butrans fpi,portal invite,9/15/11 dinner invitation,initiation guide,formulary grid,patient savings card flashcard and patient info booklet to dr again with my business card.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	9/7/2011	dr said he knows Butrans is available,hasnt started anyone on it and thinks its just another patch like Duragesic.showed dr butrans visual aid,pg.11 inclusion criteria and asked dr if he treats these pain conditions? dr said yes.asked dr how he manages chronic pain for these conditions? dr said he will always start with non-opioid therapies,when that fails he will start patients on short-acting opioids and eventually when they need a long-acting opioid he will consider OxyContin or Duragesic.asked dr if he would consider Butrans as an option for these conditions? dr said i dont know i have to think about it and look at the Butrans fpi in more detail again.dr had to go.gave OxyContin reminder when he mentioned OxyContin and told dr OxyContin was available on medicaid,medicare and commercial plans.dr said ok he had to go.recommended Senokot-S
PPLPMDL0020000001	Brooklyn	OH	44144	9/7/2011	Saw Dr Hilton at the window but did not get to talk to her. Spoke with Carol & told her about upcoming Butrans dinner program. I asked if she thought Dr Hilton would attend. She said she never participates in those. I told her that this would be the first formal presentation she would be seeing on Butrans & that it would give her a good opportunity to speak with experts about their experience with it. She said she still did not think Dr Hilton would go. I asked her to please at least let her know about the program by giving her an invitation & she agreed. She said they did not need any savings cards. I asked who takes phone calls from patients for refills or if their medication is not working for them. She said she takes them & usually Wendy ends up handling them.
PPLPMDL0020000001					

PPLPMDL0020000001	Parma	OH	44129	9/7/2011	Quick call- Jen said she was swamped due to it being a short week. She said she has seen 60 patients in 2 days & is non-stop. Handed back a Butrans dinner invitation for the upcoming program & asked her to consider attending. She said it was doubtful, but she would see. Reminded her it would be the first formal Butrans presentation she would be hearing & also that other practitioners would be in attendance & she could speak with them one-on-one about their experience with Butrans. She said I made a good point but that she still doesn't know. Let her know I would return to follow-up.
	Cleveland	OH	44109	9/7/2011	showed dr pg.11,inclusion criteria,discussed pain conditions and dr said she see's a lot of arthritic patients but always starts them on tramadol if they have chronic pain.dr said majority of her patients are controlled on tramadol but she has all of the Butrans info from our lunch last week so she'll keep Butrans in mind. asked dr what features really stood out to her,showed visual aid 5 core selling messages? dr said once weekly dosing and transdermal.dr said she had to go.told dr to focus on commercial and BWC patients if anyone she see's this week,with these pain conditions,isnt controlled on tramadol and she wants to start them on Butrans,dr said Quick call as I caught Dr Miguel in the lobby. Told him about Butrans program coming up & gave him an invitation. He said he usually doesn't go to them. Reminded him it would be the first formal Butrans presentation he would be hearing & let him know it would be an ideal opportunity to speak with fellow physicians about their experience with Butrans. He said he'd think about it. Also OxyContin Medicare Part D reminder.
PPLPMDL0020000001	Brooklyn	OH	44144	9/7/2011	Spoke with Sarah, technician, who said the pharmacist was too backed up to stop & talk today. She said they just got their flu shots in & it has been extremely busy for her. I showed her the information about pharmacists' Butrans webinars & asked if she thought the pharmacist would be interested. She said maybe. She then pointed to the word "Butrans" & said, "I know we just got a higher strength of this in, too. We have 5 & 10 now." I asked if she knew if it was ordered because they saw a prescription for it. She said that is possible, or McKesson sometimes auto-ships them things if it is a new strength available. I told her that strength has always been available.
	Parma	OH	44129	9/7/2011	She said it was probably a prescription then. She said she would leave my information for the pharmacist & also said they are stocked on OxyContin savings cards.
PPLPMDL0020000001	Cleveland	OH	44106	9/7/2011	talked to dr about pain conditions,inclusion criteria pg.11,asked how many of the conditions he treats? dr said most of them they see it all in this pain clinic. asked dr how he manages patients chronic pain for these conditions? dr said majority of his patients have been taking vicodin or percocet for years and all they want are their pills.dr said if he doesnt trust patients are taking their pills or they are calling in earlier every month for refills,he's telling them he wont refill their immediate release opioids and they have to start on Butrans thats all he will give them and they can take ibuprofen or aspirin for breakthrough pain. asked dr if he will start a few patients today on Butrans,if they have the pain conditions shown and discussed? dr said yes he will consider Butrans for them.dr said to speak with Lisa, Patient Care Coordinator, as she deals with all insurance plans and patient savings cards.spoke with Lisa about this info. discussed OxyContin as an option for patients and showed conversion guide dr took it and said he didnt have a lot of patients on OxyContin but its a good medication for some patients. recommended Senokot-S- PPLPMDL0020000001 Cleveland OH 44109 9/7/2011 met new director briefly in hall, discussed Butrans fpi, 5 core selling messages with dr, dr said she heard about Butrans but will have to look over the info in more detail. dr said to call her secretary and set-up an appointment to discuss everything.gave dr Butrans fpi, initiation guide, portal invite, 9/15/11 dinner program invitation, formulary grid and patient savings card flashcard. dr said she appreciated the info and will see me later.
	Cleveland	OH	44106	9/7/2011	worked pain management dept-see call note on dr sahgal; worked family medicine dept-left Butrans fpi, initiation guide, formulary grid, patient info booklet, portal invite and 9/15/11 dinner invitation for Dr. Marsh, Dr. Truax - you cant see physicians in dept, have to leave info and if they are interested in speaking with you they will call to set-up an appointment. worked internal med dept- barb bonfiglio, resident coordinator, out for day follow-up tomorrow to set-up appointment for resident lunches in oct-dec and set up monthly appointments with dr armitage, vice chairman of dept.
PPLPMDL0020000001	Cleveland	OH	44113	9/7/2011	talked to Maria RN, about Butrans fpi, 5 core selling messages, initiation guide, formulary grid and patient info booklet. Maria said she gave info to dr but he hasnt had time to meet me for an appt. Maria said they have hundreds of patients who could benefit from trying Butrans but the problem is that majority of their patients are medicaid, medicare or self-insured. asked Maria what features of Butrans she liked? Maria said she likes once weekly dosing option and that Butrans is a patch. I asked Maria to share all of the Butrans info, left same info as noted above, with dr again and ask if i can get a few minutes with him to discuss Butrans and OxyContin? Maria said she would talk to dr gve Maria butrans portal invite and 9/15/11 Butrans dinner program invitation. recommended Senokot-S
	Cleveland	OH	44121	9/8/2011	Window call...Gave doc a butrans portal invite and an invite to the 9/15 speaker program I asked her to prescribe butrans for patients that have failed on NSAIDs/tramadol.
PPLPMDL0020000001	Maple Heights	OH	44137	9/8/2011	Dr Gene said he had received a mailer about Butrans & remembers a lot about it. I asked what he recalled reading. He said that he knows it is for moderate to severe chronic pain, dosed 5, 10, & 20mcg/hr, dosed once weekly in a transdermal system. I told him this was impressive recall. He said he tries to take the time to read information from wherever it comes from as he learns something frequently. I asked where he might place Butrans in his practice. Discussed appropriate patient type & positioning. Also showed him inclusion criteria & discussed painful conditions such as spinal stenosis & spondylolsthesis. He said treating pain is not his favorite thing to do as a physician. Empathized & asked what some of the biggest challenges are. He said one can't always tell when a patient is really in pain & sometimes patients "fool" doctors into doing what they want them to do. He said he tries to do what is best for the patient. I told him he is doing the right thing. He said that having a long-acting CII was a benefit of Butrans & said it "must be" less abusable than a CII. I told him I could not & would not make that claim. I drew his attention to the black box warning & advised that Butrans, a CII opioid, does carry abuse & addiction potential. He said he still does not think it would be as abusable as a CII. Asked him to be cautious in prescribing. Also discussed OxyContin q12h for appropriate patients beyond Butrans. He said he could see himself prescribing Butrans.
	Cleveland	OH	44109	9/8/2011	showed pg.11 inclusion criteria,discussed pain conditions listed and focused on low back pain,asked dr if he had any patients coming in this week with this condition where Butrans could be an option? dr said he didnt know but is considering Butrans for patients,he just needs to find the 1st patient to start and it'll get easier. asked dr what he needs from me to find that 1 patient? dr said nothing he likes once weekly dosing of Butrans and transdermal delivery, dr asked about insurance coverage, focused dr on BWC and commercial plan patients to start a couple patients on Butrans and get some clinical experience, dr said he will do it just thinking of patients. OxyContin reminder, appropriate patients, discussed formulary coverage and recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44106	9/8/2011	dr said he's started a few more patients on Butrans, patients are getting scripts from him and Lisa, patient care coordinator or Steve, RN, give patients Butrans patient info booklets and he's not heard anything back from patients so thats a good sign. talked to dr about titration of Butrans, focused dr on commercial plan patients and appropriate patients to start on Butrans- showed dr Butrans visual aid, pg.11 inclusion criteria and asked dr to start a couple patients on Butrans with the pain conditions shown, dr said ok he will think about that, right now dr said he's only thought of Butrans if patients are taking tramadol every day and not controlled and asking for more pills, he's thinking of Butrans for them, told dr that was still great but he could also think of Butrans for patients with pain conditions that we had in butrans clinical trials, dr said ok. discussed OxyContin as an option for patients, gave conversion guide and talked about formulary coverage for OxyContin. recommended Senokot-S
	Cleveland	OH	44103	9/8/2011	talked to Abdul, Pharmacist, no Butrans scripts yet and they arent ordering anymore Butrans until they see a script as its been sitting on shelf and only ordered 1 time. Abdul said he has to run a business and cant order product to sit on shelf, told Abdul I completely understood, we discussed my focus with doctors on Butrans discussing 5 core selling messages, showed Abdul Butrans visual aid and asked Abdul if he will continue recommending Butrans to patients, when providing patient counseling, if patients are telling Abdul that their immediate release opioids arent controlling their pain, Abdul said he's been giving Butrans patient info booklets out to patients and will continue doing so. we discussed formulary coverage for Butrans and also discussed OxyContin stocking, appropriate patients and formulary coverage. recommended Senokot-S
PPLPMDL0020000001	Cleveland Hts	OH	44118	9/8/2011	I reviewed the butrans selling messages and reminded doc that he asked for reminders. He said the hurdle is getting it approved for patients at an affordable cost. I told him to think of butrans for appropriate patients with coverage through work (i.e. RX coverage or BWC). He said that workers comp is starting to reject things they used to cover. He thanked me for the reminder.
	Mayfield Heights	OH	44124	9/8/2011	Window call...I asked doc if he considered attending the butrans speaker program per the invitation I gave him. He said he really does not have time. I asked him to log onto the butrans portal to learn more about appropriate patient selection. I reminded him of the patient that that fail on tramadol or NSAIDS. He said ok.
PPLPMDL0020000001	Macedonia	OH	44056	9/8/2011	Reviewed 5 core messages with Dr Yager & discussed appropriate patient type, including review of inclusion criteria disease states. He asked me to review dosing with him again. Discussed doses available & presented initiation guide pg 6 to help him position Butrans. He said he usually does refer to pain management but agreed that he has not had a long-acting CIII, especially one dosed only once weekly. Reminded him of abuse/addiction potential & discussed importance of appropriate patient selection. He asked what to do with a 70-year old patient with a history of substance abuse, but who has since quit taking pain medications & who has chronic shoulder pain. He said the patient has been to orthopedics & had injections & is on NSAID's & COX-2's but is not well-controlled. He said the patient smokes & drinks approximately 12 beers per day. I asked him what he would do. He said this was one of his patients & he referred to pain management. I told him the patient sounded like a difficult case & that referring may have been the best option. Reviewed managed care coverage & savings where eligible. Dr Yager said he would keep Butrans in mind for appropriate patients. Also discussed OxyContin q12h as an option beyond Butrans.
	Cleveland	OH	44195	9/8/2011	worked anesthesia/pain management dept- see call notes on anne crawford, np, kathy kraus, pa and dr cheng. confirmed new director's info- dr rosenquist.
PPLPMDL0020000001	Cleveland	OH	44125	9/8/2011	Gave Angie an information sheet for our Butrans webinars available for pharmacists. She said she did not have time to talk but said she would make copies of it for the rest of the staff. Let her know the programs did not have CE's for completion, but that they are specifically for pharmacists & let her know of the interactive nature of the programs. She thanked me for the info & took a phone call.
	Cleveland	OH	44195	9/8/2011	talked to Anne, NP, about pain conditions, pg.11 inclusion criteria, and asked if she treats these conditions? anne said yes they see all of these conditions here but anne said they are really trying to get patients off opioids. anne said they have a lot of patients who have been taking tramadol, vicodin or percocet for the pain conditions we discussed, for years and still arent getting pain relief and need more pills, anne thinks butrans could be an option right there but her challenge is that many of the older physicians like dr stanton-hicks and dr mekhail like the tried and true (short-acting opioids) and the newer doctors like dr katyal and dr leizman do not want to prescribe ANY opioids, they prefer to give patients a TENS unit or other non-opioid therapies. asked Anne if she would start a few patients on Butrans with these pain conditions, knowing she see's dr stanton-hicks patients and talk to dr about Butrans as an option if these patients are taking immediate release opioids and not getting pain controlled. Anne said she will do her best and talk to him and see what she can do. anne asked about insurance coverage, focused Anne on BWC and commercial plan patients. recommended Senokot-S
PPLPMDL0020000001	Lyndhurst	OH	44124	9/8/2011	Spoke to Erin about the stocking of butrans. She confirmed having the product but has not seen any scripts. I discussed the savings card program and the ability to print off the cards from online. I gave patient info guide and explained the proper application.
	Cleveland	OH	44113	9/8/2011	worked dr nickels office which is in grace hospital center
PPLPMDL0020000001	Parma	OH	44129	9/8/2011	Spoke with Julianne, technician, & gave her information on Butrans webinars for pharmacists. I explained the interactive nature of the program & let her know that I had introduced Butrans to Stan & Kevin last month. I delivered Butrans overview (ie dosing, usage, delivery system) & asked her to give Stan & Kevin the invitations for the online program. She agreed to do so. I also left my card.
	Tallmadge	OH	44278	9/8/2011	Had lunch, Dr came down and apologized that he could not stay, he was backed up and his afternoon patients are here and what do I have. I told him I have a new product called Butrans which is the first 7 day analgesic that is schedule 3, for patients with moderate to sever chronic pain. HE said he didnt have time to go through FPI and to come back. Gave him formulary grid
PPLPMDL0020000001	Garfield Heights	OH	44125	9/8/2011	Spoke with nurse, Denise Anderson, & discussed Butrans dinner program next week. She said she would not only give Dr Samuel the invitation, but she would also post one in the physician lounge area where they look for information like that. She said they do, on occasion, attend programs. She requested that I email her for an appointment with Dr Samuel & Dr Abraham, who is newer to the group since Dr Solomon is now gone. Discussed savings cards, which she said she had enough of.

PPLPMDL0020000001	Cleveland	OH	44113	9/8/2011	talked to dr about inclusion criteria,pg.11 visual aid and asked dr how often he treats these pain conditions? dr said he treats a lot of low back pain and osteoarthritis,talked about how he will try all non-opioid therapies 1st when all else fails he will turn to opioids.dr said majority of his patients have already tried 1 opioid or more by the time he see's them so he's usually maintaining the medication regimen or changing the opioid.asked dr if he could start a couple patients with these conditions,specifically low back pain,on butrans? dr said he is keeping butrans in mind and thinks its a great option for patients.dr said he has many tools to choose from and Butrans is 1 of them.talked to dr about BWC and commercial patients for Butrans.gave OxyContin reminder and formulary coverage reminder for OxyContin.recommended Senokot-5
	Cleveland	OH	44113	9/8/2011	talked to Laura about some of the pain conditions on pg.11,spinal stenosis,low back pain and osteoarthritis.were topics of discussion.laura said they see it all here but she just gives tramadol or vicodin for chronic pain conditions.Laura said she hasn't started anyone on Butrans as its been too stressful to have a discussion on a new product with patients,laura said its easier to just refill tramadol and send patients out the door.i asked Laura if she will see any patients next week,with these pain conditions,that she can start on Butrans? Laura said she knows about Butrans and thinks its a great option but will have to see if she has the time to discuss Butrans with patients next week.laura said her last day is next friday,so she'll do her best.showed laura the Butrans initiation section and told laura to focus on BWC and commercial plan patients to start on Butrans.laura said ok and thanked me for the info.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44103	9/8/2011	dr said they are changing policies here and wont be able to meet with reps anymore,after this week,because doctors dont have enough time to see patients too many reps every day.dr said she will meet with me at end of day,5 or 5:30pm,moving forward but i have to set-up appointment with felicia,ma.dr said she started a couple patients recently on Butrans,gave Butrans patient info booklet which helps explain a lot to patients so all she needed was some more booklets and that was it.showed dr butrans inclusion criteria,pg.11,asked if she treats these pain conditions often? dr said many of them she does and a lot of arthritis and low back pain patients.dr said she will think of Butrans for them told dr to focus on commercial plan patients and give them Butrans patient savings cards,dr said ok.recommended Senokot-5
	Cleveland	OH	44109	9/8/2011	talked to dr about the couple patients he started on Butrans,dr said both patients are tolerating medication and no complaints so he's happy.asked dr if he treats pain conditions,pg.11 inclusion criteria butrans visual aid? dr said yes,focused on low back pain as he see's a lot of BWC patients.dr said most of these patients want their pills and dont want a patch,dr said he's always frustrated with the pain patients.talked to dr about starting a couple patients,like the one's he started already,on Butrans when he see's these pain conditions specifically low back pain patients.dr said he will consider that,if patients are asking for more pills and he's not comfortable giving more pills he's talking to them about Butrans.discussed initiation of Butrans and focused dr on Application/Rotation info in Butrans patient info booklet.discussed BWC and commercial plan patients coverage for Butrans.discussed OxyContin being an appropriate option for patients,showed conversion guide and discussed vicodin to OxyContin and percocet to OxyContin conversions,talked about formulary coverage for OxyContin and recommended
PPLPMDL0020000001	Cleveland	OH	44102	9/8/2011	talked to Nagla,PA,about patients with specific pain conditions,showed pg.11 inclusion criteria and talked about how they treat chronic pain,for these conditions.Nagla said they will try physical therapy,exercise,injections,stimulators,etc.,all non-opioid therapies then they will give opioids if necessary.Nagla said all 3 doctors here typically give tramadol initially then when that fails they will give patients vicodin or percocet.talked to Nagla about Butrans being an option for these patients with the pain conditions we discussed,nagla focused on low back pain,Nagla said she doesnt know if doctors will start patients on a long-acting opioid but she will recommend if appropriate.Nagla said most of the patients she's seeing get started on Butrans have been taking immediate release opioids for years and just want more pills so they are telling patients no they arent getting more pills,they have the option of Butrans.we talked about patients still taking immediate release opioids for breakthrough pain,if dr feels thats appropriate with Butrans.asked Nagla to start a few patients this week on Butrans,per our discussion and Nagla said she will recommend Butrans as an option, to the doctors and talk to them as they make the final decisions on opioids.recommended Senokot-5
	Cleveland	OH	44195	9/8/2011	talked to dr in hall,dr said he started 1 patient on Butrans,discussed why he chose Butrans for this patient,dr said patient was taking a couple percocet a day but pain wasn't controlled,so he thought patient should try Butrans and see if that helped with pain.talked to dr about titration and focus patient discussions on application/rotation of butrans,dr said ok leave some booklets at front desk,told dr to focus on BWC and commercial plan patients for Butrans,dr said ok he will do that and had to go told dr to remember he has OxyContin as an option for patients,dr said he did need savings cards so i left 1 pack.recommended Senokot-5
PPLPMDL0020000001	East Cleveland	OH	44112	9/8/2011	Doc said he considered butrans for one of his staff but she is sensitive to adhesives. I showed the AE section of the sales aid and the incidence of application site pruritis. He said he still has not seen any patients come in on butrans. I asked him not to wait and to try a patient. No commitment. Discussed the oxycontin patient and he said he has started doing urine screenings in the office. If patient does not test positive for the presence of the prescribed drug, he will titrate them down until they are compliant. I told him I thought the urine screening is a great idea. I gave him the pain awarness month kits and advised on the PAP website for rseources such as urine screenings.
	South Euclid Independence	OH	44121	9/8/2011	Window call...Gave doc a butrans portal invite and an invite to the 9/15 speaker program I asked her to prescribe butrans for patients that have failed on NSAIDS/tramadol.
PPLPMDL0020000001		OH	44131	9/8/2011	Spoke with MA Vanessa, who confirmed that Dr Faيمان is no-access now. She connected me with Joanne, Clinical Coordinator, on the 7th floor, who said that the policy for the entire building, including Dr Faيمان, is to drop off information to her, which she will distribute to the physicians. At that point, if the physician chooses to meet with the rep, he/she will call the rep to make an appointment. This is the only way to access anyone in the Cleveland Clinic Independence building. Spoke with Vanessa about upcoming dinner program for Butrans & asked her to give Dr Faيمان an invitation with my card. She agreed.
	Parma	OH	44129	9/8/2011	Spoke with MA Anita who said Dr Gallagher was on vacation. I told her about the upcoming Butrans dinner program & asked her if she thought he would attend. She said she does not think he usually attends them because of his schedule being so busy. I let her know this would be the first formal Butrans presentation he would be hearing & that there would be other physicians & experts in attendance to discuss Butrans with. She said she would let him know & would give him the invitation when he returns. Also discussed Butrans & OxyContin formulary coverage & asked her to share the grids with Lynn, Dr Gallagher's nurse. She agreed.
PPLPMDL0020000001	Westlake	OH	44145	9/8/2011	I asked Dr if he likes transdermal technology, he said that he does not have a problem with them. He said that many of his patients are on higher doses of opioids and they are past Butrans. I agreed that these are not the patients to start and OxyContin would be an option for these patients. Dr said that his patients do not like to give up their pills once they start and it is hard to talk them into trying a patch. I asked if he would think of Butrans before even going to vicodin in the first place and he said it might be a good place to try Butrans. He said that he doesn't spend enough time talking to the patients about how to take a new med. I asked if he would put patient information in the patient rooms so they may be able to ask him about trying it as an option. He agreed and agreed to give Butrans a try.
	Parma	OH	44129	9/8/2011	Dr Gigliotti said he wrote another Butrans prescription last Friday but it came back rejected by insurance. I asked if he knew the plan. He had Jaz look it up & it came back as a Medicare Part D plan. Dr Gigliotti said that it was "his fault" for not realizing that because he knew Medicare did not cover it. He said their was a prior authorization that required a trial of morphine sulfate or fentanyl first. I asked what his policy on prior authorizations was. He said he never does them. I asked what it was about the patient that had made him think Butrans was the best option for them. He said he doesn't remember, but she must have been on something for her pain before he chose Butrans. I asked if he has more patients who he can try Butrans on to give him some clinical experience with it. He said yes & that he has already thought of some people. He added that he is going "use a lot" of Butrans & it is just a matter of seeing those patients. Also discussed OxyContin for patients beyond Butrans who may benefit from q12h dosing.
PPLPMDL0020000001	Cleveland Heights	OH	44118	9/8/2011	Doc came in and said he did not have time to talk to me but I was able to review the butrans selling messages: 7 day delivery, CII, indication. He walked away reminding himself of the CII status.
	Cleveland	OH	44195	9/8/2011	Kathy called as she needed savings cards for Butrans and OxyContin so we talked about who is writing Butrans and Kathy said the only one's she's seen recently are from Dr.Cheng and Dr.Samuel.Kathy said a lot of new doctors dont want to prescribe an opioid and would rather have patients try all non-opioid therapy choices 1st.Kathy said dr minzter is trying to get her patients off opioids and doesnt want to start more patients on another opioid like Butrans,kathy said dr mekhail,is an older physician and doesnt feel comfortable prescribing something new like Butrans and will stick to the tried and true of immediate release opioids.asked Kathy to speak with both doctors about pain conditions most often treated here at the clinic,showed pg.11 inclusion criteria,and recommending Butrans as an option especially if patients have been taking immediate release opioids for years and their pain still isnt controlled.Kathy said she will do that.focused kathy on BWC and commercial plan patients for Butrans.recommended Senokot-5
PPLPMDL0020000001	Westlake	OH	44145	9/8/2011	Spoke with Pam and Megan. I asked if everything was going smoothly with Butrans and patients calling back. She said there has not been any issues. I asked if we could put patient education in the patient waiting areas, and she will check with Jenny.
	Cleveland	OH	44103	9/8/2011	gave dr Butrans portal invite,9/15/11 dinner invitation,talked to dr about 5 core selling messages and asked dr to consider a couple patients with pain conditions listed on pg.11,inclusion criteria,to start on Butrans,dr said he will keep Butrans in mind but most of his patients are medicaid,medicare and self-pay patients.talked about OxyContin being an option for patients,showed conversion guide discussed a few conversions and discussed formulary coverage.dr said after tomorrow,he wont be able to meet with rep's and i can leave info with Valerie,his LPN,due to a new policy in office.recommended Senokot-5
PPLPMDL0020000001	Highland Heights	OH	44143	9/8/2011	Window Call...I gave doc an invite to the 9/15 speaker program and asked him to consider attending to learn more about the butrans patient selection. I reminded him of the commercial insurance plans and that the patch should be applied to a clean, dry, and nearly hairless site.
	South Euclid	OH	44121	9/8/2011	Window call...Gave doc a butrans portal invite and an invite to the 9/15 speaker program. I asked him to prescribe butrans for patients that have failed on NSAIDS/tramadol.
PPLPMDL0020000001	Maple Heights	OH	44137	9/9/2011	Reviewed dosing & appropriate patient type for Butrans. He said that he does not like to write opioids. I empathized & asked him if he had any patients who he does prescribe opioids for. He said yes. I asked him to focus on those & discussed switching patients to Butrans instead of increasing their tramadol or Vicodin, especially when they call in too soon for refills or say their medication is wearing off too soon. He said he'd keep it in mind. Also spoke with Dina, his medical assistant & reviewed this information with her. I asked that she keep Butrans initiation guide & discussed patients who call too soon for refills of short-acting because it is not controlling their pain.
	Independence	OH	44131	9/9/2011	Spoke with Regina (pharmacist) & discussed Butrans pharmacists' webinars available. She said that might be helpful. I encouraged her to log on, bringing to her attention the interactive nature of the program as well as that the information is delivered by a PharmD. She said she would check it out & thanked me for the info. Started to discuss Butrans appropriate patient type (ie calling too soon for refills of short-acting) but she got a phone call that she had to take. Discussed savings cards for OxyContin with her technician.
PPLPMDL0020000001	Cleveland	OH	44113	9/9/2011	talked to dr about Butrans being an option for patients with pain conditions listed in visual aid,pg.11,dr said he's thought of a few patients to start on Butrans but patients havent wanted to wear a patch so he's getting resistance from patients.talked to dr about giving patients Butrans,with immediate release opioids,showed butrans fpi-maintenance of therapy section,dr said ok he will consider that next time.asked dr if he will see any patients this afternoon with pain conditions like we discussed where he could start patients on Butrans? dr said he probably will and he will talk to patients about Butrans.showed butrans patient info booklet,focused dr on application/rotation of Butrans and asked dr to give booklets to patients.focused dr on BWC, Medicare and commercial plan patients.OxyContin reminder for appropriate patients and discussed formulary coverage for
	Independence	OH	44131	9/9/2011	Spoke with MA Kathi & told her about upcoming Butrans dinner program. I asked if Dr Reddy ever attends. She said he actually does go to them sometimes. I let her know this is a local program & it will be the first one Dr Reddy would be hearing about Butrans since launch. She said that may cause him to go but he was not there for her to ask directly. I asked her to make sure he knows that when she gives him the invitation & she agreed. Discussed once weekly transdermal system of buprenorphine with her & reviewed appropriate patient type. I also asked her to check stock on savings cards but she said they had enough. Let her know I would return to follow up on the dinner program once Dr Reddy had a chance to consider.
PPLPMDL0020000001	Maple Heights	OH	44137	9/9/2011	Re-enforced Butrans appropriate patient type with Dr Gene. He said since he just saw me yesterday at the Macedonia office, he remembers our entire conversation. I asked if he had given any additional thought to Butrans & he said not really since he has been focusing so much on their EMR transition. Reviewed patient type & inclusion criteria, focusing on patients who are suffering from a chronic condition causing pain & are not well-controlled on their short-acting medication. He said he does think he will try it & it is just a matter of when that patient type will present. Discussed dosing & titration. Also reviewed OxyContin where appropriate for patients beyond discussed Butrans fpi,5 core selling messages with dr and dr focused on once weekly dosing and transdermal delivery,dr asked me to explain more about who the appropriate patients are for Butrans,showed visual aid,pg.11 discussed pain conditions dr talked about patients he see's with osteoarthritis that are taking tramadol and still not controlled,dr said he's got a few patients that he thinks would be willing to wear a patch.asked dr to start a couple patients on Butrans to get some clinical experience and also show patients Butrans patient info booklets focusing discussion on application/rotation of Butrans,dr said ok he will do that.dr asked about insurance
	Cleveland	OH	44113	9/9/2011	coverage,focused dr on BWC,commercial and Medicare patients.recommended Senokot-5
PPLPMDL0020000001					coverage,focused dr on BWC,commercial and Medicare patients.recommended Senokot-5

PPLPMDL0020000001	Cleveland	OH	44106	9/9/2011	met dr for 1st time,dr said he's an intern and did know about Butrans because a patient in the hospital had Butrans on and he didnt know anything about the medication.showed dr Butrans fpi,discussed 5 core selling messages,showed initiation guide and discussed appropriate patients to start on butrans.dr said he likes transdermal technology and once weekly dosing and he's sure there are patients in the clinic who he can try Butrans on.dr asked about insurance,discussed commercial plans and patient savings cards.asked dr if he had a couple patients today that have 1 of the pain conditions shown on pg.11 inclusion criteria visual aid where he could try Butrans? dr said probably will.recommended Senokot-S
PPLPMDL0020000001	Garfield Heights	OH	44125	9/9/2011	Spoke with Heather, pharmacist, & presented Butrans pharmacists' webinar information. She said she is disappointed there is not credit given for doing it. I told her of the interactive nature of the programs & pointed out that she could ask questions to a PharmD instead of getting all information from me, the rep. She said that was a good point & that she might log in. Also reviewed appropriate patient type & discussed OxyContin savings cards, which she said she has enough of.
PPLPMDL0020000001	Cleveland	OH	44113	9/9/2011	talked to dr about appropriate patients for Butrans,showed inclusion criteria in visual aid,dr said he's looking at patient list every day to see who's coming in to the office that he can talk to about Butrans.dr said biggest challenge is that a lot of patients dont want to stop their pills and wear a patch,dr said he knows that he can still give patients immediate release opioids but some patients just dont want to try anything new like Butrans.asked dr to look at the pain conditions we discussed and start a few patients with these conditions,on Butrans,dr said he will do his best and will continue thinking of patients to speak with about Butrans.focused dr on BWC and commercial plan patients.discussed OxyContin as an option for patients and formulary coverage for OxyContin.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	9/9/2011	talked to Vicky, no scripts for Butrans,talked about 5 core selling messages and what Vicky thought really stood out about Butrans,vicky focused on once weekly dosing and transdermal delivery.asked Vicky to continue giving Butrans patient info booklets,when they are getting patient counseling on opioids,she said she will do that and tell patients to talk to their doctors about Butrans.discussed OxyContin stocking,appropriate patients and formulary coverage.recommended Senokot-S
PPLPMDL0020000001	Beachwood	OH	44122	9/9/2011	Spoke with Bob & Shawnte' (MA) who said that Dr Warren was running two hours behind. I told them it seems I always pick the wrong time & asked for their advice on the best time/way to reach Dr Warren. They said it changes weekly so I have to keep checking back. They checked the computer system & Shawnte' said to try back on Monday as that would be a better day. Told them about Butrans dinner program & asked if Dr Warren ever attends them. They said they don't know but do not think he does. I discussed Butrans appropriate patient type/positioning with them & asked if they take phone calls from patients requesting refills of medications or who complain their medication isn't lasting long enough. They both said they occasionally get those calls but give them to Donnie or Alisa (the nurses).
PPLPMDL0020000001	Maple Heights	OH	44137	9/9/2011	Handed back information about Butrans pharmacists' webinars to Jim, pharmacist & his tech. Jim said it is not likely he would participate since no CE's are given for it. I asked that he consider logging on as the information was specifically for pharmacists & would be delivered by a PharmD, not a rep. He still said probably not. Reviewed Butrans savings ability by printing cards at Butrans.com & discussed OxyContin savings cards.
PPLPMDL0020000001	Lakewood	OH	44107	9/9/2011	I told Dr that I've been here many times and we've talked about Butrans. I reminded him he's told me about patients who he thought could benefit from Butrans, yet he hasn't started anyone. I asked if he just does not see a benefit to a 7 day transdermal, he said that he does think it would be a good option for some patients. I asked where he thinks he will use it and he told me about a patient on tramadol who does not tolerate other opioids as well, but needs something more than tramadol. We discussed how to initiate this patient. We discussed managed care for both Butrans and OxyContin and the savings cards. I made sure they have savings cards and medication guides. I asked if he would try just a few patients to see how they do on Butrans and he said he will.
PPLPMDL0020000001	Independence	OH	44131	9/9/2011	Quick call- Roman said that he is identifying Butrans patients & he will continue to keep it in mind. He also said he has enough savings cards for Butrans & OxyContin. Started to ask him about patient type(s) he is thinking about but he stopped me saying he did not have time today. Reminded him of program next week.
PPLPMDL0020000001	Cleveland	OH	44106	9/9/2011	talked to dr about patients he's started on Butrans and why he thought Butrans was a good option for them,dr said these were patients taking tramadol for chronic pain,calling in early for refills and he decided to try Butrans right there.showed inclusion criteria,talked about pain conditions as dr see's all of them,and asked dr if he'll see more patients that he can start on Butrans? dr said yes he will start more.gave dr butrans dinner invitation 9/15/11 and portal invite.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44106	9/9/2011	talked to Juan,MA,as dr was in procedures this am,we talked about patients dr is starting on Butrans and Juan said these are all patients currently taking short-acting opioids,Juan said the one's he's started for the most part are doing great on Butrans and are controlled,Juan said there were a couple patients dr wanted to start on Butrans but patients didnt want to stop taking their pills.showed Juan Butrans fpi noting maintenance of therapy section and discussed patients starting on Butrans still getting some short-acting opioids for breakthrough pain,Juan said dr wont give patients short-acting opioids with Butrans they have option of aspirin or ibuprofen. we talked about patients getting Butrans patient info booklets and focus discussion on application/rotation of Butrans and told Juan to focus on commercial plan patients.
PPLPMDL0020000001	Lakewood	OH	44107	9/9/2011	I asked Dr how his Butrans patients was doing. He said he did not know if the patient continued treatment as he has not heard from her. I asked how many patients does he start on hydrocodone around the clock each week. He said most start PRN but he sees some each week who are looking for an increase in their dose. We discussed starting these patients on Butrans instead and he agreed to try this.
PPLPMDL0020000001	Mayfield Hts	OH	44124	9/9/2011	I asked doc what he remembers about butrans. He said "workers comp?" I confirmed that it is covered on BWC. I also reminded him of the 7 day delivery, CII status, and the patient type. Gave him program invite and formulary grid for butrans.
PPLPMDL0020000001	Independence	OH	44131	9/9/2011	Quick call as I saw Dr Pal at the window. I handed back a Butrans dinner invitation & asked if he thought he would make it. He said probably not. I reminded him this would be the first Butrans program for him & let him know there would be various other physicians & experts attending to discuss experience with Butrans. He said he would see. I asked if he would continue to look for Butrans patients & he agreed.
PPLPMDL0020000001	Parma	OH	44134	9/9/2011	Spoke with MA Fran & Binka & discussed upcoming Butrans dinner program. I asked her if Dr Scanlon ever attends. They said rarely. I let them know this would be the first formal presentation he would hear about Butrans & that various local physicians & experts will be in attendance to discuss Butrans with. I asked that they be sure to mention that to Dr Scanlon when they give him the invite & they agreed. Also had them check the stock on Butrans & OxyContin savings cards & they said they have enough for now.
PPLPMDL0020000001	Beachwood	OH	44122	9/9/2011	Spoke with Tricia & Yvonne (MA) who said Dr Tabbaa had a family emergency & had to leave the country for approximately 3 weeks. I asked about Jim's return. They said they do not know when he is coming back either. Reviewed with them appropriate Butrans patient type & had them check Dr Tabbaa's stock of savings cards. Discussed how the cards are used & who is eligible to use them. Let them know they could be used for new prescriptions or refills as well. Yvonne said she will make a note to be sure to give them out if patients are coming in to pick up prescriptions for Butrans or OxyContin.
PPLPMDL0020000001	Cleveland	OH	44106	9/9/2011	worked pain management dept
PPLPMDL0020000001	Cleveland	OH	44113	9/9/2011	showed dr inclusion criteria,pg.11 visual aid,dr talked about patients with low back pain that he treats with opioids.dr said he will usually start with tramadol in hopes that tramadol will control the pain even though tramadol is short-acting and patients with low back pain have chronic pain he doesnt like to start a long-acting opioid until all other short-acting opioids fail.talked to dr about starting a couple patients with low back pain on Butrans so he can get some clinical experience,dr said he will consider it.dr asked about insurance coverage,focused dr on BWC,commercial and Tricare patients.i asked dr what drawbacks he saw in starting patients on Butrans? dr said nothing at the moment but he doesnt think all of his patients will want to wear a patch so he has to talk to a few patients about Butrans and see what responses he gets.dr had to go so told him i would follow-up next week.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44113	9/9/2011	discussed Butrans fpi,5 core selling messages with dr,dr focused on transdermal technology and once weekly dosing option of Butrans.we talked about pain conditions he treats,pg.11 inclusion criteria,dr talked about low back pain patients.asked dr to think of a few patients today with low back pain that meet Butrans indication where he could start them on Butrans,dr said he will do that.dr asked about insurance coverage for medicaid patients,discussed PA requirement for Butrans and focused dr on BWC,commercial or Tricare patients.recommended Senokot-S
PPLPMDL0020000001	Westlake	OH	44145	9/9/2011	I asked Dr what his hesitation is to trying Butrans. He said he forgets about it and he asked me again to go over the dosing and initiation. I reviewed this info and asked if he can think of patients who who could benefit from Butrans. He thinks that hardest part will be getting patients to try a patch instead of pills. We discussed that Butrans can be used for opioid naive patients before they start vicodin around the clock. I asked Dr to just try on a few patient, and he agreed. We reviewed managed care for Butrans and OxyContin.
PPLPMDL0020000001	Lyndhurst	OH	44124	9/9/2011	Quick call...Reminded doc of the Butrans indication, 7 day delivery and CII status. I asked him to prescribe Butrans after tramadol failures. Provided initiation guide, formulary grid, and initiations invite. Nothing learned
PPLPMDL0020000001	Lakewood	OH	44107	9/9/2011	I asked Dr if things have gone smoothly with Butrans since the hummana patient not getting approved. He said that most patients seem to be doing well. I asked if he would prescribe Butrans before going to vicodin or percocet and he said he will continue to prescribe it. Reminder that OxyContin is still a long acting option and I said he writes for OxyContin most often in the hospital.
PPLPMDL0020000001	Lyndhurst	OH	44124	9/9/2011	Doc said she thinks of butrans regularly but the problem is the lack of medicare coverage. She thinks it is perfect for elderly patients (i.e. the elderly lady that has taken 2 darvocets/day for the majority of her life). She said that triptans are the typical protocol for the elderly unless they have heart issues. She would like to go to butrans but those are the medicare patients. I asked her about the speaker program but she said she could not come. Reminded her of the commercial insurance. I asked her about younger patients. She said she likes to keep the younger patients off chronic narcotics whenever possible.
PPLPMDL0020000001	Lyndhurst	OH	44124	9/9/2011	I reviewed the butrans indication and positioning and asked her if she has any patients in mind. She said she has the same problem as Dr. reed....lack of medicare coverage. I focused her on the commercially insured patient.
PPLPMDL0020000001	Cleveland	OH	44106	9/9/2011	I asked her about coming to the 9/15 speaker program. She said she was unsure at this time but that Patricia may go as she has been attending more program lately.
PPLPMDL0020000001	Bedford	OH	44146	9/12/2011	met dr for the 1st time,dr is a fellow in pain management clinic,she has seen Butrans in office(materials i have left like initiation guide,patient info booklet,fpi) but hasnt taken time to go through everything.dr said she knew it was a patch but thats it.discussed Butrans fpi,5 core selling messages,showed initiation guide and focused dr on application/rotation section in Butrans patient info booklet.dr said she likes that butrans is a patch and dosed once a week,asked dr if she has any patients today that have 1 of the pain conditions shown on pg.11 visual aid? dr said probably so as they see it all here.asked dr to start a couple patients on Butrans so she can get some clinical experience.dr said she will read through all of Butrans fpi and let me know if she has any questions but will certainly keep Butrans in mind as an option for patients.dr asked about insurance coverage,focused dr on Commercial plan patients.recommended Senokot-S
PPLPMDL0020000001	Beachwood	OH	44122	9/12/2011	Quick call- Positioned Butrans for patients after tramadol who have chronically painful conditions such as spinal stenosis & spondylolisthesis. He said he is keeping it in mind. He also said he is not going to be able to attend my upcoming dinner program. He said he did not have time this afternoon for a long discussion & asked that I try back next Wednesday around lunch time. Spoke with Roberta, one of his MA's & reviewed Butrans appropriate patient type & savings cards.
PPLPMDL0020000001	Cleveland	OH	44106	9/12/2011	Spoke with Ted, nurse, & discussed upcoming Butrans dinner program. He said he would give Dr Malkamaki the invitation & encourage him to attend the program since it would be the first dinner program presentation he would hear on Butrans. Also reviewed with him Butrans indication, dosing, usage, & delivery system. Discussed appropriate patient type, focusing on patients who are on chronic Vicodin or tramadol who are not getting relief from it. Also discussed OxyContin & savings cards for both products.
PPLPMDL0020000001	Cleveland	OH	44106	9/12/2011	talked to dr about Butrans 5 core selling messages,dr focused on once weekly dosing and transdermal delivery.showed dr pg.11 inclusion criteria in visual aid and asked dr if he treats these conditions? dr said yes and talked about patients with low back pain.dr said he will start with non-opioid therapies,when thats not working to control pain he will start patients on tramadol.asked dr to start a couple patients like this on Butrans,showed appropriate patients section and dr said he will think about some patients and see if patients are interested in starting Butrans.focused dr on application/rotation of Butrans showed Butrans patient info booklet and focused dr on commercial plans.OxyContin reminder and formulary coverage for OxyContin showed grid.recommended Senokot-S

	Parma	OH	44129	9/12/2011	Reviewed Butrans 5 core messages with Dr Rossi & reviewed appropriate patient type. She reminded me that she does not like to prescribe opioids. Empathized & asked her if she does have patients who she does prescribe opioids for & she said yes. I asked if some of them have conditions such as spinal stenosis, osteoarthritis, or spondylolysis & showed inclusion criteria. She said yes. I told her these were the types of patients Butrans was studied for safety & efficacy in. I asked what she generally does when a patient is not well-controlled on chronic tramadol. She said Vicodin 3 times per day. I told her those were potential Butrans patients. I asked if she could see herself prescribing Butrans for those types of patients. She said she would. Reviewed dosing & let her know the patient type we were talking about could start at the lowest dose, 5mcg/hr. Discussed titration ability after 3 days to a maximum 20mcg. She asked about supplemental analgesia & I reviewed ability to supplement with opioid or non-opioid medications. She asked if Vicodin could be used for supplemental. I told her yes. Reviewed CII & abuse/addiction potential. Also discussed managed care & savings cards for eligible patients. I asked again if she would try Butrans on this type of patient & she again said she would. Discussed OxyContin q12h for appropriate patients beyond Butrans 20mcg. Invited her to upcoming program. She said she did not know if she could attend.
PPLPMDL0020000001	Northfield	OH	44067	9/12/2011	Gave on-duty pharmacist the information on upcoming Butrans pharmacists' webinars & encouraged her to log-on. She said she would. Let her know the information would be delivered by a PharmD & that she would have the opportunity to ask questions as the format is an interactive one. She said she would also make a copy & leave one for the other pharmacist. Discussed Butrans appropriate patient type & also discussed e-voucher automatic savings & OxyContin savings cards along with eligibility requirements.
PPLPMDL0020000001	Parma	OH	44134	9/12/2011	Spoke with Heather (pharmacist) & discussed pharmacists' webinar information sheet. Let her know this would be a good opportunity to get her questions answered by a PharmD. Described interactive nature of the program & asked if she thought she might log in. She said she thinks she will & also said she would leave the information for Allene. Discussed Butrans & appropriate patient type. She said she has filled a few prescriptions for it. Reviewed dosing & delivery system. Also discussed OxyContin savings cards for eligible customers.
PPLPMDL0020000001	Beachwood	OH	44122	9/12/2011	Quick call- Alisa said Dr Warren was slammed but that she allowed me back because she knows I will be respectful & not take a lot of time. I handed Dr Warren an invitation for the upcoming dinner program & asked if he thought he might attend. He looked at it, studying the details & said he might. I let him know there would be various other physicians & experts in attendance, giving him a great opportunity to learn more about Butrans & who the appropriate patient might be. Also let him know this would be a good opportunity to get questions answered from a fellow physician. He said he does like to learn & if his schedule allows, he will attend. I asked him to register ASAP as spots for the program are filling up & he agreed.
PPLPMDL0020000001	Westlake	OH	44145	9/12/2011	I asked Dr to tell me where he has been using Butrans. He said he started a patient who did not tolerate other opioids so he tried Butrans. He said he would consider any patient for Butrans, and every patient is different. I asked him to continue to think of Butrans when he sees commercial insurance and he agreed.
PPLPMDL0020000001	Lakewood	OH	44107	9/12/2011	Ran into Dr in hall coming from hospital. I reviewed that most commercial patients will have access to Butrans at around a \$15 copay. He said he will keep trying to prescribe. I asked if he knows which insurance they have when he goes into a patient room. He said it is in their chart and he usually knows if they are a working patient. Reminder that OxyContin is an option when Butrans may not be covered for Medicaid patients.
PPLPMDL0020000001	Independence	OH	44131	9/12/2011	Reminded Deb of our Butrans discussion at our last lunch & about the upcoming Butrans dinner program. I asked if she had given either more thought since my last visit. She said she has not yet prescribed Butrans due to lack of familiarity & comfort with it but does think she will attend the dinner program on the 15th. I asked if she wanted me to register her & she said she had the paperwork filled out & would register herself this evening. Discussed that this will be an excellent opportunity for her to discuss Butrans with other practitioners & also to learn more about who is & who is not appropriate for Butrans. She said she is looking forward to it as she does want to learn more about Butrans for her patients.
PPLPMDL0020000001	Cleveland	OH	44109	9/12/2011	talked to dr about the couple patients he has on Butrans, dr said both patients were taking several opioids not controlled and wanted something else, dr thought Butrans would be a great option as its once a week dosing and dr likes that Butrans has transdermal delivery. I asked dr if he see's pain conditions, pg.11 inclusion criteria? dr said he does; asked dr if he will see any patients this afternoon or this week that he can start on Butrans? dr said he has 2 patients in mind since our discussion today is helping him think more about his patients and who could try Butrans, asked dr if he could see any drawbacks with starting patients on Butrans? dr said none in his mind but he thinks it's more patients that don't want to wear a patch every week and not believing it'll work. focused dr on application/rotation info in patient info booklet. focused dr on BWC and commercial insurance
PPLPMDL0020000001	Cleveland	OH	44195	9/12/2011	worked neurology dept- left Butrans fpi, initiation guide, patient info booklet, 9/15/11 dinner program invitation, portal invite and formulary grid for Butrans and also left OxyContin fpi, conversion guide and formulary grid - for all neurologists - Dr. Krieger, Dr. Mays, Dr. Spears and Dr. Shilman. worked rheumatology dept- left Butrans fpi, initiation guide, patient info booklet, 9/15/11 dinner program invitation and portal invite for Dr. Calabrese, Betsy Kirschner, NP, Patty Paczos, PA, Dr. Chatterjee, Dr. Long and Dr. Deal - none of the doctors would see rep's I had to leave info at receptionist desk who gave to doctors medical secretaries to put in their boxes.
PPLPMDL0020000001	Cleveland	OH	44114	9/12/2011	talked to Joel, Pharmacy Manager, about patients he see's that are taking short-acting opioids and if he provides patient counseling? Joel said he does that and has given a few Butrans patient info booklets to patients. no scripts for Butrans yet, asked Joel to continue giving booklets to patients, showed Butrans visual aid and discussed 5 core selling messages and Joel said the once weekly dosing and Butrans being a patch were both benefits he saw and would share with patients, we talked about Butrans formulary coverage focused Joel on BWC and commercial plan coverage, recommended Senokot-S
PPLPMDL0020000001	Lakewood	OH	44107	9/12/2011	Spoke with Chuck, I asked about the movement with Butrans he's seen a few scripts from Cleveland clinic, I asked if it was nageeb and he said it rings a bell. I asked if patients have had a lot of questions about Butrans and he said he hasn't gotten any. We think the medication guides for patients help to tell them everything. We reviewed the managed care for Butrans and OxyContin.
PPLPMDL0020000001	Northfield	OH	44067	9/12/2011	Spoke with Maggie (nurse) & delivered Butrans 5 core messages. She said she recognizes the name from working with Dr Ortega on Tuesday mornings at this location. She said she knows that he uses a lot of Butrans for his patients. Discussed that Cindy had sent me over from that office to introduce Butrans to Dr Marshall as she thought he may be interested in hearing more about it. Told her about upcoming dinner program & asked if she thought he would attend. She said probably not but that she would give him the invitation & tell him that he should go because she thinks he would have a lot of patients who could benefit from Butrans. She worked with me to set up an appointment with him in October & also let me know about another office location he has in Garfield Heights which she said is "less busy" than this location so my opportunities to see him may be greater there.
PPLPMDL0020000001	Lakewood	OH	44107	9/12/2011	Quick call with Aduawa, I asked about the movement of Butrans. She did not know wh, but said she has seen it given. I reviewed the medication guide and what to tell patients. Steady state in 3 days and proper use and application. We reviewed Butrans and OxyContin savings cards.
PPLPMDL0020000001	Cleveland	OH	44115	9/12/2011	talked to George, Pharmacist, about Butrans 5 core selling messages and George talked about Butrans being a patch and once weekly dosing. I asked George if he provides patient counseling for those patients taking opioids? George said they do talk to patients, asked George to discuss Butrans with patients and give butrans patient info booklets so they can talk to doctors, George said ok. focused George on BWC and commercial insurance plans, recommended Senokot-S
PPLPMDL0020000001	Bedford	OH	44146	9/13/2011	Spoke with pharmacist Ed & reviewed Butrans with him. Gave him an information sheet on pharmacists' webinars for Butrans & encouraged him to log on to interact with other pharmacists & hear about Butrans from a PharmD. He said he would do this. Reviewed with him appropriate patient type, including those who take chronic Vicodin or tramadol who are not well-controlled. Also discussed savings through e-voucher & OxyContin
PPLPMDL0020000001	Cleveland	OH	44106	9/13/2011	talked to Matthew, Pharmacist, as Steve, Pharmacy manager was out for the day, about Butrans scripts and stocking. Matthew said he's not seen any scripts nor do they have Butrans in stock. Matthew said I should follow-up next Tuesday with Steve to understand why he's not ordered Butrans. showed Matthew Butrans 5 core selling messages, Matthew talked about transdermal delivery and once weekly dosing of Butrans and said he feels these are the 2 features that stand out to him. asked Matthew if he would recommend Butrans to patients by giving them the Butrans patient info booklets, when they are providing patient counseling on opioids and patients are telling them their short-acting opioids aren't controlling their pain, Matthew said he will do that. discussed formulary coverage. gave OxyContin reminder for appropriate patients and discussed formulary coverage for OxyContin. recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44113	9/13/2011	talked to dr about inclusion criteria, pg.11 visual aid, asked dr how she managed chronic pain for these conditions. dr talked about several non-opioid therapies she would do 1st, then dr said she would always start patients out on tramadol in hopes that their pain would be controlled with that medication. dr said she knows these are all chronic pain conditions and tramadol is a short-acting opioid but she would still do it that way. dr said she thinks after tramadol fails she would start patients on Butrans, told dr that was great she thought of Butrans there and did she have patients like this where she could start them on Butrans today and the rest of the week? dr said she's sure she does. dr said she's comfortable with butrans and will start more patients. focused dr on BWC and commercial plan patients. OxyContin reminder for appropriate patients and discussed formulary
PPLPMDL0020000001	Independence	OH	44131	9/13/2011	I handed Dr Sundaram a Butrans dinner invitation & asked if he would attend. He said because it is close by, he might. I let him know that various physicians & experts would be there to discuss Butrans & ask/answer questions, so it would be a good opportunity to discuss Butrans experience with other physicians. He said this was a good point & said that he can't guarantee that he will be there, but that he does plan to attend. Reminder of appropriate patient type.
PPLPMDL0020000001	Cleveland	OH	44113	9/13/2011	talked to dr about starting more patients on Butrans, like the one's he's already started, dr said some weeks he has a couple patients in mind for Butrans and other weeks he doesn't, dr said he has been thinking of patients who are taking the max amount of vicodin, as we have discussed in past many times, and not controlled and instead of giving them ultram ER he's starting them on Butrans. talked to dr about starting patients earlier, on Butrans, asked dr if he saw any drawbacks in doing so? dr said no he didn't, dr said if patients are controlled on medications though he's not going to convert them to Butrans, we talked about patients calling in earlier every month for refills of short-acting opioids or asking him in office for something different, dr said that made sense and he will keep it in mind. focused dr on BWC and commercial insurance plans, recommended Senokot-S
PPLPMDL0020000001	Westlake	OH	44145	9/13/2011	Quick follow up in Lakewood, I asked how many patients he is seeing tonight who might benefit from Butrans. He said there might be a one or two, he will have to check. I asked if he would start those 2 patients today and he said he will try.
PPLPMDL0020000001	Cleveland	OH	44103	9/13/2011	talked to dr about patients she's started on Butrans and if she could think of more patients like this? dr said she is talking to a lot more of her patients but has really been focused on the patients maxed out on percocet and asking her for more pills but now after our discussion of the inclusion criteria, pg.11 visual aid, dr said she's thinking of patients taking tramadol for arthritis that aren't controlled. talked about initiation of Butrans, focused dr on commercial but dr has a lot of Medicaid and said she knows the PA requirement for Butrans so it's easy for her to complete. gave OxyContin reminder and recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44195	9/13/2011	talked to Stan, Pharmacist, about Butrans stocking and scripts they are seeing here. Stan said he knows they are filling scripts but doesn't know who's writing them. Stan said he doesn't have time to look that info up today and I should talk to Curt, Pharmacy manager about that info. Curt wasn't there today. Stan said they have been ordering Butrans so he knows doctors are writing Butrans as they have all 3 dosage strengths. showed Stan Butrans patient info booklet, asked if he and other pharmacists could give patients this booklet when filling scripts if they didn't get one from doctors. Stan said he would do that and we talked about formulary coverage for Butrans. we discussed OxyContin being an appropriate option for patients, confirmed stocking and talked about formulary coverage. recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44130	9/13/2011	I asked Dr Fedorko if he is still planning to attend the Butrans dinner program on Thursday. He said he is. He then added that his wife does not want to come with him. I told him that that was good because it is only for physicians, NP's, & PA's. He said he is always allowed to bring her & he lists her as his office manager. I told him this was not my rule, but PhRMA guideline & that our company adheres to all guidelines. He said then I will never get anyone to any of my programs. I asked him if he would like me to cancel his registration but he said no but he might not come. Positioned Butrans for patients with chronic conditions causing pain who are not well-controlled on their short-acting medication.
PPLPMDL0020000001	Westlake	OH	44145	9/13/2011	I reviewed our last conversation about trying Butrans before going to vicodin around the clock. He agreed that it could be a good option. I reminded him again that the medication booklets make it easy to explain Butrans to patients and asked if he would try a few patients to see how they do. He agreed. Reminder about focusing on commercial insurance and that OxyContin is another option for Med D AARP patients.
PPLPMDL0020000001	Westlake	OH	44145	9/13/2011	Dr said he has not started any new patients lately, I asked why, he said he just hasn't thought of it. I showed the inclusion criteria and asked if he sees these types of patients, he does. I asked if would consider Butrans for these types of patients and he agreed.
PPLPMDL0020000001	Lakewood	OH	44107	9/13/2011	Spoke with Heather, I asked about the success with Butrans and she says they might have sent some of the Butrans back, the 20mcg. I reviewed the initiation guide and that 5 and 10mcg are the starting doses so those were important to have in stock. We reviewed the medication guide and what to tell new patients. We discussed the savings program for both Butrans and OxyContin.

	Parma	OH	44129	9/13/2011	Dr Roheny saw me at the window & told me excitedly that he wrote a Butrans prescription. I told him this was great news & asked him to tell me about the patient. He said he could not remember off the top of his head who it was but that he knows she had private insurance. He said he did give her a savings card with the prescription. He asked Loraine who the patient was because he couldn't think of the specifics as far as why he chose Butrans for her but Loraine didn't know. I asked if he plans to continue to try patients on it to gain clinical experience & he said yes.
PPLPMDL0020000001	Cleveland	OH	44113	9/13/2011	invited laura,np,to 9/15/11 butrans dinner program,laura said she appreciated all of the info but her last day of work here is this friday,sept.16th so all she's thinking of right now is finishing up this week seeing patients.asked laura to keep Butrans in mind as an option for patients that meet indication,gave initiation guide and formulary grid and briefly discussed pain conditions.pg.11,where Laura could consider patients for butrans.laura said ok and thanked me for info.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44113	9/13/2011	talked to dr about Ryzolt as a once daily dosing option for patients,dr said he is writing Ryzolt and will continue prescribing as its not scheduled.dr said he is keeping Butrans in mind if he does decide there's a patient he wants to start on it but at this time he's only considering Ryzolt for patients.we talked about patients with osteoarthritis that are taking tramadol daily yet not controlled,asked dr to convert them to Ryzolt,dr said he will do that.discussed Ryzolt value cards and recommended Senokot-S
PPLPMDL0020000001	Mayfield Heights	OH	44124	9/13/2011	Spoke to Anthony about the stocking of butrans and oxycontin. He said he has all the oxycontin stocked but had not seen any butrans scripts though he does have it in stock. I explained the positioning and the strengths. He asked about insurance. Explained the commercial insurance and the savings cards. He asked about the use of the 20mcg dose. I explained that its only a titration dose. Provided patient info guide.
PPLPMDL0020000001	Solon	OH	44139	9/13/2011	Handed Dr Zaidi invitation for upcoming dinner program for Butrans. Let him know this could be his perfect opportunity to discuss Butrans with other experts & physicians to get some of his questions answered about their experience with Butrans. Also told him it may help him identify where Butrans may play a role for him in his practice given his patient population. He said that he would like this opportunity & would be interested in attending the program if his schedule permits. Let him know about the limited availability of slots for the program & asked him to register himself ASAP to ensure he gets a place. Also discussed Butrans as a possible option for some of his newer patients like those who are not already on a high dose of opioids & who are not getting relief from their current medication. Offered Portal invite as an alternative to live program. Discussed OxyContin savings cards & asked if the patient he had told me about was able to use the card every two weeks without issue as we discussed. He said he thinks it must have worked out OK for him.
PPLPMDL0020000001	Cleveland	OH	44124	9/13/2011	I explained to doc the who the appropriate butrans patient is - after tramadol failures and/or before going to hydrcodone ATC. I asked him to attend the 9/15 speaker program to learn more about butrans. I reviewed the formulary coverage for butrans and oxycontin including BWC.
PPLPMDL0020000001	Brooklyn	OH	44144	9/13/2011	Caught Dr Deeb at the window. Handed him his Butrans dinner program invitation & let him know this would be a great opportunity to speak with other physicians & experts about Butrans. I asked if he thought he would be able to attend. He said there was a chance that he would be able to, but that his wife may have other plans for him. He said if she does not need him to take care of something for her, he would be able to go. Let him know this would also help him determine who might be & might not be ideal Butrans patients in his practice & reminded him of his interest in Butrans from when I first introduced it to him months back. He said he would do his best & then walked away.
PPLPMDL0020000001	Mayfield Heights	OH	44124	9/13/2011	Window call.....I asked doc how patients are doing on butrans therapy. She said everything is great. I informed her that the savings cards are also available online for download. Invited her to the 9/15 speaker program.
PPLPMDL0020000001	Cleveland	OH	44130	9/13/2011	I handed Dr Diab an invitation for the program for Butrans on Thursday evening. I told him this would be an excellent opportunity for him to speak with other area physicians & experts about his & their experience with Butrans. Also discussed how he could learn more about who is & who is not an appropriate Butrans patient. I asked if he thought he would be able to attend. He said he would like me to tentatively mark him as a "yes" for attending. I let him know of limited availability of seating for the event & asked him to register ASAP to ensure he gets a spot. Also reminded him of Butrans & OxyContin savings cards.
PPLPMDL0020000001	Westlake	OH	44145	9/13/2011	Spoke with Darrel, I asked about the feedback for Butrans and he said he hasn't heard much from patients. He said that it seems to be getting covered by managed care as well. We discussed letting the patients know that steady state is in 3 days. We reviewed the savings program for Butrans and OxyContin.
PPLPMDL0020000001	Parma	OH	44134	9/13/2011	I asked Dr Hernandez where OxyContin fits into his practice now that he has the option of Butrans & he has found such a big place for it. He asked if I wanted the honest answer & I told him I did. He said he is trying to get as many patients off OxyContin as he can. I asked him why. He said that when someone is on OxyContin, they are not supposed to operate heavy machinery or drive, but people need pain relief so they do that anyway when they take it. I asked him if he finds that for all opioids & not just OxyContin. He said yes that is true. He went on to say that is why he wants everyone on buprenorphine, like Butrans. I reminded him that Butrans still works on the mu opioid receptor. He said he knows. He went on to tell me about how BWC, starting in January, will no longer pay for Suboxone for pain, just addiction. He said that means patients who are getting good relief on Suboxone will have to be switched to something else, where he would choose OxyContin if he has to. But he added that sometimes patients need Suboxone because of their former addiction to OxyContin. He did say that he has been getting consistently good results with Butrans & that patients really like it. He added that his patients report that side effects subside after a few days. I told him we do not have data that suggests that as it has not been
PPLPMDL0020000001	Mayfield Hts	OH	44124	9/13/2011	Window call.....I talked about the 9/15 speaker program about butrans. I asked him to come to learn more about the proper selection of butrans patients. He said he thinks he has something that night but he will check.
PPLPMDL0020000001	Euclid	OH	44117	9/13/2011	I asked doc if he considered attending the speaker program this thurs. He said he can't - he works late on thurs and that wednesdays are best for him. He did say that he wrote one script of butrans and that he would let me know how things go. I reminded him that BWC is covering butrans. He said it was a workers comp patient.
PPLPMDL0020000001	Parma	OH	44129	9/13/2011	I told Dr Ortega I noticed that he registered for the Butrans program & asked if he was really coming. He asked me to remind him of the details of when/where it is, so I reviewed that with him. I let him know that a lot of physicians & experts would be there to share their experiences & questions about Butrans & encouraged him to attend. He said he will definitely be there as he learned a great deal from the last program. I let him know it would help him better place Butrans in his practice & he agreed. Also reminded him of savings cards for Butrans & OxyContin & recommended Senokot-S.
PPLPMDL0020000001	Cleveland	OH	44103	9/13/2011	talked to Valerie,LPN,as dr isnt seeing reps anymore due to new policy with NEON.talked to Valerie about 5 Butrans core selling messages,Valerie said there are hundreds of patients taking tramadol,vicodin and percocet daily and that she thinks Butrans would be a great option for many of their patients since so many people call daily for refills and they are calling earlier every month saying their short-acting opioids arent controlling their pain.showed Valerie Butrans inclusion criteria.pg.11,discussed initiation of Butrans with Valerie and asked Valerie if he would flag patient charts for commercial plan patients that are like we discussed that she can give dr and suggest Butrans.Valerie said majority of doctors patients are Medicaid and she's not sure if he'll listen to her,but she'll try it and see what happens.told Valerie to focus on commercial,BWC and Tricare and showed formulary grid.left 9/15/11 Butrans dinner invitation for dr and portal invite and recommended Senokot-S
PPLPMDL0020000001	Parma	OH	44129	9/13/2011	I asked Dr Tolentino if she was planning on coming to the Butrans dinner program on Thursday. She said she does plan to come & asked if her husband, a physician, can come with her. I asked if he had an interest in Butrans & she said yes. I told her that attendance was limited to physicians, NP's, & PA's, so his coming should not be an issue. I asked if she had registered yet. She said she has not yet & asked me if I could register, so I told her I could. I let her know this would give her a good opportunity to speak with other area physicians & experts about Butrans, learning more about what patient type may be appropriate for it. She said that is what she is hoping for. Also gave her Senokot-S & Colace samples & reminded her of savings cards for OxyContin.
PPLPMDL0020000001	Cleveland	OH	44106	9/14/2011	talked to Patty,Pharmacist,about Butrans stocking and Patty said Margie,Pharmacy supervisor ordered Butrans initially when we launched but they never saw any scripts and medication was sitting on shelf so she thinks Margie sent it back? Patty said she wasnt sure and I had to follow-up with Margie next week as she's out this week.we talked about Butrans 5 core selling messages,Patty talked about Butrans once weekly dosing and transdermal technology and I asked if Patty provided patient counseling for those patients taking opioids daily but arent controlled? Patty said yes they do provide patient counseling.I asked Patty to recommend Butrans,give booklet so patients can discuss Butrans with their doctors.Patty said she'll do that and I should also talk to Margie about that as she's the supervisor.discussed OxyContin stocking and formulary coverage and recommended Butrans
PPLPMDL0020000001	Cleveland	OH	44114	9/14/2011	talked to dr about the patients he's started on Butrans and asked if he had more like them that he could start on Butrans this week? dr said he probably does and will keep Butrans in mind.showed dr pain conditions.pg.11 visual aid and asked him to think of these conditions this week and when he see's appropriate patients for Butrans start them and focus on BWC,dr said he will do that and no issues so far with patients on Butrans.OxyContin reminder,recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44104	9/14/2011	gave dr butrans 9/15/11 dinner invitation and portal invite and asked dr if he's had any patients in office that he felt were appropriate to start on Butrans? dr said noone lately but he knows who the appropriate patient is,i showed dr Butrans visual aid and discussed appropriate patients.dr said biggest challenge is majority of patients here are medicare and Butrans isnt covered.talked about commercial plan patients with 1 of the pain conditions shown on pg.11 and starting patients on Butrans.dr said he will keep Butrans in mind. discussed formulary coverage and recommended Senokot-S
PPLPMDL0020000001	Warrensville Heights	OH	44122	9/14/2011	Introduced myself & Purdue's products to Dr Amaro. Presented Butrans 5 core messages & asked his initial thoughts. He said it sounded interesting. Discussed appropriate patient type & importance of appropriate patient selection. Also discussed Butrans as a CIII opioid & reviewed abuse/addiction potential. Dr Amaro said he would be interested to hear feedback from other physicians on how they use it as he relies on that as a newer physician. He said he would not be able to attend the dinner program tomorrow night, although he wishes he could. Let him know I would invite him as other opportunities to learn present. Discussed OxyContin q12h for appropriate patients beyond Butrans range & recommended Senokot-S for medication-induced constipation, discussing dual MOA.
PPLPMDL0020000001	Parma	OH	44129	9/14/2011	I asked Dr Chagin what his real hesitation is with prescribing Butrans. He said patients are already on short-acting around-the-clock opioids & those patients don't want to switch. I asked him what about patients who are saying they are not well-controlled on their short-acting- wouldn't it make sense to try something different instead of more of the same? He said this was a good point. I asked him if he could see himself using Butrans for patients who are not well-controlled on 2-3 tramadol per day. His face lit up & he said yes. He said that would be perfect. I agreed that this patient type would be ideal. Discussed CIII & abuse/addiction potential. He asked me if I had access to a pain contract that he could use. Discussed various resources & gave him a USB for PurdueHCPC.com & also told him about Partners Against Pain website. He was very grateful & invited me to come back this afternoon to help him navigate. I agreed. Discussed appropriate patient type further & went through patient information booklets. I asked if he will start a few of this type of patient on Butrans & he agreed. Discussed OxyContin 7 available tablet strengths & q12h dosing. Also invited him to the program tomorrow & he said he will attend. I asked him to register & he agreed.** Returned after practice hours to assist Dr Chagin in navigating through Partners Against Pain resources to find a pain contract for him to implement for his practice as he requested. **
PPLPMDL0020000001	Warrensville Heights	OH	44122	9/14/2011	Reviewed 5 Butrans core messages with Dr Garwood & asked his thoughts. He said he does think it sounds like a good option. He asked me if a patient who has a fracture who he had prescribed Vicodin or Percocet 4 times per day would be a good patient to put on Butrans. Discussed indication & asked what his definition of "chronic" is. He said probably at least a month. I told him he could use his clinical judgment on whether a patient would be in pain for a long period of time, but if the patient's condition could not be considered "chronic", they may not be the right patient. Discussed appropriate patient type & asked if he would consider using Butrans if a patient is not well-controlled on tramadol 2-3 times per day. He said he thinks so. He said he refers to pain management downstairs & uses Dr Dimitri a lot. I mentioned the policy of their area of no meetings with reps & he said that he will put in a good word for me & ask Dr Dimitri to at least be able to come speak with him about Butrans. Showed demo kit. He asked about side effects so we reviewed spread in core visual aid. He asked if Butrans could be cut or if the patient could cover it when taking a shower to protect it. I told him patches should not be cut & that covering with Bioclusive or Tegaderm-type covering is OK if adhesion is an issue. Also discussed application & heat warning. He asked about HB 93. I told him I do not have details on it. Discussed OxyContin q12h for appropriate patients beyond Butrans.
PPLPMDL0020000001	Cleveland	OH	44120	9/14/2011	talked to Chuck,Pharmacy Manager,about Butrans stocking and if they have seen any scripts for Butrans.Chuck said he hasnt ordered Butrans because he's not seen any scripts for Butrans.Chuck said doctors will write OxyContin so they have that in stock but no Butrans.Chuck asked about Medicaid coverage as thats majority of their patients,discussed Medicaid coverage for Butrans,told Chuck to consider commercial,BWC and Tricare patients for Butrans.Chuck said they have small percentage of those patients but he'll keep in mind.showed Chuck Butrans 5 core selling messages,chuck talked about Butrans being once weekly dosing option for patients and transdermal technology.I asked Chuck to give patients Butrans patient info booklets when they provide patient counseling on opioids if patients arent controlled on short-acting opioids.Chuck said he would do that.discussed OxyContin appropriate patients and formulary coverage.recommended Senokot-S

PPLPMDL0020000001	Warrensville Heights	OH	44122	9/14/2011	Reviewed 5 core messages for Butrans with Dr Mueller. I reminded him of our last lunch conversation when he told me that he liked the more steady release of medication with Butrans. I told him that this does not mean that Butrans is any less abusable, any more efficacious, or any more safe than any other opioid & that he should use just as much caution in prescribing as he would any of the others. He assured me he will. Reviewed appropriate patient type for Butrans & discussed patients who are not being well-controlled on short-acting opioids if their condition is chronic. He said that he doesn't generally prescribe pain medications & that he lets pain management "deal with that". Discussed importance of appropriate patient selection. Showed demo & reviewed application, rotation, & heat warning. He asked me about HB 93. I told him I have no details about it. He said it seems like narcotics are being limited for primary care physicians & asked if he should be concerned. I told him he would have to research this but that the primary goal of the bill is to reduce "pill mills". He said that was a good idea & I agreed. Reminded him, however, that there are legitimate patients who are in pain who would not have bad intentions with medication & those are the patients I am an advocate for. He said that was true. Reminded him of OxyContin q12h for appropriate patients beyond Butrans & recommended Senokot-S for medication-induced constipation.
PPLPMDL0020000001	Warrensville	OH	44122	9/14/2011	Reviewed 5 Butrans core messages with Dr Rakowsky. Spent time going over appropriate patient type & discussed more "moderate" pain side. I asked if she would try Butrans after tramadol, instead of going to Vicodin or Percocet. She said she generally doesn't prescribe any of those. She went on to say that she has a hard time wrapping her mind around a more "moderate" medication in transdermal form. I asked her to clarify. She said usually, "you have to be pretty tolerant or addicted to need a patch" & used fentanyl as an example. I asked if it surprised her that Butrans is CIII, but added that it still does carry abuse/addiction potential as it works on the mu opioid receptor. She said it is surprising. She said that is probably my biggest hindrance in getting doctors to prescribe. I told her that while many physicians & patients are having success with Butrans, some have expressed this to me as she is. She said she will have to get used to thinking of Butrans as "not as strong". I told her again that just because it is used in "moderate" pain, does not suggest that it is any less strong than any other opioid. She asked if Butrans could be cut. Told her this has not been studied & therefore is not recommended. Discussed application & heat warning. Also discussed OxyContin q12h for appropriate patients beyond Butrans & recommended Senokot-S for medication-induced constipation.
PPLPMDL0020000001	Cleveland	OH	44106	9/14/2011	dr was a fellow,just joined anesthesia dept and is now an attending dr,we discussed Butrans fpi,5 core selling messages,initiation guide,appropriate patients for Butrans and focused on pain conditions they see and treat in dept and how Butrans could be an option for these patients.dr said he will read through all of the info and asked about insurance coverage for medicaid? focused dr on commercial plan patients and discussed medicaid pa requirements with dr.talked about appropriate patients for OxyContin and formulary coverage and recommended senokot-s
PPLPMDL0020000001	Parma	OH	44129	9/14/2011	Spoke with pharmacist & presented information on Butrans pharmacists' webinars. She said she would look into them & would copy it for the other pharmacists to leave a copy for them. Discussed appropriate patient type, including patients who call too soon for refills or say their short-acting medication is not controlling their pain. She said it is common & many times those people are difficult to deal with. I let her know Butrans may be an option for some of them, if appropriate. Also discussed automatic savings through e-voucher & OxyContin savings cards.
PPLPMDL0020000001	Warrensville Heights	OH	44122	9/14/2011	Reviewed Butrans core messages with Dr Wolkoff. He said he is interested in hearing more about Butrans at the program as he is registered to attend tomorrow's event. Discussed appropriate patient type & showed demo. He said it sounds like a good idea. He said as a newer doctor, he would like to speak with other physicians who have had experience with Butrans. I asked if there were any specific questions that I could answer. He said he just wants to hear from people who have patients on it. I told him the program would be an excellent time to do that. Reviewed CIII & abuse/addiction potential & discussed importance of appropriate patient selection. Discussed patients who have a chronic issue causing pain who are not well-controlled on NSAID's or COX-2's or tramadol 2-3 times per day. He said he will keep that in mind going forward. Also discussed OxyContin for appropriate patients beyond Butrans as we talked about appropriate range of patients. Recommended Senokot-S for opioid-induced constipation & discussed dual MOA.
PPLPMDL0020000001	Cleveland	OH	44106	9/14/2011	asked dr if he will see patients this afternoon that he can start on Butrans,like the one's he's already started on Butrans? dr said he probably will dr said he likes that Butrans is a patch and dosed once a week dr said Butrans is easy in his eyes to get patients started on Butrans.we talked about pain conditions,pg.11 visual aid,that dr treats in pain management dept and how Butrans is an option for patients.dr said he will continue starting more patients on Butrans,focused dr on starting patients earlier in therapy,instead of refilling short-acting opioids,dr said he will consider starting patients earlier.we talked about commercial plan insurance and patient savings cards,recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44104	9/14/2011	gave dr Butrans 9/15/11 dinner invitation and portal invite as she said that majority of her patients taking short-acting opioids are controlled,no complaints so no need to change their medication.I told dr that was great that her patients were controlled and showed dr Butrans visual aid,pg.11,discussed inclusion criteria with dr and asked if she treats these conditions? dr said yes,asked dr how she manages chronic pain for these conditions? dr talked about all non-opioid therapies 1st then starting patients on tramadol.I asked dr if she could start a couple patients on Butrans after that 1st dose of tramadol isnt controlling patients pain? dr said she will consider it but hasnt had anyone lately,discussed formulary coverage and focused dr on commercial plans,recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44104	9/14/2011	talked to dr about pain conditions she treats,showed pg.11 inclusion criteria,asked dr to think of a few patients today that have these conditions and start them on Butrans.dr said she hasnt really thought of Butrans but knows its an option.dr said she's just frustrated with her pain patients and its easier to refill short-acting opioids.we talked about initiation of Butrans and thinking of a couple patients with 1 of the pain conditions listed on pg.11 and starting them on Butrans.dr said she will consider it.I told dr to focus on commercial plan insurance,recommended Senokot-S
PPLPMDL0020000001	University Hts	OH	44118	9/14/2011	Quick call...reminded doc of the Butrans patient type and asked if he has any BWC patients that might benefit from once weekly dosing. He took the initiation guide and studied it. He said maybe.
PPLPMDL0020000001	Parma	OH	44129	9/14/2011	Spoke with Dawn (nurse & OM) & asked about Jen's experience with Butrans & if she thought any of the group would come to the upcoming program. She said that Dr Nickels still has not "given them the green light" to prescribe. I asked her if she is certain of that & she said yes & until he does, there is no way Jen will prescribe. I asked if I could see Jen to talk to her about it but Dawn said she is too far behind. I asked what she thought Dr Nickels was waiting for & she said she does not know. She said that she also does not think that any of them are able to make it to the program & that Laura just quit the practice. She said Deb Torres (PA) will be coming to take her place at Grace 2-3 days per week. She also asked if I called on Dr Chagin, Dr Gigliotti, Dr Wolanin, Drs Rutkowski & Dr Ara Kallibjian. I told her that I do call on most of them. She said to look into Dr Kallibjian to see if he has interest in Butrans as she thinks that might be a practice that would use it. I thanked her for the recommendations. Also discussed Ryzoil value cards, which she said she has enough of still.
PPLPMDL0020000001	Bedford	OH	44146	9/14/2011	Dr Moufawad said he had no time today. I asked him if he was going to come to the dinner program tomorrow. He stopped & looked in his mobile calendar. He entered it into his phone & asked who would be there. I told him 14 practitioners were registered & also let him know this would be a great opportunity to discuss Butrans with others who have experience using it. He said he will be there. I told him it would also be a great way to learn more about the types of patients who he sees who may be appropriate for Butrans as well as some who may not be good candidates. He said he is looking forward to clearing some of that up.
PPLPMDL0020000001	Cleveland	OH	44104	9/14/2011	talked to Fonda,office mgr/ma to dr pandit,as dr wasnt able to see me this am.Fonda said dr started 1 patient on Butrans,we talked about patient info booklet application/rotation info and Fonda said she gave patient the booklet and it was helpful.asked Fonda if dr had other patients like this 1 that they could start on Butrans? Fonda said he has a lot more patients he could start but challenge is majority are medicaid and medicaid requires a PA so its more work.we talked about focusing on commercial and tricare patients and Fonda said to stop back next week to talk with dr more.gave 9/15/11 dinner invitation for butrans dinner program and portal invite,to fonda,for dr.recommended Senokot-S
PPLPMDL0020000001	University Heights	OH	44121	9/14/2011	I asked doc if he has identified any patients appropriate for butrans - moderate to severe chronic pain requiring ATC analgesia. He said, "I told you, they want pills. Plus its more expensive than pills. they don't want to pay".
PPLPMDL0020000001	Cleveland	OH	44106	9/14/2011	I explained to him that with commercial insurance and a savings card, patients can pay around \$15-\$20/month. Nothing else gained.
PPLPMDL0020000001	Cleveland	OH	44106	9/14/2011	worked apm dept and out-patient pharmacy
PPLPMDL0020000001	Cleveland	OH	44106	9/14/2011	dr said he's started a few patients on Butrans,but needs to start more.dr said its just spending a few minutes with patients and explaining what Butrans is instead of refilling tramadol.talked to dr about how he explains Butrans to patients,discussed titration with dr,told dr to give patients Butrans patient info booklet showed dr application/rotation of Butrans section and dr said steve,rn,or lisa,patient care coordinator,would be the one's to give booklets to patients,focused dr on commercial plan patients and dr asked about medicaid coverage discussed medicaid's PA requirements for Butrans.asked dr if he will see any patients today and rest of the week where he can start them on Butrans? dr said yes he's sure he will and he will consider Butrans for patients he knows its an option.gave OxyContin reminder and discussed formulary coverage for OxyContin,recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44106	9/14/2011	talked to dr about patients he's started on Butrans,talked to dr about titration and discussion of patient info booklet application/rotation section with patients before they leave office,talked about insurance coverage and focused dr on commercial plans for Butrans.asked dr if he could start more patients on Butrans like the one's he already started? dr said yes he will and he knows Butrans is there its a good option for patients.gave OxyContin reminder,discussed formular coverage for OxyContin and recommended Senokot-S<font color=blue><b>CHUDAKOB's query on 09/23/2011</b></font>Amy, I am glad to see you discussing titration of Butrans. In this call note it looks like you did most the talking. Imagine how the call would have gone if he told you how,if and when he titrates. This may have given you an opportunity to support him if he was doing any of those things. Try to catch him doing something right.<font color=green><b>BROOKAM's response on 09/27/2011</b></font>good point! will do thanks:<font color=blue><b>CHUDAKOB added notes on 09/29/2011</b></font>Hope it works out!
PPLPMDL0020000001	Cleveland	OH	44106	9/14/2011	dr said he started 1 patient on Butrans that was taking less than 300mg tramadol a day,dr said he pushed the attending dr to try this patient on Butrans,patient was started on Butrans 5mcg and was brought back 2 weeks later for a follow-up appointment.dr said patient told him Butrans didnt work and she wanted her tramadol again.I asked dr if he titrated Butrans? dr said no he forgot about that and that probably would have made sense to increase the dose of Butrans to 10mcg.dr said the problem and challenge with their patients is that he gets 1 chance with these medications meaning something new and different to patients like Butrans that dr starts them on,if it doesnt work they want want to try another dose higher of Butrans.dr said patients will want their pills again and thats it.told dr that was great he even thought of 1 patient and pushed the attending to try Butrans so they could get some clinical experience with Butrans,however next time if dr could tell patients up front before leaving the office that if medication's not providing the pain relief they need,perhaps they will need an increase in dosage strength? dr said that was a good idea and he would try that with a few more patients and see what happens.asked dr if he will see more patients this afternoon,like the patient taking less than 300mg tramadol a day,that he could start on Butrans? dr said probably so as they have hundreds of patients taking tramadol,discussed formulary coverage-focus on commercial plans<font color=blue><b>CHUDAKOB added notes on
PPLPMDL0020000001	Parma	OH	44129	9/14/2011	Spoke with technician as pharmacists were busy assisting customers. I showed her information sheet on Butrans pharmacists' webinars & asked that she give it to the pharmacists & encourage them to log on as the information would be delivered by a fellow pharmacist. She agreed. Discussed automatic savings for Butrans via e-voucher & also reviewed OxyContin savings cards. They did not need any additional savings cards.
PPLPMDL0020000001	Cleveland	OH	44114	9/14/2011	dr talked about patients she's started on Butrans and i asked dr if she had more like that to start on Butrans this week? dr said probably.showed butrans visual aid,talked about pain conditions pg.11,and asked dr to keep these discussions in mind and when she has patients fail that 1st dose of tramadol start them on Butrans instead of giving a refill of tramadol or another short-acting opioid.dr said that makes sense and she will consider Butrans there.focused dr on BWC.gave OxyContin reminder and recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44143	9/14/2011	I asked doc how patient responded to Butrans. He said that patient could not afford it. Butrans was approved with a PA but the co-pay was too expensive. I asked if it was a medicare patient. He said he believes so. I reminded him that commercial insured patients will have the best chance at access, not medicare/medicaid. Showed him the formulary grid.
PPLPMDL0020000001	Mayfield Village	OH	44143	9/14/2011	Dr. Mandel's NP : I discussed the butrans indication, CII status, 7 day delivery. I asked if she could initiate a patient on a product like butrans independent of the doctor. She said that she could. She might suggest to the doc a particular product and he would agree or not. I invited her to the speaker program on 9/15 but she said that this is a bad week. She would be open to other dates in the near future.
PPLPMDL0020000001	Independence	OH	44131	9/15/2011	I asked Dr Rob if he was planning on attending the Butrans dinner program tonight & he said he can't go. Handed him Portal invite as an alternative & asked him to log on to the interactive program. I told him the programs online are interactive & would help him learn who is & who is not appropriate for Butrans. Positioned Butrans for patients who are not well-controlled on short-acting around-the-clock opioids. He said he will try to remember & walked into a room.
PPLPMDL0020000001	Cleveland	OH	44113	9/15/2011	talked to Maria,RN,as dr wasnt available.Maria said she thought dr started 1 patient on Butrans but hasnt seen anyone else get started recently.showed Maria 5 butrans core messages,in visual aid,asked maria what features of Butrans stood out to her? maria said transdermal technology and once weekly dosing,asked Maria to recommend Butrans,for appropriate patients,showed pg.11 inclusion criteria discussed pain conditions that they treat in office and how Butrans could be an option for these patients,maria said ok she will share all of the info with doctors again,maria gave other 2 doctors Butrans fpi,initiation guide and patient info booklets but neither 1 said they wanted to meet with me.marla said dr cicc will meet with me and is interested in getting more patients started on Butrans.showed formulary grid and focused maria on commercial plans,BWC and tricare patients.recommended Senokot-S

PPLPMDL0020000001	Parma	OH	44134	9/15/2011	The technician said James was unable to come to the window to talk to me today. I gave her information on pharmacists' webinars for Butrans to give to him & she agreed. Discussed who Butrans is for & reviewed appropriate patient type. She said she hasn't seen any be dispensed but she knows they have it. Also discussed OxyContin savings cards, which she said she thinks James has enough of but I can check again next time to be sure.
	Cleveland	OH	44113	9/15/2011	talked to dr about patients that he see's with pain conditions,pg.11 visual aid,taking tramadol daily but not controlled,asked dr if he had patients like this? dr said yes.dr said he refills tramadol for most patients,asked dr if he has a few patients this week like we discussed,to start on Butrans instead of refilling tramadol? dr said he might,if patients are willing to wear a patch and remember to rotate the patch once a week,showed dr Butrans patient info booklet application/rotation section and told dr to show patients this info,dr dr said ok that helps with educating patients,talked to dr about giving patients non-opioid therapy and immediate release opioids with Butrans as dr wasn't sure if he could give Butrans with tramadol,showed Butrans fpi,maintenance of the therapy section for discussion,focused dr on BWC,tricare and commercial plans for Butrans.talked about OxyContin being an option for appropriate patients,showed conversion guide and talked about insurance coverage for OxyContin.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44113	9/15/2011	talked to dale,pa,about patients he's starting on Butrans and dale said patients seem to be well controlled on Butrans and no complaints so far.asked dale if he had more patients,like the one's he's already started,to start on Butrans? dale said he does and will continue prescribing Butrans.focused dale on opioid naive patients,showed appropriate patients section in visual aid,dale said that would be a consideration for some patients and he is thinking of more patients taking tramadol that aren't controlled to start on Butrans.focused Dale on BWC and commercial plan patients.recommended Senokot-S
PPLPMDL0020000001	Shaker Heights	OH	44122	9/15/2011	Spoke with floater pharmacist & gave her information on Butrans webinars for pharmacists. I encouraged her to log on to hear the presentation by a PharmD & interact with other pharmacists. She said she would have a look. Discussed Butrans dosing, delivery system, & appropriate patient type. She said she has seen Butrans but has not yet dispensed it. Discussed instant savings via e-voucher system as well as OxyContin savings cards. She said they did not need additional cards at this point.
PPLPMDL0020000001	Garfield Hts	OH	44125	9/15/2011	Dr Sadowski said he had no time today. I asked him if he was planning to go to the dinner program for Butrans tonight to learn more about Butrans & who is/is not the appropriate patient & to discuss it with other physicians & experts. He said he can learn himself online. I told him he is correct if he wants to do his own research & handed him a Portal invite, telling him this would be another way for him to learn about Butrans online. I let him know of the interactive nature of our online programs & let him know I would return for feedback on the program.
PPLPMDL0020000001	Cleveland	OH	44109	9/15/2011	dr said he's not started anyone on Butrans but does know it's available,I asked dr what drawbacks he see's with butrans? dr said he just thinks of it as another patch and he has duragesic as a patch for patients in pain.talked to dr about appropriate patients for Butrans,showed visual aid,pg.11,inclusion criteria we discussed various pain conditions and how Butrans could be an option for his patients with these pain conditions as well as appropriate patients section so dr knows how to start patients on butrans and titrate.dr said ok he will think about it,dr asked about medicaid coverage for Butrans? told dr to focus on BWC and commercial plan insurance.dr said ok.OxyContin reminder for appropriate patients and formulary coverage and recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	9/15/2011	talked to dr about patients he see's with pain conditions,pg.11 inclusion criteria,and how he can consider Butrans as an option for these patients.dr said he's got some patients on short-acting opioids but they are controlled,no complaints,showed dr appropriate patients section,discussed initiation of butrans and titration of butrans,asked dr if he could think of a few patients to start on Butrans this week? dr said he'll think about some patients and see if they will try Butrans.focused dr on BWC and commercial plan coverage.recommended senokot-S
PPLPMDL0020000001	Cleveland	OH	44113	9/15/2011	talked to dr about patients with pain conditions,pg.11 visual aid,that are taking opioids daily but not controlled,asked dr to consider Butrans there.dr said he's not had anyone in mind for Butrans as most of his patients try stimulants,injections,acupuncture,etc.and are controlled on current opioid regimen.talked to dr about appropriate patients,showed visual aid,and asked dr to think of a few BWC patients with pain conditions discussed that are calling office early every month for refills,perhaps they could try Butrans? dr said that was a good point he hadn't thought of that and would consider Butrans for those patients.gave OxyContin reminder.recommended
PPLPMDL0020000001	Cleveland	OH	44102	9/15/2011	talked to Nagla,PA,about patients she's seen get started on Butrans and what challenges they face when talking to patients about Butrans.Nagla said they will write for vicodin TID or QID and patients just want refills every month so they will never stop taking their pills.Nagla said she prefers to get patients started on Butrans because of the transdermal technology and she would like to decrease the amount of short-acting opioids,specially tramadol and vicodin, that they write for every month.I asked Nagla if she would work with the 3 doctors in this practice,identifying appropriate patients and then starting them on Butrans? Nagla said she will do that.focused Nagla on BWC and commercial plan patients for Butrans.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44195	9/15/2011	talked to Lisa,MA,I couldn't see dr,told her about Butrans 5 core selling messages,discussed appropriate patients and initiation of Butrans,showed Lisa visual aid for discussion,showed Lisa patient education booklet and Lisa said she's sure dr and Patty,PA,will have an interest in hearing more about Butrans she asked that I leave Butrans fpi,initiation guide and patient info booklet with her and she will share all of the info with them.talked to Lisa about Butrans formulary coverage and told her to focus on commercial,BWC and tricare,she said ok and would give formulary grid to dr and Patty,gave 9/15/11 butrans dinner invitation and portal invite.
PPLPMDL0020000001	South Euclid	OH	44121	9/15/2011	Spoke to Gary about the stocking of butrans. He has not seen any scripts and its not stocked. He said we have to do a better job. He asked who is writing it. I told him that many of the pain docs but there aren't any pain guys in the area. I showed him the formulary grid. He bawked at the 3rd tier - he said thats like \$50. I confirmed that a 3rd tier co pay is about \$50 but we have a savings card that provides u to \$40 /monthly savings until the end of the year.
PPLPMDL0020000001	Parma	OH	44129	9/15/2011	Dr Gigliotti said not only is he getting more Butrans experience, but he also is starting to get some "good stories" about it. I asked him to clarify. He said he gave it to a female patient recently & she came back raving about how great she was doing on it. I told him that was great to hear & that I am glad he is continuing to identify appropriate Butrans patients as he promised. I asked if he remembered what was causing that patient's pain but he said he did not. He said he tried to write a prescription for Butrans earlier today but the insurance would not accept it. He said it was probably a Medicare situation. I showed him formulary grid & gave him savings cards. He put them on his desk & said he would keep them there instead of giving them to Jaz because he is "trying to do more with it". I asked if that meant he planned to continue to find patients & he said yes. Also reminder for OxyContin savings cards.
PPLPMDL0020000001	Cleveland	OH	44109	9/15/2011	talked to dr about patients he's started on Butrans and asked if he could find more like them? dr said yes.talked to dr about pain conditions they treat and asked dr to start some patients this week that have these pain conditions,dr said he will do that.dr said patients seem to be doing well on Butrans that he started,dr said he likes that Butrans is transdermal and dosed once a week.focused dr on BWC and commercial plans.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44130	9/15/2011	Dr Kansal said he has been trying some more patients on Butrans. I asked him to tell me more about the patients. He said he did not have time to talk today but to talk to Dorothy because he couldn't find his Butrans savings cards. Gave Dorothy a package of cards & reviewed formulary grid with her. She said she knows that one of the patients he gave it to has Anthem Senior Advantage. Told her the cards cannot be used for Medicare Part D plans like that one- just commercial insurance (ie working patients). She said that is a shame because this woman said that Marc's told her it would be \$160 for the prescription. I asked if any of the patients Dr Kansal has been writing for have commercial insurance & she said she thinks one of them does but was not sure. Discussed OxyContin savings cards & formulary grid as well.
PPLPMDL0020000001	Parma	OH	44134	9/15/2011	Spoke with Rebecca (nurse) & reviewed Butrans formulary grid & savings cards. Also reviewed what Butrans is/who it is for. Discussed patients who are not well-controlled on tramadol if they have a chronic condition. She said he doesn't have a lot of patients like that but she does get phone calls occasionally like that. She said she would pass along Butrans information to Dr Mandat. She also said they did not need any savings cards for neither Butrans nor OxyContin.
PPLPMDL0020000001	Independence	OH	44131	9/15/2011	I asked Dr Jack if he was going to come to the dinner program tonight & he said he can't due to his wife being ill. Let him know I would invite him to the next one & gave him Portal invite as an alternative. I handed him Butrans savings cards & showed him Butrans formulary grid, telling him I thought he may be interested in it. He said that he was going to put the savings cards in a spot where he would see them often until he remembers it more. He placed the cards on a table right outside two exam rooms. He said this will help him write Butrans for more patients then he walked away.
PPLPMDL0020000001	Cleveland Hts	OH	44118	9/15/2011	I asked doc if he had an opportunity to look over the information on butrans - the 7 day, CIII indicated for moderate to severe pain. He asked me to tell him about it. I explained the butrans is indicated for mod to severe pain and can be called in and refilled similar to hydrocodone. He asked if its like fentanyl. I told himthat there is no head to head data but butrans can be used as a first line opioid and it last for 7 days. I showed him the initiation guide and that 5mcg would be a starting dose for opioid naive patients. Gave formulary grid and asked him to try butrans for a patient with commercial insurance and to give them a savings card.
PPLPMDL0020000001	Cleveland	OH	44103	9/15/2011	talked to Amy,Pharmacy Manager,about Butrans stocking and who's writing Butrans? Amy said she's seen Dr.Celeste and Dr.Boyd's patients fill scripts for Butrans.talked about Butrans 5 core selling messages and what features of Butrans stand out? Amy said she likes that Butrans is transdermal and dosed once a week.asked Amy if she's been recommending Butrans to patients? Amy said yes to some patients and she's giving patient info booklets.told Amy to focus on application/rotation of Butrans,Amy said ok.we discussed OxyContin stocking and formulary coverage.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	9/15/2011	dr said he started 1 patient,at westlake office,on Butrans 5mcg,but patient saw him for follow-up appointment and said she took Butrans off because it wasn't working,patient wanted her vicodin again.dr talked to patient about increasing Butrans to 10mcg dosage strength,patient didnt want Butrans,she wanted vicodin.dr said he's not sure if Butrans worked or not as he thinks this patient just wanted her vicodin and thats it. dr said he will give Vicodin TID and even QID for patients in this practice.showed dr pg.11,pain conditions,discussed Butrans as an option for patients with these conditions,asked dr if he had patients this afternoon coming in with these pain conditions where Butrans could be an option? dr said probably so he will look at that.I asked dr if he could remove 1 feature of Butrans what would that be? dr said he didnt have anything in mind that he would change but his biggest challenge is that patients like popping their pills and demand their pills,so he has to convince patients that Butrans being a patch and dosed once a week is an option for them. dr said patients have to be willing to wear the Butrans transdermal system and change sites once a week. we talked about patients taking immediate release opioids and non-opioid therapy with Butrans.focused dr on BWC and commercial plans for
PPLPMDL0020000001	East Cleveland	OH	44112	9/15/2011	I asked doc if he would be interested in attending a program this evening to learn more about butrans. He said he can't today but to let him know about the next one. I asked him to think of butrans when patients come to him and have failed on tramadol. He said it is still expensive. I asked him to try butrans for BWC patients.
PPLPMDL0020000001	Cleveland	OH	44112	9/15/2011	I reviewed the butrans indication, CIII status and 7 day delivery. I reminded him of his expressed interest in butrans and that he might want to attend a speaker program. Gave him another invite for tonights program. He said he probably can't attend tonight but maybe next time. I asked him to think of butrans for commercially insured patients. Gave him a formulary grid.
PPLPMDL0020000001	Highland Heights	OH	44143	9/15/2011	Window call...I reminded doc that he RSVP'd to the speaker program tonight. I asked if he is still attending. He said he thinks so. I gave him another invite with the address and also a formulary grid reminder. No savings cards needed.
PPLPMDL0020000001	Beachwood	OH	44122	9/15/2011	Dr Yokiel said he & Jennifer have been putting more patients on Butrans & "trying" to find more. I asked him what he looks for in a potential Butrans patient. He said that because it can be difficult to switch patients from short-acting to long-acting, he really is trying to stick with newer patients who are on something like tramadol. He said those are the patients he has had success in switching. I told him this was the perfect patient type. Discussed patient type further & I asked him what he would say the biggest hindrance for him prescribing more would be. He said having that right patient type. He said so many of his come in on higher doses of opioids that it is not realistic for them to taper to 30mg morphine equivalent before starting Butrans. I asked if would continue looking for those newer patients on tramadol to switch to Butrans if appropriate & he said yes & that he also has been using it for patients between procedures with success. Also discussed OxyContin q12h as an option for patients beyond Butrans. He said he has had success with OxyContin & will continue using it. Spoke with nurse Vickie, who said they did not need savings cards or patient education materials yet.
PPLPMDL0020000001	Cleveland	OH	44111	9/16/2011	Quick call, we reviewed Butrans for apts who are taking low dose short acting, she thinks it would be a good option. I asked if she would recommend it and help remind the Drs and she said he will.
PPLPMDL0020000001	South Euclid	OH	44121	9/16/2011	Spoke to Mitch about the stocking of butrans. He confirmed that they have it but he has not seen any scripts for it. I explained the proper application of the patch and the savings card program. Provided patient info guide.
PPLPMDL0020000001	Cleveland	OH	44130	9/16/2011	Spoke with nurse, Dawn, who said Dr Popa was not in the office & would be back next week. Reminded her of my recent lunch & inquired about any Butrans activity. She said she hasn't heard Dr Popa say anything & that she herself did not remember anything about it. Reviewed 5 core messages with her & spent time discussing appropriate patient type. She said Dr Popa does have patients who fit that description. Worked with her to set up another lunch. Left Butrans information & asked Dawn to give it to Dr Popa- she agreed.
PPLPMDL0020000001	Brooklyn	OH	44144	9/16/2011	Spoke with new MA & showed her savings cards for Butrans & OxyContin. Discussed Butrans dosing, delivery system,& appropriate patient type. Reviewed with her eligibility requirements to use savings cards. Also showed her OTC samples & recommended Senokot-S for opioid-induced constipation.

PPLPMDL0020000001	Brooklyn	OH	44144	9/16/2011	Spoke with Gary who said he had no time today. Gave him information on upcoming Butrans webinars for pharmacists. He said he would have a look later. Reminder of appropriate patient type, mentioning patients who are not well-controlled on short-acting around-the-clock opioids. He said they see so much Medicaid there that the savings cards don't get used up very quickly so they are OK on their supply of OxyContin cards.
PPLPMDL0020000001	Cleveland	OH	44130	9/16/2011	Spoke with Allison & told her about Butrans pharmacists' webinars. She said she would have a look. Pointed out that the discussion would be lead by a PharmD, so information would be relevant to her. Reviewed Butrans appropriate patient type, including patients who are not well-controlled on their short-acting opioid. Also discussed automatic savings via e-voucher for her customers & reviewed OxyContin savings cards.
PPLPMDL0020000001	Cleveland	OH	44104	9/16/2011	talked to dr about appropriate patients for Butrans,showed visual aid with this info and talked about pain conditions he treats in office,asked dr if he will start more patients on Butrans with 1 of these pain conditions? dr said if they have insurance to pay for Butrans he will do that,focused dr on commercial plans for Butrans,talked about OxyContin being an appropriate option for patients and recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44104	9/16/2011	talked to dr about patients with pain conditions,pg.11 inclusion criteria,where dr can start patients on Butrans.dr said that was good to see as he treats many of the pain conditions listed.dr talked about low back pain,discussed appropriate patients for Butrans showed info in visual aid for discussion and discussed titration of Butrans,focused dr on commercial plan patients.asked dr if he has more patients like the 1 he started,to start on Butrans? dr said he probably does and he'll think about it.OxyContin reminder of appropriate patients and discussed formulary coverage for OxyContin.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	9/16/2011	dr was too busy to talk today,so i talked to Jodi,Clinic Coordinator,about Butrans 5 core selling messages and asked if anyone has prescribed Butrans here? Jodi said she knows dr greenwood has and she thinks dr huang has 1 patient on Butrans,talked about appropriate patients for Butrans,showed info in visual aid,asked if Jodi would recommend Butrans as an option for patients,to the attending physicians and residents.Jodi said she will do that,gave portal invites and formulary grids with Butrans fpi's,initiation guides and patient info booklets for all doctors.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	9/16/2011	talked to Erin,Pharmacist,about Butrans stocking and they haven't seen any scripts for Butrans yet so pharmacists aren't ordering Butrans,talked about importance of stocking but Erin said they won't order Butrans until that 1st script comes in.we talked about doctors at Metro,Lutheran and doctors in area, like dr nickels and dr rajeja that prescribe a lot of short-acting opioids and Erin asked if i was working with them? told Erin yes, i am working with them and showed Erin Butrans 5 core selling messages and asked her what really stood out to her? Erin said transdermal delivery and once weekly dosing,asked Erin if she would recommend Butrans to patients that are taking short-acting opioids but not controlled,Erin agreed and took Butrans patient info booklets.talked about BWC,Tricare and commercial plans for Butrans.talked about OxyContin stocking,appropriate patients and gave conversion guide to Erin,discussed formulary coverage for OxyContin.recommended Senokot-S
PPLPMDL0020000001	Warrensville Heights	OH	44122	9/16/2011	Followed up with Dr Brooks on his request for information that would help him pitch Butrans to the other formulary committee members. I let him know this request could be submitted via computer to our Medical Services department & they could send him information on Butrans that I may not be able to provide. He said he was very grateful for the follow-up & that he is looking forward to getting this information & again said that he wants to get Butrans on formulary at SouthPointe. I asked him to let me know if there was any other information he needed & to keep me posted on the progress. Also asked if he is continuing to identify Butrans patients & he said Spoke to Melinda about the stocking of butrans. She confirmed that she has a couple of patients on it and may have just recently filled a script but she did not remember anything about it. I discussed the formular coverage and the savings card program.
PPLPMDL0020000001	South Euclid	OH	44121	9/16/2011	I reminded doc of her interest in butrans - reviewed that indication. She said that she tried it once but the patient could not afford it. She could not recall the exact plan. I reminded her that the best chance for success will be with commercially insured patients(those that have insurance through their work). Provided formulary grid and savings card leave behind and asked her to try again. She said she would give it a try but she has a lot of
PPLPMDL0020000001	South Euclid	OH	44121	9/16/2011	I asked Dr to tell me more about the patients he started on Butrans. He said they were patients on vicodin and one was a Med D patient and the other said that she wanted to continue her vicodin because she likes being able to control when she takes something. We discussed the inclusion criteria and he said that he sees many patients who have these conditions. We discussed using Butrans before going to vicodin around the clock and he agreed that this would be a good place to use it. I asked if he would start a few more new patients and he said he will. We reviewed the managed care and I told him to focus on commercial insurance. We discussed that
PPLPMDL0020000001	Lakewood	OH	44107	9/16/2011	OxyContin is still an option and he said that he still has many patients on OxyContin and that he has had a lot of success with OxyContin over the years.
PPLPMDL0020000001	Cleveland	OH	44109	9/16/2011	talked to dr about patients with pain conditions,pg.11 inclusion criteria,that he treats and how Butrans could be an option.dr said he has a handful of patients on opioids and he cant think of patients that arent controlled and need something else.dr said he will keep Butrans in mind and asked about insurance,focused dr on BWC and commercial plans.recommended Senokot-S
PPLPMDL0020000001	Lakewood	OH	44107	9/16/2011	Quick call while talking to Dr Rojas, I asked if he would try Butrans a few patients next week and he said he would. I showed him the patient medication guide and savings cards and asked him to think of patients with commercial insurance.
PPLPMDL0020000001	Cleveland	OH	44109	9/16/2011	worked internal medicine, family medicine, neurology and rheumatology dept's - had to leave Butrans fpi's, initiation guide's, patient info booklets,formulary grids and my business card for each physician.left OxyContin fpi,conversion guide and formulary grids for each physician too
PPLPMDL0020000001	Cleveland	OH	44109	9/16/2011	worked pm&r dept
PPLPMDL0020000001	Lakewood	OH	44107	9/16/2011	Quick follow up. I showed the inclusion criteria and asked what would be the downside to giving Butrans a try in these types of patients. He said he will give Butrans a try.
PPLPMDL0020000001	Independence	OH	44131	9/16/2011	Spoke with MA Jill & asked her why she thinks Dr Pai isn't prescribing Butrans. She asked about insurance coverage. I reviewed this with her, including government plans & prior authorization. She said that is probably why he isn't using it. Asked her to keep an eye out for commercially insured patients who fit the profile & she said she would do her best. She also said she would give Dr Pai the Butrans information I left.
PPLPMDL0020000001	Lakewood	OH	44107	9/16/2011	Dr said that she would like to start a patient on Butrans but their insurance denied it. I asked her to tell me more and learned that the patient is united health care. The insurance wants her to try other long actings. The patient has been on duragesic in the past and she will have to see what else. She is going to try to get the PA to go through. I reviewed the managed care and that most united healthcare patients should have a low copay with the savings cards. Reminder that OxyContin is covered on most plans as well and can use the savings cards.
PPLPMDL0020000001	Chagrin Falls	OH	44022	9/16/2011	Spoke with MA Sherry & nurse Karen & presented Butrans patient information booklets. Discussed giving them to patients when they walk out with a Butrans prescription or offering them to patients who may be appropriate candidates for it. They agreed to do this & to deliver Butrans information to Dr Rood, Dr Kale, & Dr Hudson.
PPLPMDL0020000001	Hudson	OH	44236	9/16/2011	Quick call- Positioned Butrans for patients who have a chronic issue which causes pain who are not well-controlled on tramadol. He said it makes sense to start Butrans at that point & said he would keep it in mind. Handed back initiation guide & also gave OTC samples, recommending Senokot-S for medication-induced constipation.
PPLPMDL0020000001	South Euclid	OH	44121	9/16/2011	I asked doc about his experience with butrans for patients with moderate to severe pain. He said he has prescribed it a couple of times. He had to increase the dose from 5 to 10mcg but the patient likes it. Spoke to Lisa, his MA, who went on to say that the patient's other doc wanted to ween her off the butrans but Dr. Stein advocated for her to stay on butrans. I reviewed the formulary grid and the savings cards program. Reminded doc that butrans can be called in and refilled. He (and Lisa) really liked the idea of that. Provided oxycontin formulary reminder as well.
PPLPMDL0020000001	Chagrin Falls	OH	44023	9/16/2011	Jeff saw me & immediately said he has no time. Spoke with technician Ronnie who said they have been especially busy due to flu shots being in. Gave her a Butrans pharmacists' webinar information sheet & asked her to give it to Jeff. Ronnie pointed to the "Butrans" name on the sheet & then to the shelf to show me they had it stocked (1 box 5mcg, 1 box 10mcg, & 2 boxes 20mcg). She also said they have been seeing more prescriptions for
PPLPMDL0020000001	Cleveland	OH	44121	9/16/2011	Window call....I reminded doc of the butrans indication and the positioning after tramadol failure. I asked him if he has any of those patients. He said probably but they also have medicare. I gave him a formulary grid and savings card reminder and asked him to consider butrans for younger patients with coverage.
PPLPMDL0020000001	Cleveland	OH	44111	9/16/2011	Dr said he has yet to try Butrans, I asked why and he said he forgets and that he is concerned that Butrans may not be strong enough for many of the patients he sees. I asked him to focus on those patients who are taking low dose of short acting combos, he will keep it in mind. Reminder that OxyContin is still an option for patients on higher doses of opioids.
PPLPMDL0020000001	Brooklyn	OH	44144	9/16/2011	Stopped Dr Miguel in the hallway & positioned Butrans for patients who have a chronically painful condition & are not well-controlled on tramadol. He said he always forgets about Butrans. Also reminded him of OxyContin savings cards & showed them to him in the sample closet. He said he will try to remember.
PPLPMDL0020000001	Warrensville Heights	OH	44122	9/16/2011	Delivered to Dr Wolkoff the Butrans savings cards that he had requested at last night's dinner program. He said he was grateful for the follow-up. Reviewed commercial insurance coverage with him & discussed eligibility requirements for the cards (cash-pay or commercial coverage only). He said that most patients have Medicaid there but they do have some with insurance. Dr Wolkoff said he enjoyed the program last night & learned a lot. He also said he plans to prescribe Butrans within the next week.
PPLPMDL0020000001	Parma	OH	44134	9/19/2011	Spoke with floater pharmacist & discussed Butrans indication, dosing, & delivery system. Also presented information on Butrans webinars for pharmacists which she said sounded interesting. She said she would also leave a copy for the regular pharmacists. Discussed appropriate patient type (ie patients calling too soon for refills of short-acting around-the-clock opioids like tramadol). She said that is a common patient type. Also reviewed automatic savings for Butrans via e-voucher & OxyContin savings cards.
PPLPMDL0020000001	Lakewood	OH	44107	9/19/2011	Quick call at the window, I asked Dr to take a look at the inclusion criteria where Butrans was studied. I asked if he sees these types of patients and he does. I asked if he would try Butrans for just a few appropriate patients and he agreed. I reviewed the managed care with Robin and she said she will help remind the Dr.
PPLPMDL0020000001	Cleveland	OH	44130	9/19/2011	Spoke with Patty (pharmacist/director) & presented Butrans pharmacists' webinar information. Discussed the opportunity to log on to the interactive program to learn more about Butrans & who is/is not appropriate for it from a PharmD & expert. Also discussed Butrans appropriate patient type, focusing on patients who are not well-controlled on tramadol chronically. I asked if that patient type sounded familiar- she said yes. I asked if she frequently gets calls from customers on chronic short-acting opioids who call too soon for refills or say it is not controlling their pain. She said yes & added that she might log on to the webinar. Also discussed OxyContin savings cards for those eligible.
PPLPMDL0020000001	Parma	OH	44129	9/19/2011	Spoke with MA Tammy & presented Butrans information, including indication, dosing, delivery system & appropriate patient type. Inquired about how to see physicians in the orthopedic group (Karns, McCoy, Wolanin, etc). She said I needed to call each of their secretaries to make appointments with each one individually. Got each of their cards with contact information for secretaries. I asked Tammy if she thought Butrans sounded like something they would be interested in hearing more about & she said she thought so. I asked her to distribute Butrans information to each physician & she agreed.
PPLPMDL0020000001	Cleveland	OH	44130	9/19/2011	Spoke with Sandy (MA) & discussed Butrans indication & appropriate patient type. I gave her updated FPI's for each of the medical oncologists & asked her to deliver them to each physician. She agreed. Also discussed how to set up some sort of inservice with the staff about pain management. She said to speak with Wendy (who was unavailable) about this. Got contact information to follow-up.
PPLPMDL0020000001	Cleveland	OH	44109	9/19/2011	talked to dr about opioid naive patients,showed visual aid,discussed Butrans as an option for them,asked dr what drawbacks he saw in starting these patients on Butrans? dr said it depends on how well he knows patients,if patients are willing to wear a patch,showed opioid naive graph,dr read and was interested,asked dr if he will see a few patients today that he can start on Butrans that are opioid naive? dr said he might,he will have to see,showed Butrans patient savings cards,told dr to focus on commercial insurance plans and BWC.
PPLPMDL0020000001	Cleveland	OH	44113	9/19/2011	worked pain management dept - see call notes on dr daoud and dale novak,pa
PPLPMDL0020000001	Westlake	OH	44145	9/19/2011	Quick call. I reviewed the inclusion criteria and asked Dr if he sees these types of patients with chronic pain. He said sometimes. I asked if he would start just a few of these on Butrans and he agreed.
PPLPMDL0020000001	Cleveland	OH	44130	9/19/2011	Quick call only as Dr Fedorko said he did not have time today. Positioned Butrans for patients taking tramadol around-the-clock who are not well-controlled. He said he will look for patients. Spoke with Maryellen & reviewed managed care coverage for Butrans & Ryolt. Also reminded her about savings cards for both products.
PPLPMDL0020000001	Lakewood	OH	44107	9/19/2011	Quick follow up. I asked the Dr how his new Butrans patients were doing. He said that he will give it a try this week and let me know. Reminder to give a medication guide and savings card with scripts. Spoke with Kim and reminded her to focus him on commercial insurance.

	Parma	OH	44134	9/19/2011	I asked Dr Mandat what it is about a patient that makes them a good Butrans candidate. He said he likes transdermal products for these patients because many of them have dysphasia, so swallowing pills is not an option. He said for this reason, he likes a variety of transdermal options. He said he has given Butrans for patients like this who have pain. He added that he has written fentanyl for patients for the same reason (patients with dysphasia) hundreds of times. I reminded him to keep the more "moderate" pain side in mind when searching for Butrans patients as patients on fentanyl were excluded from studies. Reminded him of appropriate range of patients. I told him the reason for this question was that I do not have many physicians as experienced in the nursing home/hospice arena & that he is helping me learn this aspect of pain management & care. He said this area is "his forte" & an area in which he has much experience.
PPLPMDL0020000001	Lakewood	OH	44107	9/19/2011	Quick follow up, I asked about the success for his current Butrans patients and he said they are doing well. I reviewed the managed care for Butrans and he said this has been the most difficult part since many chronic pain patients are older. Reminder about OxyContin as a long acting option when Butrans may not be covered and he said he does continue to use OxyContin in the hospital often. I spoke with the staff about managed care where Butrans is covered.
	Cleveland	OH	44113	9/19/2011	talked to dale,pa,about patients he see's of dr daoud's and how Butrans could be an option,dale said he saw 6 new patients last week that could potentially be Butrans starts.asked dale what "new" meant? dale said patients taking opioids for chronic pain but new to practice.dale said they run OARS report on all patients and if dr feels he wants to take patient on and manage opioid therapy he will maintain patients medication until OARS is confirmed,then make changes if necessary,asked dale if he would recommend Butrans to dr daoud,for patients taking tramadol daily,not controlled,instead of converting them to vicodin? dale said he would do that.
PPLPMDL0020000001	Cleveland	OH	44113	9/19/2011	dr said he gives 90% of his chronic pain patientes that need medical management for opioids to dr shen,same practice,he manages 10% of patients.dr said he does more procedures,patients get started on opioids and want more,or a different narcotic,he doesnt like to prescribe much narcotics dr said both procedures and opioids are only temporary solutions for patients.dr said patients are never 100% pain free.told dr im working with dr shen so thats great they have a partnership in managing patients taking opioids.dr said majority of his patients have low back pain.
PPLPMDL0020000001	Cleveland	OH	44113	9/19/2011	dr said he had a patient with RSD start on Butrans,in follow-up appointment patient said Butrans wasnt working,dr said stephanie,ma,asked where patients was applying Butrans,patient said on her knee because thats where the pain was,stephanie told patient to apply Butrans 2 one of the 4 application sites thats shown in patient info booklet and rotate once a week,patient did this and pain is controlled,dr is happy with this patients experience on Butrans.asked dr when he looks at patient list,daily,to see who's appropriate for Butrans,what characteristics does he look for or have to hear from patients in order for him to decide Butrans is an option? dr said if patients complain their current medication isnt working,he'll consider Butrans.told dr to think of 1 or 2 BWC patients with low back pain,that are taking opioids daily but not controlled,to start them on Butrans,dr said he will do that.asked dr about placing butrans patient info booklets in exam rooms,dr said no the staff handles education so talk to stephanie and girls.<font color=blue><b>CHUDAKOB's query on 09/29/2011</b></font>Amy, this was an AE and should have been reported. Please call and report this and let me know when completed. A physician that says our product is not working is a clear AE.<font color=green><b>BROOKAM's response on 10/03/2011</b></font>-ok i did report this before but will do tomorrow am, i forgot you said every time an HCP states an AE even if reported in previous calls,we must do it again. thanks for catching that!<font color=blue><b>CHUDAKOB added notes on 10/05/2011</b></font>-Thank you for reporting it...again.
PPLPMDL0020000001	Cleveland	OH	44127	9/19/2011	talked to dr about Butrans 6 core selling messages,focused on once weekly dosing of Butrans,dr said she has patients with chronic pain that she could try Butrans on but majority medicaid,90% and 10%commercial.
PPLPMDL0020000001	Lakewood	OH	44107	9/19/2011	Quick call, I asked Joe if he has consulted with any new Butrans patients. He has not, I reviewed the patients medication guide and that it is important that patients know how to apply and that steady state is in 3 days. He will let them know.
	Lakewood	OH	44107	9/19/2011	Spoke with Kim, she thinks that they do have a few patients on Butrans but could not remember off hand who the doctors were who wrote. We reviewed the medication guide and she said she has not received any questions from new patients. She agreed to let patients know to give Butrans 3 days to reach steady state and how to apply properly. We discussed that OxyContin is still a long acting options and she said they are still seeing new patients for OxyContin.
PPLPMDL0020000001	LAKEWOOD	OH	44107	9/19/2011	Spoke with Ronnie, we discussed Butrans key messages and the savings card program. She does see the automatic discount come up with the e-voucher program. I asked what commercial insurance they see most and she said probably medco. We discussed the savings cards for OxyContin and that patients who have a copay higher than \$25 can save money off the copay.
PPLPMDL0020000001	Lakewood	OH	44107	9/19/2011	I asked Dr what his biggest concern is with starting new patients on Butrans. He said that brand name products are not covered by managed care and he just goes with what he knows is covered. I asked if he knows what insurance the patients have when he goes into a room and he said he usually has an idea if they have insurance through work or Med D or Medicaid. I asked him to try just a few of those patients with insurance through work and he said he would try. Reminder that OxyContin is covered on many insurance plans and he said he does not have many call backs with OxyContin.
PPLPMDL0020000001	Parma	OH	44134	9/19/2011	Marko said that he has not seen any Butrans activity since the one prescription he filled several months back. He said that unfortunately, most physicians just prescribe what is "easy" & write either oxycodone or hydrocodone combos. He added that many times, unfortunately, they do this because they allow the patient to simply tell them what they want & the physician does exactly that. I asked what his thoughts were on that. He said he does not think it is ethical medicine & unfortunately, that is a big problem in the Cleveland area. He said that products like Butrans are what he considers "ethical" medicine. I asked why. He said in many cases, a long-acting & transdermal option may be better for the patient. I told him we have no data to suggest that Butrans is "better" than anything else & also that it is an opioid & therefore still carries abuse/addiction potential. He said he knows, but he thinks it is at least a good option for some of those patients. Also reviewed OxyContin managed care status & savings cards for eligible patients.
PPLPMDL0020000001	Independence	OH	44131	9/20/2011	I asked Dr Sundaram if he could see himself prescribing Butrans for appropriate patients after tramadol if he knows their condition is chronic. He said "sure" & said he had to go as he was running behind. Spoke with Terry & June & reviewed managed care & savings cards. Also offered Senokot & Colace but they said they think they have some still.
PPLPMDL0020000001	Strongsville	OH	44136	9/20/2011	Spoke with technician who said Megan (pharmacist) said she was too swamped to talk today. I discussed Butrans webinars for pharmacists & told her of interactive nature & information delivered by a PharmD. Also discussed Butrans appropriate patient type, dosing, & delivery system as she was not sure what Butrans was. Also reviewed OxyContin savings cards which she said they have enough of.
PPLPMDL0020000001	Parma	OH	44129	9/20/2011	Spoke with pharmacist Janet & presented information sheet for Butrans webinars for pharmacists. Encouraged her to log on & walked her through registration process as she expressed interest in logging on to the conference. Discussed Butrans appropriate patient type, focusing on patients who call too soon for refills or complain that their short-acting opioid like tramadol is not controlling their pain. She said this is very common. I asked if he ever makes a recommendation to a physician when this happens & she said no as she has never been asked to do so by a physician. Discussed savings opportunities via Butrans.com & also reviewed OxyContin
PPLPMDL0020000001	Parma	OH	44129	9/20/2011	I asked Dr Roheny if he has given more thought to his Butrans patient or if he remembers who it might have been. He said unfortunately, he only remembers that the person had commercial insurance. He said he thinks the patient was probably "already on something" but he does not know any specifics. He said he will try to pay attention when they come to follow-up with him. I asked him, in the meantime, what would prevent him from finding more appropriate patients & he said nothing other than insurance. He said he remembers he gave the patient a savings card for Butrans.
PPLPMDL0020000001	Cleveland	OH	44114	9/20/2011	dr said he's started 2-3 patients a day,in last 10 days,on Butrans.dr said he had 2 patients get denied Butrans with medical mutual insurance,showed dr Butrans formulary grid and discussed patient savings card program with dr.dr said he's looking for all of his percoet patients to get started on Butrans.patients dont get any immediate release opioids with Butrans.told dr to continue starting those patients and focus on BWC and commercial
PPLPMDL0020000001	Shaker Heights	OH	44122	9/20/2011	Quick window call- Positioned Butrans for patients who have a chronic condition who are not well-controlled on tramadol. He said he will prescribe it. Spoke with Michelle (MA) & reviewed this patient type as a potential Butrans patient. She said she does not make recommendations to Dr Agarwal for patients' medications. Reviewed savings cards & managed care.
PPLPMDL0020000001	Stow	OH	44224	9/20/2011	Dr said he has written some Butrans and I asked how his patients are and he said they are doing good and he can probably write more he was waiting for feedback, I asked him what kind and he said if it works. I asked what made him think of writing Butrans and he said he likes that it is a patch and it is once a week instead of pills. We discussed not writing it in medicaid or medicaid and those would be more of an Oxycontin patient and he said he had to run
PPLPMDL0020000001	Westlake	OH	44145	9/20/2011	I discussed our last conversation and that he said that Butrans gives him another option when other medications don't work well. I asked if he could think of some patients where he is having frustration getting their pain under control and if he would start Butrans. He agreed and said that he has been wanting to gain more experience with it.
PPLPMDL0020000001	Stow	OH	44224	9/20/2011	Dr popped his head into lunch and said what do I have and I said I have Butrans the once a week Schedule 3 transdermal system, and he said he remembered and to make sure I talk to the others because he does the
PPLPMDL0020000001	Cleveland	OH	44106	9/20/2011	asked dr how Butrans is fitting in his practice? dr said he doesnt like to write narcotics,tries to avoid them.dr said his favorite is topamax and tramadol,told dr that tramadol is a narcotic due to mu opioid receptor activity,dr said in his mind tramadol isnt a narcotic because its not scheduled.dr said he knows he has to get more patients started on Butrans but someone needs to twist his arm.
PPLPMDL0020000001	Parma	OH	44134	9/20/2011	Dr Hernandez said that some of his patients have had contact dermatitis from Butrans. He said it is not a lot of his patients but there have been a few. He said there doesn't seem to be any rhyme or reason to who gets it, but when this happens, he discontinues the Butrans. He said he doesn't mind treating other side effects like nausea, but with contact dermatitis, he switches them to something else. He said Butrans has been a great option for his patients & he continues to offer it to patients when appropriate. I asked how he usually initiates treatment & counsels the patients with their first prescription. He said he just tells them to put on the patch & that is all. I asked if he talks to them about supplemental analgesia or waiting 3 days to judge whether it is working for them. He said he does not. He said he hasn't had any complaints, so that is how he continues to do it. Reminded him of savings cards for both products. He said he does not need any additional cards for now.
PPLPMDL0020000001	Stow	OH	44224	9/20/2011	Sandra said that she tried a patient on Butrans after last time she saw me and has had good results. Said she likes that it is once a week and makes it nice when they come in and are wearing it. She said she is sure that she probably has more patients who would do well on it. We reviewed managed care coverage.
PPLPMDL0020000001	Cleveland	OH	44106	9/20/2011	asked dr when he walks in exam room how does he decide if Butrans is an option for patients? dr said depends on many factors,if patients are calling in early for refills,if patients are taking percoet daily and not controlled,if he feels patients will wear a patch once week,dr said he has 1 patient thats on Butrans thats getting some redness and swelling under patch site but is still taking Butrans because its working for her.dr said all of his patients that are on Butrans were taking percoet and not controlled,dr said he will give some patients percoet for breakthrough if they bug him about it otherwise he tells them to take aspirin or ibuprofen.dr said lisa explains Butrans to patients,shows patients Butrans patient info booklet and handles all insurance.told dr to focus on BWC and commercial insurance plans.
PPLPMDL0020000001	Stow	OH	44224	9/20/2011	Spoke with Gregg, they have not officially opened yet and have not stocked yet. He will look at what the Drs are writing and he will go from there in ordering from Amerisource Bergan. I reviewed Butrans with him and he said he came from Giant Eagle so he is familiar with it. HE said he will probably stock if they are writing
PPLPMDL0020000001	Cleveland	OH	44106	9/20/2011	worked anesthesia/pain management dept and bolwell out patient pharmacy
PPLPMDL0020000001	Cleveland	OH	44106	9/20/2011	dr said he's going to start more patients on Butrans,he likes the product and thinks when tramadol isnt controlling patients pain,Butrans should be an option.dr said the 1 patient he started on Butrans,noted in previous call,was taking 400mg tramadol daily,not controlled so he pushed dr hayek to try Butrans on an elderly patient.dr said he started patient on Butrans,no tramadol for breakthrough pain,after 2 week trial,patient told dr Butrans wasnt working and she wanted tramadol told dr to avoid medicaid and medicaid,focus on BWC and commercial plan.asked dr how i can get Butrans in mind of Dr Hayek,instead of refilling so much tramadol for patients? dr said dr hayek loves topamax and tramadol,dr said he will suggest more patients get started on Butrans and i just have to keep reminding dr hayek of starting dosage strengths of Butrans.
PPLPMDL0020000001	Stow	OH	44224	9/20/2011	Dr said he is writing Butrans. I asked him how his patients are liking it and he said they like it, but one patient could not find it in a pharmacy and I said the majority are stocked and he said he told him to go to a different one. Dr said he has a hard time with patients wanting to stay on the pill because the get the immediate high so they think that it is working. I said why not gie them Butrans and give them one or 2 pills a day if needed for supplemental and maybe they will not even need it. He said that is good idea. I said how many patients do you get a week who are potential Butrans patients and exhibit similar qualities to his other Butrans patients and he didnt seem to understand the question. He said he will continue to write and I reinforced managed care coverage and not to write in medicaid and medicaid patients and those patients he can use low dose OXYcontin, he said
PPLPMDL0020000001					

	University Hts	OH	44118	9/20/2011	Conducted the butrans RM presentation with doc and asked him which of the case studies represent his patient population. He said probably all four of them. I explained to him how to initiate the 5 and the 10mcg for the opioid naive and opioid experienced. He asked about the side effects and if skin irritation was the #1 reported. I showed him the safety profile of butrans and that nausea, dizziness, headache along with application site pruritis were the most frequently reported. Discussed the positioning - after NSAIDs or after tramadol. He said he would likely not prescribe after NSAIDs. I asked him if he sees any benefit to a product like butrans. He said sure and he has the literature in his office, he just needs to look at it more often. I explained the coverage with BWC which might be helpful for his occupational health patients. Discussed the formulary grid and savings cards for oxycontin and butrans. He said he would try it - "e would try to find a guinea pig". He said its just new.
PPLPMDL0020000001	Westlake	OH	44145	9/20/2011	Quick call in Lakewood, Dr said he started another new patient yesterday, but he is concerned about managed care for this one. He did not remember which plan. I reviewed the commercial insurance and he said he will keep me posted. I let him know OxyContin is an option that is covered on most plans.
PPLPMDL0020000001	Stow	OH	44224	9/20/2011	Introduced Butrans, reviewed FPI, indication, dosing and titration, 5 core messages and managed care messages. She is new PA at the office and just started this week, She said this sounds like a good product and something she will try definitely with the opioid experienced
PPLPMDL0020000001	Cleveland	OH	44130	9/20/2011	I showed initiation/titration guide pg 8 & asked Dr Diab if he has found that he has had to titrate patients on Butrans lately. He said he doe sometimes. Reminded him of ability to titrate after 3 days to a maximum of 20mcg. He thanked me & walked into a room. Placed titration guide on his desk to serve as a visual reminder. Spoke with MA Dina & discussed titration ability on Butrans as well.
	Independence	OH	44131	9/20/2011	Deb said one of her former Butrans patients who was put on OxyContin returned for her follow-up visit with the bottle of OxyContin because she said it did not work for her at all. I asked if she could provide any other details. She said the patient was taking OxyContin 10mcmg 3x per day. I told her OxyContin's FPI states that the only recommended dosing interval is q12h. Deb said she just put her first patient on Butrans at 5mcg dose. I asked her what made her think of Butrans for this patient. She said he has multiple back problems including degenerative disc disease & his spine is "like mashed potatoes". She said nothing else seemed to be working for him but he was very committed to getting rid of his pain. I told her it sounded like she chose an ideal patient. She asked me if Butrans has any negative interaction with psychiatric medications such as Lexapro. I showed her FPI 5.3. She also asked what she should do if a patient were to report respiratory depression. Discussed this & showed FPI section 10, also pointing out 10.2. She said that she counseled the patient thoroughly, giving him the information booklet, which the patient understood & appreciated. Deb added that she told the patient to keep some of his Ultram on board in case of breakthrough pain. Discussed ability to titrate after 3 days to max of 20mcg. She said she would keep me updated on his progress with Butrans.
PPLPMDL0020000001	Cleveland	OH	44106	9/20/2011	talked to Margie, Pharmacy Supervisor, about Butrans stocking, Margie said Butrans cartons are still sitting on shelf, no scripts yet. talked to Margie about some departments im working with, like pain management that are prescribing Butrans and others like Internal medicine that wont write Butrans out-patient because all they write is tramadol and 90% of patients are medicaid and Butrans isnt covered on Medicaid, margie said she knows access is tough in family medicine too. told Margie its just taking longer for physicians to accept Butrans and start prescribing, asked Margie if she would recommend Butrans to physicians, if she provides patient counseling to those taking opioids, Margie said she doesnt really do that for patients and doesnt feel comfortable making opioid recommendations to physicians. asked Margie if she would be willing to give Butrans patient info booklets to patients, so they can speak with their physicians, Margie said that was a great idea and she would do that. discussed OxyContin stocking, Margie said OxyContin's in stock and many departments prescribe OxyContin still. asked Margie if she needed OxyContin savings cards, she said no because majority of patients are medicaid and medicare.
PPLPMDL0020000001	Cleveland	OH	44124	9/20/2011	Doc apologized that he could not attend the speaker program on 09/15. I thanked him for considering attending. I explained to him the indication, the CII status and the 7 day delivery. He said he wantsto attend, perhaps, a program in the future as he would like to learn more about butrans. I gave him the butrans portal invite. Reminded him of the BWC coverage for butrans and oxycontin.
PPLPMDL0020000001	Cleveland	OH	44114	9/20/2011	asked dr when she's in exam room, putting pen to paper, how does she decide if Butrans is an option? dr said she looks at what the patients currently taking, how much medication they are taking and insurance. I asked dr what she meant about how much? dr said if patients are maxed on a short-acting medication she'll decide if they need to try another short-acting or Butrans. asked dr if she would start patients on Butrans, after tramadol fails, dr said no she would go to vicodin. dr said she has 1 patient doing really well on Butrans but has had some insurance issues lately.
PPLPMDL0020000001	Westlake	OH	44145	9/20/2011	Quick call when talking to Juan, I asked the Dr where Butrans has been fitting into his practice. He said he thinks it's a good option when other opioids haven't worked. I reminded him that patients on higher doses of other opioids may not get adequate analgesia with Butrans and that OxyContin may be an option. I reviewed the savings cards and medication guides. They have a few but have no room at this location to keep any more.
PPLPMDL0020000001	Stow	OH	44224	9/20/2011	Sharon came in quickly to lunch and said she has not tried Butrans, hasnt found the right opportunity but did not have any questions or concerns and had to leave for a meeting. Gave her formulary grid
PPLPMDL0020000001	Brooklyn	OH	44144	9/20/2011	Spoke with technician Rhonda who said the pharmacist was busy assisting customers & could not see me. Discussed upcoming pharmacist webinars for Butrans that are available & gave her an information sheet. She said she will make sure each pharmacist sees it. Also reviewed savings programs for Butrans (via automatic e-voucher for those eligible) & OxyContin (via savings cards). Also let her know OxyContin cards could be used once every 14 days for a person paying cash who's prescription is written that way. She said that was good to know.
PPLPMDL0020000001	Cleveland	OH	44114	9/20/2011	dr marshall asked John, PA working with dr marshall and dr latz, how many patients they have started on Butrans in past 10 days? John said 2-3 patients a day. John said they had 2 patients with medical mutual insurance that couldnt get Butrans, so that was only problem with insurance. showed John Butrans formulary grid, discussed patient savings card program and asked John to focus on BWC and commercial insurance plans as thats the easiest for them.
PPLPMDL0020000001	Warrensville Heights	OH	44122	9/21/2011	I asked Dr Zivic how I am going to get him to think of Butrans for appropriate patients. He said it might take a few more discussions & then he will remember. I asked him why not prescribe Butrans for patients who are not well-controlled on chronic tramadol or Vicodin around-the-clock. Reminded him of once weekly dosing in a transdermal system & asked him what he thought of that. He said it sounds "easy". Also reminded him of CII & asked if he could think of any other long-acting CII. He said no. He asked if he can only prescribe for commercial insurance patients. I told him this is where he would get the least amount of push-back. He asked if it is still expensive for commercial insurance. Discussed formulary availability for commercial plans & savings cards for those patients, bringing them down to around a \$15 co-pay. I asked how that sounded & he said it sounded good. I closed him for one or two of this patient type & he said he would try but that he might need a few reminders again. Handed him Portal invite & told him he could go online at his convenience for an interactive "reminder".
PPLPMDL0020000001	Garfield Heights	OH	44125	9/21/2011	Also discussed OxyContin for appropriate patients beyond Butrans.
PPLPMDL0020000001	Cleveland	OH	44104	9/21/2011	Spoke with Margaret (nurse) & Angie who said Dr Samuel was still seeing patients & it was not a good day. I inquired about utilization of Butrans but Margaret said he has not been using it but she does not know why. Discussed savings cards & managed care for bot Butrans & OxyContin. Margaret said she has plenty of both still. Worked with them to schedule lunch when available.
	Cleveland	OH	44104	9/21/2011	talked to dr about pg.11 visual aid, discussed pain conditions and dr focused on back pain patients, talked about Butrans being an option for these patients, dr said he has 1 patient on Butrans and patient seems to be doing well so far. talked to dr about titration of this patients Butrans dose, if necessary, following up with patient to discuss side effects and be sure patient has Butrans patient info booklet, dr said he hasnt heard anything so thats a good sign and he's seeing the patient soon for a follow-up appt. asked dr if he had more patients to start on butrans with commercial insurance? dr said he does have some patients in mind for Butrans. talked about OxyContin for appropriate patients and insurance coverage for them. Recommended Senokot-S
PPLPMDL0020000001	Parma	OH	44129	9/21/2011	Introduced myself & Purdue's products to Dr Hines. Presented Butrans 5 core messages & asked his thoughts. He said it sounded interesting. Discussed & reviewed appropriate patient type, focusing on patients who he would typically start on a short-acting around-the-clock regimen. Discussed these being potential Butrans patients. Also presented initiation guide to walk him through how to start this patient type on Butrans. Also discussed titration ability after 3 days & ability to take supplemental analgesia in form of opioid or non-opioid medication. He asked if someone on fentanyl was already beyond what Butrans was for. Told him patients on fentanyl were excluded from studies. Discussed that Butrans is a CII opioid & carries abuse/addiction potential. He said there really is nothing else like Butrans & I asked if this meant he could see himself prescribing it. He said yes.
PPLPMDL0020000001	Parma	OH	44129	9/21/2011	Reviewed insurance coverage & savings cards. I also asked about his experience with OxyContin. He said it is an effective medication. Discussed 7 available tablet strengths, including intermediate doses. Also gave him savings
PPLPMDL0020000001	BEACHWOOD	OH	44122	9/21/2011	Spoke with Lesa & Diana (nurses) & introduced Butrans, reviewing 5 core messages. Discussed appropriate range of patients & OxyContin for appropriate patients who are beyond that range. Also showed them demo kit for them to see what Butrans looks/feels like. They said it was interesting. I gave them initiation guide & FPI & asked them to give a copy of each to Dr Eicher & encourage him to read it since it is a product that he probably has not heard of yet. They agreed. They said he was far too busy today to stop to speak with me.
PPLPMDL0020000001	Parma	OH	44129	9/21/2011	Spoke with Sam (pharmacist) who said he is just filling in at this location today. I asked if he was familiar with Butrans. He said he has dispensed it a few times. I presented Butrans pharmacists' webinar information & discussed interactive nature of the program. He said it sounded interesting & that he would register. I reviewed appropriate patient type with him, including patients who are taking short-acting around-the-clock opioids chronically but who are not well-controlled on them. I asked if this was a familiar patient type & he said yes. He asked if a patient could be converted from tramadol to Butrans. Presented initiation guide, focusing him on page 6 with initiation table. Discussed how a tramadol patient could be initiated on Butrans depending on their current dose. He asked how long before it reaches steady state. I told him 72 hours & told him that patients can take supplemental analgesia in form of opioids or non-opioids for breakthrough during Butrans therapy. Also gave him an updated FPI. He was very appreciative of the information & initiation guide.
PPLPMDL0020000001	Parma	OH	44129	9/21/2011	Introduced myself & Purdue's products to Dr Lee. Presented Butrans 5 core messages. He said Butrans sounded like an interesting option. Spent time going over appropriate patient type, including those he would be ready to start on an around-the-clock opioid or someone who was not well-controlled on a short-acting opioid. He said he likes that it is a long-acting CII. Reminded him that Butrans is still an opioid & does still carry abuse/addiction potential. Presented initiation guide & walked through pg 6, discussing how to start different ranges of patients. Discussed OxyContin, with 7 available tablet strengths, as an option for patients who are beyond appropriate range of Butrans patients. He said he will try to remember to prescribe Butrans for a patient who fits the description we talked about.
PPLPMDL0020000001	Bedford	OH	44146	9/21/2011	Dr Moufawad said that he has found that when he tries to switch patients from Vicodin to Butrans that it causes the patient to go into withdrawal. He said he has tried this with a few patients & it seems to happen every time. Discussed proper initiation of treatment with Butrans when switching from other opioids, including focus on recommended taper. He said he has not been doing it that way. He also said the most recent Butrans patient he started never returned for the follow-up visit, so he does not know how they did. I asked what his main hesitation would be on starting more patients on Butrans. He said he just wants to get better training first & that he does not want to be questioned by the Board on how he prescribes. He also said that he is not taking any new patients in his practice, so that rules out many potential Butrans candidates as most of his established patients are on too high a dose of other opioids to be candidates for Butrans. I agreed these may not be appropriate patients & may be better OxyContin patients. He said he really does not like OxyContin but does prescribe it sometimes. He added that he does not write new prescriptions for it generally. I asked if this was a long-standing policy of his. He said yes & then again stated that he is not taking new patients & it seems that he is always being questioned by people on how he practices.
PPLPMDL0020000001	Parma	OH	44129	9/21/2011	Spent time with Tracey, a pharmacy technician who works with Stan & Kevin in the hospital pharmacy. Went through 5 Butrans core messages & spent time going over appropriate patient type. I asked what her thoughts were on use in the hospital. She said she could definitely see physicians ordering it in the hospital setting, specifically to send patients home on. She also said that Stan will occasionally allow lunches with the pharmacy staff. I asked how to schedule this & if I would be able to even if the product was not on formulary. She said she was not sure but I could check with Stan via email or phone. Tracey also said that Parma Hospital's pharmacy dispenses medications to area hospices & that Parma Community General Hospital has its own hospice on Pleasant Valley that they dispense for & courier there. I mentioned Dr Gallagher & how he has started to get Butrans experience. She said he is extremely important & that he is the head physician over all of the hospices they service. We also discussed their utilization of OxyContin. I asked about the HUD strengths they carry & she said they carry most of them, but probably not all of them.
PPLPMDL0020000001	Cleveland	OH	44109	9/21/2011	talked to Debbie, pharmacist, who said she's not seen any Butrans scripts, but does have the Butrans 5mcg in stock. showed Debbie Butrans 5 core selling messages, she talked about transdermal delivery and once weekly application & 2 benefits she saw in Butrans that stood out. we discussed formulary coverage for Butrans. asked Debbie if she would give patients the Butrans patient info booklets, if patients are taking short-acting opioids and not controlled, to discuss Butrans with their doctors? Debbie said she would do that. discussed OxyContin stocking and appropriate patients for OxyContin, talked to Debbie about OxyContin insurance coverage. recommended
PPLPMDL0020000001	Westlake	OH	44145	9/21/2011	Quick call, I asked if he had started any new patients on Butrans recently and how the success has been. He said he has not, he had some hassles with managed care, but still would like to try Butrans more. I asked if he could focus on commercial insurance and that most patients will have as low as a \$15 copay.

	Parma	OH	44129	9/21/2011	Dr Gigliotti said he has one patient who is doing well on Butrans & who is still on it. I asked about others. He said he is still waiting to hear feedback from 2-3 others so far. I asked if he plans to continue choosing patients & he said he will. He showed me that he still has the savings cards package that I gave him displayed on his desk. I told him they don't do anyone any good if they just sit on his desk. He laughed & said he would find more patients. Also OxyContin reminder for patients beyond Butrans appropriate range of patients.
PPLPMDL0020000001	University Heights	OH	44121	9/21/2011	Doc said his issue with butrans is cost. I explained the commercial plans and left a formulary grid. Reminded him that patients should receive a savings cards.
PPLPMDL0020000001	Cleveland	OH	44113	9/21/2011	talked to dr about the 2nd patient she started on Butrans,showed Butrans visual aid,pg.11 inclusion criteria,dr focused on back pain,talked about Butrans being an option for patients with this pain condition.discussed initiation of Butrans,titration,showing patients Butrans patient info booklets and focus discussion on application/rotation of Butrans,focused dr on BWC and commercial insurance.asked dr if she has more patients to start on Butrans this week? dr said she probably will see many patients that are appropriate but so many patients have medicaid insurance,so she has to fill out a PA for them,just a longer process.told dr that was great she had patients in mind but focus on BWC and commercial,dr said ok.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44104	9/21/2011	talked to dr about pg.11 pain conditions,dr talked about patients with osteoarthritis,discussed 5 Butrans core selling messages and dr focused on transdermal delivery and once weekly dosing.asked dr if he had patients like we discussed that he could start on Butrans this week? dr said probably so,dr asked about medicare coverage again,told dr to avoid medicare now and focus on commercial insurance patients,dr said ok.talked about OxyContin being an option for patients,showed conversion guide discussed some conversions from vicodin to OxyContin and percocet to OxyContin,discussed insurance coverage for OxyContin and recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44102	9/21/2011	talked to marian,MA and Jasmin,MA,about Butrans being an option for patients,showed 5 Butrans core selling messages visual aid,asked them to speak with dr about Butrans when they see patients with pain conditions,pg.11 visual aid,that arent controlled on their short-acting opioids,both medical assistants said they would do that.told them to focus dr on BWC and commercial insurance.
PPLPMDL0020000001	Mayfield Heights	OH	44124	9/21/2011	HCP said that she has had a few reports of complaints about skin burning with the butrans patch and increases with increased dose. She said she has not had a problem until recently. I explained the that application site pruritis is a AEs in studies. She asked about the use of 2 patches at a time. I explained that it is not recommended. She still likes the product and will continue to prescribe.
PPLPMDL0020000001	Cleveland	OH	44113	9/21/2011	talked to Deb,PA,about Butrans 5 core selling messages,Deb said she just had lunch yesterday with Ashleigh and loves Butrans.Deb said she started a patient yesterday,at Dr.Tricketts office where she works 2xweek.I asked Deb where Butrans will fit into this practice,as this is a pain clinic versus dr tricketts office being physical medicine and rehabilitation? Deb said patients taking 4-5 tabs of Vicodin 5/500 daily would be her ideal patient instead of pushing the dose higher.told Deb that was a great place for Butrans.Gave Deb Butrans initiation guide,discussed initiation dosage strengths,discussing titration up front which she said she does so that would be easy and discussing side effects with patients up front, I went through Butrans patient info booklet with Deb and asked that she focus on application/rotation section for Butrans and show patient the log book in back of booklet.I showed Deb Butrans demo, disposal unit and carton.I showed Deb Butrans patient savings cards,explained savings card program and told Deb to focus on commercial insurance patients for the cards or BWC patients here to start on Butrans,Deb said ok and that she will be starting some patients on Butrans at this office which is with dr nickels, a pain management clinic.
PPLPMDL0020000001	Mayfield Hts	OH	44124	9/21/2011	Doc said that he has a few younger patients on butrans but the 10mcg does not work. He said he is frustrated that medicare is not covering it as the elderly are the ideal patients. I focused him on the proper starting dose for opioid naive and opioid experienced.
PPLPMDL0020000001	Euclid	OH	44117	9/21/2011	Doc said he tried a BWC patient on butrans and he said the patient didnt like it/it didnt work/. He did not remember what strenghts he wrote the script for. He switched the patient back to vicodin. Patient was on vicodin ES TID. I explained that that patient and other like him should be started on a 10mcg for best success. He has another patinet on Butrans that is doing well/he has not heard back from. He said he will continue to look for other dr said he's starting more patients on Butrans,dr said 1 patient read the Butrans patient info booklet in exam room and wanted to try Butrans,dr didnt want to try Butrans initially because this patient has been taking Suboxone,dr explained that Butrans has no indication for treatment of addiction.I showed dr Butrans fpi,noting section 5.17,no treatment for addiction indication and showed Butrans indication again in FPI dr said he knows and told patient all of that info,patient said this was only for his chronic pain that was it dr said he decided to start the patient on Butrans and see what happens.dr said he's now starting to think of patients that are taking Vicodin 5/500,4-5 tabs a day so 20-25mg daily,that arent controlled,on Butrans.I asked dr if he was giving patients any immediate release opioid for breakthrough pain,with Butrans? dr said he has and doesnt see a problem in giving patients Vicodin for breakthrough,just smaller amount.asked dr if he would start a patient on Butrans,that was taking 2 tabs daily of Vicodin,5/500,if not controlled? dr said probably not.asked why? dr said because insurance companies,like Caresource/Medicaid want you to continue trying generic med's like Vicodin until patients are at 4-5 tabs daily and not controlled.asked dr if there was no insurance issue,whats the clinical benefit of increasing patients vicodin,after the 2 tabs daily arent controlling pain? dr said there really isnt any clinical benefit,just insurance related.
PPLPMDL0020000001	Cleveland	OH	44113	9/21/2011	talked to dr about his patients with some of the pain conditions listed,pg.11 visual aid,and how Butrans could be an option for them dr said he hasnt thought about Butrans but remembered it was transdermal.showed dr 5 Butrans core selling messages,dr focused on once weekly dosing option and Butrans being a CII,dr said a CII is easier for his staff so they can call in refills.asked dr if he has a couple patients this week that he can start on Butrans? dr said he probably does and he will look for some patients.dr asked about medicaid insurance coverage for Butrans? told dr to focus on BWC,commercial and tricare.dr said medicaid is biggest patient population.talked to dr about PA requirements for Medicaid and dr said ok he might be willing to get PA done for those patients if he feels they are appropriate.talked about OxyContin as an option for patients,showed conversion guide and discussed some conversions from short-acting opioids to OxyContin,discussed OxyContin formulary coverage.recommended Senokot-5
PPLPMDL0020000001	Parma	OH	44134	9/22/2011	Dr Scanlon said he just prescribed Butrans 2 days ago. I asked him to tell me more about the patients. He said they have been patients who have already been on an opioid who were not well-controlled. I asked him what dose he has been starting patients on & he said he always starts patients on 5mcg. I asked if he ever has to titrate the dose. He said he has moved one or two patients up to a 10mcg. I asked if he has ever needed to use the 20mcg & he said no. I asked what kind of feedback he has been given from patients. He said the ones he has heard from have given positive feedback. He added that he has not been told of any adverse events so far, so that makes him confident in prescribing as well. I asked if that means he will continue to identify patients & he said yes. I asked what his thoughts were on trying Butrans for patients if they have a chronic condition & are not well-controlled on 2-3 tramadol per day. He said he thought it was a good idea to get patients started on Butrans at that point than waiting until later in opioid therapy. I asked if he would identify a few patients like that to start on Butrans & he said yes.Also discussed OxyContin as an option for appropriate patients beyond Butrans 20mcg.
PPLPMDL0020000001	Westlake	OH	44145	9/22/2011	I asked Dr to tell me about the patients he's started on Butrans, he said so many of his patients are Medicaid and he trying to get them on lower doses of Butrans. We reviewed the manged care and I asked if he would focus on commercial and BWC patients. He said he will and he does have patients that he could talk to about Butrans. We discussed OxyContin and that he is trying hard to taper patients down.
PPLPMDL0020000001	Cleveland	OH	44102	9/22/2011	talked to Nagla,PA,about appropriate patients for Butrans,showed visual aid,pg.11,talked to Nagla about pain conditions where Butrans could be an option for patients.Nagla said she is recommending Butrans to the doctors,3 in practice,so they can get more clinical experience with Butrans.Nagla said long-acting opioids are her choice instead of all short-acting opioids when treating chronic pain conditions.discussed patient info booklet,asked Nagla to focus patient discussions on application/rotation of Butrans.Nagla said she's been doing that and booklets are helpful as they educate patients.focused Nagla on BWC and commercial plan patients.recommended
PPLPMDL0020000001	Parma	OH	44134	9/22/2011	Dr Loyke reminded me of his feeling of prescribing opioids. I told him I remember. He said he just wants reps to be honest with him & I told him he would always get honesty from me. He asked if I would tell him ever where not to prescribe my products & I agreed to do this. He looked through the initiation guide & asked about Butrans dosage. Showed him pg 6 & pg 8 to show how to initiate treatment & discussed titration ability after 3 days to a maximum 20mcg. He said he does like the idea of a long-acting transdermal that is a CII. Reminded him Butrans is just as abuseable as any other opioid & advised that he use the same caution he would with any other opioid.
PPLPMDL0020000001	Parma	OH	44134	9/22/2011	He agreed. He said he actually thinks he might be able to prescribe Butrans for a few patients. Discussed OxyContin as an option for appropriate patients who are beyond the range of appropriate Butrans patients.
PPLPMDL0020000001	Parma	OH	44134	9/22/2011	Introduced myself & Purdue's products to Lynda, a new NP in Dr Scanlon's office. Reviewed Butrans 5 core messages & asked her thoughts on a long-acting CII. She said that as a new NP, she would have hesitation with any narcotic. I told her she should be cautious in prescribing. Discussed buprenorphine as a partial mu opioid receptor agonist & as a CII opioid. Drew her attention to black box warning & advised that Butrans is just as abuseable as any other opioid. Also discussed disease states that cause chronic pain such as spinal stenosis & intervertebral disc disease. She said she does like transdermal technology & has used some of the other transdermal products in her practice. Discussed importance of appropriate patient selection.
PPLPMDL0020000001	Cleveland	OH	44114	9/22/2011	talked to Laura,pharmacist,about Butrans 5 core selling messages showed flashcard and asked Laura what stood out to her about Butrans? Laura said transdermal delivery and once weekly dosing application.Laura said she thinks Butrans is a great option for patients but she's not seen any scripts yet and wont order Butrans until she gets 1st script.talked about importance of stocking,appropriate Butrans patients showed initiation guide and discussed commercial plans,BWC and patient savings cards for commercial plan patients.I asked Laura to recommend Butrans to patients,when patients are taking short-acting opioids for their chronic pain but not controlled and have patients talk to their doctors about Butrans.Laura said she will do that.discussed OxyContin appropriate patients,conversion guide left for Laura,discussed formulary coverage for OxyContin.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44120	9/22/2011	talked to Daniel,Pharmacy tech,and Keith,floator pharmacist,as Stewart the narcotics buyer is no longer here.Marc is the narcotics buyer and off work today.Keith,Pharmacist,said he knows Butrans scripts are getting filled here but doesnt know who's writing and no time to look now,showed Keith Butrans 5 core selling messages and asked what stood out to him? Keith said transdermal delivery and 1 application with 7 day dosing.Keith said Marc would be the person for me to meet with and discuss Butrans as he's only a floator.gave Keith Butrans fpi,initiation guide,showed patient info booklet in case patients come in today to fill scripts for Butrans he can give them a booklet and focus on application/rotation of Butrans,Keith said ok he would do that.we talked about appropriate patients for OxyContin,gave conversion guide and recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44195	9/22/2011	talked to Lisa,MA,as dr wasnt free to see me,about 5 Butrans core selling messages,talked about appropriate patients for Butrans,showed visual aid pg.11 pain conditions and asked Lisa if they treated these types of pain conditions? Lisa said they have a lot of arthritis patients so this could be an option for them.Lisa talked about once weekly application of Butrans and I showed Lisa Butrans patient info booklet,asked her to discuss all of this info with dr,Lisa said she would and dr will decide if he wants to set-up an appointment with me to discuss Butrans further but Lisa recommended I stop back again and keep trying to see dr.focused Lisa on commercial plans and BWC for Butrans and discussed Butrans patient savings cards.
PPLPMDL0020000001	Cleveland	OH	44113	9/22/2011	talked to Justin,Pharmacist,about Butrans scripts and stocking,Justin said 1 script came in this week from Dr.Shen but thats it.Justin said he has all 3 Butrans dosage strengths in stock.talked to Justin about physicians im working with in the area and showed 5 Butrans core selling messages flashcard and Justin said once weekly dosing and transdermal delivery are the 2 features that really stand out to him for Butrans.discussed OxyContin stocking and appropriate patients for OxyContin.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44109	9/22/2011	talked to dr about pain conditions,pg.11 visual aid,he treats and dr said he see's a lot of these listed.asked dr to focus on a couple commercial patients taking tramadol,daily but not controlled and start them on Butrans.we discussed immediate release opioids being given with Butrans or non-opioid therapy.dr said ok he's got a few patients in mind that he can start on Butrans,he will just need to talk to them about Butrans being a patch,showed dr Butrans patient info booklet and asked dr to focus on application/rotation of Butrans with these patients.dr said ok he will do that.talked about OxyContin being appropriate for patients,showed dr OxyContin conversion guide and discussed Oxycontin formulary coverage.asked dr to continue starting patients on OxyContin,dr said ok.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44104	9/22/2011	talked to dr about Butrans being an option for her patients with pain conditions,pg.11,dr said most of her patients with arthritis are controlled on tramadol so she's not making any changes,told dr that was fine and she shouldnt make changes if patients are controlled.asked dr if patients ever call in earlier for refills? dr said yes occasionally,asked dr to stop and not refill tramadol but start patients on Butrans? dr said she will if this happens.focused dr on commercial insurance and discussed patient savings cards.recommended Senokot-5
PPLPMDL0020000001	Cleveland Heights	OH	44118	9/22/2011	Quick call....reminded doc that he previously said that butrans might be good for patients that can not tolerate hydrocodone. I asked him how often he sees patients that can not tolerate vicodin. He said from time to time. I asked him to try those patients on Butrans instead as long as they meet the indication.
PPLPMDL0020000001	Cleveland Hts	OH	44118	9/22/2011	Quick call....Reviewed the Butrans indication, 7 day application, and the positioning. He said he has not used it yet. I asked that he try for a patient taking a low dose vicodin instead of increasing their dose. Oxycontin coverage reminder.
PPLPMDL0020000001	Westlake	OH	44145	9/22/2011	I asked Dr what I can do to help with the progress of getting Butrans on formulary, he said that it is still on the list of drugs to review and he will keep me posted. I asked if he is still starting new patients and he said that he is and would like to use it more in the hospital so that he can see how they do and then send them home on it.

PPLPMDL0020000001	Berea	OH	44017	9/22/2011	I showed the initiations presentation and asked if he sees patients like Evelyn who are taking tramadol around the clock. He said that he does. We discussed the option of using Butrans 10mcg for this type of patient and he said he would keep it in mind.
PPLPMDL0020000001	Highland Heights	OH	44143	9/22/2011	Window call...I asked doc how patients are doing on butrans and if he is still having success. He said things are going well aside from a few coverage issues. I reminded him to focus on patients with commercial coverage and be sure to give a savings card. He said he is doing that. Provided an oxycontin formulary grid as well.
PPLPMDL0020000001	Cleveland	OH	44104	9/22/2011	talked to dr about pain conditions,pg.11 visual aid,and considering Butrans for these conditions,dr talked about patients with back pain as so many people have back pain.dr said he tells patients to eat healthier,exercise,try physical therapy and if that doesnt work he will tell them to take NSAIDs and give muscle relaxers.dr said if that doesnt control pain,he'll start with ultram.talked to dr about starting patients on Butrans right after the ultram doesnt control pain for these conditions,dr said that makes sense to consider Butrans earlier in therapy and not wait so long. asked dr if he had some patients today and tomorrow that are like we discussed,where he can start them on Butrans? dr said he's sure he will have a few and will consider Butrans.focused dr on commercial plan patients and discussed patient savings cards with dr.talked to dr about OxyContin being an appropriate option for patients and showed conversion guide,talked about formulary coverage and asked that dr continue starting patients on OxyContin,dr said he will do that if patients are appropriate.recommended Senokot-S
PPLPMDL0020000001	Cleveland Hts	OH	44118	9/22/2011	I reviewed the butrans indication and appropriate positioning after tramadol. He said he does not have a lot of tramadol. I explained that it does not have to be tramadol and can be next after NSAIDs or before going to vicodin ATC. I explained the CII status which means that it can be called in or refilled. He asked about the frequency of the dosing. I reminded him that one dose lasts for 7 days - once weekly dosing. I asked him to try one patient that he may be considering for vicodin. He said ok. Gave him a titration guide and formulary grid.
PPLPMDL0020000001	Cleveland	OH	44104	9/22/2011	dr said she keeps forgetting about Butrans,she has so many medications in her mind and so many reps that she really hasnt thought of Butrans to start any patients.dr said 1/2 of her chronic pain patients are controlled on percocet and dont need a change,the other 1/2 are sent to pain management.dr said she's very frustrated with her pain patients because all they do is demand their pills and she has other things to look at with patients seeing she's family practice.told dr to not think of "chronic pain patients" but to look at pain conditions.pg.11,inclusion criteria,asked if dr treats these? dr said yes.asked dr how she manages chronic pain for these conditions? dr said ultram,50mg q6h,200mg is max she will prescribe.dr said when ultram doesnt control pain she will start some patients on vicodin or percocet.dr said she hates that patients have to come get scripts monthly,for percocet.asked dr if she has any patients taking ultram,with 1 of the pain conditions shown pg.11,that perhaps arent controlled,and dr could start them on Butrans? dr said she has a few patients in mind that could try Butrans.asked dr if she will start them on Butrans? dr said she will do that and thinks she just needs to get some clinical experience with Butrans.talked to dr about showing patients Butrans patient info booklet,focus discussion on application/rotation section,dr said ok.we discussed 4 patient case studies,initiations,dr said she doesnt like long-acting opioids,has 1 patient on OxyContin
PPLPMDL0020000001	Cleveland	OH	44112	9/22/2011	I discussed the Butrans CII status, 7 day delivery and appriate patient type...I asked doc if he logged into the butrans portal. He said no, what's that. I gave him another portal invite and told him he could learn about proper patient selection. He asked me to let him know about the next speaker program. Told him it would be coming up soon.
PPLPMDL0020000001	Cleveland	OH	44195	9/22/2011	met Patty briefly in hall,introduced myself talked about Butrans 5 core selling messages,patty said she's read most of the info i have been dropping off but hasnt really thought of any patients to start on Butrans.showed patty pg.11 pain conditions and asked if they treat these conditions? patty said they do and she'll take info with her today to review but didnt have more time to talk.gave Patty Butrans fpi,initiation guide,portal invite,patient savings card flashcard and formulary grid and patient info booklet.recommended Senokot-S
PPLPMDL0020000001	Westlake	OH	44145	9/23/2011	Quick call with Jamie, he thinks they have at least one patient on the 10mcg dose of Butrans. He did not remember who wrote. He said is is not moving as quickly as he would have thought. We discussed what to let new Butrans patients know when they get a script. Reminder about the savings programs for Butrans and OxyContin.
PPLPMDL0020000001	Euclid	OH	44119	9/23/2011	Doc said he was just thinking about butrans. I asked him what it keeping him from trying a patient on butrans. He said nothing. I gave him a "for the week ahead" sales piece. He reviewed each of the messages and a I asked him to prescribe for one patient that has failed on tramadol. Explained that medicare/medicaid is not covering. savings cards for commercial patients.
PPLPMDL0020000001	Independence	OH	44131	9/23/2011	Caught Dr Keppler on his way out of the office. He asked me to review Butrans with him as he forgot many of the details. Reviewed 5 core messages which refreshed his memory. Roman told Dr Keppler that they should write it for patients with commercial insurance. Discussed managed care & likelihood of prior authorization with Medicare & Medicaid plans. He said he will keep this in mind going forward. Reminder of appropriate patient type.
PPLPMDL0020000001	Twinsburg	OH	44087	9/23/2011	Spoke with MA Jackie. Reviewed Butrans appropriate patient type, including patients with a chronic issue causing pain who call too soon for refills of around-the-clock short-acting opioids like tramadol or Vicodin. Jackie said she does not think any of the prescribers have written Butrans at all & said that usually the doctors send anyone with chronic pain to Dr Moufawad since he is there one day a week. I asked her to leave Butrans information for Dr Leonard & she agreed. Suggested I schedule breakfasts/lunches to see her.
PPLPMDL0020000001	Cleveland	OH	44105	9/23/2011	talked to Abdul,Pharmacist,about butrans stocking and Abdul's not seen any scripts and hasnt ordered Butrans yet.showed Butrans 5 core selling messages,Abdul said he'll continue recommending Butrans to patients by giving them Butrans patient info booklets.discussed OxyContin stocking and appropriate patients.recommended Senokot-S
PPLPMDL0020000001	Garfield Hts	OH	44125	9/23/2011	Spoke with technician who said the pharmacist was too busy to speak with me. I gave her information on Butrans pharmacists' webinars & let her know of the interactive nature of the programs & that they could ask questions during the webcast. She said she would give this to Sarah & the other pharmacists. She said she was not sure if they would be interested or not. Reviewed Butrans appropriate patient type, including patients who are not well-controlled on tramadol or Vicodin around-the-clock for a chronic condition. She said they often get calls from patients like that who request refills before they are due. I let her know these are potential Butrans patients if appropriate. Also discussed automatic savings via e-voucher & OxyContin savings cards.
PPLPMDL0020000001	Brooklyn	OH	44144	9/23/2011	Spoke with pharmacist Cheryl & presented patient information booklets. Walked her through patient counsel for application, rotation, & disposal. She said they would be helpful, especially for people who have not used transdermal medications before. Also gave her an updated FPI & information on pharmacists' webinar. Let her know she would be able to ask questions. She said she thought that was a great idea. I reviewed with her appropriate Butrans patient type, focusing on patients who are not well controlled on tramadol around-the-clock for a chronic condition. She said it is nice to have an option between tramadol & Vicodin. Discussed OxyContin as an option for appropriate patients beyond Butrans range & asked if he needed additional savings cards- she did not.<font color=blue>-cb>CHUDAKOB added notes on 09/29/2011</b>-</font>-Nice job on selling the talked to Rod,Pharmacist,about Butrans stocking and Rod said he's not seen any scripts yet.showed 5 Butrans core selling messages,asked Rod what features stood out to him? once weekly dosing and Butrans being a patch.asked Rod if he'll recommend Butrans,to patients taking short-acting opioids but not controlled,and give them patient info booklets to discuss with dr? Rod said he will do that.discussed OxyContin appropriate patients and confirmed stocking.recommended Senokot-S
PPLPMDL0020000001	Westlake	OH	44145	9/23/2011	I reviewed our last conversation and I asked if his patient was able to get Butrans covered on insurance. He said he did not hear back and she should have filled the script on Wednesday so he thinks it went through. He has been giving out the savings cards. I asked if he would start a new patient today and he agreed.
PPLPMDL0020000001	Brooklyn	OH	44144	9/23/2011	Dr Detwiler saw the Butrans core sales aid in my hand & said, "I am not going to write this product. There are just too many generic alternatives to treat pain." I attempted to remind him of previous conversations when he indicated that Butrans was something he would potentially use & saw value in, but every time I started to write it, he cut me off saying the same thing about not prescribing & there being too many generic alternatives. He walked into a room before I had the opportunity to discuss anything further with him.
PPLPMDL0020000001	Twinsburg	OH	44087	9/23/2011	Spoke with technician Nicole & gave her information about upcoming pharmacists' Butrans webinars. I asked her to pass this information along to Lou & she agreed. Also discussed formulary coverage for Butrans & OxyContin & reviewed e-voucher savings for Butrans as well as OxyContin savings cards. She said they did not need any OxyContin cards as they still have several on-hand. She said she has seen Butrans on their shelf but is not sure if they have dispensed any or not. She said she does not know of any customers on it.
PPLPMDL0020000001	Independence	OH	44131	9/23/2011	Reminded Roman of our previous Butrans conversations & asked what his experience has been. He said it is too expensive. I told him this is not the case if he prescribes for commercial insurance patients, especially if he gives them the savings cards. He said he just doesn't pay attention to what insurance they have. I told him this would cause some managed care push-back & likelihood of rejection if he is prescribing for Medicare or Medicaid. I asked if he thought a \$15 co-pay was reasonable & he said yes. He said he will do his best because he does want to use it. He said he has identified some patients but he got managed care push-back & the co-pays were so large for these patients that it made him stop trying. Asked him to not give up & to try to focus his writing on commercial insurance patients. He said he would do this. OxyContin savings cards reminder. He said he is a big learner. I gave him formulary grid and asked to try one patient.
PPLPMDL0020000001	Cleveland	OH	44109	9/23/2011	showed pg.11 visual aid,asked dr if he treats these types of pain conditions? dr said yes.asked dr how he manages chronic pain treatment for these conditions? dr said typically NSAIDs,physical therapy,non-opioid medications but if pain persists dr will start patients on tramadol.asked dr if he had a few patients with 1 of the conditions we discussed that he could start on Butrans right after tramadol isnt controlling the pain? dr said he probably does but most patients are controlled on their short-acting opioids at the moment.told dr if patients were controlled there's no need to make a change,yet for the patients who arent controlled or calling in earlier every month for refills those patients could potentially be started on Butrans,dr said ok.focused dr on commercial and BWC.OxyContin reminder.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	9/23/2011	worked pm&r dept
PPLPMDL0020000001	Independence	OH	44131	9/23/2011	Jill (MA) said Dr Pai wasn't available as he was too far behind. Offered to wait but she said he would not want to stop to talk. I reviewed Butrans formulary information with her & also reviewed managed care status for OxyContin. Reminded her that there are savings cards for both products. She said she has enough of them. I offered OTC samples but she said they have enough of those as well. She said Dr Pai is the one who gives out Doc said she is still looking for opportunities for butrans. She wants to prescribe but is not seeing the patients with the right coverage. I asked her if butrans was covered on medicare if she would have any other objections. She said no, not at all. I reviewed the specific plans where butrans is covered and the savings card program. She still has savings cards.
PPLPMDL0020000001	Lyndhurst	OH	44124	9/23/2011	Spoke with Lisa, we reviewed the Butrans medication guide. I asked which Drs in the area write for a lot of short acting month after month, she said the TriCity groups see a lot of pain patients for primary care. She might let a patient know about another option but she would probably not recommend to the Dr. We reviewed the savings program for both Butrans and OxyContin.
PPLPMDL0020000001	Westlake	OH	44145	9/23/2011	Spoke with pharmacist Nancy who said she was disappointed that she has not seen more Butrans activity than she has. She looked in her computer & verified that she has dispensed it once since my last visit. She said it was a 5mcg box & it was dispensed about a month ago, so she said she would stay on the look-out as that person should be coming in soon for a refill. She said she would let me know of any feedback she was given. Gave her a new FPI & information on the pharmacists' webinar in October. She said she would have a look at it. Let her know how to register if she wanted to participate. Also reviewed automatic savings via e-voucher & OxyContin savings cards although she said they really don't dispense that there.
PPLPMDL0020000001	Cleveland	OH	44103	9/23/2011	talked to dr about patients she's starting on Butrans,asked her to look at pain conditions.pg.11,and did she have any patients with these conditions that Butrans could be an option for? dr said she probably does have some patients and focused on back pain patients asked dr if she will start a few patients today and next week,with back pain,on Butrans? dr said if patients are willing to wear a patch she will start them.focused dr on commercial plan patients.oxycontin reminder and recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44113	9/23/2011	showed dr pg.11 visual aid,talked about pain conditions he see's in practice dr talked about back pain patients.i asked dr if he had a few patients with back pain where Butrans would be appropriate? dr said he might and would have to think about it.told dr to focus on commercial plan patients.Oxycontin reminder and recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	9/23/2011	dr said he started a couple more patients on Butrans and he's seeing improvements in patients pain levels.asked dr if the patients he started happened to have any of the pain conditions shown on pg.11,visual aid? dr said yes back pain,we discussed Butrans as an option for those patients with these pain conditions.dr said he'll continue starting patients on Butrans.showed patient info booklet asked dr to focus discussion on application/rotation of Butrans,dr said he did that and has been giving those to patients.focused dr on BWC and commercial plans.gave OxyContin reminder.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	9/23/2011	dr said she started 1 patient on Butrans and patient is doing well.dr said patient was taking tramadol every day for low back pain and wasn't controlled so she thought Butrans would be an option.i asked dr if she had more patients like this to start on butrans? dr said yes.focused dr on BWC and commercial insurance.OxyContin reminder and recommended Senokot-S

PPLPMDL0020000001	Cleveland	OH	44102	9/23/2011	talked to Amol, Pharmacist, discussed Butrans stocking and he's not seen any scripts for butrans. showed visual aid, 5 butrans selling core messages and amol focused on once weekly dosing option and transdermal delivery. talked to amol about insurance coverage for Butrans. asked Amol if he will recommend Butrans to patients that are taking short-acting opioids but not controlled and give them Butrans patient info booklets? Amol said yes. discussed OxyContin stocking. recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	9/23/2011	talked to dr about patients with pain conditions. pg. 11 visual aid, that he treats and considering Butrans for them. dr said he hasn't thought about Butrans, keeps forgetting but knows its transdermal and its an opioid. talked about 5 core selling messages, dr talked about transdermal delivery and once weekly application. asked dr if he had a few patients with conditions like we discussed that he could start on Butrans? dr said he might. focused dr on BWC and commercial insurance plans. talked about OxyContin as an option for patients, discussed some conversions in conversion guide and showed formulary grid. dr said he has a lot of patients on
PPLPMDL0020000001	Mayfield Hts	OH	44124	9/23/2011	I asked doc what he does for patients that might be taking tramadol ATC for persistent pain and max doses no longer work as well. He said it depends, maybe he send them to pain mgmt. I reminded him that Butrans might be a good option for those patients. Discussed the 7 day delivery, CII status, and dosing. He asked about coverage. Reminded him of the BWC coverage and asked him to try butrans for one of his BWC patients. <font color=
PPLPMDL0020000001	Euclid	OH	44119	9/23/2011	added notes on 10/10/2011</b></font>Thank you for the clarification. First he has to be sold on the product. If not, insurance coverage won't matter, because he won't try it.
PPLPMDL0020000001	Euclid	OH	44119	9/23/2011	Met with pharmacy Mgr, Nagy Ramzy. He said that it is the Cleveland clinic system policy not to meet with drug reps. I was able to introduce him to butrans - discussing the key selling messages: 7 day delivery of buprenorphine, CII status, indication, and dosing. He said that I can leave info. Left him an oxycontin dosing card and butrans initiation guide.
PPLPMDL0020000001	Garfield Hts	OH	44125	9/23/2011	SPoke to Dave about the stock and movement of butrans. He said he still has it but not seeing any scripts for it. He said that this area is kind of "funky" when it comes to products like butrans. Also, they get a lot of medicare and medicaid. I discussed the commercial insurance plans and savings cards/relay health. He said he still has a steady flow of oxycontin (regular customers). After the reformulation, many people were switched to Opana ER. He believes because of the street value of Opana ER. I explained that we (Purdue) don't want patients that are diverting these meds.
PPLPMDL0020000001	Euclid	OH	44119	9/23/2011	Opened call by asking Dr Sadowski why he wouldn't prescribe Butrans if a patient had a chronic issue causing pain was not being well-controlled on tramadol. He stopped & said, "I had a patient... Is it covered on Medicaid?" I told him about prior authorization requirements. He said he thought Butrans would be a good option for this patient who fit the description I mentioned but that patient has Medicaid. He said he might have Deena do the prior authorization for it. He asked me for something with the Butrans name on it so that he could remember to do this. I gave him a reminder leaver & Deena also said that she has Butrans items placed all around the office for him. Discussed dosing, CII & abuse/addiction potential. Reminder message for OxyContin for patients beyond range of appropriate Butrans patients. Deena said she knew it would be a matter of time before he thought of a specific patient. I let her know I would return to follow-up on this.
PPLPMDL0020000001	Lyndhurst	OH	44124	9/23/2011	Window call....reminded doc of the butrans patient type and key selling messages. Provided formulary grid and FPI. Nothing learned.
PPLPMDL0020000001	N Royalton	OH	44133	9/26/2011	Invited HCP to the 10/20 butrans speaker program. Explained that its an opportunity to learn about patient selection through case studies such as those patients on maximum doses of tramadol. She asked that I remind her as the program is still a few weeks away. Told her that most of her patients would likely start on the 10mcg. <font color=blue><b></b></font>CHUDAKOB's query on 09/29/2011</b></font>This is not a next call objective. How will following up on a speakers program advance the sales process? This is a next call activity. <font color=green><b></b></font>SIMERTOC's response on 10/07/2011</b></font>Its going for a "close". Closing her on attending a program gets her that much closer to prescribing the product. <font color=blue><b></b></font>CHUDAKOB added notes on 10/10/2011</b></font>Perhaps, but your ability to close her for action will get her to prescribe to the product even
PPLPMDL0020000001	Parma	OH	44129	9/26/2011	Spoke with pharmacist Matt & inquired about his dispensing of Butrans. He said that he has dispensed it & that they have "a couple" patients on it. He said they stock the 5mcg strength. Gave him information on upcoming pharmacist webinar & asked him to log on to the interactive program. Also reviewed Butrans appropriate patient type. Offered savings cards & he accepted. Discussed card usage & eligibility requirements.
PPLPMDL0020000001	Independence	OH	44131	9/26/2011	Dr Taylor said that she has been out of the office for two weeks & is just returning. She said she is frantically trying to learn her new computer system & it was not a good time for a discussion. Reminder of appropriate patient type for Butrans, focusing on patients who are established & who are not well-controlled on their short-acting opioid. She said she is keeping Butrans in mind but just has not seen any patients for a few weeks so she is just now getting back into things. Also reminder for OxyContin for patients beyond Butrans as a q12h option. Dr Taylor said to come back next week so that we could discuss everything further. I agreed.
PPLPMDL0020000001	Cleveland	OH	44106	9/26/2011	Dr Rutkowski said he is still keeping Butrans in mind & he pointed to the Butrans savings cards as he walked past me. I handed him a Portal invite with an initiation/titration guide & asked him to at least review the initiations guide to familiarize himself with the appropriate patient type. He said they would have a look.
PPLPMDL0020000001	Parma	OH	44129	9/26/2011	talked to dr about pg. 11, visual aid, discussed pain conditions and how Butrans could be appropriate for his patients with these conditions. asked dr if he treats these pain conditions? dr said yes but he treats these conditions with short-acting opioids. dr said he's not a big writer of long-acting opioids so he's not sure of Butrans. asked dr what concerns he has about long-acting opioids? dr said he's not sure off hand just doesn't have a lot of experience with long-acting opioids. showed dr Butrans visual aid, discussed MOA of Butrans, appropriate patients and initiation of Butrans. asked dr if he has a few patients, with pain conditions we discussed, that he could start on Butrans? dr said he might and will think about it. focused dr on commercial plan patients and use of Butrans patient savings cards. OxyContin reminder. recommended Senokot-S
PPLPMDL0020000001	Beachwood	OH	44122	9/26/2011	I asked Jennifer what information I could provide to her that would help make her more comfortable with Butrans. She said she was not sure. I asked if she would be comfortable enough to continue someone on it if they came to her already on it. She said yes & that she has noticed it on more patients' OARRS reports lately. She asked how she would change someone who "likes" taking pills every few hours. I asked what she meant by "liked". She said someone who is used to taking pain medication multiple times per day orally. I told her it depends on what kind of medication dose they are already on. She said she is just wondering how she would switch someone to Butrans if they are taking Vicodin plus tramadol for breakthrough plus other medications. I told her that patient may be out of range for Butrans & showed initiation guide. Discussed importance of appropriate patient selection. Jen said she thinks that if she starts someone on Butrans, it will have to be a new patient because her established patients are on too high a dose. I told her that may be the area for her to focus for Butrans. Discussed importance of discussing Butrans with a patient when prescribing it for the first time & taking the time to counsel them on correct usage. She said she thought it could be worth it. Went through patient education booklets. Discussed ability to take supplemental analgesia in form of opioid or non-opioids. Also gave her new FPI. Ryzolt value card reminder.
PPLPMDL0020000001	Cleveland	OH	44109	9/26/2011	Tricia (MA) said that Dr Malkamaki was busy seeing patients & would be unable to talk to me today. Also attempted to make an appointment but she said he does not do that. Discussed Butrans appropriate patient type & savings cards for Butrans & OxyContin. I asked if they needed any additional cards. She said they were OK on them as Dr Tabbaa has been out, so they have not been going through them very fast. I asked her to give Dr Malkamaki an updated FPI & she agreed.
PPLPMDL0020000001	Cleveland	OH	44195	9/26/2011	dr said he started another patient on Butrans, we talked about patients he started and dr said patients are doing good on Butrans and controlled. showed pg. 11, inclusion criteria, discussed pain conditions where Butrans could be appropriate, talked about initiation of Butrans and focused dr on BWC and commercial plan patients. asked dr if he will start a few patients this week like we discussed? dr said he will do that. OxyContin reminder. recommended Senokot-S
PPLPMDL0020000001	Westlake	OH	44145	9/26/2011	worked neurology dept-left Butrans fpi, initiation guide, patient info booklet, formulary grid and business card for dr kriegler, dr mays, dr spearman, dr stillman and dr mays. Also left OxyContin fpi, conversion guide and OxyContin formulary grid for all doctors. worked pm&r - left same info for Dr.Reddy, Dr.Hou, Dr.Capulong and Dr.Zachary and left OxyContin fpi, conversion guide and formulary grid for all doctors.
PPLPMDL0020000001	N Royalton	OH	44133	9/26/2011	I asked Dr why he has not started a patient on Butrans and he said he just hasn't thought of it and he asked what the managed care is. I asked what type of patient he would start and he said arthritis patient. I showed the inclusion criteria and he does see patients like these. I asked if he has patients on tramadol who are not well controlled and he said he does sometimes. We discussed Butrans as an option instead of going to vicodin around the clock. I reviewed managed care for Butrans and the savings cards. I asked him to just try a few patients like the ones we discussed and He said he will think about it. Reminder that OxyContin is still an option when Butrans may not provide adequate analgesia.
PPLPMDL0020000001	Lakewood	OH	44107	9/26/2011	(Visited this office on recommendation of Dawn & Karen at Cleveland Back & Pain). Spoke with MA Joanie & introduced myself & Purdue's products. She gave me office protocol/rules & put me on the lunch cancellation list. Discussed Butrans overview/5 core messages & asked if she thought they may be interested in hearing more about it. She said she thinks so. I asked her to give them Butrans information & she agreed. She said they would not accept samples or savings cards for products until they have been detailed on them.
PPLPMDL0020000001	Lakewood	OH	44107	9/26/2011	Quick follow up, I showed the inclusion criteria and reminded him of the patients we discussed last time we spoke. I asked if he still had the patients in mind that he told me about and I asked if he would still try them on Butrans. Reminder about commercial insurance.
PPLPMDL0020000001	Lakewood	OH	44107	9/26/2011	I showed the inclusion criteria and asked how many patients he will see like this today. He said he does see them. I asked if he would try Butrans for these patients when tramadol is not controlling their pain and he agreed. Reminder to focus on commercial insurance and the savings cards and that OxyContin is still an option for Med D AARP patients.
PPLPMDL0020000001	Lakewood	OH	44107	9/26/2011	Quick call, I showed the main vis aid cover and asked if he had patients taking tramadol around the clock that might benefit from 7 day dosing. He said he would keep it in mind.
PPLPMDL0020000001	Lakewood	OH	44107	9/26/2011	I asked Dr about the united health care patient she was trying to get Butrans for. She said that she was trying to get the prior auth and she thinks it went through. We discussed the savings cards and managed care for Butrans. Reminder that OxyContin is an option that is covered on most commercial plans as well.
PPLPMDL0020000001	Cleveland	OH	44106	9/26/2011	worked pm&r dept; worked family medicine dept - left Dr.Truax and Dr.Marsh Butrans fpi's, initiation guides, patient info booklets, formulary grids and my business card.
PPLPMDL0020000001	Beachwood	OH	44122	9/26/2011	Quick call- Positioned Butrans for patients taking 300mg tramadol per day for pain caused from a chronic condition such as spondylolysis, spinal stenosis, or arthritis. He thanked me & said he would keep it in mind.
PPLPMDL0020000001	Westlake	OH	44145	9/26/2011	We reviewed the case studies in the initiations presentation. I asked the Dr which of these patients he sees most often and he said probably the 1st patient taking a high dose of tramadol. He knew that this patient would need to start on the 10mcg Butrans. He said he would not even want his patients to get to 6 tramadol per day as he feels it is too much. I asked if he would start a patients like this on Butrans and he agreed. He said that the biggest problem with Butrans is cost. He said one patient said that it was over \$350, he did not remember which plan. We discussed Butrans savings cards and managed care coverage. Reminder that OxyContin is still an option that is covered on Med D AARP. (Amy getting married Oct 8th)
PPLPMDL0020000001	Cleveland	OH	44102	9/26/2011	talked to Vince, Pharmacist, about Butrans stocking, no scripts for Butrans yet and he's not ordering Butrans until he see's 1st script. asked Vince if he provides patient counseling? Vince said yes. asked Vince if he will recommend Butrans to any patients that he provides patient counseling to where patients have chronic pain and are taking short-acting opioids daily but aren't controlled, and give them Butrans patient info booklets to speak with their doctors about Butrans? Vince said he will do that, he won't recommend Butrans to doctors, that's their decision about opioid choices but he will give booklets to patients. we talked about insurance coverage for commercial plan patients and BWC. discussed OxyContin being an appropriate option for patients, showed conversion guide and discussed a few conversions from short-acting opioids to OxyContin and gave Vince the conversion guide. confirmed stocking and discussed OxyContin formulary coverage. recommended Senokot-S
PPLPMDL0020000001	Northfield Center	OH	44067	9/26/2011	Spoke with technician as Kate was unavailable. Presented to her Butrans patient information booklet & asked if she ever gets questions from customers about their medications. She said generally the pharmacist handles all of those. I asked if transdermal products generate questions usually. She said sometimes. Discussed how the booklet can be used or given to the customer for them to read & this possibly helping to save some calls back to them. She said she thought they were useful. Also discussed savings via e-voucher for Butrans & savings cards for OxyContin. She said she would give this information with the updated FPI to Kate.
PPLPMDL0020000001	Lakewood	OH	44107	9/26/2011	Dr said that the main plan that he has been having trouble with is humanna, I asked how much of this plan he has and he said he feels like he sees a lot. I asked him if he sees Medco, Med Mutual or Anthem and he said he does. I let him know that Butrans is covered for most commercial insurance and I hope he will continue to start new patients. He said he will continue to try new patients with the right managed care. Reminder that OxyContin is covered on Med D AARP plans.

PPLPMDL0020000001	Cleveland	OH	44130	9/27/2011	Spoke with Jessica (pharmacist). She confirmed stocking of Butrans 10mcg strength x1 box. She said she has not dispensed any herself & hasn't heard much about it. Reviewed with her Butrans indication, dosing, usage, & delivery system. I gave her Butrans pharmacists' webinar information & discussed interactive nature of the program. She said it sounded interesting. I encouraged her to register ASAP. Discussed appropriate patient type, focusing on those who are on low doses of Vicodin or tramadol chronically who are not well-controlled. She agreed that Butrans sounded like a good option. Discussed OxyContin savings cards. She said she did not need any.
	Cleveland	OH	44109	9/27/2011	talked to Ray, Pharmacist, about Butrans 5 core selling messages and asked if there have been any scripts filled here yet for Butrans? Ray hasn't seen any Butrans. I asked Ray what features of Butrans stood out to him? Ray said transdermal delivery and 1 application with once weekly dosing. I asked Ray if he provides patient counseling to those taking opioids? Ray said yes they do that sometimes. I asked Ray if he would give patients a Butrans patient info booklet if they have chronic pain and are taking opioids daily but not controlled and asking for another option? Ray said yes he will do that. I talked to Ray about Butrans insurance coverage for commercial plan patients and BWC. Discussed OxyContin stocking and appropriate patients for OxyContin, gave conversion guide and discussed formulary coverage for OxyContin, recommended Senokot-S
PPLPMDL0020000001	Parma	OH	44134	9/27/2011	I asked Dr Hernandez if his Butrans patients are requesting refills/repeat prescriptions for it. He said they are. He added that if it works for someone, which is does for most, they want to stay on it. I asked him if he typically uses the 5 & 10mcg patches. He said that he actually often tells patients to put one on & cut one in half & use that too. I told him this is not recommended & has not been studied. He said he knows but it is working for his patients. I asked him if he still finds OxyContin to be a good medication. He said he does. He said that it is not for everyone, but that it does help the right patients. I agreed that appropriate patient selection is important & that it is not for everyone. He said he likes it because it is dosed q12h & can be used long-term, unlike Percocet which he said is only supposed to be used for two weeks. I asked if he would continue to look for appropriate patients for Butrans & OxyContin & he said yes. He asked again about being a Butrans speaker. I told him I can submit his name.
PPLPMDL0020000001	Cleveland	OH	44130	9/27/2011	Dr Plecha said that he does think Butrans is an interesting option, he is concerned with cost, as he would consider one of his Vicodin patients for Butrans. I asked what type of cost he was asking about & if the patient has insurance. He said it is a cash-pay patient. Showed cost information sheet & agreed that Butrans may not be an option for some cash-paying patients. He said that the patient takes 3 Vicodin per day. I told him this sounded clinically like an ideal patient. I asked if he had any patients with insurance like that & he said not really. He asked where Butrans stands on formulary in the hospital. I asked if he saw a place for it in the hospital setting. He said that he does in hospice. He added that if it were to be utilized there. It would get more physicians behind it. I asked who at the hospital to speak with regarding getting Butrans on formulary. He said the pharmacist, David, may be useful, as well as Dr Sfeir & Dr Peleg. He said Dr Sfeir is pain management there & Dr Peleg serves on the P&T committee. I agreed to work on seeing these people for more information. Discussed OxyContin q12h as an option for appropriate patients beyond Butrans. He said he does have two patients on it & it seems to be effective for them, but he generally does not like to do chronic narcotic therapy. Discussed importance of appropriate patient selection for all opioids.
PPLPMDL0020000001	Independence	OH	44131	9/27/2011	I asked Dr Sundaram where ideally he saw Butrans being used in practice. He said ideally, it would be for a patient after tramadol. He added that it would not be for patients who are already on high doses of something like OxyContin or Duragesic. I agreed that if a patient is not well-controlled on tramadol, they may be a good candidate for Butrans & added that it sounds like he really understands where Butrans should be positioned. He said that unfortunately for me, most of his patients are either on nothing at all or are on high doses of opioids already. He also said he worries about cost as most patients can get tramadol or Percocet for \$4 per month. I agreed that Butrans would cost them more, but asked him if he thought patients with commercial insurance might be willing to pay around \$15 for pain relief. He said yes. Discussed importance of appropriate patient selection & reminded him of OxyContin 7 tablet strengths.
PPLPMDL0020000001	Cleveland	OH	44124	9/27/2011	Window call.... Asked doc if he sees any merit to a product like butrans - CII narcotic in a 7 day transdermal. He said many of his patients need something stronger. I explained the indication for mod to severe pain and asked him to think of butrans for patients that have filed on tramadol. He said we'll see.
PPLPMDL0020000001	Cleveland	OH	44195	9/27/2011	worked pm&r/spine-left Butrans pfj/initiation guide, patient info booklet, formulary grid and my business card for Dr. Schaefer and Dr. Frost, left same info for Dr. Long, Patty Paczos, PA, Dr. Calabrese, Betsy Kirschner, NP and Dr. Chatterjee - couldn't see any doctors have to leave info at receptionist desk left same info as above for Dr. Weiss, Internal medicine
PPLPMDL0020000001	Cleveland	OH	44130	9/27/2011	Positioned Butrans for patients who are not getting adequate pain control from their short-acting therapies. Asked him to, if appropriate, switch patients to a different molecule rather than increasing the amount of medication they are already not doing well on. He said he will remember that. OxyContin savings card reminder. Placed Portal invite on his desk.
PPLPMDL0020000001	Highland Heights	OH	44143	9/27/2011	Spoke to Debbie about the stocking/volume of butrans. She still has not seen any scripts for it. Told her that I spoke with the fill in pharmacist previously. I explained the positioning of butrans and the savings cards - available online and through relay health.
PPLPMDL0020000001	Lakewood	OH	44107	9/27/2011	I asked Dr if he has more patients he can start on Butrans like the ones we talked about in the inclusion criteria. He said that he will think about Butrans as an option and try to think of some more patients. I reminded him about the use of short acting for supplemental analgesia. Reminder that OxyContin is still an option when Butrans does not provide adequate analgesia.
PPLPMDL0020000001	Cleveland	OH	44130	9/27/2011	Followed up with Dr Fedorko on the Butrans program to get his feedback. He said he had no time today & only remarked that the program was "great". He added that he "just does not have anyone to put on it right now".
PPLPMDL0020000001	Cleveland	OH	44121	9/27/2011	Asked doc if he has patients that are not satisfied taking tramadol ATC. He said he does not know if "satisfied" would be the word. I explained that butrans might be an option for their ATC. Reminded him of the once weekly application and can be called in/refilled similar to tramadol. He said but its not covered on medicare. Gave him a formulary grid and asked him to try one commercially insured patients.
PPLPMDL0020000001	Westlake	OH	44145	9/27/2011	I showed the inclusion criteria and I asked his thought with using Butrans for these types of patients. He said that is most of his patients, and he feels good about trying Butrans for those types of patients, I asked if he had some new patients that he could start this week and he said he will let me know.
PPLPMDL0020000001	Cleveland	OH	44143	9/27/2011	Quick call.... I showed doc the formulary grid and ans asked him to prescribe butrans for patients with these plans and most patients can get butrans for about \$15/mo with a savings card. He told me to give them to Angela.
PPLPMDL0020000001	Cleveland	OH	44113	9/27/2011	Confirmed that she still has some.
PPLPMDL0020000001	Cleveland	OH	44113	9/27/2011	dr said he's looking every day for patients that he can start on Butrans but unless patients ask for something else, he's not going to suggest Butrans. showed pg.11, visual aid, talked about pain conditions, dr focused on back pain patients. dr said he see's a lot of back pain since he has so much BWC here. I asked dr to start a couple of BWC patients, with back pain, on Butrans, this week that arent controlled on short-acting opioids, dr said he will keep looking for patients and dr said the patient info booklet is helping him to discuss Butrans with patients so leave more booklets. focused dr on BWC. OxyContin reminder. recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44113	9/27/2011	talked to dr about pain conditions, pg.11 visual aid, that he treats in practice. dr talked about patients with back pain, showed clinical trials with opioid naive and experienced patients and asked dr if he had a few patients in practice with low back pain that arent controlled on short-acting opioids? dr said he didnt know off hand but might, showed initiation and titration info, for Butrans, and dr asked about insurance coverage. focused dr on commercial plans and dr said he'll think about it this week and talk to a few patients. gave dr Butrans patient info booklet to discuss with patients, dr liked that and said he thinks this will help in educating patients. OxyContin reminder and recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44114	9/27/2011	talked to John, PA, about patients with pain conditions, pg.11 visual aid, they treat in office. John talked about patients with back pain as they see a lot of BWC patients who have back pain. John said he's continually working with dr marshall to identify patients for Butrans. I asked John who is appropriate for Butrans? John said patients taking immediate release opioids daily, for a chronic pain condition, yet not controlled and asking him for something else. showed initiation of Butrans info and asked John to focus discussions with patients on application/rotation of Butrans and give patient info booklets. John said he will do that and they have been giving booklets out. John said he thinks there was another BWC, maybe self-insured though, that tried to get Butrans at pharmacy and it was rejected. we talked about BWC and commercial plan coverage for Butrans. recommended Senokot-S
PPLPMDL0020000001	Westlake	OH	44145	9/27/2011	I asked if he would start a few new Butrans patients today and he said he would. I spoke with Megan and she said that Jenny said it would be find to put out the Butrans patient information at the Westlake office. She said managed care has been going smoothly.
PPLPMDL0020000001	Cleveland	OH	44105	9/27/2011	dr said she keeps forgetting about Butrans other than its a transdermal medication, dr asked me to review everything again with her. we discussed 5 Butrans core selling messages, dr said she likes the once weekly application if patients remember to rotate patch. showed dr Butrans visual aid, pg.11, discussed pain conditions where dr can start patients on Butrans, dr said ok she will talk to some patients and see if patients are interested in wearing a patch. showed initiation and titration info in visual aid, gave initiation/titration guide and showed dr Butrans patient info booklet and asked dr to focus on application/rotation of Butrans, dr said she will do that. focused dr on BWC and commercial plan patients to start on Butrans. OxyContin reminder and recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44114	9/27/2011	dr said she started a BWC patient on Butrans this am, we talked about patients taking tramadol daily for their chronic pain and not controlled and how Butrans could be an option right there after tramadol instead of converting patients to vicodin. dr said she knows she's not doing that but its because she isnt seeing a lot of "new" BWC cases. I asked dr about her patients she's been treating for years with some of the pain conditions shown on pg.11, visual aid, that are taking tramadol daily and arent controlled, dr said she doesnt have any patients like that, they are all controlled and she isnt getting patients calling in early monthly for refills because her patients know her policy on that, she wont refill early. told dr that if she has 1-2 patients this week, like we discussed, who happen to say they need something else, other than tramadol, will she start them on Butrans instead of converting them to vicodin? dr said she will do that if she hears that from patients. talked about patient info booklet and dr said she gives booklet and follows up with patients 2 weeks after starting on Butrans, dr talks to patients about titration and side effects when they leave office with script but she wont titrate Butrans dose until she see's patients at 2 week follow-up appointment. dr said she thinks a lot of patients dont want to try Butrans because its a patch and for some reason they just dont believe a patch will work well. asked dr to focus on BWC and commercial plan patients. OxyContin remindr
PPLPMDL0020000001	Cleveland	OH	44114	9/27/2011	dr said he's starting more patients on Butrans, the patients taking percocet every day and not controlled are the patients he's starting on Butrans. I asked dr at what point is dr following up with patients about side effects, titration of Butrans etc, after they leave office with that 1st script? dr said 4 weeks he see's patients again. dr said if patients have side effects they will call him but he's not heard anything from patients so far, so he's happy. I asked dr if he addresses titration before patients leave office? dr said no, he either starts patients on Butrans 5mcg or 10mcg and they have percocet for breakthrough so he wont increase Butrans dosage strength until follow-up appointment. I asked dr if he had BWC and commercial patients coming in this week that he can start on Butrans? dr said he's sure he will and he'll continue prescribing Butrans. OxyContin reminder and dr said he's not started anyone on Butrans and could only remember the name and that it was a transdermal medication. showed dr Butrans visual aid, 5 core selling messages and discussed with dr, dr talked about 1 application, 7 days buprenorphine delivery and thinks he might have a few patients that would like to try Butrans. showed dr Butrans initiation and titration info in visual aid, asked dr if he could start a few patients this week to gain clinical experience with Butrans? dr said yes he will talk to some patients and see if they are interested in trying Butrans. dr asked about insurance coverage for medicaid patients? focused dr on commercial plans and BWC. OxyContin reminder and recommended Senokot-S
PPLPMDL0020000001	Parma	OH	44129	9/27/2011	Spoke with nurse Lynne who said that she knows that Dr Gallagher did prescribe Butrans for a patient but she could not think of who. She said it was not a good time to catch him because he has been on vacation, so he is really busy. She said she believes that the patient did want a refill & that the physician who was covering for Dr Gallagher would have been the one to prescribe it for her. I asked if I could follow up within the next week or two to find out more information & she said that would be great as she believes Dr Gallagher is interested.
PPLPMDL0020000001	Cleveland	OH	44130	9/27/2011	Reminded Dr Rogers of our previous Butrans discussions where he had expressed interest in trying it for some of his patients. He said he had forgotten but still thinks it is a good option. He said that while he does prescribe opioids for patients, & believes in using long-acting opioids for chronic conditions, he does not have a lot of patients that would fit the indication. I agreed that Butrans is not for everyone. He said he always worries about abuse & addiction when putting anyone on any narcotic. I agreed that he should be cautious & advised that he should be just as cautious with Butrans as it is a CII opioid. I asked if he thought any patients may benefit from an opioid dosed once weekly & he said yes. Reviewed initiation guide & showed that each month's supply of Butrans is 4 patches. He said he likes this feature. Also reviewed managed care/cost & savings cards for Butrans & followed up with Deb about the patient who she had told me she put on Butrans last week. I asked about any feedback she has received. She said she has not yet seen the patient back & added that she will see that patient on Friday for follow-up. She said that she is really hoping that the Butrans is working for her & that usually he calls if anything is not going as planned. She asked for my card & said she would call me when she speaks with the

PPLPMDL0020000001	Cleveland	OH	44104	9/28/2011	dr said she's not started any patients on Butrans yet but she knows who the patient is and understands the medication. asked dr who is the appropriate patient for Butrans then? dr said patients taking a couple tramadol, vicodin or percocet, that arent controlled and are asking her for something else. told dr that was great she knew that and showed pain conditions, pg.11 visual aid, asked dr to focus on 1 or 2 pain conditions she treats often, dr focused on back pain patients. i asked dr if she could think of 1 or 2 patients this week, with back pain that arent controlled on short-acting opioids and start them on Butrans? dr said she will do her best and see if any patients complain to her about their short-acting opioids and ask for something else. showed dr Butrans fpi, noting that dr can give immediate release or non-opioid therapy with Butrans, dr said ok. focused dr on commercial plan patients. talked about OxyContin being an appropriate option for patients, dr said she has 1 patient on OxyContin and likes it that way, dr said she doesn't really write long-acting opioids for patients. showed formulary grid for OxyContin and recommended Senokot-S
	Cleveland	OH	44120	9/28/2011	talked to Marc, Narcotics Buyer/Pharmacist who is new here, about Butrans stocking and Marc said they are still seeing Butrans scripts and have been ordering/stocking Butrans. we discussed Butrans 5 core selling messages, Marc focused discussion on 1 application, 7 days of buprenorphine delivery. i asked Marc if he provides patient consultation, for those taking opioids daily for chronic pain? Marc said yes they do that here. i asked Marc if he would give patients Butrans patient info booklets, and have patients discuss Butrans with their physicians? Marc said yes he would do that. we discussed Butrans formulary coverage and discussed appropriate patients for OxyContin, stocking of OxyContin and formulary coverage for OxyContin. recommended Senokot-S
PPLPMDL0020000001	Parma	OH	44129	9/28/2011	Reviewed Butrans with Dr Kushnar (indication, usage, dosing) to refresh her memory. Discussed appropriate patient type, focusing on patients who she is either ready to start on opioid therapy/after NSAID's or COX-2's or who are already on 3-4 tramadol or Vicodin per day. i asked her how often she sees patients who fit the indication. She said she actually had a female patient yesterday who is taking two tramadol per day for pain & who she thinks may appreciate a once weekly dosing option in transdermal form. i told her that sounded like an ideal patient to consider for Butrans. She asked how to start that patient. i showed her initiation guide pg 6 & discussed initiation on 5mcg system once weekly. Discussed titration after 72 hours if necessary & the ability to take short-acting opioids or non-opioid medication with Butrans if necessary. Let her know this may be especially helpful for the first three days of treatment. Discussed savings cards for those eligible. She asked me if i could give her one care for the patient who she saw yesterday. i told her i had to leave them in packages of 5 & she agreed to take one pack. She said this particular patient should be back next week, so she is planning to put that patient on Butrans at that point. Also discussed OxyContin for patients beyond range of those appropriate for Butrans. dr was busy but said he's starting more patients on Butrans. dr said he knows who the appropriate patients are for Butrans, patients taking low doses of short-acting opioids. dr said he has patient info booklets and savings cards at main campus so he was good for now. asked dr to continue starting more patients on Butrans and to consider patients with pain conditions, pg.11 visual aid, that were included in Butrans clinical trials, dr said ok he will do that. recommended Senokot-S
PPLPMDL0020000001	Parma	OH	44129	9/28/2011	Spoke with Fred (pharmacist) & reminded him of Butrans appropriate patient type, focusing on those who get chronic tramadol or Vicodin who call too soon for refills or say it is not lasting long enough. Discussed Butrans as a potential option for those patients. Reviewed that it is CII opioid & still carries abuse/addiction potential. Gave Fred information on Butrans pharmacists' webinar & encouraged him to log-on. Also gave him an updated FPI & showed him pk profile of three patches administered consecutively every 7 days. He pointed to the diagram of the patch & said Butrans seems less abusable than fentanyl. i told him we do not have comparative data nor do we suggest that it is any less abusable than any other opioid. i told him i ask prescribers to be just as cautious with Butrans as they would be with any other opioid. He said that was good. Reviewed OxyContin savings cards which he said they still do not stock.
PPLPMDL0020000001	Maple Heights	OH	44137	9/28/2011	Spoke with Jessica (pharmacist) & introduced Butrans to her as she had not heard much about it. She said she thinks she has dispensed it a few times. Reviewed indication, dosing, CII, & abuse/addiction potential. Also spent time going over the appropriate patient type & importance of appropriate patient selection. Discussed ability to take supplemental analgesia with Butrans. She said that was good to know. Gave her information sheet on pharmacists' webinar in October & encouraged her to log on. Also gave her an updated full prescribing information. Asked if she needed any OxyContin savings cards. She said she thinks the only customers they have who get it are on Medicaid & pay only \$2, so they did not need any.
PPLPMDL0020000001	Bedford	OH	44146	9/28/2011	Spoke with pharmacist Matthew & reviewed Butrans with him. He said he knew very little about it. Discussed one application providing seven days buprenorphine delivery. He said that was surprising. Reviewed indication, dosing, CII, & abuse/addiction potential. Discussed the importance of appropriate patient selection & reviewed what the appropriate range of Butrans patients would be. Also gave him information on October pharmacists' webinar & encouraged him to log on. He asked if it gave CE's & i told him it did not but encouraged him to log on anyway. Also gave him updated FPI.
PPLPMDL0020000001	University Hts	OH	44118	9/28/2011	Quick call...reviewed the butrans indication and the 7 day delivery in a CII narcotics. i asked doc if he has these types of patients in his practice. He said sure. i asked him to try butrans for one patient this week. Reminded him that it is covered on BWC.
PPLPMDL0020000001	Parma	OH	44129	9/28/2011	Stopped in to follow up on Butrans. Debbie (MA) said that Dr Chagin has not been in all week. They said he should be returning tomorrow. i asked if she has heard any feedback from Butrans or knows if he has prescribed it since he had indicated at breakfast that he was going to. She said she has not heard any feedback herself & she was out of the office for awhile as well, so she is not sure. Reviewed savings cards with her & asked her to be on the look-out for feedback or information about Butrans. She agreed. She said to stop back tomorrow or next week to see Dr Chagin.
PPLPMDL0020000001	Cleveland Heights	OH	44118	9/28/2011	i introduced butrans as a CII offering 7 day delivery of analgesia in a transdermal system. He said he still has not seen any butrans but he just filled an oxycontin script. He still has a few steady customers on oxycontin and stocks the basic strengths. i explained the insurance coverage and the savings cards. He sees a lot of medicare/medicaid and does participate in the relay health program.
PPLPMDL0020000001	Parma	OH	44129	9/28/2011	Spoke with Anna & Jaz (MA's) who said that Dr Gigliotti was out of the office today. i asked if either of them had heard any feedback regarding Butrans. Jaz said that there has been at least one that has not been accepted by insurance, but other than that, she has not heard anything. i asked if any of the patients had been in for follow up but they were not sure. Reviewed savings cards with them & asked them to be sure that if a patient leaves with a Butrans prescription, they also get a savings card, but also reviewed eligibility requirements with them.
PPLPMDL0020000001	Lyndhurst	OH	44124	9/28/2011	Asked doc what advantages he sees in a product like butrans - 7 day delivery of a CII. He said he actually wrote one last week. i asked him what strength he wrote. He did not recall. i reviewed the formulary grid. He said he does not consider that when he is with a patient. He has too many reps coming in and can't remember. Told him no coverage on medicare/medicaid. He said he has not heard anything. Told him we like to hear feedback - good or bad. i showed him the demo patch, he touched it, and liked that the entire surface is adhesive.
PPLPMDL0020000001	Mayfield Hts	OH	44124	9/28/2011	i asked doc what advantages he see in butrans. He said he likes that it's a patch. He asked about coverage. i told him no medicaid/medicare but covered on BWC. i showed him the guide and how to initiate patients. Also showed him what the demo 5mcg looks like. He said he will keep it in mind.
PPLPMDL0020000001	Cleveland	OH	44109	9/28/2011	worked rheumatology dept-left Butrans fpi, initiation guide, patient info booklet, formulary grid, portal invite and business card for dr ballou as i couldnt see him today. worked internal medicine dept-same info as above for dr lindheim, dr ricinati, dr falck-tytler, dr harrington, dr eisen, dr gelehrter, dr mcCreery and dr jones. worked family medicine dept-left all of Butrans info noted above for Dr.Forde, Dr.Krofina, Dr.Liu and Dr.Magoulas and left OxyContin fpi, conversion guide and formulary grid.
PPLPMDL0020000001	University Heights	OH	44121	9/28/2011	i asked doc what he thinks about transdermal medications. He asked if it works the same as pills. i explained that there is no head to head data with any other scheduled narcotics but it is a CII similar to vicodin. It can be refilled and called in. i asked doc to try a patient instead of going to vicodin ATC. Nothing more learned.
PPLPMDL0020000001	Cleveland	OH	44106	9/28/2011	asked dr how often does dr hear from patients that are taking percocet that they arent controlled and ask him for something else? dr said probably 2 on average a day, he's at UH 2 days a week. i asked dr if he would take the 2 patients each day that ask him for something else and start them on Butrans? dr said he can do that. focused dr on commercial plan patients to start on Butrans. talked to dr about OxyContin being an option for patients, showed conversion guide and talked about dr still choosing OxyContin when appropriate, dr said he does prescribe OxyContin. recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44106	9/28/2011	worked pain management dept
PPLPMDL0020000001	Cleveland	OH	44104	9/28/2011	dr said she knows about Butrans being an option, she repeated some of Butrans core messages back to me, dr said she couldnt remember if Butrans was a CII or CII, dr said it didnt matter though because she doesnt have any chronic pain patients who are uncontrolled and asking for something else. i asked dr if she would consider patients with back pain or osteoarthritis to be appropriate for Butrans? showed dr pg.11 butrans visual aid, dr said if patients have tried all non-opioid therapies and then tried tramadol, she might consider a long-acting opioid. i asked dr to start 1-2 patients this week, that meet Butrans indication that she could start on Butrans, dr said she will do that if she feels patients are appropriate. focused dr on commercial plan patients. recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44106	9/28/2011	asked dr if he is considering Butrans for his patients that take tramadol daily for their chronic pain but arent controlled and asking him for something else or calling in early every month for refills? dr said if someone reminds him, yes he is doing that, otherwise he just tends to refill tramadol. dr said he likes Butrans, has started a few patients on Butrans and has no problem converting patients from tramadol to Butrans. focused dr on initiation of Butrans, titration info in visual aid and commercial plan patients. talked to dr about OxyContin being an option for patients, dr said he writes some OxyContin likes the medication and feels its appropriate for some patients. recommended Senokot-S
PPLPMDL0020000001	Mayfield Village	OH	44040	9/28/2011	Spoke to TOM about the positioning of butrans - before going to hydrocodone ATC. He said he thinks it would be great for butrans to get bit of that market. He said it has been slow moving though. He has one patient still on it with no problem. Explained the savings card and the commercial coverage.
PPLPMDL0020000001	Bedford	OH	44146	9/28/2011	Quick window call- Dr Haddad said he keeps forgetting about Butrans or when he remembers it, the patient doesn't have the right insurance. i asked him to focus on commercial insurance & positioned Butrans for patients if tramadol is not controlling their pain. He said he will do his best.
PPLPMDL0020000001	Cleveland Hts	OH	44118	9/28/2011	i reviewed the 7 day delivery of butrans and the CII status. i asked doc where he thought he might use it in his practice. He said the problem is the coverage and affording it. i told him that butrans is not covered on medicaid/medicare but well covered on commercial plans. i thoroughly explained the 3rd tier copy and how to use the savings card. He thought of a female patient currently taking vicodin 5mg 4 times/day that might be a candidate. i explained the 10mcg as a conversion dose and the threshold for conversion(>80mg morphine equiv may not be approp). i also informed him of the BWC coverage and he thought of another possible patient. He asked about the use of short acting opioids for breakthrough and he asked about the use of butrans in patients with hepatic impairment. i referred to the FPI and confirmed the use of supplementals and to use caution with hepatic impairment. He said he is going to give it a try.
PPLPMDL0020000001	Cleveland	OH	44130	9/28/2011	i asked Dr Kansal in what types of patients Butrans should ideally be prescribed. He said in the ER. i asked him why, considering Butrans is indicated for chronic pain. He said because the ER is where patients get their short-acting prescriptions for the first time. He said once that happens, they can't be convinced to switch to a long-acting option. i asked them how much time generally elapses between the patient going to the ER & them coming to his office if their pain is persisting. He said the patient comes as soon as their pain medication runs out. i asked him if he would say that is generally within two weeks & he said yes. i asked him if he really thinks that people become so accustomed to taking around-the-clock oral medications in two weeks or less that they would refuse a long-acting option. He said it depends. i asked him to clarify. He said if the patient is experiencing their first injury or experience with pain, he would be more likely to switch them to Butrans because they would not already have the mindset that the oral medications are needed. He said if the patient is one who has had multiple painful experiences, he would be less likely to switch them because to him, those are the patients who would not change to long-acting. i asked him if then, he would at least agree to offer Butrans as an option to each of these patients so that they can make an informed decision. He agreed. Discussed OxyContin q12h<font color=blue>b</font>CHUDAKOB added notes on 10/06/2011<b>b</font>-Nice line of questioning. i am guessing that the ER only provides a few days worth of immediate-release opioids as patient are then asked to follow-up with their physician. Stay persistent. You sold him on one patient.
PPLPMDL0020000001	Euclid	OH	44117	9/28/2011	Quick call...i reviewed the butrans indication, positioning and the CII status. Gave him an invite to the 10/20 speaker program and an initiation guide. Nothing learned.
PPLPMDL0020000001	Bedford	OH	44146	9/28/2011	Dr Moufawad told me again that he is not taking on any new patients for medication. i asked him if this is what he would consider an ideal Butrans patient (a new patient). He said not necessarily. He then said that he just does not want the Medical Board "on him". He went on to say that it seems that every time he does anything, the Board is there to question him about it. i asked him if all these issues have been relating to butrans. He said no, only one instance. He then said he does not understand pharmacologically how Butrans can be used with Percocet. He added that he hopes that the training at our home office will help him in this area. He said in the meantime he will try to identify more patients for Butrans & then walked away.
PPLPMDL0020000001					

PPLPMDL0020000001	Westlake	OH	44145	9/29/2011	Dr's practice is now going to be a pain practice because their patient volume was becoming too low. Dr said that he said that he has been telling patients about Butrans as an option and that patients do not want to give up their pills to try a patch. We discussed starting the patients on Butrans before they are taking vicodin or percocet around the clock and he said he will try to do this. We reviewed the medication guide and savings cards. We discussed that OxyContin is still an option.
PPLPMDL0020000001	Solon	OH	44139	9/29/2011	Spoke with Chris, a floater pharmacist filling in at this location. I asked if they had Butrans stocked. He said he was not sure about this store but he has seen it at most others. Reviewed with him indication, dosing, & delivery system. Also went over appropriate patient type, focusing on patients on tramadol or Vicodin (low dose) chronically, who are calling too soon for refills or who say their short-acting opioid is not controlling their pain. He said that is common. Gave him information on upcoming pharmacists' webinar, encouraging him to log on to the interactive program. Also gave him an updated FPI for his review. Discussed OxyContin savings cards.
PPLPMDL0020000001	Westlake	OH	44145	9/29/2011	I asked Dr who he feels are the appropriate patients for Butrans. He said that Butrans would be for patients before they have to go to other long acting options. I reviewed that patients who have never been on an opioid can start on Butrans and I asked if will start a patient like this. He said that he will. We reviewed OxyContin as an option when Butrans may not provide adequate analgesia.
PPLPMDL0020000001	Parma	OH	44129	9/29/2011	Dr Gigliotti said that he is always "ready" to prescribe Butrans. He showed me the savings cards for Butrans & that he has the initiations guide on the top of his desk. I told him the savings cards do more good in the hands of patients with prescriptions than on his desk. He laughed & said he offered Butrans to a patient yesterday but she did not want it because she did not want to "give up her pills". I asked him if she knew that she did not necessarily have to give them up & discussed supplemental analgesia with him. He said that he did tell her that. I told him that he was doing the right thing in offering it to this type of patient because patients should at least know there is another option out there. He agreed. I asked him to continue to offer Butrans to appropriate patients as an option to treat their pain & he agreed. OxyContin for patients beyond Butrans reminder.
PPLPMDL0020000001	Independence	OH	44131	9/29/2011	Caught Dr Reddy at the window. I handed back an updated Butrans FPI to stop him as he walked by & let him know some changes/additions had been made. He asked me to remind him of what Butrans is again. Reviewed indication, dosing, appropriate patient type. He said he would try to remember & then walked away. Spent time with his MA Kathi reviewing appropriate patient type & range of appropriate patients. I asked if she gets calls frequently from patients on tramadol or even Vicodin who are not being well-controlled on it & she said yes, all the time. I asked her to point them out to Dr Reddy when this happens & remind him of Butrans & she agreed. She asked about insurance coverage so I reviewed commercial insurance with her & discussed savings cards for those patients. Also gave her OTC samples.
PPLPMDL0020000001	Cleveland	OH	44113	9/29/2011	talked to dr about his patients with pain conditions,pg.11 visual aid,dr focused on osteoarthritis and back pain patients and said he has a lot of patients who he could start on Butrans.dr said he hasnt remembered Butrans as he's used to writing tramadol or other short-acting opioids but after talking longer today about appropriate patients,initiation and titration of Butrans,dr said he is going to start patients on Butrans.showed dr Butrans patient info booklet,told dr to focus patient discussion on application/rotation of Butrans,dr said ok and asked how he should write script,showed initiation guide and back page of visual aid with example of Butrans script.dr asked about commercial insurance coverage? dr said they have a lot of medical mutual,anthem and united healthcare,showed Butrans formulary grid,patient savings cards and asked dr if he could start a few patients today and tomorrow on Butrans? dr said yes he will talk to dr about OxyContin being an option for appropriate patients,showed conversion guide and formulary grid.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44103	9/29/2011	talked to dave,pharmacy manager,about Butrans 5 core selling messages and showed visual aid.i asked Dave what features of Butrans stood out to him? DAve said 1 application,7 day analgesic,Dave said he's not seen any scripts for Butrans though so he's not ordering Butrans until he see's that 1st script.talked about importance of stocking Butrans and asked Dave if he would give patients Butrans patient info booklets if they are taking short-acting opioids for chronic pain but not controlled? Dave said he would do that.discussed Butrans formulary coverage.discussed OxyContin stocking,appropriate patients and formulary coverage.recommended Senokot-S
PPLPMDL0020000001	Beachwood	OH	44122	9/29/2011	Introduced myself & Purdue's products to Dr Malkamaki & asked him what his understanding of Butrans is from previous conversations with his other Purdue rep. He said that she (Amy Brooks) has done a good job trying to get him to use it & he remembers that it is a long-acting transdermal system. He said the problem is that as a PM & R specialist, he really tries to stay away from narcotic therapy if at all possible. He added that he has two OxyContin patients who are on 30mg q12h & that is as high a dose as any of his patients are on as far as opioids go. Reviewed appropriate patient type with him, focusing more on the "moderate pain" side & asking him to continue to keep OxyContin in mind for patients beyond the appropriate Butrans range. Discussed patients go. On a 3-4 tramadol or Vicodin per day & showed initiation guide pg 6 & discussed that. Let him know Butrans is a CII opioid with same attendant risks of other opioid medications. He asked me to tell him what CII meant. Told him Rx's could be called in & patients could be given up to 5 refills in a 6 month period. He said that was good. He asked how to tell a patient to use it & said he does actually want to give Butrans a try now that he is really looking at the information & talking about it. I gave him a patient information booklet & reviewed its contents. He said that would be very helpful. I asked if I could follow-up in 2 weeks. He said to give him a month & said that would be fine.
PPLPMDL0020000001	Independence	OH	44131	9/29/2011	Spoke with Jill. Reviewed Butrans dosing, usage, indication, & appropriate patient type. She said she always forgets about it. She asked if it was covered on Medicare or Medicaid. Reviewed formulary coverage for Butrans, focusing on commercial insurance where savings cards can be used. She said they have a lot of patients who fit the profile of Butrans patients but that the insurance plans they see are mostly government. I asked her to give Dr Pal an updated FPI & OxyContin leaver. She agreed. She said Dr Pal would be back in the office next week.
PPLPMDL0020000001	Parma	OH	44129	9/29/2011	Followed up with Dr Chagin from our previous breakfast conversation when he expressed high interest in prescribing Butrans. He said that he has prescribed it for a few people but has not received any feedback. He said he really didn't have time today to talk about it but said to come back another time. Spoke with Debbie & discussed savings cards for Butrans & OxyContin. She said that they still have enough of the cards.
PPLPMDL0020000001	Cleveland	OH	44109	9/29/2011	dr said he's not started any patients on Butrans yet but he knows its available and likes that its a transdermal delivery medication.dr said the once weekly dosing option could be appropriate for some of his patients but right now all of his patients taking short-acting opioids for chronic pain are controlled so no need to change their medication.told dr that if patients are controlled,he shouldnt make any changes,but asked dr if patients ever call in earlier in the month for refills of their short-acting opioids? dr said sometimes,i told dr if thats the case then perhaps a long-acting opioid like Butrans could be an option,dr said that was a good point and he will consider that next time someone calls in earlier for refills.showed dr pg.11,visual aid,discussed a few pain conditions he see's in practice,dr focused on back pain.i asked dr if he had a few patients with back pain that he could start on Butrans? dr said he might but didnt know off hand and would have to think about it.showed dr initiation and titration info,focused dr on BWC and commercial plans.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	9/29/2011	talked to dr about pain conditions,pg.11 visual aid,dr talked about patients with back pain that she treats in her practice.dr said she will try all non-opioid therapies then try a short-acting opioid like tramadol.i asked dr if she would start a couple patients on Butrans,instead of refilling their tramadol? dr said she will do that and has been thinking of Butrans more for patients,showed dr butrans initiation and titration info in visual aid,asked dr to focus on BWC and commercial plan patients.talked about OxyContin as an option for patients,showed conversion guide discussed a few conversions from short-acting opioids to OxyContin,showed formulary
PPLPMDL0020000001	Cleveland	OH	44113	9/29/2011	talked to dr about patients with pain conditions,pg.11 visual aid,that he treats in office and how Butrans could be an option for them.dr said he keeps forgetting about Butrans but does think there's a place for Butrans in his practice.asked dr where Butrans fit in? dr said for people taking a lot of vicodin or percocet he could see himself using Butrans there.i asked dr if he treats patients with back pain,taking tramadol daily,but not controlled,dr said yes,showed initiation and titration sections in Butrans fpi,asked dr to start a couple patients like this on Butrans,dr said he will consider that if patients are willing to wear a patch,talked about patient info booklet,application/rotation section and dr asked about medical coverage for Butrans.told dr to focus on BWC,commercial and tricare patients for Butrans.talked to dr about OxyContin being an appropriate option for patients,showed conversion guide and asked dr to continue finding new patients to start on OxyContin,dr said he will do that.discussed OxyContin formulary coverage and recommended senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	9/29/2011	dr said he started a few more patients on Butrans,we talked about why he chose Butrans,dr said patients were taking tramadol and another patient was taking vicodin every day for their chronic pain but not controlled so he thought Butrans could be a good option.showed dr initiation dosage strengths and titration info for Butrans in visual aid,dr said he brings most patients back to see him after 2 weeks,for a follow-up appointment to discuss the dose of Butrans patients are taking and any side effects.dr said so far its been easy for him to start patients and patients can get Butrans from pharmacies.asked dr if he had more patients like this that he can start on Butrans? dr said yes,he will do that.focused dr on BWC and commercial plan patients.talked to dr about OxyContin being an option for patients,showed conversion guide and briefly discussed some short-acting opioid conversions to OxyContin,asked dr if he will continue starting patients on OxyContin when appropriate? dr said yes.showed formulary grid,recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44113	9/29/2011	dr said he started a couple patients on Butrans this week.asked dr to tell me about the patients he started and why he chose Butrans.dr said these were patients taking 20-25mg vicodin daily and not controlled and he thought he would give Butrans a try.dr said he's definitely thinking of Butrans more for his patients.focused dr on initiation and titration of Butrans,visual aid info,talked to dr about application/rotation info in Butrans patient info booklet to discuss with patients.dr said he gives patients booklets and does talk to them about this info.focused dr on BWC and commercial plan patients to start on Butrans.recommended Senokot-S
PPLPMDL0020000001	Solon	OH	44139	9/29/2011	Caught Dr Zaldi between patients. He said he was sorry that he did not go to the Butrans dinner program. I told him he missed a good discussion & that I thought he could have benefitted from speaking with other pain management specialists about their experience with Butrans. He said he is on the lookout for Butrans patients & then walked away. Spent time with nurse, Julie, going over patient savings cards for Butrans & OxyContin & recommended Senokot-S for opioid-induced constipation. I asked if more samples were needed but she said they did not need any.
PPLPMDL0020000001	Mayfield Heights	OH	44124	9/29/2011	Showed doc the butans demo patch and asked what she remembers about butrans. She said that its longer than fentanyl. I told her that butrans is a CII and delivers analgesia over 7 days. Gave formulary grid and an invitation to the speaker program.
PPLPMDL0020000001	Cleveland	OH	44113	9/29/2011	talked to dr about the 2 patients she started on Butrans,dr said patients have seen improvements in pain levels and are happy.dr said she knows the indication for Butrans,has patients in mind to start on Butrans but biggest challenge is that medical doesnt cover Butrans and she doesnt prescribe a lot of CII medications so she cant meet Prior Authorization requirements for Butrans.asked dr if she had a few patients with commercial insurance that she could start on Butrans? dr said she has small percentage of commercial but will keep that in mind.we talked about every commercial plan patient leaving with a Butrans patient savings card.recommended Senokot-S
PPLPMDL0020000001	South Euclid	OH	44121	9/29/2011	Quick call....reviewed the butrans CII status and 7 day delivery. Provided formulary grid and invitation to speaker program.
PPLPMDL0020000001	Mayfield Heights	OH	44124	9/29/2011	Window call....reminded doc of the proper application and disposal of butrans. I asked if she knew if patients are using the disposal unit. She said she did not know exactly. Gave her a invite to the 10/20 speaker program.
PPLPMDL0020000001	Independence	OH	44131	9/29/2011	Spoke with pharmacist Dave. He said he has not seen Butrans activity at all at his store. He did say they have it stocked. Gave him pharmacists' webinar information & encouraged him to log on to the interactive program. Also gave him a Butrans updated FPI & pointed out changes/additions. Discussed savings & also reminded him of OxyContin savings cards for commercially insured or cash-pay patients.
PPLPMDL0020000001	Mayfield Heights	OH	44124	9/29/2011	Quick call....showed doc the butrans formulary grid and asked him to prescribe butrans before going to hydrocodone ATC. Also gave him a invite to the speaker program on 10/20
PPLPMDL0020000001	Highland Heights	OH	44143	9/29/2011	Window call....I reviewed the butrans formulary coverage, showed grid. I asked him to remember to give a savings card along with each script. He said the girls handle that. I spoke with Meagan who said they did not need any now. Gave doc an invite to the 10/20 speaker program.
PPLPMDL0020000001	Mayfield Heights	OH	44124	9/29/2011	Doc said he did not have much time to talk. I reminded him of the butrans patient indication and patient type. Invited him to the speaker program on 10/20. No commitment
PPLPMDL0020000001	Beachwood	OH	44122	9/30/2011	Spoke with Debbie Macko (nurse manager) in pain management on 2nd floor. Got updated staff information & asked again for any type of appointment with any of the physicians, especially Dr Dmitri, their newest addition. Debbie took my information & said she will ask him Monday if I can come in for a short appointment. Discussed Butrans 5 core messages. I asked if she thought it sounded like something Dr Dmitri & the others would utilize. She said she doesn't see why not, but added that they try to stay away from narcotics whenever possible. I asked if they ever do find that they have to use them & she said yes. Discussed appropriate patient type with her & also discussed savings cards for both products. She said she would let me know about the appointment next week.
PPLPMDL0020000001	Cleveland	OH	44103	9/30/2011	talked to abdul,pharmacist,about butrans stocking they still have butrans in stock but no scripts yet.abdul said he's recommending butrans to patients when he provides patient counseling to those taking opioids.i asked Abdul to continue recommending Butrans to patients,he agreed.we discussed OxyContin formulary coverage,medicalaid and commercial was focus of discussion,talked about appropriate patients for OxyContin and confirmed OxyContin stocking and recommended Senokot-S
PPLPMDL0020000001	Beachwood	OH	44122	9/30/2011	Spoke with Alan who said he has seen some Butrans movement. I asked if he knew where the prescriptions came from but he did not. Gave him an updated copy of the full prescribing information & let him know of additions/changes. Also reviewed appropriate patient type. He asked if I had any savings cards, so I provided one package of Butrans & one package of OxyContin cards. He said they are good about giving those out. He said they are not part of Relay Health's e-voucher system. Discussed eligibility requirements for cards use.
PPLPMDL0020000001					

PPLPMDL0020000001	Warrensville Heights	OH	44122	9/30/2011	Spoke with MA Terri & asked her about Dr Garwood & the residents' prescribing of Butrans since the program. She said she did not know. I asked if any of the savings cards had been used. She said she was not sure of that either. She said it did not sound familiar. I reviewed 5 core messages with her & went over appropriate patient type. I asked her to post an invitation for the upcoming Cleveland dinner program for Butrans in the lounge for all the doctors & she agreed.
PPLPMDL0020000001	Cleveland	OH	44111	9/30/2011	Dr said that he does want to gain more experience with Butrans, I asked what his hesitation is. He asked me to review appropriate patient types and we discussed the initiation guide and inclusion criteria. I asked if he would these types of patients and he said he will.
PPLPMDL0020000001	Parma	OH	44129	9/30/2011	Quick call- Positioned Butrans for patients after tramadol, if the patient has a chronic issue & is saying their tramadol is no longer controlling their pain. Passed back an updated FPI. She thanked me & walked away. Spent time with her nurse, Edie & discussed Butrans 5 core messages & asked if she thought Dr Rossi would ever prescribe it. She said Dr Rossi does have some patients on the fentanyl patch, so she said it was a possibility. Re-visited appropriate patient type with her, asking her about Dr Rossi's patients on the more "moderate" side, perhaps taking a few tramadol per day. Edie said she definitely has those patients. Reviewed once weekly dosing in a transdermal system. Edie said she would try to mention it again to Dr Rossi, especially if she sees or hears from the right patient. Gave OTC samples & recommended Senokot-S for opioid-induced constipation.
PPLPMDL0020000001	Cleveland	OH	44104	9/30/2011	talked to dr about patients with pain conditions.pg.11 visual aid,that he can start on Butrans.dr said he hasn't seen anyone this week to start on Butrans but he is keeping Butrans in mind,dr asked about insurance coverage for Medicaid patients,focused dr on commercial plan patients and discussed PA requirements for Medicaid patients for Butrans.talked about initiation and titration of Butrans and asked dr if he will start a couple patients today and next week on Butrans? dr said if he has patients asking for more short-acting opioids and he's not comfortable refilling their medication then he's talking to patients about Butrans.talked to dr about OxyContin as an appropriate option,showed conversion guide discussed a few conversions and asked dr to continue prescribing OxyContin,dr said he will for appropriate patients.discussed OxyContin formulary coverage and recommended
PPLPMDL0020000001	Maple Heights	OH	44137	9/30/2011	Spoke with Kim who said she has seen no further movement of Butrans since months ago. Gave her information on upcoming pharmacists' webinar & encouraged her to log on & ask questions from a peer. Also gave her updated FPI. Discussed appropriate patient type, including patients who are not well-controlled on short-acting opioid medications chronically. She said she thinks it would be more widely used if Medicaid covered it. Reviewed commercial insurance coverage, e-voucher, & savings cards for Butrans as well as OxyContin.
PPLPMDL0020000001	Cleveland	OH	44103	9/30/2011	talked to Nick,pharmacist and Sonya,pharmacy tech,about Butrans 5 core selling messages and asked if they have recommended Butrans to any patients? Nick said he told a few patients about Butrans and gave the booklets to them.I asked Nick to continue doing that so patients can talk to their doctors,Nick said ok.discussed stocking of Butrans and Nick said they have seen a couple scripts for Butrans,but he doesn't have time to look up who wrote them now.discussed BWC and commercial plan patients for Butrans and asked Nick to focus patient discussions on application/rotation of Butrans,side effects,etc,Nick said he will do that.confirmed OxyContin stocking and discussed appropriate patients for OxyContin,recommended Senokot-S<font color=blue>-b>CHUDAKOB added notes on 10/05/2011</b>-</font>Looks like you are gaining an advocate in Nick. Nice work!
PPLPMDL0020000001	Cleveland	OH	44113	9/30/2011	dr said he's been back in office 1 week,post 3weeks vacation,and hasn't started anyone on Butrans.I asked dr if he had patients with pain conditions.pg.11 visual aid,that are taking short-acting opioids daily and not controlled? dr said yes a lot of patients are like that and appropriate for Butrans.dr said he will start more patients on Butrans.focused dr on BWC and commercial insurance patients.recommended Senokot-S
PPLPMDL0020000001	Warrensville Heights	OH	44122	9/30/2011	Quick call- I asked Dr Brooks if he had received any information in the mail from Purdue regarding his request for materials he could use to present Butrans to the hospital P&T Committee. He said he does not think he has seen anything. I let him know that he should be receiving that information very shortly & asked him to watch the mail for it. He agreed, said he is keeping Butrans in mind, & walked away. Spoke with one of his MA's who said that they did not need additional savings cards of either product at this time.
PPLPMDL0020000001	Northfield	OH	44067	9/30/2011	Spoke with Mercedes & asked about Butrans stocking. She said she has seen no activity on Butrans at all. Reviewed with her the appropriate range of patients & discussed patients who are taking chronic tramadol around-the-clock & who are either calling too soon for refills or who are complaining that the tramadol is no longer controlling their pain adequately. I let her know that I have been discussing it with area physicians & that some have indicated that they plan to prescribe. Gave her an updated FPI for her review. Asked if she needed any savings cards but she did not.
PPLPMDL0020000001	Cleveland	OH	44113	9/30/2011	dale said he's continually starting more patients on Butrans,working with dr shen as she see's 90% of dr daoud's chronic pain patients for medication management.I asked dale if he will start a few patients on Butrans,that have 1 of the pain conditions.pg.11 visual aid,that are taking tramadol daily but not controlled? dale said yes he thinks patients should get started on Butrans even before tramadol so he will recommend patients starting Butrans right after tramadol doest control patients pain.talked about BWC and commercial plan insurance for patients to start on Butrans.recommended Senokot-S
PPLPMDL0020000001	Garfield Hts	OH	44125	9/30/2011	Spoke with Deena (MA) who said Dr Sadowski did not come in today. I reminded her of my last visit & asked if she knew if Dr Sadowski had prescribed Butrans for that patient he had told me about. She said not that she knows of, but he must be close to prescribing, given our last encounter. I asked if Deena could think of any other patients who she thought may be worth recommending to Dr Sadowski. She said she can think of a couple, but most have Medicare. I asked her to please keep patients like those with commercial insurance in mind & to point them out to Dr Sadowski when appropriate. She agreed.
PPLPMDL0020000001	Beachwood	OH	44122	9/30/2011	Quick call- Passed back an updated full prescribing information & October dinner invitation & asked Dr Tabbaa if he thought he might be able to make it. He said he would have to check. He also said he would look at the FPI. He added that he has been prescribing "some" Butrans. I asked him if he could tell me a little more about that but he said he had 3 patients waiting so he did not have time now. He thanked me & walked away. Spoke with Tricia & asked about Dr Tabbaa's nurses' schedules. She said that Jim is not back & may not ever return. She said sometimes Randy will come over from his other location, but he does not do this often. She said to just keep coming Wednesday or Friday afternoons to see Dr Tabbaa when possible.
PPLPMDL0020000001	Beachwood	OH	44122	9/30/2011	Passed back a Butrans dinner program invitation & asked Vickie (nurse) if she thought Dr Yokiell could attend. She said she would check & added that he is still trying Butrans for newer patients. She said that he has been using it "here & there" & told me that Dr Barrett prescribes Butrans a lot with success. I asked if he & Dr Yokiell ever talk about things like that & she said she is not sure if they discuss medications or not. They did not need additional savings cards.
PPLPMDL0020000001	Cleveland	OH	44104	9/30/2011	dr said he hasn't seen any patients recently that are appropriate for Butrans.I showed dr butrans visual aid.pg.11 and discussed pain conditions dr treats in practice.dr talked about patients with osteoarthritis.asked dr to start a couple commercial patients, that have osteoarthritis and meet Butrans indication,on Butrans today and next week.dr said he will do that but majority of his practice is medicare so he's waiting until we have coverage for Medicare patients.focused dr on commercial plan patients and them using patient savings cards.talked about OxyContin being an appropriate option for patients,showed conversion guide discussed a couple conversions with dr and asked dr to continue prescribing OxyContin for patients,dr said he will do that.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44103	9/30/2011	talked to dr for a minute as she isn't allowed to see reps anymore in office,dr said she had plenty of Butrans patient savings cards and booklets and is continuing to start more patients on Butrans.asked dr to focus on titration and discuss side effects with patients before they leave office,dr said ok.focused dr on Commercial plan patients for Butrans.talked to dr about OxyContin being an option for patients,dr said she prescribes a lot of OxyContin still and thinks its a good long-acting opioid.discussed OxyContin insurance and recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44113	9/30/2011	dr said she started a couple patients this week on Butrans,she is seeing clinically significant improvements in patients pain levels that she's started on Butrans,so she's happy with Butrans.asked dr how she addresses titration and side effects with patients? dr said she follows up with patients after 4 weeks,if patients dont call to complain of side effects she doesn't say much about them,I asked dr to give patients Butrans patient info booklets and show side effects info and application/rotation section,dr said ok.I asked dr if she will continue starting more patients like the one's she has started,on Butrans? dr said yes she will.focused dr on BWC and commercial plan patients.talked about OxyContin being an appropriate option for patients,showed conversion guide and talked about a few conversions and asked dr to continue starting patients on OxyContin,dr said she doesn't have many on OxyContin but will do that.recommended Senokot-S
PPLPMDL0020000001	Lyndhurst	OH	44124	9/30/2011	Spoke with HCP about the butrans indication and that moderate patients like those on tramadol or low doses of vicodin. She asked for confirmation that it is not on medicare. Reminded her of no medicare/medicaid coverage. Invited her to the 10/20 speaker program.
PPLPMDL0020000001	Lyndhurst	OH	44124	9/30/2011	I asked doc what current therapy would she likely replace with butrans if she were to prescribe. She said she would like to cut down on vicodin. I confirmed that the is a great place to prescribe butrans. Showed her that 10 mcg would probably be an appropriate dosing for conversion. I asked her to prescribe for commercially insured patients. Provided an invite to 10/20 speaker program.<font color=blue>-b>CHUDAKOB's query on 10/05/2011</b>-</font>Charmaine, don't forget to discuss and record the proper tapering of the patients opioids before starting them on the 10ug Butrans.<font color=green>-b>SIMERTOC's response on 10/17/2011</b>-</font>ok<font color=blue>-b>CHUDAKOB added notes on 10/18/2011</b>-</font>Thank you!
PPLPMDL0020000001	Lyndhurst	OH	44124	9/30/2011	HCP apologized for not making the speaker program. I gave her another opportunity to attend the program on 10/20. She thought that the venue might be more convenient but was unable to commit right now. I discussed the butrans key messages: 7 day delivery and CII status similar to hydrocodone which can be called in or refilled.
PPLPMDL0020000001	Beachwood	OH	44122	10/3/2011	Positioned Butrans for patients with chronically painful conditions who are not being well-controlled on 3-4 tramadol per day. I asked him if he could see himself prescribing Butrans for that patient type. He said yes & asked me to review dosing with him again. Discussed initiation of Butrans 5mcg in that patient & showed initiation guide on how to start patients on 10mcg if they are currently on a higher dose of opioid. Dr Warren said he would think of it for patients like that. Also invited him to Oct 20 dinner program & asked if he thought he could make it. He said he might be able to & that if he can he will register. Encouraged him to attend so that he could interact with other physicians to discuss their Butrans experience.
PPLPMDL0020000001	LAKEWOOD	OH	44107	10/3/2011	Quick call with Pam, we discussed Butrans as an option and appropriate patient types. I asked if she has any patients in mind who might benefit from Butrans. She said she might,but did not think that patients would want to give up their tablets to try something new. We discussed that this could be an option for patients that were not getting adequate analgesia and also the use of supplemental analgesia. Reminder that OxyContin is still an option as well.
PPLPMDL0020000001	Cleveland	OH	44125	10/3/2011	Spoke with pharmacist & reviewed Butrans appropriate patient type, focusing on patients who are taking short-acting around-the-clock opioids chronically & who are not getting relief. I asked if they frequently receive calls from customers requesting refills too soon on these medications. She said that is fairly common. I asked what she usually does & she said she tells them to call their doctor. Gave her a new FPI & showed her pK profile update. Discussed automatic savings via e-voucher for Giant Eagle customers & went over OxyContin savings cards.<font color=blue>-b>CHUDAKOB's query on 10/13/2011</b>-</font>You might consider asking her to hand out a patient information book and have her tell the patient to ask their Dr. about this medication (Butrans).<font color=green>-b>APSEGAS's response on 10/14/2011</b>-</font>Great idea. I will ask her to do this when I return to that store.<font color=blue>-b>CHUDAKOB added notes on 10/15/2011</b>-</font>I hope it works out well.
PPLPMDL0020000001	Lakewood	OH	44107	10/3/2011	Dr said that his current patients on Butrans are doing well, as long as he can get it covered by managed care. I asked what types of patients is he thinking of Butrans for and he said he is thinking of Butrans for patients when they are starting to take 3-4 vicodin per day. I confirmed that this is an appropriate patient for Butrans when they are taking 3-4 5mg vicodin or percocet. I asked I asked Dr if he would start a new patient like the ones we talked about this week and he agreed. Reminder that OxyContin is still another long acting option.
PPLPMDL0020000001	Westlake	OH	44145	10/3/2011	I asked the Dr what the downside would be to trying Butrans in an appropriate patient. He said none. I reviewed the inclusion criteria and asked if he would start a new patient this week. He said he would try.<font color=blue>-b>CHUDAKOB's query on 10/13/2011</b>-</font>Good question! The follow up would be something like "then what is holding you back"?<font color=green>-b>HOLUBA's response on 10/18/2011</b>-</font>Thanks, I will ask him. I have a feeling he concerned about managed care since he usually asks about cost.<font color=blue>-b>CHUDAKOB added notes on 10/18/2011</b>-</font>The question is, do you really think he is sold on the product, because if not, managed care doesn't matter.
PPLPMDL0020000001	Garfield Hts	OH	44125	10/3/2011	Dr Sadowski picked up a Butrans patient information booklet that I had laid out. Discussed patient counsel, application, rotation, & disposal. I told him how useful they become depends on him & him identifying some appropriate Butrans patients. He said he is planning to prescribe it. I mentioned that he had told me about a patient who he thought he would prescribe it for. He said the patient had Medicaid so it would not work out. Discussed coverage & savings cards for Butrans. Reviewed appropriate patient type, focusing on those who he is comfortable putting on an opioid (ie those who are already on an opioid at a low dose around-the-clock) & who are not well-controlled on that therapy. He said that is a patient type for whom he would prescribe Butrans. I let him know that Deena will also help him identify appropriate patients. Showed him demo kit. He said he liked the way the patch felt & he thought it would be effective. Discussed CII & abuse/addiction potential. He said he plans to prescribe. Also positioned OxyContin for appropriate patients beyond Butrans.
PPLPMDL0020000001					

PPLPMDL0020000001	Lakewood	OH	44107	10/3/2011	Spoke with Cindy, she said they have not seen scripts for Butrans. I asked which Drs they see the most chronic pain meds from. She said Dr Neri sometimes as well as the orthopedics. We clarified that the ortho docs tend to prescribe for shorter periods of time and for acute pain. We reviewed the savings cards and managed care for both Butrans and OxyContin. She said they do participate in the e voucher program.
PPLPMDL0020000001	Lakewood	OH	44107	10/3/2011	Spoke with Cindy tech, we reviewed the Butrans medication guide and how to explain proper application. We reviewed the evoucher program and savings program for Butrans and OxyContin. She said that she has seen movement of Butrans and that the savings is automatic for the patients with commercial insurance.
PPLPMDL0020000001	Lakewood	OH	44107	10/3/2011	I asked Dr if he has more patients that he can start on Butrans to give it a fair trial. He said that he will start some more. I asked where he feels Butrans will fit in, he said for patients who are starting to take short acting more often, 3 or more per day. We reviewed starting opioid experienced patients on 10mcg Butrans.
PPLPMDL0020000001	Cleveland	OH	44109	10/3/2011	worked internal medicine - left Butrans fpi,initiation guide,portal invite,patient info booklet,Butrans dinner invite and my business card for Dr.Lindheim,Dr.Ricanati,Dr.McCreery,Dr.Falck-Ytter,Dr.Harrington,Dr.Jones and Dr.Gelehrter,as I couldnt see any doctors - leave info only for doctors and they decide if they want to see reps. worked rheumatology dept - left SAME info as above but left it for Dr.Ballou,Dr.Magrey and Dr.Singer
PPLPMDL0020000001	Lakewood	OH	44107	10/3/2011	I showed the inclusion criteria and I asked if he feels Butrans would be appropriate in these types of patients in his practice. He said that he would, and he will give it a try. I reminded him to focus on commercial insurance with the savings card.
PPLPMDL0020000001	Lakewood	OH	44107	10/3/2011	Dr is in transition of going into private practice. Dr said he has 2-3 patients on Butrans and they seem to be doing well. I asked where he thinks of Butrans and he said as a long acting option before going to other long actings. I reviewed the position of Butrans and asked if he has patients taking tramadol around the clock whose pain is not well controlled. He said he does and agreed to try Butrans. Reminder that OxyContin is an option when Butrans does not provide adequate analgesia. I spoke with Pat, we reviewed managed care for Butrans and she has not had too many issues. She also said that the current patients on Butrans seem to be doing well. She will help remind the Dr that it is an option.
PPLPMDL0020000001	Cleveland	OH	44113	10/3/2011	dr said he's starting more patients on Butrans,he is thinking of patients who are taking 20-25mg vicodin daily and has talked to a few patients about Butrans but patients were hesitant to wear a patch so he gave them Butrans patient info booklets and is following up with them.showed dr pg.11 visual aid,asked dr if he'll see patients this week with these conditions? dr said yes,asked dr if he will start a couple of them on Butrans? dr said he will do that.focused dr on BWC and commercial plan insurance.recommended Senokot-s
PPLPMDL0020000001	Parma	OH	44129	10/3/2011	Quick call- Dr Taylor said she is still sorting things out from being out of town for two weeks. She said she will be keeping Butrans in mind going forward. Positioned Butrans for patients who are not being well-controlled on their short-acting around-the-clock opioid medication or as an option when starting someone on chronic opioid therapy. She said she will look for patients. Also gave her Initiations invitation told her about the case studies on the program. She said she would check it out.
PPLPMDL0020000001	Cleveland	OH	44114	10/3/2011	asked dr if she will see any patients today that have 1 of the pain conditions,pg.11 visual aid,where she can consider Butrans? dr said she probably will see patients with these conditions.i asked dr if she will start patients on Butrans right after tramadol fails instead of starting them on vicodin? dr said she will do that.focused dr on BWC and commercial plans for Butrans patient starts.talked about OxyContin as an option for patients,dr said she only has a few patients on OxyContin and prefers not to prescribe if we talked about changes in medicaid coverage,PA requirements for OxyContin.i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44114	10/3/2011	dr said he's continually starting patients on Butrans,talked about dr discussing titration and side effects ahead of time with patients since dr doesnt see patients again for 4 weeks after he starts them on Butrans. asked dr to give patients Butrans patient info booklets and discuss side effects and titration sections with them,dr said he will do that.showed dr pain conditions,pg.11 visual aid,asked if dr can start a few more patients on Butrans this week,if patients arent controlled on immediate release opioids? dr said he will do that.focused dr on BWC and commercial plan insurance.we talked about OxyContin as an option for patients and dr said he's not starting any new patients on OxyContin,just maintaining those patients that are on OxyContin.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44127	10/3/2011	talked to dr about Butrans 5 core selling messages,dr said she remembered Butrans was transdermal and was a patch but couldnt remember how often patients changed Butrans.showed dr Butrans visual aid,discussed 1 application,7 day dosing of Butrans,dr said she has given a couple patients Butrans patient info booklets but has to follow-up with patients,dr asked about medicaid coverage as majority of patients are medicaid,told dr Butrans is a Prior Authorization for Medicaid patients,explained info to her and Josie,MA,dr said ok she'll keep talking to patients and see if she can get a couple patients to try Butrans.focused dr on commercial plan insurance for Butrans patient starts and using Butrans patient savings cards.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44114	10/3/2011	talked to Horace,Pharmacist,about 5 Butrans core selling messages.Horace hasnt seen any Butrans scripts filled yet,he likes the idea of once weekly dosing and transdermal delivery of Butrans but doesnt know if patients will want to stop their pills.i talked to Horace about patients still being able to take immediate release opioids and non opioid therapy with Butrans,Horace said ok that may be easier for doctors to tell patients about Butrans and get them started.i asked Horace if he will recommend Butrans to patients,when providing patient counseling to those taking immediate release opioids for chronic pain but not controlled? Horace said he will do that and i gave Horace Butrans patient info booklets for education.discussed OxyContin being an option for patients,showed conversion guide and discussed formulary coverage for OxyContin.recommended Senokot-S
PPLPMDL0020000001	Beachwood	OH	44122	10/3/2011	Caught Dr Eckstein up at the window when I stopped in to drop off information/invitation for him. I asked about his experience with Butrans. He said he has tried it in a few patients but does not have any feedback for me at this point. He added that he would keep it in mind & then walked away.<font color=blue><b>CHUDAKOB added notes on 10/13/2011</b></font>Ashleigh keep in mind that if you are positioning Butrans for the physician's "ideal" patient, that may not exist.
PPLPMDL0020000001	Cleveland	OH	44105	10/3/2011	talked to dr about Butrans 5 core selling messages,dr said she just hasnt thought of Butrans and doesnt know if her patients will want to stop taking their pills.showed dr pg.11 visual aid,asked dr if she treats these pain conditions? dr said yes,asked dr how would Butrans be a drawback for treating these conditions? dr said most patients want their pills and thats it and its habit that she usually starts with tramadol then will go to vicodin and percocet.asked dr if she will start 1 or 2 patients on Butrans,instead of converting patients from tramadol to vicodin? dr said she will consider it and if patients are willing to try Butrans she will do that.showed dr Butrans fpi,showed section on maintenance of therapy where dr can give immediate release and non-opioid therapy with Butrans,dr said ok that will help her when talking to patients about Butrans. asked dr to give patients Butrans patient info booklets and focus on BWC and commercial plan insurance,dr said ok.recommended Senokot-S
PPLPMDL0020000001	Parma	OH	44134	10/3/2011	Positioned Butrans for patients who are not well-controlled on short-acting around-the-clock opioids, whether they are a nursing home, hospice, or office patient. He said that he actually had a couple of new patient starts on Butrans since the last time we spoke. He said he would continue to look for more to start. Gave OTC samples.<font color=blue><b>CHUDAKOB's query on 10/13/2011</b></font>Did you ask him about the types of patients he started on Butrans? This may give you some insight into the answer to your next call objective.<font color=green><b>APSEGA's response on 10/14/2011</b></font>He has told me that they have been hospice patients & has also mentioned that they are usually his worst-case scenario patients for whom nothing else has worked. He acknowledges that this is not the ideal place to position Butrans. I plan to work with him on this.<font color=blue><b>CHUDAKOB added notes on 10/15/2011</b></font>Thanks! Let me know if I can help!
PPLPMDL0020000001	Lakewood	OH	44107	10/3/2011	Quick follow up, Dr told me that she was not able to get the Prior Auth through for her one Butrans patient. She said that it was because the patient had not been on any other long acting meds before. This patient was going to still try Butrans and pay out of pocket. I reminded her to still give the savings card so that the patients can save \$40 and she put it in her chart for her to pick up.<font color=blue><b>CHUDAKOB added notes on 10/13/2011</b></font>Wow! Did you confirm the Dr. started the patient on the correct dose? You don't want this to fail!
PPLPMDL0020000001	Northfield	OH	44067	10/6/2011	PROSPECT- Reminded Dr Lango of previous conversations about Butrans (indication, usage, appropriate patient type, 7 day transdermal system). She said she has a patient with bad osteoarthritis & spinal stenosis. This patient had been taking Vicodin, became less controlled on it, & was switched to Duragesic 12.5 & this was "too much opioid" for the patient & she became confused on it. Dr Lango asked if Butrans could be an option for this patient. I told her it sounded like an ideal patient. Discussed managed care & savings. Dr Lango asked to keep an initiation guide for reference as she wanted to remember Butrans for this patient. Also discussed OxyContin q12h as an option for appropriate patients beyond Butrans 20mcg.
PPLPMDL0020000001	Sagamore Hills	OH	44067	10/6/2011	I reminded Dr Sevier of our previous Butrans conversations & his interest in prescribing. He said he has actually prescribed for two patients since that discussion. I asked him to tell me more about the patients. He told me about a patient with osteoarthritis who had tolerability issues with other opioids. He said Butrans seems ideal for her. I asked if the patient has followed-up yet & he said not yet. I asked if he would know if the patient had any issues getting the prescription filled (ie managed care). He said she must have gotten it because he specifically asked her to call if she did not like the medicine or if she was unable to get it at the pharmacy. I asked if he would see a prior authorization if it was required. He said definitely. Discussed appropriate patient type further, focusing on those who are not well-controlled on tramadol around-the-clock. He agreed to write Butrans for more patients. Also discussed OxyContin as an option for appropriate patients who are beyond the appropriate range of Butrans patients.
PPLPMDL0020000001	Sagamore Hills	OH	44067	10/6/2011	Dr Lenox asked me to go over the doses of Butrans with him again as he was interested in starting to prescribe. I reviewed dosing with him. Handed initiation guide to him & reviewed appropriate range of patients. Spent time discussing appropriate patient type, focusing on those patients who are taking chronic Vicodin or tramadol around-the-clock & are not well-controlled. He agreed that the tramadol patient type was a good one to start in. I also reminded him that Butrans is a CII opioid, which he has said in the past he likes. He said that is a nice feature. Reminded him that Butrans is still an opioid & does carry abuse & addiction potential. He said he knows. He said he would be keeping an eye out for appropriate patients.
PPLPMDL0020000001	Cleveland	OH	44103	10/6/2011	dr said she's still starting patients on Butrans,she is getting prior authorizations approved for these patients as majority of her patients have medicaid.showed dr butrans patient info booklet,asked dr to focus on application/rotation and side effects sections when starting patients on Butrans,dr said she does give booklets. asked dr if she has more patients she can start on Butrans? dr said yes and she will do it,she prefers long-acting opioids, but sometimes patients dont want to wear a patch so thats the barrier.i told dr that if patients arent controlled on percocet and they dont want to wear a patch and try Butrans,dr has option of OxyContin,dr said she's still starting a lot of patients on OxyContin but some patients did switch over to Opana ER if there were insurance issues,dr said for the most part no issues with OxyContin and insurance coverage.recommended Senokot-S
PPLPMDL0020000001	Stow	OH	44224	10/6/2011	Spoke with Corey and he said he has all strengths in of Butrans, he said he has seen some scripts of Butrans from Yang. I said he was asking if you had it because he had patient come back, he said they are stocking. RMeinded of discussing application and rotation. HE does not carry Oxycontin or Senokots there
PPLPMDL0020000001	Cleveland	OH	44109	10/6/2011	only got a few minutes with dr,dr said he hasnt started anyone on Butrans this week and some patients he talked to about Butrans werent interested in wearing a patch.showed dr pg.11 visual aid,pain conditions and asked dr if he will see any patients today or tomorrow with these conditions? dr said probably so,asked dr to start a couple patients on Butrans that meet indication,dr said he will do his best and think of Butrans.gave patient info booklet,told dr the booklet will assist in educating patients and focus on BWC and commercial plan patients,dr said ok.told dr for his medicare patients he had option of OxyContin and gave him OxyContin conversion guide.recommended Senokot-S
PPLPMDL0020000001	Stow	OH	44224	10/6/2011	Abby is a prospect, new to the practice and not writing anything yet. She was working with Bressi today. We discussed where Butrans would be used and dosing and initiation and she said she thinks it sounds like a good drug. I said when she sees patients like this when she is with Dr Bressi would she remind him and she said yes. I reminded of dosing with Oxycontin and managed care coverage.
PPLPMDL0020000001	Cleveland	OH	44113	10/6/2011	dr said she's started a few patients on Butrans,talked about why she chose Butrans and I asked dr to focus discussion on application/rotation of Butrans and discuss side effects with patients,dr said she's giving patient education booklet to patients and thats helping. asked dr if she'll see any patients today and tomorrow with pain conditions,pg.11 visual aid? dr said probably will,i asked dr if she will start a couple more patients like this that arent controlled on short-acting opioids and perhaps could try Butrans? dr said she will continue looking for patients to start on Butrans.focused dr on Commercial plan insurance patients and use of Butrans patient savings
PPLPMDL0020000001	Cleveland	OH	44195	10/6/2011	worked apm dept - couldnt see dr stanton-hicks,dr vrooman and dr cheng-so left messages with med secretaries for appointments with doctors,left Butrans fpi,initiation guide,patient info booklet,patient savings card flashcard and my business card
PPLPMDL0020000001	Mayfield Heights	OH	44124	10/6/2011	Window call....asked doc if he would use opioid naive or opioid experienced patients based on our previous discussion. He said probably both. I showed him the initiaton guide and that 5 is appropriate for opioid naive and 10mcg is appropriate for opioid experienced. I asked him to try one patient this week.
PPLPMDL0020000001	Mayfield Heights	OH	44124	10/6/2011	Spoke to tech, Courtney, about the stocking volume of butrans scripts. She stated she has not seen many incoming scripts but she can think of one patient that is regularly on the 5mcg, has gotten refills, and no issues with cost. The patient intially had a out of pocket cost of \$38 but has since been paying \$10. I explained the savings cards and the availability through relay health. I also explained the proper application.

PPLPMDL0020000001	Cleveland	OH	44103	10/6/2011	saw dr at window,dr wanted 1 pack of OxyContin savings cards.asked dr if he was still starting patients on OxyContin? dr said yes he likes OxyContin,been easy to get OxyContin covered on medicaid and no issues at the
PPLPMDL0020000001	Cleveland Hts	OH	44118	10/6/2011	Reminded doc of our previous discussion about butrans. I asked him where he thinks he would use it. He said he doesn't know and asked about the dosing. I told him about the 5 mcg for opioid naive and 10mcg for opioid experience. Showed him the initiation guide. Reminded him of the commercial insurance and savings cards similar to oxycotin.
PPLPMDL0020000001	Cleveland	OH	44106	10/6/2011	talked to dr about his patients taking tramadol,daily,but not controlled and asking for something else,dr said he's thinking of Butrans for these patients but sometimes patients dont want to wear a patch,talked to dr about how he explains Butrans to patients and asked him to give patients Butrans patient info booklets to assist with patient education,dr said he will do that and see if that helps some patients make decision of trying Butrans.asked dr if he can think of a couple patients today and tomorrow that he can start on Butrans? dr said he's sure he will see many patients that are appropriate and he will start more patients on Butrans.talked to dr about OxyContin,7 tablet strengths being an option for patients,discussed formulary coverage and recommended Senokot-5
PPLPMDL0020000001	Mayfield Heights	OH	44124	10/6/2011	Quick call....doc was late for a procedure. I asked doc to prescribe butrans 10mcg for patients that might be taking 2 tabs of a short acting opioid on a daily basis. Nothing learned.<font color=blue><b>CHUDAKOB's query on 10/13/2011</b></font>is 10ug the correct starting dose for a patient taking "2 tabs of short-acting opioid on a daily basis"?<font color=green><b>SIMERTOC's response on 10/17/2011</b></font><b>no</b><font color=blue><b>CHUDAKOB's query on 10/18/2011</b></font>But that is what your call note says?<font color=green><b>SIMERTOC's response on 10/19/2011</b></font>it was an error/typo.<font color=blue><b>CHUDAKOB added notes on 10/20/2011</b></font>Ok. Thanks for the clarification. It is important to be specific on these issues in your call notes.
PPLPMDL0020000001	Cleveland	OH	44104	10/6/2011	dr said she's not started anyone on Butrans,she's not trying to start more patients on opioids as she's already frustrated with her chronic pain patients now.showed dr butrans visual aid,pg.11 pain conditions and asked dr if she treats these conditions? dr said yes.we talked about Butrans being an option for those patients,with these conditions,that are taking percocet every day but not controlled and asking for something else,showed dr initiation of Butrans,titration and side effects info in visual aid,asked dr if she could think of a couple patients like this? dr said she has a lot of patients like that but doesnt know if they will wear a patch and remember to apply a new patch once a week and rotate the patch.showed dr Butrans patient info booklet,showed application/rotation section,told dr this would help her educate patients,dr said ok she'll talk to a few patients and see what happens.focused dr on commercial patients for Butrans.we talked about OxyContin being an option,7 tablet strengths and dr said she has some patients on OxyContin but tries not to start patients on OxyContin.discussed formulary coverage for OxyContin and recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44113	10/6/2011	dr said he's started a few patients on Butrans since he got back from vacation on 9/21st,he wanted another pack of savings cards,asked dr who were the patients he was starting on Butrans? dr said patients taking vicodin every day but not controlled,thats where he's telling them their only option is Butrans.showed initiation,titration and side effects info in Butrans visual aid and asked dr to discuss with patients before they leave his office,dr said ok.focused dr on BWC and commercial pain patients
PPLPMDL0020000001	Cleveland	OH	44106	10/6/2011	talked to dr about 5 Butrans core selling messages,dr said he's not started anyone on Butrans and has been rotating at all 3 OH sites so he's not really thought of Butrans.asked dr what features of Butrans stood out to him? dr said once weekly dosing and transdermal delivery,talked about some pain conditions he treats in practice,pg.11 visual aid, and asked how a long-acting opioid fits into his algorithm? dr said when all short-acting opioids and procedures fail,then he will consider a long-acting opioid.asked dr if he had a few patients taking short-acting opioids that werent controlled and asking him for something else? dr said sometimes he hears that,asked dr if he will start those patients on Butrans? dr said he will consider Butrans,we discussed initiation of Butrans,titration and side effects of Butrans.showed patient info booklet and asked dr to focus on application/rotation and side effects of Butrans with patients before leaving the office,dr said ok.focused dr on commercial pain patients for Butrans.we talked about OxyContin being an option for patients and dr having 7 tab strengths for
PPLPMDL0020000001	Cleveland	OH	44106	10/6/2011	dr said he's been thinking of Butrans more for his patients and has started a few patients, I asked dr what types of pain conditions did they have? dr said a variety but they were all taking tramadol,not controlled,so he tried Butrans.talked to dr about titration and side effects discussion with patients and showing patients Butrans patient info booklets before they leave office,dr said they are giving those to patients.asked dr if he will start a few more patients on Butrans,like the one's he started recently? dr said yes. talked to dr about OxyContin being an option for patients,after Butrans 20mcg,discussed 7 tab strengths and OxyContin formulary coverage.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44106	10/6/2011	talked to dr about 5 Butrans core selling messages,dr said he's new to this practice but is fully aware of all the pain medication options,dr said he likes transdermal delivery of Butrans and once weekly dosing application.i asked dr how Butrans could fit into his algorithm? dr said patients who cant swallow pills or perhaps dont want to take pills every day,he might consider Butrans for them.showed dr Butrans visual aid discussed initiation of Butrans,titration and side effects of Butrans.asked dr if he will see a few patients today or tomorrow that he can start on Butrans? dr said he might and will think about it.dr asked about medicaid coverage for Butrans,focused dr on commercial and discussed with dr medicaid's prior authorization requirements discussed OxyContin as an option for patients,7 tab strengths available for titration and formulary coverage.recommended Senokot-5
PPLPMDL0020000001	Stow	OH	44224	10/6/2011	Dr is a dabbler, HE said he is still writing Butrans and he asked if we have any data showing that it cannot be abused. I said I do not have any information about abuse, I reminded him that it is a schedule 3 and can be abused in a manner similar to other schedule 3s. HE asked how and I said I dont know that. He said he thinks Ohio is going to go the route of having medications have something in them to prevent abuse. I informed him that Butrans does not have anything in it and I went through the delivery system as well as the fact that it is a partial agonist at the mu receptors, not agonist antagonist. HE said that clears something up. We also reviewed the clinical study in opioid experienced patients and I showed side effect profile and decrease in pain. HE said he likes the fact that it is 7 day patch. I said is duration important to you and he said yes.HE asked what exactly they put in reformulation of Oxycontin coating and I said I do not know but can fill out a MIRF and he said that is not necessary.
PPLPMDL0020000001	Cleveland	OH	44118	10/6/2011	Introduced butrans to doc. Discussed the indication, positioning, CII status, and the once weekly dosing. He asked if butrans is like duragesic. I told him their is no head to head data and re-iterated the selling messages.
PPLPMDL0020000001	East Cleveland	OH	44112	10/6/2011	Doc said he still has not seen any patients come in on butrans and probably won't since he is not taking any new pain patients. I asked him to start his own patient on it - one patient that may be taking only tramadol or only vicodin but ATC. Advised him that those patients would start on 10mcg and can still take short acting for breakthrough. He said he will try one patient. He is considering coming to the speaker program. He said patients are still asking to be switched from oxycotin - some are, some aren't. He switched one patient from oxycotin to another product only to have to switch them back to oxycotin.<font color=blue><b>CHUDAKOB's query on 10/13/2011</b></font>Why did he switch this one patient. This sound like an AE.<font color=green><b>SIMERTOC's response on 10/17/2011</b></font>he did not mention an ae on this call but has in the past mentioned that patients dont like the reformulation.<font color=blue><b>CHUDAKOB added notes on 10/18/2011</b></font>The fact that he switched one patient ffrom oxyContin to another is an AE by itself. Your job at this point is to ask more question to determine exactly what he was saying.
PPLPMDL0020000001	Cleveland	OH	44102	10/6/2011	talked to Nagla,PA,about 5 Butrans core selling messages and focused Nagla on BWC and commercial pain patients for Butrans.Nagla said 2 of 3 HCP's have started a few patients on Butran,dr baishnab hasnt started anyone in this office. Nagla said she's recommending Butrans for patients taking a couple pills of short-acting opioids daily and not controlled,she feels thats the best place for Butrans.talked about Butrans patient info booklets assisting in educating patients and focusing discussion on Application/rotation of Butrans and side effects of Butrans.Nagla said they do give booklets out.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44112	10/6/2011	I discussed the key selling message of butrans. He said he had a couple of patients today that might have been good candidates. Referred to the initiation guide for starting doses. I invited him to the 10/20 speaker program. He expressed interest as the venue is close to his home. He said he will go if dr. tucker attends. I asked him to try butrans for a commercially insured patient and give a savings card. Provided Oxycontin MED D formulary reminder.<font color=blue><b>CHUDAKOB's query on 10/13/2011</b></font>Did you ask him why he thought the patients he saw may have been good candidates? This may have gained you some valuable information.<font color=green><b>SIMERTOC's response on 10/17/2011</b></font>he just said they were taking a few tablets per day.<font color=blue><b>CHUDAKOB added notes on 10/18/2011</b></font>This is a time when asking a few more questions may have gained you more information to support what he was going to do.
PPLPMDL0020000001	Stow	OH	44224	10/6/2011	Dr popped his head in and asked what I have and I said I have Butrans, he said he has not written that and asked the dosing again. I went through dosing and said if heh as patient failing on low dose PRN drug ATC and are commercial it is the only sched 3, 7 day transdermal. HE said leave him info, had to go back to procedure
PPLPMDL0020000001	Cleveland Hts	OH	44118	10/6/2011	Doc said he wrote 2 scripts of butrans since last week. One patient was on vicodin, he started them on 10mcg and assured patient they can take a couple of tablets for breakthrough pain. I told him that 10mcg would be the right starting dose. I reminded him that if patient is/was on greater than 80mg of a morphine equivalent, butrans might not be appropriate. Informed him that butrans savings cards can be used for mail order scripts. Reminded him of the oxycotin savings acrds and BWC coverage for the right patients.<font color=blue><b>CHUDAKOB's query on 10/13/2011</b></font>What dose of Vicodin was the patient on that you confirmed that 10ug was the correct starting dose?<font color=green><b>SIMERTOC's response on 10/17/2011</b></font>He said patient was on 5mg 3 or 4 times/day<font color=blue><b>CHUDAKOB added notes on 10/18/2011</b></font>Ok. Please make sure you are specific in your call notes so there is no confusion about what you said. Thanks for the clarification.
PPLPMDL0020000001	Stow	OH	44224	10/6/2011	Saundra is a prospect, she said she did try it in a patient but they said it was too expensive. I reminded her that she cannot write in medicaid or medicare. I asked her what is her understanding where Butrans should be used and she said she is using it to replace other long actings since it is a long acting. I reviewed intitiation guide with her and showed her the patient type whi is using Vicodin 3-4 a day or Tramdol. I said this is before those long acting and she said she understands now, she misunderstood where it is to be used. She said so it is like a starting point and I said yes. I asked if she sees patients like that and she said yes, I said will you write in those patients and she said yes. Reminded her of Oxycontin and she said the Drs write it in the last practice she was in and she said they do not at this practice even though it was reformulated
PPLPMDL0020000001	Cleveland	OH	44106	10/6/2011	dr said she's been rotating between all 3 OH sites so she hasnt thought much about Butrans. I asked dr if there are any therapies she would like to replace for pain management? dr said maybe some of the short-acting opioids.showed dr Butrans visual aid,discussed 5 core selling messages and asked dr what features stood out to her,dr talked about 1st and only 7 day analgesic delivered in 1 application.asked dr if she has a couple patients that meet Butrans indication,taking short-acting opioids that arent controlled? dr said she probably does have a lot of those patients.asked dr if she will start a few patients on Butrans,today or tomorrow? dr said yes she will consider Butrans.showed patient info booklet,focused discussion on application/rotation of Butrans,talked about OxyContin being an option after Butrans 20mcg and discussed formulary coverage for
PPLPMDL0020000001	Stow	OH	44224	10/6/2011	Dr said he has written butrans. I asked how his patients are doing and he said good. I said explain to me the patients that you use this in and he said he uses it in patients who are taking long acting and they are not working or he uses it in conjunction with other long actings. I said he may not be writing Butrans in the appropriate patient and he said he thought as long as they are under 30mg of Morphine equivalent he writes 5mcg and if they are over he writes 10mcg. I showed him the initiation guide and said if they are on over 80mg of morphine equivalent they are probably not appropriate and if they are in between 30 and 80 mcg, he needs to taper them down first to 30mg equivalent and they initiate. I asked how often he sees patients who are on 3-4 Vicodin or Percocet ATC and he said all of the time, I asked if they are new and he said they are new and existing patients. I said will you write it in those patients and he said yes. HE likes the product and thinks that he will have alot of success in this type of patient
PPLPMDL0020000001	Waterford	OH	45786	10/7/2011	W - She hasn't written but will continue to try and remember as an option. She said that she has a lot of patients who are on short acting meds that could benefit from longer control. I - Butrans follow up and review of appropriate patient selection when the indication is met. Use of initiation guide to discuss appropriate starting doses for patients depending on current therapy. Review of formulary coverage - BWC and commercial plans with a 3T status. Discussion of recent Medicaid changes with scripts moving back to different managed medicaid plans and Butrans successfully getting approved if the patients have taken hydrocodone, oxycodone, tramadol, or codeine in the past for pain. Savings card program eligibility.
PPLPMDL0020000001	Waterford	OH	45786	10/7/2011	W - Has only written for one patient that we discussed at our last lunch. Likes that the formulary coverage is getting better and would like to see Medicare Part D coverage as well. I - Butrans follow up and review of appropriate patient selection when the indication is met. Use of initiation guide to discuss appropriate starting doses for patients depending on current therapy. Review of formulary coverage - BWC and commercial plans with a 3T status. Discussion of recent Medicaid changes with scripts moving back to different managed medicaid plans and Butrans successfully getting approved if the patients have taken hydrocodone, oxycodone, tramadol, or codeine in the past for pain. Savings card program eligibility.
PPLPMDL0020000001					or codeine in the past for pain. Savings card program eligibility.

PPLPMDL0020000001	Waterford	OH	45786	10/7/2011	W - Waters said that he has started quite a few patients on Butrans and is anxious to see how well people respond. Likes having a CIII long acting option that has 7 days of therapy. Will continue to utilize Butrans for patients who continually need more and more short acting to control pain. I - Butrans follow up and review of appropriate patient selection when the indication is met. Use of initiation guide to discuss appropriate starting doses for patients depending on current therapy. Review of titration ability after 72hours and use of supplemental analgesia if needed. Review of formulary coverage - BWC and commercial plans with a 3T status. Discussion of recent Medicaid changes with scripts moving back to different managed medicaid plans and Butrans successfully getting approved if the patients have taken hydrocodone, oxycodone, tramadol, or codeine in the past for pain. Savings card program eligibility. OxyContin review of formulary coverage.
PPLPMDL0020000001	Twinsburg	OH	44087	10/7/2011	PROSPECT- Spent time with Dr Bressi going over the Butrans 5 core messages & box warning. Also reviewed appropriate patient range & type, focusing on patients who are taking 3 tramadol per day for a chronically painful condition but who are not achieving pain control. Discussed Butrans as an option for those patients, especially if they are complaining that their medication is wearing off too soon or if they call too soon for refills. I asked what Dr Bressi typically does with these patients. She said she usually refers out at that point. She said most of her patients on Vicodin take it PRN, not daily. She said if they get to the point where they need it daily, she refers to pain management because she does not want to deal with the record keeping involved with prescribing chronic narcotics. I asked if instead of prescribing Vicodin for patients who may take it daily after tramadol, if she might consider Butrans as a step before resorting to referring out. She said she would do this if she felt the patient was in legitimate pain & she trusted them. I agreed she should be cautious in prescribing all opioids. She said she would prescribe if that patient presents. Discussed OxyContin as an option for appropriate patients beyond the Butrans range.
PPLPMDL0020000001	Parma	OH	44134	10/7/2011	Spoke with floater pharmacist & discussed Butrans indication, dosing, appropriate patient type, & automatic savings via e-voucher. Also discussed ability for patients to take supplemental analgesia with Butrans. She said she did not know this. Also discussed OxyContin savings cards.
PPLPMDL0020000001	Lyndhurst	OH	44124	10/7/2011	SPoke to PA about the appropriate patient for butrans - after NSAIDs and before going to short acting tablets ATC. I explained that it is a 7 day dose and a CIII status which means it can be called in or refilled. She asked if patients need a day off before reapplying. I told her no and that a new patch she be applied to a new site. She like the idea of "something like this" compared to taking a bunch of tablets.
PPLPMDL0020000001	Cleveland	OH	44109	10/7/2011	dr said he talked to Ashleigh recently about Butrans and is thinking of patients who would be appropriate. showed dr visual aid,pg.11,asked if he could start a few patients on Butrans,today or next week? dr said he will do that. showed Butrans visual aid, we discussed initiation and titration of Butrans and showed patient info booklet asked dr to focus patient discussion on application/rotation of Butrans,focused dr on BWC and commercial plan patients. recommended Senokot-S- font color=blue><b>CHUDAKOB's query on 10/13/2011</b></font>What types of patients is he thinking of? Does he really know who the appropriate patient is, because I am sure he sees a lot of them daily.<font color=green><b>BROOKAM's response on 10/16/2011</b></font>agree with you, read ashleigh's call note and you will understand (that was the day before I saw him) so he does "get it now" but again if we cant see doctors people like him just wont remember Butrans. by me going every friday now,that will help just to give 1 piece of info and question every week- font color=blue><b>CHUDAKOB added notes on 10/18/2011</b></font>Ok. It seems like if he says he is "thinking" of appropriate patients would suggests he may not know who they are.
PPLPMDL0020000001	Parma	OH	44129	10/7/2011	DABBLER- I asked Dr Giogliotti if he is still offering Butrans to appropriate patients & if he has had any feedback yet. He said he is still waiting to hear back from some & he is still offering it, but most people don't take him up on the offer. I asked what types of patients he finds himself offering it to. He said anyone on short-acting. I asked if he would consider someone a Butrans patient who was taking 3-4 tramadol per day & not being well-controlled. He said no. I asked what he would give that person & he said Vicodin. I asked him why. He said probably just a habit & his aversion to all narcotics. I asked him if he would give them Vicodin, why not give them Butrans, also a CIII opioid & reminded him that it still does have abuse/addiction potential. I told him he could write just 4 patches of Butrans, which would be a month's supply. He said that was true & maybe he would do that. I asked him to choose a few patients who were taking tramadol daily & were not being well-controlled & switch them to Butrans. He said he was ready to do that. Discussed OxyContin q12h for patients beyond Butrans
PPLPMDL0020000001	Twinsburg	OH	44087	10/7/2011	PROSPECT- Reviewed 5 core messages with Dr Hillard & alerted him to box warning & risk of abuse/addiction. I asked if he had given Butrans any more thought. He said not really. Reviewed appropriate patient type, focusing on those who are taking tramadol daily, not being well-controlled or saying it is wearing off too soon. I asked what he does with these patients. He said he will refer out or give Vicodin, but he does not like to give Vicodin other than PRN. He said he does not want to have to do the paperwork associated with prescribing narcotics, but he does rely on OARRS. I agreed that OARRS is a great way to help protect his practice. Discussed Butrans dosing once weekly & asked if he thought it was reasonable to try a patient on Butrans after tramadol, instead of referring out right away. He agreed to do this if a patient he trusts like this presents. Discussed OxyContin q12h as a potential option for patients who are beyond the appropriate Butrans range.
PPLPMDL0020000001	Twinsburg	OH	44087	10/7/2011	PROSPECT- Reviewed 5 core messages & box warning with Dr Pla. Also reviewed appropriate patient range/type & asked what she usually does with patients who take tramadol daily who say it is not lasting long enough. She said usually she will prescribe Vicodin or refer them out. She said she will keep the patient & maintain them herself if she trusts them. I agreed that she should be cautious in prescribing all opioids, including Butrans. Discussed once weekly dosing as an option with Butrans with 3 dosage strengths. She said she would keep Butrans in mind as an option for those patients when she sees one who fits that description. She reminded me that in family medicine, they really do not see a lot of chronic pain. Reminded her of the appropriate patient type (patients not well-controlled on tramadol) & asked if she would agree that she does have some patients who fit that description & she said she does. Discussed OxyContin as an option for appropriate patients beyond Butrans 20mcg.
PPLPMDL0020000001	Westlake	OH	44145	10/7/2011	I reviewed our last conversation about using Butrans for patients taking tramadol around the clock. I asked if he would see someone like that coming in next week with commercial insurance where he could start Butrans and he agreed. We discussed the savings program for Butrans and to look for patients with commercial insurance. Reminder that OxyContin is preferred on most managed care plans.
PPLPMDL0020000001	South Euclid	OH	44121	10/7/2011	Window call....Reminded doc of the butrans patient type, 7 day delivery and CIII status. Provided initiation guide and info on the savings card program and an invitation to the butrans 10/20 program.
PPLPMDL0020000001	Westlake	OH	44145	10/7/2011	Quick call, Dr said that she has started a few patients on Butrans. I asked about the feedback and she said they are doing fine and she will continue to try it. I asked to gain some more time with her and she said she may start doing appointments. We reviewed the savigns cards and medication guides for Butrans and she will hand them out to patients. She said she is still starting new patients on OxyContin.
PPLPMDL0020000001	Cleveland	OH	44113	10/7/2011	talked to Dale,PA,about patients he's starting on Butrans,Dale said he's looking at patients taking tramadol and codeine, and starting them on Butrans instead of refilling their short-acting but they dont see a lot of those medications,they see a lot of vicodin and percocet. showed Dale Butrans visual aid,asked him to start more patients today and next week that are taking vicodin but not controlled and start them on Butrans,Dale said he will do that. asked Dale to focus patient discussion on application/rotation of Butrans in patient info booklet,Dale said he will do that. focused Dale on BWC and commercial plan patients to start on Butrans. recommended Senokot-S
PPLPMDL0020000001	Lakewood	OH	44107	10/7/2011	I showed the initiation presentation and asked if he saw patients on tramadol like this one. He said he does and I asked if he would use Butrans for a patient like this. He said he would, but vicodin is generic and patients want cheap. I reviewed the savings program and asked if he would look for a patient with commercial insurance and he agreed.
PPLPMDL0020000001	Cleveland	OH	44135	10/7/2011	I asked Dr to tell me about the success he is having so far with Butrans. He said he started another new patient last week and he has not heard a lot of feedback so he hopes they are doing well. I asked why he thought of it and he said that he would like to try Butrans as an option instead of other long acting medications. He said he would like to try it more in older patients if it was covered on Med D. We reviewed where Butrans is covered. I asked him to continue to start new patients and he agreed.
PPLPMDL0020000001	Westlake	OH	44145	10/7/2011	Spoke with Marlene regarding scheduling an inservice for Butrans. She will let me know some days that work with the staff. She wants to have the entire floor North and South involved in the in-service for Butrans.
PPLPMDL0020000001	South Euclid	OH	44121	10/7/2011	Window call....Reminded doc of the butrans patient type, 7 day delivery and CIII status. Provided an initiation guide and patien info guides, and oxycontin and an invitation to the butrans 10/20 program. nothing learned.
PPLPMDL0020000001	Independence	OH	44131	10/7/2011	DABBLER- Deb said she had not gotten specific feedback back from the patient she had told me about prior but that she has written for a few patients & has gotten good feedback from them. She said that sometimes she has found that a patient will say that it is wearing off after 4 or 5 days. I asked what she does. She said she usually tells them to apply the patch to their belly, where there is more adipose tissue. Discussed application & 4 approved sites, telling her the belly is not an approved site. She said she knows. She said that this seems to work & the patients report that it works better that way. Showed her BUP3015 & asked her thoughts. She said she felt this was very positive. I asked her her thoughts on approximately 48% of patients on Butrans 20mcg reporting at least a 30% reduction in pain. She said it was very impressive. I asked what her & her patients' expectations are for reduction in pain when starting opioid therapy. She said she counsels patients on this & thinks that a 30% reduction is a good place to aim. I asked who she considers a Butrans patient. She said she likes to get patients on Butrans before they get into the mentality that a pill will control their pain (ie 'I feel pain, I take a pill'). She said if they are just taking a few pills per day & are not getting relief, she would switch to Butrans then. I asked if she would continue to identify Butrans patients & prescribe & she agreed.
PPLPMDL0020000001	Westlake	OH	44145	10/7/2011	Dr reviewed the Butrans initiation guide and said he is going to enter the information into his phone so he has it at all times. I asked about the feedback from patients and he said that he has had good results. He said that he has started patients on Butrans who were previously on hydrocodone and he agreed to start more patients like these. Dr has put the Butrans medication guides in the patient waiting room. We discussed that OxyContin is an option when patients are taking more than 40mg per day of hydrocodone.
PPLPMDL0020000001	Cleveland	OH	44113	10/7/2011	dr said she's not started anyone on Butrans and hasnt really remembered Butrans. asked dr how Butrans fits into her pain management algorithm? dr said she has patients on tramadol,vicodin and percocet and if they arent controlled she will eventually convert them to a long-acting opioid. showed dr Butrans 5 core selling messages, asked what features stood out to her? dr said transdermal delivery and once weekly dosing application of Butrans. asked dr if she had a few patients, showed pain conditions pg.11 visual aid, with these pain conditions taking short-acting opioids daily but not controlled? dr said yes a lot of patients call in early every month for refills and some dont like taking pills so she thinks Butrans could be an option for them. showed initiation, titration and side effects info in Butrans visual aid and asked dr to think of a couple patients next week to start on Butrans, dr said she will consider it for some patients but doesnt know if patients will want to wear a patch but she'll talk to them. gave patient info booklet for assisting dr in educating patients on Butrans, focused dr on commercial plan patients. talked to dr about OxyContin being an option with 7 tablet strengths and discussed formulary coverage. asked dr to consider OxyContin for those patients who dont want to try Butrans because its a patch and she feels are ready for a long-acting opioid, dr said she will do that. recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	10/7/2011	dr said he's started a few patients this week on Butrans, showed dr pg.11 visual aid pain conditions and asked him if he'll see patients this week with these conditions where he can start them on Butrans? dr said yes he'll do that. we talked about initiation, titration and side effects of Butrans, showed patient info booklet told dr to focus patient discussions on application/rotation of Butrans. discussed OxyContin as an appropriate option, 7 tab strengths and recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	10/7/2011	dr said he hasnt started any patients on Butrans as he hasnt thought about it. I showed dr Butrans visual aid, 5 core selling messages, asked dr what features stood out? dr said transdermal delivery and 1 application every 7 days. showed dr Butrans initiation guide, discussed initiation and titration of Butrans and asked dr if he will start a few patients today and next week on Butrans? dr said he will talk to some patients and see what they think about wearing a patch. talked to dr about OxyContin as an option and 7 tablet strengths, recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44113	10/7/2011	dr said she's started a few patients on Butrans, she sees them at 4 week follow-up and discusses titration and side effects. dr said most of her patients have been taking percocet but not controlled so she's started them on Butrans but she's considering patients taking vicodin every day and not controlled to start on Butrans because she's seeing good results with the patients she has on Butrans. dr said she forgets to discuss application/rotation of Butrans and will start showing that info in booklet. I asked dr if she would start a couple patients on Butrans, right after tramadol int controlling the pain? dr said yes she just started a patient this week that was taking tramadol daily and not controlled. focused dr on BWC and commercial plan patients for Butrans. talked about OxyContin being an option for patients, showed conversion guide and discussed formulary coverage. recommended Spoke with Leigh Ann, we discussed Butrans medication guide and that patients should wait 3 days to reach steady state. We discussed Butrans as an option for opioid naive patients and patients already on short acting medications. I asked if there were any employer groups in the area and she said mainly people who work for the health systems like CCF. Reminder that OxyContin is an option when Butrans may not provide adequate
PPLPMDL0020000001	Rocky River	OH	44116	10/7/2011	

PPLPMDL0020000001	Cleveland	OH	44109	10/7/2011	dr said he's not thought of Butrans,he likes transdermal delivery of medication he is familiar with Duragesic and asked if Butrans is for that type of patient? I showed dr Butrans visual aid,discussed appropriate opioid experienced patients and showed Butrans initiation guide and asked dr if he has patients in that dosing range for opioid experienced that perhaps aren't controlled on their short-acting opioid regimen? dr said he's sure he does,I asked dr to start a couple of these patients today and next week.dr said he'll be on vacation next week but will consider it when he comes back in town.focused dr on BWC and commercial plan patients for Butrans.talked about OxyContin being an appropriate option for patients with 7 tab strengths and formulary coverage for OxyContin.recommended Senokot-5<font color=blue><b>CHUDAKOB's query on 10/13/2011</b></font><b></b></font><font color=blue><b>CHUDAKOB added notes on 10/18/2011</b></font>I look forward to seeing how this works out.
PPLPMDL0020000001	Lyndhurst	OH	44124	10/7/2011	Doc swore that he just wrote a script of butrans today. I asked him to tell me a "drug addict and they are all drug addicts". I reminded doc of the indication for moderate to severe pain and in no way for addiction. Doc said he does not prescribe more than 30 tabs of vicodin/monthly told him butrans is best positioned for patients after failure on NSAIDs and before going to ATC short acting tablets. He went on the say that the OARRS program is the best thing as he believes most patients dont need pain meds and they are all drug addicts. Reminded him of the oxycontin indication as an option for patients with more sever pain. Dr is just in the process of moving to his new office. I asked if he is continuing to start patients on Butrans and he said that he is and he is happy with Butrans as another option. I asked if he would start new patients like the ones in the inclusion criteria and he said he would if procedures do not work.
PPLPMDL0020000001	Westlake	OH	44145	10/7/2011	Spoke with Sharron, we discussed the Butrans medication guide for patients and that patients should wait 3 days to reach steady state. We discussed that Butrans can be called in and refilled by Drs. We discussed that OxyContin can be an option when Butrans may not provide adequate analgesia.
PPLPMDL0020000001	Rocky River	OH	44116	10/7/2011	talked to dr about 5 Butrans core selling messages,asked dr what features stood out to him? dr said he likes transdermal delivery and once a week dosing with Butrans but he just hasn't thought about Butrans,asked dr what he needs to remember Butrans? dr said just keep reminding him. asked dr when he sees patients with pain conditions,pg.11 visual aid,how does he decide which short or long-acting opioid patients will get? dr said all of his patients start on short-acting tramadol and then when that doesn't control pain he will go to vicodin or percocet,long-acting opioids are his last choice.dr said he had to go and asked if Butrans was covered on Medicaid? told dr to focus on BWC and commercial plans for Butrans and asked if he would start 1 patient on Butrans today or next week? dr said he will consider it and talk to patients.gave OxyContin reminder and conversion guide and recommended Senokot-5<font color=blue><b>CHUDAKOB's query on 10/13/2011</b></font>Why do you think long-acting opioids his "last choice"? Is he grouping in Butrans with all other long-acting opioids?<font color=green><b>BROOKAM's response on 10/16/2011</b></font><b></b></font>long answer to your question, but its what I hear every day from HCP's that they have been trained to think of long-acting opioids as a last resort,last choice, they use all short-acting opioids first to treat chronic pain conditions and when all else fails, go to long-acting. does that make sense? hope so.<font color=blue><b>CHUDAKOB added notes on 10/18/2011</b></font><b></b></font>Perhaps they think that way because there was never another CII for them to think about. While what you say is true, we have to work to change that perception.
PPLPMDL0020000001	Parma	OH	44129	10/7/2011	PROSPECT - I asked Dr Roheny if it really was just managed care that is causing him not to prescribe Butrans. He said no. I asked him what it was then. He said he was extremely busy & was looking for something for a patient, so he could not elaborate. He told me he would think about my question & promised to answer it next time.
PPLPMDL0020000001	Cleveland	OH	44103	10/10/2011	talked to dr at window about Butrans 5 core selling messages,dr said he's not prescribed Butrans but has read my information that I left (Butrans fpi,initiation guide and patient info booklet) dr said he has a lot of medicaid patients so if its not covered on medicaid he probably won't prescribe Butrans.told dr to focus on commercial plan patients for Butrans and discussed prior authorization requirements for medicaid patients.I asked dr to think about 1 commercial plan patient who has 1 of the pain conditions,pg.11,thats not controlled on short-acting opioids,dr said he will think about it.showed dr OxyContin conversion guide and asked him to consider OxyContin for appropriate patients,dr took guide and walked away.
PPLPMDL0020000001	Lakewood	OH	44107	10/10/2011	I asked Dr if he see the patients shown in the inclusion criteria. He said that he does and will try to think of Butrans more often. He said he's tried it but not sure that the patient wanted to change. I asked if he would use the medication guide and sell Butrans to the patient as an option and he agreed. Reminder that OxyContin is still an option that is covered on most managed care.
PPLPMDL0020000001	Cleveland	OH	44109	10/10/2011	worked rheumatology dept-couldnt see doctors so left Butrans fpi,initiation guide and patient info booklet for Dr.Ballou,Dr.Magrey and Dr.Singer(Dept chairman), worked internal medicine - left same info for Dr.Lindheim,Dr.Harrington,Dr.McCreery,Dr.Jones, Dr.Spinelli,Dr.Ricanati and dr.Gelehrter.
PPLPMDL0020000001	Lakewood	OH	44107	10/10/2011	I reviewed our last conversation when he said that he is thinking of Butrans as an option when patients are taking 3-4 vicodin per day. I asked if he would start new patients like these this week and he agreed. We discussed OxyContin as an option and he will continue to write new scripts mostly in the hospital.
PPLPMDL0020000001	Cleveland	OH	44106	10/10/2011	talked to dr about 5 Butrans core selling messages,asked dr what features of Butrans stood out to him? dr said he likes that Butrans is transdermal and once a week dosing but he hasn't had any patients that he felt were appropriate for Butrans.we talked about Butrans indication,showed visual aid and showed dr pg.11 pain conditions,asked if he treated these conditions? dr said yes,asked dr to think of a few patients with back pain that are taking short-acting opioids daily but not controlled and start them on Butrans,dr said he will have to think about his patients coming in this week but will consider Butrans.focused dr on commercial plan insurance.discussed OxyContin as an option for patients,showed conversion guide and asked dr to start a couple patients on OxyContin,dr said he doesn't really prescribe OxyContin but knows its there.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44109	10/10/2011	talked to dr about patients with back pain,showed pg.11 visual aid,and dr considering Butrans as an option for them,dr said he's got a few patients on Butrans and they are doing well and will consider more patients to start on Butrans. asked dr to start a few patients today and this week on Butrans,dr said he will do that, focus dr on BWC and commercial plan patients.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44115	10/10/2011	dr said she's not had any patients complain to her lately about their tramadol so she's not really thought of Butrans for anyone.showed dr pg.11 visual aid,discussed various pain conditions and asked dr which one's she treats more so than others? dr said she treats a lot of arthritis and sees patients with osteoarthritis.I asked dr to start 1 patient,with commercial insurance,on Butrans,that has osteoarthritis and is taking short-acting tramadol daily but not controlled,instead of refilling tramadol,dr said she'll consider that option as long as patients are willing to wear a patch and remember to rotate the patch once a week.showed dr Butrans patient info booklet,discussed application/rotation section, and asked dr to give the booklet as this will assist in educating patient,dr said ok she liked that.talked about patient savings cards for commercial plan patients and recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44109	10/10/2011	talked to Ron about Butrans 5 core selling messages,asked Ron what features stand out to him? Ron said transdermal delivery and 1 application every 7 days.talked to Ron about recommending Butrans to patients who are taking immediate release opioids and not controlled and give patients Butrans patient info booklets,Ron said he will do that.Ron said there's been no scripts of Butrans yet but he has Butrans 5mcg in stock.talked about OxyContin being an option for patients,7 tablet strengths and discussed stocking.recommended Senokot-5
PPLPMDL0020000001	Lakewood	OH	44107	10/10/2011	I asked how her most recent Butrans patient is doing- the one who was going to pay cash for her script. She said that he has not heard back but the patient had picked up the script with the savings card. I asked where she is finding Butrans fitting into her practice and she said that she is thinking of it as an option to vicodin around the clock. I asked if she would continue to start new patients and she agreed. I reviewed OxyContin as an option that is covered my most managed care.
PPLPMDL0020000001	Westlake	OH	44145	10/11/2011	We discussed initiating Butrans for a patient who is already on low dose vicodin. He said he does have some patients only taking 2-3 low dose vicodin per day. We discussed Butrans and the use of supplemental analgesia as opioid or non opioid short acting. He said that he will try to prescribe more Butrans for these patient types. He said that many patients do not want to try a patch. We discussed that OxyContin is still an option and he said he has been prescribing more OxyContin recently. I spoke with Angela, she will keep me posted about Caresource changes. She said that she feels that Dr Baishnah has more appropriate patients for Butrans than Dr Celeste since most of his patients are on higher doses of opioids.
PPLPMDL0020000001	Northfield	OH	44067	10/11/2011	Introduced myself & Purdue's products to Michael, pharmacist. I inquired about Butrans stocking/activity. He said all Marc's stores keep a box of at least the 5mcg on-hand. He added that he has seen one Butrans prescription since launch. He said that patient got it for one month, then her insurance company (unknown) would not reimburse her, so she decided to not continue on it. Discussed favorable commercial coverage & also discussed OxyContin managed care status. He said he has not seen any OxyContin prescriptions since the reformulation. I asked what happened to those patients. He said he thinks they got switched to MS Contin or Percocet or "something else that was cheaper". He said he had no need for OxyContin savings cards.
PPLPMDL0020000001	Parma	OH	44134	10/11/2011	Reviewed with Lynda Butrans 5 core messages & appropriate patient range/type. Expounded on appropriate patient type, discussing those patients who are taking tramadol daily for a condition that is known to last an extended period of time if they are not being adequately controlled. She asked if she could prescribe Butrans for a patient who was only taking 50mg tramadol per day with Lyrica who was not well-controlled instead of increasing the tramadol. I told her she could initiate Butrans at the lowest starting dose, 5mcg/hr. She said she was thinking of a diabetic patient & asked if that would be a problem. I told her it would not. She said she might try Butrans for this patient.
PPLPMDL0020000001	Parma	OH	44129	10/11/2011	LOYAL CUSTOMER- I asked Dr Ortega what his key take-aways were from the Butrans dinner program. He said that he really did not learn anything from the program & felt that the speaker was not very experienced with Butrans. He also said that he did not really get to talk to anyone else about their experience with it, so he was disappointed. I asked him what his experience has been & if he is getting good results with his patients. He said this week, 2 patients have come in complaining of itching. I asked what the patients decided to do about that. He said one said the itching was only on the chest & arm site & is going to finish the box he has & then consult with Dr Ortega & the other patient discontinued. He said that he has found that since he was out for a few weeks, some patients actually ran out of Butrans but did not call in for refills. I asked why. He said because they are in some pain still, but not enough to really need medication for it. I asked his thoughts on this. He said obviously, if someone doesn't need medication, that is ideal. I agreed only patients who are in pain should be considered for Butrans. I asked if he would continue to prescribe Butrans for appropriate patients & he agreed to do this. Discussed savings cards, which Dr Ortega said he sometimes forgets to hand out. Discussed this with Cindy as well.
PPLPMDL0020000001	Cleveland	OH	44109	10/11/2011	talked to Kelsey,Floatar Pharmacist,she's covering for Paul,Pharmacist and Allan,Pharmacist,this week.discussed Butrans stocking with Kelsey,confirmed they are getting scripts for Butrans,asked Kelsey to give Butrans patient info booklets,show application/rotation section and side effects sections,Kelsey agreed.Asked Kelsey what her knowledge was of giving Butrans with immediate release opioids and Kelsey wasn't sure if doctors could do that or not,I showed Kelsey Section 2.4 Butrans fpi,maintenance of therapy and supplemental analgesia.Cheryl,Pharmacy tech,said she is here at this store every day and they do see doctors writing Butrans with immediate release opioids and some without and she will make sure patients get booklets.discussed OxyContin stocking and asked if they are seeing new Rx for OxyContin? Cheryl said no she is confident its only the same group of patients every month getting refills of OxyContin,noone new but they are seeing new Rx for Opana ER.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44104	10/11/2011	dr said she's not started anyone on Butrans but knows its available and will keep Butrans in mind if patients aren't controlled on their short-acting opioids.gave dr BUP3015,discussed clinical trial with dr and asked her to start 1 patient this week that isn't controlled on Butrans,dr said she will keep Butrans as an option for patients if patients ask for something else other than their pills.focused dr on commercial plan insurance for Butrans.recommended Senokot-5
PPLPMDL0020000001	Euclid	OH	44132	10/11/2011	Spoke to tech, Anna about the stocking and movement of butrans and oxycontin. She said they have just the one patient on butrans (one of Dr. Marshall's patients) and seems to like the product, has a less than \$10 co - pay. She suggested I talk to Drs. Casselberry, Levine, Bernise, Craig, and George Matthews who seem to have many patients fitting the indication/positioning of butrans. They still have a few regular customers on oxycontin but many have been switched to products like Opana ER and Oxycodone IR. Provided the butrans patient info guide as she said she would be willing to hand out to certain customers on many short acting tablets per month.
PPLPMDL0020000001	Parma	OH	44134	10/11/2011	LOYAL CUSTOMER- I asked Dr Hernandez if, when he is discussing pain with his patients, they discuss a goal of a certain amount or percentage of pain reduction. He said usually not, He said he just prescribes them the medication & then discusses how the patient is doing upon follow-up. I showed him BUP3015 efficacy data & asked his thoughts. He said he already knows Butrans works, so he didn't really need a study to show him that. I asked him how I should be explaining buprenorphine, as a molecule, to my physicians who do not have a high comfort level with it. He said to tell them that buprenorphine has 30-60% more analgesic potency in comparison to other opioids & it does not have the mind altering effects of other opioids. I told him that because that is not in our full prescribing information & we do not have data on that, I would not be able to tell physicians that. He said that is unfortunate because that is what he finds in his clinical practice.
PPLPMDL0020000001	Lakewood	OH	44107	10/11/2011	I showed the inclusion criteria and asked if he sees these patient types who are taking tramadol around the clock. He said that he does and he agreed to try Butrans for these patient types. Reminder that OxyContin is an option for patients taking more than 40mg of hydrocodone per day.

PPLPMDL0020000001	Cleveland	OH	44113	10/11/2011	talked to dr about the couple patients he's started recently,dr said he's starting patients on Butrans when they are taking 20-25mg vicodin daily and not controlled,dr said he gives them Butrans patient info booklet and follows-up 4 weeks later.asked dr how he discusses titration and side effects with patients? dr said he waits until 4 week appointment to titrate patients as most of his patients are being started on Butrans 10mcg and discusses side effects then.asked dr if he can show patients Butrans patient info booklets with application/rotation of Butrans section and side effects section? dr said he will do that.focused dr on BWC and commercial plan insurance for Butrans.told dr he has OxyContin, 7 tablet strengths,as an option for patients that dont want to try Butrans and want a pill but need a long-acting opioid.dr said he knows OxyContin is available but he never prescribes OxyContin.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44130	10/11/2011	DABBLER- I reminded Dr Fedorko of our last conversation & asked him what, to him, the ideal Butrans patient is. He said he knows exactly where to use it. I told him I am simply trying to figure out where, to him, the ideal place to use Butrans would be. He said that he might have a patient who he would consider ideal & went on to say that this patient is on only tramadol but it is not adequately controlling his pain. I told him this does sound like an ideal candidate & asked what his pain is from. Dr Fedorko said it is back pain due to failed surgeries. He said he thinks after tramadol is the ideal place to position Butrans & I told him it sounds like he is on the right track. He asked me to remind him of this patient when I see him next so he can tell me how he is doing. I agreed.
PPLPMDL0020000001	Cleveland	OH	44104	10/11/2011	dr said she's not started anyone on Butrans,she knows its there as an option.showed pg.11,visual aid,pain conditions and asked dr how she's managing chronic pain for these conditions? dr said she typically starts patients on traamadol then vicodin and eventually a lot of patients end up on percocet.I asked dr how would Butrans be a drawback by starting patients right after vicodin isnt controlling pain instead of going to percocet? dr said she might have some patents that are willing to wear a patch but majority of her patients want their pills and thats it.dr said she'll think about patients this week coming in where she can talk to them about Butrans,discussed initiation of Butrans,titration and side effects.showed dr Butrans patient info booklet and asked her to give this booklet to patients when starting them on Butrans,dr agreed.focused dr on commercial plan patients.discussed OxyContin as an option for patients who dont want to try Butrans because its a patch yet they are ready for a long-acting opioid,talked about 7 tablet strengths and showed conversion guide.dr said she doesnt have many patients on OxyContin and tries not to start more patients on OxyContin.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44114	10/11/2011	dr said he started more patients last week on Butrans,he's mainly focused on patients taking percocet whether or not they are controlled,he's telling them that Butrans is their only option and he'll give some patients percocet for breakthrough pain but he's trying to avoid refills of percocet so he thinks Butrans is a great option and patients seem to be doing well on Butrans.we talked about patients getting Butrans patient info booklets focusing discussion on application/rotation of Butrans and discussing titration and side effects with patients before leaving office,dr said he does a little bit of that but its mainly John,PA,who tells patients about that
PPLPMDL0020000001	Sagamore Hills	OH	44067	10/11/2011	DABBLER- Dr Scanlon said he is using Butrans more & more. He added that he even calls it in now because of his comfort level with it. I asked Dr Scanlon what type of patient feedback he is getting from these patients. He said most patients have done really well. I asked him if someone were to report that they were not getting enough relief if he would titrate the patient upward rather than switching their medication. He said he would. He said the only patients who would probably report that would be those who are on high doses of opioids & would not be considered Butrans patients. He asked me to leave him more savings cards as he has been going through them rather quickly. Also discussed OxyContin savings cards & favorable managed care status.
PPLPMDL0020000001	Cleveland	OH	44114	10/11/2011	talked to John,PA who works with dr katz and dr marshall,about Butrans patient info booklet and focusing discussion on application/rotation of Butrans,titration and side effects of Butrans,John said he does talk to patients about this info and gives booklets.John said he and dr marshall have been starting patients consistently every week and these are patients taking percocet daily,instead of refilling percocet they are starting patients on Butrans and those that arent controlled they will only give Butrans as an option.focused John on BWC and commercial insurance patients for Butrans.told John that if patients dont want to wear a patch and want a pill,they have option of OxyContin,showed OxyContin formulary grid and discussed 7 tablet strengths of OxyContin.John said ok they have a few patients on OxyContin so he'll keep this info in mind.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44105	10/11/2011	talked to Abdul,Pharmacist,about Butrans scripts,Abdul got 1 Butrans script from Dr. Celeste recently and Dr.Lozano and he's seen a few from other physicians but couldnt remember who wrote them.I asked Abdul if patients had commercial insurance or BWC,Abdul said some of them did and 1 was Medicaid requiring a Prior Authorization and another 1 was Medicare and the dr couldnt get approval for Butrans so she switched patient to Duragesic,that dr was dr lozano in middleburg hts.explained Butrans formulary coverage,showed grid,focused Abdul on BWC and commercial insurance plans for Butrans and showed Butrans patient savings cards for commercial insurance patients.asked Abdul to continue giving patients Butrans patient info booklets to patients when they arent controlled on their short-acting opioids or dont want to take pills,Abdul said he will do that and has been,Abdul said he thinks the booklets are helping patients go to dr and discuss Butrans asked Abdul if he is seeing any new Rx for OxyContin? Abdul said no,same patients monthly just getting refills,Abdul said he's seeing a lot of new Rx for Opana ER and switches from OxyContin to Opana ER and he's not sure why. I asked Abdul if he would start asking doctors why patients are being switched to Opana ER if patients are tolerating and controlled on OxyContin? Abdul said he will do that,showed OxyContin formulary grid and discussed patient savings cards for cash paying and commercial plan patients.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44130	10/11/2011	DABBLER- I asked Dr Diab if he would ever prescribe Butrans for a patient right after tramadol if it was not controlling their pain. He said it always depends on the patient. I asked him if there were any characteristics or conditions that make someone a better candidate for a long-acting opioid vs a short-acting around-the-clock. He asked me what pain management specialists have told me regarding that. I told him I hear that it can be difficult to switch a patient from a short-acting around-the-clock therapy to a long-acting option. I asked if he would agree with that. He said yes. He said it all depends on the patient. Discussed Butrans as a once weekly option for patients if short-acting medications like tramadol are not controlling their pain. Also reminded him of Butrans & OxyContin savings cards for patients with commercial insurance or cash-pay.
PPLPMDL0020000001	Lakewood	OH	44107	10/11/2011	Quick call as Dr left for the hospital. I told Dr he would probably be seeing a patient on tramadol or low dose vicodin today and asked if he would prescribe Butrans for these types of patients. He agreed and said that everything has been going smoothly.
PPLPMDL0020000001	Westlake	OH	44145	10/11/2011	Quick call with Dr, he said that everything is going smoothly with Butrans, I asked him to tell me about the patients he's started recently and he said they are doing well. also spoke with Tina and Jeanette regarding the managed care and savings cards for both Butrans and OxyContin.
PPLPMDL0020000001	Cleveland	OH	44114	10/11/2011	talked to dr about her patients taking tramadol daily for 1 of the pain conditions shown on pg.11 visual aid,but not controlled and dr starting them on Butrans instead of converting them to vicodin.dr said she knows it makes sense and has to try it in a few patients but hasnt done that.asked dr whats the drawback in doing that? dr said she didnt know its habit and she feels better trying short-acting opioids first then when all fail,she's thinking of Butrans.asked dr to start 1-2 patients this week that are taking tramadol and not controlled,start them on Butrans not vicodin,dr said ok.focused dr on BWC and commercial insurance patients.we talked about OxyContin being an option for patients that dont want to wear a patch like Butrans but need a long-acting opioid,showed OxyContin conversion guide and asked dr to continue starting patients on OxyContin when appropriate,dr said she will do that,discussed insurance coverage for OxyContin.recommended Senokot-S
PPLPMDL0020000001	Sagamore Hills	OH	44067	10/11/2011	Dr Loyke said he wishes he prescribed more pain medications so that he could "help me out". I reviewed with him the appropriate Butrans patient type, focusing on those who are not well-controlled on tramadol around-the-clock chronically. He said he must have at least one patient like that. I told him even if he has only one patient who could benefit from Butrans, that would be worth a try. He asked that I give him an FPI for this location since he already has one to reference in the Parma office from our last visit. Reiterated that Butrans is a CIII opioid & carries abuse & addiction potential like all opioids. I asked Dr Loyke if he refers out to pain management since he does not treat chronic pain himself. He said he hates to do that as he does not think patients benefit from chronic opioid therapy. He said when he refers out, either patients come back on "tons" of opioids, or the pain physician just does procedures on them & sends them back to him to maintain their pain. Discussed OxyContin q12h as an option for patients who are beyond the appropriate range of Butrans patients. Dr Loyke said again that he does want to find a place for Butrans & that he would try to find a patient.
PPLPMDL0020000001	Cleveland	OH	44130	10/11/2011	Spoke with John who said he was low on time & added that has not filled any Butrans prescriptions. Discussed Butrans pharmacists' webinar as a platform for him to ask a peer questions regarding Butrans & its usage. He said it sounded interesting. Discussed once weekly dosing & reviewed OxyContin savings cards/eligibility.
PPLPMDL0020000001	Cleveland	OH	44109	10/11/2011	talked to Debbie,Pharmacist,about Butrans stocking and she confirmed they still have 1 carton,Butrans 5mcg,noonne has prescribed Butrans.talked to Debbie about 5 Butrans core selling messages and asked her what features of Butrans stood out to her? Debbie said transdermal delivery and 1 application 7 days dosing,I asked Debbie if she would recommend Butrans to patients if they are taking immediate release opioids but not controlled? Debbie said she will do that,I left patient info booklets for her to give patients,discussed BWC and commercial insurance patients for Butrans.recommended Senokot-S
PPLPMDL0020000001	Independence	OH	44131	10/12/2011	I asked Dr Jack what he thought would happen if he simply selected an appropriate patient & started them on Butrans. He took an initiation guide out of my hand & looked through it but did not answer my question. I asked him what he has to lose by identifying one patient who was appropriate for Butrans & starting them on it. He said I made a good point & that he really does need to prescribe it. I agreed that he has many appropriate patients, as he has told me in the past, for Butrans & asked if he would just identify one & prescribe for them & he agreed.
PPLPMDL0020000001	Parma	OH	44129	10/12/2011	PROSPECT- Quick call- I asked Jen if she has noticed an increase in referrals since House Bill 93 came out. She said at first there was an increase but it has died down since. She added that she thinks it will pick up again when the Bill really starts to take affect. Spent time with Dawn reviewing Butrans appropriate patient type. She said she thinks it will take a new patient since they are generally on lower doses of opioids when they arrive. I agreed that this would be a good patient type to try. She said she knows Dr Nickels has some patients on it & the group is having their meeting next week, so she is sure they will discuss Butrans further at that point. Dawn also said that she is certain that Jen will wait to see what Caryn DeLisio, another NP with the practice, does before she ever prescribes.
PPLPMDL0020000001	Cleveland	OH	44129	10/12/2011	PROSPECT- Saw Caryn at Parma location as she practices here on Wednesdays. I asked her about her experience & thoughts on Butrans. She said she thinks it is a great idea & wants to see the long-term effects/results that Dr Nickels gets before taking action herself. I asked if Butrans being a long-acting opioid might have anything to do with her hesitation. She said that she & Andrea have discussed that & that that could be a factor in her not starting anyone yet. She added that she thinks Butrans would be a good option for patients who are new to the practice. I agreed that this is a good patient type & also added that she could consider patients who are on tramadol or low-dose Vicodin chronically with inadequate relief. She said that she actually knows of a few patients who were just in who were just started on tramadol. Dawn overheard & agreed that those patients would be ideal for Butrans. Dawn flagged those charts with notes saying that "per Caryn", these patients should be considered Butrans candidates so that when Jen sees them, she will switch them.
PPLPMDL0020000001	Independence	OH	44131	10/12/2011	Spoke with Amanda & Cameo (MA's) as Dr Rob was unavailable today. I gave them the Butrans "Initiations" invitation & told them about the interactive case studies. I asked them, since he did not have time to speak with me in person, if they would give the invitation to him & ask him to log on to the program. They agreed but said he probably will not do that. Discussed savings cards for Butrans & OxyContin.
PPLPMDL0020000001	N Royalton	OH	44133	10/12/2011	Spoke with pharmacist Jim & introduced Butrans. He said he is stocking it. Reviewed appropriate patient type, including patients who call too soon for refills of short-acting opioid medications because they are not controlling pain. Also gave him information on pharmacists' webinar & discussed interactive nature of the peer program. Discussed automatic savings for Butrans via e-voucher & OxyContin with savings cards for eligible patients. Jim said they did not need OxyContin savings cards.
PPLPMDL0020000001	Westlake	OH	44145	10/12/2011	Spoke with Deanna, she has not seen a lot of movement for Butrans. We discussed the inclusion criteria and the appropriate patient type. I asked if she sees these types of patients, she said does. She would not recommend something to the patients unless they asked her or complained about their current therapy. We reviewed OxyContin as a long acting option that is covered on most managed care.
PPLPMDL0020000001	Westlake	OH	44145	10/12/2011	I reviewed Butrans and asked the Dr if he has had the chance to gain experience with Butrans. He said he hasn't and he really doesn't see a lot of chronic pain. He said that he feels there is a niche for Butrans and he thinks that he may have a few cases where he could use Butrans as an option. I reviewed appropriate patients for Butrans and asked if he would try it in patients when tramadol does not provided adequate analgesia. He said he would. We reviewed the OxyContin is still a long acting option and he would most likely refer patients out by the time they would try to OxyContin.
PPLPMDL0020000001	Warrensville Heights	OH	44122	10/12/2011	PROSPECT- Dr Zivic saw me & said, "No one pays for this". I asked him to clarify. He said he wrote Butrans for a patient & she said her insurance wouldn't cover it. I asked if the patient had Medicare, Medicaid, or commercial insurance. He said at first that he thought it was commercial, but when I showed him the formulary grid, he said it might have been Medicare. He asked what the cost was for patients with commercial insurance. I told him if he is giving out savings cards with the prescriptions, those patients can pay as low as \$15. He said that was reasonable. I asked him if he had more patients like the one he had tried to prescribe for, who have commercial insurance. He said he is sure he does. I asked him to prescribe Butrans for those appropriate patients & he agreed. Also discussed OxyContin as an option for patients beyond Butrans range & Medicare D coverage.
PPLPMDL0020000001					

PPLPMDL0020000001	Cleveland	OH	44106	10/12/2011	showed dr pg.11 visual aid,discussed pain conditions treated most often in practice dr talked about back pain.i asked dr how Butrans could fit into her practice? dr said she's not sure as she doesnt have any clinical experience with Butrans.showed dr appropriate patients section in Butrans visual aid,discussed opioid experienced patients with back pain that could be appropriate for Butrans,asked dr to start 2 patients this week on Butrans.dr said she will consider it and asked me to leave info.i lefted clinical trial for dr.discussed initiation and titration of Butrans.focused dr on commercial plan patients for Butrans.talked to dr about OxyContin being an appropriate option for patients,showed conversion guide and dr said she doesnt have any patients on OxyContin but would take the OxyContin conversion guide.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44106	10/12/2011	dr said he's got a couple patients on Butrans,they are doing well no complaints to him so thats a good thing.i asked dr if he is discussing Butrans titration and side effects with patients before they leave office? dr said he talks about side effects briefly like any other opioid and gives Butrans patient info booklets to patients.dr said he will titrate Butrans dose at follow-up appointment or if patients call into office complaining to them that the dose isnt working for them.dr said he knows who the appropriate patients are for Butrans.showed dr Butrans visual aid and asked him to consider patients with 1 of pain conditions pg.11,that are taking tramadol daily but not controlled,to start them on Butrans.dr said he will consider that if appropriate.focused dr on commercial plan insurance.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44106	10/12/2011	talked to Steve,Pharmacy manager,about Butrans scripts and stocking.Steve hasnt seen any scripts for Butrans so he's waiting to order Butrans.showed Steve Butrans visual aid,discussed appropriate patients and initiation of Butrans,discussed importance of stocking and steve said well he doesnt like to order CII medications that often unless he see's scripts for them.i showed Butrans fpi,black box warning showing that Butrans is a CII and Steve said wow,that made a huge difference as he forgot about that,steve said he has no problem ordering Butrans because he orders CII opioid medications regularly.i asked Steve to recommend Butrans to patients taking short-acting opioids for chronic pain conditions,showed pg.11 visual aid,if they arent controlled and are asking for something else,steve said he would do that.i left Butrans patient info booklets,discussed commercial plan insurance for Butrans,showed formulary grid and gave 1 pack of Butrans patient savings cards for commercial plan patients.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44113	10/12/2011	dr said he hasnt started anyone on Butrans because the majority of his patients have acute pain so Butrans wouldnt be an option for them.i agreed with dr but showed dr pg.11 visual aid,discussed several pain conditions he treats and asked if any patients with these conditions take vicodin daily for their pain? dr said yes he has some that take vicodin daily,asked dr if that was considered chronic pain,dr said yes when he thinks about it if they are taking an opioid daily for their pain,then its chronic pain.i asked dr to start 1 patient on Butrans with 1 of these conditions where the immediate release opioid isnt controlling patients pain,dr said he will consider it and has a few patients in mind.focused dr on BWC and commercial insurance patients for Butrans.talked to dr about OxyContin,7 tablet strengths available as an option for patients,discussed formulary coverage,dr said he doesnt start a lot of patients on OxyContin but appreciated info.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44113	10/12/2011	dr said he's not started any patients on Butrans recently,he knows its available and will start prescribing more Butrans again.dr said he started 1 patient,August 2011,on Butrans and went on vacation for 3 weeks so he's not thought about Butrans since he's been back.i asked dr if he has prescribed vicodin this week for patients with chronic pain conditions? dr said yes.i showed dr pg.11 visual aid,discussed pain conditions and asked dr to start a couple patients on Butrans this week,that are taking immediate release opioids but not controlled,dr said he will do that.focused dr on BWC and commercial plan insurance patients for Butrans.talked to dr about OxyContin as an option for patients that dont want to try Butrans because its a patch and prefer pills,showed dr OxyContin conversion guide and discussed 7 tablet strengths,dr said he never starts patients on OxyContin as he doesnt prescribe CII medications.recommended Senokot-5
PPLPMDL0020000001	Rocky River	OH	44116	10/12/2011	Spoke with Stan, he said he has at least one patient on Butrans. We discussed the medication guide and how to help educate the patient on proper use, application and disposal. He will make sure the patients get them. We discussed that OxyContin is an option when Butrans may not provide adequate analgesia.
PPLPMDL0020000001	Cleveland	OH	44130	10/12/2011	Dr Kansal said that Butrans is not covered by insurance. I asked him to clarify. He said that he has tried to get it for patients who's insurance hasn't covered it. I asked if he knew the plans but he did not. I showed him Butrans formulary grid, emphasizing commercial insurance coverage. Also showed OxyContin formulary grid to show that OxyContin has outstanding managed care coverage.
PPLPMDL0020000001	Cleveland	OH	44106	10/12/2011	talked to Lisa,patient care coordinator,as dr was out till later afternoon,about Butrans new patient starts.Lisa said none of the doctors have started anyone new on Butrans,past 2 weeks and its due to their high population of medicaid and medicare.Lisa said medicaid,medicare are their 2 biggest plans and if dr hasnt met the medicaid PA requirements,patients cant get started on Butrans.i asked Lisa,since she takes ALL medication refill requests for ALL physicians in pain clinic,if patients are taking immediate release opioids daily and call in early for refills are the doctors considering Butrans as an option? Lisa said most of them are NOT,the doctors will refill the medications for patients if patients have been taking the immediate release opioids for years.Lisa said unless patients complain to doctors,phone or clinic visit,about their current medication,doctors wont discuss or start patients on Butrans.we discussed commercial plan coverage for Butrans and use of patient savings cards.i asked Lisa if she is seeing new Rx for OxyContin? Lisa said no,she's hearing a lot of patients ask for Opana ER and doctors are converting patients from OxyContin to Opana ER.Lisa said all of their patients on OxyContin have been taking it for years,are controlled and doctors just see them monthly for appointment and give refills if appropriate,discussed medicaid and medicare coverage for OxyContin.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44106	10/12/2011	worked anesthesia/pain management dept - see call notes on dr hayek,dr khalil,dr wyne and non-hcp call for dr sahal. worked family medicine dept-left dr marsh,dr trux and darrell hulish(pharmD for dept) Butrans fpi,BUP3015 and intiation guide for each of them with my business card
PPLPMDL0020000001	Cleveland	OH	44106	10/12/2011	dr said he's been thinking of Butrans more for his patients taking tramadol that arent controlled and ask him for something else.told dr that was great he's got Butrans in his mind but how often are patients asking for something else? dr said occasionally patients will ask for a different medication,i taking tramadol and thats not controlling the pain,some patients want vicodin or percocet.showed dr Butrans visual aid,initiation and titration info and asked dr to start a couple patients this week on Butrans.dr said he will try his best to remember Butrans and knows he has to get more patients started on Butrans.focused dr on commercial plan patients,dr said majority of his patients at main campus are medicaid and medicare so thats biggest challenge with starting patients on Butrans.showed dr OxyContin conversion guide,discussed OxyContin as an option for patients and dr said he writes a lot about OxyContin likes the medication,no problem with OxyContin,showed formulary grids for OxyContin to dr and asked him to continue starting new patients on OxyContin.dr said he will do that.recommended talked to dr about pain conditions,pg.11,dr talked about back pain patients and treatment algorithm for this group,by the time patients reach pain clinic they are either taking immediate release opioids and need medical management or they are being considered for surgical procedures,injections,etc.talked to dr about Butrans being an option for this group of patients when taking immediate release opioids daily but not controlled,dr said he will consider Butrans,discussed initiation of Butrans and titration and focused dr on commercial insurance patients.showed OxyContin conversion guide,discussed OxyContin as option for patients and showed formulary grid,dr said he doesnt really prescribe OxyContin but took info.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44104	10/12/2011	dr said he started 1 patient on Butrans but hasnt talked to any patients since that 1,showed pg.11 pain conditions,asked dr if he treats these conditions? dr said yes,we talked about patients with back pain.dr said he tries all non-opioid therapies first and if patients have persistent pain he'll start them on tramadol and see how their pain is over time with tramadol,asked dr what he does when tramadol isnt controlling patients pain? dr said he'll consider another immediate release opioid like vicodin or percocet.i asked dr to stop there and not convert patients to another short-acting opioid but to start them on Butrans,after tramadol isnt controlling patients pain.dr said he'll consider that but depends on patient being willing to wear a patch and rotate that patch once a week.showed dr Butrans patient info booklet and asked him to give 2 patients as this will assist with education of Butrans,dr said ok,focused dr on Commercial plan insurance patients for Butrans.recommended Senokot-5
PPLPMDL0020000001	Westlake	OH	44145	10/12/2011	I asked Dr to tell me about where he is prescribing Butrans. He said he has tried a few patients. He said he just started a patient today who is taking vicodin and he did not want to increase his dose so he decided to try Butrans. He said that the only issues he has had are managed care. He said he has tried to get it through on some Medicaid and Med D with not a lot of success. We discussed the managed care and savings cards. We reviewed that OxyContin is still a long acting option that has good managed care coverage. Dr is a speaker for Cymbalta. (Daughter (12) plays soccer)
PPLPMDL0020000001	North Royalton	OH	44133	10/12/2011	Introduced myself & Purdue's products to Carla, pharmacist. She said she may have one customer on Butrans & that is it. Reviewed with her appropriate Butrans patient type, focusing on patients who take around-the-clock low-dose Vicodin or tramadol chronically. Discussed that Butrans is a long-acting schedule III opioid with abuse & addiction potential like all opioids. Reviewed savings via e-voucher for her customers as well as OxyContin savings cards, which she said they did not need.
PPLPMDL0020000001	Bedford	OH	44146	10/12/2011	DABBLER- Dr Moufawad said he is looking forward to going to Connecticut to attend speaker training. I asked him, at this point, where he is finding a place for Butrans. He said to be honest he has only one patient on it. He said the patient is doing well on it, but that is the only one he has. I asked him what I can do, say, or answer that will help him feel more comfortable with Butrans. He said there is nothing I can do or say. He said that he does want to use it & he does think it is a great concept, he just needs to hear the training about it first & speak with other physicians. He asked me what the managed care coverage is, especially with BWC. I told him commercial coverage is outstanding & that is where he should focus, as he can give those patients savings cards as well. I told him that as of now, BWC is paying for Butrans. He asked if that was going to change in January & told me that BWC is not going to be paying for Suboxone for pain come January. I told him I do not know if any changes will arise with Butrans for BWC & I only know that it is being paid for at this time. Dr Moufawad said again that he does want to use Butrans & he does see a place for it. He said that he has 4 new patients coming in this afternoon, so he will evaluate each of them to see if they are Butrans candidates. I asked him to prescribe Butrans for these patients if appropriate & he agreed. Also discussed OxyContin as an option for patients beyond Butrans range.
PPLPMDL0020000001	Cleveland	OH	44121	10/13/2011	I asked doc if he sees any merit to a product like butrans for patients in his practice. He said maybe. He asked how much it costs. I told him it varies depending on the chain but will be over \$100/mo for the 5mg approximately. I explained the commercial coverage and the savings cards program. He insisted that tramadol is generic and cheap and so is vicodin if tramadol does not work. He asked if butrans works better than tramadol. I told him that there is no head to head data. I showed him the initiation guide. He said he would try it but his concern is that generic is always diserable. Told him that Butrans is just another option. He tends to think of a patch, such as fentanyl,for more severe pain. I reminded him of the indication of oxycontin and the preferred coverage.
PPLPMDL0020000001	Cleveland	OH	44195	10/13/2011	I talked to Steve,Pharmacist/Supervisor,about Butrans stocking and scripts,Steve said all he knows is they have Butrans in stock and are getting scripts for Butrans.i asked Steve who is writing the Butrans? Steve said he's not sure and doesnt have time to look right now.Steve said i could stop back next week and talk to Curt and maybe he will look that info up for me.showed Steve Butrans visual aid,discussed 5 core selling messages and focused on appropriate patients,Butrans being a CII opioid and once weekly dosing.i asked Steve if he could hand out Butrans patient info booklets when patients get scripts filled for Butrans and focus on application/rotation of Butrans? Steve said he will do that.focused Steve on commercial insurance plans for Butrans and BWC.
PPLPMDL0020000001	Beachwood	OH	44122	10/13/2011	I asked Jen if she is the one who usually sees the new patients in the practice or if Dr Yokiel always sees them. She said he is always the one who sees them first & she might do follow-up visits. I asked if she would be the one to switch someone to Butrans if appropriate. She said she can occasionally make a recommendation to switch a patient's medication, but it is ultimately his decision. Spent time reviewing appropriate patient type. Jen said the patient feedback she has gotten about Butrans has not been positive. I asked what the patients were on prior to Butrans. She said some of them were on short-acting. She said that some of them did not give it long enough to work & others they could have been moved up to a higher dose before giving up. I agreed & discussed ability to titrate to maximum 20mcg/hr dose & steady state after 72 hours. She said she would recommend Butrans for appropriate patients who are on the lower doses of short-acting opioids & not getting relief. Showed initiation guide & discussed formulary coverage.
PPLPMDL0020000001	Parma	OH	44129	10/13/2011	PROSPECT- I asked Dr Paat what kind of results he would expect to get if he just tried Butrans for an appropriate patient. He said it would probably be "pretty good". I reminded him of previous discussions surrounding Butrans study inclusion criteria, including conditions such as spondylolysis & spondylolsthesis. I asked if he would agree that he generally treats them with opioids. He said yes. I also showed side effect profile, telling him I wanted to be sure he is comfortable with the safety of Butrans. I asked if anything was surprising to him in the data. He said no. I showed him initiation guide & discussed titration ability after day 3 to a maximum of 20mcg. Reviewed ability to take supplemental analgesia with Butrans. Also showed him exactly how to write the prescription & also showed demo box kit. I asked him if he could simply select one or two appropriate patients like the ones we discussed & start them on Butrans. He said yes.

	Beachwood	OH	44122	10/13/2011	I asked Dr Yokiell if he has had an increase in referrals following House Bill 93. He said tons. I reminded him of previous conversations about newer patients being candidates for Butrans. Reviewed appropriate patient type. I asked what his clinical experience has been. He said it has been a managed care/cost issue for some. Reviewed Butrans formulary information, focusing on BWC & commercial insurance as well as savings cards. Discussed ability to titrate after 72 hours to a maximum 20mcg dose. He said he is comfortable titrating upward & would not give up after just one dose unless someone got nauseated or had an adverse event, which he added has not happened. I asked if he would continue to identify Butrans patients & he agreed. Discussed OxyContin 7 tablet strengths & managed care availability. He said he is very comfortable with OxyContin. I asked if he uses all 7 strengths. He said he finds himself using 30mg often because he can use them between 20 & 40. He said 40 is about as high as he likes to go with OxyContin as he believes if 40 doesn't work, opioid therapy in general may not work
PPLPMDL0020000001	Cleveland	OH	44195	10/13/2011	worked neurology dept-had to leave Butrans fpi,initiation guide,patient info booklet,dinner program invite 10/20/11 and web conferences in october for all doctors as i couldnt see them.Left this info for Dr.Spears,Dr.Stillman,Dr.Mays and Dr.Kriegler.worked rheumatology dept-left Butrans fpi,initiation guide,patient info booklet,dinner program invite 10/20/11 and web conferences for Dr.Calabrese,Dr.Long,Patty Paczos,PA,Betsy Kirchner,NP and Dr.Chatterjee-same rule cant see doctors leave info with front desk receptionist and she gives all info to medical secretaries who put in doctors boxes. worked anesthesia/pain management dept-left SAME Butrans info as noted above for Dr.Covington,Dr.Stanton-Hicks,Dr.Cheng,Dr.Vrooman,Dr.Katyal,Dr.Leizman,Dr.Mekhaii,Dr.Mintzer and Dr.Frost- couldnt see any doctors had to leave info at receptionist desk
PPLPMDL0020000001	Highland Heights	OH	44143	10/13/2011	Asked doc where he is getting the best success with butrans. He said he has a couple of older patients on it and they really like it. He said most patients need to start on the 10mcg dose. I explained that unless he is seeing opioid naive patients most of his patients will likely start on 10mcg. He said he likes it and will keep writing it. I explained that a low dose of oxycontin would likely be a progression after 20mcg of butrans.
PPLPMDL0020000001	Cleveland	OH	44121	10/13/2011	Introduced doc to butrans with the indication, 7 day delivery, CII status, and the positioning. He said he treats a lot of metabolic conditions and would normally refer patients to pain management but Butrans sounds intriguing. He wanted me to leave more info. Provided initiation guide, formulary grid, and savings cards.
PPLPMDL0020000001	South Euclid	OH	44121	10/13/2011	Introduced doc to butrans by discussing the indication, the once weekly dosing/7 day delivery. I asked if she has any patients taking analgesics like vicodin or tramadol daily. She said she tries not to prescribe them much and only as needed. I explained that butrans is for chronic pain but probably best for moderate chronic pain. I asked him to try butrans the next time she thinks of prescribing more than 60 tabs of vicodin/mo. No commitment.
PPLPMDL0020000001	Independence	OH	44131	10/13/2011	PROSPECT- I showed Dr Sundaram the inclusion criteria & asked how often he sees these conditions. He said daily. I told him that in those patients, right after NSAID's or COX-2's, he can use Butrans. Reviewed once weekly dosing & showed him demo kit. Also showed disposal unit & demonstrated how to dispose of patch. Also discussed CIII & abuse/addiction potential. Dr Sundaram said he tried Butrans on "a few" patients & it did not work. He added that once someone has had Percocet, they don't want to switch to a long-acting. Discussed OxyContin as an option for patients beyond Butrans.
PPLPMDL0020000001	Shaker Heights	OH	44122	10/13/2011	PROSPECT- Showed inclusion criteria & asked Dr Agarwal how frequently he sees patients in his office with these conditions. He said daily. I told him that after NSAID's or COX-2's stop working for someone, that would be a Butrans patient. I asked him if he can see himself using it there. He said he would use a non-narcotic like tramadol instead. I asked what dose he would start someone on. He said 50mg 3-4 times per day. I asked what happens if/when that is no longer controlling their pain. He said he refers out. He said he only does chronic pain management in nursing homes. I asked if this means he sees absolutely no place for Butrans in his practice at all. He did not respond. Showed him demo kit & initiation guide pg 6. Spent time going over appropriate range of patients & discussed OxyContin for patients beyond Butrans range, like the ones in nursing homes. He said he uses it a lot there. Discussed 7 tablet strengths. He said he uses the most amount of 40mg. He looked at Butrans initiations guide again & said he must be able to use Butrans someplace. He asked about starting doses & highest dose. Discussed titration ability after 3 days to a maximum 20mcg dose & using 5 & 10mcg as starting doses, depending on current opioid regimen. Told him he could use Butrans as an option before referring to pain management.
PPLPMDL0020000001	Cleveland	OH	44109	10/13/2011	He said maybe. Also discussed Ryzolt as option as once daily tramadol product. He said managed care is difficult. Recommended Senokot. showed dr BUP3015 clinical trial, discussed inclusion criteria and results, dr said the data was impressive but he feels his patients dont want a patch, dr said patients just want pills and more pills and it never ends, asked dr if patients ever say their pain isnt controlled by immediate release opioids and ask for something else? dr said yes, all the time. I asked dr to start 1-2 of those patients on Butrans instead of refilling their immediate release opioids, dr said he will do that but doesnt understand why patients would be wearing a Butrans patch and still take immediate release opioids, I showed dr Butrans fpi, maintenance of therapy section, told dr he can give non-opioid therapy with Butrans or immediate release, its up to him. dr said ok, dr asked how Butrans compared to other patches like Duragesic? I told dr there are no head to head studies with other patches and Butrans, therefore I cant comment on that. dr said ok, asked dr to get some clinical experience with Butrans and start a few patients, showed initiation guide and discussed titration, focused dr on application/rotation of Butrans in Butrans patient info booklet and asked dr to tell patients about this info, dr said he will do that, focused dr on BWC and commercial plan patients to start on Butrans, dr asked me to leave Butrans patient education booklets in exam rooms and waiting rooms as that will help him educate patients.
PPLPMDL0020000001	South Euclid	OH	44121	10/13/2011	Doc said she tried butrans but it didnt seem to work for her. The patient was an elderly female that had tried other analgesics. She was cautiously started on the 5mcg and not titrated up when it did not work. I explained that 5 mcg is the starting dose for patients that may be more appropriate for opioid naive patients. She started the patient on the low dose because of her age. I explained that there is no dosing adjustment necessary for the elderly yet to be cautious. She said she would give it another try. She still has the initiation guide.
PPLPMDL0020000001	Cleveland	OH	44102	10/13/2011	discussed BUP3015 opioid experienced clinical trial with Nagla, P.A. Nagla said she is telling patients that are taking 3-4 vicodin a day and not controlled that Butrans is their only option, Nagla said she'll give vicodin for breakthrough pain for 1 week while wearing Butrans but that's it, after that patients can take aspirin or ibuprofen. I asked Nagla if the reduction in pain percentage was clinically significant to her? Nagla said yes, a 30% reduction in pain is significant. I asked Nagla if she had a few patients coming in today that she can start on Butrans? Nagla said she probably will and if not she'll look at patients next week that are appropriate for Butrans. discussed initiation guide, dosage strengths, titration and I asked Nagla if she's giving Butrans patient info booklets to patients and showing application/rotation info? Nagla said sometimes she tells them but usually she just gives booklet to patients for them to read. I asked Nagla to focus discussion on application/rotation of Butrans before patients leave office and still give booklets, Nagla said she will do that and asked me to leave Butrans patient info booklets in exam rooms and waiting rooms, recommended Senokot-5
PPLPMDL0020000001	Cleveland Hts	OH	44118	10/13/2011	Quick call...I asked doc how his butrans patient is doing and likes the medication. He said he is not sure yet as its only been a week. I asked him to try another patient similar to the first and that 10mcg would be the likely starting dosing. Provided updated formulary grids for oxycontin and butrans. <font color=blue><b>CHUDAKOB's query on 10/20/2011</b></font>-Charmaine, the way your call note is written it is difficult to know what you mean when you that 10ug would likely be the starting dose. If you are going to suggest a starting dose then it is good practice to be more specific in your notes about the dose the patient was previously on. Does this make sense?<font color=green><b>SIMERTOC's response on 11/03/2011</b></font>-Yes. I could have specified that 10mcg would likely be a starting dose for patients that are being switched from taking several tabs of vicodin per day. <font color=blue><b>CHUDAKOB's query on 11/03/2011</b></font>-You should dbe more specific than that. Several can be two. If it is the 5mg Vicodin, than 10ug would not be the starting dose. If it was a 7.5mg, than it would be the proper starting dose after a proper titration to <30mg morphine equivalents. There are too many unknowns in your call notes to leave the statement as is. <font color=green><b>SIMERTOC's response on 11/08/2011</b></font>-Ok. I will be clearer about this. <font color=blue><b>CHUDAKOB added notes on 11/09/2011</b></font>-Thank you!
PPLPMDL0020000001	Cleveland	OH	44121	10/13/2011	I reviewed the butrans patient indication and that it might be appropriate for patients who have failed on tramadol or before vicodin. She said she does not treat pain - chronic or acute. Gave her an initiation guide and formulary grid.
PPLPMDL0020000001	Parma	OH	44129	10/13/2011	DABBLER/FIRST TIME CUSTOMER- Saw Dr Gallagher briefly at the window. I asked him if he had any questions regarding Butrans since our last discussion. He said there was "nothing new" & added that he just got something I had left for him from a week or two ago. He said he just looked over it, thanked me, & then started talking to his patient. Spoke with Sheila (MA) & discussed Butrans as a once weekly transdermal system for moderate to severe chronic pain. Also gave her formulary grid & savings cards.
PPLPMDL0020000001	Westlake	OH	44145	10/13/2011	I showed the clinical trial for patients who are opioid experienced. I asked if he sees patients like the ones in the inclusion criteria and he said he does. I asked if he finds that a 30% reduction in pain is significant and he said that it is. He said that he is determined to try it. He said that he put the patient information in the exam rooms to help him remember. Reminder that OxyContin is an option when Butrans may not provide adequate
PPLPMDL0020000001	Cleveland	OH	44111	10/13/2011	Spoke with Dan, he has not seen a lot of movement of Butrans at this store, but they have it in stock. He thinks they have received a few scripts. I reviewed the information to let patients know about Butrans such as application, rotation disposal, and steady state. He said that he will ask the patients if they have any questions. We discussed the savings programs for Butrans and OxyContin.
PPLPMDL0020000001	South Euclid	OH	44121	10/13/2011	I introduced doc to butrans with the indication and positioning. Explained the CII status and 7 day delivery in once weekly dosing. He thought it was a good idea but commented that people won't like that because they can't take a bunch of pills. I explained that Butrans is still a scheduled narcotic and has the potential for abuse and diversion similar to other opioids.
PPLPMDL0020000001	Cleveland	OH	44111	10/14/2011	We reviewed the savings programs and managed care for both OxyContin and Butrans. We discussed the Butrans medication guide and how to instruct the patients about proper use of Butrans. I asked if she would recommend Butrans when she is working with the Drs and she said that she will.
PPLPMDL0020000001	Parma	OH	44134	10/14/2011	Spoke with technician who said that Mercedes was unavailable to talk. I gave her an updated Butrans FPI & reviewed Butrans appropriate patient type with her. She said she has not seen any activity of Butrans at this store. Discussed automatic savings via e-voucher & OxyContin savings cards.
PPLPMDL0020000001	Cleveland	OH	44135	10/14/2011	Spoke with Brad, we discussed the appropriate patients for Butrans and I asked if he would ever recommend. He said that he would if the patient was not happy with their current therapy. We discussed the medication guide and eh agreed to give them out to any Butrans patients. We discussed when OxyContin may be an option when Butrans may not provide adequate analgesia.
PPLPMDL0020000001	Cleveland	OH	44111	10/14/2011	Dr asked me again where Butrans fits in. We reviewed the appropriate patient types and the invitation guide. I showed him the inclusion criteria in the main vis aid. I asked if he sees these types of patients and he said all the time. He said that he has been doing a lot of procedures but would like to see if Butrans might have a place when patients need medications.
PPLPMDL0020000001	Cleveland	OH	44109	10/14/2011	dr said he talked to a few patients this week about Butrans but they werent interested in wearing a patch and just wanted to stay on their pills. I told dr that that was good he spoke with a few patients about Butrans but asked if they were appropriate patients for Butrans, dr said he thought so as they were taking short-acting opioids daily but not controlled and wanting more pills, showed dr Butrans visual aid, discussed appropriate patients-focused on opioid experienced patients and initiation of Butrans, told dr to give Butrans patient info booklets to patients as a way to educate them, dr liked that idea and said he would do that. I asked dr to find 1 patient today and next week, thats appropriate, and start that patient on Butrans, dr said he will do his best, discussed BWC and commercial insurance plans, recommended senokot-s
PPLPMDL0020000001	Cleveland	OH	44113	10/14/2011	talked to dr about appropriate patients for Butrans as dr said he couldnt remember who the right patient was for Butrans, showed Butrans visual aid, pg.11 discussed pain conditions in the inclusion criteria, dr focused on back pain patients, asked dr if he had a few patients in mind, per our discussion, that he could start on Butrans? dr said yes he does and will talk to patients about trying Butrans, dr said a lot of patients get on the pills and dont want to try a patch, showed dr Butrans patient info booklet and asked dr to give this booklet to patients to assist in educating them, dr said he liked that and would do that, dr asked about insurance coverage for Butrans, showed Butrans formulary grid and focused dr on commercial insurance patients, recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44109	10/14/2011	dr said he's talking to more patients about Butrans, started a few more patients on Butrans and so far the patients seem to be tolerating the medication, we discussed appropriate patients, visual aid-opioid experienced patients, initiation and titration of Butrans and I asked dr to start a few more patients today and next week on Butrans, dr said he will do that, focused dr on BWC and commercial plans for Butrans starts, recommended Senokot-
PPLPMDL0020000001	Cleveland	OH	44113	10/14/2011	showed dr pg.11 visual aid, discussed pain conditions in inclusion criteria and asked dr if he treats these conditions? dr said yes all types and all the time, asked dr how Butrans could fit into his algorithm, dr said he wasnt sure as he hasnt prescribed Butrans yet but maybe for patients who dont want to take pills anymore. I asked dr how often he hears that from patients? dr said not often, showed dr appropriate patients for Butrans, opioid experienced was focus of discussion, asked dr if patients ever ask for something different than what they are taking? dr said yes. I asked dr to start a couple patients like that on Butrans, discussed initiation and titration of Butrans and focused dr on commercial pain patients, dr said he will think of some patients and talk to them about Butrans, recommended Senokot-5
PPLPMDL0020000001	Westlake	OH	44145	10/14/2011	I asked Dr what he would think if 50% of the patients he tried on Butrans saw a 30% or better reduction in pain. He said that that would be pretty good. I showed Dr that our clinical trials showed these types of results. I asked if he would try Butrans for these patient types and he agreed. He said that managed care is the only reason he does not prescribe more and we focused on commercial insurance. We reviewed OxyContin as an option when Butrans may not be covered my managed care.

PPLPMDL0020000001	Cleveland	OH	44111	10/14/2011	Spoke with John, he still has not seen movement with Butrans. He said he thinks it would be a good option for some patients who are on tramadol around the clock. We reviewed the invitation guide and doses. We reviewed when OxyContin may be an option when Butrans may not provide adequate analgesia.
PPLPMDL0020000001	Independence	OH	44131	10/14/2011	Quick call- Roman came to the window & said he did not have time today to talk. Positioned Butrans for patients who are not well-controlled on tramadol who have commercial insurance. Handed back BUP3015 & asked him to review this information as I thought it would be relevant for his practice. He said he would look over the study, then walked away.
PPLPMDL0020000001	Cleveland	OH	44109	10/14/2011	worked pm&r dept - see call notes on dr jaffer, dr greenwood and dr fox
PPLPMDL0020000001	Lakewood	OH	44107	10/14/2011	I told Dr that I want to show him what his patients get when he writes Butrans. We reviewed the demo and carton. I asked his thoughts. He asked about initiating patients who are already on opioids and we reviewed the initiation guide. I asked if he has patients on low dose vicodin like the ones we discussed that he could start a 10mcg Butrans. He agreed. We discussed OxyContin as an option when Butrans does not provide adequate
PPLPMDL0020000001	Cleveland	OH	44113	10/14/2011	dr said he hasn't started anyone on Butrans but knows its available. asked dr what's holding him back, dr said nothing he just hasn't thought of Butrans. dr asked about medicaid coverage for Butrans as that's a large percentage of his practice. talked to dr about insurance coverage, focused dr on BWC and commercial plan patients and asked dr since he's asking about insurance coverage does that mean he's got some patients in mind that he can start on Butrans? dr said he has a couple that may be willing to wear a patch but most patients want their pills. I showed dr Butrans fpi, maintenance of therapy section and told dr he can give immediate release or non-opioid therapy with Butrans. dr said ok. talked to dr about OxyContin being an option for patients, showed conversion guide and discussed formulary coverage. asked dr to continue starting new patients on OxyContin when appropriate, dr said he will do that. recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44113	10/14/2011	dr said she's continually starting patients on Butrans and seeing good results so she's happy. showed dr BUP3015, discussed results and dr thoughts, dr said 30% reduction in pain was clinically significant. I asked dr if she had patients taking vicodin every day for 1 of the pain conditions shown in visual aid, pg.11, that aren't controlled and she could start them on Butrans? dr said she might have some but hasn't thought about it she's been focused on percoct patients to start on Butrans. dr said she will think about it and consider that next time she sees her patients taking vicodin. focused dr on BWC and commercial insurance plans for Butrans. recommended Senokot-S
PPLPMDL0020000001	Beachwood	OH	44122	10/14/2011	Spoke with nurse, Ted, & inquired about their need for Butrans or OxyContin savings cards. Ted said that Dr Tabbaa was already gone for the day & he did not know if any cards were needed. Asked him to give Dr Tabbaa an "Initiations" invite & request that he log on to experience some case studies. Ted said he would leave the information for Dr Tabbaa. I asked who normally gives out savings cards to patients & he said they do not have a system for that at this point since there have been so many changes within the suite. He said he services all the different doctors who are in this suite.
PPLPMDL0020000001	Cleveland	OH	44130	10/14/2011	Quick call- Saw Dr Popa at the window. Reminded her of our previous Butrans conversation & positioned Butrans for patients taking chronic tramadol who are not adequately controlled. Handed back Butrans savings cards & asked her to keep commercially insured patients in mind. Reviewed savings cards with Renee & told her they are for commercially insured or cash-pay patients only.
PPLPMDL0020000001	Cleveland	OH	44109	10/14/2011	I talked to Nate, Pharmacist, about Butrans 5 core selling messages and discussed formulary grid, no scripts here and they aren't ordering Butrans until that 1st script comes into pharmacy. we discussed importance of stocking and I asked if Nick could at least give patients the Butrans patient info booklets if they are taking immediate release opioids and not controlled and perhaps asking for something else. Nick said he'll do that. discussed OxyContin formulary coverage and stocking and Nick said they are seeing more new Rx for Opana ER and just the same patients coming in monthly for OxyContin, asked Nick if he knew why that was occurring. Nick said he had no idea. recommended senokot-S
PPLPMDL0020000001	Parma Heights	OH	44129	10/14/2011	Spoke with pharmacist Larissa & reviewed appropriate Butrans patient type, focusing on patients calling too soon for refills of short-acting opioids because it is not lasting long enough. She said this is common. I gave her patient information guides & asked if she would give them to patients who she feels would be appropriate for Butrans so that they can talk to their doctor about Butrans as an option. She agreed to do this. Also gave her updated FPI & discussed OxyContin savings cards.
PPLPMDL0020000001	Cleveland	OH	44109	10/14/2011	dr said he's not started anyone on Butrans yet as he doesn't have that many patients on opioids. dr said he really isn't comfortable starting patients on a long-acting opioid. he was trained to start patients on tramadol and when that fails go to vicodin and if that doesn't control patients pain go to percoct. dr said it's just a way of thinking for him to prescribe short-acting opioids 1st and then when all else fails he goes to long-acting opioids. showed dr BUP3015, discussed opioid experienced patients and results from clinical trial, dr said the data was clinically significant so he will keep Butrans in mind for any patients he feels are appropriate. focused dr on BWC and commercial plan patients. recommended Senokot-S
PPLPMDL0020000001	Parma	OH	44129	10/14/2011	DABBLER- Only got to see Dr Gigliotti briefly as he was dealing with a "serious" patient issue. Positioned Butrans for patients not well-controlled on their short-acting opioids & OxyContin for patients beyond Butrans range. Spoke with Jaz, reviewing savings cards for both products.
PPLPMDL0020000001	Westlake	OH	44145	10/14/2011	I asked Dr if he's been happy with Butrans enough to make it part of his regular protocol. He said yes, and he is prescribing Butrans regularly. We reviewed the initiation guide and he said that he is usually converting patients from other opioids. We discussed tapering down and starting Butrans 10mcg. Reminder that OxyContin is still an option and he mainly prescribes for cancer patients.
PPLPMDL0020000001	Beachwood	OH	44122	10/17/2011	PROSPECT- Showed Dr Warren Butrans BUP3015 efficacy data & asked him if he found this to be clinically meaningful. He said yes. I told him the reason I was showing him this was to help him feel more comfortable with Butrans & its efficacy. He said that made sense. Reminded him of appropriate patient type, especially those who are not well-controlled on tramadol. Also let him know that OxyContin is covered on 92% of plans nationally. I asked Dr Zaidi if he thought he would ever really write Butrans. He said he will if he sees the right patient. I asked him if he thinks he even sees the right patient type in his office or if he thinks his patients are on too high a dose of opioids for Butrans to be appropriate. He said he doesn't know. He added that he wants to hear what other pain management physicians are doing. I told him the best way to do this would be to attend a program, & gave him the invitation for the 10/20 Cleveland program. I asked if he thought he could go. He said he thinks so. Dr Zaidi said it is important to understand not only a patient's needs but also their mindset. I asked what he meant. He said if he tells a patient to put a patch on for a week, they will not want to do this. I asked why. He said they want something to take when they have pain. I reminded him that patients can take supplemental analgesia in the form of opioids or non-opioids, when on Butrans. He said he would not prescribe Butrans with an opioid because of buprenorphine. I reminded him that Butrans is a partial agonist & that Butrans' FPI states that use of supplemental opioids is acceptable. He said again that he wants to hear other physicians talk about it. I told him he would either have to come to the program or call the physicians he wants to speak to. Discussed OxyContin for appropriate patients. He said he has been starting new patients on it. Savings cards & managed care reminder.
PPLPMDL0020000001	Garfield Hts	OH	44125	10/17/2011	PROSPECT- I reminded Dr Sadowski of our lunch conversation where he told me he was going to prescribe Butrans & asked him if this was going to be the week when he identified an appropriate patient. He said he does want to use it & that he is old, so he forgets. I told him I came to see him early in the week so that my message would be fresh while he was seeing patients all week. Positioned Butrans for patients if around-the-clock tramadol is not controlling their pain. He said he will try to remember that. Spoke with Deena, asking her to assist Dr Sadowski in identifying appropriate patients for Butrans & she agreed.
PPLPMDL0020000001	Parma	OH	44129	10/17/2011	PROSPECT- Dr Taylor said she is not taking any new patients & wishes she didn't have to prescribe opioids at all. She said that she has been keeping Butrans in mind but she has not switched anyone's medication & has not seen any Butrans candidates. I asked if she felt comfortable with Butrans safety & efficacy. She said yes & that she has no problem with the medication at all, it is just that since she has cut back to one & a half office days per week, she just hasn't seen an appropriate patient. She said she will continue to keep it in mind going forward. Discussed OxyContin being covered on 92% lives nationally.
PPLPMDL0020000001	Parma	OH	44129	10/17/2011	Introduced myself & Purdue's products to Dr Moysenko. Delivered 5 Butrans core messages & alerted him to box warning. Reviewed appropriate patient type & asked if Butrans sounds like something he would use in his practice. He said it all depends on insurance. Discussed commercial insurance coverage. He asked if it would really stay on for a full week. I told him it is designed to stay on for seven days, although not every patient will have that success. Discussed importance of proper site preparation, application & rotation. I asked him how that all sounded & he said he thinks it sounds like something he might have a use for but that he would like to learn more about it over lunch. Handed him Initiations invite & let him know this would be a great way for him to get Butrans information online at his convenience. Also discussed OxyContin q12h as an option for patients beyond appropriate range for Butrans.
PPLPMDL0020000001	Beachwood	OH	44122	10/17/2011	Spoke with pharmacist, Shelley, & gave her updated Butrans FPI. She said she has not seen any movement of it at all & that she still has the partial box on her shelf from the initial prescription of a single patch. Reviewed appropriate patient type with her, focusing on patients who are taking chronic around-the-clock tramadol & are not well-controlled (ie calling too soon for refills). Shelley said the problem she sees is that people do not want to "give up their pills". Reminded her that supplemental analgesia can be taken with Butrans. She said also that most patients are on too high of a dose of opioids to be appropriate for Butrans. She said she just does not see patients switching to Butrans if they are used to taking oral medications for pain. Discussed appropriate patient selection. She said she did not need additional OxyContin savings cards.
PPLPMDL0020000001	Parma	OH	44129	10/17/2011	Spoke with Georgia & floater pharmacist & reviewed Butrans 5 core messages & appropriate patient type. The pharmacist said he had not filled any prescriptions for Butrans but has seen it stocked. Discussed pharmacists' webinars & interactive nature of the programs. Reviewed patient information booklet & let them know they can be given out to customers who they believe may benefit from Butrans, based on their patient type. Discussed savings cards for Butrans & OxyContin.
PPLPMDL0020000001	Lakewood	OH	44107	10/17/2011	I asked Dr what type of patient do you think would be a good Butrans patient. He said one that is rich. I reviewed the managed care and asked if he thought \$15 copay was reasonable. He said yes. I asked what type of patient would be good for Butrans if they have the right managed care. He said an opioid naive patient. I asked if he considers tramadol to be an opioid and he said no. He thinks that Butrans would be a good next step for a patient maxed out on tramadol. I asked what dose are they maxed out on and he said he does not like to go over 200mg per day. I asked if he would try Butrans for a patient who is taking 200mg of tramadol around the clock and he said he will. Reminder that OxyContin is still an option when Butrans may not provide adequate analgesia.
PPLPMDL0020000001	Lakewood	OH	44107	10/17/2011	Quick call, I asked Dr what's the downside to giving Butrans a try. He said he does want to try it, he just needs to think of Butrans when he sees the right patient. I reviewed the initiating guide and asked him again to try Butrans for a patient instead of increasing the dose of vicodin around the clock.
PPLPMDL0020000001	Lakewood	OH	44107	10/17/2011	Quick call at window, I showed the carton and demo and showed what the patients get if he were to prescribe Butrans. I asked his thoughts and he said he will think about it. He said he will review the invitation guide. I told him I'd follow up and get his thoughts.
PPLPMDL0020000001	Lakewood	OH	44107	10/17/2011	Quick call, I showed Dr what his patients will get when he prescribes Butrans. I reviewed the demo and carton. He said it looked good, and he has been getting good results. I reminded him to give the medication guide and savings cards. I reminded him that OxyContin is an option when Butrans may not provide adequate analgesia.
PPLPMDL0020000001	Lakewood	OH	44107	10/17/2011	I showed the demo and carton and showed what her patients get when she prescribes Butrans. I asked if she will continue to start new patients based on her experience. She said she would write it more if it was more affordable. I reviewed the savings cards and asked her to focus on commercial insurance. I reviewed OxyContin as an option with good managed care coverage.
PPLPMDL0020000001	Akron	OH	44333	10/17/2011	Opened the call by asking if his patients were happy with Butrans. He said some were and some were not. He said many don't want to take their pills. This led to a discussion on the use of short-acting opioids with Butrans as is described in our PI. The Dr. was unaware of this as he thought Butrans was an agonist-antagonist. We discussed this as well. The doctor wants to use this in the elderly. I reviewed the formulary coverage and asked him to focus on commercial insurance and Worker's Comp. He said he will continue to prescribe Butrans.
PPLPMDL0020000001	Lakewood	OH	44107	10/17/2011	Spoke with Meagan, I asked how often she consults with patients and she said he does sometimes. I asked if she would consult with Butrans patients to make sure they know about application and rotation, steady state and that other doses are available for titration. She said she would but has not seen many Butrans patients in general. We reviewed the savings program for Butrans and OxyContin.
PPLPMDL0020000001	Cuyahoga Falls	OH	44221	10/17/2011	I opened the call by asking her how her patients liked Butrans. She said some do and others don't, but mostly it is she forgets. I went over the correct opioids experienced patients discussing a patient on 3-4 hydrocodone/day and looking to increase their dose. She said she had a patient today that could have used it, but she forgot. She said she will use, but needs to be reminded.
PPLPMDL0020000001	Lakewood	OH	44107	10/17/2011	I asked Dr if he has started any patients on Butrans recently. He said no, he forgets. I asked since I just reminded him if he will start a new patient today. He said he will try. I told him I'd be back to follow up on Friday.
PPLPMDL0020000001	Lakewood	OH	44107	10/17/2011	I asked Dr where is he finding the most success with Butrans. He said he has been switching patients on vicodin or percoct. We reviewed tapering patients down and starting on the 10mcg. I asked if he has a patient coming in this week taking low dose vicodin or percoct who he feels might benefit from Butrans. He said that he would write it. I asked if he is still starting new patients on OxyContin and he said that he does have patients but mostly they are maintained. I asked if he would write OxyContin when Butrans may not provide adequate analgesia and he said he would.
PPLPMDL0020000001					

PPLPMDL0020000001	Lakewood	OH	44107	10/17/2011	Spoke with Aduwa, I asked how often she consults with patients. She said only if they have questions. I reviewed the medication guide and asked her to consult with new Butrans patients and she said she would. We reviewed the savings program for Butrans and OxyContin.
PPLPMDL0020000001	Richmond Heights	OH	44143	10/17/2011	Quick call....I reviewed the butrans indication and selling messages. I asked her if she has patients taking tramadol or some short acting ATC. she said maybe a few. She asked if butrans is covered on medicare. I told her not at the moment but is well covered commercially and affordable with a savings card. I explained the savings card and she said patients don't even want to pay \$20. Gave her a formulary grid and branded trial for opioid
PPLPMDL0020000001	Parma	OH	44129	10/18/2011	DABBLER- Quick window call. I handed back a Butrans dinner invitation & asked if Dr Chagin thought he could go. He said probably not to this one. Also asked him about Butrans feedback. He said he really hasn't heard much of anything but he had to run to see patients now. Spoke with Debbie (MA) & asked her if they need savings cards, but she said they do not.
PPLPMDL0020000001	Cleveland	OH	44114	10/18/2011	REPEAT-dr said she's not started anyone on Butrans in past week,asked dr if she's had any patients taking tramadol daily for 1 of the pain conditions shown,pg.11 visual aid,but not controlled and asking her for something else? dr said she didnt remember off the top of her head but probably yes,asked dr how Butrans could have been an option for them.dr said she's really only thinking of Butrans after patients are maxed on vicodin or percocet,thats when she's discussing Butrans.reminded dr of her comments that she would start patients on Butrans,after tramadol doesnt control patients pain,dr said she knows she just has to do it.we discussed initiation and titration of Butrans and focused dr on BWC and commercial plan patients,asked dr if she will start 1-2 patients this week,with 1 of the pain conditions on pg.11 visual aid,that are taking immediate release opioids but not controlled? dr said she will do her best.
PPLPMDL0020000001	Westlake	OH	44145	10/18/2011	I reviewed our last conversation about prescribing Butrans as an option instead of increasing the dose of low dose vicodin or percocet. He said he is trying to start more patients on Butrans and he will write it. Reminder that OxyContin is still an option for patients on higher doses of opioids and he will continue to write it.
PPLPMDL0020000001	Mayfield Heights	OH	44124	10/18/2011	Prospect. I asked doc how important clinical trials are to him when it comes to trying a product. He said he likes to see them. I set up the clinical study on opioid experienced patients. Discussed the objective, design, and results. He thought the 30% improvement was 'good'. He asked how the pain specialists are using butrans. I explained that they seem to be using it for newly referred patients from primary care and that butrans might best fit in primary care before going to pain mgmt. I asked him if he honestly would give butrans a try. He admitted that he has plenty of patients taking short acting opioids. He thinks butrans would be good for those that cant tolerate vicodin. He said he would try it. I asked him about attending the speaker program but he is committed to something else.
PPLPMDL0020000001	Parma	OH	44129	10/18/2011	Spoke with Fenja (pharmacist) & gave her updated Butrans FPI. Discussed appropriate patient type & range of patients, including those on short-acting who are calling too soon for refills or complaining that their pain is not being controlled around-the-clock. Also discussed ability to take supplemental analgesia if necessary, in the form of immediate release opioid or non-opioid medications. Reviewed OxyContin savings cards, but they did not
PPLPMDL0020000001	Brooklyn	OH	44130	10/18/2011	Spoke with Renee (pharmacist) who said that Butrans activity has not changed very much. I asked her if she could tell me if anyone locally was prescribing. She checked her system & said that Dr Tabbaa, Dr Hernandez, & Dr Chauhan (NinthHill) were the prescribers in her database for prescribing. She said it was mostly Dr Chauhan & gave me his address, suggesting I visit him. She said he is a PM&R physician. Reviewed appropriate patient type & patient information booklet. Also discussed savings cards.
PPLPMDL0020000001	Lyndhurst	OH	44124	10/18/2011	Dabbler. I asked doc if she has patients that are currently taking tramadol ATC that are looking for titration. She said sometimes but he problem is that those appropriate patients are often medicare and she is just not seeing enough patients that would fit the positioning and the insurance. I asked what she thinks of the product in general. She said she likes the idea of a patch but she tries to make chronic meds a last resort and then there are other products that are less expensive. I sympathized that cost is always a concern. I asked her to prescribe butrans for patients under 65 that have insurance through their work and that have failed on 300 or 400mg of tramadol. She said she is still trying. I asked her to prescribe low dose oxycontin for those medicare patients. She can't make the 10/20-speaker program.
PPLPMDL0020000001	Cleveland	OH	44109	10/18/2011	talked to dr about patients he's starting on Butrans,dr said he started a few patients that had Buckeye Insurance and Medicare and he was getting PA's for both,explained to dr and showed dr Butrans formulary grid that he should focus on BWC and commercial insurance,dr said 50% is medicalaid,25%BWC,15-20% are commercial plans,discussed Butrans patient savings cards,for commercial plan patients,showed dr Butrans visual aid,opioid experienced patients and asked dr to start a couple more patients this week on Butrans but focusing on BWC and commercial insurance,dr said he will do that,discussed Butrans patient info booklet and asked dr to show patients application/rotation of Butrans info,dr said he will do that.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44195	10/18/2011	worked anesthesia/pain management dept-left Butrans fpi,initiation guide,BUP301S clinical trial,patient info booklet,formulary grid and my business card for Dr.Cheng,Dr.Stanton-Hicks,Anne Crawford,Kathy Kraus,Dr.Mekhal,Dr.Mintzer and Dr.Vrooman as I couldnt see anyone today,just leave info at front desk
PPLPMDL0020000001	Brooklyn	OH	44144	10/18/2011	PROSPECT- Spoke with nurse, Nancy, & asked her to give Dr Deeb the Butrans program invitation for Thursday. Let her know he has not heard a formal presentation yet on Butrans & asked her to encourage him to attend because of this. She said she would give it to him & that he does go to dinners occasionally. Discussed appropriate range of patients for Butrans as well as savings cards for both Butrans & OxyContin. She said she did not think they needed any cards at this time.
PPLPMDL0020000001	Cleveland	OH	44130	10/18/2011	DABBLER- I showed Dr Diab Butrans efficacy data from BUP301S & asked what his thoughts were on 49% of patients on 20mcg reporting at least a 30% reduction in pain. He said he thought the results were "acceptable". OxyContin covered formal coverage message delivered before he walked into his next room.
PPLPMDL0020000001	Cleveland	OH	44112	10/18/2011	Quick call...I reminded doc that last week he expressed interest in attending the proram to learn more about butrans. I asked if he will make it. He said he is not sure but asked if I could remind him the day of. I reviewed the butrans 7 day delivery, CII status and the indication for mod to severe pain.
PPLPMDL0020000001	Westlake	OH	44145	10/18/2011	I asked the Dr where he is prescribing Butrans in his practice. He said that there is no specific patients type. He just will write it when he feels a 7 day patch is available. Dr said that he has had success with Butrans and one patient in particular had really great success. I asked if he would continue to prescribe based on his experience so far and he said he will. I reminded him that OxyContin is still an option. (Dr said that he has a patient who said the patch did not stick for the full 7 days. The Dr said that this patient seems to be sweaty every time he examines him. reported as AE)
PPLPMDL0020000001	Cleveland	OH	44113	10/18/2011	dr said he's still starting patients on Butrans,going good no complaints from patients and no issues with insurance,asked dr who are the patients he's starting on Butrans? dr said some patients are taking 20-25 mg Vicodin a day and others are taking 40mg vicodin a day,so he's starting them on Butrans,asked dr to continue starting those patients on Butrans,dr said he will,focused dr on BWC and commercial plans,asked dr if he could share with his 2 NP's,Caryn and Jen,at their next meeting,who is appropriate for Butrans and clarified with dr that both NP's have his approval to prescribe Butrans,dr said BOTH NP's have been given an email and verbal approval stating they can prescribe Butrans.dr said Butrans is a CII so both NP's can prescribe what they want,dr said they have a meeting tomorrow at lunch time so he'll address this with both NP's.
PPLPMDL0020000001	Independence	OH	44131	10/18/2011	DABBLER- Deb said she was running behind & did not have time to talk today. She added that she did not have any Butrans feedback for me at this time but hoped to have something soon. Handed her Initiations invitation & asked her to log on to the interactive case studies. She said she would take a look.
PPLPMDL0020000001	Cleveland Hts	OH	44118	10/18/2011	Prospect. I reviewed the butrans indication, dosing options, 7 day delivery and asked doc if he saw any benefits of a 7 day patch. He said he would like to read more about it. I gave him the BUP 301S trial for opioid experienced patients. I invited him to the 10/20 program and told him that Dr. Ganz expreeded interest in going if he goes. He said he will see. Gave formulary grid for butrans and oxycontin.
PPLPMDL0020000001	Parma	OH	44134	10/18/2011	LOYAL CUSTOMER- Dr Hernandez still reports good results with Butrans. I asked if he finds himself offering it to as many patients as he did upon launch. He said yes, other than the ones who he already has on it or those who tried it without success. He said he just gave it to a patient yesterday who had back pain from two failed lumbar surgeries. I asked what she had been on in the past. He said she was not taking any prescription medications for pain when she came to him. I told him she sounded like the ideal candidate. I asked if he noticed any correlation between success with Butrans & the medication the patient was taking prior to starting Butrans. He said not really. He said it is hard to predict & it doesn't seem to relate to any other factors. I asked him if OxyContin still had a place in his practice at all. He said sometimes, but not as much. He said that because he has always kept patients on lower doses of OxyContin, Butrans has taken over for many of those patients. He said he wants to avoid additive medications when at all possible. I asked if he would agree that all opioids carry abuse/addiction potential. He said maybe but he does not find that buprenorphine has that quality. I told him Butrans still does have abuse/addiction potential. He said that at the BWC meeting last week, they discussed not paying for OxyContin anymore. I asked why & he said because of cost. I asked if any other brands were mentioned but he said no.
PPLPMDL0020000001	Cleveland	OH	44106	10/18/2011	showed dr BUP301S,opioid experienced clinical trial,discussed study design and results,asked dr if the results were impressive? dr said yes, the 20mcg group.dr said he's really not thinking of Butrans for patients when they call into office for refills,he is only starting patients on Butrans if they complain of tramadol not controlling their pain.I asked dr how often does that happen? dr said a lot,asked dr to start those patients on Butrans,dr said he will do that if patients are willing to wear a patch,discussed initiation,titration of Butrans focused dr on Commercial plan insurance.dr said biggest challenge here at Main Campus is that he has majority of Medicaid patients,we discusse PA for Medicaid and Butrans.dr said ok,we discussed OxyContin being an option for patients that dont want to wear a patch and want pills and are ready to start a long-acting opioid,showed dr OxyContin conversion guide and discussed formulary coverage.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44114	10/18/2011	talked to dr about patients he's starting on Butrans,dr said he's talking to any patients currently taking percocet and when they ask for refills or say they want more pills he's telling them Butrans is their only option now,discussed initiation and titration of Butrans and focused dr on finding more patients like the one's he's started,dr agreed.I asked dr if he would consider any patients currently taking vicodin every day for their chronic pain but not controlled,to start on Butrans? dr said yes he would,focused dr on BWC and commercial plan patients,recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44107	10/18/2011	Spoke with Laurie, we reviewed the medication guide and important things to tell the patients when they first get Butrans. I asked if she would consult with a new patients and she does when they have questions or if she knows them as a long term patient. Reminder that OxyContin is still an option and we reviewed the OxyContin conversion guide.
PPLPMDL0020000001	Cleveland	OH	44111	10/18/2011	Spoke with John, we discussed the Butrans medication guide and important things to let the patients know. I asked how often he consults with patients for a new medication. He said he does when they have questions. I asked if he would consult with his new Butrans patients and he said he will. Reminder that OxyContin is an option when Butrans does not provide adequate analgesia.
PPLPMDL0020000001	Cleveland Hts	OH	44118	10/18/2011	Prospect.Quick call....doc said he has 2 or 3 patients he has prescribed butrans for and as far as he knows patients were able to get it. He said he wrote the 10mcg strength as the patients had already been on hydrocodone. I reminded him to taper down to 30mgbefore starting. Reminded him of the program. He said he would try but is usually finishing up in the office about 6:30. Oxycontin patient type reminder.
PPLPMDL0020000001	Mayfield Heights	OH	44124	10/18/2011	Spoke to Warren about the movement of butrans and oxyntin. He said he was initially see scripts for butrans and he thought it "was really gonna be something". Scripts have since died down. The only prescribers have been from Hillcrest Pain Mgmt (Dews, Laham, and Bizjak). I asked what feedback the customers have had. He said they were getting it refilled so assumed it was good. I explained the savings card program and discussed the application process. He said he is still has a steady flow of oxycontin and no longer gets questions about the old formulation.
PPLPMDL0020000001	Cleveland	OH	44143	10/18/2011	Dabbler. I asked doc what patients like about butrans. He didnt answer but said he started a patient last week. The patient was taking maximum doses of tramadol and he wrote a script for 5mcg. I told him that is exactly an ideal patient for butrans - after tramadol.He has not heard back yet. I explained that 5mcg may not be and adequate dose. I showed the initiation guide which shows that that patient should probably have been started on a 10mcg. Also explained that if he positions butrans after tramadol failures, then patients should start on 10mcg. I reminded him to focus on commercial patients and be sure to give a savings card.
PPLPMDL0020000001	Parma	OH	44129	10/18/2011	LOYAL CUSTOMER- I asked Dr Ortega if he has noticed in his patients on Butrans that there is any correlation between if they do well on Butrans & the opioid they were on prior to starting Butrans. Dr Ortega said he does not think he has a large enough sample size to really determine that. I asked him what makes him think of Butrans for a patient. He said he has liked giving it as an option because it is just that, another option. He said the patient's mindset must be right & the patient has to want to get better in order for them to do well on anything. Discussed patient counsel & appropriate range of patients. I asked him where OxyContin fits now that he is also using Butrans. He said Butrans has not changed the way he prescribes OxyContin & he views them as two completely different patient types.
PPLPMDL0020000001	Parma	OH	44129	10/18/2011	PROSPECT- I reminded Dr Roehny of our last conversation & asked him what his real hesitation is with Butrans if it is not really managed care. He said he doesn't think he has one & added that he did "write one or two" but couldn't remember for whom so he has not gotten any feedback. I told him he must have more than just one or two patients for whom Butrans would be appropriate. He said he doesn't like "all the restrictions". I asked him to clarify. He said he doesn't like that he has to remember that he can't write it for Medicaid or Medicare. I told him it didn't seem that he was having trouble remembering that & asked what other "restrictions" he meant. He said that was all. Let him know that OxyContin is covered on most plans.
PPLPMDL0020000001					

PPLPMDL0020000001	Mayfield Village	OH	44143	10/18/2011	Prospect. I reminded hcp of the previous interest she expressed in butrans and attending a speaker program. I reviewed the 7 day delivery and the CIII status. She took the invitation and said she will see.
PPLPMDL0020000001	Maple Heights	OH	44137	10/19/2011	PROSPECT- Dr Dale asked me to refresh his memory on Butrans. Delivered 5 core messages & spent time going over appropriate patient type/range & discussed OxyContin as an option for patients beyond the Butrans range. Presented initiation/titration guide & showed him pg 6. He said he would use it as a guide if he sees the right patient for Butrans.
PPLPMDL0020000001	Bedford	OH	44146	10/19/2011	Spoke with Ed & gave him updated Butrans FPI. Also reminded him of appropriate patient type, focusing on patients who call too soon for refills of their short-acting because it is not controlling their pain adequately. He said he has not filled any Butrans prescriptions himself but has seen it on their shelf. Discussed OxyContin 7 tablet strengths & savings cards.
PPLPMDL0020000001	Warrensville Heights	OH	44122	10/19/2011	Spoke with nurse, Eileen Sell, & discussed Butrans savings cards, including eligibility. Also discussed appropriate patient type for Butrans. Asked her to give Dr Garwood the BUP3024 study, but she said that she has plenty of Butrans information right now & has reviewed it all with the residents & Dr Garwood. She also said they are now only scheduling one lunch per quarter per rep & that I will have to wait to book one in January.
PPLPMDL0020000001	BEDFORD	OH	44146	10/19/2011	Spoke with technician as there was not a pharmacist available. Gave her an updated Butrans FPI & asked her to give it to the pharmacists. She agreed. Also reviewed Butrans 5 core messages with her & discussed appropriate patient type/range. Discussed OxyContin savings cards- they did not need any.
PPLPMDL0020000001	Bedford	OH	44146	10/19/2011	DABBLER- Spoke with MA Roberta & reviewed Butrans appropriate patient type & savings cards for both Butrans & OxyContin. She said she does not know if Dr Haddad has prescribed Butrans lately & doesn't always see the prescriptions when patients leave. Gave her patient information guide & discussed Butrans usage.
PPLPMDL0020000001	Cleveland	OH	44109	10/19/2011	talked to dr about 5 Butrans core selling messages,dr said he's not prescribed Butrans as he hasn't remembered it.we talked about Appropriate patients for Butrans,showed visual aid and BUP3015,dr said the results were impressive and he would think about patients he has that might be willing to wear a patch.we talked about initiation of Butrans and titration,gave dr Butrans patient info booklet and discussed application/rotation of Butrans,asked dr to start a couple patients this week,with commercial plan insurance,that are taking immediate release opioids daily but not controlled,dr said he will consider that.we discussed OxyContin as an option for patients if they dont want to wear a patch and try Butrans,dr has option of OxyContin,dr said he will keep that in mind.asked dr to continue prescribing OxyContin for appropriate patients,dr said he will do that.recommended talked to dr about appropriate patients for Butrans,showed visual aid,dr said he's really only been starting his percoet patients on Butrans when they arent controlled on percoet.I told dr that was great but did he have a couple patients taking vicodin daily for their chronic pain that arent controlled where he could start them on Butrans? dr said probably so he'll have to look and see who's coming in today.discussed initiation and titration of Butrans and focused dr on Commercial plan insurance.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44106	10/19/2011	PROSPECT-talked to dr about pain conditions,pg.11 visual aid,and how Butrans could be an option for patients,dr said he's got some patients in mind and will consider Butrans.showed opioid experienced,appropriate patients,section visual aid,discussed initiation and titration of Butrans and dr asked about insurance coverage for Medicaid patients.talked to dr about PA for Medicaid patients but asked dr to focus on commercial plan patients.dr said ok he will do that.discussed OxyContin as an option for patients,showed conversion guide and discussed some conversions to OxyContin and asked dr to think of a few patients this week that are appropriate for OxyContin,dr said ok.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44114	10/19/2011	talked to Laura,Pharmacist,about Butrans 5 core selling messages,Laura said she's not gotten any scripts for Butrans and she wont order until that 1st script comes in.asked Laura what features stood out to her,looking at 5 core selling messages? Laura said 7 day dosing and transdermal delivery.showed Laura appropriate patients sections in Butrans visual aid and asked Laura to continue giving Butrans patient info booklets to patients taking immediate release opioids but not controlled.Laura said she will do that.we talked about OxyContin stocking and asked Laura if she's seeing new Rx for OxyContin or refills,Laura said mainly refills.gave OxyContin conversion guide and talked about appropriate patients for OxyContin.recommended Senokot-S
PPLPMDL0020000001	Maple Heights	OH	44137	10/19/2011	Spoke with technician Dawn & gave her updated Butrans FPI. Reviewed changes & discussed appropriate patient type, including patients calling too soon for refills of short-acting opioids because they are not lasting long enough to control their pain. Dawn said that does happen. Discussed savings cards for Butrans as well as OxyContin & reminded her that they can only be used for cash-pay patients on those with commercial insurance. She said she would give Jim the information.
PPLPMDL0020000001	Cleveland	OH	44106	10/19/2011	REPEAT-talked to dr about his patients that he's started on Butrans,dr said he knows who the right patient is, low doses of immediate release opioids not high doses of opioids,dr said his patients seem to be doing well on Butrans no complaints from them.asked dr to focus his discussions with patients on application/rotation and give them Butrans patient info booklet to educate patients,dr said he does give them out and will continue doing that.focused dr on commercial plan insurance.<font color=blue><b>CHUDAKOB's query on 10/27/2011</b></font>If his patients are doing well, and he knows who the right patient is, then what is preventing him from starting more patients. Asking this question may uncover the reason he has not started more patients.<font color=green><b>BROOKAM's response on 10/31/2011</b></font>I agree but in his mind and from what he's told me, he believes he's starting as many "appropriate" patients in his practice that he can. I dont know, I will re-address this question again.<font color=blue><b>CHUDAKOB added notes on 10/31/2011</b></font>What does he think is the appropriate patient? he may have misunderstandings about this.
PPLPMDL0020000001	Cleveland	OH	44104	10/19/2011	talked to dr about appropriate patients to start on Butrans,showed visual aid,dr said he's really only been thinking of patients taking high doses of opioids and not controlled,to start on Butrans,dr said he'll think of patients on low doses of immediate release opioids who arent controlled and talk to them about Butrans,asked dr to think of 2 patients taking percoet daily but not controlled with 1 of the pain conditions,pg.11 visual aid,and start them on Butrans? told dr he can give patients Butrans patient info booklets to assist in educating patients on Butrans,dr said ok.focused dr on commercial plan patients and showed formulary grid.recommended Senokot-S
PPLPMDL0020000001	Bedford Heights	OH	44146	10/19/2011	Spoke with Peggy (MA) & introduced Purdue's products. Reviewed Butrans core messages & discussed CIII/abuse/addiction potential. She said that he does not generally prescribe a lot of opioids, but he does have patients on them. Reviewed appropriate patient type & importance of appropriate patient selection for opioids. I gave her a Butrans FPI & initiation guide & asked her to give it to Dr Patil & she agreed.
PPLPMDL0020000001	University Heights	OH	44121	10/19/2011	I asked doc if he see's any benefit to butrans that might be good for his patient population. He said patients dont want a patch, they want pills. I told him that they don't have to completely give up all tablets. I showed him the enlarged FPI and that supplemental analgesics can be used while on butrans. He said it is still too expensive. I told him that for commercially insured patients with a savings card, they can get butrans for as low as \$15/mo. Reminded him that butrans is also covered on BWC like oxycontin. Nothing more learned.
PPLPMDL0020000001	Cleveland	OH	44104	10/19/2011	talked to dr about Butrans being an option for patients he see's in practice,showed visual aid,dr said biggest challenge here is that he has majority of medicare patients that he treats and Butrans isnt covered on medicare plans.i asked dr if he had any commercial plans? dr said a small%,asked dr to start a couple patients with commercial plan insurance and taking immediate release opioids daily but not controlled,dr said he will do that.we talked about OxyContin being an option for patients who are appropriate for OxyContin,showed conversion guide and asked dr to continue starting patients on OxyContin,dr said he will do that.recommended Senokot-S
PPLPMDL0020000001	Maple Heights	OH	44137	10/19/2011	PROSPECT- Dr Gene said he is going to the AOA conference in Orlando & saw that there will be a presentation there on Butrans. He asked me to refresh his memory & said he remembers it is a once-weekly patch of buprenorphine. Spent time going over the appropriate range of patients & discussed OxyContin for patients beyond that range. Went through page 6 of initiation/titration guide & talked about patients who are taking either NSAID's/COX-2's or tramadol chronically who are looking for a different medication for their moderate to severe chronic pain. He said, "So this wouldn't be for someone who is already on fentanyl or who I am going to start on fentanyl?" I pointed out that fentanyl patients were excluded from studies for Butrans. Discussed Butrans as a CIII opioid with abuse & addiction potential. Showed him demo kit & demonstrated how the patches should be disposed of. Also discussed application & rotation. He said he is ready to prescribe Butrans & feels comfortable with it now.
PPLPMDL0020000001	Cleveland	OH	44109	10/19/2011	talked to dr about 5 Butrans core selling messages,dr talked about Butrans being a patch and dosed once a week.showed dr BUP3015,opioid experienced patients and asked if dr had patients with some of the listed pain conditions taking immediate release opioids daily but not controlled? dr said yes she does.told dr those are the patients to start on Butrans,discussed initiation and titration of Butrans.asked dr if she will start a couple patients today and this week on Butrans? dr said she will if patients are appropriate and willing to wear a patch.dr asked about insurance coverage for Medicaid patients as thats large population here.we discussed PA requirements for Butrans.recommended Senokot-S<font color=blue><b>CHUDAKOB's query on 10/27/2011</b></font>Just wondering if you asked her why the patients would not want to wear a patch? I am guessing this is her perceived drawback.<font color=green><b>BROOKAM's response on 10/31/2011</b></font>I will follow up with her next time I see her on that but unfortunately that wont be until nov.9th at my next lunch. thanks<font color=blue><b>CHUDAKOB added notes on 10/31/2011</b></font>Ok. Thanks!
PPLPMDL0020000001	Cleveland	OH	44106	10/19/2011	dr said she's not started anyone on Butrans but has read the Butrans fpi and initiation guide that i left.dr said she's been so busy rotating at all 3 UH sites that she's not really thought much about Butrans.showed dr 5 Butrans core selling messages and asked what stood out to her? Dr said transdermal delivery and 7 day dosing.asked dr if she had patients with 1 of the pain conditions,pg.11 visual aid,taking immediate release opioids daily but perhaps not controlled? dr said probably so,she does hear that from patients and patients want something else.asked dr if she could start a few patients like that on Butrans? dr said she'll consider it but doesnt have many patients on opioids.dr asked about Medicaid insurance as thats the biggest population here at Main Campus.talked to dr about PA requirements for Butrans and asked dr to focus on commercial plan patients for Butrans,dr said ok.showed dr Butrans initiation and titration sections,in visual aid and gave Butrans patient info booklet asked dr to focus patient discussions on application/rotation and side effects of Butrans,dr said ok she will do that.
PPLPMDL0020000001	University Hts	OH	44118	10/19/2011	Prosepect. I reviewed the butrans positionning - before going to hydrocodone ATC - and its 7 day delivery. I asked him if he has any patients that are taking 2 or 3 tablets of vicodin or tramadol and not getting adequate analgesia. He said maybe. I asked him to try just one of those patient on butrans. I showed and explained the starting dose base on their current therapy. No commitment. Provided formulary grid for oxycontin and butrans. Invite to the 10/20 speaker program.
PPLPMDL0020000001	Cleveland	OH	44109	10/19/2011	PROSPECT-dr said he's not started anyone on Butrans and hasn't really thought of Butrans.i showed dr Butrans visual aid,pg.11 and discussed pain conditions and dr said he see's all of them and more.asked dr if there were any therapies he would like to replace? dr said he doesn't like prescribing narcotics but has to treat pain so the short-acting opioids work for awhile with physical therapy,injections,etc and when all short-acting opioids fail then he'll consider a long-acting opioid. asked dr to consider Butrans as an option for opioid experienced patients,showed visual aid and discussed BUP 3015,dr said he'll think about it as he probably has a few patients that he could start on Butrans.dr asked about Medicaid coverage for Butrans,we discussed PA requirements and i focused dr on commercial plan patients to start on Butrans.we talked about OxyContin being an option for those patients who are ready for a long-acting opioid yet not willing to wear a patch,showed OxyContin conversion guide and discussed insurance coverage for OxyContin.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44106	10/19/2011	discussed 5 Core selling messages with dr,dr said he doesn't really prescribe much narcotics and hasn't started anyone on Butrans.showed dr Butrans visual aid,asked him what features of Butrans stood out to him? dr said he likes that Butrans is transdermal and 7 day dosing but again his patients arent on a lot of narcotics so he's not sure if he has anyone in mind to start on Butrans.dr said he'll take info and think about,gave dr Butrans initiation guide,fpi,patient info booklet and discussed insurance coverage with dr focusing dr on commercial plan insurance.
PPLPMDL0020000001	Euclid	OH	44119	10/19/2011	Prospect. I asked doc what he remembers about butrans. He remembered its once a week. Affirmed that response. I asked him where is he likely to use it. He just looked and me and responded, "for Pain". I reviewed the indication and the positioning. I asked him to try one patient on 10mg of butrans after they have failed on 300mg of tramadol. He recited the dosing and the positioning. I invited him to the speaker program to learn more about butrans. He said he will see.
PPLPMDL0020000001	Bedford	OH	44146	10/19/2011	REPEAT CUSTOMER- I asked Dr Moufawad to tell me about his speaker training. He said that he learned a lot. He said he learned that he can prescribe Percocet with Butrans without worry. He also explained Butrans as a partial agonist to me in the way he was taught. He said prior to training he just did not understand how Butrans was different from Suboxone but now he understands. I asked if he felt more comfortable with Butrans now & he said he feels much more comfortable. He added that he has not prescribed it since his return but that he is excited to start trying it on more patients.
PPLPMDL0020000001	Cleveland	OH	44103	10/20/2011	asked dr about patients she's started on Butrans,how they were doing? dr said great,patients having success with Butrans.dr said these are patients taking percoet that arent controlled.showed dr Butrans initiation guide,appropriate patients and discussed refills of Butrans.dr said that was important she could write refills of Butrans,told dr she can write refills because Butrans is a CIII.discussed insurance with dr and dr said she has 1 patient coming in tomorrow that's taking percoet so she'll talk to this patient about Butrans.
PPLPMDL0020000001					

	Hudson	OH	44236	10/20/2011	PROSPECT- I asked Dr Tosino what was really holding him back from trying Butrans. He asked who was using it. I told him physicians of various specialties, including primary care, are having success with their patients on Butrans, although it is not for everyone. Spent time going over appropriate patient type, focusing on patients who have a chronically painful condition & are not well-controlled on 3-4 tramadol per day. I asked if it was fair to ask him to try that type of patient & he said yes. He said he does want to start using it. I told him the first prescription is the hardest one to write & asked him to identify a few patients in his mind who may be good candidates & switch them to Butrans to get his own clinical practice to see if he finds Butrans to be a viable option for these patients. He agreed. I asked him about his experience with OxyContin. He said he does write some. Discussed 7 tablet strengths, including 15mg. He said that was good to know. He asked about insurance coverage. Let him know it is covered on 92% of lives nationally & discussed savings cards.
PPLPMDL0020000001	Cleveland	OH	44103	10/20/2011	talked to Abdul,Pharmacist,about Butrans scripts,no Rx yet,we talked about appropriate patients for Butrans and insurance coverage.asked Abdul if he's seeing OxyContin Rx still? Abdul said yes.Abdul said he thinks Butrans would be better for patients as its a patch and less abusable than taking pills.told Abdul Butrans has potential for abuse like any other opioid.Abdul said he knows that.
	Hudson	OH	44236	10/20/2011	Spoke with Beth, pharmacist, & gave her updated Butrans FPI. She said she has not filled any prescriptions for it. Reviewed appropriate patient type, focusing on patients who are not well-controlled on tramadol chronically around-the-clock. She said that made sense. She asked if I called on Dr MacCallum. I told her there is no access there. She said he has a patient that she was thinking would be a good candidate for Butrans. I asked if she would give the patient an information booklet to take to him so he could ask Dr MacCallum about it. She said she doesn't think doctors like when patients take in information asking about a product. However, she did say she would mention it directly to Dr MacCallum when she speaks with him next. Discussed OxyContin savings cards.
PPLPMDL0020000001	Cleveland	OH	44109	10/20/2011	dr said he signed PA for Caresource patient to get Butrans he's not sure if it was approved,asked dr what made him decide to start patient on Butrans? dr said patient was already on Butrans,patient of Dr.Carson he just signed the approval for patient to get PA,asked dr if he had 20 patients taking a pain medication and half of them came back saying their pain was at a 7 versus a 10,would that be clinically significant? dr said yes but its not that simple to take patients off 1 medication and start them on another due to patient resistance.told dr to focus on BWC and commercial plan patients.
PPLPMDL0020000001	Cleveland	OH	44113	10/20/2011	talked to dr about his comment that since he attended Butrans dinner program in Aug.2011,he said his comfort level increased with Butrans and he had started 1 patient,asked dr if he still felt that way? dr said yes.I asked dr what types of patients came 2 mind? dr said he has 1 patient in exam room that cant take vicodin because it upsets her stomach and she's been taking percocet but he's not willing to give her percocet again so he'll talk to her about Butrans.told dr to give Butrans patient savings card and booklet to patient.
	Hudson	OH	44236	10/20/2011	Spoke with pharmacist Angela & gave her updated Butrans FPI. I asked her what strengths they stock & she checked her stock & said they had the 10 & 20mcg. Went over appropriate range of patients & Butrans patient type, focusing on those who are taking chronic tramadol around-the-clock & are not well-controlled. She said it makes sense to use Butrans there. Discussed automatic savings via e-voucher & OxyContin savings cards, which she said they did not have any of. Gave her one pack of cards.
PPLPMDL0020000001	Mayfield Heights	OH	44124	10/20/2011	Window call....I asked doc how patients are doing on Butrans. She said most patients are responding well to it, she just has to be sure to prescribe to patients with the right coverage. Gave her a formulary grid. I gave her an invite to tonight's program. She said she didnt think she could make it.
PPLPMDL0020000001	Cleveland	OH	44102	10/20/2011	talked to Nagla,PA,about BUP3015,opioid experienced clinical trial,asked if 30%reduction in pain was clinically significant? Nagla said yes it was.I asked Nagla if I could place Butrans patient savings cards in exam rooms,to focus her and doctors on commercial plan patients,Nagla said yes in 4 exam rooms I could do that.
PPLPMDL0020000001	Cleveland Hts	OH	44118	10/20/2011	Quick follow up call.... I reminded doc of the Butrans program this evening and asked if he will still be attending. He said he is trying. Nothing more learned.
PPLPMDL0020000001	Westlake	OH	44145	10/20/2011	Quick call. I showed the demo and carton and showed what the patients get in the pharmacy when they are prescribed Butrans. He said that he has patients that are doing great on Butrans.
PPLPMDL0020000001	Berea	OH	44017	10/20/2011	Quick call, I asked Dr if he has a chance to start Butrans for a patient on tramadol around the clock. He said that he has tried it, I asked him to tell me how the patient is doing but he did not have time today.
PPLPMDL0020000001	Beachwood	OH	44122	10/20/2011	PROSPECT- Spoke with nurse Ted & reviewed initiation guide with him, discussing appropriate Butrans patient type. Ted said Dr Malkamaki certainly has some patients who fit the profile. Also told him about "Initiations" program & asked him to give Dr Malkamaki an invitation along with initiation guide to serve as a reminder & he agreed.
PPLPMDL0020000001	Independence	OH	44131	10/20/2011	PROSPECT- Dr Reddy said he could not stay for lunch. Positioned Butrans for patients who have a chronic condition that causes pain who are not well-controlled on tramadol around-the-clock. Also handed him a managed care grid & let him know that commercial insurance coverage is favorable.
PPLPMDL0020000001	Independence	OH	44131	10/20/2011	PROSPECT- Handed Dr Jack a Butrans patient information booklet. He said he could not stop today. I asked him to have a look at it & positioned Butrans for patients not well-controlled on tramadol or low-dose Vicodin around-the-clock. He said he just needs to think of it at the right time & then walked away.
PPLPMDL0020000001	Cleveland	OH	44113	10/20/2011	dr's MA,Deb, tried to get Butrans from her dr, dr nemr, and UH required a PA for Butrans.told dr that we talked about his patients with osteoarthritis and back pain in last call and dr said he starts patients on tramadol then goes to hydrocodone,told dr Butrans is an option right after tramadol instead of hydrocodone and he can expect similar results to the BUP3015,opioid experienced clinical trial,showed graph and asked dr if a 30%reduction in pain was clinically significant? dr said yes,asked dr if it was clinically significant enough for him to prescribe Butrans? dr said yes,focused dr on commercial plan patients.
PPLPMDL0020000001	Independence	OH	44131	10/20/2011	PROSPECT- Dr Pal said he hopes Butrans is covered by Medicaid because he prescribed it for a CareSource patient. I asked him to tell me about the patient. He said the patient was not well-controlled on Vicodin so he switched him to Butrans. I told him this sounded like a good patient to try, although managed care could become an issue. Dr Pal said he prescribed it a few days ago & has not heard anything from anyone about it not being covered so far, but he added that he has over 150 faxes to go through so it is possible there is a prior authorization in there. He said he also has a patient in his waiting room who has chronic back pain who is not being well-controlled on tramadol who he would consider a Butrans candidate. He said she wants to be put on Percocet but he does not want to go that route at this time, so he would like to put her on Butrans. He asked me if Cigna would cover it. Went through Butrans formulary grid & gave him patient information guide for the patient. He said he will try Butrans on that patient. I asked if he would also look for others & he agreed. Showed OxyContin doc asked about the skin reaction for patients on butrans. I showed him the AE page of the sales aid and the that the incidence is about 9% in clinical trial. He asked if a spray can be used before hand to minimize side effects. I told him there is no recommended remedy for that and we did not study the use of any. He said he wants to prescribe butrans but he does not know where to use it. I described the patient that may be on hydrocodone 5/325 4-6 tabs/day. Instead of titrating that patient, try that patient on butrans. Showed him the initiation guide. He said he will try it. I asked doc how oxycontin patients are doing on the product. He said the still want to be switched because they like to old formulation better. He said he still has some patients that have not complained about it though.
PPLPMDL0020000001	Cleveland	OH	44124	10/20/2011	Quick call...I asked doc if he would like to hear more about a 7 day, CII analgesic by attending a speaker program to learn about butrans. He looked at the invite and said he cant make it. He did ask about oxycontin and if we still have savings cards. Provided same.
PPLPMDL0020000001	Cleveland	OH	44112	10/20/2011	Quick call...I reminded doc that he expressed interest in attending a butrans speaker program. He remembered that the venue was Flemings. He said he has a meeting this evening and probably wont make it. I gave him a BUP 3015 reprint and asked him to try butrans instead of going to vicodin ATC.
PPLPMDL0020000001	Cleveland	OH	44113	10/20/2011	talked to Shannon,Pharmacy Tech,about Caresource and asked her to help me determine if Caresource is covering Butrans.Shannon ran a script through and it was approved.asked Shannon if she would be willing to give Butrans patient info booklets to patients,to speak with their doctors about Butrans,Shannon agreed to do this.talked to Maria,Pharmacy Tech,about OxyContin scripts and asked Maria if they are seeing new scripts or same patients every month? Maria said they are counting a lot of Opana ER and seeing more new Rx for OpanaER.
PPLPMDL0020000001	Highland Heights	OH	44143	10/20/2011	Repeat. I asked doc if patients were happy with Butrans. He said He is writing it, has no complaints, and suspects that he is the #1 prescriber of butrans. He said he jsut wishes for medicare coverage and he would prescribe it more. I thanked him for the support. I reminded him of the potential savings with the savings cards. Also reminded him of the low dose oxycontin for patients who may need more than Butrans. Invited him to tonights program but he won't make it.
PPLPMDL0020000001	Hudson	OH	44236	10/20/2011	PROSPECT- I asked Dr Seiple what he thought was really holding him back from trying Butrans again. He said it is a matter of getting a patient to agree to the switch. He went on to say that he offers it to patients who he wants to get off of short-acting oral opioids, for example someone on 4 Percocet per day, & they just do not want to "give up their pills". Discussed ability to use supplemental analgesia while on Butrans. He said he has tried telling them that but it has not worked. He said he actually did get a patient to agree to it but the patient did not fill the prescription. I asked him if he would instead try offering it to patients who are not well-controlled on tramadol 3-4 times per day. I asked if he would use it there instead of going to Vicodin or Percocet. He said he would do this. He said he does try to refer all his chronic pain patients to pain management because he does not like dealing with this type of patient. Discussed OxyContin as an option for patients beyond range of Butrans. I asked Dr Seiple if he would offer Butrans to the type of patient we spoke about today & he said yes.
PPLPMDL0020000001	Mayfield Heights	OH	44124	10/20/2011	Spoke to Albina about the butrans indication and selling messages. She was not familiar with the product as she has not seen any scripts. I explained where it is being positioned. She asked how much butrans cost for patients. I explained the commercial coverage but not with medicare/medicaid yet. I also informed her about the savings with the relay health program.
PPLPMDL0020000001	Cleveland	OH	44113	10/21/2011	showed dr BUP3015 opioid experienced clinical trial,discussed results and asked dr if this data was clinically significant? dr said yes,asked dr if this data was clinically significant enough for him to start a couple patients? dr said yes,dr asked about insurance coverage for medicaid patients,focused dr on commercial patients but discussed PA requirements for Medicaid,discussed with dr Butrans initiation dosage strengths,titration and side effects and asked dr to start a couple patients today and next week on Butrans,dr said he will talk to a few patients and see what patients say about Butrans.recommended Senokot-5
PPLPMDL0020000001	Lakewood	OH	44107	10/21/2011	I reviewed the key messages of Butrans. I asked about her prescribing. She said she writes scripts but Dr. Khuri signs off on them. We discussed appropriate patients for Butrans and when they may need to go to OxyContin.
PPLPMDL0020000001	Northfield	OH	44067	10/21/2011	We reviewed the managed care and savings cards and I asked if she will recommend it. She agreed and took the FPI to read more about Butrans.
PPLPMDL0020000001	Cleveland	OH	44109	10/21/2011	Spoke with technician as no pharmacists were available. Gave her updated Butrans FPI & reviewed 5 core messages with her. She said it sounded like an interesting medication. Reviewed appropriate patient type & discussed automatic savings via e-voucher. Also discussed OxyContin savings cards but she said they had enough of them for now.<font color=blue><b>CHUDAKOB's query on 10/27/2011</b></font>What does a tech do at CVS relating to medications? What about relating to pain medications?<font color=green><b>APSEGAS's response on 10/28/2011</b></font>I don't know the answer to that question. That is something I could be asking the techs when pharmacists are unavailable. Thanks for the suggestion.<font color=blue><b>CHUDAKOB added notes on 10/31/2011</b></font>Good thinking! Let me know how it works out!
PPLPMDL0020000001	Cleveland	OH	44130	10/21/2011	talked to dr about appropriate patients,showed dr BUP3015 opioid experienced patients,asked dr if he had patients taking immediate release opioids that werent controlled? dr said at this point no,his patients with chronic pain are controlled on immediate release opioids but he'll keep Butrans in mind as an option for patients if they complain.asked dr to think of 1 patient today or next week that isnt controlled on immediate release opioids that could be appropriate for Butrans,dr said he will do that,we discussed initiation and titration of Butrans and formulary coverage.
PPLPMDL0020000001	Cleveland	OH	44130	10/21/2011	Spoke with Tom Whitmer (pharmacist) who was not familiar with Butrans. Gave him updated FPI & reviewed 5 core messages. Discussed dosage & titration up to a maximum 20mcg. Also discussed steady state after 72 hours. Spent time going over appropriate patient type, focusing on those who call too soon for refills of short-acting around-the-clock opioids such as tramadol or Vicodin. Also discussed CII & abuse/addiction potential. Tom said he thought Butrans sounded like a good option to have for those patients. Also discussed OxyContin q12h dosing. He said he often gets prescriptions for TID dosing & struggles with whether or not to fill those prescriptions because he knows that is not how it is intended to be taken. I agreed that OxyContin is approved only for q12h dosing & discussed 7 available tablet strengths. Asked him to recommend increasing the tablet strength instead of the dosing interval. He agreed.
PPLPMDL0020000001	Cleveland	OH	44102	10/21/2011	talked to Amol,Pharmacist,about Butrans 5 Core selling messages and Amol said he's not seen any Rx for Butrans,asked Amol what features of Butrans stood out to him? Amol said 7 day dosing and transdermal delivery,showed Amol Butrans patient info booklet and asked him to give patients the booklet to discuss with their doctors,if patients are taking immediate release opioids but not controlled,Amol said he will do that but asked about Medicaid coverage as thats majority of their patients,discussed PA requirements for Butrans for Medicaid patients,focused Amol on commercial plans and BWC,discussed appropriate patients for OxyContin,gave OxyContin conversion guide and discussed formulary coverage with Amol,recommended Senokot-5

PPLPMDL0020000001	Cleveland	OH	44130	10/21/2011	DABBLER- Dr Kansal told me again about the patient for whom Butrans did not work. I reminded him that that patient might not have been ideal considering the opioids he had been on prior to being switched to Butrans. Dr Kansal agreed that he was probably not the ideal patient. Reinforced appropriate patient type messaging with initiation guide, showing page 6 with appropriate range of patients, including discussion of OxyContin for appropriate patients beyond Butrans 20mcg. Showed Dr Kansal Butrans formulary grid & asked him to keep commercially insured appropriate patients in mind. Also reminded Dr Kansal of favorable OxyContin managed care.
PPLPMDL0020000001	Woodmere	OH	44122	10/21/2011	Spoke with Stephanie, technician, & gave her an updated FPI for Butrans. She said they stock it but do not dispense it very often. Discussed changes/updates with her. Also reminded her of Butrans dosing/delivery system & reviewed e-voucher program with automatic savings. Reviewed OxyContin savings cards & 7 available tablet strengths. She said they did not need savings cards.
PPLPMDL0020000001	Cleveland	OH	44111	10/21/2011	Quick call with Steve, he said that he thinks they do have one patient on Butrans. He did not remember which Dr wrote. I asked if he would hand out the medication guide with Butrans scripts and he agreed. We discussed the savings program for both Butrans and OxyContin.
PPLPMDL0020000001	South Euclid	OH	44121	10/21/2011	Spoke with Janiel, tech about the stocking and movement of butrans. She confirmed that they have it but she has not seen any and didnt know what butrans was. I explained the 7 day patch for pain and the CIII status which can be called in or refilled similar to vicodin. Provided patient info guide and formulary grid for pharmacist.
PPLPMDL0020000001	Parma	OH	44129	10/21/2011	DABBLER- Dr Gigliotti said he has not had any additional Butrans patients since we last spoke. I asked him why he thinks that is. He said people don't want to take it because they want their pills. Reminded him that the patients can take supplemental analgesia during Butrans therapy. He said he knows. I asked if he plans to continue to offer Butrans to patients who are appropriate & he said he will. Discussed broad access for OxyContin with managed care. Also spoke with Jaz & reviewed formulary grids for Butrans & OxyContin with her. <font color=blue><b>CHUDAKOB added notes on 10/27/2011</b></font>Very good next call objective Ashleigh!
PPLPMDL0020000001	Cleveland	OH	44111	10/21/2011	Quick call at window, I asked Dr what his hesitation is in prescribing Butrans, he said he just has to remember to try it when he has a patient on lower doses of opioids. I reviewed the invitation guide and asked if he would try it on a patient who is taking low dose hydrocodone. He agreed.<font color=blue><b>CHUDAKOB's query on 10/27/2011</b></font>"I reviewed the invitation guide" What is an invitation guide?<font color=green><b>HOLUBA's response on 10/31/2011</b></font>spell check changed this- "initiation guide" thanks!<font color=blue><b>CHUDAKOB added notes on 10/31/2011</b></font>Thank you!
PPLPMDL0020000001	Lakewood	OH	44107	10/21/2011	I asked Dr how he would feel if 10 out of 10 patients on Butrans came back to tell him they got 30% reduction in pain or more. He said that he thought that it would be significant. I reviewed the opioid experienced clinical trial. He said he's only tried Butrans for 1 or 2 patients so far and he never heard back from them. I asked if he would give Butrans a fair trial and start patients like the ones in the clinical trial inclusion criteria. He agreed. Reminder that OxyContin is still a long acting option. We reviewed the savings cards for Butrans and OxyContin.<font color=blue><b>CHUDAKOB's query on 10/27/2011</b></font>"I asked Dr how he would feel if 10 out of 10 patients on Butrans came back to tell him they got 30% reduction in pain..." If 10/10 patients got a 30% reduction in pain that would be phenomenal. Is that what our clinical trials say?<font color=green><b>HOLUBA's response on 10/31/2011</b></font>What I actually said was 10 out of 20 patients! Sorry about the typo, I wish that was what the data said.<font color=blue><b>CHUDAKOB added notes on 10/31/2011</b></font>OK.
PPLPMDL0020000001	Mayfield Hts	OH	44124	10/21/2011	Thanks for the clarification. Please re-read your call notes before submitting them.
PPLPMDL0020000001	Westlake	OH	44145	10/21/2011	Quick call....I asked doc if butrans is a product that he would likely prescribe in his practice. He said he just can't remember and asked if its comparable to fentanyl. I told him no head to head data and I asked him to prescribe butrans instead of going to vicodin ATC.
PPLPMDL0020000001	Sagamore Hills	OH	44067	10/21/2011	Quick call, I asked if he had started any new patients on Butrans this past week. He said that he did start one. I asked more about the patient and he said she was on hydrocodone and he continued some of the hydrocodone for supplemental analgesia. I asked if he has more patients he thinks can benefit from Butrans and he said he will try to start more new patients.
PPLPMDL0020000001	Cleveland	OH	44113	10/21/2011	PROSPECT- Quick call as I caught Dr Mike at the window. Positioned Butrans for patients taking chronic around-the-clock tramadol who are not well-controlled. He said he would keep it in mind. Spoke with Binka & reviewed Butrans & OxyContin savings cards with her. She asked me to leave a package of each. Also left Butrans patient information booklets.
PPLPMDL0020000001	Lyndhurst	OH	44124	10/21/2011	Dr said she's not had any patients that were willing to wear a patch so she's not prescribed Butrans,showed dr BUP3015,discussed opioid experienced patients and asked dr to think of 1 patient today that's taking immediate release opioids but not controlling the pain and this patients asking for something else,dr said she will consider Butrans but patient has to be willing to wear a patch and rotate patch once a week. discussed initiation and titration of Butrans and focused dr on commercial plan patients and tricare.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44109	10/21/2011	Reviewed the butrans positioning and the other selling messages. Doc asked about the use of supplementals with butrans. Confirmed that supplementals can be used and that butrans can be titrated after 72 hours. I asked what his experience with butrans has been. He said things are good. Nothing else learned.
PPLPMDL0020000001	Cleveland	OH	44113	10/21/2011	dr said he talked to a few patients about Butrans but patients didnt want to wear a patch,they only wanted their pills,showed dr BUP3015,discussed clinical trial for opioid experienced patients and asked dr if he had a few patients that werent controlled on immediate release opioids that he could discuss Butrans with? dr said he will keep trying we talked about initiation and titration of Butrans and discussed formulary coverage.recommended dr said he's not prescribed Butrans yet,keeps forgetting who's appropriate and how to write it,showed dr BUP3015,discussed opioid experienced clinical trial and results from trial and asked dr if these results were clinically significant? dr said yes they were,asked dr if they were compelling enough for him to prescribe Butrans? dr said yes we discussed initiation and titration of Butrans and discussed formulary coverage.told dr to focus on a couple patients who have BWC or commercial plan insurance.we discussed OxyContin being an option for patients,showed conversion guide and discussed formulary coverage.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44113	10/21/2011	showed dr BUP3015,discussed results from clinical trial and asked dr if this was clinically significant to her? dr said yes and she's seeing that in her patients,patients who were at 9-10 on pain scale are going down to a 2-3 in pain levels,discussed titration of Butrans with dr and discussed formulary coverage,focused dr on BWC and commercial plan coverage for Butrans.recommended Senokot-5
PPLPMDL0020000001	Fairview	OH	44111	10/21/2011	Spoke with Tom, we reviewed the appropriate appetites types for Butrans. I asked if he would let those patients know that there is a 7 day dosing option. He said that he might if the patient asked or had problems with their current therapy. We discussed the medication guide and he agreed to hand them out to new patients. Reminder that OxyContin is still an option and we reviewed the conversion guide.<font color=blue><b>CHUDAKOB's query on 10/27/2011</b></font>"Spoke with Tom, we reviewed the appropriate appetites types for Butrans" Were you hungry when you wrote this call note?<font color=green><b>HOLUBA's response on 10/31/2011</b></font>This was spell check again! "Patients" is what I said.<font color=blue><b>CHUDAKOB added notes on 10/31/2011</b></font>You might want to re-read the call note and not rely solely on spell check.
PPLPMDL0020000001	Lakewood	OH	44107	10/21/2011	Dr said that he thought about starting a patient on Butrans but ended up going to OxyContin because the patients was on higher doses of opioids. I confirmed that this was the appropriate thing to do. We reviewed the medication guide and I asked him to start new patients on Butrans who are taking low dose hydrocodone. Jennifer said she will help remind Dr about Butrans and will recommend to patients. I asked her to keep me posted about the status of Caresource and Butrans and she will.
PPLPMDL0020000001	Lakewood	OH	44107	10/21/2011	Quick call, too busy to talk today. I asked if he has been having success with Butrans and he said the feedback has been good. I reviewed the savings program and reminded him to focus on commercial insurance for Butrans. Checked Butrans and OxyContin savings cards with Pat.
PPLPMDL0020000001	Lakewood	OH	44107	10/21/2011	I asked Dr what she would think if 10 out of 20 patients she started on Butrans came back to tell her that they had a 30% or better pain reduction. I asked if she thought it would be significant and she thought that it would be. I reviewed the opioid experienced clinical trial including criteria and results. I asked if she has had enough success with Butrans that she would continue to start new patients and she said yes. I asked what happened with the patient that was going to pay cash, she said that she does not know if she got the script filled or not, she said the patient has the means to pay cash if she really wanted to. Reminder that OxyContin has great managed care coverage as well. (gardening, baking and football)
PPLPMDL0020000001	Independence	OH	44131	10/21/2011	Deb requested more Butrans patient information booklets. I asked if this means she is finding more Butrans patients & she said she just prescribed for someone today. She said she likes giving out the booklets with each prescription because she believes her patients gain good information from them. Also gave her more savings cards as Steve mentioned they were out.<font color=blue><b>CHUDAKOB added notes on 10/27/2011</b></font>Very good follow-up question to her asking for more booklets!
PPLPMDL0020000001	Cleveland	OH	44113	10/24/2011	TRIALIST-Deb,PA,said she's started a couple patients on Butrans and thinks the best place for Butrans is patients taking 4-5 tablets,5mg vicodin,daily but not controlled instead of increasing their vicodin dose.asked deb if Butrans had any drawbacks? Deb said hairy patients.we discussed application sites and rotation of Butrans,showed patient info booklet,Deb said she focuses on that with patients and writes instructions out for patients.talked to Deb about BWC,commercial and Caresource insurance plans for Butrans.
PPLPMDL0020000001	Parma	OH	44134	10/24/2011	DABBLER- I asked Dr Scanlon if he has had any additional feedback regarding Butrans. He said he has not. I asked him what it usually is about a patient that causes him to think of Butrans. He said if a patient is not well-controlled on short-acting opioids he will think of Butrans. I asked if he had started any patients who have never been on an opioid or if it has all been patients already on opioids. He said everyone has already been on something when he offers Butrans. I asked if he would ever use Butrans on a patient after tramadol is no longer controlling their pain. He said he would probably feel most comfortable trying them on short-acting first. He added that he has many patients who he could be using Butrans for that he is not already & that he will focus on switching more of those appropriate patients. I asked about his experience with OxyContin. He said he generally does not like to prescribe it & would be much more likely to use Butrans. Discussed patient type & range for Butrans & OxyContin. Also showed OxyContin conversion guide displaying 7 tablet strengths. Discussed 15, 30, & 60mg tablets as an option for flexibility in dosing. He said this was good to know.
PPLPMDL0020000001	Parma	OH	44134	10/24/2011	PROSPECT- Dr George said he has prescribed Butrans for one patient so far. I asked him to tell me about the patient. He said it was an older female patient who has chronic back pain. He added that she cannot take Vicodin or Percocet due to adverse events, so he thought of Butrans for this patient. I told him that she sounded like an ideal patient clinically. I showed inclusion criteria to support his choice of a chronic back pain patient. He said he has not gotten feedback yet. Discussed application & showed demo patch. Dr George said he liked the way the adhesive & patch felt & thought it would be effectively stuck for the full week. Reviewed that Butrans is a CIII opioid with abuse & addiction potential. Also let him know that as a CIII, Butrans can be called in & patients can have 5 refills in a 6 month period. He said that he did not know this & that he is going to start using more Butrans because he likes that it is CIII. Gave him initiation guide & went over pg 6, reviewing appropriate patient type & range, including OxyContin as an option for patients beyond Butrans 20mcg. He added that he generally tries not to prescribe opioids. I agreed he should use the same caution with Butrans that he does with other opioids.
PPLPMDL0020000001	Northfield	OH	44067	10/24/2011	Introduced Butrans to Dr Marshall, delivering 5 core messages. Alerted him to box warning & abuse/addiction potential. Dr Marshall said he usually does not do a lot of chronic pain management. He said his patients are usually awaiting surgery or are just getting done with surgery. I asked if there is ever a wait for a patient between when he sees them & when they are able to get scheduled for surgery. He said this always is the case. He said this is where he could see himself using something like Butrans. Discussed with him the appropriate patient type & reviewed initiation guide, focusing on pg 6. Reviewed appropriate range of patient including OxyContin as an option for patients beyond Butrans range. Dr Marshall said he does like the idea of a medication dosed once weekly & asked about use of supplemental analgesia. Discussed ability to take supplemental analgesia in form of opioid or non-opioid immediate-release medications. He said sometimes he prefers not to have his patients on oral opioids & for that reason might be able to use Butrans. Reminded him that Butrans is still a CIII opioid & does carry abuse/addiction risk. He said he would like to speak with Dr Ortega & read more about Butrans before committing to starting patients on it but said he does like the idea. I let him know I would follow-up & he Dr said that he tried to prescribe Butrans for a few Caresource patients, but he was not sure if it was covered. I discussed the step edit for Caresource and also discussed this possibility with Angela. She will pay attention to Caresource patients and try to get Butrans to go through. I let Dr know that the more he tries to get Butrans through on Caresource the better chance that it will be covered after they review it. We discussed the dosing the that opioid experienced patients should start on a 10mcg patch. He said that most of his patients would probably start here. I asked if he would start a new patients this week and he said he will and he wants to write try more Butrans. Reminder that OxyContin is an option when Butrans may not provide adequate analgesia.
PPLPMDL0020000001	Westlake	OH	44145	10/24/2011	I reminded Dr about the clinical trial we discussed last time and the results he may get with Butrans. I asked if he would try Butrans for a patient as the next step after tramadol. He agreed. Reminder that OxyContin is also still a long acting option when patients are taking over 40mg of hydrocodone.
PPLPMDL0020000001	Westlake	OH	44145	10/24/2011	Spoke with pharmacist Rick & gave him updated Butrans FPI, pointing out changes. Also directed him to section 2.4 & discussed use of supplemental analgesia while on Butrans. I asked if he was aware of any type of alert in their system that would appear if Butrans was prescribed with supplemental opioid analgesics. He said he was not aware of this for Butrans but added that he doesn't dispense enough of it for him to notice. Reminded him of e-voucher & discussed OxyContin savings cards.
PPLPMDL0020000001	Parma	OH	44129	10/24/2011	

PPLPMDL0020000001	Lakewood	OH	44107	10/24/2011	Quick call, Dr did not have time to take a look at the clinical trial. I asked if he would start one of the patients on Butrans that we spoke about in the past, so that he can see how Butrans can work in his practice and he said he would start someone.
PPLPMDL0020000001	Westlake Parma	OH OH	44145 44134	10/24/2011 10/24/2011	Quick call at window, I asked what type of patients did he start on Butrans this morning. He said he did not start anyone today, but he will write it when he has the chance to this week. Spoke with James, pharmacist/manager, & gave him updated Butrans FPI. Also discussed the ability to take supplemental analgesia while on Butrans. Showed FPI 2.4 as support. I asked if he knows of any alert on his system regarding Butrans when prescribed with supplemental analgesia. He said he does not know if this specifically for Butrans but he has seen this type of alert with other medications. I asked what he typically does. He said protocol for all pharmacies should be to call the physician to double-check what he/she wants to do & proceed however the physician wishes. He said he would not reject the prescription. Discussed Butrans savings via e-voucher or savings cards & also discussed OxyContin savings cards. He said he has enough OxyContin savings cards for now.
PPLPMDL0020000001	Cleveland	OH	44113	10/24/2011	talked to dr about where Butrans fits into practice, dr said patients taking 4-5mg Vicodin daily, not controlled. dr said he likes patch technology and would like to see more patients on Butrans. asked dr if there were any drawbacks to Butrans? dr said insurance is biggest plan here. talked to dr about starting a couple patients with Caresource, BWC and commercial insurance this week. dr said he will do that.
PPLPMDL0020000001	Cleveland Parma	OH OH	44114 44129	10/24/2011 10/24/2011	talked to Caresource insurance and asked John to start a couple patients with Caresource on Butrans. John said he will do that. DABBLER- Reminded Jen of previous conversations when we discussed that newer patients would likely be where she would start with Butrans & asked her if she has encountered this scenario. She said she has not had anyone yet who is new who is not well-controlled on tramadol. She added that she thought she would have a Butrans patient recently, but that patient ended up being well-controlled on tramadol TID so she did not need to prescribe Butrans for them. I asked where she sees herself prescribing Butrans. Jen said she is ready to prescribe for anyone who does not get relief from tramadol instead of starting that patient on Vicodin. I asked about any Butrans discussion at the practitioner meeting they had recently with Dr Nickels. She said they did not discuss Butrans at their meeting this time but added that she is now comfortable starting patients on her own & plans to do so as soon as she sees someone who she would have otherwise started on Vicodin. Spoke with Dawn who said that Caryn Delisio will soon be joining this location as they are closing the Sheffield location. However, Dawn said this information has not been discussed with anyone else & she asked me not to disclose it to anyone at their organization. She said this change will take place the first of the new year.
PPLPMDL0020000001	Parma	OH	44134	10/24/2011	DABBLER- I reminded Dr Mandat of my last visit when he told me that he had started more patients on Butrans & of previous conversations when he had told me that he has used Butrans so far in patients who were his worst-case scenario patients. I asked what type of patients his more recent trials were. He said they were not that same type. I asked him what therapies he replaced with Butrans in these more recent cases. He told me that Butrans is "weaker" than fentanyl, so he uses it much earlier than he would fentanyl. I agreed that many patients on fentanyl may not be within the appropriate range for Butrans & also reminded him that Butrans is still a CII opioid with abuse/addiction potential. He said that he thinks the most recent patients had been on tramadol prior to being switched to Butrans. I told him this is an ideal patient type & supported his selection. I asked if he would continue to identify this type of patient for Butrans & he agreed.
PPLPMDL0020000001	Cleveland	OH	44114	10/24/2011	REPEAT- asked dr if she was still comfortable starting patients on Butrans, right after tramadol instead of going to vicodin? dr said yes, no problem with doing that, its insurance coverage thats an issue as they have a lot of medicaid, medicare, dual eligibles and BWC. dr said most of her patients with private insurance arent her chronic pain patients, mainly medicaid and BWC. told dr to focus on BWC and commercial plans but updated dr on Caresource and asked dr to find a couple patients with Caresource insurance that she can start on Butrans, dr said she will do that.
PPLPMDL0020000001	Cleveland	OH	44113	10/24/2011	dale expressed interest in being a Butrans speaker, submitted name in Phoenix. Dale said he's been prescribing Butrans, likes that its a patch and dosed every 7 days and he's seeing results as patients are getting good pain relief. asked dale to continue prescribing Butrans. Dale said he would.
PPLPMDL0020000001	Cleveland	OH	44109	10/25/2011	I talked to dr about the patients he's starting on Butrans, focused dr on appropriate patients showing visual aid. dr focused on patients taking opioids but not controlled, showed dr BUP3015 and asked dr if the data was clinically significant? dr said yes, a 30% reduction in pain was clinically significant. asked dr if it was clinically significant enough for him to prescribe Butrans? dr said yes. I asked dr to start a few patients today/this week on Butrans and focus on BWC and commercial pain patients, dr said he will do that. discussed dr starting a couple Caresource patients on Butrans too. recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44195	10/25/2011	showed Anne, NP, BUP3015 opioid experienced patients clinical trial, and asked if the data was clinically significant to her? Anne said yes a 30% reduction in pain was clinically significant. I asked Anne if it was clinically significant enough for her to prescribe Butrans? Anne said yes it was. Anne said Dr Stanton-Hicks did start 1 patient so she was waiting to see how that patient did on Butrans. we discussed appropriate patients showing initiation guide and BUP3015 and I asked Anne if she will start a couple patients today/this week like we discussed with commercial insurance? Anne said she'll talk to some patients about it and see if they will try Butrans and she also needs to discuss this with Dr Stanton-Hicks as she treats all of his patients. discussed Butrans patient savings cards with Anne and recommended Senokot-S
PPLPMDL0020000001	Independence	OH	44131	10/25/2011	NON-PRESCRIBER- Introduced Butrans to Dr Clayton, delivering 5 core messages & alerting her to box warning. Spent time going over appropriate patient type, focusing on those who have chronic conditions such as back pain or osteoarthritis who are not well-controlled on NSAID's/COX-2's or tramadol. Discussed Butrans as a CII long-acting opioid with abuse/addiction potential. Discussed appropriate patient selection & patient range for Butrans as well as OxyContin as an option for patients beyond Butrans 20mcg. She asked about adverse events. Showed core visual aid rates. Discussed inclusion criteria for studies & conditions causing chronic pain. I asked her what drawbacks she saw with Butrans. She said she did not see any, other than it is an opioid & she always worries about prescribing them. Told her she is right in being cautious & asked that she use discretion when selecting appropriate patients. Discussed managed care & savings cards.
PPLPMDL0020000001	Independence	OH	44131	10/25/2011	NON-PRESCRIBER- I asked Dr Boose about his experience thus far with Butrans. He said he did prescribe it for one patient. I asked him to tell me more about that. He said the patient had low back pain & neither Vicodin nor Percocet were controlling his pain. Dr Boose said that is when he selected Butrans. He added that the Butrans did not help the patient but that it turned out that the patient had some other issues leading to the back pain & is now going to have a surgery to correct it, so he admitted that the patient did not end up being an ideal one. I asked if he would use Butrans right after NSAID's or COX-2's, before starting on tramadol. He said he would. He asked about a conversion guide. Told him the initiation guide was the best I could offer & showed him pg 6, walking him through how to initiate on either 5 or 10mcg. Discussed Butrans as the only long-acting CII opioid & alerted him to abuse/addiction potential. Discussed importance of appropriate patient selection. I asked Dr Boose what drawbacks he saw in Butrans. He said he really could not think of any & asked about adverse events. Showed him rates & asked if he was at all surprised by any of them. He said no. He asked about insurance coverage. I showed formulary grid & discussed savings cards & eligibility requirements. I asked Dr Boose if he would prescribe Butrans for appropriate patients like the ones we discussed today & he said yes. Discussed OxyContin 7 tablet strengths.
PPLPMDL0020000001	Cleveland	OH	44195	10/25/2011	talked to dr in hallway, I showed dr BUP3015, opioid experienced patients clinical trial and asked if the results were clinically significant? dr raised eyebrows surprised at the 30% reduction in pain stating he didnt remember that but yes, that reduction in pain would be clinically significant enough for him to prescribe Butrans. dr said he started 1 patient on Butrans but hasnt seen patient so doesnt know how patient is doing. we talked about appropriate patients, showed dr and gave dr Butrans initiation guide and discussed titration of Butrans with dr. dr said ok and asked me to call his secretary, Sherine, to book an appointment with him. gave dr OxyContin conversion guide and formulary grids and told dr OxyContin was an option for patients, dr said ok. recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44113	10/25/2011	discussed with dr 5 core selling messages of Butrans, dr said he likes that Butrans is a patch and dosed once every 7 days. dr said he has a lot of patients taking vicodin who arent controlled and he thinks Butrans could be an option. showed dr BUP3015, discussed opioid experienced clinical trial, inclusion criteria and dr said he does treat the pain conditions listed. I asked dr if the results were clinically significant? dr said yes 30% reduction in pain is clinically significant. I asked dr if it was clinically significant enough for him to prescribe Butrans for a couple patients? dr said yes. we discussed initiation and titration of Butrans. dr asked where Butrans was covered? showed formulary grid and patient savings cards, dr said he'll talk to a few patients and see what they say about Butrans. briefly discussed OxyContin being an option for appropriate patients, after Butrans 20mcg or if patients dont want to wear a patch they have option of OxyContin, discussed formulary coverage and I recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44125	10/25/2011	Spoke with Betsy & gave her updated Butrans FPI, pointing out the changes. Also spent time going over the appropriate patient type, focusing on patients on chronic Vicodin or tramadol who call too soon for refills or who say that their short-acting opioid is not lasting long enough. She said Cleveland Clinic pain physicians usually try to stay away from any narcotic prescriptions. I asked if there are still some patients who are on them & she agreed that there are. Also discussed savings cards for Butrans & OxyContin.
PPLPMDL0020000001	Cleveland	OH	44109	10/25/2011	talked to Raban, Pharmacy Mgr, about Butrans 5 core selling messages and Raban said he hasnt gotten any Butrans scripts here. I asked Raban what features of Butrans stood out to him? Raban said he likes that Butrans is a patch and dosed once week, as some patients might like wearing a patch. I asked Raban if he would give patients the Butrans patient info booklets, if they are taking immediate release opioids daily but not controlled? Raban said he does provide patient counseling so he could give booklets out and patients can talk to their doctors. we discussed OxyContin stocking and appropriate patients for OxyContin, Raban said they are seeing the same patients mostly for OxyContin, no new Rx for OxyContin. recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44113	10/25/2011	dr said he couldnt remember Butrans and asked me to explain everything to him. we discussed 5 core selling messages and dr said he thought buprenorphine was a derivative of morphine because of the way buprenorphine is spelled, I told dr buprenorphine isnt a morphine derivative. dr asked if Butrans was like Duragesic changing the patch every 3 days, told dr no Butrans is dosed once every 7 days, dr said ok that was better for his patients. dr asked about Butrans falling off and if patients could shower/swim with Butrans on, told dr yes patients could swim/shower and showed FPI. dr asked who the appropriate patients were, showed Butrans initiation guide, asked dr if he had a couple patients with 1 of the pain conditions shown, pg.11 visual aid, that are taking 1 of the listed immediate release opioids (initiation guide) but not controlled? dr said he has a lot of patients taking short-acting opioids but not controlled, dr asked if medicaid or medicare were covering Butrans? talked to dr about commercial pain patients and discussed PA for Medicaid patients and focused discussion on Caresource patients trying Butrans. dr said ok and he will talk to patients and see what happens. showed dr Butrans initiation booklet, asked dr to focus discussion on application/rotation of Butrans and discussed this info with MA, Cyndie, dr said be sure Cyndie sees that and patient savings cards as she'll give them to patients. recommended Senokot-S
PPLPMDL0020000001	Independence	OH	44131	10/25/2011	NON-PRESCRIBER- Dr Grusenmeyer said he did not remember much about Butrans. Reviewed 5 core messages with him & spent time going over appropriate patient type. Discussed Butrans as the only long-acting CII opioid & advised that Butrans still carries abuse & addiction potential. Discussed appropriate range of patients for Butrans as well as OxyContin as an option for appropriate patients beyond Butrans. He asked what the conversion from other opioids to Butrans is. I told him we have no direct conversion but let him know initiation guide would assist him in selecting an appropriate starting dose. Showed initiation guide pg 6 to help illustrate this. I asked him what drawbacks he saw in Butrans. He said none really. Reviewed managed care information & discussed savings cards & eligibility. He said he would prescribe Butrans for the types of patients we discussed today.
PPLPMDL0020000001	Mayfield Hts	OH	44124	10/25/2011	I asked doc about his experience with speaker training. He said things went well and is excited about speaking for butrans. He is scheduled to speak with the DM to go over the slide presentation. He said he has been trying to think of more appropriate patients for butrans he just has to get out of his routine. In fact, he has 2 new patients in the waiting room he said he might try on butrans if he have the coverage. I reminded him of the no medicare/medicaid coverage. He said he is looking forward to the medicare coverage for butrans.
PPLPMDL0020000001	Euclid	OH	44117	10/25/2011	I asked doc what his clinical experience has been with the 2 patients he tried on butrans. As he stated previously, Butrans did not work for a male patient that was previously on vicodin TID. He said there other patient he never saw back again. I defined an appropriate patient as someone taking 5mg of vicodin 4-6 tabs per day. He said he does not like to switch people if they are not complaining. I asked him if he has patients taking tramadol 300-400mg as monotherapy. He said he has a lot of those. I asked him to prescribe butrans after tramadol instead and start them on the 10mcg. He said he could do that. Patients on higher doses of vicodin ATC can be started on low dose oxycontin.
PPLPMDL0020000001	Cleveland	OH	44109	10/25/2011	talked to Erin, Pharmacist, about Butrans 5 core selling messages and I asked if Erin has seen any Butrans scripts? Erin said no, but she gets a lot of scripts for immediate release opioids. asked Erin what features of Butrans stand out to her? Erin said the 7 day dosing and Butrans being a patch, patients might like to know that this option is available. asked Erin if she provides patient counseling for those patients taking immediate release opioids that arent controlled? Erin said yes they provide patient counseling. I asked Erin if she would give patients Butrans patient info booklets to speak with their doctors about Butrans, Erin said she would do that. we discussed OxyContin stocking and appropriate patients for OxyContin. recommended Senokot-S
PPLPMDL0020000001	Euclid	OH	44132	10/25/2011	DOC was out of the office today. Spoke to Jordan about the indication and positioning of butrans and asked if he was familiar with any patient feedback about butrans. He said he thinks that doc has prescribed but he does know about the patients response. I provided him a copy of the opioid experienced clinical trial and formulary grid.

PPLPMDL0020000001	South Euclid	OH	44121	10/25/2011	Spoke to Amanda about the stocking of butrans. She said they have seen a couple of scripts for it but not any lately. I asked if she recalled the prescriber(s). She did not. I explained the positioning of butrans, the savings card and relay health. Gave her patient info guides to give to butrans customers.
PPLPMDL0020000001	Cleveland	OH	44130	10/25/2011	TRIALIST- Quick call-Dr Diab said he did not have time today. Stopped him by showing him Butrans patient information booklet. I asked if he thinks this tool would be useful in introducing Butrans to patients when giving them their first prescription. He said it would be helpful & that he would give them to those patients.
PPLPMDL0020000001	Parma	OH	44134	10/25/2011	LOYALIST- I asked Dr Hernandez of all the patients he has tried Butrans on, how many of them are still on it. He said 90%. He added that other than a couple of patients who discontinued due to nausea, he cannot think of anyone who has not wanted to stay on it. He said the pain relief they get from Butrans is excellent & patients are generally very happy with results.
PPLPMDL0020000001	Lakewood	OH	44107	10/25/2011	Dr tried Butrans for a patient with United Health Care- Premier, who got back a PA. We discussed this issue with Karen and we will find out what we can about why this particular patient was denied and let her know.
PPLPMDL0020000001	Cleveland	OH	44130	10/25/2011	Spoke with technician who said the pharmacist was unavailable. Gave her updated Butrans FPI & reviewed updates. Also discussed appropriate Butrans patient type, focusing on those who call too soon for refills of chronic short-acting opioids such as tramadol or Vicodin. Discussed savings cards for Butrans & OxyContin. She said they did not need any savings cards & that she would pass the information along to the Dawn & Patty.
PPLPMDL0020000001	Westlake	OH	44145	10/25/2011	I asked when Dr thinks of Butrans, he said that he thinks of it with back pain, disk and non-nuropathic pain. He said he likes to rotate vicodin and have patients try something else for a while. I asked if he is happy with Butrans and if he would continue to write and he said he will.
PPLPMDL0020000001	Cleveland	OH	44130	10/25/2011	TRIALIST- I reminded Dr Fedorko of our previous conversation when he told me that he had a male patient who was on tramadol but was not well-controlled & for whom he was considering Butrans. He said he does not remember what patient it was. He said that he has one female patient who he can think of who is on tramadol but he thinks she "is hooked" on the tramadol so she would not be a good candidate for switching. He said this patient calls frequently for refills. I asked him if it was possible that the tramadol simply was not providing adequate pain relief, causing her to need more. He said he does not know. Positioned Butrans for patients who are not well-controlled on tramadol. He said he has another patient who may be a Butrans candidate who has pancreatic cancer & is in the hospital. I asked him if he would consider this more "severe" pain. He said not necessarily. Asked him to keep more "moderate" pain patients in mind & asked if he would think of Butrans for patients suffering from back pain due to conditions such as spinal stenosis or spondylosythesis. He said that was a good idea also. Let him know these were the type of patients Butrans was studied in.
PPLPMDL0020000001	Cleveland	OH	44195	10/25/2011	I showed Kathy,PA,BUP3015 opioid experienced patients and discussed results and asked Kathy if this was clinically significant? Kathy said yes,a 30% reduction in pain would be clinically significant.I asked Kathy if this was clinically significant enough for her to prescribe Butrans? Kathy said she would prescribe Butrans but she treats all of dr minzter and dr mekhail's patients and neither one have prescribed Butrans.I asked Kathy if she could share this info with both of them and see what their thoughts are about Butrans? Kathy said yes and asked for the BUP3015 trials and initiation guides for both of them.we talked about initiation and titration of Butrans and discussed formulary coverage.recommended Senokot-S
PPLPMDL0020000001	Independence	OH	44131	10/25/2011	NON-PRESCRIBER- Reminded Dr Sundaram of our previous conversation & asked if he remembers if he had attempted to titrate any of his Butrans patients or if they just discontinued. He said they just discontinued. He asked if he should have titrated them. Discussed steady state in 72 hours & ability to titrate to a maximum 20mcg/hr. He asked about insurance coverage. Reviewed formulary grid, discussed CareSource & also delivered OxyContin CCRx message.
PPLPMDL0020000001	Mayfield Heights	OH	44124	10/25/2011	Introduction to new Hillcrest Pain Mgmt prescriber. I introduced butrans' indication, CII status, and explained its positioning after tramadol failures or before going to hydrcodone ATC. Provided the butrans formulary grid and initiation guide. He said he heard of it and will read the information.
PPLPMDL0020000001	Broadview Heights	OH	44147	10/26/2011	NON-PRESCRIBER- Spoke with Nancy (MA) & asked her to give Dr Samuel the BUP3015 clinical reprint & Initiations invite. She agreed. Reviewed with her appropriate patient type & range for Butrans. Discussed savings cards for eligible patients & patient information booklets. She said Margaret has some & did not need any more. Also checked on OxyContin savings card stock but she said they have plenty of those as well.
PPLPMDL0020000001	Broadview Heights	OH	44147	10/26/2011	NON-PRESCRIBER- Spoke with Nancy (MA) & asked her to give Dr Samuel the BUP3015 clinical reprint & Initiations invite. She agreed. Reviewed with her appropriate patient type & range for Butrans. Discussed savings cards for eligible patients & patient information booklets. She said Margaret has some & did not need any more. Also checked on OxyContin savings card stock but she said they have plenty of those as well.
PPLPMDL0020000001	Cleveland	OH	44106	10/26/2011	showed dr BUP3015,opioid experienced patients,clinical trial and discussed results with dr.i asked dr if a 30%reduction in pain was clinically significant? dr said yes.i asked dr if it was clinically significant enough for him to prescribe Butrans? dr said yes it was and he's started a few patients on Butrans and feels comfortable with who the appropriate patients are for Butrans.told dr that was great and asked dr to focus on Commercial plan patients and we discussed Caresource patients trying Butrans.
PPLPMDL0020000001	Maple Heights	OH	44137	10/26/2011	Spoke with technician Kathy & gave her updated Butrans FPI. Also discussed Butrans appropriate patient type/range. She said she has seen it on their shelf & knows they have dispensed it before. Also discussed patient information booklets & savings via e-voucher or savings card. Reviewed OxyContin savings cards. She said they do not dispense a lot of OxyContin at that location to her knowledge & said they did not need any cards.
PPLPMDL0020000001	Beachwood	OH	44122	10/26/2011	TRIALIST- Spoke with Vickie (nurse) & reviewed Butrans appropriate patient type, managed care, & savings program. She said that Dr Barrett has been prescribing a lot of Butrans but Dr Yokiel not as much, although he has written a few. She said some of his have been rejected by managed care. Gave her BUP3015 & asked her to give it to Dr Yokiel for his review as I thought its content would interest him. She said he often does not read literature left by reps but agreed to give it to him. Discussed OxyContin savings cards- they did not need any.
PPLPMDL0020000001	BEACHWOOD	OH	44122	10/26/2011	Spoke with floater pharmacist & reviewed Butrans core messages. Also discussed appropriate patient type/range. She said she had not dispensed it but has seen it on the shelves of various stores. Discussed ability to titrate after 3 days up to a maximum of 20mcg. Reviewed savings via e-voucher or savings card & also discussed OxyContin savings cards. She said they did not need any cards.
PPLPMDL0020000001	Cleveland	OH	44106	10/26/2011	talked to Margie,Pharmacy Supervisor,about Butrans's core selling messages.Margie said she likes that Butrans is a patch and dosed once every 7 days, as some patients might prefer that type of delivery and dosing schedule.I asked Margie if she's given any Butrans patient info booklets out to patients so that they can talk to their HCP's about Butrans? Margie said yes a few patients were asking for something else as their immediate release opioids werent controlling their pain.i gave Margie more booklets and asked her to continue recommending Butrans to patients by giving the booklets for patients to discuss with HCP's.we talked about OxyContin stocking,no new Rx,same patients monthly getting Rx for OxyContin,we discussed appropriate patients and insurance coverage.recommended Senokot-S
PPLPMDL0020000001	Lyndhurst	OH	44124	10/26/2011	Quick call with Steve to discuss the butrans patients. He said he has seen a few scripts but none lately. I asked if they were customers who refilled the scripts. He did not know. I discussed the positioning of butrans and the coverage with commercially insured customers.
PPLPMDL0020000001	Beachwood	OH	44122	10/26/2011	NON-PRESCRIBER- Quick call at the window. Handed back BUP3015 & let Jen know it contained results from Butrans clinical trials with opioid-experienced patients. She said she would have a look at it, thanked me, & walked away.
PPLPMDL0020000001	MAYfield Heights	OH	44124	10/26/2011	Spoke to Jesses about the stocking and volume of butrans. He confirmed that they have it but he does not recall any scripts. He asked about the difference from fentanyl. I told him there is no head to head data with fentanyl, butrans is a CII and is a 7 day patch. I explained the proper application and disposal of butrans for future scripts.
PPLPMDL0020000001	Cleveland	OH	44106	10/26/2011	dr said he's not started anyone recently on Butrans but knows he has to start some patients and get some clinical experience.I asked dr who were the patients he felt could be appropriate for Butrans? dr said patients taking tramadol or vicodin not controlled dr said keep reminding him.i showed dr pain conditions visual aid,pg.11,asked dr to think of a couple patients that are opioid experienced but not controlled and start them on Butrans,dr said ok he will do that.i told dr i was confident he would see a few patients this week that are appropriate and he would get there eventually with Butrans,dr said thank you he thought so too.recommended worked internal medicine dept- left BUP3015,opioid experienced clinical trial,initiation guide,formulary grid and my business card,for Dr.Jones,Dr.Falck-Ytter,Dr.Harrington,Dr.Ricanati,Dr.Linheim and Dr.Gelehter as i couldnt see any doctors.
PPLPMDL0020000001	Bedford	OH	44146	10/26/2011	TRIALIST- Dr Moufawad said he still has not prescribed Butrans for any new patients. He added that he has the one patient on it who he started on it long ago.
PPLPMDL0020000001	Cleveland	OH	44106	10/26/2011	showed dr BUP3015,discussed clinical trial for opioid experienced patients and asked dr if a 30% reduction in pain was clinically significant? dr said yes.i asked dr if it was clinically significant enough for him to prescribe more Butrans? dr said yes he has patients on Butrans and they are doing well.dr said the biggest challenge is that he has a lot of medicald patients and medical isnt covering Butrans.we discussed PA requirements for State Medicaid patients and Butrans and then i talked to dr about Caresource patients trying Butrans,dr said that would change everything in his practice and he could start a significantly larger group of patients on Butrans.I asked dr to start a couple patients this week and i will follow-up next week,dr said ok he will do that.
PPLPMDL0020000001	Parma	OH	44129	10/26/2011	Spoke with pharmacist Bethany & gave her updated Butrans FPI. Pointed out the update with pk profile which she was interested in. Inquired about stocking & movement of Butrans. She said she still does have it but has not dispensed it at all. Showed FPI 2.4 & reminded her that supplemental analgesia in opioid or non-opioid medications is clinically acceptable & discussed possible alert in their system. Discussed OxyContin savings cards but she did not need any.
PPLPMDL0020000001	Parma	OH	44129	10/26/2011	REPEAT CUSTOMER- Dr Chagin said he has been using more Butrans lately. I asked me to tell me about some of the patients. He said he has gotten some feedback so far from a patient who was happy on it. He added that he wrote two scripts yesterday- one for a woman with degenerative disc disease & another woman who also has back pain who had tried other opioids without success in the past. I told him it sounds like he is selecting good patients. Discussed titration ability after 3 days up to a maximum of 20mcg. Also reviewed managed care coverage & savings cards. He asked if the patch will stay on for the full week. I told him every patient is different but Butrans is designed to be worn for 7 days. I asked Dr Chagin if he planned to continue to identify Butrans patients & he said yes & that he is actually interested in making Butrans his "go-to" drug of choice for this type of patient. Discussed OxyContin 7 tablet strengths & managed care coverage. Spoke with Debbie who requested literature on Butrans that would show dosing as well as savings cards. Discussed dosing & gave her initiation guide to keep for reference. She said that sometimes once Dr Chagin starts prescribing a medication, he generally starts prescribing it a lot.
PPLPMDL0020000001	Cleveland	OH	44109	10/26/2011	talked to Chris,Pharmacist,about Butrans stocking and chris said they are seeing Butrans scripts get filled her but he doesnt know who's prescribing and doesnt have time to look that info up for me today.Chris said come back friday and if they arent busy he'll get that info for me.we discussed 5 Butrans core selling messages,i left Butrans formulary grid and Chris said i need to talk to Rob about Butrans patient savings cards as he keeps all of them for pharmacy staff.gave Butrans patient info booklets to Chris and asked him to show patients Butrans application/rotation sections,side effects,etc in the booklet,chris said he'll do that.we discussed OxyContin stocking and Chris said not many new Rx for OxyContin,same patients monthly for OxyContin Rx.gave Chris OxyContin conversion guide and formulary grids.recommended senokot-s
PPLPMDL0020000001	Cleveland	OH	44109	10/26/2011	dr said she's not started anyone on Butrans yet but has talked to a few patients about it,gave Butrans patient info booklets to them and will be following up.i showed dr BUP3015,discussed opioid experienced patients,showed data and asked dr if a 30% reduction in pain was clinically significant? dr said yes,surprised as she didnt remember that about Butrans.i asked dr if 7 out of 10 patients could have at least a 50% reduction in pain would that be clinically significant enough for her to prescribe Butrans.dr said yes,discussed initiation titration and formulary coverage for Butrans.told dr to focus on BWC and commercial plans and discussed Caresource patients trying Butrans.told dr she has option of OxyContin for those patients who dont want to wear a patch,dr has option of OxyContin,showed conversion guide discussed a few conversions with dr and talked about formulary coverage for OxyContin,dr said she has a few select patients on OxyContin but prefers to not start a lot of patients on OxyContin.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	10/26/2011	talked to dr about BUP3015,asked dr if the data was clinically significant? dr said yes,a 30% reduction in pain was clinically significant.I asked dr if it was clinically significant enough for him to prescribe Butrans? dr said yes.dr said he's talked to a few patients but no interest.dr said he's having a tough time selling Butrans to the patients as they want their pills.showed dr FPI,maintenance of therapy section and told dr to start patients on Butrans but still give immediate release opioids,if he deems appropriate,so that patients still have their pills for breakthrough pain if need be,dr said that was a good idea and he forgot about that.asked dr to start 2 patients with BWC or commercial insurance that are like the opioid experienced patients we discussed,this week? dr said he will do his best and talk to some patients.we discussed initiation and titration of Butrans and i asked dr to give patients the Butrans patient info booklets to assist in educating them on application/rotation of Butrans,side effects,etc.,dr said he will do that.
PPLPMDL0020000001					

PPLPMDL0020000001	Cleveland	OH	44143	10/26/2011	Introduced doc to butrans an discussed the key selling messages. He asked about the molecule as he was not familiar with it. I referred to the MOA section of the sales aid and discussed the receptor activity. I explained that butrans is an alternative to prescribing vicodin ATC. I discussed the formulary grid and the savings cards. He asked about a 4ht tier co pay (per grid). I asked if he had any Aultcare patients. He said probably not. I explained that it may be a higher than average co pay but that the saving card would work.
PPLPMDL0020000001	Cleveland	OH	44143	10/26/2011	I asked doc about his experience with butrans and what patients are liking about the product. He said he really has not used it enough to say just yet. he said access seems to be a bit of a problem as he just wrote one yesterday but had to be switched because his co pay was too high. I asked the patient was given a savings card and was told yes. I reminded them to focus on patients with private insurance plans. I also reminded doc of the CIII status and that butrans can be called in and refilled. He did not believe it at first but was glad to hear it.
PPLPMDL0020000001	Cleveland	OH	44130	10/26/2011	NON-PRESCRIBER- Positioned Butrans for patients who are taking chronic short-acting around-the-clock opioids & are not well-controlled. Dr Popa reminded me that she does not like "dealing" with pain patients. I told her I understood & advised that she is cautious with Butrans, a CIII opioid as well. She looked through initiation guide & said that she does think Butrans is something she can use & that she "will do better" in identifying patients. Discussed managed care coverage & reminded her of savings cards for those eligible. Also showed her demo patch/adhesive & discussed disposal. She stated again that she will try to identify Butrans patients.
PPLPMDL0020000001	Mayfield Hts	OH	44124	10/26/2011	Spoke to tech, Sawana, about the stocking and movement of butrans. She was aware of only one patient that is on it and continues to get it refilled. I asked if she knew the prescriber. She did not know about the prescriber but she was sure that the customer has had an affordable co-pay. I explained the positioning of butrans and the savings card available for commercially insured patients. I asked about the volume of oxycontin scripts. She said they have plenty of those. NO issues or concerns with oxycontin.
PPLPMDL0020000001	Cleveland	OH	44143	10/26/2011	Quick Call...introduced doc to the butrans selling messages: indication, positioning, CIII status and 7 day delivery. I ask him if he has patients that might fit the positioning. He said there probably wouldnt be a whole lot of opportunity to prescribe it. He suggested I schedule a lunch to further discuss a new product. Next available appointment is in January.
PPLPMDL0020000001	Mayfield Village	OH	44143	10/26/2011	I asked HCP what she thought of the speaker program a few days ago. She said she thought it was informative and helpful and she now knows where to use it and how to write it. I reviewed the CIII status which can be called in or refilled. I asked her to suggest butrans to dr. Mandel after tramadol failures.
PPLPMDL0020000001	Cleveland	OH	44113	10/27/2011	dr said he has a patient coming into office next week that he wants to start on Butrans,he has 1 patient on Butrans doing well and he may be starting more patients on Butrans due to some recent updates with BWC coverage for short-acting opioids.dr said BWC is asking doctors not to prescribe percocet,vicodin,norco and nycynta for patients with chronic pain conditions.dr said this will be case to case but he is going to follow BWC guidelines so he will now be considering Butrans for more patients than he had before.showed dr BUP3015,opioid experienced clinical trial and asked dr if this data was clinically significant? dr said yes any reduction in pain is good.I asked dr to think of a couple patients like the one's in BUP3015,that he can start on Butrans this week,dr said he will do that.I told dr im confident he has appropriate patients to start on Butrans and i know he'll get there,dr said he knows its just taking him a little longer and asked me to be patient with him.
PPLPMDL0020000001	Cleveland	OH	44103	10/27/2011	i talked to Amy,Pharmacy Mgr,about Butrans scripts and Amy said she has seen a few but not recently,i talked to Amy about section 2.4,maintenance of therapy in FPI,as Amy said she wasnt sure if patients could take an immediate release opioid and Butrans at the same time,after discussing this info in FPI,Amy said she felt more comfortable dispensing Butrans with immediate release opioids if thats what doctors prescribe. we discussed BWC,commercial and Caresource coverage for Butrans. Amy said majority of patients here are Medicaid and Caresource.I asked Amy if she could give Butrans patient info booklets to patients and discuss application/rotation of Butrans and side effects with them? Amy said yes she will do that.I asked Amy if she's seeing any new Rx for OxyContin? Amy said not many new Rx for OxyContin,same patients every month.we talked about appropriate patients for OxyContin,gave conversion guide and formulary grids.
PPLPMDL0020000001	Cleveland	OH	44106	10/27/2011	talked to George,Pharmacist,about Butrans stocking.George said they have seen some Butrans scripts filled here but not recently,we discussed 5 Butrans core selling messages,asked George what features of Butrans stood out to him? George said he likes the 7 day dosing interval and the fact that Butrans is a patch.George said some patients may have an interest in wearing a patch.I asked George to recommend Butrans to patients that he knows are taking immediate release opioids daily but arent controlled,George said he'll do that,and I asked George to give patients the Butrans patient info booklets to have them discuss Butrans with their doctors.George said he will do that we discussed formulary coverage for Butrans,discussed appropriate patients for OxyContin and formulary coverage,confirmed stocking of OxyContin.
PPLPMDL0020000001	Parma	OH	44129	10/27/2011	NON-PRESCRIBER- Dr Roheny said he could write Butrans if he didn't only have to stick with commercial insurance. I told him that fortunately, coverage improves as time moves on & let him know that scripts are currently going through on Medicaid plans. He said that was excellent news. He asked me if the doses for Butrans were 5, 10, & 20mcg. I told him this was correct & handed him an initiation guide, pointing out page 6. Discussed titration after 3 days if necessary & reviewed appropriate patient type, CIII, & abuse/addiction potential. Dr Roheny went on to say, "Now I can write it". I let him know I would be following up with him to hear about his results. OxyContin broad managed care availability message.
PPLPMDL0020000001	Mayfield Heights	OH	44124	10/27/2011	Quick call...I reminded doc of the butrans appropriate patient and asked her if she has Care source Patients. She said sure and asked if butrans is covered. I told her that it is being covered after tramadol. I asked her to prescribe for a Caresource patient that has failed on tramadol. Gave her formulary grid and BUP3015.
PPLPMDL0020000001	Shaker Heights	OH	44122	10/27/2011	NON-PRESCRIBER- Quick call- I updated Dr Agarwal & let him know that Medicaid is currently paying for Butrans. He said that was great news & added, "Now I will be able to use it." Let him know I would be back to follow-up on his results. Spoke with his MA Michelle & reviewed savings cards for Butrans & OxyContin.
PPLPMDL0020000001	Cleveland	OH	44195	10/27/2011	worked apm dept-left Butrans fpi,initiation guide,formulary grid,patient info booklets for Dr.Mekhal,Dr.Mintzer,Dr.Cheng,Dr.Stanton-Hicks,Dr.Leizman,Dr.Vrooman; worked neurology dept-Dr.Kriegler,Dr.Mays,Dr.Stillman-left same info for physicians as i couldnt see them.
PPLPMDL0020000001	Parma	OH	44129	10/27/2011	NON-PRESCRIBER- Quick window call- Positioned Butrans for patients with chronic pain who are not well-controlled on tramadol around-the-clock. Handed back initiation guide & showed back display of how the prescription should be written. Dr Paat just thanked me & walked away saying he would keep it in mind. Spoke with Shari & talked more about patient type with her.
PPLPMDL0020000001	Cleveland	OH	44103	10/27/2011	gave dr BUP3015,discussed opioid experienced patients with dr,dr said he likes that Butrans is a patch as some patients dont like taking pills around the clock for their pain,dr said the dosing once every 7 days might be appealing to some patients also,dr said biggest challenge is medicalid hasnt covered Butrans,i talked to dr about Caresource patients trying Butrans,dr said ok he'll talk to some patients and see what happens.we talked about OxyContin still being an option for patients and formulary coverage,dr said he writes a lot of OxyContin because its covered on medicaid and medicare plans that he has in practice.recommended Senokot-S
PPLPMDL0020000001	Independence	OH	44131	10/27/2011	NON-PRESCRIBER- Handed Dr Jack sealed Butrans reprint & told him it might be of interest to him, although perhaps not since he has not gotten on board with Butrans yet. He asked me to not give up on him & said it just takes him "a long time" to prescribe "new" products. I told him Butrans has been out for over 9 months now. He said again not to give up, thanked me for the article, & walked away.
PPLPMDL0020000001	Brooklyn	OH	44144	10/27/2011	Spoke with Cheryl (pharmacist) & discussed Butrans & the ability for patients to take supplemental opioid or non-opioid analgesics. She said she does not know of any alert when scripts for both Butrans & supplemental analgesia come through for a patient. She said it does not surprise her that this is allowable because getting a long-acting opioid plus an immediate-release opioid for a patient is not unusual. Discussed dosing & titration. Reviewed savings cards for both products.
PPLPMDL0020000001	Parma	OH	44129	10/27/2011	TRIALIST- Dr Gigliotti said he is offering Butrans to patients but no one wants it. I told him this surprised me & he said it surprised him also. I asked him to tell me about the patients he is offering Butrans to. He said they are patients who are currently on Vicodin. He said also that patients express concern that it will be too expensive because it is a newer medication. Reviewed commercial insurance & savings cards & let him know Medicaid is paying for it currently. He said he would never prescribe it for a Medicaid patient because he believes all Medicaid patients should get generic medications. I gave him patient information booklets & he looked through it. Told him how he can utilize the booklets in his discussions with them about Butrans. He said it would be helpful & that he would do his best to get some scripts written for Butrans. Discussed titration ability after 72 hours to a maximum 20mcg dose. OxyContin broad formulary coverage messaging.
PPLPMDL0020000001	Cleveland	OH	44103	10/27/2011	dr said she's started a few patients on Butrans that had Caresource and didnt have a problem getting it approved so she's happy.i asked dr if she had more Caresource patients like this that she can start on Butrans,dr said yes,talked about dr continually starting patients on OxyContin that she feels are appropriate,dr said she is still starting a lot of patients on OxyContin.recommended Senokot-S
PPLPMDL0020000001	Cleveland Hts	OH	44118	10/27/2011	Quick call...I asked doc how butrans patients are doing. He said he has not heard any complaints. I let him know that butrans is being covered by caresource after failing on tramadol. He asked if I was sure. I told him that scripts are going through. He said he might be able to get more patients now. Nothing more learned.
PPLPMDL0020000001	Highland Heights	OH	44143	10/27/2011	Window call...I explained the BUP 3015 clinical trial and how 50% of patients on butrans showed a 30% or more improvement in pain scores. I asked him to review the trial. Offered more butrans and oxycontin savings cards.
PPLPMDL0020000001	Cleveland	OH	44111	10/28/2011	I asked her to reminded Dr about Butrans as an option when patients are not well controlled on low dose hydrocodone or oxycodone, and she agreed. We reviewed the Butrans and OxyContin savings cards and she is handing them out to the patients.
PPLPMDL0020000001	Garfield Hts	OH	44125	10/28/2011	Spoke with Brian (pharmacy manager) & inquired about Butrans stocking. He said they carry & move the 5 & 10mcg doses. Gave him an updated FPI & reviewed updates to pK profile. Also discussed appropriate patient type. I asked if he ever makes a recommendation to a physician on medication switches. He said occasionally & that it depends on the physician. Reviewed OxyContin savings cards which he said he has enough of.
PPLPMDL0020000001	Chagrin Falls	OH	44023	10/28/2011	Spoke with pharmacist, Anita, & gave her updated Butrans FPI. She confirmed stocking but said she has not dispensed any herself. Discussed appropriate patient type with her, focusing on patients who are not well-controlled on short-acting around-the-clock opioids who may be calling too soon for refills. Also showed section 2.4 & discussed supplemental analgesia in the form of opioid or non-opioid immediate-release medications. She said she would typically call the physician if she noticed any type of alert. Gave her savings cards for Butrans & OxyContin. She said they dispense a fair amount of OxyContin at this location.
PPLPMDL0020000001	Cleveland	OH	44109	10/28/2011	asked dr if he saw Butrans playing a role in his practice? dr said he keeps thinking Butrans is like Duragesic,just another patch,and its not covered on medicaid.showed dr Butrans visual aid,discussed appropriate patients and showed initiation guide so dr understood that i wasnt talking to dr about his Duragesic patients,dr said ok that made sense.we discussed Caresource patients trying Butrans,focused dr on BWC and commercial plan patients.I asked dr if he had 1-2 patients coming in today like we discussed that he could start on Butrans? dr said he would think about it and talk to a few patients about Butrans.told dr OxyContin is an option for patients and showed formulary grid.
PPLPMDL0020000001	Independence	OH	44131	10/28/2011	TRIALIST- I asked Deb about her experience with Butrans. She said she is really getting great results. I asked her what patient types she is using it in with success. She said she has been using it in patients who are taking multiple Vicodin per day. I asked her why not try it sooner, such as before going to Vicodin. She said this was a good point. She added that, since she is getting such good results with Butrans, she would almost prefer using it instead of getting patients started on Vicodin. I told her this was a great place to position Butrans & supported her statement. She said again that she would start using Butrans after tramadol, instead of starting patients on Vicodin. Deb added that she notices less sedation with Butrans than with Vicodin. I told her we do not have clinical data to support that. She said she knows that but that has been her clinical experience with it thus far. She also said she loves giving out patient information booklets & patients respond well to it. Offered her a DVD, which she accepted, saying, she would be interested in viewing it. She committed to continue to prescribe Butrans in talked to Rod,Pharmacist,about Butrans stocking and Rod said they havent seen any Rx for Butrans but he has 1 strength in stock that was autoshipped to Walmart in Jan.showed Rod 5 Butrans core selling messages,asked Rod what features of Butrans really stood out to him? Rod said dosing once every 7 days and the fact that Butrans is a patch some patients may prefer that.I asked Rod if he's recommended Butrans to any patients,Rod said he's given booklets out but thats it not much discussion with patients on Butrans.I asked Rod if he could continue giving patients Butrans patient info booklets,when they tell him their immediate release opioids arent controlling their pain? Rod said yes he will do that we discussed Butrans formulary coverage,focus on Caresourc,BWC and commrcial plan patients.we discussed appropriate patients for OxyContin and formulary coverage and Rod said no new Rx for OxyContin,same patients every month.recommended Senokot-S
PPLPMDL0020000001	CLEVELAND	OH	44109	10/28/2011	talked to dr about BUP3015,opioid experienced patients,asked dr if the data was clinically significant? dr said yes it is.i asked dr if it was clinically significant enough to prescribe Butrans? dr said yes,dr said he has some patients in mind to start on Butrans but keeps thinking Butrans isnt covered on medicaid and medicare. we talked about Caresource patients starting on Butrans,focused dr on BWC and commercial plan patients,dr said ok that makes a difference.we discussed initiation and titration of Butrans.i asked dr if he had a couple patients today that he could start on Butrans? dr said he might but will think about it today.we discussed appropriate patients for OxyContin and formulary coverage.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44113	10/28/2011	talked to dr about BUP3015,opioid experienced patients,asked dr if the data was clinically significant? dr said yes it is.i asked dr if it was clinically significant enough to prescribe Butrans? dr said yes,dr said he has some patients in mind to start on Butrans but keeps thinking Butrans isnt covered on medicaid and medicare. we talked about Caresource patients starting on Butrans,focused dr on BWC and commercial plan patients,dr said ok that makes a difference.we discussed initiation and titration of Butrans.i asked dr if he had a couple patients today that he could start on Butrans? dr said he might but will think about it today.we discussed appropriate patients for OxyContin and formulary coverage.recommended Senokot-S

PPLPMDL0020000001	Cleveland	OH	44102	10/28/2011	I talked to Vince, Pharmacist, who said that he's not seen any Rx for Butrans and won't order Butrans until that happens, we discussed importance of stocking and I showed Vince 5 Butrans core selling messages, asked Vince what features of Butrans stood out to him. Vince said he was surprised that Butrans is a long-acting opioid but is a CII, Vince said some doctors may like that they can call in refills of Butrans. Vince said once every 7 days dosing is another feature that stands out to him as some patients may prefer this dosing regimen. I asked Vince if he's given Butrans patient info booklets to any patients to speak with their doctors? Vince said he gave a couple out. I asked Vince to show patients the application/rotation section in Butrans patient info booklet and ask patients to discuss Butrans with their doctors if their immediate release opioids aren't controlling their pain. Vince said he will do that. I talked to Vince about BWC, commercial and Caresource patients for Butrans. We discussed appropriate patients for OxyContin and formulary coverage. recommended Senokot-S
PPLPMDL0020000001	South Russell	OH	44022	10/28/2011	NON-PRESCRIBER- Reviewed Butrans 5 core messages with Dr Kale & spent time going over appropriate patient type. Focused on patients who are not well-controlled on tramadol & asked if she would consider Butrans as an option for those patients. She said yes. She said it is easy to think of Butrans as a "big gun" because prior to Butrans, the only patch they could prescribe for pain was fentanyl, a CII. Discussed Butrans as a CII once weekly option, but advised that Butrans still carries abuse/addiction potential like other opioids. I asked where she could see herself prescribing Butrans & she said for her patients who had previously been on Darvocet. I agreed that those patients would be a good place to start if they were appropriate & met the Butrans indication of moderate to severe chronic pain. Also discussed OxyContin as an option for patients beyond Butrans 20mcg.
PPLPMDL0020000001	Chagrin Falls	OH	44022	10/28/2011	NON-PRESCRIBER- Quick call with Dr Hudson. Positioned Butrans for patients who are not well-controlled on tramadol or Vicodin (low-dose) around-the-clock for chronically painful conditions. She said she would keep it in mind & walked away.
PPLPMDL0020000001	Westlake	OH	44145	10/28/2011	I showed Dr the inclusion criteria, I asked if he treats these disease states in different ways. He said that it really just depends on the patient, their age and the severity of the disease, what they've tried before. We discussed Butrans as an option for these types of patients and I asked if he would prescribe Butrans for these patient types. He agreed.
PPLPMDL0020000001	Lyndhurst	OH	44124	10/28/2011	Spoketo Erin about the stocking and movement of butrans. She said they have both the 5 and 10mcg and maybe has filled it once or twice. I asked if she knew who the prescribers were. She could not remember. I asked if she has heard any feedback on butrans. She said no. She asked if it is like fentanyl. I told her we have no head to head data with fentanyl. I also explained that butrans can be prescribed first line as an opioid but we are talking to doc about prescribing butrans instead of going to hydrocodone ATC. She confirmed that they are getting a steady amount of oxycontin still and patients always seem to be able to afford it.
PPLPMDL0020000001	Independence	OH	44131	10/28/2011	NON-PRESCRIBER- Quick call as I caught Roman in the hallway. Positioned Butrans for patients not well-controlled on tramadol or low-dose Vicodin with commercial insurance. Also reminded him of savings cards. He said he will try to use it.
PPLPMDL0020000001	Cleveland	OH	44109	10/28/2011	dr said he's talked to a few patients about Butrans and given Butrans patient info booklets but has to wait to see them back. told dr that was great he talked to a few patients, asked dr if he's got a few patients coming in today that he can start on Butrans? dr said he might, will think about and if any patients say they want something else, he'll talk to patients about Butrans. focused dr on BWC, commercial and Caresource patients trying Butrans.
PPLPMDL0020000001	Cleveland	OH	44109	10/28/2011	worked pm&r dept - calls on dr harris, dr fox and dr jaffer
PPLPMDL0020000001	Lyndhurst	OH	44124	10/28/2011	Doc said she wrote 2 scripts last week...for new patients. She said they were started on 10mcg and were previously taking maybe a couple of tablets of vicodin. One patient she had double to 20mcg because the 10mcg was not enough. I explained that the FPI does not recommend the use of more than 1 patch at a time and certainly not to exceed 20mcg. She said she would likely prescribe butrans after tramadol. I told her that is exactly a good place to prescribe butrans. She said they are not enough patients to fit that category. I asked her if she has Caresource patients as butrans is seemingly being covered after tramadol. She said that was good to know.
PPLPMDL0020000001	Cleveland	OH	44135	10/28/2011	REminded her that a low dose of oxycontin might be appropriate after 20mcg of butrans.
PPLPMDL0020000001	Cleveland	OH	44113	10/28/2011	I asked Dr if his patients have been happy with Butrans. He said yes and he also heard a lot of feedback. I asked if he's been happy enough with Butrans that he will continue to start new patients. He said that he will. I reviewed the managed care for Butrans and the savings cards.
PPLPMDL0020000001	Cleveland	OH	44113	10/28/2011	dr said he started 3 patient on Butrans recently, told dr that was great and asked why he started that patient on Butrans? dr said patient wasn't controlled on vicodin and he wanted to try something different so he started patient on Butrans. discussed initiation and titration of Butrans, dr said he understands that. showed dr BUP3015, opioid experienced patients and asked dr if a 30% reduction in pain was clinically significant? dr said yes, but most patients want no pain. I asked dr if that happens with any of the immediate release opioids he prescribes? dr said no, patients might go from a 7 to a 5, on pain scale, but that's occasional not often. I asked dr if he found the Butrans clinical data results clinically significant enough for him to prescribe more Butrans? dr said yes he will start more patients. focused dr on BWC, commercial plan patients and discussed Caresource patients trying Butrans. dr started a Caresource patient right there as the patient had tried tramadol and was currently taking vicodin but not controlled. talked to dr and staff about Butrans patient info booklets, focused discussion on application/rotation and side effects of Butrans.
PPLPMDL0020000001	Cleveland	OH	44113	10/28/2011	I talked to dr about BUP3015, opioid experienced patients, clinical trial and asked dr if a 30% reduction in pain was clinically significant? dr said yes any % reduction in pain was significant. I asked dr if it was clinically significant enough to prescribe Butrans? dr said yes she will think of patients and talk to them about Butrans. we discussed initiation and titration of Butrans and focused dr on Caresource and commercial patients.
PPLPMDL0020000001	Cleveland	OH	44109	10/28/2011	showed dr BUP3015, opioid experienced patients, discussed 30% reduction in pain data and asked dr if this was clinically significant? dr said yes any reduction in pain is good. asked dr how often does he see a 30% reduction in pain, when patients are taking immediate release opioids? dr said rarely does he see that. I asked dr if it was clinically significant enough for dr to prescribe Butrans? dr said yes he will consider it but most of his patients are controlled on short-acting opioids. focused dr on initiation and titration of Butrans in visual aid, showed patient info booklet and focused dr on Caresource, BWC and commercial plan patients to start on Butrans.
PPLPMDL0020000001	Cleveland	OH	44113	10/28/2011	talked to dr about BUP3015, opioid experienced patients, clinical trial results and asked dr if the data was clinically significant? dr said yes a 30% reduction in pain is clinically significant. I asked dr if this reduction was clinically significant enough for dr to prescribe Butrans? dr said yes. dr said most of her patients are controlled on tramadol but she likes that Butrans is a patch and dosed once every 7 days. I asked dr if she has any patients coming in today that are taking tramadol but not controlled? dr said she might but would have to think about it. we talked about initiation and titration of Butrans and formulary coverage. I focused dr on Caresource and commercial
PPLPMDL0020000001	Mayfield Hts	OH	44124	10/28/2011	Quick call...Reminded doc of the Butrans indication and positioning, 7 day delivery and CII status. I asked him to prescribe Butrans after tramadol failures and let him know about Caresource covering butrans failing on tramadol as well as the commercial plans and BWC. He said he can't seem to remember. Gave him a titration guide and asked him to keep it in his pocket until he wrote 1 first script. No commitment.
PPLPMDL0020000001	Westlake	OH	44145	10/28/2011	Spoke with Jennifer, we reviewed the fact that Butrans can be used with opioid or non opioid supplemental analgesia. We reviewed the Butrans medication guide and how to teach patients about steady state, application and rotation. We reviewed the savings program for Butrans and OxyContin.
PPLPMDL0020000001	Lyndhurst	OH	44121	10/28/2011	Spoke to Bill about the stocking of butrans and oxycontin. He said he has the basic strengths (20,40, 80mg) of oxycontin stocked but had not seen any butrans scripts though he does have it in stock. I explained the positioning and the strengths. He asked about coverage as they get a lot of medicare. Explained the commercial insurance and the savings cards but no medicare. I asked him about his medicaid volume. He said they have more medicare and commercial. Gave him patient info guide and pointing out the proper application.
PPLPMDL0020000001	Cleveland	OH	44111	10/28/2011	I asked Dr what's the downside to trying Butrans, he said he just needs to find the right patient that is on lower doses of opioids so that it will be effective. I let him know that we'll find him the right patient and said he would probably be seeing a patient on low dose hydrocodone of oxycodone whose pain is not well controlled. I asked if he would start a patient like this and he agreed. Reminded that OxyContin is an option for those patients on higher doses of opioids. He said he is still starting new patients.
PPLPMDL0020000001	Lyndhurst	OH	44124	10/28/2011	I reminded doc of the Butrans indication and positioning. I asked him if he has patients taking tramadol daily for ATC pain. He said maybe. I reviewed the starting dose (10mcg) for tramadol failures and the coverage for commercial patients. He asked about medicaid. I explained that Caresource is reportedly covering butrans after tramadol/codeine/vicodin. He said he might try it then. Gave him a BUP3015 clinical trial and formulary grid.
PPLPMDL0020000001	Cleveland	OH	44135	10/28/2011	Spoke with Lisa, we discussed that Butrans can be used with opioid or non opioid supplemental analgesia, proper application and rotation, and steady state in three days. She will hand the medication guides out to the patients. I reviewed the conversation guide for OxyContin and she said they still have a handful of patients on OxyContin but not as many as they use to.
PPLPMDL0020000001	Independence	OH	44131	10/28/2011	NON-PRESCRIBER- Spoke with Jill (MA) who said Dr Pai was not in the office. Updated her on Butrans managed care, letting her know that Medicaid plans are paying for Butrans currently. She said she would try to remember to tell him but suggested I return next week to try to catch him myself. Also reminded her of savings cards, reminding her that they are for cash-pay or commercially insured patients only.
PPLPMDL0020000001	Chagrin Falls	OH	44022	10/28/2011	REPEAT CUSTOMER- Dr Rood said he still has two patients on Butrans. I asked how they report the pain relief they are receiving. He said they both say they are getting good relief. He also said that he received correspondence from Purdue regarding his patient who had a missing patch from their carton of Butrans (reported last call). He said he was pleased to learn that this had actually been a manufacturing problem, which means his patient was telling the truth. He said he appreciated the company's attention. I told him Purdue is committed to safety & that is why we report incidences such as that. I showed him BUP3015 efficacy data. I asked him if almost half of patients who were at a 10 on the pain scale came back on Butrans reporting a decrease to a 7 if he would find that to be clinically meaningful. He said those results would actually be somewhat disappointing. He then added that someone going from a 7 to a 4 would seem more "impressive". Discussed appropriate range of patients & OxyContin as an option for patients beyond Butrans. He said he has thought of Butrans as an option for some other patients but he always exhausts every other treatment avenue before resorting to anything narcotic. I asked him if he would use Butrans as the medication of choice if/when he does find that an opioid is warranted & I asked HCP what she remembers about butrans. She recalled that it is a once a week patch for moderate pain. She said she has not prescribed it yet because she is not really sure who is appropriate. When she thinks to use it, the patient may not have the right coverage. I explained to her the commercial plan and recent Caresource after tramadol failures. I reminded her to prescribe butrans after max doses of tramadol and they should likely start on the 10mcg/hr.
PPLPMDL0020000001	Mayfield Heights	OH	44124	10/28/2011	Prospect. Doc said he just did a grand rounds talk at St. Elizabeth where he discussed various opioid options which included butrans. He said he had gone online to learn more about butrans. So I asked him where he would use butrans in his practice. He said maybe for moderate pain - after vicodin or percocet. I told him after tramadol but before going to hydrocodone ATC. He said that makes sense. He asked how long butrans takes to work. I told him that measurable blood levels are seen after 17hrs and that steady state is reached in 72 hours but that does not necessarily suggest analgesic effect. I reviewed the coverage and the savings cards and that Caresource is reportedly covering butrans now. I explained that a low dose of oxycontin may be appropriate. He said he would try to start more patients on butrans.
PPLPMDL0020000001	Cleveland	OH	44130	10/31/2011	TRIALIST- Dr Diab said he had no time today. I asked him about his comfort level with Butrans at this point, now having some experience. He said he is "getting there" with it & started to walk away. I let him know that insurance coverage is improving & that Medicaid plans are currently paying for Butrans. He said that was good & walked into a room. Went through Initiations case study "Evelyn" with Barb, nurse.
PPLPMDL0020000001	Parma	OH	44129	10/31/2011	NON-PRESCRIBER- Quick call- Caught Dr Kushnar at the window. Positioned Butrans for patients not well-controlled on tramadol around-the-clock. She pointed out the savings cards on her table, thanked me, & walked away to take a phone call. Spoke with Natalie, MA, & discussed further the appropriate patient type & range for Butrans. Also discussed patient information booklets.
PPLPMDL0020000001	Beachwood	OH	44122	10/31/2011	NON-PRESCRIBER- Spoke with Donnie, Dr Warren's nurse, who said Dr Warren had to go to the hospital to see patients & was not in. I reviewed Butrans overview with him & asked him why he thinks Dr Warren has not started prescribing Butrans. He said he is not sure & that he does think he has patients who fit the description of the appropriate patient type. He said he would do his best to remind Dr Warren when he identifies a patient.
PPLPMDL0020000001	Parma	OH	44129	10/31/2011	Reviewed OxyContin formulary information.
PPLPMDL0020000001					Spoke with Stan & Kevin (clinical coordinator, manager). They said Butrans is in the process of being reviewed by the necessary committees for formulary inclusion & it still has one committee left to go through before becoming official. Kevin said Butrans will likely be added, but only for patients who come in already on it, not for new patients. I asked why the stipulation was in place. He & Stan said it was the decision of the physicians who discussed/reviewed it. I asked if they knew what their reasoning was for that but they said because it is a private meeting they did not know. Kevin added that he finds it confusing & that he is not sure how that would even be enforced. Stan said when the hospice discussion came up, they elected to stay with the fentanyl patch. Discussed appropriate patient type/range. Stan said that most hospice patients need pain relief acutely & are in more severe pain than the Butrans range. Spoke with pharmacy staff & reviewed core messages, application, steady state, titration after 3 days to a max 20mcg dose, CII/abuse/addiction potential, & disposal. Stan asked for savings cards so that they can be given to patients who are prescribed Butrans & then discharged. He asked how much buprenorphine is left in the patch after 7 days & if applying a cold pack to the patch has any effect on release.
PPLPMDL0020000001					Told him I had no data on either question & submitted MIRF. Discussed range of patients & OxyContin q12h for patients beyond Butrans range.

PPLPMDL0020000001	Cleveland	OH	44114	10/31/2011	John,pA,said they are continually starting patients on Butrans.John said he's got some Caresource patients coming in this week so he's going to start them on Butrans and see if it gets approved,we talked about appropriate patients I showed John BUP 3015,opioid experienced patients and discussed 30% reduction in pain,John said any reduction in pain is a good thing and they are seeing good results from Butrans with their patients so no complaints so far,John said Medicaid not approving butrans has been biggest challenge but he's going to see what happens with Caresource as that would help them start more patients on Butrans.we discussed initiation and titration of Butrans and I showed John Butrans patient info booklet and asked him to focus patient discussion on application/rotation of Butrans with patients,John said he does that and will give booklets to
PPLPMDL0020000001	Parma	OH	44129	10/31/2011	Spoke with pharmacist, Linda & inquired about stocking of Butrans. She said she had ordered the 5mcg when it first came out, but since they had not dispensed any, she had to send it back per corporate rules. Gave her an updated FPI & reviewed change to pK profile. Also showed 2.4 & discussed ability to take supplemental analgesia with Butrans. She said she did not know about that. I asked how often she sees chronic tramadol or Vicodin prescriptions. She said rarely. I told her this may explain why she has not seen Butrans activity & discussed appropriate patient type & range. She said she would happily order Butrans if a legitimate patient came in with a prescription. Discussed OxyContin q12h.
PPLPMDL0020000001	Cleveland	OH	44102	10/31/2011	talked to Vicki,Pharmacy Mgr,about Butrans 5 core selling messages,Vicki said she's not seen any Rx for Butrans but once she does she'll order Butrans.Vicki said there was 1 Rx for Butrans early in year,but nothing after that.we talked about 5 core selling messages and what features of Butrans stood out,Vicki said she likes that Butrans is a patch and dosed once a week and said that some patients may like that option.I showed Vicki Butrans patient info booklet and asked if she would give these to patients to speak with their HCP's if they aren't controlled on short-acting opioids.Vicki said she'll do that. We discussed formulary coverage for Butrans,discussed appropriate patients for OxyContin with Vicki,showed conversion guide and discussed formulary coverage.Vicki said most of the OxyContin Rx haven't been new Rx,same patients coming to them every month,more new Rx for Opana ER.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	10/31/2011	talked to dr about BUP3015,opioid experienced patients,asked dr if 30% reduction in pain was clinically significant? dr said 30% reduction is clinically significant and good results from a pain medication.i asked dr if that's what he sees now with immediate release opioids? dr said no patients leave him and have the same pain or worse even though they are taking their immediate release opioids daily.i asked dr if he had a couple patients this week,that he could start on Butrans,similar to patients we discussed in BUP3015 inclusion criteria? dr said yes he does and will talk to some patients this week.we discussed Caresource patients and commercial plan patients trying Butrans.recommended Senokot-S
PPLPMDL0020000001	Parma	OH	44134	10/31/2011	Spoke with Nate, pharmacist, & gave him a new Butrans FPI. Showed him updated pK profile & also drew his attention to section 2.4 & discussed ability to take supplemental analgesia in form of opioid or non-opioid medications. Nate said he was aware of that detail. He said he stocks all strengths. He did not need any OxyContin savings cards.
PPLPMDL0020000001	Lakewood	OH	44107	10/31/2011	Spoke with Cindy, we discussed the medication guide for Butrans and she agreed to hand them out with scripts. We discussed that Butrans is a CIII and can be refilled and that Butrans can be used with opioid or non opioid supplemental analgesia. Reminder that both Butrans and OxyContin have savings programs.
PPLPMDL0020000001	Cleveland	OH	44106	10/31/2011	talked to dr about BUP3015,opioid experienced patients,asked dr if 30% reduction in pain was clinically significant? dr said yes,dr said he's not really prescribing a lot of narcotics as he does more procedures but likes the idea of Butrans being a patch and dosing once a week could be appealing to some patients.I asked dr if the reduction was clinically significant enough for him to prescribe Butrans? dr said yes he'll think about some patients and try Butrans.dr asked about Medicaid coverage,we discussed Caresource patients trying Butrans and I focused dr on Commercial plan patients. recommended Senokot-S
PPLPMDL0020000001	Lakewood	OH	44107	10/31/2011	Quick follow up. I asked if he had seen any patients like the ones we talked about last time, taking tramadol or low dose vicodin around the clock who would be appropriate for Butrans. He said he had a patient in mind he was going to start. I asked if there is anything else holding him back from prescribing Butrans more often and he said no, he just needs to remember it. I reviewed the managed care for Butrans and OxyContin.
PPLPMDL0020000001	Cleveland	OH	44114	10/31/2011	talked to dr about his patients that he's starting on Butrans,majority are his percoct patients and dr said he's continually starting more patients on Butrans and they seem to be doing well on Butrans.showed dr BUP3015,discussed opioid experienced patients,clinical trial data and asked dr if 30% reduction in pain was clinically significant? dr said yes any reduction in pain is good.I asked dr if he had patients taking hydrocodone combo's that aren't controlled and he could start them on Butrans? dr said probably so,he'll think about it and talk to some patients about Butrans.focused dr on BWC,commercial and we discussed Caresource patients trying Butrans
PPLPMDL0020000001	Lakewood	OH	44107	10/31/2011	Dr said that he has a couple of patients on Butrans and they have been doing well. I asked if he has been happy enough with Butrans that he will continue to prescribe for new patients he said yes. I asked where he sees Butrans fitting in and he said for patients taking vicodin or percoct, before trying another long acting. I reviewed the invitation guide and asked if he would start a new patient like this on the 10mcg Butrans this week and he agreed. He said he does still have a handful of patients on OxyContin and they are also doing well.
PPLPMDL0020000001	Lakewood	OH	44107	10/31/2011	Quick call at window, I reviewed the managed care for Butrans and the possibility of managed Medicaid plans paying for Butrans. He said that he sees a lot of these patients and it gives him a much better chance to get Butrans covered. I asked if he would write a few scripts for Butrans and let me know what goes through on managed care and he agreed.
PPLPMDL0020000001	Cleveland	OH	44113	10/31/2011	asked dr what patients say in exam room that makes him think of Butrans? dr said if patients ask for something different then he'll talk about Butrans.i asked dr if he will start a few patients this week that are appropriate for Butrans,showed pg.11 visual aid inclusion criteria,dr said he will and he's considering more patients to start on Butrans as BWC wants doctors to consider other opioid options for chronic pain conditions,than immediate release opioids.dr said he gave a couple patients Butrans patient info booklets,after our lunch last thursday,to review and think about starting Butrans and he's following up with them in a few weeks. focused dr on BWC
PPLPMDL0020000001	Cleveland	OH	44144	10/31/2011	NON-PRESCRIBER- Quick window call- Positioned Butrans, a once weekly transdermal system for moderate to severe chronic pain, for patients who are not well-controlled on short-acting around-the-clock opioids. Dr Paul thanked me & walked away. Spoke with Carol & Wendy & reviewed Butrans formulary grid.
PPLPMDL0020000001	Lakewood	OH	44107	10/31/2011	I showed the Butrans demo and carton and reminded her this is what the patients get when she prescribes Butrans. I asked if she would continue to write Butrans for patients on tramadol or low dose vicodin whose pain is not well controlled and she said she would if they can afford it. I reviewed the managed care and saving program for Butrans and that OxyContin may also be an option with good managed care coverage.
PPLPMDL0020000001	Westlake	OH	44145	10/31/2011	Dr said that he is still trying to find the right patient for Butrans. I told him not to worry and we will find him the right patients. I told him he will probably have a patient come in this week with back pain where tramadol or low dose vicodin is no longer controlling their pain. I asked if he would write for Butrans for this patient and he agreed. I reviewed the initiation guide and when the 10mcg Butrans would be the starting dose.
PPLPMDL0020000001	Parma	OH	44129	10/31/2011	NON-PRESCRIBER- Dr Taylor said she wrote her first Butrans prescription today. I asked her to tell me about the patient. She said it was a female patient with back pain who was taking Vicodin ES 3 times per day. Dr Taylor said the patient had BWC coverage & that she started her on the 10mcg dose. I told her it sounded like she did exactly what she should have. She said she will let me know once she has feedback from the patient.
PPLPMDL0020000001	Cleveland	OH	44113	10/31/2011	dr said he started a couple patients last week,after our lunch,that were taking hydrocodone and not controlled,we discussed initiation of Butrans,titration and I asked dr if he has more patients like the one's he started last week,to start on Butrans? dr said yes he has more patients and will do his best to keep talking to patients about Butrans.focused dr on commercial plan patients and Caresource patients trying Butrans.recommended Senokot-
PPLPMDL0020000001	Cleveland	OH	44106	10/31/2011	I asked dr when treating patients with pain conditions,pg.11 visual aid,how does she consider a long-acting opioid appropriate? dr said that's the last resort.dr said she treats patients with immediate release opioids first,with physical therapy,exercise, then will look at procedures for patients and if all that fails,then she'll consider a long-acting opioid.we discussed Butrans 5 core selling messages and I asked dr if she saw clinical benefits in Butrans? dr said yes she likes that Butrans is a patch and dosed once every 7 days as some patients may like that,dr said she'll think about it and will talk to some patients.dr asked about Medicaid coverage,we discussed Caresource and commercial plan patients trying Butrans.we discussed initiation and titration of Butrans and giving patients Butrans patient info booklets to educate them on Butrans,dr said she will give them to patients. recommended
PPLPMDL0020000001	Lakewood	OH	44107	10/31/2011	Quick call with Joe, I asked if he consults with new patients and he said not very often unless the have questions and ask for him. I reviewed the Butrans can be called in since it is a CIII and refilled. I showed the FPI and that Butrans can be used with opioid or non opioid supplemental analgesia.
PPLPMDL0020000001	Cleveland	OH	44106	10/31/2011	dr said he's talked to a few patients about Butrans but some patients don't want to wear a patch.we talked about dr still giving patients immediate release opioids with Butrans,showed fpi maintenance of therapy section,dr said ok he'll remember that next time.i asked dr what clinical benefits he saw in Butrans? dr said its another opioid but he likes that its a patch he just keeps forgetting about Butrans.i asked dr if he walks in exam rooms and patients tell him their tramadol isn't controlling their pain,how does he respond? dr said he'll usually give a refill of tramadol unless patients asking for something else.i asked dr to start a couple patients on Butrans,instead of refilling tramadol? dr said he will do that and said i just have to keep reminding him.talked to dr about Caresource patients trying Butrans and commercial plan patients.we discussed OxyContin being an option for those patients who are ready for a long-acting opioid but not wanting to wear a patch like Butrans,dr has option of OxyContin,dr said he knows about OxyContin and writes a lot of OxyContin,updated dr on OxyContin formulary coverage,dr said ok and thanked me for info.recommended Senokot-S
PPLPMDL0020000001	Parma	OH	44129	10/31/2011	Spoke with MA Cindy who said Dr Ortega was not in today. Discussed patient information booklets & answering patient questions about application & disposal of Butrans. She said she would try to pay better attention to giving out the booklets. Also discussed patient savings programs for Butrans & OxyContin. She did not need any savings cards.
PPLPMDL0020000001	Richmond Heights	OH	44143	10/31/2011	I discussed the butrans indication and selling messages and asked doc if she sees any merit to a product like butrans. She said of course but the problem is the coverage (as she viewed the formulary grid). She asked if we had coupons. I confirmed that we do have savings cards which can bring cost down to near a tier II co-pay. I told her that Caresource is also covering butrans after failing tramadol/vicodin. She asked about Medicare. Told her no coverage there. She said that's a problem. I asked her to try one patient on butrans if 100% of her practice is not Medicare. She accepted savings cards. Reminded her of the oxycontin patient and the savings cards there.
PPLPMDL0020000001	Cleveland	OH	44106	10/31/2011	asked dr how he decides if patients will get a refill of short-acting opioid or convert to a long-acting opioid.dr said if he's maxed the patients out on the dosage strengths and monthly amount,then he'll consider a long-acting opioid.showed dr Butrans visual aid,discussed 5 core selling messages and asked dr what features of Butrans stood out to him? dr said he likes that Butrans is a patch and likes the once every 7 days dosing but doesn't think all patients will want to wear a patch.I told dr that was correct,not every patient would want to try Butrans but I asked dr if he could think of a few patients this week that are taking immediate release opioids but not controlled and start them on Butrans? dr said he'll think about it but he doesn't have a lot of patients on narcotics.dr asked about insurance coverage for Medicaid patients,we discussed Caresource patients trying Butrans and focused dr on commercial plan patients.recommended Senokot-S
PPLPMDL0020000001	Waterford	OH	45786	11/1/2011	W - Miral said that she has followed up with a couple of Dr. Water's patients who are on Butrans and the patients seem to have good pain control. She likes having the option of Butrans as a CIII and will try and remember for patients who have been on short acting for a long time who could benefit from the long acting Butrans. I - Discussion of Butrans opioid experienced clinical trial. Discussion of the inclusion criteria discussing the patient conditions as well as the previous history of medication of the patients. Discussion of the reduction in pain scores the patients reported and experienced with Butrans. Review of formulary coverage and savings card program W - Waters has a few patients on Butrans. He likes that it is 7 days of coverage and the CIII scheduling is appealing because his NPs can write for it as well as his nurse has the ability to call it in to the pharmacy. He will continue to prescribe when appropriate and likes that the medication population may have access to Butrans as an option. I - Discussion of Butrans opioid experienced clinical trial. Discussion of the inclusion criteria discussing the patient conditions as well as the previous history of medication of the patients. Discussion of the reduction in pain scores the patients reported and experienced with Butrans. Review of formulary coverage and savings card program eligibility.
PPLPMDL0020000001	Waterford	OH	45786	11/1/2011	W - Vickie said that she hasn't written for Butrans since she tried to do so for the patient that was in the nursing home. The patient was able to have one month of Butrans therapy and really liked it, but unfortunately had to switch to something else because she had Med Part D coverage. I - Discussion of Butrans opioid experienced clinical trial. Discussion of the inclusion criteria discussing the patient conditions as well as the previous history of medication of the patients. Discussion of the reduction in pain scores the patients reported and experienced with Butrans. Review of formulary coverage - limited access with Med Part D plans at this time and savings card program eligibility.
PPLPMDL0020000001	Westlake	OH	44145	11/1/2011	Spoke with Tom, we reviewed the key messages for Butrans and appropriate patient types. I reviewed that Butrans can be prescribed with opioid or non-opioid supplemental analgesia. We discussed the savings cards and managed care for both Butrans and OxyContin.

PPLPMDL0020000001	Garfield Heights	OH	44125	11/1/2011	NON-PRESCRIBER- Reviewed Butrans 5 core messages with Dalbir & discussed appropriate patient type & range, focusing on patients who are not well-controlled on tramadol or Vicodin around-the-clock. I asked if he sees patients fitting that description in his practice. He said daily. Showed initiation guide & discussed starting doses for those patients. Also discussed CIII, abuse/addiction potential, titration after 3 days & supplemental analgesia. Discussed managed care coverage & savings cards for those eligible. Gave him patient information booklets & discussed offering Butrans to patients who are taking short-acting opioids as an option for switching. Dalbir said he would offer Butrans to patients fitting the appropriate patient type as he thinks it is a good option to give them. He said patients may not be aware that it is available, so he would utilize the patient information guides to educate them & would prescribe Butrans if the patient was interested.
	Parma	OH	44129	11/1/2011	NON-PRESCRIBER- Introduced myself & Purdue's products to Dr Jugulion. Delivered Butrans 5 core messages & alerted him to box warning. I asked if he treated patients with chronic opioids in his practice. He said sometimes. Spent time going over Butrans appropriate patient type/range & discussed OxyContin as an option for patients beyond Butrans. I asked what he typically uses for chronic pain patients. He said it depends. He said usually he will prescribe anti-inflammatories, but if someone comes to him already on opioids, he feels that patient would not switch to anything else because they are "hooked". I asked what he does for patients who are no longer controlled on anti-inflammatories. He said that is when he would prescribe an opioid. Positioned Butrans for those appropriate patients. He said he could see himself using some Butrans, but not a lot as he does try to avoid opioid therapy when possible. Discussed using a pain contract as well as OARRS. He said he does use OARRS but does not use a pain contract. Reviewed formulary grid & discussed savings cards for eligible patients. He said he has many elderly patients. Asked him to focus on commercial insurance patients with Butrans for now. Also asked him if he still holds an active VT state license. He said he does. I asked if he ever practices there & he said never. He signed necessary letter to fax to home office.
PPLPMDL0020000001	Parma	OH	44129	11/1/2011	NON-PRESCRIBER- Re-introduced Butrans to Dr Moysaenko, delivering 5 core messages. I reminded him of previous conversation when he told me he has a lot of Medicare patients. I asked how much of his practice is Medicare. He said 99%. (This is not consistent with managed care data). I asked if he has any working patients on opioids. He said yes & that he does have some patients who he can think of who could use Butrans but they are "sweaty construction workers, so it won't work". I asked him to clarify. He said the patch would not stay on. I told him this is a possibility but the patch is designed to stay on for a full 7 days. Also let him know Butrans can be covered with Blocusive or Tegaderm if necessary. Discussed appropriate patient type/range & discussed OxyContin as an option for patients beyond Butrans. Also discussed 7 available tablet strengths. He said he usually just increases the dosing interval to q8h. I told him OxyContin is approved only for q12h dosing. He said he knows. I asked him to consider an intermediate dose of OxyContin instead of increasing the dosing interval. He agreed. He said he likes that Butrans gives him another option for patients who need around-the-clock pain control. Discussed Butrans as a CIII opioid & abuse/addiction potential.
PPLPMDL0020000001	Richmond Heights	OH	44143	11/1/2011	Prospect. I reviewed the selling messages of butrans and asked if doc would likely use in opioid naive or opioid experienced. He said he definitely not use for opioid naive patients. I discussed the initiation dosing of 10mcg if he were to go to butrans after tramadol failures. I shared the results of the BUP3015 and asked for his thoughts. He said the problem with such new products as affordability. I reviewed the coverage, savings cards and caresource. He asked about the diversion potential. I explained to him that Butrans is still a scheduled narcotic and has the risks similar to other narcotics. He also wanted to know how quickly butrans starts to work. I told him the measurable amounts are found in the bloodstream after 17 hrs but steady state is reached in 72hrs. I asked him if he would try butrans for an appropriate patient. He said he would still like to know more. I gave him an engage invite to log onto. I discussed the oxycontin indication and dosing. He said he is not writing oxycontin.<font color=blue><b>CHUDAKOB's query on 11/12/2011</b></font>Charmaine, his question was about onset of action, and measurable blood levels or steady state do not relate to onset of action and by stating this as the answer to the question, there is an implication that this is when Butrans will start working. While the information you told him is correct, you should answer this type of question by simply stating we have no onset of analgesia data.<font color=green><b>SIMERTOC's response on 11/14/2011</b></font>I understand now. I asked you about this just as you had sent us a voicemail regarding this.<font color=blue><b>CHUDAKOB added notes on 11/17/2011</b></font>OK. Thanks!
PPLPMDL0020000001	Parma	OH	44134	11/1/2011	Spoke with pharmacist Marko & gave him updated Butrans FPI, pointing out the change to the pk profile. Also discussed ability for patients to take supplemental analgesia in opioid or non-opioid form while on Butrans. I asked if he is aware of any type of alert that would come up if the two were prescribed together. He said he is not, but he could see how that would come up as what he called a "soft alert". He added that because buprenorphine is also used in the treatment of drug addiction, if it is prescribed with an opioid, it could activate an alert. Discussed appropriate patient type. Marko said he wishes physicians would start prescribing Butrans more. He did not need additional OxyContin savings cards.
PPLPMDL0020000001	Westlake	OH	44145	11/1/2011	Quick call as Dr came in an hour late. I asked if he's been happy with the results he's getting with Butrans. He is and said he will continue to start new patients. I asked if he would write for Butrans today and he said he will.
PPLPMDL0020000001	Cleveland	OH	44104	11/1/2011	talked to dr about BUP3015,opioid experienced patients,showed clinical reduction page and asked dr if a 30% reduction in pain was clinically significant? dr said yes but she really doesnt have many patients taking narcotics for chronic pain.dr said she likes that Butrans is a patch and dosed once a week as some patients may like that but at this time she doesnt see a place for Butrans in her practice.talked to dr about commercial plan patients and caresource patients trying Butrans and asked dr if she comes across 1-2 patients with 1 of these pain conditions.pg.11 visual aid, that arent controlled on short-acting opioids,will she start them on Butrans? dr said yes she'll consider Butrans an option when appropriate.
PPLPMDL0020000001	Cleveland	OH	44124	11/1/2011	Prospect...I ask doc if he sees a place for a product like butrans in his practice - a long acting CIII for moderate to severe chronic pain. He said there are already too many narcotics on the market. He suggested a talk to his nurses about it and they will be in on Wednesdays. Gave a oxycontin formulary grid.
PPLPMDL0020000001	Cleveland	OH	44195	11/1/2011	worked rheumatology dept-left Butrans fpi,initiation guide,formulary grid,ENGAGE invitation,patient info booklet and my business card for dr chatterjee,dr long,patty paczos,pa,dr calabrese,betsy kirschner,np,as i couldnt see any of these HCP's. worked aneseth/pain dept-left dr covington and dr mathews same info as above.
PPLPMDL0020000001	Lakewood	OH	44107	11/1/2011	I asked Dr if he has had success with the couple patients he had started on Butrans. He agreed. I reviewed managed care for Butrans as well as OxyContin.
PPLPMDL0020000001	Stow	OH	44224	11/1/2011	Dr popped in between surgeries and said what do I have. I said I have Butrans once a week for you patients with moderate chronic pain to Oxycontin for your patients who are in moderate to severe chronic pain. I let him know that medicaid is paying for Butrans.HE said good stuff, had to go
PPLPMDL0020000001	Cleveland	OH	44125	11/1/2011	Spoke with Christine (pharmacist) & discussed ability for patients to take supplemental analgesia while on Butrans. She said she has not seen any prescriptions for Butrans in a long time. I asked if she fills a lot of chronic Vicodin or tramadol prescriptions. She said yes. I told her those are potential Butrans patients & discussed patients calling too soon for refills of short-acting opioids because of inadequate analgesia. She said this is common as well. I asked if she ever makes a recommendation to physicians or patients regarding a switch in their medication. She said sometimes. I showed her patient information booklets & asked her to give them to patients who she thinks could benefit from a once weekly transdermal system for their pain. She agreed to do this. She did not need any OxyContin savings cards.
PPLPMDL0020000001	Westlake	OH	44145	11/1/2011	I asked Dr if he has been happy with the results he's been seeing with Butrans, he said yes. I asked if he would continue to start new patients and he said he is and he will continue. We reviewed the managed care for Butrans and managed Medicaid coverage. I reviewed that OxyContin also have very good coverage. I spoke with Tina and reviewed the medication guide and savings cards for Butrans and we discussed the managed care grids for Butrans and OxyContin. Tina found the formulary grids to be helpful.
PPLPMDL0020000001	Mayfield Heights	OH	44124	11/1/2011	Prospect. I asked doc if he had a moment to learn about butrans, a 7 day CIII analgesic. He said I could leave him some information to read as he is not interested right now. Provided a BUP3015, formulary grid and engage invite. Nothing learned.
PPLPMDL0020000001	Stow	OH	44224	11/1/2011	Sharon said she has not seen the right patient, I said that is ok, I can help her find that patient, she said she is really backed up and was going to just take her food, she knows where to write it in. I said I wanted to let her know that medicaid is paying for Butrans and she said ok
PPLPMDL0020000001	Solon	OH	44139	11/1/2011	Introduced Alan to Jill and Tony in Rebates. They made us aware they'll be rolling out new Plan ID numbers to make them more consistent which have to be approved by CMS first. They'll begin sending out this in the 4QTR12 thru Jan 2013. Jill also wants to understand more about the reasons claims are denied so I asked her if she reviewed our information yet but she hadn't. Tony just received the reconciliation report in hard copy but said they prefer it in CD form to make it easier to find what they're looking for in a spreadsheet.
PPLPMDL0020000001	Westlake	OH	44145	11/1/2011	I saw Dr at window, I asked if she has been happy with the results she has seen with Butrans that she will continue to start new patients. She said the feedback has been good. I reviewed the managed care for Butrans and managed Medicaid. I reviewed that OxyContin is covered on most managed care.
PPLPMDL0020000001	Lakewood	OH	44107	11/1/2011	I followed up with Dr about the prescription solution patient who could not get Butrans. I reviewed where Butrans is covered and he said OK. I asked if he was still willing to give Butrans a try and he said he will. I reminded him that OxyContin has good coverage as well and can be another long acting option.
PPLPMDL0020000001	Mayfield Hts	OH	44094	11/1/2011	Window call.....I gave doc a copy of BUP 3015 and asked him to review as I think he might have patients to benefit from a 7 day CIII analgesic. I told him I have scheduled lunch for 11/14. He said we can discuss then.
PPLPMDL0020000001	Stow	OH	44224	11/1/2011	Sandra said she has not written Butrans, I said to her she has seen the benefit and said it was something she would write and I said is there anything that is preventing her from writing and she said it is being covered. I said in commercial plans, it is 3 rd tier with the savings cards patients will pay as low as \$15 on average, it may be more and that Medicaid is paying for it and she said that is huge. She said she will look for patients, she had to go
PPLPMDL0020000001	Cleveland Hts	OH	44118	11/1/2011	Prospect. Quick call....I discussed the positioning of butrans and oxycontin, provided him a formulary grid for both. Nothing learned.
PPLPMDL0020000001	Cleveland	OH	44130	11/1/2011	TRIALIST- Dr Fedorko said he just saw a patient who needed treatment for low back pain. I asked if it was a patient who was appropriate for Butrans. He said not yet. He said the patient needed only anti-inflammatory medication, so that is what he prescribed. I asked what he will do if that patient says that did not control his back pain. He said then he will prescribe Butrans for that patient. I told him that sounded like a good plan.
PPLPMDL0020000001	Cleveland	OH	44104	11/1/2011	dr said she started 1 patient on Butrans,2 wks ago,patient said last week that Butrans wasnt working.dr said she started this patient before she left office for 2 weeks because this patient read the Butrans patient info booklet,was interested in trying Butrans so dr started patient on Butrans 5mcg.i asked dr what dose of short-acting opioids was patient taking? dr said patient was taking 300mg tramadol/daily.i showed dr Butrans initiation guide,discussed Butrans 10mcg as the initiating dosage strength for that patient and then titrating to 20mcg if necessary.dr said she forgot and must have been confused.dr said patient was titrated to 10mcg last week but still in pain.dr said she'll call in the Butrans 20mcg after our discussion,for this patient and see if that works for her.asked dr about her patients taking percocet daily for their chronic pain conditions,showed pg.11 visual aid,how does Butrans fit into her algorithm for them? dr said percocet patients love their pills and dont want to stop taking their pills.i told dr she could still start patients on Butrans and give percocet for breakthrough pain,showed FPI section 2.4 maintenance of therapy.dr said ok that's something she could do is just cut down how much short-acting opioid patients get with Butrans.i asked dr if she could think of a couple commercial and Caresource patients,per our discussion,to start on Butrans? dr said yes she will do that and said that made sense to her.
PPLPMDL0020000001	Cleveland	OH	44113	11/1/2011	dr said he's not started any patients on Butrans but he's got some patients in mind,i showed dr Butrans visual aid discussed pain conditions with dr and asked if dr treats these conditions? dr said yes he does.i talked to dr about starting a couple patients on Butrans that are taking immediate release opioids but not controlled,discussed initiation and titration of Butrans and focused dr on commercial plan patients and caresource patients trying Butrans.dr said ok he will think about patients coming in this week.recommended Senokot.5
PPLPMDL0020000001	Parma	OH	44134	11/1/2011	LOYALIST- I asked Dr Hernandez how long he typically expects a patient to be on Butrans when he initially prescribes it for someone. He said forever. He added that usually the patient has a condition that is not expected to improve on its own, so unless the patient says it is not working anymore, he keeps them on it forever. He also told me that he titrated the female patient he has been telling me about that he put on Butrans to a 20mcg system. He said she started at the 5mcg patch & then titrated to the 10 & is now doing well on the 20mcg system. He said she is happy with her results. Discussed OxyContin as an option for patients beyond Butrans.

PPLPMDL0020000001	Cleveland	OH	44114	11/1/2011	Introduced myself to Dr.Eschelman, who came from the field as a practicing physician. He has 27 yrs of experience in Peds, Occupational Therapy and ? in the CLE area. His new role includes traveling from Toledo to Youngstown/Akron and working with employer groups, providers at hospitals as well as case managers in the hospitals. There are 6 telephonic RNs and 2 onsite at UH and Parma/SW. He speaks with them frequently especially on webinars. I provided product updates to Butrans with the FPI and initiation/titration guide. He was unfamiliar with it. I also discussed the re-formulation of OxyContin and gave an FPI. He's interested in pain resources for internal and external customers. He even attends some health fairs with large employer groups. He liked the How to Protect Your Meds and Safeguard my meds brochure for the employers and Case Managers. He's also interested in the reviewing the MLs and LELes topics for a possible webinar. I provided the Med Ed catalog for online CEs. I then spoke with the secretary who said Gina Sheradon is person the Medical Directors for UHC Evercare report to. Tony Jenkins works as an admin for Dr. Lehner and Gina.
PPLPMDL0020000001	Garfield Heights	OH	44125	11/1/2011	NON-PRESCRIBER- Dr Abraham said he has used some Butrans with success in patients. He said his main problem with Butrans is that he wants to use it in his patients over 65, but Medicare D does not pay for it. Discussed commercial coverage & savings cards. Dr Abraham said he does not prescribe many short-acting opioids & that he would put all his older patients on Butrans if it was covered & will do so if Medicare D picks Butrans up in formulary at any time. I asked what he does for his younger patients. He said he would prescribe OxyContin for those patients. He added that he believes Butrans would be more abusable than OxyContin. I told him both medications are opioids & have abuse/addiction potential.
PPLPMDL0020000001	Stow	OH	44224	11/1/2011	Dr wanted to talk about what is going on with the industry and why are insurance companies only wanting to pay for generics and what is that going to do for the pharmaceutical industry. I said those things are not in my control and cannot say what will happen but if he sees the benefit of a name brand drug he needs to fight to get it for his patient. I said something like Oxycontin is still 2nd tier on the majority of commercial and Med D plans and Butrans is 3rd tier on commercial and being paid for by Medicaid which is great coverage. I said to him, he has said in the past how much of a benefit he has seen Butrans and that he has tried it in some patients and saw the good results, I am surprised that he is not saying that he has more patients on Butrans with how excited he was and he said he is full of surprises. HE said alot has to do with his pharmacy and how much it is going to cost to get in and he doesn't want it to sit on the shelf. I said he is the one ordering and he is the one writing it. I said if it is on the shelf and you are writing it, there shouldn't be any problems. I asked him what type of patient comes to mind when he thinks of Butrans and he said some one who is chronic and taking short acting. HE said there are alot, he just needs to find those patients. I told him about Medicaid and he said that is good news. I said is there anything else that I preenting him from writing Butrans and he said no, he has it on him mind when he goes in room. HAD to go
PPLPMDL0020000001	Mayfield Heights	OH	44124	11/1/2011	Loyalist. Window call.....reminded doc of the 30% improvement in pain scores in Butrans clinical trials. I asked her if she has looked and the clinical trial data. She said no and that she knows enough about butrans. She did want to know when there is something new with the product.
PPLPMDL0020000001	Cleveland	OH	44112	11/1/2011	Prospect. I reminded doc of his expressed interest in butrans and that butrans is a CII opioid delivering 7 days of buprenorphine in a once weekly dose. I asked him how often he sees patients taking a short acting opioid that complain that their current therapy no longer works. He said they complain all the time. I asked him to try one of those patient on butrans. I reviewed the starting doses - 5mcg for naive patients or those taking less than 15mg /day of a short acting. He asked about coverage again. I told him about the commercial plans covering butrans and explained that Caresource is covering it after failure on tramadol or vicodin.
PPLPMDL0020000001	Solon	OH	44139	11/1/2011	Alan and I questioned Dan whether OxyContin is confirmed to be listed on the Caremark formulary which he sent in a follow up email that it is 2T-QL. Alan had trouble confirming this on their website so Dan explained the original formulary listed is the formulary submitted to CMS from June, where OxyContin was not officially added yet. After that initial formulary, addendums are sent each month with changes which is where OxyContin appears. We reviewed the redlines for the 2nd amendment we sent for the increase in the OxyContin rebate. He was unaware of these changes because he's unfamiliar with Caremarks contracts yet. He did say they are not requesting Price Protection for OxyContin thru 2012 but will for 2013. Mike was not in the office to discuss Butrans. Dan said he's the person to go to for this. I shared my communications with Mike regarding Butrans which were positive but he was unfamiliar with it. He directed us to meet with Mike.
PPLPMDL0020000001	Stow	OH	44224	11/1/2011	Dr said everything is doing great with Butrans. I said what type of patient are you using it in and he said there are the ones who are on short acting and taking it atc and the ones who are on low dose long acting who can use it if the current one is not working. I said how often in the week are you seeing patients like the ones you have on Butrans and he said about 25% of his practice is like that. I said are you getting the results from Butrans that you want for it to be your go to drug and he said dont worry. I like it for starting patients after they are chronic and I said which is when. HE said if they are taking Vicodin 6 times a day, he switches. I said what about before that and he said alot come there on close to thathe said he likes it. I told him about medicid paying for it and he said that is good news. They see mainly Caresource, they got rid of Buckeye. I reminded him of low dose oxycontin and it is 2nd tier in his med D plans like CCRx and AAARP
PPLPMDL0020000001	Lakewood	OH	44107	11/2/2011	Quick call with Diane, she asked what info can she pass along to the pharmacist, I reviewed the use of supplemental analgesia with Butrans and she will let them know. I asked her to hand out the medication guides when patients get a script and she agreed. She said they could use a few more OxyContin savings cards and I left more.
PPLPMDL0020000001	Strongsville	OH	44136	11/2/2011	Spoke with Jim, pharmacy manager, who said that although they did see some Butrans prescriptions earlier on, they have not seen any lately. I asked if he knew why the patients were no longer filling their Butrans prescriptions. He said he does not know the reason. Discussed Butrans savings cards, which he accepted, but he did not need OxyContin savings cards. I inquired about Dr Nicholas Davis & his practice to follow up on a lead from an exhibit. Jim said he is licensed to treat patients with Suboxone for addiction. He added that he does not typically see reps, although said I should at least try to see him since he requested information about Butrans at the exhibit. I asked if he also treats pain & reminded him that Butrans is indicated only for pain & is not to be used for addiction treatment. He said Dr Davis does treat a lot of pain as well. He tried to call Dr Davis's office, but dr wasnt available to see me,talked to Valerie,MA for dr,about Butrans and asked if dr started any Caresource patients on Butrans this week and if so,were scripts approved? Valerie asked dr,dr said she started 1 Caresource patient on Butrans this week but it wasn't approved,told Valerie to tell dr that commercial plans are the best place for Butrans at this time,showed formulary grid and Butrans patient savings cards to Valerie,talked to Valerie about appropriate patients for Butrans and asked her to recommend butrans for patients that she feels are appropriate to dr,Valerie said she'll do that.
PPLPMDL0020000001	Cleveland	OH	44103	11/2/2011	Introduced Butrans to pharmacist Lisa. She said they do not stock it there as they have seen no prescription activity for it. Discussed appropriate patient type & asked her if she fills a lot of chronic Vicodin & tramadol prescriptions there. She said tons. Discussed how Butrans could be an option for some of those patients. She said it sounds like a good medication to offer patients. I asked if she ever makes recommendations for medication switches to physicians. She said yes. I gave her patient information booklets & asked if she would be willing to give them to customers who she thought would be good candidates for Butrans. She agreed.
PPLPMDL0020000001	Lakewood	OH	44107	11/2/2011	We discussed the key messages for Butrans. We discussed appropriate patients and the initiating guide. We reviewed the clinical trial for opioid experience patients. She did not know how these results might relate to what she will see in practice. We reviewed the OxyContin conversion guide and appropriate patients. We discussed Butrans managed care and savings cards.
PPLPMDL0020000001	Cleveland	OH	44106	11/2/2011	talked to dr about appropriate patients for Butrans,i asked dr who is appropriate for Butrans in his mind? dr said patients taking low doses of short-acting opioid analgesics who arent controlled and need something else.showed dr Butrans visual aid,appropriate patients and dosage ranges and asked dr if patients are taking tramadol daily for 1 of the chronic pain conditions listed on pg.11,visual aid,but not controlled,would he consider Butrans? dr said yes but insurance plays a role.dr said he has a lot of Medicaid at Main Campus so that influences his decision to start patients on Butrans.i asked dr to start a couple Caresource patients on Butrans and we discussed recent updates with Caresource and still focus on Commercial plan patients for Butrans.dr said ok that makes a difference and he will try starting a few Caresource patients and see what happens.
PPLPMDL0020000001	Warrensville Heights	OH	44122	11/2/2011	NON-PRESCRIBER- I told Dr Zivic that currently, Medicaid is paying for Butrans. I asked him if he thought this would help him prescribe more Butrans. He said perhaps. I asked if something other than managed care was holding him back from trying a few appropriate patients & he said probably not. I asked if he would, then, start a few patients now that the coverage for his practice is better & he agreed.
PPLPMDL0020000001	Cleveland	OH	44109	11/2/2011	talked to dr about BUP3015,opioid experienced clinical trial results and asked dr if he's started any patients on Butrans this week? dr said no he has 3 patients on Butrans and they are doing well but Butrans isnt his 1st line of therapy.i asked dr to expand on what he meant,dr said he see's different pain conditions,different patients,he has to individualize treatment,he looks at MRI to see if his positive/negative,he looks at OARRS report,etc and if patients are taking vicodin 5/325,2-3 times a day and thats not working he will consider increasing the dose to 10mg BID and if patients dont do well on that dose or ask for more pills at the next visit,then he'll consider Butrans.dr said he has to tell patients there's a different option available and some patients dont want to wear a patch they only want their pills.we talked about dr thinking of a couple patients who have legitimate chronic pain and that he feels Butrans could be an option for,showed visual aid,appropriate patients section,discussed titration of Butrans and giving patients Butrans patient info booklets to help in educating patients,dr said he will think of some patients this week and see what he can do.focused dr on BWC,commercial plan patients and told dr to start a couple Caresource patients on Butrans and see if they get approved,dr said he will do that.
PPLPMDL0020000001	Cleveland	OH	44103	11/2/2011	dr needed OxyContin savings cards,gave those to dr and discussed appropriate patients for OxyContin,showed formulary grids and dr said he's not having any issues with insurance coverage for OxyContin.talked to dr about 5 Core selling messages for Butrans and dr asked about Medicaid coverage as that's majority of his patients.talked to dr about Caresource patients trying Butrans and perhaps getting approved for Butrans,no guarantee but asked dr to try and he said he would do that if patients are willing to wear a patch.showed initiation guide and discussed initiation of Butrans and titration.recommended Senokot-5
PPLPMDL0020000001	Westlake	OH	44145	11/2/2011	Dr said he only likes to write for 3 vicodin per day but sometimes patients come to him on higher doses of opioids. We discussed the appropriate patient types for Butrans and I asked if he would write for patients on 3 vicodin per day. He said that patients do not want to give up their pills and it is hard to transition patients. I reviewed the patients can take supplemental analgesia but he did not know if he would be comfortable giving both. Spoke with Angela, she said she just did a PA for a Caresource patient for Dr Carson.
PPLPMDL0020000001	Bedford	OH	44146	11/2/2011	NON-PRESCRIBER/FORMER TRIALIST- I let Dr Haddad know that Medicaid plans are currently paying for Butrans & discussed possible prior authorization. He said this was good news. I reminded him of his previous trials of Butrans with good results & asked what happened. He said coverage was just not good & he kept getting prior authorizations for failures of morphine or fentanyl before Butrans. I asked if this new update would cause him to reconsider & try to start writing again. He said yes. Reminded him of appropriate patient type, focusing on patients who are not well-controlled on tramadol or Vicodin around-the-clock. I asked again if he would prescribe Butrans now that coverage seems to have improved & he said yes.
PPLPMDL0020000001	Cleveland	OH	44104	11/2/2011	talked to dr about appropriate patients for Butrans,showed visual aid,dr said he's not seen any patients in office that he can start on Butrans because majority are medicare patients and Butrans isnt covered on Medicare plans.told dr that was correct but asked dr to focus on commercial plan patients or any Caresource patients he might see that he felt Butrans was appropriate,dr said ok he will do that.talked to dr about OxyContin being an option for his medicare patients and discussed formulary coverage on medicare plans dr said he's not had trouble getting OxyContin but appreciated info.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44143	11/2/2011	Prospect. Quick call...reviewed the butrans indication and the 7 day delivery in a CII narcotic. I asked doc if he has these types of patients in his practice. He said sure. I asked him to try butrans for one patient this week. Discussed the coverage with commercial plans, BWC, and Caresource.
PPLPMDL0020000001	Cleveland	OH	44113	11/2/2011	window call - showed dr BUP3015,dr said she couldnt talk today but would look over clinical trial,told dr about Caresource update and asked dr if she could start a couple patients this week,like the one's she's started on Butrans? dr said she will do that insurance has been biggest challenge.
PPLPMDL0020000001	Euclid	OH	44119	11/2/2011	Spoke to Kevin about the butrans positioning - after tramadol/before going to vicodin ATC. He asked about the insurance. I told him that butrans is being covered on most insurance plan, BWC and on caresource after tramadol. He asked who is writing it as has not received any scripts. I explained that many of the pain specialists in the area are prescribing. Gave him patient info guide for application instruction.
PPLPMDL0020000001	Parma	OH	44129	11/2/2011	NON-PRESCRIBER- Quick call as I caught Jen between patients. I let her know that currently, Medicaid plans are paying for Butrans. She said that would allow them to flag more charts, causing them to prescribe more. She also said she prescribed Butrans for a patient last week. Spent time with Dawn who said both Jen & Caryn prescribed Butrans last week for a patient. Dawn said the patients were newer & were not well-controlled on tramadol, so they started them each on Butrans. I let her know about Medicaid update, which she said was excellent because she has thought of other patients for Butrans but they did not have commercial coverage or BWC. I asked Dawn to flag those charts for Butrans & she agreed.
PPLPMDL0020000001	Cleveland	OH	44130	11/2/2011	TRIALIST- Quick window call- Updated Dr Kansal, letting him know that Medicaid plans are currently paying for Butrans. Positioned Butrans for patients not well-controlled on tramadol. He thanked me & walked away. Spent time with Dorothy, reviewing managed care coverage for Butrans & OxyContin, including Medicare Part D plans. Dorothy said she just got a prior authorization for a Medicaid patient for OxyContin. She added that she will have to complete the PA every month in order for Medicaid to pay for OxyContin.
PPLPMDL0020000001					

PPLPMDL0020000001	Cleveland	OH	44130	11/2/2011	I met with Melenie Petropoulos today. Updated her on Butrans. I discussed the savings card availability for pharmacists to download at Butrans.com Gave her the Butrans HCP website piece. She would like the pdf on savings card letter as well as buprenorphine letter to send to her pharmacies. She said she would do so. Went over the two clinical studies, FPI. Gave her updated OxyContin FPI. I also gave Melanie latest Med Ed Resources Guide. They are putting in a whole new pharmacy computer system.
PPLPMDL0020000001	Euclid	OH	44117	11/2/2011	Dabbler. Quick call. I reminded doc that he said he could prescribe butrans after tramadol as opposed to switching people. I asked him if sees any of those patients this week to prescribe butrans. He said he will try. Gave him a BUP 3015 copy and summarized the results of 305 improvement after 12 on butrans. He said he will look at it.
PPLPMDL0020000001	Lakewood	OH	44107	11/2/2011	Met the new NP, Lori. Learned that Dr is going to be moving to the east side and Dr Grimm will be coming to his practice. We discussed his results with Butrans and he said that he has been happy with Butrans as an option. Dr had to step out to see a patient but then came back and said he was going to write a script for her. He said she is a Med D patient but has Anthem as a supplemental, and he was going to still try to get Butrans to go through. We discussed the managed care where Butrans is covered and that Med D may be difficult.
PPLPMDL0020000001	Lakewood	OH	44107	11/2/2011	I reviewed our last conversation about patients taking 200mg of tramadol. We discussed Butrans as an option and I asked if he thinks his patients might like a 7 day option. He said probably not but it doesn't mean he wouldn't use it. I reviewed the managed care and let him know that Med D is usually not covered, but commercial patients can get Butrans for as low as \$15 per month. I asked if he would try it for commercial patients and he worked anesthesia/pain management center - see call notes on sahalg,hayek and khaili.
PPLPMDL0020000001	Cleveland Cleveland	OH OH	44106 44106	11/2/2011 11/2/2011	dr said he has a few patients in mind to start on Butrans,asked dr what these patients were taking that prompted him to consider Butrans? dr said these are patients taking tramadol but always calling in early requesting refills,reviewed initiation and titration with dr,showed Butrans initiation guide and focused dr on commercial patients and told dr to try starting a few Caresource patients on Butrans,dr said ok sounds good.
PPLPMDL0020000001	University Heights	OH	44121	11/2/2011	Prospect. Quick call....asked doc if he has patients that might be taking hydrocodone several times/day to manage their pain. He said they are taking more than that. I asked him if he would consider Butrans for those patients that might be taking no more than 3 tbas/day but he is considering titrating the patient. - Butrans is a CIII like vicodin and can be called in or refilled. Plus Butrans is just a once weekly dose. Gave him a formulary grid and told him butrans is being covered on Caresource after failing on tramadol or other short acting tablets. I reminded him of the oxycontin preferred coverage and the savings cards. No commitment.
PPLPMDL0020000001	Cleveland	OH	44106	11/2/2011	asked dr if he's considering Butrans as an option for patients when he walks in exam room and patients are taking vicodin daily but not controlled,dr said he does look at Butrans for these patients.dr said it doesnt matter if they are taking vicodin or percocet,if patients arent controlled and want more pills,he talks to them about Butrans and his goal is to decrease the amount of pills patients take daily/monthly.we discussed initiation of Butrans,showed visual aid and talked to dr about titration of Butrans.talked to dr about Caresource updates with Butrans and asked dr to start a couple Caresource patients on Butrans this week,based on our discussion,dr
PPLPMDL0020000001	Cleveland	OH	44105	11/2/2011	talked to Abdul,Pharmacist,about Butrans 5 core selling messages and what features stand out to him.Abdul said he likes that Butrans is a patch and is surprised more doctors arent prescribing Butrans.Abdul said biggest challenge is probably the limited coverage with medicaid patients.we talked about OH State Medicaid PA requirements for Medicaid and Caresource patients trying Butrans.Abdul said he's given a couple Butrans patient info booklets out to patients and will continue doing that as patients have talked to their HCP's about Butrans.focused Abdul on application/rotation of Butrans,side effects,etc in booklet and asked him to talk to patients about this info,Abdul said he will as thats important for patients to have success with this medication.we talked about OxyContin stocking and discussed some HCP's in area prescribing OxyContin,discussed formulary coverage and left grids for Abdul.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44111	11/2/2011	Spoke with Earl. We reviewed the invitation guide, medication guide and that patients can use Butrans along with opioid or non opioid as supplemental analgesia. I asked his thoughts and he asked if Butrans can be abused. I reviewed the Butrans is a CIII opioid with potential for abuse
PPLPMDL0020000001	Euclid	OH	44119	11/2/2011	Prospect. I discussed the butrans use in opioid naive and opioid experienced patients. I asked him where would he likely use butrans. He said either or , probably opioid experience. Showed doc the BUP3015 graph and the 30% improvement in the pain score after 12 weeks on butrans. I asked him what he thinks of that. He said its pretty good. I asked him if its enough to finally try one patient on it. He said, "Sure. Today is the day." I reminded him of the commercial coverage, BWC, and now with Caresource after tramadol.
PPLPMDL0020000001	Bedford	OH	44146	11/2/2011	TRIALIST- Dr Moufawad said he is going to go ahead & get approved as a speaker for Butrans but may not want to speak until he gets more experience with Butrans. I asked him how we can get him more experience. He said he just has to write it more. I agreed. He added that he has some personal issues going on right now that are monopolizing his "time & brain", so he has been out of sorts lately. He said also that he is not taking on any new chronic pain patients at this time, but will add them back eventually. He added that he is also trying to get rid of all his Suboxone patients who are addicts & that he has gone from 100 patients on it to 30. He said he wants to focus only on pain patients, not addicts. He asked that I am patient with him as he goes through these changes as they can take time & energy. I asked him if he has any clinical objections to Butrans whatsoever, ie Butrans with supplemental analgesia. He said he has absolutely zero clinical hesitation with Butrans since his speaker training & is very comfortable with starting patients. Discussed OxyContin as an option for patients beyond range of Butrans. Spoke with Amber & updated her on Medicaid status.
PPLPMDL0020000001	Westlake	OH	44145	11/3/2011	Quick call, Dr said that management is making them bring on more and more pain patients. I asked if he would write for Butrans for these patients on tramadol or low dose vicodin instead of increasing their dose. He said he will. I reviewed managed care for Butrans.
PPLPMDL0020000001	Brooklyn	OH	44144	11/3/2011	Spoke with Becky, technician, & floater pharmacist. I gave them an updated Butrans FPI & spent time going over appropriate patient type, focusing on patients who call them too soon for refills of short-acting opioid medications. Becky said she has seen some movement of Butrans at this location but she said she thinks a lot of patients like the type we discussed get used to taking pills around-the-clock & do not want a change. Discussed patients who are not well-controlled on their current medication as possible Butrans candidates. Becky agreed to give the information to the regular pharmacists. Discussed automatic savings for Butrans via e-voucher &
PPLPMDL0020000001	North Olmsted	OH	44070	11/3/2011	Spoke with Mary, we reviewed the use of supplemental analgesia with Butrans. We discussed the patient information for Butrans and she agreed to hand the booklets out with scripts. She said that she would not feel comfortable giving patient booklets to appropriate patients and that it is up to the doctor. I reviewed OxyContin as an option and left a conversation guide.
PPLPMDL0020000001	Independence	OH	44131	11/3/2011	NON-PRESCRIBER/FORMER TRIALIST- I asked Dr Sundaram what he felt the downsides to Butrans were. He said he doesn't really have much experience with it so that is difficult to answer. He then added that it isn't "very common yet". Dr Sundaram had a medical student with him today, so he started telling her about Butrans, asking if she has learned anything about it. He told her that it is buprenorphine in a once-a-week patch for patients with pain. I elaborated on appropriate patient type & range, including OxyContin as a possible option for appropriate patients beyond Butrans 20mcg, focusing on patients who are not well-controlled on chronic tramadol or Vicodin around-the-clock. Dr Sundaram said another down side of Butrans could be the cost. He asked if it is correct that patients with insurance pay only \$10-\$15. I told him the average co-pay for patients with commercial insurance who use the savings cards is closer to \$15-\$20. Also reminded him of Medicaid scripts going through with a possible prior authorization.
PPLPMDL0020000001	Cleveland	OH	44127	11/3/2011	dr said she couldnt remember much about Butrans and asked me to refresh her memory,showed Butrans visual aid and discussed 5 core messages with dr.dr said she likes that Butrans is a patch and dosed once a week.dr said her biggest challenge is that she has a lot of medicaid,dr asked if Butrans was covered on medicaid? discussed with dr and Josie,MA,PA requirements for Medicaid patients and talked to them about Caresource patients trying Butrans,dr said ok she will think of some patients this week to talk to about Butrans.gave dr Butrans patient info booklets and focused on appropriate patients,initiation of Butrans and titration.dr committed to talking to a few patients this week and if Medicaid/Caresource covers Butrans she will start them.
PPLPMDL0020000001	Cleveland	OH	44105	11/3/2011	reviewed 5 core selling messages with dr,dr said she couldnt remember who the appropriate patients were for Butrans,how to write the Rx and who covered Butrans? showed dr Butrans visual aid,discussed appropriate patients,initiation of Butrans and titration and asked dr if she had patients taking short-acting opioids,for their chronic pain conditions(showed pg.11 giving examples of some pain conditions)? dr said yes,she has a lot of patients on percocet but they are always in pain,they really never have reductions in pain and every month just ask for a refill or higher dosage strength and she just gives it to them.dr said she's looking for another option for patients so she'll talk to a few patients and try starting them on Butrans.dr asked about insurance coverage for Butrans? talked to dr about BWC,commercial plan patients to start on Butrans and dr asked about medicaid/medicare coverage? talked to dr about PA requirements for Medicaid and Caresource patients trying Butrans.dr said ok she will start a few patients and asked me to follow up with her on 11/15 as she's out of the office next week till the 15th. told dr to be sure she gives patients Butrans patient info booklets and show patients application/rotation section in booklet,dr said ok she will do that.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44103	11/3/2011	talked to Nick,Pharmacist,about Butrans Rx and Nick said he's not seen any lately.I showed Nick BUP3015,we discussed clinical trial inclusion criteria and results and Nick said a 30% reduction in pain was good.I asked Nick how many patients taking short-acting opioids can say that they get a 30% reduction in pain? Nick said noone.Nick said all of the patients that he see's getting tramadol,vicodin and percocet every month complain that their pain is the same or worse so he doesnt understand why more physicians dont prescribe Butrans.we talked about appropriate patients for Butrans,showed dosage ranges for Butrans starts and talked about titration of Butrans.I asked Nick if he would recommend Butrans to any patients that he feels are appropriate and give them patient info booklets to speak with their doctors? Nick said he'll do that and asked about insurance coverage for medicaid,we discussed medicaid,commercial plans and BWC.we briefly discussed OxyContin stocking and appropriate patients for OxyContin.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44195	11/3/2011	talked to dr in hallway,showed dr Butrans 5 core selling messages,dr said he started 1 patient on Butrans but hasnt started anyone else.showed dr Butrans initiation guide,talked about appropriate patients and initiating Butrans and asked dr to start a couple patients on Butrans this week to get more clinical experience with Butrans,dr said he will do that and asked about insurance coverage,focused dr on BWC and commercial plan patients.showed formulary grid and savings cards for commercial plan patients and gave dr Butrans patient info booklets.
PPLPMDL0020000001	Brooklyn	OH	44144	11/3/2011	Spoke with pharmacist, Gary & gave him updated Butrans FPI. He said he has not seen much activity for Butrans. I updated him on insurance coverage & discussed updates with Medicaid coverage. He asked if I had spoken with Metro pain management. Discussed appropriate patient type/range, focusing on patients who take tramadol or Vicodin around-the-clock who are not well-controlled on those therapies. He said Butrans faces a tough battle because patients "can't share" Butrans as easily as they could pills, making patients less likely to want it. Discussed appropriate patients who are in true pain & reminded Gary that Butrans is an opioid & therefore does have abuse/addiction potential. Also discussed ability to take supplemental analgesia while on Butrans. Discussed savings for Butrans & OxyContin.
PPLPMDL0020000001	Parma	OH	44129	11/3/2011	TRIALIST- Dr Gigliotti said he was just looking at his Butrans initiation guide. I asked him if this was because he had been thinking of all the patients he had that he could try it on. He asked me how pain management physicians are taking to it. Discussed appropriate patient type/range including OxyContin as an option for patients beyond Butrans. I told him Butrans is being used by various specialties, including physicians just like him. He said he wishes he did not have a DEA number so he didn't have to write any pain medications. I asked him if he would agree that although that may be the case, he still does write them for appropriate patients. He said yes. I asked him why, then he is not prescribing Butrans since he seems to think it is a good medication. He said it took him awhile to get on board with OxyContin. He then said he does think Butrans is a good option for patients like we discussed & that he thinks that patients would like only having to dose their medication once weekly in a patch. Reminded him patients can take supplemental analgesia if necessary. Dr Gigliotti said today would be the day he would find someone for Butrans. I let him know I would be following up with him to find out the results.
PPLPMDL0020000001	Cleveland	OH	44113	11/3/2011	dr said he started a patient on Butrans last week but it wasnt a caresource patient,dr said the caresource patient didnt want to try Butrans because she already had allergic reactions to other adhesives.dr said he's thinking of Butrans for his patients taking vicodin daily but not controlled and asking for more pills,thats where he feels Butrans is a great option.showed BUP3015,discussed 30%reduction in pain seen in clinical trials and dr said that is clinically significant and he will continue thinking of patients.dr said he'll look and see who's coming in office today but he's going out of town 11/4-11/21 so he asked me to follow-up at the end of november.told dr to focus on BWC and commercial plan patients to start on Butrans.
PPLPMDL0020000001	Mogadore	OH	44260	11/3/2011	Dr said he likes Butrans. I asked if he is happy with the results she is getting and he said it is hit or miss like any other drug. But the patients that it does well in, he said it works really well. He said he is starting all patients on the 10mcg because they were on Vicodin. I said would you be opposed to using it before Vicodin after Tramadol and he said that is a great idea. HE said at first he wanted to get people who were on chronic Vicodin off and now this is a good way to prevent chronic Vicodin. We reviewed opioid naive study and managed care coverage. We discussed Oxycontin and he said he has select patients on Oxycontin, he doesnt think it is for everyone.
PPLPMDL0020000001	Cleveland	OH	44195	11/3/2011	worked anesthesia/pain management center - see call notes on dr cheng,anne crawford,NP and Kathy Kraus,PA.
PPLPMDL0020000001	North Olmsted	OH	44070	11/3/2011	Spoke with Paula, she was familiar with Butrans and have the 10 and 20mcg stocked. She did not remember which Drs but Dr Hernandez wrote since he only writes for one patch at first. She said the patients that come in were already on Butrans in Florida and transfered up here. I reviewed the use of supplemental analgesia with Butrans. I asked if she would hand out a medication guide to a patient who might benefit from Butrans and she

PPLPMDL0020000001	Mogadore	OH	44260	11/3/2011	Spoke to Jerry and he said they are seeing Butrans here and there, I said are they from Dr Cain and he said he thinks he has seen some from Him. I showed Butrans application to go over with the patient. HE said they do not see too many Oxycontin their. I reminded him of Sen5 in opioid induced constipation
PPLPMDL0020000001	Independence	OH	44131	11/3/2011	NON-PRESCRIBER- Handed Dr Jack a Butrans formulary grid in effort to stop him between patients, updating him on Medicaid coverage. I asked why he thinks he is not using it. He said he will "get there" & again said not to give up. I assured him this would not happen. Spoke with Cameo, reviewing savings cards for Butrans & OxyContin.
	Cleveland	OH	44113	11/3/2011	showed dr BUP3015,opioid experienced patients,clinical trial,discussed results and asked dr if a 30% reduction in pain was clinically significant? dr said yes any reduction in pain was good.dr said he likes that Butrans is a patch and dosed once a week as some patients might prefer this.dr said he has a lot of patients taking vicodin but its usually for acute pain,we talked about dr focusing on chronic pain patients taking vicodin daily for 1 of pain conditions listed on pg.11 visual aid,dr talked about back pain patients,i asked dr to start a couple patients on Butrans instead of refilling or titrating vicodin dose,dr said he will consider it if patients are willing to wear a patch.showed dr Butrans patient info booklet,focused dr on application/rotation section and asked dr to give this booklet to patients to help dr educate patients on Butrans,dr said he will do that and see what happens.dr asked about insurance coverage,focused dr on BWC and commercial plan patients.
PPLPMDL0020000001	Cleveland	OH	44109	11/3/2011	dr said he's thinking of patients to start on Butrans,showed dr BUP3015,opioid experience clinical trial and focused dr on initiation of Butrans and titration,dr said ok he will try but they have a lot of medicaid so we discussed Caresource patients starting on Butrans and focused dr on BWC and commercial plan patients.
	Cleveland	OH	44102	11/3/2011	Nagla,PA,said the doctors are starting more patients on Butrans and she's working with each of them to start patients after the short-acting opioids arent controlling patients pain anymore instead of refilling or giving more pills.Nagla said she likes the idea of long-acting medication for a chronic pain condition and give short-acting opioid for just 1 week to help patients get started on Butrans.focused Nagla on initiation of Butrans,titration and showing patients Butrans patient info booklets.Nagla said she does give them to patients as it helps to have them in patient exam rooms now. focused Nagla on BWC and commercial plan patients and asked Nagla to start a couple Caresource patients on Butrans,Nagla said ok she will do that.
PPLPMDL0020000001	Cleveland	OH	44195	11/3/2011	talked to Kathy,PA,about Butrans 5 core selling messages,kathy said only a few doctors have prescribed Butrans and she doesnt understand why,kathy said she likes that Butrans is a patch and dosed once a week as some patients may prefer this dosing schedule.I asked Kathy if she would share the initiation guide and butrans patient info booklet with the doctors,Kathy said she will do that.we talked about initiation,titration and formulary coverage,focused Kathy on BWC and commercial plan coverage.
PPLPMDL0020000001	Mogadore	OH	44260	11/3/2011	Dr said she has not written Butrans and I asked her if there is anything that is preventing her from trying it and she said no. I said where would she write this in her practice and she said in patients who need a long acting. I said do you see the benefit of Butrans for patients and she said yes, I asked how and she said why all of the questions. I said I am trying to find out if it is realistic for her to write this in her practice and if she is going to write it in the right patient. She said if she had questions she would ask. I reviewed managed care with her and said if the patient is beyond this she has the option of low dose Oxycontin. After discussion with the other Drs about Butrans and Dr Cain saying that he has had good success with it, she said she promises she would try
PPLPMDL0020000001	Mayfield Heights	OH	44124	11/3/2011	Prospect. Window call....I reminded doc of the butrans 7 day delivery and the CII status which means it can be called in and refilled. Gave a formulary grid and a savings card sell sheet. Let her know that Caresource is now covering butrans after failure on a short acting opioid such as tramadol.
PPLPMDL0020000001	East Cleveland	OH	44112	11/3/2011	Prospect. I described the appropriate butrans patientlex. one taking vicodin 5/325mg 4-6 tabs/day). He said he still has not seen anybody on it yet. I reminded him that he said he would start a patient. I let him know about coverage by caresource after failing on tramadol and BWC coverage. He said he has those patients. He asked how to write a prescription for butrans. I showed him the back of the initiation guide - 1 carton #4 Butrans. He took and said he would keep it in his pocket as a reminder. Provided an oxycontin formulary grid reminder as well.
PPLPMDL0020000001	Brooklyn	OH	44144	11/3/2011	NON-PRESCRIBER- Dr Deeb asked for a reminder about Butrans. Reviewed 5 core messages with him & spent time going over appropriate Butrans patient type/range, including OxyContin as an option for patients beyond Butrans. He said the problem is that almost 50% of his practice is Medicare, followed by 40% being Medicaid. Discussed insurance coverage & updated him on Medicaid coverage, including prior authorization. Positioned Butrans for patients who are not well-controlled on tramadol. I asked him what he does after NSAID's & COX-2's for someone with chronic pain. He said tramadol & that he hopes he does not have to escalate them to anything else. Discussed Butrans as an option at that point & asked if it made sense to him to use it there. He said yes. Discussed buprenorphine as a CII opioid with abuse/addiction potential & ability to take supplemental analgesia. Also talked about dosing for different patient types. I asked if he felt that Butrans was truly something he could see himself using & he said yes. He asked me to come back to follow-up with him to remind him as he gets rushed & gets in the habit of just refilling medications instead of thinking of switches. He said he is interested in learning more about pain medications as he has been focusing on lipidology & needs refreshed on opioids in general. He said he typically uses OxyContin in the hospital & has had good success with it.
PPLPMDL0020000001	Cleveland Hts	OH	44118	11/3/2011	Dabbler. Doc's office called for more butrans savings cards. He said he has been prescribing butrans. He said he has one patient, a cleveland clinic employee, that was having trouble getting the script filled. The pharmacist tried to run the script a couple of ways but patient could not afford without the card. I explained the availability online and that cleveland clinic employees should be able to get butrans reasonably. I also let him know that caresource is now covering butrans after failure on tramadol or vicodin. Gave formulary grid reminders for both products.
PPLPMDL0020000001	Mayfield Heights	OH	44124	11/3/2011	Prospect. Window call....I asked doc if he thought a 30% improvement in pain score would be clinically significant. He said he didnt know. I told him that's basically what one clinical trial showed. Discussed the 30% or greater improvement in pain scores after 12 weeks on butrans. He said he would look at it.
PPLPMDL0020000001	Independence	OH	44131	11/3/2011	NON-PRESCRIBER- Quick call- Handed Dr Rob a Butrans "Experience" invitation & asked him to log on for Butrans e-details since his time in the office is so limited. Reminder of Butrans once weekly transdermal delivery.
PPLPMDL0020000001	Highland Heights	OH	44143	11/3/2011	Repeat. I asked doc if he had a chance to look at the BUP3015 clinical trial I gave last week. He said he does not have time and asked me to tell him quickly about it. I explained the 12 week study in opioid experienced patients. The results showed that 50% of the patients got a 30% or greater improvement in pain score. He said that's not bad. Quickly let him know that butrans is now being covered on Caresource after tramadol failures.
PPLPMDL0020000001	Mogadore	OH	44260	11/3/2011	Dr said he tried a patient on Butrans and i asked How they were doing and he said they did well but is no longer on it. I said was it not working and what medication did they come off of and he said this patient was complicated anyways, he was on Vicodin. HE said he wanted something stronger and his wife didnt so he referred him because he didnt want to deal with it. HE said he likes the fact it it c3 and once a week. I showed him the opioid experienced study and asked him if he thinks going from a 10 to a 7 in pain was significant and he said yes. HE said his goal with patients is to get them functioning. HE said you never get them out of pain completely if they are chronic. We discussed also using in opioid naive patients. Reviewed amanged care. I rmeinded him of Oxycontin low dose as an option
PPLPMDL0020000001	Garfield Hts	OH	44125	11/4/2011	NON-PRESCRIBER- I updated Dr Sadowski on Butrans managed care & Medicaid including prior authorization. He said he just has not had a candidate yet. I told him I find this hard to believe & said he must have seen at least one appropriate patient. Positioned Butrans for patients taking tramadol around-the-clock who are not well-controlled. He said he promised to keep it in mind & started to walk into a room. He then stopped & asked if I had savings cards. I showed him in the sample closet where they were. He said he was actually getting ready to see a patient who is "not doing well" on Vicodin & added that he thought she would be a good candidate for Butrans.
PPLPMDL0020000001	Cleveland	OH	44109	11/4/2011	Gave him savings card & patient information booklet to assist in patient counsel & let him know I would be back to follow up. Spent time with Deena, who said she just told a patient about Butrans & told her to ask Dr dr said he knows Butrans is available but hasnt prescribed it yet,dr said he keeps thinking of Butrans in the same place as Duragesic because its a patch.showed dr Butrans visual aid discussed appropriate patients to start on Butrans and asked dr if he had patients taking vicodin or percocet for 1 of the pain conditions shown,pg.11,but not controlled? dr said yes he has a lot of patients taking those opioids and sometimes they ask for something else.i asked dr if he would start 1-2 patients,BWC or commercial,that are like we discussed on Butrans instead of refilling or increasing patients short-acting opioid dose?
PPLPMDL0020000001	Cleveland	OH	44109	11/4/2011	dr said he talked to a few patients this week about Butrans and gave Butrans patient info booklets for them to read about Butrans.dr said he's following up in 2 weeks with patients.I asked dr why he didnt just start them on Butrans? dr said patients didnt want to wear a patch so he's trying to educate them on Butrans and see if that will help persuade them to start.showed dr Butrans visual aid,discussed appropriate patients and initiation of Butrans. asked dr if he has a couple patients taking immediate release opioids that arent controlled and would be willing to wear a patch,dr said he might and would have to think about it.focused dr on commercial plan patients starting on Butrans and we discussed Caresource patients trying Butrans.recommended Senokot-5
PPLPMDL0020000001	Westlake	OH	44145	11/4/2011	I showed the inclusion criteria for the opioid experienced clinical trial, the doctor was interested and said that he sees these patients. The doctor agreed that these are appropriate patients. I asked him if he will prescribe for Butrans for these patients instead of vicodin and before going to methadone. He agreed.
PPLPMDL0020000001	Cleveland	OH	44109	11/4/2011	talked to Mike,Pharmacist,about 5 Butrans core selling messages.Mike said they are filling Rx for Butrans and all 3 dosage strengths but he doesnt know who's prescribing.Mike said he saw a few Rx from PM&R. we talked about appropriate patients,initiation and titration of Butrans and we discussed formulary coverage.Mike asked if Medicaid was covering Butrans? we talked about Caresource patients trying Butrans and medicaid PA requirements.majority of their patients are cash paying or medicaid.showed Mike Butrans formulary sheet for commercial plans and patient savings cards and we discussed the savings plan for these patients. I asked Mike if he would recommend Butrans to patients taking immediate release opioids that arent controlled and patients can talk to their HCP's about Butrans? Mike said he'll take the booklets and talk to Rob,Pharmacy Mgr,to see if he can do that. Mike said I should follow-up with Rob next week, as he keeps all savings cards and meets with Reps.left my card again for Rob.
PPLPMDL0020000001	Cleveland	OH	44109	11/4/2011	I talked to Tony,RN,as dr was busy with patients,showed Tony Butrans visual aid,discussed appropriate patients to start on Butrans,titration and discussed side effects,Tony said they have a lot of patients in PM&R taking immediate release opioids that would be appropriate for Butrans.Tony said insurance is the biggest challenge,they have a lot of medicaid patients,talked to Tony about Caresource patients trying Butrans and discussed medicaid PA requirements for Butrans.focused Tony on BWC and commercial insurance plans.asked Tony if he would recommend Butrans to the HCP's in dept,since she asks patients how their pain level is when they come in for a visit,Tony said she will do that because majority of patients pain levels stay the same or worsen every time they are seen even with physical therapy,exercise,injections,etc..
PPLPMDL0020000001	Macedonia	OH	44056	11/4/2011	Spoke with floater pharmacist & discussed Butrans appropriate patient type. Also reviewed dosing & titration after 3 days to a maximum of 20mcg. Also pointed out section 2.4 of FPI, letting her know that patients can take supplemental analgesia as opioid or non-opioid medication if necessary. Discussed savings via e-voucher & OxyContin savings cards.
PPLPMDL0020000001	Mayfield Heights	OH	44124	11/4/2011	Spoke to Jessica about the indication and positioning of butrans. She is fairly new to this store and she may have seen one script for butrans so far. I discussed the formulary coverage and the proper application and disposal of butrans. I asked about the volume of oxycontin scripts. She sees some but not a whole lot relative to other narcotics. She has just about all strengths.
PPLPMDL0020000001	Cleveland	OH	44113	11/4/2011	showed dr BUP3015,discussed inclusion criteria and 30% reduction in pain,asked dr if she felt this was clinically significant? dr said yes any reduction in pain is good.dr said she's not had any patients ask for something different lately so she's not thought of Butrans.asked dr if patients taking tramadol or vicodin ever say that the 1st dosage strength isnt controlling their pain? dr said yes she hears that.told dr thats where she can place Butrans,right after the 1st dose of short-acting opioids arent controlling pain.dr said ok thats something for her to think about.dr asked about insurance coverage for medicaid patients,we discussed medicaid and commercial plan patients.talked to dr about OxyContin being an appropriate option for patients,showed conversation guide and discussed formulary coverage for OxyContin.dr said she doesnt have many patients on OxyContin but appreciated info. recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44111	11/4/2011	I asked Dr why he has not gained experience with Butrans yet. He said to keep reminding him about it and he is going to give it a try. I reviewed the managed are and that Medicaid may be paying for Butrans. I asked what other info he needs and he said he will give it a try.
PPLPMDL0020000001	Lyndhurst	OH	44124	11/4/2011	Dabblers. I reviewed the butrans indication and positioning after tramadol or before going to vicodin or oxycontin. He said he wrote a couple fo scripts and said the medication was too expensive - \$300 in fact. I asked what coverage the patient had. He said it was medicare. I told him that medicare will not cover and to focus instead on the commercial plans(per the grid) and be sure to give patients a savings card. He said he will try. Reminded him of the oxycontin patient indication and preferred coverage.
PPLPMDL0020000001	Cleveland	OH	44109	11/4/2011	worked family medicine and internal medicine - just left Butrans fpl's,initiation guides,patient info booklets and formulary grids for each doctor as i couldnt see them.

PPLPMDL0020000001	Cleveland	OH	44113	11/4/2011	dale,pa,said he's starting more patients on Butrans and its been easy. dale said he tells patients they will start on Butrans,rotate patch once a week and some patients get immediate releae opioids and others dont.dale said no complaints so far from patients so he's happy.i asked dale if he'll continue identifying patients to start on Butrans? dale said yes.focused dale on BWC and commercial plan patients.we discussed caesource updates.recommended Senokot-S
PPLPMDL0020000001	Independence	OH	44131	11/4/2011	NON-PRESCRIBER- Quick window call- Let Dr Pai know about Medicaid updates including prior authorization with Medicaid plans like CareSource. He thanked me, waved, & walked away. I asked Jill (MA) to help remind him of this & she said she would do her best.
PPLPMDL0020000001	Sagamore Hills	OH	44067	11/4/2011	TRIALIST- Spoke with Binka & Fran (MA) & discussed savings cards for Butrans & OxyContin. Reminded them of eligibility requirements & that they cannot be used for patients with any type of government insurance. Also gave them OTC samples, recommending Senokot-S for medication-induced constipation. I asked them to give Dr Scanlon the "Experience" invite & asked them to encourage him to log on for Butrans information & interactive programs. They agreed to give the invitation to him.
PPLPMDL0020000001	Beachwood	OH	44122	11/4/2011	REPEAT CUSTOMER- Spoke with Tricia (MA) who said Dr Tabbaa had already left for the evening. Discussed savings cards for Butrans & OxyContin & gave her an "Experience" invitation. I explained the online activities to her & asked her to give the invitation to Dr Tabbaa & encourage him to log on. She agreed.
PPLPMDL0020000001	Sagamore Hills	OH	44067	11/4/2011	NON-PRESCRIBER- Quick call- Dr Lenox said he had no time to stop today. Positioned Butrans for patients with a chronically painful condition such as back pain or osteoarthritis who are not well-controlled on tramadol as a once weekly transdermal option. He said he also remembers that it is CIII & walked away.
PPLPMDL0020000001	Independence	OH	44131	11/4/2011	TRIALIST- Debbie said she has a female patient on Smcrg Butrans who reported that she had nausea, headache, sedation, & constipation after starting Butrans. She added that the patient reported that after staying on Butrans, these symptoms resolved, so she elected to stay on Butrans & did not discontinue. Debbie added that the patient reported a decrease in pain from a constant 8 to a 6, which the patient said she was happy with as it allowed her to "live". She said that she is considering titrating the patient to a 10mcg dose but wants to be conservative. Debbie said her patients love the pain relief they get with Butrans. She said this has made her very enthusiastic about buprenorphine & Butrans. She said when she identifies a potential Butrans patient, she gives them the patient information booklet & has them follow up with her after reading it, coming back to review the information with her. She said at that point, every patient she has offered it to has decided to start on Butrans. I told her she is doing the right thing & that patient counsel & setting expectations is important. She committed to continuing to select Butrans patient & prescribe accordingly.
PPLPMDL0020000001	Sagamore Hills	OH	44067	11/4/2011	TRIALIST- Dr Gemma said she still just has one patient on Butrans. She reminded me about the patient she had told me about, with chronic back pain who was awaiting surgery. I asked what type of feedback she has gotten from him. She said he is doing well on Butrans. She added that she really has not seen many patients with pain lately. I asked if that means she has no clinical reason not to prescribe Butrans & she said yes. She added that she would have no hesitation with prescribing Butrans if someone appropriate does present with pain. I asked if she would ever use Butrans after a patient is not controlled on tramadol. She said she would prefer putting someone on Butrans then, to avoid a patient taking short-acting medications like Vicodin or Percocet around-the-clock. I reminded her that Butrans is still a CIII opioid with abuse/addiction potential. Also discussed formulary coverage & savings cards. I asked her what her experience has been with OxyContin. She said she never writes it because she does not have a lot of pain patients, but that I should talk to Dr Lango, because she prescribes a lot
PPLPMDL0020000001	Sagamore Hills	OH	44067	11/4/2011	NON-PRESCRIBER- Dr Sevier said he still has two patients on Butrans. I asked what type of feedback he has received from them. He said the patients are both doing well on it. I asked what made him think of Butrans for them. He said such as osteoarthritis & cannot take NSAID's due to stomach upset & neither tolerated Vicodin either. I told him it sounds like he is choosing good patient types to try. I asked what he typically prescribes for a patient after NSAID's or COX-2's. He said usually tramadol. I asked him if he would use Butrans if/when that patient is no longer well-controlled on tramadol. He agreed this would be an ideal place to use Butrans, before putting the patient on Vicodin around-the-clock. Discussed dosing & managed care/savings cards. He said he still has some savings cards & is still interested in knowing when Medicare D plans start to pay for Butrans since that is really where he wants to use it. I let him know that Part D plans Summacare & Aultcare in the Akron/Canton area have added Butrans as tier 3 with no restrictions. He said he hopes other larger plans follow suit. Discussed OxyContin q12h as an option for patients beyond Butrans 20mcg.
PPLPMDL0020000001	Cleveland	OH	44113	11/4/2011	talked to dr about 5 Butrans core selling messages,asked dr what features of Butrans really stood out to her? dr said she likes that Butrans has transdermal delivery and likes the once weekly dosing.dr said some patients might like this option but majority of her patients prefer pills only and wont like a patch.showed dr BUP3015,discussed inclusion criteria and asked dr if a 30% reduction in pain was clinically significant? dr said yes it was and 30% reduction in pain was impressive.i asked dr if it was clinically significant enough for her to prescribe Butrans? dr said yes she will consider it and think of patients coming in today and next week.discussed initiation and titration of Butrans and focused dr on commercial plan patients.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44113	11/4/2011	showed dr Butrans visual aid,discussed 5 core selling messages.dr said he does have patients taking vicodin and percocet that arent always controlled and ask for something else,so he could consider Butrans for them.i asked dr how often he hears from patients that their short-acting opioids arent controlling their pain? dr said usually every day patients say their pain is the same or worse and they want more pills or higher dosage strength of vicodin or percocet.we talked about initiation of Butrans,titration and focused dr on commercial plan patients.asked dr if he has 1-2 patients like we discussed that he can start on Butrans today? dr said he might have 1 today but isnt sure.dr said he'll think about it and see who comes in next week.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44113	11/4/2011	dr said her patients on Butrans are doing well,they are functioning better and pain is decreasing.dr said she's continually starting patients on Butrans because she's seeing the clinical reductions in Butrans that she's not seen with other short-acting opioids.dr said biggest challenge is that patients still want their pills as they believe the pills control their pain.dr said when she talks to patients about Butrans she tells them its once a week and a patch and she usually gives some immediate release like vicodin or percocet for patients to have for breakthrough pain.we discussed titration of Butrans and side effects,dr said when patients ask her what are the side effects of Butrans? dr said she tells patients the side effects of Butrans are like other opioids.dr said she gives patients the Butrans patient info booklets but prefers not to get in detail about side effects because she believes patients will put it in their mind and create certain side effects.focused dr on BWC and commercial insurance plans and asked dr if she has more patients like the one's she's started already,to start on Butrans? dr said yes she does and will continue prescribing Butrans.recommended Senokot-S
PPLPMDL0020000001	Mayfield Hts	OH	44124	11/4/2011	Prospect. I described the appropriate butrans patient type as one taking vicodin 5/323 4-6 times/day for low back back and asked doc if he has patients like this. He said he is sure he does. I reminded him that he previously expressed interest in trying butrans. He said he just doesn't think about it for some reason. I reminded him of the BWC and commercial coverage. I also discussed the the positioning after tramadol failures, after 20mcg max of butrans, that would be appropriate to go to a low dose oxycontin. I gave him an initiation guide and he said he has to remember to write it.
PPLPMDL0020000001	Cleveland	OH	44113	11/4/2011	showed dr BUP3015,asked dr if a 30% reduction in pain was clinically significant? dr said yes.dr said he likes that Butrans is a patch as some patients may prefer this but overall most of his patients want their pills.we talked about dr starting patients on Butrans but still giving patients some short-acting opioids,showed FPI,maintenance of therapy section,dr said ok he'll think about it.dr asked if Butrans was covered on medicaid? we discussed medicaid,caresource and commercial plan patients trying Butrans.i asked dr if he had a few patients today that he could start on Butrans? dr said he didnt know would have to think about it and asked i speak with Patty,his MA,to share insurance info with her.we talked about OxyContin being an option for patients that are ready for a long-acting opioid and who perhaps want only their pills and wont try Butrans.dr said he writes a lot of OxyContin and will continue to do so as its covered on insurance plans.recommended Senokot-S
PPLPMDL0020000001	Parma	OH	44129	11/7/2011	PROSPECT- Reminded Dr Rossi about previous conversations about Butrans & delivered overview. Presented "Initiations" program. Discussed various case studies within the presentation. I asked if she would prescribe Butrans for a patient right after NSAID's/COX-2's or if she would be more likely to prescribe something like tramadol first. She said she would prescribe something short-acting first. Discussed inclusion criteria & presented initiation/titration guide, showing her how she would start this patient type depending on their current daily tramadol dose. I asked her if she sees patients like the ones in the "Initiations" program on a regular basis in her practice. Discussed Butrans as a CIII once weekly transdermal option for these patients. I asked if she would try Butrans on someone like the patients we discussed. She said she would. She added that she has some patients who are 80-85 who may be candidates. Discussed managed care coverage for Medicare Part D as well as reviewing commercial & Medicaid coverage. Focused her on patients who are working or who have Medicaid who are not well-controlled on tramadol. Let her know that OxyContin may be an option for appropriate patients who have Medicare Part D coverage.
PPLPMDL0020000001	Cleveland	OH	44195	11/7/2011	worked neurology dept-left Butrans fpi,initiation guide,patient info booklet,formulary grid,web conferences for Butrans and my business card-for dr kriegler,dr mays,dr stillman and dr spears. worked internal medicine - left same info for dr weiss.
PPLPMDL0020000001	Cleveland	OH	44113	11/7/2011	talked to dr about how he decides if patients get a refill of short-acting opioids or start on Butrans? dr said if patients are taking 4 vicodin 5/325 a day and arent controlled,he's talking to patients about Butrans.dr said some patients take 4-5 vicodin/day so he thinks Butrans is a perfect fit there.dr said patients seem to be doing well on Butrans,no complaints so far.i asked dr if he can find a few patients this week,per our discussion,and start them on Butrans? dr said yes he'll keep looking for patients to start on Butrans.focused dr on commercial,BWC and discussed Caesource patients trying Butrans.
PPLPMDL0020000001	Cleveland	OH	44113	11/7/2011	talked to dr about what he says to patients when describing Butrans.dr said he tells patients its a patch and its convenient as they only change patch once a week.dr said he's given Butrans patient info booklets to patients to read and will be following up with patients.i asked dr to focus on patients coming in this week,that are taking vicodin daily but not controlled and asking for more pills,instead of refilling their vicodin,asked dr to start them on Butrans.dr said he will do that but a lot of patients want their pills.we talked about dr giving vicodin for breakthrough pain and starting patients on Butrans,showed FPI section 2.4,dr said ok he'll keep that in mind.focused dr i talked to Nate,Pharmacist,about 5 Butrans core selling messages and Nate said he likes that Butrans is a patch and dosed 1x week as some patients may prefer this over pills.we talked about patients taking short-acting opioids while wearing Butrans,showed FPI,section 2.4 maintenance of therapy section,Nate said ok.i asked Nate if he would give patients the Butrans patient info booklets,if they arent controlled on short-acting opioids? Nate said yes he will do that as that may help patients talk to their doctors about Butrans. we discussed OxyContin stocking and recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44114	11/7/2011	talked to Joel,Pharmacist,about 5 Butrans core selling messages and Joel said they havent seen any Butrans Rx.Joel said he likes that Butrans is a patch and dosed once a week as some patients may like that.i asked Joel if he would give patients the Butrans patient info booklets,if they are taking immediate release opioids and not controlled? Joel said he will do that but asked if medicaid covered Butrans? we talked about Medicaid PA requirements for Butrans,commercial and BWC patients trying Butrans.we discussed OxyContin stocking and recommended Senokot-S
PPLPMDL0020000001	Parma	OH	44134	11/7/2011	TRIALIST- Reminded Dr Mandat of our last conversation when he told me that his latest trials of Butrans have been for patients who have failed tramadol & asked if he is continuing to try that type of patient. He said he just had a patient who he switched from codeine to Butrans. He added that the patient has Medicare/Medicaid coverage & that he has not heard back on whether or not the patient could get it. I told him this sounded like an ideal patient to try on Butrans & asked if he would continue to identify patients like that. He said he would keep it in mind. Spoke with his medical assistant who said Dr Mandat prescribed Butrans for her 88 year-old great aunt who she cares for. She said Butrans has stopped her aunt's crying from pain in her wrist. She also said Dr Mandat plans to titrate her to the 10mcg dose on Thursday.
PPLPMDL0020000001	Cleveland	OH	44114	11/7/2011	talked to dr about what patients say to him in exam room,that triggers dr to think Butrans is an option for patients.dr said if patients say their immediate release opioid's not working,not controlling their pain,not lasting long enough or they want more pills.dr said he's thinking of Butrans.dr said he's been focused on his percocet patients converting to Butrans and so far patients are doing good on Butrans.i asked dr if he would consider Butrans for patients taking vicodin daily but not controlled? dr said he will do that and has to remember to do that.dr said to remind John,PA,about patients taking vicodin but not controlled and to start them on Butrans.focused dr on BWC and commercial plan patients starting on Butrans.
PPLPMDL0020000001	Cleveland	OH	44106	11/8/2011	talked to dr about how Butrans fit into his practice.dr said he doesnt talk to patients about Butrans unless they are in the exam room saying they want something different.i asked dr if he will start patients on Butrans when their tramadol isnt controlling their pain and patients could be asking for more pills? dr said he will consider that instead of just refilling tramadol.we talked about dr starting patients on Butrans but still giving some tramadol for breakthrough pain.dr said he will keep that in mind.dr said he likes that Butrans is a patch,different technology and asked about medicaid coverage? we talked about caesource patients trying Butrans and focused dr on commercial plan patients to start on Butrans.i asked dr if he will start a couple patients this week.dr said he will do that.dr said biggest challenge is he needs reminders that Butrans is there.gave dr initiation guide and showed patient info booklet application/rotation of Butrans section and discussed this info with dr.we talked about OxyContin being an option for appropriate patients,showed conversion guide and discussed a few conversions,dr said he writes a lot of OxyContin and is very comfortable with OxyContin.recommended Senokot-S

PPLPMDL0020000001	Cleveland	OH	44109	11/8/2011	dr said he's started a couple patients on Butrans,but they were dr carson's so he was just approving them with Caresource.we talked about appropriate patients to start on Butrans,initiation and titration of Butrans and dr said he's talking to patients about Butrans,just taking him longer to get started with writing Butrans.i told dr that was fine,i'm confident he has the patients in his practice that he can start on Butrans and he'll get there,dr said he appreciated that and will get some patients started on Butrans.focused dr on BWC and commercial plan patients to start on Butrans.we talked about OxyContin being an option for patients if they are ready for a long-acting opioid and dont want to try Butrans first or if dr just feels OxyContin is the right choice for patients.discussed OxyContin formulary coverage with dr and recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44103	11/8/2011	i talked to Eric,new Pharmacist,about Butrans stocking and Eric confirmed they received 1 Rx for Butrans a few months ago but nothing since then,Eric checked the shelf and they have several cartons of Butrans 5mcg but no Rx.Eric said he wasnt sure what the indication was for but thought Butrans was for chronic pain.i showed Eric Butrans fpi,discussed black box warning,section 2.4 maintenance of therapy section,showed initiation guide and discussed appropriate patients to start on Butrans and titration.i asked Eric if he would give patient info booklets out to patients so that they can talk to their HCP's about Butrans,if they are taking immediate release opioids daily for chronic pain and not controlled, Eric said he would do that as Butrans seems like a good option for patients.we discussed insurance coverage for Butrans,Eric said mainly medicaid here,minimal commercial or talked to Nagla,PA,about appropriate patients to start on Butrans,showed visual aid,discussed initiation and titration of Butrans,Nagla said dr carson and dr celeste have started a couple patients recently and its been going good with patients understanding what Butrans is since she gives Butrans patient info booklets to educate patients.i asked Nagla if she would continue recommending Butrans to the HCP's,when patients are appropriate? Nagla said yes she would do that.focused Nagla on BWC and commercial plan patients.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44195	11/8/2011	talked to Kathy,PA,about appropriate patients for Butrans and Kathy said more HCP's are prescribing Butrans thats why she requested savings cards.i focused Kathy on BWC and commercial plan patients and we talked briefly about Caresource patients trying Butrans.Kathy said she'll try it and see what happens.i asked Kathy to continue recommending Butrans for appropriate patients,we discussed initiation,titration and importance of handing out Butrans patient info booklets to patients.Kathy took all of the info and had to go but said she appreciated the information and would call me with any questions.
PPLPMDL0020000001	Cleveland	OH	44130	11/8/2011	Spoke with Jessica (pharmacist) & showed FPI 2.4, discussing ability of patients on Butrans to take supplemental analgesia. Let her know that some retail systems have alerts that appear if Butrans is prescribed with an opioid. She asked if patients could take opioids as supplemental analgesia. I told her yes. Also discussed appropriate Butrans patient type, focusing on patients who fill prescriptions month after month for 60 tramadol or Vicodin or who start on 60 per month & escalate to 90 or 120 per month. I asked if she ever makes a recommendation to a patient or physician if she notices something like this. She said she does not proactively recommend product switches, but she might reactively mention something to a patient. Verified that she has 5 & 10mcg strengths on her shelf. Discussed OxyContin savings cards & gave her one package of cards. Reviewed eligibility
PPLPMDL0020000001	Cleveland	OH	44104	11/8/2011	dr said she emailed her 1 patient after our lunch last week and told the patient to go to the pharmacy as she was increasing the patients dose of Butrans to 20mcg.i asked dr if she had more patients,like this 1 patient,to start on Butrans? dr said this patient was smart and could grasp that Butrans was a patch and she had to rotate it once a week,not all of her patients can remember to do this.i asked dr how it was clinically relevant to continually give these patients pills then if she felt this way? dr said her percoet patients just want more and more pills it never ends.i talked to dr about patients taking percoet 1-2 5/325 daily and not controlled asking her for something else,she has option of starting these patients on Butrans,and still giving some immediate release opioid for breakthrough pain,dr said she may have some patients like this but will have to think about it.i focused dr on commercial plan patients trying Butrans and using Butrans patient savings cards and talked to dr about her caresource patients trying Butrans.dr said ok she'll start more patients but she was happy with the 1 patient she did start on Butrans now that she's on the right dose.
PPLPMDL0020000001	Cleveland	OH	44130	11/8/2011	TRIALIST- I told Dr Diab I just had a short message for him today: Butrans once weekly, schedule III, for patients who are no longer controlled on tramadol or Vicodin. He stopped to look at torso demo. Discussed application sites. He thanked me & walked into a room.
PPLPMDL0020000001	Mayfield Hts	OH	44124	11/8/2011	Window call....gave doc an initiation guide and asked him for 2 new patients starts on butrans this week. I asked him to prescribe for patients with commercial insurance and give a savings card.
PPLPMDL0020000001	Cleveland	OH	44143	11/8/2011	Spoke to Angela as doc was out today. She said that doc started one patient on butrans but had to be switched back to vicodin because he could not afford it. The patient had medicaid and also supplemental insurance. Even with his commercial insurance the cost was too expensive. I reviewed the formulary grid and asked her to stick with the listed plans.
PPLPMDL0020000001	Cleveland	OH	44106	11/8/2011	worked anesthesia/pain - dr hayek and dr sahgal call notes
PPLPMDL0020000001	Cleveland	OH	44113	11/8/2011	dr said he's not started anyone on Butrans yet he's concerned insurance companies arent covering Butrans because his MA,Deb,has United Healthcare and she couldnt get it approved by PA.i talked to dr and Deb,MA,about the fact that UH patients do have average co-pay of \$50,as its a Tier 3,but with Butrans patient savings card patients pay \$15 and the card pays up to \$40.i explained that Prescriptions Solutions which is what Deb has does have a PA for Butrans and explained the PA requirements.dr said ok he'll have to think about patients he has and see what patients say about Butrans.i asked dr if he had patients with osteoarthritis or back pain that take tramadol daily but arent controlled and ask for something else? dr said yes he has a lot of those patients. told dr thats a perfect place for Butrans,when patients are saying their tramadol isnt controlling their pain and they want something else,dr said ok that makes sense and he will start a few patients on Butrans and see what happens.talked to dr about importance of initiation on appropriate Butrans dosage strength and titration,showed Butrans patient info booklet and asked dr to focus patient discussion on application/rotation of Butrans.dr said his MA,Deb or Misty,MA would give those to patients.focused dr on commercial plan patients.told dr OxyContin is option for patients after Butrans 20mcg isnt controlling pain or if patients dont want to try Butrans but are ready for long-acting opioid,dr said ok he does Rx OxyContin
PPLPMDL0020000001	Cleveland	OH	44109	11/8/2011	dr said he started another patient on Butrans,was a Caresource patient and it was approved so he's going to think of a few more patients like this that he can start on Butrans.we talked about patients with 1 of the pain conditions,pg.11,visual aid,dr focused on low back pain patients.dr said its challenging to treat chronic pain and a lot of patients just want their pills.we talked about dr starting patients on Butrans and still giving immediate release opioids for breakthrough pain,dr said ok he has to remember that focused dr on BWC and commercial plan patients and asked dr if he will see a couple patients this week that he can start on Butrans? dr said probably so he has to think about it.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44130	11/8/2011	TRIALIST- Dr Fedorko said he really does not have a lot of patients who he can put on Butrans. I asked him if he has patients for whom he refills Vicodin or tramadol monthly. He said yes. I asked why not try some of those patients on Butrans. He said they are "hooked" on what they are taking & will not change. Discussed patients who are not well-controlled on current short-acting medication like Vicodin or tramadol. He said he does not think anyone has pain every day. I asked what about patients with osteoarthritis or spinal stenosis. He said usually they are not in pain every single day where they would need something forever. I asked if he would use Butrans for someone who needed pain medication for a few months. He said yes. Reminded him that Butrans is CIII opioid with abuse/addiction potential. Let him know that as a CIII, Butrans can be called in & refills can be written. He said he did not know this & he thought it was the same class as fentanyl. He said this changes his thoughts & now he thinks there is more of a place for Butrans. He asked about cost- discussed insurance coverage & savings cards. Discussed dosing & application sites.
PPLPMDL0020000001	Parma	OH	44134	11/8/2011	LOYALIST- Dr Hernandez said the patient he had told me about who started at the 5mcg & was titrated upward to a 20mcg dose was doing well. He added that the patient needed "just a little more" than 20mcg, so he told the patient to cut a 20mcg patch in quarters & use one 20mcg patch plus one quarter & she is doing well. Reminded him that this is not recommended & that Butrans has not been studied like this. He said he knows but it works, so he plans to continue to do this. I asked him what his trigger generally is to offer Butrans. He said usually new patients, such as those who come from the chiropractor. He said that is why most of his patients start on a 5mcg dose. Told him this is correct. He told stories of patients who are doing very well on Butrans & it has changed patients' lives for the better. He also said he has a patient who was taking OxyContin who he switched to Butrans & is doing well. Thanked him for his continued support & business & asked that he continue to do as he has been. He agreed.
PPLPMDL0020000001	Euclid	OH	44132	11/8/2011	Repeat. Doc said he has not written enough of butrans and asked me to go over the formulary coverage again as he keeps forgetting. I explained that state BWC is covering but private employer self payers may not. He said he does have some medicaid as well. Informed him that Caresource is covering butrans after failure on tramadol/vicodin/hydrocodone. Rereviewed the commercial plans and the savings cards. I asked him to prescribe butrans after tramadol failures and to discussed how to initiate butrans. Explained that low dose oxycontin would be an option for medicaid patients and after max doses of butrans. He said he will try to write more.
PPLPMDL0020000001	Cleveland	OH	44124	11/8/2011	Quick call....Reminded doc of the patient types for butrans as well as oxycontin. I explained the both are being covered by BWC. Confirmed that he does have some medicaid patients. Let him know that Caresource is covering butrans after failure on tramadol/codeine/vicodin.
PPLPMDL0020000001	Cleveland	OH	44195	11/8/2011	worked neurology dept-left BUP3015,initiation guide,patient info booklet,patient savings card flashcard,formulary grid and webinar flyers for Nov.2011 for Butrans,with my business card for Dr.Bamford, worked chronic pain-left same info for Dr.Covington and Dr.Mathews. worked anesthesia-left dr mekhail, dr cheng and dr vrooman all of the above info as you cant see any HCP's must leave info at front desk. worked rheumatology-left dr deal,dr long,betsy kirschner,np,dr calabrese,patty paczos,pa and dr chatterjee all of the same Butrans info at front desk
PPLPMDL0020000001	Mayfield Heights	OH	44124	11/8/2011	Window call....reminded doc of the butrans coverage - commercial, BWC and now on Caresource after tramadol failures. Provided Formulary reminder for butrans and oxycontin.
PPLPMDL0020000001	Lyndhurst	OH	44124	11/8/2011	Repeat. Doc said she has not had any problems/issues with the recent scripts she wrote for butrans. She said she wrote them for patients that were previously on tramadol. I reminded her that 10mcg would be an appropriate starting dose if patients were taking 300-400mg of tramadol. She said she tried writing the 5mcg but found that she had to increase the dose right away. I asked her to continue to prescribe butrans for that patient type. She confirmed that she has a few caresource/medicaid patients. I told her that Caresource is covering butrans after failure on tramadol/vicodin/codeine. Reminded her of the oxycontin patient type and the dr said he started a few patients last week on Butrans and is seeing good results with Butrans.dr said patients are having a decrease in their pain and seem to be improving in their general functioning so he's happy,we talked about challenges of treating chronic pain conditions,showed visual aid,pg.11,dr said if patients are taking vicodin or percoet every day and not controlled and come to him asking for more pills,he's talking to them about Butrans.dr said the only challenge is that he has a lot of medicaid patients so that prevents him from starting more patients on Butrans.we talked about caresource patients trying Butrans and i told dr to focus on commercial plan patients for Butrans initiation,dr said ok he will continue talking to patients about Butrans.we talked about OxyContin being an option for those patients after Butrans 20mcg isnt controlling patients pain or for those patients that dr feels are appropriate to start on OxyContin instead of Butrans,dr said he still starts some patients on OxyContin and had all of the info he needed on OxyContin,showed conversion guide and we talked about a few conversions,i asked dr to continue prescribing OxyContin,dr agreed,showed formulary grids for OxyContin.recommended Senokot-5
PPLPMDL0020000001	Parma	OH	44129	11/8/2011	NON-PRESCRIBER- I reminded Dr Taylor that she had told me that she had prescribed Butrans for a patient & inquired if she has had any feedback. She said not yet. She said this patient was on 3 7.5mg Vicodin per day, so she started her on the 10mcg Butrans. I showed initiation guide pg 6 & told her she did exactly what she should have. I asked if she allowed the patient to have any supplemental analgesia. She said no. I asked how many patients she has like this. She said maybe one other because she is getting rid of patients who are drug seeking. I agreed that she should be cautious in prescribing opioids, including Butrans, as it does have abuse/addiction potential. Asked if she has patients who she refills Vicodin month after month for. She said yes. Positioned Butrans for patients who are taking 3 Vicodin per day but who are coming back to her saying it is not quite controlling their pain, instead of referring them out. She agreed that using Butrans as a "last resort" before referring out would be a reasonable place to use it. I asked if she would prescribe Butrans for these patients & she agreed. Showed her torso demo & 3 patch sites, along with demo 5mcg patch. Also discussed heat warning. She said she uses OxyContin but is not prescribing any new, just continuing patients who are already on it.
PPLPMDL0020000001	Mayfield Village	OH	44143	11/8/2011	Quick call.... I reminded HCP of the butrans patient type - after tramadol- and the starting dose of 10mcg if they have failed on 300-400mg of tramadol. I asked her if she is seeing these types of patients. She said yes but the cost is the issue. Gave her a formulary grid and asked her to focus on patients with these plans.
PPLPMDL0020000001	Cleveland	OH	44109	11/9/2011	dr said he doesnt really have many patients on narcotics so he doesnt feel Butrans will be a fit in his practice.showed dr Butrans visual aid,we talked about appropriate patients and dr said he'll keep Butrans in mind in case anyone is ever appropriate in his practice.dr took fpi and patient info booklet.
PPLPMDL0020000001	Cleveland	OH	44109	11/9/2011	dr said he's not started anyone on Butrans but likes the idea of a patch for chronic pain patients as he would like to decrease their short-acting opioids.talked to dr about BUP3015,showed clinical reductions and asked dr if a 30% reduction in pain was clinically significant? dr said yes! any reduction in pain is good for patients and he doesnt always see a 30% reduction in pain with short-acting opioids.i asked dr if this was clinically significant enough for him to Rx Butrans? dr said yes it was but he doesnt have many patients taking narcotics for chronic pain.i talked to dr about initiation and titration of Butrans for appropriate patients and asked dr if he will see a couple patients this week that he could start on Butrans? dr said he might but would take the info and see if he has anyone in mind.we talked about commercial plans,BWC and Medicaid coverage for Butrans.
PPLPMDL0020000001					

PPLPMDL0020000001	Cleveland	OH	44109	11/9/2011	dr said she's PGY-1 and hasn't heard of Butrans, showed dr Butrans fpi and visual aid and we discussed black box warning, appropriate patients, initiation and titration of Butrans. dr said she sees a lot of patients taking short-acting opioids daily but they are never controlled and always want more pills. i talked to dr about her option of starting patients on Butrans and giving immediate release opioids or non-opioid therapies, dr said ok she'll try it with a couple patients and see what happens. we talked about insurance coverage, focused dr on commercial insurance plans and we discussed Medicaid's PA requirements.
PPLPMDL0020000001	Cleveland	OH	44103	11/9/2011	dr came to front desk, said she was too busy to talk but i asked dr how she's treating chronic pain conditions, showed pg.11 visual aid? dr said initially with short-acting opioids and then long-acting as she prefers long-acting opioids. dr said she started a couple more patients on Butrans and patients are doing good on Butrans so far. asked dr to focus on commercial plan patients or Medicaid that meet PA requirements, discussed the pre-requirements for Butrans. dr said ok and i asked dr if she'll continue starting more patients on Butrans? dr said absolutely she will do that. told dr she still has option of OxyContin for appropriate patients, showed conversion guide and dr said she's good with savings cards and is still starting patients on OxyContin.
PPLPMDL0020000001	Cleveland	OH	44109	11/9/2011	dr said he's not started anyone on Butrans but does remember that it's a patch and dosed once a week. dr said he still has my information on Butrans from my last lunch but Medicaid is biggest population here so it's a challenge to Rx Butrans. i talked to dr about PA requirements for Medicaid and we discussed Caresource patients trying Butrans, told dr commercial plan patients and BWC should be focus at this point, dr said ok. showed dr Butrans visual aid, talked about 5 core messages, dr said he likes that it's a patch and dosed once a week as some patients may prefer this delivery of medication. dr said being a CII is much better so that he can call in refills. dr said to leave Butrans fpi again and he'll look it over and contact me with any questions. i asked dr to focus on 1-2 patients, looking at dosage ranges in visual aid for appropriate patients, to start on Butrans, dr said he will consider it and keep it in mind as an option.
PPLPMDL0020000001	Cleveland	OH	44109	11/9/2011	dr said she didn't know anything about Butrans, gave fpi, showed visual aid and we discussed 5 core selling messages. dr said she was surprised to see that Butrans being a long-acting opioid was a CII and she liked that so she could call in refills. dr focused discussion on once weekly dosing of Butrans and appropriate patients. i asked dr if she has any patients she feels that Butrans could be an option for, this week? dr said she might and asked about insurance coverage? we discussed commercial and BWC and dr asked about Medicaid as that's biggest population here and cash paying. i told dr to focus on commercial but explained PA requirements for Medicaid patients. dr said ok she'll keep Butrans in mind as an option for patients.
PPLPMDL0020000001	Cleveland	OH	44109	11/9/2011	dr came in quickly for food and said she's not prescribed Butrans and doesn't really have many patients on opioids at this time. dr said she would take the Butrans fpi and look it over. i showed dr BUP3015, opioid experienced clinical trial, and asked if a 30% reduction in pain was clinically significant? dr said yes any reduction in pain is good for patients. i showed dr the results of this trial and told her that what her patients could potentially see with Butrans. dr said ok she will look over all of the info and consider Butrans if anyone is appropriate. dr took formulary grid as she asked about Medicaid patients getting Butrans, talked to dr about PA requirements for Medicaid and Butrans and we discussed Caresource patients trying Butrans, dr said ok and left.
PPLPMDL0020000001	Cleveland	OH	44113	11/9/2011	worked pain management dept
PPLPMDL0020000001	Cleveland	OH	44109	11/9/2011	dr said he doesn't have a lot of patients on narcotics but likes that Butrans is transdermal and dosed once a week. dr said he'll keep Butrans in mind if he has any patients that are taking the short-acting opioids and not controlled and asking him for more pills. gave dr Butrans fpi and he took patient info booklet.
PPLPMDL0020000001	Cleveland	OH	44109	11/9/2011	worked family medicine dept - had lunch with 26 attendees, 15 HCP's; worked internal medicine and pharmacy
PPLPMDL0020000001	Cleveland	OH	44109	11/9/2011	dr was at lunch and said he remembered me talking to the residents last month about Butrans but he doesn't really see many adults, it's mainly children. i told dr that Butrans isn't approved for anyone below the age of 18 yrs. dr said ok but he wanted to look at fpi again and just keep it in mind in case he sees any adults that meet Butrans indication and he can start them on Butrans. gave fpi
PPLPMDL0020000001	Cleveland	OH	44109	11/9/2011	dr said she remembered that Butrans was transdermal but that was it. i showed dr Butrans visual aid, discussed 5 core messages and asked dr what features of Butrans stood out to her? dr said she likes that Butrans is a patch and is dosed once every 7 days. dr asked if patients can still take short-acting opioids with Butrans? i showed dr FPI, section 2.4, maintenance of therapy, and told dr she can give patients immediate release opioids or non-opioid therapies, dr said ok. showed dr pg.11, visual aid, pain conditions and asked dr when looking at these conditions, which one's did she see most often? dr said there are a lot of back pain and arthritic patients. i told dr those are the 2 pain conditions we studied, showed dr BUP3015, opioid experienced patients, and discussed 30% reduction in pain and asked dr if that was clinically significant? dr said yes any reduction in pain is good for patients. i asked if this was clinically significant enough for her to prescribe Butrans? dr said yes she will consider Butrans for patients but she doesn't have a lot of patients on narcotics now. dr took fpi, BUP3015 and patient info booklet. dr asked about insurance coverage for Butrans? showed formulary grid and focused dr on commercial plan patients trying Butrans, we discussed PA requirements for Medicaid patients and we talked about Caresource patients trying Butrans. dr said ok she will talk to some patients and see what happens.
PPLPMDL0020000001	Cleveland	OH	44109	11/9/2011	dr said she just read something about Butrans yesterday. in family medicine dept that i left a month ago and she wanted to start patients on Butrans but she thought you needed a special license to Rx Butrans. we talked about 5 Butrans core selling messages and dr was surprised to hear that Butrans was a CII and she said that was great because she could call in refills for Butrans. dr said she knows this is only approved for chronic pain and that's great because she has a lot of patients taking immediate release opioids that she feels Butrans would be appropriate for. showed dr Butrans visual aid with dosage ranges and talked about initiation and titration of Butrans. we discussed commercial plan patients trying Butrans and using Butrans patient savings cards, also talked to dr about Medicaid PA requirements and Caresource patients trying Butrans, dr said she will start writing immediately and was so happy to see me today. dr took Butrans fpi, patient info booklets and BUP3015 to review in more detail when she has time. we talked about OxyContin being an option for patients, showed conversion guide and asked dr to continue Rx OxyContin when appropriate, dr said she will but doesn't have many patients on OxyContin. recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	11/9/2011	talked to dr about 5 Butrans core selling messages, dr said he remembered Butrans was a patch and for chronic pain but that was about it. i asked dr what features of Butrans stood out? dr said once weekly dosing and transdermal delivery as some patients may prefer this, dr asked if patients could still take pills with Butrans, showed FPI, section 2.4, discussed patients taking immediate release opioids or non-opioid therapies with Butrans, dr said ok. dr asked about insurance coverage for Medicaid patients as that's majority of patients here, talked to dr about PA for Medicaid, told dr he could try starting a few Caresource patients on Butrans and we discussed that info, told dr to focus on commercial plan patients and BWC. dr said ok he will do that. i asked dr if he had any patients he could start this week on Butrans? dr said probably so and would think about it. recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44143	11/9/2011	Window call... i discussed the Butrans 7 day delivery and CII status. i explained the positioning after tramadol failures and let him know that Medicaid is covering Butrans. Provided a formulary grid and invite to the Butrans
PPLPMDL0020000001	Cleveland	OH	44109	11/9/2011	dr came in quickly for food and couldn't talk long. showed dr BUP3015, clinical reductions in pain and asked dr if 30% reduction in pain was clinically significant? dr said yes that was any reduction in pain was good. i asked dr if she saw that now when prescribing immediate release opioids? dr said no, usually patients pain levels are the same or worse. i told dr that she could potentially expect to see these results with patients starting on Butrans. dr said ok that sounded great and she would review the study and data later. told dr i would follow up on 11/30/11 at next lunch to answer any questions. i asked dr to start 1-2 patients between now and then on Butrans, dr said ok she will do that. recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	11/9/2011	talked to dr about 5 Butrans core selling messages, dr said he remembered Butrans was a patch and for chronic pain but that was about it. i asked dr what features of Butrans stood out? dr said once weekly dosing and transdermal delivery as some patients may prefer this, dr asked if patients could still take pills with Butrans, showed FPI, section 2.4, discussed patients taking immediate release opioids or non-opioid therapies with Butrans, dr said ok. dr asked about insurance coverage for Medicaid patients as that's majority of patients here, talked to dr about PA for Medicaid, told dr he could try starting a few Caresource patients on Butrans and we discussed that info, told dr to focus on commercial plan patients and BWC. dr said ok he will do that. i asked dr if he had any patients he could start this week on Butrans? dr said probably so and would think about it. recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	11/9/2011	dr said she remembered a little bit about Butrans but not much, dr said she knew Butrans was a patch. showed dr BUP3015 and visual aid, discussed 5 core selling messages and asked dr if a 30% reduction in pain was clinically significant? dr said absolutely, dr said she has so many patients taking short-acting opioids every day for chronic pain but they aren't controlled and are always asking for something different. i told dr those are the perfect patients to start on Butrans. showed dosage ranges for Butrans initiation and asked dr if she will start a few patients this week on Butrans? dr said she will do that and asked about insurance coverage? i told dr to focus on Commercial plan patients, showed savings cards and asked dr what the biggest population of patients were here? dr said Medicaid and cash paying. we talked about PA for Medicaid and discussed Caresource patients trying Butrans. dr said she will try it in a few patients and see what real world results she gets with Butrans. recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	11/9/2011	dr said she started a few patients on Butrans, post our last discussion and patients are doing well on Butrans. i asked dr why she chose Butrans for these patients? dr said they all had chronic pain conditions and were taking Vicodin and Percocet daily but not controlled. dr said she's seeing patients overall functioning improve and she's seeing pain levels decrease from 8-10 to a 3-5 so she and patients are happy. i asked dr if she has more patients like the one's she started, to start on Butrans this week? dr said she probably does, dr asked if anything changed with Medicaid coverage of Butrans? i talked to dr about PA requirements for Medicaid patients and discussed Caresource patients trying Butrans too, dr said ok as that's majority of her patient population. focused dr on commercial plan patients too. recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44113	11/9/2011	dale, pa, said he's starting more patients on Butrans, when patients ask for more pills or say their short-acting opioid's not lasting long enough he's talking to them about Butrans. i asked dale if he has more patients coming in this week that he can start on Butrans? dale said he's sure he will see some patients that he can start on Butrans. focused dale on BWC and commercial plan patients starting on Butrans.
PPLPMDL0020000001	University Heights	OH	44121	11/9/2011	Let doc know about the coverage with Medicaid for Butrans. Explained that patients must fail on tramadol/vicodin/codeine. I asked him to try for a Medicaid patient. He said he would. He asked about commercial coverage and asked if we had a higher 3rd tier co pay. I confirmed the 3rd tier copay but the savings cards saves patients up to \$40. discussed the positioning of Butrans after tramadol and before low dose oxycontin. He said that PA are not going thru for Medicaid patients and that he would start charging patients for PA. I reminded him of the starting dose of 10mcg for patients coming off of tramadol.
PPLPMDL0020000001	Cleveland	OH	44113	11/9/2011	showed dr BUP3015, clinical reduction in pain page and asked dr if a 30% reduction in pain was clinically significant? dr said yes it is and she's seeing greater reductions in pain with patients taking Butrans. dr said she has patients going from pain levels of 8-10 down to 2-3 and overall improvement of functioning. i asked dr if she will continue starting more patients on Butrans? dr said yes she will as she's seeing good results with Butrans. focused dr on BWC and commercial plan patients to start on Butrans. recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44102	11/10/2011	talked to Nagla, PA, about appropriate patients to start on Butrans. Nagla said dr Carson started another patient on Butrans this week but there's a PA required by Caresource so she doesn't know if patient will be able to start on Butrans. Nagla said this patient went to the pharmacy with a Butrans script and the Pharmacist refused to fill the Rx because the patient was prescribed Butrans and Vicoprofen. Nagla said the patient called the office and Nagla told the patient it was fine she COULD take both Butrans and Vicoprofen, but the patient was hesitant to try Butrans after the Pharmacist told her this info and she is still waiting for Caresource approval. Nagla said Caresource coverage is their biggest challenge, BWC is only 1% and commercial insurance is about 10-20% here. Nagla asked if Medicaid mutual covers Butrans? showed formulary grid and discussed patient savings card program with Nagla. i asked Nagla to continue identifying patients that are appropriate for Butrans and recommend this treatment option to the 3 HCP's in this office. Nagla said she will do that. focused Nagla on commercial plan patients. recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	11/10/2011	i talked to Milos, Pharmacy Tech and Chris, Pharmacist, about Butrans stocking they both said doctors are writing Butrans and they have Butrans in stock. i asked who is writing Butrans? both Milos and Chris said they don't have time to look that info up in computer right now. Rob, Pharmacy Mgr, is gone for day but i can stop back next week and see if he can look that up for me. showed Butrans formulary grid and patient savings card flashcard. i left 2 packs of savings cards as they didn't have any. we talked about 5 core selling messages, focused on appropriate patients, initiation and titration of Butrans. confirmed stocking of OxyContin, appropriate patients for OxyContin and formulary coverage.
PPLPMDL0020000001	Cleveland	OH	44195	11/10/2011	saw dr in hall, dr said he started another patient on Butrans, showed dr Butrans patient info booklet and asked him to focus patient discussion on application/rotation of Butrans, dr said he will do that and has given a few booklets to patients to read about Butrans. i asked dr if he has more patients like the couple patients he started, to start on Butrans this week, dr said he may but will have to look at schedule. gave dr BUP3015, opioid experienced clinical trial showing 30% reduction in pain page and told dr these are the results he can potentially expect to see with Butrans, dr said that was impressive and would consider Butrans for patients. focused dr on commercial plan patients. recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44195	11/10/2011	worked anesthesia/pain management - Kathy Kraus, PA and Dr Cheng - in apm dept- see call notes. worked neurology/chronic pain - left Dr Stillman, Dr. Mays and Dr. Krieger Butrans web conferences, FPI, patient info booklets, formulary grids with patient savings card flashcards and my business card for each HCP as i couldn't see them.

PPLPMDL0020000001	Cleveland	OH	44109	11/10/2011	dr said he gave a few patients the Butrans patient info booklets to read and is following up with them.dr said he's not sure if he's saying the right things to patients to "sell it" to them,dr asked how he should explain Butrans to his patients? i asked dr to tell me what HE liked about Butrans and the clinical benefits of Butrans? dr said he likes that Butrans is a patch and dosed once a week.i told dr to share that with patients then if that's how he feels and he can tell patients its a different option than what they have been taking for their chronic pain,dr said ok that sounded easy and he would try saying this to patients.we talked about commercial plan patients trying Butrans so they can use Butrans patient savings cards and BWC patients,dr asked about medicaid patients as he has a lot of them,we talked about PA requirements for medicaid and caresource patients,dr said ok if he has anyone thats appropriate he may try getting the Rx approved.i told dr that was great and was happy to hear that he's at least willing to try starting patients on Butrans.
PPLPMDL0020000001	Cleveland	OH	44109	11/10/2011	worked neurology and rheumatology dept's-they are combined now with arthritis clinic and dermatology-girls from rheumatology said ALL lunches are cut off with Rep's and i can only leave info for doctors moving forward.i left Butrans web conferences,BUP3015,patient info booklet and my business card for Dr.Singer,Dept Chairman of Rheumatology,Dr.Ballou and Dr.Magrey. left dr hanna,Dept Chairman of Neurology the same info; worked pharmacy-see call notes
PPLPMDL0020000001	Mayfield Heights	OH	44124	11/10/2011	Spoke to Giovanni about the movement of butrans. He said he has filled a few scripts, one patient that has been refilled. He said the patient was a medicare patient but only paid about \$9 and must have had a PA. I discussed the use of supplemental analgesics with butrans in case they are alerted that supplementals can't be used. He said the volume of oxycontin has picked up a bit nothing out of the ordinary/no new prescribers. I gave him patient info guides to give to patients that may be taking hydrocodone ATC and being refilled. He was willing to do that.
PPLPMDL0020000001	Cleveland Hts	OH	44118	11/10/2011	I asked doc for the status of the butrans patient that could not afford butrans through Walgreens. He said he had not heard back from him after he suggested the guy go to another pharmacy. I explained the commercial plans nationally and that cleveland clinic employees should be able to afford it. I asked him what the patient's previous therapy was and what strength of butrans he prescribed. He said the patient was taking a few vicodin a day and he believes he started him on 20mcg. i reminded him that 20mcg is not a starting dose of butrans but rather a titration dose. I asked him where he would likely prescribe butrans and he said after tramadol or vicodin. I asked if he would prescribe for opioid naive. He said probably not. I told him about the caresource covering butrans after tramadol failures. He said he does not have much medicaid. I discussed the application sites of butrans and to rotate wweekly. Reminded him of the oxycontin patient type and the formulary coverage.
PPLPMDL0020000001	Cleveland	OH	44109	11/10/2011	dr said she started 1 patient on Butrans,patient is doing well and she's given some patients Butrans patient info booklets to read about Butrans and follow-up with her in 1-2 weeks.i asked dr what prompted her to start that 1 patient and told dr that was great news she finally started 1 patient.dr said the patient was taking percocet every day for chronic pain,not controlled and asking for more pills,so she thought Butrans could be a different option for this patient.we discussed initiation and titration of Butrans and i asked dr if she had more patients like the 1 she started,to start on Butrans? dr said yes she has more patients like this but some patients dont want to wear a patch and only want their pills.i asked dr if she felt comfortable starting patients on Butrans and giving them some short-acting opioids for breakthrough pain? dr said yes she was comfortable with that so that wouldnt be an issue.focused dr on BWC and commercial insurance patients.dr asked about medicaid coverage,we discussed PA requirements for medicaid and caresource patients trying Butrans.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44109	11/10/2011	dr said he had a patient this am that he wanted to start on Butrans but he's waiting for PA to go through with Caresource.asked dr why he chose Butrans for this patient? dr said when patients are taking 4 pills a day and want more pills,he's telling them Butrans is only option and he will decrease their short-acting opioids.i asked dr if he was comfortable starting patients on Butrans and giving some short-acting opioids for breakthrough pain? dr said yes he is getting more and more comfortable with Butrans and explaining Butrans to patients.dr said biggest challenge is that he has a lot of caresource patients in this office,dr said only 1% or so are BWC and they have 10-20% commercial insurance plan patients.i talked to dr about focusing on commercial plan patients to start on Butrans as dr was feeling frustrated with all of the PA's for Caresource patients.i asked dr to think about how its clinically beneficial for patients,when they are taking 2-3 vicodin or percocet daily and not controlled,continually refill their short-acting opioids,dr said theres no clinical benefit these patients have the same or worse pain and just want more pills,told dr to stop and not refill or convert patients from 1 short-acting opioid to another and start them on Butrans.dr said he will do that as that makes sense and he can taper patients short-acting opioids over time,i told dr that sounded good and i will follow-up next week.dr said he's on vacation next week but week after is good
PPLPMDL0020000001	Mayfield Heights	OH	44124	11/10/2011	Spoke to doc about the key selling features and asked her what her go to drug was for chronic pain. She said she might start on a tramadol then go to vicodin, then maybe to percocet. I positioned butrans after tramadol and before percocet or oxycontin. Explained the commercial coverage and medicaid. She asked about medicare. She said she wants to use butrans her concern is just the cost. I stressed the importance of giving the savings cards. She asked about the use of supplemental analgesics. I referred to the FPI and confirmed that they can be used. I discussed the application process and how to rotate. She said she would try it.
PPLPMDL0020000001	Euclid	OH	44119	11/10/2011	I reminded doc that last week he said he would write a script of butrans and he thought the 30% improvement score was pretty good. I reminded him of the CII status and once weekly dosing. Reviewed the coverage with commercial plans and that of medicaid. He asked if 5mcg would be the starting dose. I explained that if patients are taking 300mg of tramadol they would start on the 10mcg. Demonstrated how to apply the patch and the various doses. He said the day is the day.
PPLPMDL0020000001	Cleveland	OH	44195	11/10/2011	talked to Kathy about patients getting started on Butrans,showed BUP3015,discussed clinical trial with Kathy and asked Kathy if a 30% reduction in pain was clinically significant? Kathy said any improvement in pain is good so yes 30% was impressive.i asked Kathy if it was impressive enough for her to prescribe Butrans? Kathy said yes she will but she see's dr mekhail and dr minzter's patients so she does need their approval as she works closely with them.i asked Kathy to share this data with them and get their thoughts and i would follow-up next week,Kathy said ok.told Kathy if any patients are appropriate for Butrans this week she should focus on commercial plan or BWC patients,Kathy said ok she will do that.
PPLPMDL0020000001	Lyndhurst	OH	44124	11/11/2011	Doc had a patient just leaving the office that he started on 20mcg of butrans, had paid \$350 for a month supply, and got "sick as a dog". Doc said she was on percocet and other meds as she is in severe pain. I explained that 20mcg is not a starting dose and patient must be tapered down down to 30mg equivalent of morphine before starting on the 10mcg. Let him know the potential for withdrawal if patient not tapered properly. I let doc know that oxycontin may be more appropriate for a patient like that.
PPLPMDL0020000001	East Cleveland	OH	44112	11/11/2011	Prospect. I asked doc where he thinks he would prescribe butrans and reminded him that he took an initiation guide because he wanted to remember to prescribe butrans. He said he has not gotten around to prescribing butrans yet. He asked him where he thinks he would use it. He said most of his patients need something stronger. I explained the indication to include moderate to severe pain and that if he has patients a short acting like tramadol/vicodin/percocet several times a day those are appropriate patients for butrans. I also let him know that per the FPI, supplemental analgesia is allowed while on butrans therapy. I informed him of the coverage with BWC and medicaid with a PA after tramadol failures. He said that oxycontin is now requiring enough PAs. Reminded him of the commercial and med D plans covering oxycontin.
PPLPMDL0020000001	Cleveland	OH	44195	11/11/2011	worked chronic pain/neurology dept-left Butrans fpi,initiation guide,patient info booklet,patient savings card flashcard,formulary grid,web conferences for nov 2011 and my business card for Dr.Kriegler,Dr.Stillman and Dr.Mays; worked anesthesia/pain center-left SAME info for Dr.Rosenquist,dept chairman,Dr.Mekhaill,Dr.Cheng,Dr.Stanton-Hicks,Dr.Vrooman,Dr.Samuel and Dr.Minzter as i couldnt see any HCP's
PPLPMDL0020000001	South Euclid	OH	44121	11/11/2011	Spoke to Gary about the butrans indication and the positioning - after tramadol and before vicodin/percocet ATC. I referred to the FPI and showed him the section of supplemental analgesic. I explained that some pharmacies may get an alert that warns against supplemental analgesia with butrans. Let him know that it is allowed. He said he will try remember it for when he gets a script.
PPLPMDL0020000001	Mayfield Hts	OH	44124	11/11/2011	I asked doc where he thinks he would use a product like butran - a 7 day CII patch. He said there is always a place he has not gotten around to it. I asked him if he a=has any objections to prescribing it. He said not as long as patients can get it. I asked him to think of butrans for BWC patients or non medicare patients and give a savings.
PPLPMDL0020000001	Cleveland	OH	44109	11/11/2011	work pm&r dept-see call notes
PPLPMDL0020000001	Cleveland	OH	44113	11/11/2011	talked to dr about BUP3015,asked if a 30% reduction in pain was clinically significant? dr said yes.i asked dr if it was clinically significant enough for him to Rx Butrans? dr said yes but he has been in and out of office so much as he also oversee's the wound center here at Lutheran Hospital and just hasnt thought of Butrans.i asked dr if he can start 1-2 patients today on Butrans,that meet the indication and are ready for a long-acting opioid? dr said if he has anyone appropriate to start on Butrans he will consider it.dr asked if patients could still take immediate release opioids with Butrans? i showed fpi,section 2.4,discussed dr starting patients on Butrans and giving immediate release opioids or non-opioid therapies,dr said ok.dr asked who covers Butrans? showed formulary grid,focused dr on commercial plans,dr asked about Medicaid patients getting Butrans? we talked about PA requirements for Medicaid patients and we discussed Caresource patients.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44113	11/11/2011	dr said she gave patient info booklets to patients to read about Butrans and is following up with them in 2 weeks.dr said biggest challenge is that many patients dont want to stop taking their pills and are resistant to a patch.dr said she will continue telling patients about Butrans and i showed dr fpi,section 2.4 maintenance of therapy section,noting that dr can give immediate release opioids or non-opioid therapies with Butrans,dr said ok she'll consider that next time.showed initiation and titration info in visual aid and asked dr to start 1 patient today.dr said if she has anyone thats appropriate she will do that.focused dr on commercial plan patients and tricare.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44113	11/11/2011	dr said she likes that Butrans is a patch and likes the once weekly dosing but noone has been interested in wearing a patch.dr said her patients want their pills and more pills on every visit.i showed dr fpi,section 2.4 maintenance of therapy section,noting dr can give immediate release opioids or non-opioid therapies with Butrans,dr said she forgot about that.dr said she'll talk to some patients and perhaps start them on Butrans but give less short-acting opioid medication,told dr that was great and asked if she would see any patients today that would be appropriate to start on Butrans? dr said there might be a few she would have to look but will remember Butrans as an option for patients.focused dr on initiation and titration of Butrans,showed visual aid and focused dr on commercial plan and tricare patients.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44109	11/11/2011	showed dr BUP3015,opioid experienced patients,and we discussed the clinical trial inclusion criteria and the results,i asked dr if a 30% reduction in pain was clinically significant? dr said yes any reduction in pain is good.i asked if it was clinically significant enough to prescribe Butrans? dr said yes it is.dr said he will talk to patients today and next week and see what happens.we talked about initiation and titration of Butrans and focused dr on BWC and commercial plan patients.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44113	11/11/2011	talked to dr about what features of Butrans he remembered and found clinically significant,dr said he likes that Butrans has transdermal delivery and the once weekly dosing may be appealing to some patients.dr said he hasnt thought about Butrans as he keeps thinking that medicaid doesnt cover it.i asked dr if he is thinking of a few patients to start on Butrans since he's asking about insurance? dr said he has a lot of medicaid patients taking tramadol and they arent always controlled so he could see Butrans being an option for this group.talked to dr about PA requirements for medicaid patients,discussed Caresource patients trying Butrans and asked dr if he can start a couple patients today on Butrans? dr said he will talk to patients and see if they are willing to wear a patch.showed dr initiation and titration info in BUP3015 and visual aid,and we discussed patient info booklet application/rotation of Butrans section being important to discuss with patients,dr said ok he'll talk to a few patients and see what happens.we discussed OxyContin as an option for patients,dr said he prescribes a lot of OxyContin and will continue doing so.recommended Senokot-5
PPLPMDL0020000001	South Euclid	OH	44121	11/11/2011	Spoke to Lauren to discuss the butrans indication and other selling messages. I told her i wanted to inform her of the allowable use fo supplemental analgesics such as tramadol of hydrocodone with the use of butrans. I explained that some pharmacies may get a pop saying that supplementals should not be used. She she only has filled a few scripts but she had not noticed any such alert. Provided patient info guide and FPI.
PPLPMDL0020000001	Cleveland	OH	44109	11/11/2011	followed up with dr as he said a patient had an AE,itching while wearing the Butrans patch.dr said patient been doing well on Butrans for past 2-3 months and is functioning well on Butrans.dr said patient started getting some itching under patch and he wasnt sure if patient should remove Butrans and apply a new 1 on at a different site or wait it out? i told dr that i shared all of the info with medical services yesterday,called in AE and Med services said they would contact dr to discuss this AE.dr said he's been starting patients on Butrans and patients are doing well,he gives them Butrans patient info booklets and patients understand Butrans easily.dr said he had a few issues with insurance but they were medicaid patients,dr said he has gotten scripts approved for Medicaid patients after a PA.i told dr to focus on commercial plan and BWC patients.i asked dr if he's seeing clinical reductions in patients pain levels,with patients he's started on Butrans? dr said yes he's seeing pain levels decreasing and patients cognitive functioning is approving.

PPLPMDL0020000001	Cleveland	OH	44109	11/11/2011	showed dr BUP3015,discussed clinical trial for opioid experienced patients and asked dr if he treats patients like this? dr said yes he does.i asked dr if a 30% reduction in pain was clinically significant? dr said yes any reduction in pain is good for patients.i asked dr if it was clinically significant enough for him to Rx Butrans? dr said yes he will consider it.dr said his concern has been that Butrans isnt covered on Medicaid.i asked dr if he see's patients with BWC or commercial insurance? dr said yes he has those patients.i told dr to focus on these patients and explained butrans patient savings card program for commercial patients to doctor.i asked dr if he could find 1 patient today and start that patient on Butrans? dr said he will consider it if patients are appropriate.we talked about OxyContin being an option for patients,dr said he prescribes a lot of OxyContin and knows who's appropriate and no issues with insurance coverage.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44102	11/11/2011	talked to Deb,Pharmacy Technician,as Vicky(Pharmacy Mgr)was busy with patients,i showed Deb Butrans 7 days a week flashcard and asked Deb what features of Butrans stood out to her? Deb said the fact that Butrans is a patch and once weekly dosing,Deb said there are a lot of patients taking short-acting opioids but not controlled and will sometimes ask pharmacy if they have any ideas on another medication.i asked Deb if she would recommend Butrans and give patients the Butrans patient info booklets so they can talk to their HCP's? Deb said yes she would do that and she would give them to Vicky and see if she's been doing that,Deb confirmed no butrans in stock at the moment,we talked about Butrans formulary coverage,focused Deb on commercial plan patients.i asked who's writing OxyContin in area and Vicky named some physicians i work with in the area so we talked about Q12H dosing of OxyContin and i gave Deb an OxyContin conversion guide and we discussed formulary coverage,Deb said there's not been a lot of NEW Rx for OxyContin,same patients every month getting their OxyContin scripts filled.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44113	11/14/2011	dr said he gave a patient the Butrans patient info booklet and said to talk to Stephanie,MA,who started the patient on Butrans.Stephanie wasnt in office yet.i asked dr what drawbacks he saw in Butrans? dr said no drawbacks,Butrans is a hard sell to patients and takes time to explain.i asked dr if patients have the same pain levels or worse,while taking vicodin daily,does dr believe this is reason for change of medication? dr said no,if patients ask for more pills or pain levels stay the same or worsen,he'll just refill the medication.i asked dr if patients are taking vicodin 5mg daily and thats not controlling their pain,would he consider that patient to start on Butrans or increase dosage strength to vicodin 7.5mg? dr said it depends on patients.i asked dr if there were 1-2 patients this week coming into the office,that he could start on Butrans if patients are taking vicodin daily for their chronic pain but not controlled and asking for something else? dr said he will do that.
PPLPMDL0020000001	Cleveland	OH	44109	11/14/2011	i talked to Adam,Pharmacy Tech,about Butrans scripts here and Adam said he's seen a couple Rx for Butrans,all 3 dosage strengths,but these were patients on high doses of short-acting opiates and some patients were already taking long-acting opioids like Duragesic or OxyContin.i showed Adam BUP3015,dosage ranges discussed opioid experienced patients that were in the clinical trial and appropriate patients for Butrans.Adam was surprised and said he thought because Butrans was a long-acting opioid that it would be in same class as OxyContin and Duragesic.i showed FPI to Adam and we discussed Butrans being a CIII and refills,i asked Adam if he would give patient info booklets to patients that are appropriate for Butrans but not controlled on their short-acting opioids,Adam said yes he will do that.we discussed insurance coverage for Butrans and patient savings cards and Adam said he knows they have electronic vouchers for Butrans.i asked if he's seeing new Rx for OxyContin or same patients monthly? Adam said he's seeing a mix of new Rx for OxyContin,all strengths and still same patients monthly for maintenance therapy,we discussed insurance coverage for OxyContin and i recommended senokot-s and gave protocol pad,Adam said protocol pad will be helpful to patients because they do ask pharmacy questions about i asked Dr about the success he has had with Butrans. He said he has not really given it a fair trial yet. I asked what's holding him back and he said many of his patients that he has seen lately have been on higher doses of opioids and he is switching them to something like OxyContin. I told him not to worry and i know that he will be seeing a few patients this week that are taking tramadol or low dose vicodin that may be appropriate for Butrans. He agreed to start a patient like this. I reviewed the managed care and the Caresource PA and he said that may help him find more appropriate patients.
PPLPMDL0020000001	Lakewood	OH	44107	11/14/2011	dr said his patients are having success on Butrans.1 patient is on Butrans 20mg and doesnt need any short-acting opioid for breakthrough pain.asked dr what real world clinical reductions in pain he's seeing with Butrans,dr said patients with pain levels of 8 are decreasing to 4-5.i asked dr if these reductions were clinically significant? dr said yes.i asked dr if they were clinically significant enough for him to prescribe Butrans? dr said yes dr said he starts patients on Butrans, no refills for any narcotics and follows-up in 4weeks,dr said he only writes tramadol 50mg 4 pills a day,200mg max,when patients have mowed out on that dose he'll consider other options.i asked dr if he would start patients on Butrans,right after tramadol isnt controlling patients pain,instead of starting them on Vicodin? dr said yes he would consider that.gave dr Butrans patient info booklets and asked him to continue starting patients on Butrans,dr said he will do that.
PPLPMDL0020000001	Cleveland	OH	44114	11/14/2011	dr said he's starting patients on Butrans,patients are doing well,he did have 1 patient on Butrans,after 2 weeks,that said she felt weird on Butrans and had weird dreams.dr said Caresource hasnt been covering Butrans,talked to dr about PA requirements for Caresource and asked dr to focus on BWC and commercial plan patients to start on Butrans.i asked dr if he would continue starting patients on Butrans,dr said he will do that.i asked dr to also give patient info booklets to patients when he starts them.dr said they do and he said they are focusing on their perccot patients to convert to Butrans and a few vicodin patients.
PPLPMDL0020000001	Lakewood	OH	44107	11/14/2011	i asked if he had tried any other Butrans patients since the one who got denied and he said he hasn't. I asked what other info id he need for him to try Butrans on a few patients and see how they do. He said he just has to find the right patients. I told him i know he'll see a few tramadol patients this week whose pain is not well controlled. He agreed to try Butrans for these patients. Reminder that OxyContin is still an option that is covered on most managed care plans.
PPLPMDL0020000001	Cleveland	OH	44113	11/14/2011	dr said he's starting patients on Butrans but always a challenge getting PA's approved for Caresource.dr said he'll continue finding patients to start on Butrans but insurance is always a challenge for patients to get their medications.
PPLPMDL0020000001	Cleveland	OH	44114	11/14/2011	john,pa,said he and dr marshall(in the same office together) have been starting patients on Butrans and patients are doing well. John said they are starting the majority of their perccot patients on Butrans and a few patients have been taking vicodin that they have converted to Butrans.John said Caresource is the biggest plan in their office and he's having challenges with coverage,we talked about PA for Caresource and John said he'll keep trying to see if they get Butrans covered.i asked John to continue starting patients on Butrans,John said he will do that.
PPLPMDL0020000001	Cleveland	OH	44113	11/14/2011	deb said she's starting a lot of patients on Butrans,she thinks its a good medication,getting good results from Butrans and its easy to talk to patients about Butrans,Deb said she gives Butrans patient info booklets but would like spanish booklets for patients.i told deb Butrans dvd could be an option for those spanish speaking patients as a visual until there is spanish booklets available,deb said caresource has been the challenge,they're not approving Butrans,explained the PA requirements for Caresource as we understand them.asked deb to continue starting patients on Butrans,she said she will do that.
PPLPMDL0020000001	Westlake	OH	44145	11/15/2011	Spoke with Amid, we reviewed the medication guide for Butrans and appropriate patients. I reminded him that Butrans is a CIII and that it can be called in and refilled. I asked his thoughts and he said it seems like a good option, it has not been moving very much in this store. I asked if would ever give a medication guide and tell the patients to ask their Dr about Butrans, he said he might if he knows the patient. I reviewed the managed care and savings cards for Butrans and OxyContin.
PPLPMDL0020000001	Westlake	OH	44145	11/15/2011	I showed the case studies and asked if he ever sees patients taking tramadol around the clock. He said a few, but many patients are on higher doses of opioids. He said that he sees many patients like the one who was not appropriate for Butrans. I asked if he would start these types of patients on OxyContin and he said he would. I asked Dr where he feels Butrans will fit into his practice, he said probably for patients taking vicodin 3-4 times per day. I asked if he would start these patients on Butrans and he agreed. He said he might also prescribe Butrans when he is trying to taper down the dose of short acting. We reviewed Butrans managed care and Caresource. Angela said that she just got Butrans approved on Caresource with a PA for 3 months.
PPLPMDL0020000001	Mayfield Heights	OH	44124	11/15/2011	Window call.....Discussed the indication and the appropriate patient type for butrans. Gave him formulary grids for oxycontin and butrans as well as the butrans portal leave behind. He said he has not had time to look into "this product".
PPLPMDL0020000001	Cleveland	OH	44113	11/15/2011	reviewed with dr Butrans is transdermal,discussed 7 day dosing,appropriate patients and initiation of Butrans.dr asked how he would taper a patient off 50mcg/hr Duragesic and start that patient on Butrans? i told dr there are no recommendations for titrating down.discussed the more moderate pain patients with dr that he can start on Butrans.i asked dr if he looks at patients insurance before he starts them on a medication? dr said he does look at insurance and asked about coverage for Butrans? gave dr Butrans patient savings cards,discussed savings card plan and asked dr to find a few patients today and this week that he can start on Butrans.dr said he will do
PPLPMDL0020000001	Cleveland	OH	44113	11/15/2011	had lunch with dr farooq,in Lutheran Hospital
PPLPMDL0020000001	Richmond Heights	OH	44143	11/15/2011	Spoke to Mel about the positioning of butrans and the indication. He said he has not seen any scripts recently only a few over all. I referred to the FPI and discussed the section on supplemental analgesia. I explained that supplemental analgesia can be used while on butrans therapy in the event he gets some alert indicating the contrary. He said it has not come up and asked why would there be an alert. Told him not sure but maybe there is confusion between butrans and suboxone.
PPLPMDL0020000001	Westlake	OH	44145	11/15/2011	Quick call with Khyle, we reviewed the medication guide and how to instruct patients about application of Butrans. I asked if she would hand out the booklets to Butrans patients and she said she would. I asked if she might also give the booklets to patients whose pain is not well controlled on their short acting medication. She said she would consider it. Reminder that Butrans has a savings program and OxyContin is covered on most managed
PPLPMDL0020000001	Highland Heights	OH	44143	11/15/2011	Spoke to Debbie about the butrans positioning - after tramadol or before going to vicodin ATC. I showed her the FPI and the allowable use of supplemental analgesics. Let her know that supplementals are ok in case she gets a system alert. She said their system is sensitive and that may happen but she is able to override it. I asked about the oxycontin script volume. She said that they are still seeing plenty. She is seeing more oxycontin in combination with a short acting oxy for breakthrough. Offered savings cards but they were not needed.
PPLPMDL0020000001	Westlake	OH	44145	11/15/2011	Dr on his way out to hospital, I reviewed the managed care for Butrans, he said that he just recently wrote Butrans for a Caresource patient and it went through. I confirmed with Kelly and she said that it did go through with a PA and that it was approved for 6 months.
PPLPMDL0020000001	Mayfield Hts	OH	44124	11/15/2011	Repeat. I asked doc where he thinks he is likely to prescribe butrans. He said probably for newer patients or those that may not have reached chronic meds yet. He said he would write a script today. I asked him to focus on younger than medicare age and give them a savings card. Reminded him of the oxycontin patient type and coverage.
PPLPMDL0020000001	Richmond Heights	OH	44143	11/15/2011	Quick call.....I reviewed the butrans patient type, 7 day delivery and CIII status. I asked him if he has any patients that fit this positioning. He said of course and that butrans is just new to him. I gave him a Butrans portal leave behind and explained that various resources available on the site. Also gave him a formulary grid for oxycontin and butrans.
PPLPMDL0020000001	Cleveland	OH	44113	11/15/2011	asked dr how her patients are doing on Butrans? dr said they are doing well,dr said she likes that Butrans is a CIII,i asked dr why that was important to her? dr said she can call in refills as a CIII so thats easier for her,dr said she wants to use more Butrans in her practice.
PPLPMDL0020000001	Cleveland	OH	44114	11/15/2011	dave,pharmacist,said he's filled Butrans 2x,1 patient is on Butrans 10mcg and doing well,other patient didnt do well on Butrans and dr took off and started on Exalgo.i showed Dave,FPI,noting section 2.4,maintenance of therapy,telling dave he can dispense Butrans with a script for short-acting opioid if patients come into pharmacy with that,Dave said thats fine he has no problem with that,showed Dave Butrans patient info booklet,asked if dave could give patients these if they come in to fill scripts OR if they are complaining to him that their short-acting opioids arent controlling their pain?dave said yes he will do that but patients get a medication guide with FPI,i told dave that was true yet not all patients will look at that,dave agreed.i asked dave if he had Butrans in stock?dave said Butrans 5mcg and 10mcg,we talked about OxyContin stocking and dave said he had all 7 dosage strengths in stock.i asked dave if he had cash paying patients that he could provide OxyContin savings cards to? Dave said no cash paying in his pharmacy.
PPLPMDL0020000001	Mayfield Heights	OH	44124	11/15/2011	Window call...Ask doc how things are going with butrans. She said things are good and asked if there is anything new with butrans. I told her that Caresource is now paying for butrans after failure on tramadol or vicodin. She said she does not have a lot of medicaid. gave her a butrans portal leave behind,butrans and oxycontin formulary grids. Nothing more learned.
PPLPMDL0020000001	Cleveland	OH	44105	11/15/2011	dr said she talked to a few patients a week ago about Butrans,not all patients want to stop taking their pills and try a patch.i talked to dr about starting patients on Butrans and explained she can continue to prescribe opioid or non-opioid therapy with Butrans,showed FPI.dr said she'll talk to patients about Butrans and she's willing to give Butrans patient info booklets.dr asked if Butrans had addiction potential,told dr yes Butrans had potential for abuse,showed fpi.
PPLPMDL0020000001					

PPLPMDL0020000001	Mayfield Hts	OH	44094	11/15/2011	Prospect. I discussed the butrans indication and other selling messages. He asked why should he use butrans over vicodin. I explained that we have no head to head data and asked him what benefits if any he sees in suing a product like butrans. He said he just does not see a place for it in his practice. He prefers to send those patients to pain mgmt. He asked about the cost of butrans. I explained the potential cost for commercially insured patients with a savings card. He said that I could tell him that butrans worked much better or was safer or cheaper he might consider it. I reminded him that oxycontin is still an option for patients that has been well established and well covered by insurance.
PPLPMDL0020000001	Cleveland	OH	44104	11/16/2011	dr said he started another patient on Butrans,dr said patient was taking percocet and not controlled so he wanted to try Butrans and see what happens so far the patient is doing well.we discussed appropriate patients for Butrans,initiation and titration,showed visual aid,focused dr on commercial plan patients and asked dr if he has a couple patients today/this week that he can start on Butrans,like the 2 patients he already started? dr said he probably will have a couple patients that he can talk to about Butrans.told dr he also has option of OxyContin for his patients,dr said he does prescribe OxyContin but not all the time,we discussed formulary coverage and I asked dr to continue starting patients on OxyContin,dr said he will when appropriate.recommended Senokot-5
PPLPMDL0020000001	Westlake	OH	44145	11/16/2011	I asked Dr what information can I give him for him to feel comfortable trying Butrans. He thought for a while and then looked at the initiation guide. I said let me tell you 2 types of appropriate patients for Butrans. The first type is a patient who is taking NSAIDS or celebrex and you can start them on a 5mcg. The other type of patient is one taking tramadol around the clock or 3 5mg vicodin per day whose pain is not well controlled and these patients can start on a 10mcg Butrans. Which of these patients would you try Butrans for, he said the patient who is taking tramadol or low dose vicodin. Dr said that he will give it a try. Dr is having knee replacement surgery
PPLPMDL0020000001	Cleveland	OH	44104	11/16/2011	dr said she's given Butrans patient info booklets to a few patients this week as these patients were asking her for more pills and saying their percocet wasn't lasting long enough so dr thought the booklet would educate them and she's following up with them in 2 weeks.i told dr that was great and asked if she could find 1-2 patients today and tomorrow,similar the one's she gave booklets to,and start them on Butrans? dr said yes if patients are willing to wear a patch she will do that.we talked about section 2.4,fpi,dr wanted to know if she could give immediate release opioid with Butrans? focused dr on commercial plan patients and we discussed OxyContin being an option for appropriate patients.dr said she has a few patients on OxyContin,but not many and prefers not to write a lot of OxyContin,gave formulary grids for OxyContin and discussed coverage with her.recommended dr said she's continually starting more patients on Butrans and she's getting the PA approved for Medicaid patients but not Caresource patients.we talked about appropriate patients,showed visual aid pg.11,that dr can continue starting patients on Butrans.dr said she will start more patients on Butrans as the patients are doing well and they are having improvements in pain.we talked about dr still starting patients on OxyContin,dr said no problems with OxyContin,we discussed OxyContin formulary coverage,recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44103	11/16/2011	talked to dr about Butrans 6 core selling messages,showed visual aid,dr said he's not started anyone on Butrans recently.dr said he's so busy he forgets about Butrans.i asked dr who is the appropriate patient for Butrans,in his mind? dr said patients taking a couple tramadol or vicodin every day and not controlled asking him for something else.i told dr that was great he knew the appropriate patient type,showed dosage strengths in visual aid and asked dr if he could find a couple patients this week to start on Butrans? dr said he will see what he can do and talk to some patients about Butrans.told dr he can give patient info booklets and showed him the booklet,to provide patient education,dr said he will do that as some patients dont want to wear a patch,focused dr on commercial plan patients and we discussed PA requirements for Caresource patients.we talked about OxyContin being an option for patients too and discussed formulary coverage for OxyContin,dr said he writes a lot of OxyContin and will continue doing so.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44104	11/16/2011	reviewed Butrans 6 core selling messages,dr talked about once weekly dosing and Butrans being a CII.i asked dr why these were of importance to him? dr said once weekly dosing could be a great option for those patients who dont want to take pills around the clock,dr said he has some patients like this.dr said the challenge for him is medicare is largest plan here.i asked dr why CII was important? dr said he can call in refills so makes it easier on him and his staff,showed dr BUP3015,discussed appropriate patients and asked dr if he has a couple patients,similar to inclusion criteria? dr said yes he has a lot of them,showed dr 30% clinical reductions in pain and asked if that was clinically significant? dr said yes any reduction in pain is good.i asked dr if this reduction in pain was clinically significant enough for him to prescribe Butrans? dr said he will start more patients if he has any commercial plan patients in the office,again majority are medicare.i told dr that he does have option of OxyContin for those medicare patients and showed formulary grid.dr said he does prescribe OxyContin but more so for his hospice patients.recommended Senokot-5
PPLPMDL0020000001	LAKEWOOD	OH	44107	11/16/2011	Spoke with Pam, we reviewed the Butrans medication guide and I asked if she has a few patients who are taking tramadol around the clock. She said she does, I asked if she would give those patients a Butrans medication guide and tell them to talk to their Dr about Butrans as a possible option. She said she might if she has a relationship with the patient. We reviewed the savings cards for Butrans and OxyContin.
PPLPMDL0020000001	Euclid	OH	44117	11/16/2011	Dabbler. Quick call...I reminded doc that he confirmed that he has many patients taking 300-400mg of tramadol i showed him the initiation guide and asked him to prescribe butrans 10mcg when its time to go to something else. I asked him to try one patient this week. He said he is going to try.
PPLPMDL0020000001	Cleveland	OH	44195	11/16/2011	talked to Stan,Pharmacist,about Butrans stocking and Butrans 6 core selling messages and Stan said he's seeing a lot of Rx's for Butrans.stan said he didnt know who was writing Butrans,asked Stan if he could look this info up? Stan said he couldnt do it today but i can check back next time with Curt,Pharmacy Mgr.we talked about Butrans patient info booklets and asked Stan to focus on application/rotation of Butrans with patients,stan agreed to do this.confirmed stocking of Butrans and we discussed formulary coverage and use of patient savings cards.we talked about OxyContin being an option for patients and we discussed formulary coverage.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44104	11/16/2011	dr said she titrated the 1 patient she started on Butrans and patients doing well.dr said this patient is now taking Butrans 20mcg.i asked dr if she has more patients like this 1 patient,that she can start on Butrans.dr talked about her frustrations with Chronic pain patients and giving them pills,dr focused on her percocet patients.i asked dr since she feels that way,how about trying Butrans on a few patients as its a different option for them.dr said she will think of some patients and start more people its just taking her longer. told dr i understand and asked if she could start a couple patients today and tomorrow on Butrans and focus on commercial plan patients? dr said yes she will do that.we discussed Butrans patient savings card program for commercial plan patients and patient info booklets.recommended Senokot-5
PPLPMDL0020000001	Lyndhurst	OH	44124	11/16/2011	Quick call....i apologized to doc about his previous experience with butrans. I explained to him that for medicare patients it will be expensive and we do not recommend it. Also explained that no patients should be starting on a 20mcg does as it is only a titration dose. He said no problem the patient had tried everything else. I told him butrans is not that type of product and is indicated for more moderate chronic pain, like after tramadol.
PPLPMDL0020000001	Euclid	OH	44119	11/16/2011	Prospect. Let doc know I just had one quick question, "how high do you go on doses of tramadol before switching to something else?" He said 3 times/day. I confirmed that he meant 150mg of tramadol per day. He said Butrans, right? 10mcg? I showed him the conversion guide. Explained that 5mcg is appropriate for that patient. 10mcg starting dose if he titrates to 300mg. Provided formulary grid.
PPLPMDL0020000001	Bedford	OH	44146	11/16/2011	TRIALIST- Dr Moufawwad said that he has not had much more experience with Butrans since our last conversation. He said that other physicians have asked him what his opinion is on Butrans & that he has told them that he thinks it is a good drug. I agreed that many physicians would be interested in hearing his opinion about Butrans. I reminded him that he had told me that he is not accepting many new patients & asked him if he saw Butrans as an option for only new patients. He said no & added that he has existing patients who would probably be good candidates as well. He said that he thinks the right way to initiate treatment is with the 5mcg dose & then give supplemental analgesia in the form of Vicodin or Percocet & then to follow-up with that patient & titrate the Butrans if necessary. I agreed that this would be an effective way to initiate treatment in some patients. He told me that he would be starting to take on potential Butrans patients within the next week or two & said he wants to get more experience with Butrans.
PPLPMDL0020000001	University Hts	OH	44118	11/16/2011	Prospect. I discussed the indication, CII status, 7 day delivery, and positioning of butrans. I asked doc where he sees it fitting it into his practice. He said he has offered it to maybe 2 patients and they did not want to give up their pills (percocet). I explained that he may have better luck starting butrans for someone that has not gotten to the point of taking tablets around the clock and to think of butrans more for patients failing on tramadol. He asked if butrans shows up in a standard drug screening. Told him that he may have to test specifically for it in a urine screen. He also wanted to know about which pain mgmt docs are using it as he often refers to Yokiel and demangone. I explained that many of the pain mgmt docs are prescribing. I reviewed the conversion guide and the appropriate starting dose of 10mcg if starting a patient that has failed tramadol. He said he has a better idea of where to use butrans now and he will try it. I reviewed the coverage and savings cards. Reminded him of the oxycontin patient type and the preferred coverage over 92% nationally.
PPLPMDL0020000001	Cleveland Hts	OH	44118	11/16/2011	Spoke to Saurab about the key selling messages of butrans including the positioning before going to vicodin ATC. I asked him how often does he see vicodin being refilled month after month. He said it is common. I gave him a patient info guide and asked him to consider giving it to a patient to let their doctor know about another option. He said maybe, if a customer asks.
PPLPMDL0020000001	University Heights	OH	44121	11/16/2011	I told doc that I understand his concern about the cost of butrans to his patients. I reminded him that butrans is being paid by caresource after failure on tramadol/vicodin. He asked about Prior auths. I told him it will likely require a PA but should go through fine. He said he is already doing too many prior auths especially for oxycontin. I tried to empathize with the volume of prior auths. He said we'll see.
PPLPMDL0020000001	Cleveland	OH	44103	11/16/2011	talked to Amy,Pharmacy Manager,about Butrans 6 core selling messages.Amy said she likes that Butrans is a patch as some patients may prefer this.Amy said once weekly dosing could also be appropriate for some patients.i asked Amy if she has given Butrans patient info booklets to patients,so they can talk to their doctors? Amy said yes she's given a few booklets out to patients and will continue to give them out.we discussed formulary coverage for Butrans.confirmed OxyContin stocking and formulary coverage.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44106	11/16/2011	discussed Butrans 6 core selling messages with dr,dr focused on Butrans transdermal delivery and once weekly dosing.i asked dr if he has any patients,similar to the BUP3015 inclusion criteria? dr said yes he has a lot of patients like this.i asked dr if he would start a couple patients today on Butrans,that are similar to this and appropriate for Butrans? dr said if patients are taking vicodin or percocet and not controlled,asking him for more pills,he's talking to them about Butrans.i asked dr if he will continue starting more patients on Butrans,dr said yes he will. focused dr on commercial plan patients and discussed PA requirements for Caresource patients.we talked about OxyContin being an option for patients and showed formulary grid.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44127	11/17/2011	showed visual aid,discussed 5 core selling messages with dr as dr could only remember that Butrans was a patch for chronic pain.focused discussion on indication,appropriate patients-opioid experienced patients and asked dr if he has patients like this? dr said yes she has a lot of patients taking tramadol,codeine,vicodin,and she could think of patients to start on Butrans.dr said her challenge is medicaid coverage of Butrans.we talked about Caresource patients trying Butrans and i talked to Josie,MA,about Caresource requiring a PA for Butrans,Josie said ok she'll see if she can get it approved for a few patients.i discussed initiation and titration of Butrans with dr and showed dr Butrans patient info booklet focusing on application/rotation of Butrans section.i asked dr if she could start 1-2 patients today or tomorrow on Butrans? dr said yes she'll see who comes into the office and talk to them about Butrans.recommended Senokot-5
PPLPMDL0020000001	Brooklyn	OH	44144	11/17/2011	Another floater pharmacist was in today. Discussed Butrans 5 core messages & reviewed appropriate patient type, positioning Butrans for patient after tramadol or Vicodin. Discussed once weekly transdermal system & titration after day 3. Also let her know patients can take supplemental analgesia in form of immediate-release opioid or non-opioid medications. She said she has seen it on the shelves. Discussed savings through e-voucher for Butrans & savings cards for OxyContin.
PPLPMDL0020000001	Parma	OH	44129	11/17/2011	NON-PRESCRIBER- Reminded Dr Paat & Dr Tolentino of 5 Butrans core messages, also reminding them that Butrans is a CII opioid with abuse/addiction potential just like other opioids. I asked them why they thought they hadn't found any patients for it yet. Dr Paat said she doesn't know. He repeated back that Butrans is once weekly. I told him this is correct. He asked if he could use it instead of Duragesic. I showed him initiation guide & pointed out appropriate range of patients, recommending OxyContin for appropriate patients beyond Butrans. Reviewed dosing & titration after 3 days as well as ability for patients to take supplemental analgesia if necessary in the form of immediate-release opioids or non-opioids. Dr Paat asked about side effects. Showed him AE's in main visual aid & asked if there was anything he wouldn't expect from an opioid. He said no. He asked about application sites. Showed him 4 recommended sites. Also began "Initiations" program to reinforce appropriate patient type. I asked if he had patients like this & he said yes. Discussed patient counsel & setting patient expectations appropriately. Discussed insurance coverage & savings cards where eligible. Shari told Dr Paat that they have the cards & she knows where they are. I asked again if he had patients he could try Butrans on & he
PPLPMDL0020000001	Parma	OH	44129	11/17/2011	NON-PRESCRIBER- Reminded Dr Paat & Dr Tolentino of 5 Butrans core messages, also reminding them that Butrans is a CII opioid with abuse/addiction potential just like other opioids. I asked them why they thought they hadn't found any patients for it yet. Dr Tolentino said she doesn't know & added that she always forgets. Reviewed appropriate patient I showed initiation guide & pointed out appropriate range of patients, recommending OxyContin for appropriate patients beyond Butrans. She said that she can see using Butrans for more moderate pain. I told her this is an ideal place to start. Reviewed dosing & titration after 3 days as well as ability for patients to take supplemental analgesia if necessary in the form of immediate-release opioids or non-opioids. Began "Initiations" program to reinforce appropriate patient type. I asked if she had patients like this & she said yes. Discussed patient counsel & setting patient expectations appropriately. She agreed that this is very important. Discussed insurance coverage & savings cards where eligible. Cathy said she knows where they are. I asked again if she had patients he could try Butrans on & she said yes.

PPLPMDL0020000001	Cleveland	OH	44130	11/17/2011	TRIALIST- Reminded Dr Fedorko of our previous conversation & asked him if he still remembers that Butrans is CIII. He said yes. He then told me he thought he had a patient for Butrans but that patient ended up having Medicare D, so he did not get it. I asked him to tell me about the patient. He said the patient had chronic pain & was taking Duragesic 50mcg. I told him this patient may not be a candidate for Butrans because of his current opioid dose, not because of managed care. Attempted to reinforce appropriate patient type, reminding Dr Fedorko that Butrans may be appropriate for patients who are not well controlled on tramadol or Vicodin. Reminded him that patients beyond 80mg equivalent morphine per day were possibly candidates for OxyContin instead. He kept mentioning the patient on fentanyl 50mcg. I kept trying to tell him that this patient was probably beyond the range of Butrans appropriate patients. Also reinforced CIII & Butrans managed care/savings cards. He also showed me that he has been giving out Ryzolt savings cards but said that insurance is not paying for it. I agreed that this can be challenging & asked him to focus instead on Butrans.
PPLPMDL0020000001	Parma	OH	44129	11/17/2011	TRIALIST- Dr Gigliotti said he just has not had any "Butrans people" for me. I asked him what happened & reminded him that he had told me last time that he was certain he would have some people coming in. He said he has not been writing many new long-acting pain medications recently. I asked him why it needed to be someone new. He asked if I meant to switch someone over. I suggested switching someone who was on tramadol or Vicodin & asked if that sounded realistic. He said maybe. I asked if he would switch someone from tramadol to Butrans. He said no & added that he would go to Vicodin first. I asked him why, if he doesn't like having patients on Vicodin, as he has told me in the past. I added that Butrans is just as abuseable as any other opioid & that he should use just as much caution in writing. He said because it is short-acting & you don't always know if a painful condition is going to be acute or chronic. I asked how long he would have to have someone on Vicodin before switching to a long-acting. He said it depends- probably 3-4 months. I suggested switching sooner, since he has told me how difficult it can be to switch someone once they are "used to" taking short-acting pain medication around-the-clock. He agreed that this would be reasonable. He asked if Butrans was covered on Medicaid. Discussed coverage & reminded him of OxyContin for appropriate patients beyond Butrans.
PPLPMDL0020000001	Cleveland	OH	44130	11/17/2011	TRIALIST- I reminded Dr Kansal of recent Medicaid update & reviewed prior authorization requirements. I asked if this meant anything to him. He said it is good when something is paid for by Medicaid. I asked him if he pays attention to what insurance patients have when he is prescribing. He said no. I asked him what downsides of Butrans he saw. He said every medication has downsides. I agreed & told him I was not suggesting that Butrans was an exception to that rule, adding that Butrans is a CIII opioid & carries abuse/addiction potential. Discussed once weekly dosing in transdermal form & reviewed appropriate patient type. Also reminded him of OxyContin
PPLPMDL0020000001	Cleveland	OH	44195	11/17/2011	worked apm dept-left Butrans fpi,formulary grid,patient savings card flashcard,BUP3015 and my business card for DR.Mekhal,Dr.Minzter,Dr.Vrooman. worked chronic pain and neurology-left same info for Dr.Covington,Dr.Mathews,DR.Bamford,Dr.Kriegler,Dr.Mays,DR.Stillman. worked rheumatology dept-left SAME info for Dr.Calabrese,Betsy Kirschner,NP,Patty Paczos,PA,Dr.Long,Dr.Chatterjee
PPLPMDL0020000001	Cleveland Hts	OH	44118	11/17/2011	Quick call...I asked doc if he previously discussed patient was able to get butrans after all. He said the patient ended up going to CVS but it was still \$50. He was not prepared to pay the \$50 so he left it there. He said the patient may still get it eventually. I reminded him that oxycontin is and option for more severe pain and widely well covered.
PPLPMDL0020000001	Lakewood	OH	44107	11/17/2011	I asked Dr if he had other patients in mind to start on Butrans, he said he would think about it. He asked about managed care coverage and I asked what plans he sees the most, he said anthem, and Medicaid and Medicare. I reviewed the managed care for Butrans and the savings program with Dr and Pat. I asked to scheduled an appointment to gain more time, Pat said that they may be able to next month.
PPLPMDL0020000001	Lakewood	OH	44107	11/17/2011	Quick call, I reviewed the Caresource and Medicaid managed care info with Dr and his staff. I asked Dr if he would start a few patients on Butrans and let me know is experience with getting it covered, he agreed.
PPLPMDL0020000001	Westlake	OH	44145	11/17/2011	Dr and I reviewed the inclusion criteria and I asked if he treats these conditions differently. He said that depending on the condition, some are able to be helped with procedures, while others do not respond as well. We reviewed Butrans as an option for treating pain associated with these types of conditions and I asked if he would start a few new patients. He agreed.
PPLPMDL0020000001	Cleveland Hts	OH	44118	11/17/2011	Window call...I asked doc if he sees any advantages to a once a week pain for the mgmt of moderate ATC pain. He asked, "once a week? how much does it cost." I gave him a formulary grid for butrans and oxycontin. I also gave him a invite to the butrans portalto learn more at his convenience. No commitment.
PPLPMDL0020000001	Brooklyn	OH	44130	11/17/2011	Spoke with Renee' who said she didn't have any Butrans updates since my last visit. Reminded her of ability of patients to take supplemental analgesia with Butrans & showed FPI 2.4 to support messaging. She said she is aware. Also reminded her of automatic savings through e-voucher for Butrans & OxyContin savings cards.
PPLPMDL0020000001	Cleveland	OH	44103	11/17/2011	talked to dr about 6 Butrans core selling messages,asked dr what features of Butrans stood out to him? dr said he likes that Butrans is a patch and once weekly dosing is a good option for some patients.dr said his biggest challenge has been medicaid not covering Butrans.dr said he knows dr boyd(in his office)has gotten a few Caresource patients started on Butrans,after a PA,so he may consider starting a few patients and see what happens.showd dr visual aid for discussion,focused on opioid experienced patients,initiation and titration of Butrans and I asked dr if he could start 2 patients today or tomorrow on Butrans? dr said he will see who comes in office and talk to some patients about Butrans.we talked about OxyContin being an option for patients,discussed formulary coverage and asked dr to continue starting patients on OxyContin,dr said he will do that as he doesnt have problems getting OxyContin covered.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44103	11/17/2011	talked to Abdul,Pharmacist,about Butrans Rx,he's not seen anything recently.I asked Abdul if patients are taking immediate release opioids and not controlled,has he been recommending Butrans for them? Abdul said yes he's giving patient info booklets to patients and telling them to speak with their HCP's.we discussed 6 Butrans core selling messages and I asked what features of Butrans stood out to him? Abdul said he likes that Butrans is transdermal and dosed once every 7 days.Abdul said some patients may prefer a patch and once weekly dosing.I asked Abdul to continue recommending Butrans for patients,Abdul agreed to do this.I asked Abdul if he's seeing new Rx for OxyContin or same patients monthly getting OxyContin? Abdul said not many new Rx for OxyContin,they are seeing a lot of Opana ER and same patients monthly for OxyContin.we talked about insurance coverage for OxyContin and gave Abdul formulary grids for OxyContin.
PPLPMDL0020000001	Cleveland	OH	44114	11/17/2011	i talked to Laura,Pharmacy Mgr,about Butrans 6 core selling messages,showed visual aid and asked Laura what features stood out to her? Laura said transdermal delivery and once weekly dosing of Butrans.Laura said she thinks Butrans is a good product,just hasn't seen any scripts for Butrans.Laura said she'll order Butrans once she gets her 1st Rx.we talked about formulary coverage for Butrans and discussed how OxyContin is an option for patients.Laura said she's still seeing OxyContin Rx but not many new Rx,just same patients getting their scripts filled monthly for OxyContin.I asked Laura who were some of the big tramadol and vicodin writers in the area? Laura said dr patel,dr katz,dr marshall,dr nickels and some cleve clinic hcp's.i asked Laura if she would give Butrans patient info booklets to patients if they are taking immediate release opioids daily but not controlled? Laura said she would be willing to do that.we discussed OxyContin coverage and recommended senokot-5
PPLPMDL0020000001	Cleveland	OH	44130	11/17/2011	TRIALIST- I asked Dr Diab what downsides or limitations he saw with Butrans. He said cost. I asked what he meant. He said insurances aren't paying for it. Showed Butrans formulary grid & discussed coverage, pointing out tier 3 co-pay. He said that is the problem- that insurance companies tell him they want tier 1 or tier 2 medications first. I told him this should not be the case with commercial insurance plans. He said then when patients go to pick up the medication it is too expensive because a tier 3 co-pay is high. I showed him his Butrans savings cards & let him know commercially insured patients & those who pay cash can use them to save \$40 per month off their co-pay, bringing them down to a \$15 or \$20 co-pay. I asked if this was reasonable. He said yes. Also pointed out his OxyContin savings cards & asked him to give them out as well.
PPLPMDL0020000001	Cleveland	OH	44112	11/17/2011	Doc said he wrote a script for butrans a couple of weeks ago. I asked him to tell me about the patient. He the patient was taking a few tabs of percocet but he has not heard back from him and not sure if he even got it filled. He did not remember what strength he wrote for. I reviewed the 5 and 10mcg starting dose. I encouraged him to focus on commercially insured patients. He said he did and gave a savings card. I explained that if they are taking more than 80mg of a morphine equivalent, they are probably more appropriate for oxycontin.
PPLPMDL0020000001	Cleveland	OH	44113	11/17/2011	dr said he gave 1 patient info booklet out today,so patient will return in 2 weeks for a follow-up appointment and let dr know if he's interested in starting on Butrans.I asked dr why he chose to discuss Butrans with this patient? dr said the patients been taking vicodin daily for his chronic pain and wanted more pills and BWC is asking doctors to write less pills and Vicodin is 1 of the medications on the BWC list.dr said he thought Butrans could be an option for him.dr said he's been giving booklets to patients all week.dr said he also had a patient that he wanted to start on Butrans,gave her a script for Butrans and patient info booklet but the patient saw her primary care dr and this primary care dr said he didnt know enough about Butrans to allow her to start on the medication and told the patient she was not allowed to start on Butrans.i asked dr if he'll continue giving Butrans patient info booklets out to patients today and tomorrow and start 1patient? dr said yes he will give booklets out and if 1 patient's interested in starting on Butrans,he'll start that patient.we talked about OxyContin being an option for patients and I asked dr if he had any cash paying or commercial plan patients? dr said he has a few cash paying patients that were BWC but now are self-pay.i asked dr if OxyContin savings cards would be valuable for these patients? dr said yes he will take them,explained savings card program and recommended Senokot-5
PPLPMDL0020000001	Independence	OH	44131	11/18/2011	NON-PRESCRIBER- Quick call as I caught Lisa in the window. She said she doesn't have anyone on Butrans. Positioned Butrans for patients for patients whose chronic tramadol around-the-clock is not controlling their pain. Also offered savings cards for Butrans & OxyContin. She said they did not need either. Spoke with Maria & gave her "Experience" invites & asked her to give one each to Dr Keppler, Lisa, & Roman. She agreed.
PPLPMDL0020000001	Cleveland	OH	44113	11/18/2011	talked to dr about who the appropriate patient is for Butrans, dr said she has patients taking tramadol that arent controlled and are always asking for more pills or asking for a different opioid like vicodin or percocet,she thinks Butrans could be an option.dr said its tough to get patients off the pills as they are attached to them.showed fpi,talked to dr about starting 1-2 patients on Butrans and still giving immediate release opioid,dr said ok and committed to starting a few patients.recommended Senokot-5
PPLPMDL0020000001	Garfield Hts	OH	44125	11/18/2011	NON-PRESCRIBER- I reminded Dr Sadowski of my last visit when he was going to put a patient on Butrans & asked him what happened with her. He said he did not end up giving it to her. I asked him why not. He said she was not interested in trying a patch. He then walked out of the office. Spent time with Deena, reviewing dosing, savings cards, & appropriate patient type.
PPLPMDL0020000001	Shaker Heights	OH	44122	11/18/2011	Spoke with Doug, pharmacist, & showed him Butrans FPI 2.4, discussing supplemental analgesia with Butrans. He said they probably do have an alert because they seem to have one for everything. He said he has not dispensed any Butrans yet. Discussed appropriate patient type & then he got called away to deal with a customer issue. Gave him OxyContin savings cards.
PPLPMDL0020000001	Parma	OH	44129	11/18/2011	Spoke with floater pharmacist. Discussed Butrans 5 core messages as she said she could use a "refresher" but has seen it at some of the stores. Reviewed appropriate patient type & ability of patients to take supplemental analgesia with Butrans in the form of immediate-release opioids or non-opioid medications. Also discussed OxyContin savings cards for patients who have commercial insurance or who are cash-pay.
PPLPMDL0020000001	Cleveland	OH	44113	11/18/2011	I reviewed BUP3015 with Dr.I asked if he felt a 30% reduction in pain was clinically significant? Dr agreed it was. I asked Dr if he saw this with short acting opioids,dr said no. Pain is usually same or worse. I explained a 30% reduction in at least 50% of patients is what he may expect to see with Butrans according to our data.I left dr BUP3015 brochure.I asked Dr. to start 1-2 patients before I see him again next Friday,dr committed.
PPLPMDL0020000001	Cleveland	OH	44113	11/18/2011	worked premier physician offices
PPLPMDL0020000001	Cleveland	OH	44113	11/18/2011	dr said she's been giving Butrans patient info booklets to read and follow-up in 2 weeks to see if they are interested in starting,dr said these were vicodin patients that wanted more pills and some asked for percocet,dr said she told them Butrans was an option for them as she wasnt going to give them more pills or convert them to percocet.showed visual aid,opioid experienced patients and asked dr to start 1-2 patients today on Butrans,dr committed to this,focused dr on commercial plan patients.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44109	11/18/2011	dr said he's starting more patients on Butrans,patients are doing well no complaints. dr wanted Butrans patient info booklets and I asked dr if he will continue starting patients on Butrans today and next week? dr committed to do so,focused dr on commercial plans.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44109	11/18/2011	talked to dr about BUP3015, 30% reduction in pain and asked dr if he's seeing this in patients taking immediate release opioids? dr said no,usually patients have the same level of pain or worse.i asked dr to start 1-2 patients before I see him again next week? dr committed to do this,dr said he's given a few booklets out this week for patients to learn more about Butrans and is following up with them in 2 weeks.focused dr on commercial plan patients.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44109	11/18/2011	worked pm&R - see call notes,worked internal medicine-left Butrans fpi,patient info booklet,BUP3015,formulary grid and my business card for dr.lindheim,dr.ricanati,dr.jones,dr.gelehrter,dr.mccreery and dr.harrington.
PPLPMDL0020000001	Parma	OH	44129	11/18/2011	NON-PRESCRIBER- Quick call. I reminded Dr Roheny how excited he seemed when I had told him last time that coverage for Butrans was improving & that Medicaid plans have been paying for Butrans. He said he had forgotten. He asked me if I was talking about Medicaid or Medicare. I told him Medicaid. He said that is great news & then walked away. Quickly reminded him of OxyContin favorable managed care coverage.

PPLPMDL0020000001	Cleveland	OH	44109	11/18/2011	showed dr BUP3015,discussed 30% reduction in pain and i asked dr if that was clinically significant? dr said yes it was.i asked dr if he see's a 30% reduction in pain with immediate release opioids? dr said no,usually doesnt happen.i asked dr if 30% reduction in pain was clinically significant enough for him to prescribe Butrans? dr said yes if patients are willing to wear a patch.dr said he keeps thinking Butrans is more on the severe end of pain and is thinking of it the same way as Duragesic.i asked dr to expand on this comment.dr said Duragesic is a patch and long-acting opioid.i told dr that Butrans is the 1st and only long-acting opioid in the CII class,what that means is that he can call in refills if he chooses to do so,dr said he doesnt call in refills patients have to come to office for their narcotics Rx.i showed dr dosage ranges for immediate release opioids where Butrans is appropriate and we discussed titration.i asked dr if he can start 1-2 patients before i see him again next week? dr said he will try his best and see what he can do.focused dr on BWC and Commercial plans.we talked about OxyContin being an option for patients,dr said he writes a lot of OxyContin,its a good long-acting opioid,it works and its covered by most insurance companies.i asked dr to continue prescribing OxyContin,dr said he will do dr said he gave a few Butrans initiation booklets to patients this week.i asked dr why he chose to discuss this with patients? dr said a couple patients were taking tramadol daily but asking for more pills and 1 patient wanted to start on vicodin,dr told the patients he wasnt comfortable doing this and wanted them to read about Butrans and he's following up in 2 weeks.i asked dr if he could think of a commercial plan patient,like the one's he gave booklets to this week,that he can start on Butrans? dr said he will see who comes in and if appropriate he'll start them.we discussed initiation and titration of Butrans and focused dr on commercial plan patients.we talked about OxyContin being an option for patients and dr said he writes a lot of OxyContin and will continue doing that.we discussed OxyContin insurance coverage.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44113	11/18/2011	REPEAT CUSTOMER- Spoke with Darlene(RN), who said Dr Tabbaa was unavailable today to see me. I reviewed Butrans core messages with her & asked if they needed Butrans or OxyContin savings cards. She said she did not know as he would be the one to speak with about this. I asked if she would give him an initiation/titration guide for Butrans & she agreed. She said to try back another week.
PPLPMDL0020000001	Beachwood	OH	44122	11/18/2011	talked to Ray,Pharmacist,about Butrans stocking and Ray said he's not seen any scripts for Butrans.we talked about 6 core selling messages,showed visual aid and asked Ray what features of Butrans stood out to him? Ray said transdermal delivery,the fact that Butrans is a patch could be an option for some patients and that Butrans is dosed once a week.i asked Ray if he would be willing to give patients a Butrans patient info booklet,if patients are taking immediate release opioids but not controlled,and they can talk to their HCP's about Butrans? Ray said yes he will do that.we discussed Commercial plan patients and BWC. we talked about OxyContin scripts and how most of them are same patients monthly,not a lot of new Rx for OxyContin.confirmed stocking and we discussed formulary coverage for OxyContin.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44109	11/18/2011	i talked to Chris,Pharmacist,about Butrans stocking and 5 core selling messages,Chris said they are getting scripts for Butrans and some are coming from PM&R, Internal medicine and rheumatology,Chris said he doesnt know specific HCP's writing but he knows they have Butrans in stock and are giving the Butrans patient info booklets out to patients.focused Chris on application/rotation of Butrans section,in booklet and asked chris to discuss with patients,Chris committed to do this.i asked if Rob,Pharmacy Manager was in office and Chris said he was gone for the day catch him next week.i asked Chris if he would give patient info booklets to patients,to talk to their HCP's about Butrans,if they arent controlled on their immediate release opioids? Chris said he'll give them out but i need to speak with Rob about this next week.
PPLPMDL0020000001	Independence	OH	44131	11/18/2011	NON-PRESCRIBER- Quick call- Positioned Butrans for patients if tramadol or Vicodin 3 times per day were not controlling a patient's moderate to severe chronic pain & reminded Dr Jack of once weekly dosing. Spoke with Maria who said that they would be limiting seeing the doctors due to their busy schedules. Unable to schedule lunches at this time as well.
PPLPMDL0020000001	Cleveland	OH	44111	11/21/2011	Spoke with Dave, we reviewed Butrans medication guide and how to teach patients about proper use and application. I reviewed that Butrans is a CII and that Butrans can be used with short acting supplemental analgesia. I asked if he would ever hand a patient a medication guide and recommend Butrans for an appropriate patient and he said he would. Reminder that OxyContin is an option.
PPLPMDL0020000001	Lakewood	OH	44107	11/21/2011	Spoke with Heather, I reviewed the Butrans medication guide and how to teach patients about the proper use and application of Butrans. I reviewed that Butrans is a CII and can be called in and written refills. We discussed the use of Butrans with supplemental analgesia. I asked if she has any patients who come in each month to refill their tramadol who might benefit from Butrans. She said she will keep it in mind.
PPLPMDL0020000001	Lakewood	OH	44107	11/21/2011	I asked Aduwa if she would ever recommend Butrans for a patient and give them a medication guide. She said she would probably leave it up to the Dr. I asked how often she consults with patients and she said only if they ask for her. I reviewed the medication guide and use of short acting supplemental analgesia with Butrans. Reminder that OxyContin has 7 tablet strengths and is still a long acting options.
PPLPMDL0020000001	Cleveland	OH	44106	11/21/2011	dr said he could only remember the name Butrans and that it was a transdermal medication,nothing else,dr said he needs to know who is the appropriate patient,what are the side effects and who covers Butrans? showed dr FPI and visual aid,discussed appropriate patients-focused on opioid experienced patients and showed dr side effect profile,i asked dr if there were any side effects of Butrans that surprised him? dr said no typical opioid side effects except for the application site pruritus but dr said he understood that side effect was there because Butrans is a patch.showed formulary grid to dr and focused dr on commercial plan patients and use of Butrans patient savings cards,dr said 70% of the patients he treats at Main Campus are Medicare and 30% are Medicaid.we talked about PA for Caresource patients.i asked dr if he could start 1-2 patients on Butrans this week,dr committed to doing this.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44106	11/21/2011	dr said he hasnt started anyone recently on Butrans and needs people to remind him about Butrans.dr said its just easy for him to write tramadol or vicodin because thats all he's had for his patients in the past.dr said he likes that Butrans is the 1st and only long-acting opioid in the CII class so that does make a difference. I showed dr BUP3015,asked if he see's 30% clinical reductions in his patients pain levels with short-acting opioids? dr said no he doesnt see that,told dr he can expect to see that with Butrans,we discussed study in more detail and appropriate patients and i asked dr if he had a few patients in mind that he could start on Butrans this week? dr said he will do his best as he's sure there are plenty of appropriate patients.focused dr on commercial plan patients and discussed PA for caresource patients.we also talked about OxyContin being an option for patients,7 tablet strengths and formulary coverage for OxyContin.recommended Senokot-5
PPLPMDL0020000001	Parma	OH	44129	11/21/2011	NON-PRESCRIBER- Reviewed 5 core messages with Lucy & discussed Butrans as a long-acting CII option for appropriate patients. Spent time going over appropriate range of patients for Butrans. She said she does not have a lot of patients on opioids. Reviewed "Initiations" presentation case study of "Evelyn" & asked if that sounds like a reasonable patient type that she might see & she said yes. Discussed Butrans as a once weekly transdermal option for those patients. Also reviewed managed care coverage & discussed OxyContin as a CII opioid.
PPLPMDL0020000001	Lakewood	OH	44107	11/21/2011	I asked Dr what the downside is to trying Butrans. He said he will look for the right patient. I asked who he is thinking, he said moderate pain patient taking vicodin. I reminded him that tramadol patients may also be appropriate patients for Butrans. I asked if he would try this type of patient this week and he agreed. Reminder that OxyContin is still a long acting option.
PPLPMDL0020000001	Cleveland	OH	44106	11/21/2011	dr said he hasnt started anyone on Butrans yet because he doesnt have a lot of patients taking narcotics.dr said he likes that Butrans is a patch and dosed once a week and is happy to have a long-acting opioid in the CIII class.dr said they dont normally call in refills for narcotics BUT the fact that he could for Butrans is a plus in his mind.dr asked who the appropriate patients were for Butrans and who covers Butrans? showed initiation guide and visual aid,appropriate patients section-focused on opioid experienced patients and we discussed initiation and titration of Butrans.i asked dr if he had a few patients this week that he could start on Butrans? dr said he may but wasnt sure,but he'll start a couple people and see how they respond to Butrans.focused dr on commercial plan patients and explained Butrans patient savings card program.recommended Senokot-5
PPLPMDL0020000001	Parma	OH	44129	11/21/2011	NON-PRESCRIBER- I reminded Dr Kushnar of our previous lunch when he told me about a patient who was taking tramadol around-the-clock but not getting pain relief, for whom she was going to prescribe Butrans. She said she had forgotten & that she forgets who the patient even was now. Reinforced appropriate patient type & reviewed appropriate range of Butrans patient, discussing OxyContin as an option for patients beyond Butrans. Also showed initiations program & asked if the patient "Evelyn" sounded like any of her patients. She said yes. She reminded me that she does not prescribe a lot of opioids. I asked her if she does have patients for whom she refills Vicodin or tramadol monthly. She said yes. I asked her if an appropriate patient presents, if she feels comfortable enough with Butrans that she would prescribe it for them. She said yes. She asked about managed care coverage. Discussed commercial & Medicaid coverage/prior authorization requirements where applicable. Also discussed savings cards. Discussed OxyContin 7 tablet strengths for appropriate patients.
PPLPMDL0020000001	Lakewood	OH	44107	11/21/2011	I showed the inclusion criteria and asked Dr his thought on using Butrans for these patients. He said he would if the patient is already not on high doses of other opioids when they come to him. I asked Dr if he would write Butrans for an appropriate patient today, he said that he will. Reminder that OxyContin is still a long acting option that is covered on most managed care.
PPLPMDL0020000001	Cleveland	OH	44109	11/21/2011	I talked to Ron,Pharmacist,about Butrans stocking and 6 core selling messages,showed Ron visual aid and asked what features of Butrans stood out? Ron said transdermal technology and once weekly dosing,Ron said there are a lot of patients taking short-acting opioids that arent always controlled and may have an interest in hearing about a patch like Butrans.i asked Ron if he would give these types of appropriate patients a Butrans patient info booklet so they can talk to their doctors about Butrans? Ron said he would do that.we discussed OxyContin stocking and i asked if there are new Rx for OxyContin? Ron said rarely a new Rx for OxyContin,usually the same patients getting OxyContin monthly.we talked about insurance coverage for OxyContin and i recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44104	11/21/2011	dr said the 1 patient on Butrans is doing great so she's happy.i asked dr if she has more patients like this 1 patient,to start on Butrans this week? dr said she has a lot of patients taking vicodin and percocet that meet the Butrans indication but not all patients want to stop taking their pills and wear a patch.i showed dr fpi,2.4 maintenance of therapy,and told dr she can give these patients immediate release opioid or non-opioid therapy,dr said ok she will think about it and talk to some patients.focused dr on commercial plan patients and discussed PA for Caresource with dr.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44113	11/21/2011	dr said she has a few patients on Butrans and they are doing well.dr said she hasnt seen anyone lately that she can start on Butrans because majority of her patients are medicaid and medicaid not been covering Butrans.i talked to dr about PA for stated medicaid patients and PA for Caresource patients.showed dr BUP3015,discussed 30% clinical reduction in pain,and asked dr if this was clinically significant? dr said yes any reduction in pain is good for her patients.i asked dr if 30% was clinically significant enough for her to prescribe Butrans? dr said yes and she will continue starting patients on Butrans when appropriate.focused dr on commercial plan patients so they can use Butrans patient savings cards.recommended Senokot-5
PPLPMDL0020000001	South Euclid	OH	44121	11/21/2011	Window call...Reminded doc of the butrans patient type, once weekly dosing, and CII status which means it can be called in and refilled. Provided Butrans portal invite and formulary grid. Nothing learned.
PPLPMDL0020000001	Cleveland	OH	44121	11/21/2011	Window call...Reminded doc of the butrans patient type, once weekly dosing, and CII status which means it can be called in and refilled. Provided Butrans portal invite and formulary grid. Nothing learned.
PPLPMDL0020000001	Cleveland	OH	44111	11/21/2011	I asked Dr where he feels Butrans will fit into his practice. He said that probably not as much when he is treating cancer patients because he likes to have a more flexible dose, but maybe for patients with more moderate pain after procedures are not relieving their pain. I asked if he would try Butrans for some of these patients and he agreed. I reminded him that OxyContin has 7 strengths for treating his patients pain who have cancer.
PPLPMDL0020000001	Lakewood	OH	44107	11/21/2011	I reviewed the managed care for Butrans and asked Dr if he would write Butrans for a few new patients this week. He said that he would. He has a patient he is going in to see now who is on percocet and he will discuss it with them. I reviewed how to initiate Butrans and gave him the savings cards and patient information.
PPLPMDL0020000001	Cleveland	OH	44113	11/21/2011	dr said he's talking to patients about Butrans and if patients are willing to start on Butrans,he will start them.focused dr on opioid experienced patients,visual aid,dr said patients taking 20-25mg vicodin daily are who he's thinking of instead of pushing the vicodin dose up.i told dr that was good and i am looking forward to hearing more about his patients experiences with Butrans.focused dr on commercial plan patients.
PPLPMDL0020000001	Lakewood	OH	44107	11/21/2011	I reviewed the managed care for Butrans, commercial insurance with as low as a \$15 copay, and Medicaid/Caresource. I asked if she has some Medicaid patients where Butrans may be appropriate and she said she will keep it in mind. I reminded her that OxyContin is an option that is covered on Med D AARP and most managed care plans.
PPLPMDL0020000001	South Euclid	OH	44121	11/21/2011	Window call...Reminded doc of the butrans patient type, once weekly dosing, and CII status which means it can be called in and refilled. Provided Butrans portal invite and formulary grid. Nothing learned.
PPLPMDL0020000001	Parma	OH	44129	11/21/2011	NON-PRESCRIBER- Quick call- Caught Dr Taylor briefly between patients. She said she has not gotten any Butrans feedback yet but will keep it in mind for other patients that she sees. She also added that she had just prescribed OxyContin for the last patient she saw.
PPLPMDL0020000001	Cleveland	OH	44113	11/21/2011	talked to Deb,PA,about all of the patients she's starting on Butrans.Deb said its easy, she gives Butrans patient info booklets to patients,shows the application sites to patients and discusses rotation of Butrans and side effects of Butrans.Deb said no issues at the moment and she'll continue starting patients on Butrans.told deb that was great and I was excited to hear more feedback from her patients that are being started on Butrans.Deb wanted 25 Butrans patient info booklets.
PPLPMDL0020000001	Cleveland	OH	44106	11/21/2011	dr said he's started a few patients on Butrans,he said its tough to get some attending physicians,like Dr.Hayek(Chief of APN)to start patients on something new like Butrans.dr said dr hayek,likes to refill tramadol or increase tramadol dose. we talked about dr suggesting Butrans to the attending physicians instead of refilling or increasing tramadol,showed visual aid and focused on opioid experienced patients.i asked dr if he could start a few patients this week,per our discussion,on Butrans? dr said he will suggest it to the attendings and if they agree, he'll do that. dr said 70% of patients are medicaid and 30% medicaid so thats the biggest challenge here to get patients started on Butrans.we talked about PA for Caresource patients and i focused dr on commercial plan patients.recommended Senokot-5

PPLPMDL0020000001	Cleveland	OH	44106	11/21/2011	dr said she knows the name "Butrans" but couldnt remember who was appropriate and who pays for Butrans? showed dr Butrans visual aid,discussed opioid experienced patients and showed formulary grid focusing dr on commercial plan patients.asked dr if she has 1-2 patients she can start on Butrans this week? dr said probably so but she has to get Attending physicians approval as she just cant write any drug she wants without their approval.i told dr i completely understood that and asked her to at least suggest Butrans to the attending physician,if she felt patients were appropriate? dr said ok she could do that. recommended Senokot-S
	Cleveland	OH	44104	11/21/2011	dr said he's not started anyone on Butrans recently,mainly due to medicare being majority of his patients.i showed pg.11,visual aid, pain conditions and asked dr if he's seen patients with these conditions recently? dr said yes he treats a lot of patients with osteoarthritis. i asked dr if these patients tend to take opioids for their chronic pain? dr said yes they do.i told dr that these are the patients he could start on Butrans,we discussed initiation and titration of Butrans and i focused dr on commercial plan patients.dr said if he has anyone appropriate for Butrans this week, he'll start them.told dr he also has option of OxyContin,if dr feels thats appropriate,we talked about Q12H dosing and 7 tablet strengths for OxyContin and discussed formulary coverage with emphasis on medicare plans.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	11/21/2011	dr said he started a couple patients on Butrans last week,we talked about those patients and i asked dr if he has more patients like them,to start on Butrans? dr said yes he probably will see more patients this week that are appropriate and if insurance covers Butrans,he'll start them.focused dr on commercial and BWC patients.showed visual aid,discussed initiation and titration of Butrans and patient info booklet asking dr to focus patient discussion on application/rotation of Butrans,dr said he will do that as he gives booklets to patients.recommended Senokot-S
	Cleveland	OH	44104	11/21/2011	talked to dr about opioid experienced patients in BUP3015 clinical trial,asked dr if 30% reduction in pain was clinically significant? dr said yes it was any reduction in pain is good.i asked dr if the 30% reduction was good enough for him to prescribe Butrans? dr said yes it is.dr said the toughest part is to get patients to consider a different option like a patch as they are attached to their pills.i showed dr FPI,2.4 maintenance of therapy section,noting that dr can give immediate release opioid or non-opioid therapy with Butrans.dr said ok he'll talk to more patients and see what happens.we discussed initiation and titration of Butrans and i focused dr on commercial plan patients.dr asked about medicaid coverage? we discussed PA for Caresource patients.i asked dr how OxyContin fits into his practice? dr said if patients are taking high doses of percoet and not controlled,he'll convert them to OxyContin.we discussed 7 tablet strengths available and talked about OxyContin insurance coverage. recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44106	11/21/2011	dr said he just needed a reminder of who the appropriate Butrans patients were, what the dosage strengths were, how to initiate patients on Butrans and how he wrote the prescription for Butrans.i showed dr Butrans visual aid,opioid experienced patients was focus,discussed initiation dosage strengths,titration of Butrans,showed the back of visual aid so dr could see how to write a script for Butrans.dr said that seemed easy and he wanted to take the Butrans initiation guide for his reference.i asked dr if he had a few patients in mind that he could start on Butrans today? dr said yes he had 1 in the exam room as we were talking and wanted to start this patient on Butrans.i told dr that was great and i would follow-up next week with him.
	CLEVELAND	OH	44109	11/21/2011	i talked to Rod,pharmacist,about 6 Butrans core messages and Rod said Butrans seems like a great option for patients but he's not seen any Rx for Butrans.i asked Rod what features of Butrans stood out to him? Rod said he likes that Butrans is transdermal and dosed once a week and believes some patients may like this option.i asked Rod if he's given any patient info booklets out? Rod said a few but not recently.i showed Rod the application/rotation section in Butrans patient info booklet and asked Rod to discuss this info with patients including side effects,if patients are filling a Butrans Rx,Rod said ok he would do that.i asked Rod if he would hand out booklets to patients if they arent controlled on their short-acting opioids and patients could discuss Butrans with their HCP's? Rod said he would do that and i could leave a few booklets.discussed formulary coverage for Butrans and i recommended Senokot-S
PPLPMDL0020000001	N Royalton	OH	44133	11/22/2011	NON-PRESCRIBER- Introduced Butrans to Dr Martin, delivering 5 core messages & alerting him to box warning. Also reviewed appropriate patient type & showed initiation guide. Discussed 3 doses available, with 5 & 10mcg being two starting doses depending on the patient. He said he does not typically start patients with opioids & refers out. I asked if he would agree that he does have some patients who he is comfortable treating with opioids. He said maybe a few. Discussed Butrans as an option for these appropriate patients & discussed OxyContin as an option for appropriate patients beyond Butrans.
	Westlake	OH	44145	11/22/2011	Quick call, Dr was packed today since he is off Thurs/Fri. I asked Dr how the patient feedback has been for Butrans. He said the few patients that he has on Butrans are doing fine. I asked if he would write Butrans for a few new patients this week and he agreed.
PPLPMDL0020000001	Parma	OH	44134	11/22/2011	LOYALIST- I reminded Dr Hernandez of our last conversation when he told me that most of his Butrans patients have been new patients, who he has started on 5mcg. He said this is true. I asked him what about patients who are taking 3-4 Vicodin 5mg per day- would he consider that as a Butrans patient. He said that was a really good idea & that he has not thought of this prior to me bringing it up. He added that usually, he will "max out" a patient's Vicodin & then will put them on OxyContin 15mg. I told him that that sounds like an appropriate OxyContin patient type. I asked him if he would, instead of continuing to escalate someone's Vicodin, switch appropriate patients to Butrans. He said he would do this. Gave him "Experience" invite & asked him to participate. He said he would have a look.
	Independence	OH	44131	11/22/2011	NON-PRESCRIBER- Dr Sundaram said he recently started a patient on Butrans who had seen in the hospital. I asked if he knew if the patient was able to get it but he said he did not know. Discussed Butrans appropriate patient type & discussed appropriate range of patient, including OxyContin as an option for patients beyond Butrans. He said he still keeps Butrans in mind & may be able to find more patients.
PPLPMDL0020000001	N Royalton	OH	44133	11/22/2011	Spoke with floater pharmacist & introduced Butrans. She said she has seen it on the shelf & checked this location's shelf, ensuring they do have it. Discussed appropriate patient type, focusing on patients who take around-the-clock tramadol or Vicodin whose pain is not well-controlled. Also mentioned patients who call in too soon for refills of short-acting around-the-clock opioids. Discussed printing savings cards from Butrans.com & OxyContin savings cards. Reminded her savings cards can only be used for patients with insurance or who pay cash.
	N Royalton	OH	44133	11/22/2011	NON-PRESCRIBER- Introduced Butrans to Dr Matt, delivering 5 core messages & alerting him to box warning. He asked about dosing & what molecule is in Butrans. Discussed 3 doses, 5 & 10 being two of the starting doses depending on patient type. Also went over appropriate range of patients & discussed OxyContin as an option for appropriate patients beyond Butrans. Discussed buprenorphine as a partial agonist at mu opioid receptor. He asked if that is what is in Buprenex & added that he has used that in the past for kidney stones. He also asked who was using Butrans. Told him that a variety of different specialties are using it because so many types of physicians treat patients for pain with around-the-clock tramadol or Vicodin. Discussed Butrans as a CII opioid with abuse & addiction potential & let him know Butrans can be called in. Discussed managed care & savings cards for Butrans & OxyContin. He said he is glad to have another option for this type of patient & will keep it in mind for appropriate patients who fit the patient type.
PPLPMDL0020000001	Cleveland	OH	44109	11/22/2011	talked to Erin,Pharmacist,about Butrans and Erin said no Rx yet for Butrans but she thinks Butrans is a good option for patients.i asked Erin what she liked about Butrans and showed visual aid,with 5 core selling messages.Erin said she really likes that Butrans is a patch and the once weekly dosing could be appealing to some patients.i asked Erin if she's giving patient info booklets to patients,so they can talk to their HCP's,when their short-acting opioids arent controlling their pain? Erin said yes she's given a few booklets out and patients are talking to their HCP's. i asked Erin if she would continue doing this? Erin committed to do this.we discussed Butrans formulary coverage,focus on commercial plan patients.showed Erin OxyContin formulary grid and we talked about appropriate patients for OxyContin and 7 tablet strengths available.Erin said she's not seen new Rx for OxyContin recently, just the same patients monthly getting their Rx filled for OxyContin.recommended Senokot-S
	North Royalton	OH	44133	11/22/2011	NON-PRESCRIBER- Introduced Butrans to Dr Jennifer, delivering 5 core messages & alerting her to box warning. She said she has seen a patient in the nursing home who came from the hospital on it. Spent time going over appropriate patient type & range, & discussed OxyContin for patients beyond Butrans. Also showed demo patch. She asked if it was an agonist/antagonist. Told her Butrans is considered a partial agonist at the mu opioid receptor. Dr Jen said none of the physicians in that office treat any type of chronic pain. I asked where she saw a place for Butrans. She said possibly nursing homes. She added that pain patients are not the type of patient they like to "deal with" at the office. Empathized with her & asked if she would agree that it can be difficult for legitimate pain patients to get the care they need. She said yes but they take no chances. She said they refer all patients needing more than Tylenol to pain management.
PPLPMDL0020000001	Solon	OH	44139	11/22/2011	NON-PRESCRIBER- I showed Dr Zaidi BUP3015 efficacy results, pointing out that 49% of patients reported at least 30% reduction in pain score on Butrans 20mcg dose. I asked him if this had any meaning for him. He asked who did the study. I told him it was a study done for FDA approval. He said it did not mean much to him. I asked him where, in his mind, Butrans should be used. He said probably more primary care because they see patients on lower doses of opioids & asked if primary care physicians are using it. I told him a variety of specialties have found a place for Butrans. I asked him why he felt it was not more appropriate for patients like he sees. He said he has thought of it a few times but there is always "something" that makes the patient not a good candidate. He went on to say that he would want the patient to be a compliant one for "something like" Butrans. I asked him if he was saying that he would need to find a more compliant patient for Butrans than would be necessary for other pain medications. He said yes. I asked him why. He said he wouldn't want them putting on more than what they were supposed to. I agreed that a patient should only use Butrans as prescribed, just like any other medication. He only said he would continue to keep it in mind. Gave him OxyContin savings cards & reminded him of favorable managed care coverage.
	Cleveland	OH	44109	11/22/2011	i talked to dr about any chronic pain therapies he would like to replace? dr said the immediate release opioids are his biggest frustration as patients need to have their pain controlled but they want more and more and it never stops. i talked to dr about starting patients on Butrans after the 1st dose of short-acting opioid doesnt control patients pain instead of waiting so long to discuss Butrans with them. dr agreed saying that was a good idea and he will think of patients coming in this week.i focused dr on commercial plan patients and discussed PA for Caresource patients.<font color=blue><b>CHUDAKOB's query on 12/02/2011</b></font>Amy, while i realize that in the past i saw your next objective as a good question, upon further thought, there may be a comparative implication here. The implication is that while Butrans may provide at least a 30% reduction in pain, the short-actings may not. This comparative implication is that we will provide this reduction in pain better than they will and clearly there is no data to support this type of implied claim. Please refrain from using this in the future. Thanks!<font color=green><b>BROOKAM's response on 12/07/2011</b></font>-thanks barry<font color=blue><b>CHUDAKOB added notes on 12/07/2011</b></font>-Thank you!
PPLPMDL0020000001	Cleveland	OH	44104	11/22/2011	dr said she gave a few patient info booklets out last week to patients as she felt Butrans could be an option for them.i asked dr what made her think of Butrans for them? dr said patients were taking tramadol and not controlled so she is following up with a couple patients in 2 weeks to see if they read the Butrans patient info booklet. showed BUP3015,discussed opioid experienced patients and i asked dr if she could start 1-2 patients this week on Butrans? dr said if patients arent controlled and are asking for more pills,then she'll consider it as long as insurance covers it.i focused dr on commercial plan patients.recommended Senokot-S
	Cleveland	OH	44103	11/22/2011	dr said she's starting more and more patients on Butrans as she's gotten a few PA's approved for Medicaid patients.dr said patients are doing well on Butrans so she's happy.i showed dr BUP3015,asked if 30% clinical reduction was clinically significant? dr said yes any pain reduction was good and she rarely see's 30% reduction with short-acting opioids.i asked dr if this reduction was enough for her to prescribe Butrans weekly? dr said yes she prefers long-acting opioids and as long as she can get it approved she'll continue starting patients on Butrans.
PPLPMDL0020000001	Cleveland	OH	44195	11/22/2011	i talked to Anne,NP,about opioid experienced patients that are appropriate for Butrans,showed BUP3015,discussed 30% clinical reduction and Anne said that was impressive data.i asked Anne if she see's a 30% reduction in pain with short-acting opioids? Anne said no she doesn't,patients have the same or worse pain every time she see's them. I asked Anne if this was clinically significant enough for her to prescribe Butrans? Anne said yes it was and committed to starting a few patients focused Anne on commercial plan patients.
	Cleveland	OH	44105	11/22/2011	i talked to Luz,MA,who said that dr is out of town all week.i asked Luz if dr gave Butrans patient info booklets out last week? Luz said she thinks so as some patients made a comment about reading it over and following up with dr in 2 weeks. Luz said to come see dr on Dec.1st as she'll be back in office that day.
PPLPMDL0020000001	Westlake	OH	44145	11/22/2011	Quick call through window, i reviewed the managed care for Butrans and that Tina has had success getting Butrans approved on Caresource. I asked if he would start some new patients this week and he agreed. I also spoke with Tina regarding managed care for Butrans and OxyContin.
	Cleveland	OH	44143	11/22/2011	Quick call....reminded doc for the butrans patient type and that if he prescribes butrans after 300mg of tramadol, 10mcg would be an appropriate starting. I asked him to focus on non-medicare patients for best success.
PPLPMDL0020000001	Euclid	OH	44117	11/22/2011	Window call....Showed doc the demo patch and reminded him of the once weekly dosing. I asked him if he has any patients that might prefer a once a week analgesic. He smiled and said probably not enough. I asked him to try just one of those patients this week.
	Cleveland	OH	44113	11/22/2011	dr called me and wanted more savings cards,gave dr 5 packs of Butrans patient savings cards and dr said since Deb has joined practice they are starting more patients on Butrans every day. i asked dr if he will start a few patients today and tomorrow on Butrans? dr said yes he will do that.

PPLPMDL0020000001	Westlake	OH	44145	11/22/2011	Quick call, Dr was way behind, I asked him if he would start a few new Butrans patients this week and he agreed. I asked if he's been happy with the results he has seen and he said yes. Reminder that OxyContin is still an option and he said he does use it for very severe pain and patients who are terminal.
PPLPMDL0020000001	Lyndhurst	OH	44124	11/22/2011	I reviewed the butrans coverage - with commercial plans and now with Caresource. She said she does not much medicaid and she has not had any issues with patients getting the product. I asked her if she is prescribing with refills. She said she likes to try them for a month, have them come back and then prescribe with refills if appropriate. I discussed the flexible dosing options of oxycontin and provide formulary grid for both.
PPLPMDL0020000001	Cleveland	OH	44109	11/22/2011	I talked to Paul and Allen, Pharmacists, about Butrans scripts and stocking. both of them said they are getting scripts for Butrans, BWC is paying for it and commercial insurance, medicaid/caresource has approved a few scripts for Butrans. I showed both pharmacists BUP3015, discussed the clinical trial with focus on 30% reduction in pain, I asked paul and allen if they see that kind of pain reduction with short-acting opioids? paul and allen said its rare if patients get that much pain reduction, they were impressed by the data. I asked if they could continue giving patients the patient info booklets, so patients can talk to their HCP's about Butrans? paul and allen agreed to do this and said they do provide patient counseling for patients taking opioids. we talked about OxyContin stocking and I asked if there are new Rx for OxyContin coming in to the pharmacy? paul and allen said not a lot of new Rx, mainly the same patients every month getting their scripts. discussed formulary coverage for OxyContin and recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44113	11/22/2011	I talked to dr about BUP3015, opioid experienced patients and asked dr if he's treating the pain conditions that were seen in the inclusion criteria? dr said yes he see's a lot of low back pain and arthritic patients. asked dr how he's treating their chronic pain? dr said he starts patients on tramadol and when that doesn't work he goes to vicodin and percocet. dr said he would like to decrease the amount of short-acting opioids he prescribes and thinks Butrans is a great option. dr said his only concern is insurance coverage as Deb, doctors MA, couldnt get Butrans approved through UH. I explained to dr that Deb, MA, had Prescriptions Solutions insurance under UH and there was a PA there, that's the reason Deb couldnt start on Butrans. dr said ok. I asked dr if he has other commercial plan patients to start on Butrans? dr said yes and committed to starting a few patients on Butrans. <font color=
PPLPMDL0020000001	Cleveland	OH	44127	11/22/2011	blue><b>CHUDAKOB's query on 12/02/2011</b></font>Perhaps a way to rephrase the next call objective is to ask the physician what type of percent reduction in pain does he look for in his patients that he considers significant. Then you can discuss what Butrans offers without bringing another product into the conversation. <font color=green><b>BROOKAM's response on 12/07/2011</b></font>ok thanks<font color=blue><b>CHUDAKOB added notes on 12/07/2011</b></font>Thank you!
PPLPMDL0020000001	Parma	OH	44129	11/22/2011	dr said she's given a few patients Butrans patient info booklets to read and she's following up with them in 2 weeks. we talked about opioid experienced patients trying Butrans and I talked to dr about initiation and titration. dr said biggest challenge is medicaid, dr asked about medicaid coverage for Butrans? I talked to dr about PA for Medicaid and Caresource patients. I asked dr if she could start a few patients on Butrans this week? dr said yes she has some coming in that she could talk to. I talked to Josie, MA, about PA for Caresource patients, as she processes all PA's.
PPLPMDL0020000001	Lyndhurst	OH	44124	11/22/2011	NON-PRESCRIBER- Quick call in the hallway between patients. Jen said she had not identified any Butrans patients since my last visit but that she is keeping an eye out for patients failing on tramadol. She also said that next Thursday will be her last day at the practice. Spent time with Dawn, who said that starting in December, Caryn will be at the Parma office 2 days per week when Jen leaves. She also said Deb Torres will come over to cover while they find a replacement for Jen. Dawn said she has not been flagged any charts recently for Butrans because things have been so chaotic at the office but said once they get up & running again, she will try to help with reminding practitioners.
PPLPMDL0020000001	Mayfield Hts	OH	44124	11/22/2011	I apologized to doc about his previous bad patient experience with butrans. I explained that an appropriate/ideal patient type for butrans is one just taking 3 or fewer tablets/day of a short acting like tramadol or vicodin and whose pain is more moderate. I also reviewed the initiation dosing and that 20mcg is not a starting dose. He said that he started her at 20mcg because she had been on others pain meds before and nothing else helped. I explained the potential for withdrawal symptoms if patient not tapered down from current therapy before starting on Butrans. I also explained that medicaid will not cover butrans and it will be expensive for those patients. I asked him to try butrans again for appropriate commercially insured patients and give them a savings card. He said ever product has a savings card. I told him that it should be easy to remember to give the card then. No commitment. I discussed the oxycontin patient type and the flexible dosing as an option for more sever pain. He mentioned a article about Purdue that was not favorable in Fortune magazine.
PPLPMDL0020000001	Parma	OH	44129	11/22/2011	I reviewed the butrans indication and described the patient type. I asked him if he sees that he will ever prescribe this product. He said it just seems like such a niche product and he forgets about it. I told him that's why I keep coming back. I asked him to try one patient that is failing on tramadol or vicodin and try them on butrans. He said ok. <font color=blue><b>CHUDAKOB's query on 12/02/2011</b></font>That is interesting that he sees this as a niche product. Did you ask him about where he sees it being niched?<font color=green><b>SIMERTOC's response on 12/13/2011</b></font>He has previously expressed that all patients taking tramadol or vicodin are not taking them chronically. <font color=blue><b>CHUDAKOB added notes on 12/15/2011</b></font>Ok. But did you ask him specifically where he sees it being niched? This may have been a good follow-up question.
PPLPMDL0020000001	Highland Heights	OH	44143	11/22/2011	REPEAT CUSTOMER- Dr Ortega said he had nothing new to tell me about Butrans. I asked if he is still starting new patients & giving Butrans a trial. He said not really because most patients are satisfied with the medication they are already on. I asked him if he is at least offering it to patients like we had discussed before. He said maybe he does have some more patients for it. He also added that he writes OxyContin for patients who are on higher opioid doses instead of offering Butrans. I agreed that this sounded like the right thing to do.
PPLPMDL0020000001	Westlake	OH	44145	11/23/2011	Asked doc if he has Caresource patients in his practice that may be taking a short acting like tramadol or vicodin. He said he is sure he does. I told him that Caresource is now paying for butrans after failing on tramadol or vicodin or tylenol with codiene. He said he does not have a lot of medicaid but its good to know. Gave him a formulary grid and also reminded him that oxycontin is option for patients not appropriate for butrans. Spoke with Deanna, we discussed the medication guide for Butrans and the appropriate patients for Butrans. I asked if she would give a medication guide to a patient who is taking tramadol around the clock and let them know about Butrans as an option they can discuss with their Dr. She said she usually does not do that but she would if the patient was asking about other options. I reviewed the manged care for Butrans and that OxyContin is also covered on most managed care plans.
PPLPMDL0020000001	Bedford	OH	44146	11/23/2011	Spoke with Matt, PharmD, & reviewed Butrans core messages. He checked his system & said he has not dispensed any in the last two months. I showed him patient information booklets & discussed how they can be used for current Butrans patients or those who Matt thinks may be good candidates based on appropriate patient type. Matt said he would keep a few on hand & asked if it has any type of patient assistance in it. Discussed savings via e-voucher for Wal-Mart customers. Also discussed OxyContin savings cards. Matt said they do not stock OxyContin at this location.
PPLPMDL0020000001	Warrensville Heights	OH	44122	11/23/2011	NON-PRESCRIBER- Dr Zivic said he has tried to prescribe Butrans a few time but that it got rejected by managed care. I asked if he knew what plans but he did not. I reviewed managed care coverage with him in detail, discussing prior authorization requirements for Medicaid. I asked if he felt that the Medicaid prior authorization would hinder his prescribing of Butrans & he said no because that type of patient is who he would write for anyway. I asked if Butrans is dosed once a week. I said yes & discussed dosing. He asked about adverse events. Showed him rates- he said he was interested in seeing application site skin reaction rates. He said they do not look "bad". He asked if he would start a patient on 5mcg. I reviewed initiation guide & discussed how to start Butrans depending on current opioid dose. Also discussed ability to titrate after 3 days & ability for patients to take supplemental analgesia with Butrans. I asked after how long he considers a condition chronic. He said a few weeks. I asked if the information we discussed today would help him feel confident in prescribing Butrans. He said he would start to use it. Also discussed OxyContin 7 tablet strengths & q12h dosing for appropriate patients.
PPLPMDL0020000001	Cleveland	OH	44113	11/23/2011	dr said he's given a few patient info booklets out to patients so they can read about Butrans and he's following up in 2wks. showed dr BUP3015, we discussed opioid experienced patients, dr focused on vicodin patients, and I asked dr if he could start 1-2 patients this week on Butrans? dr said if patients are willing to wear a patch and insurance covers it he will start a few patients. dr asked about BWC coverage? focused dr on BWC and commercial plan patients. recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44113	11/23/2011	talked to dr about opioid experienced patients, dr focused on vicodin patients that arent controlled and asking him for more pills, and how dr can consider Butrans as an option for them. dr said he's been gone 3 weeks, just returned monday and has given a few patient info booklets out for patients to read and he'll follow up with them. I asked dr if he could start 1-2 patients today on Butrans? dr said he will do his best and probably will see some patients today that he can start on Butrans. recommended Senokot-S
PPLPMDL0020000001	Westlake	OH	44145	11/23/2011	I reviewed our previous conversation about Butrans as an option when tramadol is not longer controlling the patients pain. He said he's tried to write Butrans but more often than not managed care has been an issue. I discussed where Butrans is covered and patients can get Butrans for a little as \$15 per month. I asked him to focus on anthem and medical mutual patients and he agree.
PPLPMDL0020000001	Cleveland	OH	44113	11/23/2011	I asked dr how a long-acting opioid fits into his treatment plan for chronic pain? dr said usually he waits as long as possible before starting patients on a long-acting opioid, unless patients have cancer pain. showed dr BUP3015, asked dr if he had some patients taking vicodin daily that werent controlled and could try Butrans? dr said he has a lot of patients taking vicodin and always asking for more pills or something else, so he will keep talking to patients about Butrans. dr said he did talk to a few patients after our lunch and he gave them patient info booklets. dr committed to giving booklets to patients ad I asked if he could start 1 patient on Butrans this week? dr committed. focused dr on commercial plan patients. recommended Senokot-S
PPLPMDL0020000001	Westlake	OH	44145	11/23/2011	Quick call at window, I asked if the couple patients he started on Butrans are having success. He said that he has not heard anything so he hopes they are doing fine, he will see them back in a month or two. I asked Dr if he would start a few more patients like those on Butrans and he agreed.
PPLPMDL0020000001	Cleveland	OH	44109	11/23/2011	dr said he's not started anyone on Butrans yet but is giving the patient info booklets out so he'll be following up with patients in 2 weeks. I asked dr if a 30% reduction in pain levels would be clinically significant? dr said yes absolutely. I showed dr BUP3015, opioid experienced clinical trial, dr focused on his vicodin patients and I asked dr if he could start 1-2 patients this week on Butrans? dr committed to do this. focused dr on BWC and commercial plans. recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44114	11/23/2011	dr said she's been gone for 3 weeks so hasnt thought about Butrans, I asked dr if she's seen any patients this week that she felt were appropriate for Butrans? dr said she had a few and knows Butrans is available and will start more patients. dr said she just has to remember to start them on Butrans after tramadol as she usually goes to vicodin. showed dr BUP3015, we discussed opioid experienced patients, dr focused on vicodin patients, that she could start on Butrans? dr said she will start more, she's just going slower than other HCP's. focused dr on BWC and commercial plan patients and asked dr if she'll start 1-2 patients this week? dr said she'll do her best and if patients will try Butrans she will start them. recommended Senokot-S
PPLPMDL0020000001	Cleveland Bedford	OH	44109 44146	11/23/2011 11/23/2011	worked plan management and premier physicians offices throughout Lutheran hospital TRIALIST- Dr Moufawad said he was running too far behind today to talk. He added that Butrans is "in his mind" & that he should be able to start some patients soon. Gave him "Experience" invite & asked him to log on to participate.
PPLPMDL0020000001	Cleveland	OH	44113	11/23/2011	dr said he's giving patient info booklets out to patients but not many patients want to stop taking their pills. showed dr fpi, 2.4-maintenance of therapy, told dr he can still give these patients immediate release opioid or non-opioid therapy with Butrans. dr said ok he forgot that. I asked dr if he could start 1-2 patients this week on Butrans? dr said he will do that if patients are willing to try Butrans. dr asked about medicaid coverage? discussed PA for Caresource and focused dr on BWC and commercial insurance plans. recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44113	11/23/2011	I talked to Dale, PA, about patients he's starting on Butrans, dale said most of them are taking vicodin or percocet, not controlled on 2 pills and asking for more so he's starting them on Butrans and working with dr shen, Pain management dr in practice he's recommending more patients be started on Butrans. I asked dale if he needed anything from me, he said no. I asked if dale could start more patients on Butrans this week? dale committed to doing this. recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44113	11/23/2011	I asked dr if she has considered starting her hydrocodone patients on Butrans as she has a lot of experience so far starting her percocet patients on Butrans? dr said yes she's starting to consider these patients. dr said she started a couple patients that were taking vicodin and not controlled on Butrans and they are doing good so far on Butrans. I asked dr if she'll start more patients this week on Butrans? dr said yes she will do that. asked if he needed anything? dr said I could leave more patient info booklets but that was it. focused dr on BWC and commercial plan patients.
PPLPMDL0020000001	Cleveland	OH	44114	11/23/2011	talked to John about patients he's starting on Butrans, John said most of them are percocet patients but they have a few vicodin patients they've started. John said patients are fine with it when he tells them this is the only option they have and gives them patient info booklets to read about Butrans. John said biggest challenge is medicaid coverage of Butrans we discussed the PA for caresource patients, focused John on BWC and commercial plan patients. I asked John if he'll continue starting patients, as he works with Dr Marshall and Dr Katz? John said yes and committed to starting more patients on Butrans. recommend Senokot-S

PPLPMDL0020000001	Parma	OH	44129	11/23/2011	Quick call- Jackie said they had just been audited & it was not a good time, but added that she has not dispensed Butrans. Reminded her of patient information booklets that I have given her for patients & asked her to give them to patients who she thinks could benefit from Butrans. She agreed. Also delivered OxyContin savings card reminder.
PPLPMDL0020000001	Cleveland	OH	44109	11/23/2011	dr said she started a couple patients on Butrans.i asked dr why she chose Butrans? dr said these patients were taking percocet and not controlled and were asking for more pills so she wanted to try Butrans.we talked about initiation and titration and I asked dr to focus on BWC and commercial plan patients,dr said ok she would do that.recommended Senokot-S
PPLPMDL0020000001	Parma	OH	44129	11/23/2011	TRIALIST- Dr Gigliotti asked what Butrans' coverage is on Medicaid. Discussed Medicaid & prior authorization. I let him know that fortunately, the prior authorization requires only a failure of tramadol, hydrocodone, codeine, or oxycodone before a patient can get Butrans. I added that this is excellent news because he has told me in previous conversations that these are exactly the types of patients he would be prescribing Butrans for anyway (ie patients who were failing Vicodin.) He said that was good & added that perhaps after the holidays he could find some people to try on Butrans. I reminded him that he has many patients who take around-the-clock Vicodin, as he has told me in the past, & told him that certainly he could find one or two patients for a trial. Also reminder for OxyContin for those patients beyond Butrans.
PPLPMDL0020000001	Cleveland	OH	44109	11/23/2011	dr said he's starting patients on Butrans every week and patients are doing well on Butrans.i told dr that was good to hear and what feedback he's getting from patients? dr said patients are saying its easy to apply Butrans and it stays on for the 7 days and dr said he's seeing cognitive improvement in patients so he's happy. i asked dr if he will continue starting patients on Butrans this week? dr said yes,asked dr if he needed anything and dr said just leave Patient info booklets as he gives them to all patients that start on Butrans. focused dr on commercial plan patients.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44114	11/23/2011	dr said he's starting more patients on butrans,patients are doing well,no problems.i asked dr if he's considering his patients taking hydrocodone since he's got a lot of experience now with his percocet patients? dr said yes he's starting both vicodin and percocet patients on Butrans and does give some patients a small amount of short-acting opioids for breakthrough pain,others have to take non-opioid therapies with Butrans.i asked dr if he'll continue starting more patients this week? dr committed to this.recommended Senokot-S
PPLPMDL0020000001	Maple Heights	OH	44137	11/28/2011	Spoke with Marty, a floater pharmacist, & introduced Butrans to him as he had not heard of it before. Discussed core messages. He said he thinks he has seen it on some of the locations' shelves but has not dispensed any & did not know who/what it was for. Also discussed appropriate patient type. Offered OxyContin savings cards, but none were needed. Marty said that Andy, the former pharmacy manager, left & their new main pharmacist, Kim, was on maternity leave. He said this location will be having a lot of floaters filling in.
PPLPMDL0020000001	Cleveland	OH	44113	11/28/2011	talked to dr about the types of patients he's looking to start on Butrans.dr said if patients have been taking 4 vicodin daily,5/325 and maybe even an extra pill a day, so total of 4-5 vicodin daily and their pain isnt controlled,he talking to them about Butrans.dr said if insurance covers Butrans he's starting patients.asked dr if he'll start a couple patients on Butrans this week? dr said of course he will,he likes Butrans,thinks Butrans is a good product and will continue talking to patients about this option.talked to dr about PA for Caresource patients and focused dr on commercial plan patients. recommended Senokot-S
PPLPMDL0020000001	Warrensville Heights	OH	44122	11/28/2011	TRIALIST- I asked Dr Brooks about his more recent experience with Butrans & asked if he is still as satisfied with the results he sees. He said patients are very happy with the pain relief they get with Butrans. He added that a patient on Butrans just left his office. I asked him to tell me about her. He said she has "real" pain & was on Percocet prior to him switching her to Butrans. I asked him if he would ever consider using Butrans after tramadol. He said he had never thought of positioning it there. He added that he is happy to hear that he can use it as there as he was reserving it for later in the treatment algorithm. Discussed managed care coverage & explained Medicaid with prior authorization. I asked Dr Brooks if he would identify some appropriate patients & prescribe Butrans for them & he agreed. I asked where he typically uses OxyContin. He said he likes it most for patients with Sickle Cell Disease. He explained that the condition is very painful & that patients get good relief with OxyContin. I asked him to continue to use OxyContin where appropriate & he agreed.
PPLPMDL0020000001	Parma	OH	44129	11/28/2011	NON-PRESCRIBER- Reminder of Butrans appropriate patient range/type (ie patients not well-controlled on chronic tramadol or hydrocodone around-the-clock) & OxyContin for patients beyond that range. Dr Moysaenko said he would keep that in mind as he walked by.
PPLPMDL0020000001	Maple Heights	OH	44137	11/28/2011	Spoke with Kim, pharmacist/manager, who said she has not seen any movement of Butrans. Reviewed appropriate patient type & range. Also updated her on Butrans managed care, including Medicaid with explanation of prior authorization requirements. I asked if Kim fills a lot of prescriptions for chronic, around-the-clock short-acting opioids. She said yes. I asked if she ever makes a recommendation to a customer about a medication change, such as in this scenario. She said very rarely because they are so busy there they do not have time for such discussions. Also discussed OxyContin savings cards & reviewed eligibility requirements.
PPLPMDL0020000001	Parma	OH	44129	11/28/2011	NON-PRESCRIBER- Dr Taylor asked what the active molecule in Butrans is. I told her it is buprenorphine, a partial agonist at the mu-opioid receptor. I asked how the patient she had told me about is doing on Butrans. She said she is happy with the pain relief she is getting with Butrans. I asked if she would continue to prescribe Butrans for appropriate patients as she is getting good results so far. She said she is "getting rid" of "all her patients". I asked her to clarify. She said she is not taking on new patients & is discharging others on narcotics. I asked her if he meant all patients on narcotics. She said no & that she is keeping the appropriate ones. I told her she is right in evaluating patients & treating only those who are appropriate. I asked Dr Taylor if she would consider using Butrans for a patient who she was planning to start on opioid therapy for a chronic condition or if she would always go to a short-acting opioid first. She said she would probably prescribe short-acting first to ensure tolerability. She then asked if Butrans can be used on opioid-naive patients. I told her yes. She said she has not thought of using it there before but perhaps will start to consider that patient type as a potential Butrans patient type. Dr Taylor added that she likes that Butrans is a patch & is dosed once weekly. Reminded her that Butrans is still an opioid with abuse/addiction potential. She said she knows that. Also reminded her of OxyContin 7 tablet strengths.
PPLPMDL0020000001	Cleveland	OH	44109	11/28/2011	dr said he started a few patients on Butrans last week, but is waiting for Caresource to approve/disapprove the PA.I asked dr to tell me about these patients and why he chose Butrans for them. dr said patients were taking vicodin daily but still in pain and wanted more pills,so he talked to these patients about Butrans. dr said patients were open to trying Butrans but now they are waiting for Caresource approval. i asked dr to focus on BWC and commercial plan patients,dr said ok he will do that.i asked if dr will see a couple patients this week that he could start on Butrans? dr committed to doing this.recommended senokot-S
PPLPMDL0020000001	Cleveland	OH	44111	11/28/2011	Spoke with Steve,i asked if he's heard any feedback regarding Butrans and he said he has not heard anything. i reviewed that Butrans can be used with supplemental analgesia. Reminder that OxyContin is still an option when Butrans may not provide adequate analgesia. He said he still has many patients on OxyContin and we reviewed the OxyContin conversion guide.
PPLPMDL0020000001	Lakewood	OH	44107	11/28/2011	Quick call,i asked Dr if he would start a new Butrans patient today. He said he would. I asked if he knew who was coming in this afternoon and he said he'll have to look at the schedule. Reminder about OxyContin as an option and he said he will write it, mostly in the hospitals.<font color=blue><b>CHUDAKOB's query on 12/08/2011</b></font>Looks like this was a short-call and all about you! How could you have made it about him, or his patients and still asked for the business?<font color=green><b>HOLLUBA's response on 12/11/2011</b></font><b>His nurses told me that when he sees me, he writes a script of Butrans. Since he was moving in a week, I just closed him for one more script. I could have asked about the feedback from Butrans and asked if he had more patients that could benefit from Butrans.<font color=blue><b>CHUDAKOB added notes on 12/13/2011</b></font><b>I see. Thanks for the feedback.</b></font>
PPLPMDL0020000001	Cleveland	OH	44106	11/28/2011	dr said he's not started anyone on Butrans since he only has a few patients on narcotics. dr said he likes that Butrans is a patch and dosed once a week.i asked dr how his patients will feel about Butrans? dr said there are some patients that may prefer a patch over pills and once weekly dosing.dr said he'll think of some patients coming in this week and talk to them.i asked dr if he'll start a couple patients this week on Butrans? dr committed.focused dr on commercial plan patients.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44113	11/28/2011	talked to Deb,PA,about the patients she's starting on Butrans.Deb said her patients are doing great on Butrans,she loves Butrans and will continue starting more patients.i asked deb how she chooses Butrans for patients versus getting refills of short-acting opioids? Deb said if patients are taking 4-5 vicodin,5/325,daily and not controlled,she'll start them on Butrans.Deb said its easy to explain Butrans to patients and get them started.focused deb on commercial plan patients and PA for Caresource patients.
PPLPMDL0020000001	Cleveland	OH	44106	11/28/2011	worked pain management dept
PPLPMDL0020000001	Cleveland	OH	44106	11/28/2011	worked out-patient pharmacy
PPLPMDL0020000001	Cleveland	OH	44106	11/28/2011	talked to dr about patients he treats with pain conditions.pg.11 visual aid, and asked dr if he's seen anyone with these conditions? dr said yes a lot of patients with back pain and osteoarthritis.i asked dr how he treats their chronic pain? dr said by the time patients get to him they have usually tried at least 1 narcotic and he'll have patients start on tramadol before going to vicodin.i asked dr if he'll start a couple patients on Butrans this week instead of refilling tramadol? dr said yes he'll start some patients on Butrans as long as they are willing to wear a patch.showed dr Butrans patient info booklet,focused on application/rotation of Butrans and asked dr if he'll focus patient discussion on this,dr said he'll do this.focused dr on commercial plan patients and we discussed PA for Caresource.
PPLPMDL0020000001	Cleveland	OH	44106	11/28/2011	dr said he's not started anyone on Butrans, showed BUP3015 and discussed opioid experienced patients. asked dr if he see's these types of patients? dr said yes he see's them all the time. asked dr if he could start a couple patients this week? dr said if patients are willing to wear a patch and the attending physician approves him starting patients on Butrans,he will do that.we discussed initiation and titration of Butrans and i focused dr on commercial plan patients.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44106	11/28/2011	dr said he started 1 patient last week on Butrans,asked dr why he chose Butrans? dr said patient was taking tramadol,not controlled and wanted more pills so dr wanted to try Butrans. we discussed initiation and titration of Butrans, showed patient info booklet, and i asked dr if he has a couple more patients this week to start on Butrans? dr committed. recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44106	11/28/2011	dr said he's started a few patients on Butrans,asked dr why he chose Butrans? dr said these patients were taking tramadol and not controlled so he started them on Butrans.we talked about follow-up appointments with patients, titration of Butrans and discussing side effects with patients.showed patient info booklet and asked dr to focus on application/rotation of Butrans.dr said he will do that.asked dr to start a few more patients this week on Butrans,dr committed.focus on commercial plan patients,we discussed Medicaid/Caresource patients and the PA for Caresource patients.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44106	11/28/2011	talked to dr about opioid experienced patients,showed BUP3015,and asked if she's seen any patients that are appropriate to start on Butrans? dr said yes she see's these patients every day but hasnt started anyone. we discussed initiation and titration of Butrans and i asked dr if she had 2 patients she could start on Butrans this week? dr committed. focused dr on commercial plans.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44113	11/28/2011	dr said she has a few patients on Butrans but hasnt started anyone recently as she doesnt have a lot of patients taking narcotics.i asked dr how the patients on Butrans were doing? dr said they were doing good,improvements in pain and cognitive functioning so she and her patients are happy so far.showed dr BUP3015,asked dr if she treats these types of patients? dr said yes,asked dr if she had a couple patients coming in this week that she could start on Butrans? dr said yes she's sure she will see a lot of patients this week that are appropriate for Butrans but her challenge is that medicaid doesnt cover Butrans.i talked to dr about PA for medicaid and Caresource patients and focused dr on Commercial plan patients.recommended senokot-S<font color=blue><b>CHUDAKOB's query on 12/07/2011</b></font><b>Amy, looking at your next call objective, I am wondering what "these types of pain conditions" are referring to?<font color=green><b>BROOKAM's response on 12/11/2011</b></font><b>pg. 11 visual aid or BUP 3015, inclusion criteria - I show 1 of these pages depending on call. thanks</b></font><b>color=blue><b>CHUDAKOB added notes on 12/15/2011</b></font><b>You might focus in on one of the disease states rather than all of them.</b></font>
PPLPMDL0020000001	Westlake	OH	44145	11/28/2011	I asked Dr if he has given up completely on Butrans or if he sees Butrans as an option for his patients. He said that he wants to use Butrans but ever since he was denied a few times, he has not wanted to write for it again. I reviewed the managed care and asked if he would give Butrans another chance, he said he would. Managed care aside, I asked where he sees a place for Butrans. He said that he wants to use it was a way to wean patients off of other opioid pills. I reviewed the initiation guide and how to properly start patients on Butrans as well as taper when they are on higher doses. He agreed to give Butrans another try. I spoke with Mo and Laura and they will keep me posted of any managed care issues.
PPLPMDL0020000001	Cleveland	OH	44102	11/28/2011	talked to Amol,Pharmacist,about Butrans and he's not seen any scripts yet.Amol said majority of patients are medicaid,we talked about PA for medicaid and Caresource patients.i showed Amol,BUP3015,discussed opioid experienced patients with Amol and he said there are a lot of patients like that here that get their short-acting opioids filled monthly but still arent controlled.i asked Amol if he would recommend Butrans to these patients by giving the patient info booklet to them and patients can speak with their HCP's about Butrans? Amol committed to doing this.we talked about OxyContin scripts,there's not been a lot of new Rx,only the same patients getting scripts monthly for OxyContin.we talked about formulary coverage for OxyContin and i recommended Senokot-S

PPLPMDL0020000001	Parma	OH	44134	11/28/2011	TRIALIST- Started to introduce Butrans efficacy clinical data for opioid-experienced patients to Dr Mandat. He stopped me & said that he just put a patient on Butrans a few minutes ago. I asked him what type of patient this was. He said it was a younger female patient who had been taking Vicodin around-the-clock for pain associated with "RSD". He added that he started her on the 5mcg dose. I told him it sounds like he did the right thing. He said he thinks she will be an ideal Butrans patient & then went into a room.
PPLPMDL0020000001	Cleveland	OH	44106	11/28/2011	talked to Jack,out-patient pharmacist,about Butrans 5 core selling messages and we discussed formulary status.Jack said pain management director isnt supportive of Butrans as he doesnt like narcotics and wont support Butrans on the VA formulary.i asked Jack if he saw a place for Butrans in the VA? Jack said yes he did initially as he thought their pharmacy could cut down on vicodin and percocet supply but the pain management director didnt support Butrans so its not being considered here. asked Jack if i could follow-up with him in December and see if there were any changes with formulary status? Jack said he doubts there will be any changes, but i can stop by and check in with him if i want.Jack said perhaps next year they will re-evaluate Butrans again for their formulary.we discussed OxyContin stocking.
PPLPMDL0020000001	Cleveland	OH	44113	11/29/2011	dr said he's still looking for the right patients to start on Butrans.i asked dr to explain to me who the appropriate patient was? dr said if patients are taking vicodin every day and its not controlling their pain and they ask him for something different,then he'll discuss Butrans with patients.dr said otherwise he's not recommending Butrans to patients that just want refills of their short-acting opioids.showed dr BUP3015,discussed 30% clinical reduction in pain,dr said 30% is clinically significant,but he's not going to change patients medication regimen unless they ask for something else.dr said he's going to cancel my 12/15/11 lunch as his staff doest need another Butrans presentation.dr said when he finds more patients to start on Butrans,he'll have me do some lunches and that'll be after the 1st of the year,2012. I told dr i was happy he found a few patients to start on Butrans and to hear that patients are doing well on Butrans. I told dr i am here as a resource if he needs anything otherwise i will just see him in the office and book lunches next year.dr said that was fine.
PPLPMDL0020000001	Cleveland	OH	44195	11/29/2011	anne,np,said dr stanton-hicks started a few patients on Butrans and they are doing well so she may be able to start some patients now on Butrans.Anne said she was waiting for dr stanton-hicks to start some patients and get his approval,so she will start considering Butrans.i showed Anne BUP3015,discussed opioid experienced patients with her and asked if she treats these types of pain conditions,inclusion criteria,anne said yes they see a lot of back pain specifically low back pain and arthritic patients.i asked anne if 30% reduction in pain was clinically significant? anne said yes any reduction in pain is good and 30% is impressive.i asked anne if its enough for her to prescribe Butrans? anne said yes it is.i asked anne if she will start 1-2 patients this week on Butrans? anne committed to do this.focused anne on BWC and commercial insurance patients.recommended Senokot-S
PPLPMDL0020000001	Westlake	OH	44145	11/29/2011	Dr complained to me that he has a patient who was taking 80mg OxyContin 4 times per day and he was trying to taper him down but the patient did not want to reduce the dose. I reviewed that OxyContin is only indicated Q12 hour and that he could write 2 80mg tablets Q12hr instead. He said that he would try to change this but also wants to start to decrease the patients dose. I reviewed that he should taper the dose of OxyContin gradually. We discussed that this patient would be on too high of an Oxycodone dose to consider Butrans. We discussed patients that may be appropriate for Butrans if they are taking low dose vicodin or percocet and meet the indication. He agreed to prescribe Butrans for these patients, but said that none of his patients want to try a patch or give up any of their pills.
PPLPMDL0020000001	Cleveland	OH	44109	11/29/2011	talked to dr about appropriate patients to start on Butrans,showed BUP3015 opioid experienced patients.dr said he's giving patient info booklets to patients and has tried to start a few patients on Butrans but Caresource wants PA for Butrans and its not always approved.dr said Caresource is very frustrating as they cant treat patients with all of the required PA's.i asked dr if he can start 1-2 patients on Butrans this week? dr committed to do this.focused dr on BWC and commercial insurance patients.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44102	11/29/2011	i talked to Nagla,PA,about patients that are wearing Butrans and how they are doing,Nagla said the couple patients dr carson and dr celeste have started on Butrans are doing well,no complaints or call backs from patients,nagla said thats a good sign.i asked if Caresource has been approving Butrans,thats majority of patients here,Nagla said some PA's are going through some arent.Nagla said Caresource wants a PA for every medication so its time consuming and frustrating for the HCP's.i asked Nagla if she will recommend Butrans to each HCP this week when she see's appropriate patients,showed BUP3015,opioid experienced patients was focus,Nagla said yes she will recommend Butrans.focused Nagla on BWC and commercial insurance patients.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44130	11/29/2011	Spoke with pharmacist John & presented patient information guides. He said he finally did see a prescription for Butrans but he did not know who prescribed it nor did he remember what patient type it was for. Discussed how patient information booklets can be used for patients who have a prescription for Butrans or for those who he identifies as potential Butrans patients. Discussed appropriate patient type, focusing on those who get refill after refill of short-acting around-the-clock opioids. He said he would do this. Discussed OxyContin savings cards as well.
PPLPMDL0020000001	Northfield	OH	44067	11/29/2011	Quick call with pharmacist (Paul?) & reviewed Butrans core messages with him. I asked if he had seen any activity lately as area physicians have indicated they are prescribing it. He said he has not seen any activity nor has he heard much about it. Discussed appropriate patient type. Also discussed savings through e-voucher for Butrans & through savings cards for OxyContin.
PPLPMDL0020000001	Euclid	OH	44117	11/29/2011	Quick call....Showed doc the butrans demo and asked him if he is still committed to giving it a fair try for appropriate patients. He said he has not given up on it yet. He said he was an hour behind. Left him a fomrulary grid reminder for oxycontin and gave a butrans initiation guide.
PPLPMDL0020000001	Cleveland	OH	44144	11/29/2011	NON-PRESCRIBER- Quick call as I caught Dr Paul at the window. Spent time with Carol discussing Butrans appropriate patient type.
PPLPMDL0020000001	Parma	OH	44134	11/29/2011	NON-PRESCRIBER- Lynda said she has not used Butrans & she really feels the pain patients up to Dr Scanlon at this point. She went on to say that she does not have a DEA number yet but has applied. Reviewed Butrans appropriate patient type & gave her an "Experience" invitation, explaining the interactive program. She said she would log on as she thinks it is important to stay current on her knowledge of medications.
PPLPMDL0020000001	Cleveland	OH	44130	11/29/2011	TRIALIST- Dr Fedorko said he does not think he has any patients for Butrans right now. I reminded him of previous conversations when he told me that he prescribes tramadol or Ryzoft for patients but with Ryzoft, he gets managed care pushback. I asked him if he would consider a Butrans patient the same patient type as a Ryzoft patient. He said the only reason he really writes Ryzoft is to make (the drug rep) happy. I told him if he has appropriate patients for Ryzoft or tramadol, he may have candidates for Butrans as well. He said he has one happy patient on Butrans who has spinal stenosis. I told him this sounds like an ideal patient. He said he has another who may be having surgery soon for his spinal condition & he may consider that patient as a Butrans patient. I let him know I would be following up with him.
PPLPMDL0020000001	Parma	OH	44134	11/29/2011	TRIALIST- Dr Scanlon said he has been using Butrans. I asked him to tell me about the patients & how they are doing. He said they are doing well & are happy with the results they are getting. I asked what types of patients he has been trying it on & if he has used it on any opioid-naive patients. He said they have all been on something short-acting & he uses it in place of those. I told him it sounds like he is finding appropriate patients. I let him know that Butrans can be used for patients who have not been on opioids before & that they can be started on the lowest starting dose, 5mcg. He said that was good to know. Also discussed OxyContin q12h as an option for patients beyond Butrans. Discussed savings cards for both products. Dr Scanlon said he has been giving out the Butrans savings cards. He left the room to go see a patient, then came back in & said he was going to give this patient Butrans & asked for a savings card to give to them.
PPLPMDL0020000001	Cleveland	OH	44124	11/29/2011	Quick call....asked doc if he has patients that may be taking vicodin several times/day pain. He said he prefers something longer acting but he probably does. I asked him to consider Butrans for those types of patients - Butrans is a CII like vicodin and can be called in or refilled. Plus Butrans is just a once weekly dose. Gave him a formulary grid and a butrans portal invite. I asked him to review it.
PPLPMDL0020000001	Cleveland	OH	44106	11/29/2011	i talked to Steve,Pharmacy Mgr,confirmed Butrans stocking but Steve said he's still not seen any Butrans scripts.i asked Steve how often does he provide patient counseling for patients taking opioids daily for their chronic pain? Steve said they provide a lot of patient counseling but the days vary as to how many patients are seen. i asked Steve if he would give the patient info booklets to patients he feels are appropriate for Butrans,so they can talk to their HCP's? Steve said yes he will do that and has given a few booklets out.focused steve on BWC and commercial plan patients to start on Butrans.confirmed OxyContin stocking and steve asked about coverage so i showed and left OxyContin formulary grids.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44195	11/29/2011	worked crile bldg pharmacy, pain managment dept-left BUP3015,fpj,patient savings card flashcard,formulary grid, web conferences for 11/29 and 11/30 for all HCP's in pain management with my business card as i couldnt see any doctors.
PPLPMDL0020000001	Cleveland	OH	44130	11/29/2011	TRIALIST- Reinforced Butrans formulary message & commercial insurance coverage at tier 3, showing formulary grid for support. Also showed him Butrans savings cards, explaining how those commercial insurance patients can save up to \$40 off that tier 3 co-pay. He said "OK, savings. Thank you," & walked into a room.
PPLPMDL0020000001	Cleveland	OH	44195	11/29/2011	kathy,PA,said some HCP's in dept are writing Butrans but she works with dr mekhill and dr mintzer and neither one of them has started anyone on Butrans.i asked why is that? kathy said dr mekhill likes the "tried and true" medications like tramadol and vicodin and until Butrans has been on the market for a long time,she doest see him starting anyone on Butrans.kathy said dr mintzer is open to newer medications but doest really like opioids and is trying to get her patients off narcotics.i showed Kathy BUP3015,opioid experienced patients,clinical trial and asked if they see patients like this in their practice? Kathy said yes they have a lot of patients taking short-acting opioids.kathy said she thinks Butrans is a great option for some patients that would be willing to wear a patch and she will do her best to recommend Butrans to the doctors but she cant promise anything.showed formulary grid and focused Kathy on BWC and commercial insurance plans. recommended Senokot-S
PPLPMDL0020000001	Parma	OH	44129	11/29/2011	REPEAT CUSTOMER- Dr Ortega said he did not have time for a discussion today. He said he will try to find some Butrans patients before my next visit so he has more feedback to give me. Reminded him of savings cards for Butrans & OxyContin & asked him to give them out with prescriptions when appropriate. He agreed.
PPLPMDL0020000001	Highland Heights	OH	44143	11/29/2011	Window call....i reviewed the positioning of butrans (before going to hydrocodone ATC) and oxycontin (for more severe pain and after 20mcg of butrans). Provided formulary grids for both and offered savings cards. None needed. nothing learned.
PPLPMDL0020000001	Westlake	OH	44145	11/29/2011	Went to Marlene's office to set up in service, she was in a meeting. Spoke with Will on 3rd Fl N/S. He helped me to leave a voicemail for Marlene and said to try to catch her in her office by phone between 8-9am. I reviewed Purdue's products and that I am working with her to schedule an in service.
PPLPMDL0020000001	Cleveland	OH	44114	11/29/2011	dr said he's starting more patients on Butrans every week.dr said he's starting patients with john stare's,PA here with dr, recommendation.dr said majority of patients are percocet patients but he's now considering some vicodin patients that arent controlled,to start on Butrans.i asked dr how patients were doing and how were discussions in the follow-up appointments? dr said patients are doing well on Butrans,no call-backs from patients,dr said follow-up appointments are where they discuss side effects and titration of Butrans and so far so good.i asked if dr he'll see more patients this week,that he can start on Butrans? dr committed to starting more patients on Butrans.dr said caresource is biggest challenge as they wont cover Butrans,focused dr on BWC and commercial insurance plans.
PPLPMDL0020000001	Cleveland	OH	44103	11/29/2011	talked to dr about patients she's started on Butrans,dr said majority of patients were taking percocet for their chronic pain and not controlled asking her for more pills,so she talked to them about Butrans and patients were willing to try Butrans.dr said she still gives some short-acting opioids for breakthrough pain but overall patients are doing great on Butrans.dr said only challenge now is getting Caresource to approve Butrans.dr said she's willing to do PA's for caresource patients so thats not the problem,its getting Caresource to just approve Butrans for her patients.i told dr i appreciated her patience with doing these PA's for caresource patients and asked that she continue starting more patients on Butrans,dr committed to do this. we talked about OxyContin being an option for patients.dr said she continues to start patients on OxyContin and gets approval for medicaid and medicare patients so no issues there.showed formulary grid for OxyContin and asked dr to continue choosing OxyContin for those patients she feels are appropriate.dr said she will do that.recommended Senokot-S
PPLPMDL0020000001	Parma	OH	44134	11/29/2011	LOYALIST- i showed Dr Hernandez the BUP3015 study results & reminded him of our previous conversation when we discussed trying Butrans on some opioid-experienced patients such as those on Vicodin a few times per day chronically. He said he remembers this. I asked what his thoughts were on the study data. He said it was interesting. He then said he just had a patient today who had been on Opana 20mg twice a day. The patient had the remainder of her Opana prescription stolen from her, went through withdrawal, then decided she did not want to go back on Opana after she came out of withdrawal. The patient was in pain but not "excruciating" pain per Dr Hernandez. He said he chose this as a potential Butrans patient & that he prescribed the 20mcg dose for her. He said he knows 20mcg is not a typical starting dose & that the Butrans might not work. Discussed OxyContin as a possible option for patients beyond Butrans. He said he would let me know how this new patient does on Butrans.

	Mayfield Heights	OH	44124	11/29/2011	Spoke to Warren about the movement of butrans. He said he really has not been seeing much lately and when he does see a script it has come from the hillcrest pain mgmt. I explained to him the allowable use of supplemental analgesics in case he gets an alert. He said he would just override such an alert. He said that the oxycontin volume has been steady still and some patients use that savings cards. Only a couple of patients may have a higher co pay of about \$100. I told him I would provide savings cards the next time I was in.<font color=blue><b>CHUDAKOB's query on 12/08/2011</b></font>Just curious as to why you did not provide them on this call? How many scripts could he have used them on between now and the next time you are in? Seel with a sense of urgency!<font color=green><b>SIMERTOC's response on 12/13/2011</b></font>Didn't have them in my bag at the time. He never said that copays were too high for patients to pay.<font color=blue><b>CHUDAKOB added notes on 12/15/2011</b></font>Preparation!
PPLPMDL0020000001	Cleveland	OH	44114	11/29/2011	dr said she started a few patients on Butrans after I saw her last week.I told dr that was great and asked why she chose Butrans for these patients.dr said these patients were taking vicodin,not controlled and asking her for more pills so she explained that Butrans was a once weekly dosing option in a patch that they would rotate once a week,dr asked the patients if they would be interested in trying this option,all of the patients said they would be willing to try Butrans but asked if they could still have their vicodin for breakthrough pain? dr told them yes they could start on Butrans and still have some vicodin for breakthrough.dr said it was easy to explain to patients and they got Butrans at the pharmacies,no problems.I asked dr if she has more patients like this coming into the office this week? dr said probably so.I asked dr if she will start these patients on Butrans? dr committed and I focused dr on BWC and commercial insurance patients.recommended Senokot-5
PPLPMDL0020000001	Mayfield Heights	OH	44124	11/29/2011	Doc said he wrote a couple of scripts of butrans since I was last there. I asked him about the patients and their previous therapy. He said one patient was previously on precocet. He did not remember the strength of butrans he wrote. I showed him the conversion guide and explained the appropriate starting dose. He also said that one patient was medicare and one was regular insurance. I explained that medicare patients may not be good candidates as butrans is not covered on medicare. I reviewed the commercial coverage and reminded him to give a savings card. I asked him to continue to prescribe for patients who fail on tramadol or who can not tolerate hydrocodone like he said he would. He said he will write more now that he has gotten his feet wet. I reminded him that oxycontin is another option for patients that have more severe pain and provides more flexible dosing options.<font color=blue><b>CHUDAKOB's query on 12/08/2011</b></font>Do we have a conversion guide for Butrans?<font color=green><b>SIMERTOC's response on 12/13/2011</b></font>Initiation guide<font color=blue><b>CHUDAKOB added notes on 12/15/2011</b></font>Thanks! Please be reread your notes before submitting them.
PPLPMDL0020000001	South Euclid	OH	44121	11/29/2011	Spoke to Tricia about the stocking of butrans. She confirmed that they have it stocked but she personally had not filled any scripts. I told her where we are asking docs to use butrans(after tramadol failures) but also let her know that supplemental analgesics can be used concurrently and referred to the Appropriate FPI section. Let her know about the savings card program and the availability online if customers come without the card.
PPLPMDL0020000001	Westlake	OH	44145	11/29/2011	Dr said that he just started a new patient on Butrans yesterday. She was a patient who has difficulty swallowing pills. He has not heard back from her yet. I reviewed that Butrans reached steady state in 3 days.
PPLPMDL0020000001	Cleveland	OH	44103	11/29/2011	I talked to Tim,Pharmacist,about Butrans stocking,Tim said they have 1 carton Butrans 5mgc in stock but no scripts.Tim said I need to speak with Joe,Owner Sheliga Drug,but he's on vacation this week.Tim said to call Joe and set-up appointment because they dont stock any CII narcotics and he's surprised Butrans was in stock since they haven't had CII narcotics in stock in the past. I asked Tim what features of Butrans stood out to him,showed visual aid? Tim said transdermal delivery and 1 application every 7 days.Tim said there are probably some patients who would be willing to wear a patch and like this type of delivery but he's not seen any scripts for Butrans yet.Tim asked about medicaid coverage so we discussed PA for medicaid and caresource patients.focused Tim on BWC and commercial insurance patients and I asked tim if he would be willing to give patient info booklets to patients that are taking immediate release opioids but not controlled and patients can discuss Butrans with their HCP's? Tim said I have to get approval from Joe,Owner,to do this.
PPLPMDL0020000001	Cleveland	OH	44114	11/29/2011	talked to John,PA,about the patients he's starting on Butrans and John said majority are perccot patients but they are looking at vicodin patients who arent controlled,to start them on Butrans too,John said biggest challenge is caresource,John said 1 PA for a Caresource patient was approved,due to the patient meeting the PA requirement of trying 2 long-acting opioids first before getting Butrans approved. John said for other Caresource patients,only taking short-acting opioids,they haven't been able to get Caresource's approval for Butrans with failure of 2 short-acting opioids.I asked John if he'll continue starting patients on Butrans but focus on BWC and commercial insurance patients? John said he will do that.recommended Senokot-5
PPLPMDL0020000001	Mayfield Village	OH	44143	11/29/2011	HCP said they have written Butrans a couple of times but it isnt being covered. I asked about the coverage of the patients tried. She said they have a lot of medicare and they dont tend to look at the insurance while she is in with them. I asked her to consider the patient's age. If they are less than 60-65 years of age they are more likely to have the proper commercial coverage. She said she tried a patient that was previously on perccot, the patient was able to get it initially and it worked well but cold not afford thhe refills so he was switched back to perccot. She said she would keep trying but narcotics are reserved as a last resort in the practice and those patients are usually medicare. Told her that I understand and keep butrans in mind for the younger patient. (Dr. Mandel was on vacation this week)
PPLPMDL0020000001	Beachwood	OH	44122	11/30/2011	TRIALIST- Showed Dr Yokiel BUP3015 efficacy results, explaining the study. Pointed out that nearly half the patients on Butrans 20mcg reported at least a 30% reduction in pain. I asked if that was in line with what results he would expect. He said he generally talks about a 50% reduction being the ultimate goal & added that he thinks 30% is still "pretty good". He asked me how to taper patients on, for example 6 5mg Percocet per day. Showed initiation guide & discussed tapering to no more than 15mg oxycodone before starting Butrans. I asked if he thought that was reasonable. He said yes for most patients. He said he would start by trying patients on 3-4 Percocet per day on Butrans & if he gets good results, he will continue. He said he had been somewhat concerned about tapering patients or causing them to go into withdrawal with Butrans. I asked if this conversation cleared things up for him & he said yes. He said again he would prescribe. Discussed OxyContin q12h as an option for appropriate patients beyond Butrans 20mcg.
PPLPMDL0020000001	Rocky River	OH	44116	11/30/2011	I reviewed the medication guide for Butrans and that it take 3 days to reach steady state. I discussed that Butrans can be used with supplemental analgesia and she said she did not know this. I asked about the movement of Butrans and she has not seen many scripts. I asked if she would let patients know about Butrans as an option and she agreed to it if she consults with them. Reminder that OxyContin is another long acting option.
PPLPMDL0020000001	Maple Heights	OH	44137	11/30/2011	NON-PRESCRIBER- Dr Gene said he is "almost" to the point of prescribing Butrans. I asked him to clarify. He said he feels that he knows about it well enough. I asked him what he thinks is holding him back from prescribing then. He said it is just a matter of seeing the right patient. Reviewed the appropriate patient type, focusing on patients who are not well-controlled on either NSAID's/COX-2's, Vicodin, or tramadol a few times per day. He said he actually does have patients who fall into that. I told him those are his potential Butrans candidates. He said he recently went to a convention where Purdue was there & he discussed Butrans with some of the reps. He said he knows that patients can take supplemental analgesia with Butrans. I told him this is correct. Also discussed OxyContin as an option for appropriate patients. I asked him where he thinks OxyContin should be used. He said in patients who are terminally ill or by pain management specialists. He said he does think it is a good, effective drug, but only in the hands of the appropriate patient. I agreed that it should only be used on appropriate patients & that caution should be exercised in prescribing it, just as it should be with all opioids.
PPLPMDL0020000001	Rocky River	OH	44116	11/30/2011	Spoke with Leigh Ann, I reviewed the Butrans medication guide and asked if she would ever let appropriate patients know about Butrans as an option. She said probably not, but only if they asked her. I asked her to take the time to reviewed the medication guide with patients and she agreed.
PPLPMDL0020000001	Cleveland	OH	44109	11/30/2011	showed dr BUP3015,we discussed opioid experienced patients,dr said he hasnt started anyone on Butrans,dr said he doesnt write a lot of narcotics.showed dr BUP3015,30% clinical reduction page and asked if this was clinically significant? dr said yes any reduction in pain was good for patients.I asked if this was significant enough for him to prescribe Butrans? dr said if he has appropriate patients and their insurance covers Butrans,he'll consider it.dr asked about medicaid coverage for Butrans,we discussed PA for caresource and medicaid patients.I asked dr if he has 1-2 patients,commercial insurance,that he can start on Butrans this week? dr said he'll see who comes in this week and will consider Butrans if patients are appropriate.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44109	11/30/2011	dr said he's not started anyone on Butrans but has given some patient info booklets for patients to read and he's following up with them in a couple weeks.dr said these patients were taking perccot,not controlled and asking for more pills so he wanted to see if they would be interested in starting Butrans.I asked dr how patients responded? dr said all of the patients wanted to read more info on Butrans and asked if they could still take their perccot for breakthrough pain? dr told patients they could have both.I asked dr if he has a couple patients coming in this week that he can start on Butrans? dr said he probably will and if insurance covers Butrans he'll start patients.dr asked about medicaid coverage,we discussed PA for caresource and medicaid.told dr he still has option of OxyContin for appropriate patients,showed flashcard.dr said he doesnt really have many patients on OxyContin but will keep it in mind,showed formulary grid and discussed insurance coverage for OxyContin.recommended Senokot-5
PPLPMDL0020000001	Garfield Heights	OH	44125	11/30/2011	Spoke with Heather, pharmacist. She said they have not seen any activity for Butrans there. Showed patient information booklet. She said she has some. I let her know they can be given to customers even if that person does not have a prescription for Butrans. Discussed appropriate patient type & focused on patients who get chronic around-the-clock opioids, especially those who are not well-controlled on their current medication or if she thinks they could benefit from a transdermal system dosed once weekly. She said she would do this. Also discussed OxyContin savings cards & gave her a package of them per her request.
PPLPMDL0020000001	Cleveland Hts	OH	44118	11/30/2011	I asked doc if that cleveland clinic employee patient was ever able to get his butrans script filled. He said he was not sure and had his staff call to find out. The patient did not pick it up as it was \$50+. I told doc that cleveland clinic employees are encouraged to have their scripts filled at a cleveland clinic pharmacy at a more affordable copay. Doc said he also had one incident where butrans was on back order at a CVS pharmacy. He should me the back order. The cleveland clinic was coming in to pick up a script for Lortab. Reminded doc that butrans can be called in. He said he will try to remember. Informed him of the caresource coverage after tramadol failures. Also reminded him of the preferred coverage with oxycontin for appropriate patients.
PPLPMDL0020000001	Cleveland	OH	44109	11/30/2011	dr said he started 1 patient on Butrans,I asked dr why he chose Butrans? dr said this patient was taking perccot,2 pills a day,and that wasnt controlling the pain and patient wanted more pills.dr told patient he wasnt giving more pills but was going to start patient on Butrans and gave patient info booklet for patient to read about Butrans.dr said it was easy to explain to this patient and patient got Butrans from pharmacy easily.I asked dr if he had more patients like this that are taking perccot every day but not controlled,dr said he has a lot of patients like this but medicaid is biggest challenge here.dr asked about coverage for Butrans? showed formulary grid,focused dr on commercial insurance plans and we talked about PA for caresource and medicaid patients.I asked dr if he could find 1 patient this week to start on Butrans,focusing on commercial insurance? dr said he'll see who comes in and will keep Butrans in mind.we talked about OxyContin formulary coverage,dr said he doesnt have problems with OxyContin coverage.showed appropriate patients flashcard and asked dr if he'll continue starting patients on OxyContin? dr committed to do this.recommended Senokot-5
PPLPMDL0020000001	Bedford	OH	44146	11/30/2011	TRIALIST- Dr Moufawad said he is sorry but he has not "had a chance" to prescribe Butrans. I asked if he means he hasn't had any appropriate patients for it. He said that he has really been getting rid of a lot of patients from his practice. He added that he has some patients who, when they find out he will not prescribe any medication at the first visit, do not want to come there, or has patients who may be on 3 Percocet per day & if he mentions a switch to Butrans the patients do not want to change from their Percocet, so he discharges them. He said those are the really the two types he has been seeing lately. He added that he knows who the appropriate patient type is & that he will prescribe "soon". Discussed OxyContin 7 tablet strengths.
PPLPMDL0020000001	Cleveland	OH	44109	11/30/2011	dr said she appreciated info on Butrans,took initiation guide but said she only has 1 or 2 patients on opioids.I asked dr if patients ever say their short-acting opioids arent controlling their pain? dr said occasionally but she doesnt have many patients taking opioids,told dr she has Butrans as an option if she feels patients are appropriate,dr said ok and took patient info booklet.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44109	11/30/2011	I talked to dr about how she manages chronic pain conditions.pg.11 visual aid,now? dr said usually non-narcotic and when patients need opioids she'll consult with pain management and pm&r first.I asked dr if she will see a couple patients this week,like the opioid experienced patients in BUP3015? dr said probably so.I asked dr if she'll start 1-2 patients on Butrans? dr said if insurance covers it,she'll start them on Butrans.dr asked about medicaid coverage? discussed PA for medicaid and caresource patients,being a frustration. I reviewed the PA information regarding Caresource and Medicaid. I asked Dr to focus on those BWC and commercial insurance patients and he agreed that he will. I spoke with Angela and she said that the PA are a pain but they do them and she does know that a Butrans one recently when through approved for 3 months.
PPLPMDL0020000001	Westlake	OH	44145	11/30/2011	I reviewed Drs last conversation with Amy regarding managing care with a frustration. I reviewed the PA information regarding Caresource and Medicaid. I asked Dr to focus on those BWC and commercial insurance patients and he agreed that he will. I spoke with Angela and she said that the PA are a pain but they do them and she does know that a Butrans one recently when through approved for 3 months.
PPLPMDL0020000001	Cleveland	OH	44104	11/30/2011	dr said she's been giving patient info booklets out to patients for their education on Butrans but hasnt started anyone.dr said most of her patients are controlled on short-acting opioids and if they arent she'll usually send them to pain management.I asked dr if she had a few patients that are taking tramadol every day for their chronic pain condition yet at some point ask her for more pills? dr said yes that does happen.I told dr that's where Butrans could be an option,showed BUP3015,30% clinical reduction in pain,dr said that was Impressive data and she'd keep it in mind.I asked dr it was significant enough for her to prescribe Butrans? dr said yes it was.I asked dr if she could start 1 patient this week on Butrans? dr said if patients are asking for something else besides pills and their insurance covers Butrans,she'll start them. focused dr on commercial insurance

	Cleveland	OH	44104	11/30/2011	dr said the 1 patient she has on Butrans is doing great and she's very happy so far with Butrans.i told dr that was great she started 1 patient and the patients doing well on Butrans,i asked dr if she had more patients like this 1 that she could start on Butrans? dr said majority of her patients just want their pills and aren't willing to wear a patch.dr said she's been telling patients about Butrans but they aren't interested. we talked about patients starting on Butrans but still having some immediate release opioid for breakthrough pain,showed fpi,2.4 maintenance of therapy,dr said ok she will start mentioning that to patients and see if that makes a difference.i asked dr to start 1 patient this week that is appropriate for Butrans,showed visual aid focused on opioid experienced patients.dr said she will do her best.focused dr on commercial insurance patients and discussed PA for caresource and medicaid patients.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	11/30/2011	dr said he's not started anyone on Butrans and doesn't have a lot of patients taking narcotics.dr asked about opioid experienced patients and who is appropriate for Butrans? showed visual aid,discussed these patients with dr and asked dr if he treats these patients? dr said yes but he rarely starts patients on narcotics,dr said if pain management or pm&r has patients on narcotics,then he'll continue patients on narcotics.i asked dr if he could think of 1 patient this week that's appropriate,to start on Butrans? dr said he will think about it and if someone is appropriate,he'll consider Butrans.focused dr on commercial insurance plans.recommended Senokot-S
PPLPMDL0020000001	University Hts Cleveland	OH OH	44118 44109	11/30/2011 11/30/2011	Window call...Reminded doc of the butrans patient type, once weekly dosing, and CII status which means it can be called in and refilled. Provided Butrans portal invite and formulary grid. Nothing learned. dr said he rarely writes narcotics and appreciated the Butrans info but he doesn't see himself prescribing Butrans anytime soon.i showed dr BUP3015,discussed opioid experienced patients with dr and asked if he treats these types of pain conditions,inclusion criteria? dr said yes he does and its with non-narcotic treatments.i asked dr what he does when non-narcotic treatments don't work? dr said he will refer to pain management or pm&r and work with the specialists.i asked dr if he felt a 30% reduction in pain was clinically significant? dr said yes it was.i told dr that's what he can expect from Butrans.dr said ok and took the study saying he'll think it over.
PPLPMDL0020000001	Northfield Maple Heights	OH OH	44067 44137	11/30/2011 11/30/2011	Quick call- Spoke with Sun Li (pharmacist). She said they are stocking Butrans. Discussed savings for CVS customers through e-voucher & also reviewed OxyContin savings cards. She said they still have cards from a previous Spoke with Jim, pharmacist. i asked about this location's stocking of Butrans. He said he might have gotten an auto-shipment, but he sent it back because they had not seen any prescriptions for it, as that is their policy. I presented patient information booklets & showed him how they can be used for patients who have a prescription or for patients who he thinks, based on discussions and/or prescription history, that they might be a good candidate for Butrans. He said he would keep one on hand for this purpose & would give it out if he sees anyone who he thinks would be a good candidate. Also discussed OxyContin savings cards. He said he has plenty of cards as he only has 2-3 people on it regularly.
PPLPMDL0020000001	Cleveland	OH	44106	11/30/2011	asked dr how he's explaining Butrans to patients? dr said he tells them Butrans is easy,with 1 patch and they just have to rotate patch once a week.dr said unless patients ask for something different,he's not really talking to them about Butrans.i asked dr if patients are taking 200mg tramadol daily for 1 of the chronic pain conditions shown on pg.11 visual aid,and not controlled,would he consider Butrans for them? dr said if patients want a refill of tramadol or more pills,he may just give them more,300mg is max he would give,but if patients asked for something different,then he would talk about Butrans.i asked dr if he's seeing clinical reductions in patients pain levels when he refills tramadol every month? dr said usually not,its just maintenance therapy,showed dr BUP3015,30% clinical reductions in pain page,asked dr if this was clinically significant? dr said yes it is.i asked if this reduction was clinically significant enough for dr to prescribe Butrans? dr said he will consider it and thinks Butrans is a good drug. focused dr on commercial insurance patients. recommended Senokot-S
PPLPMDL0020000001	Westlake	OH	44145	11/30/2011	Quick call at window, i asked if he was still getting success stories with his Butrans patients and he said he is. He said most patients are doing well. I asked if there were any updates to getting Butrans on formulary and he said the he's still working on it. I let him know that I would be doing some educating with the nurses on the floors of the hospital.
PPLPMDL0020000001	Cleveland	OH	44130	11/30/2011	TRIALIST- Quick window call with Dr Kansal. I handed back the "Experience" invitation & described the interactive programs. I asked him to log on to participate & let him know it may help him identify potential Butrans candidates. He thanked me & walked away. Discussed savings cards for Butrans & OxyContin with Dorothy.
PPLPMDL0020000001	Cleveland	OH	44109	11/30/2011	dr said she started 1 patient on Butrans and patient is doing well.i asked dr why she chose Butrans? dr said patient was taking percocet every day and not controlled and was asking for something else besides percocet for pain,dr talked to patient about Butrans and showed patient info booklet and patient was willing to try Butrans.dr said not all patients are willing to wear a patch as they want their pills.i showed dr fpi,2.4 maintenance of therapy section,discussed immediate release opioid or non-opioid therapies with Butrans,dr said ok she'll consider that next time.i asked dr if she'll start a few patients this week on Butrans,focusing on commercial insurance patients,dr said he will talk to patients and if they are willing to wear Butrans and rotate once a week,he'll start them.focused dr on commercial insurance patients.recommended Senokot-S
PPLPMDL0020000001	Mayfield Heights	OH	44124	11/30/2011	Spoke to Marsha about the stocking of Butrans. She said she may have filled it once and they did get it in. I explained the savings card to reduce customer cost. I referred to the section on supplemental use on short acting opioids and non opioids while on butrans therapy, in case she gets a prescription and gets an alert suggesting that combo therapy is not allowed. She said when that happens it is usually because of insurance restrictions.
PPLPMDL0020000001	Cleveland	OH	44104	11/30/2011	dr said he has a couple patients on Butrans and they are doing well,dr said no call backs so that's a good sign.i asked dr why he chose Butrans for these patients? dr said patients were taking vicodin and 1 patient was taking percocet daily but not controlled so he thought Butrans could be a different option.i asked dr if it was his decision or patients asking for something else? dr said both patients wanted more pills and he wasn't comfortable with giving more pills so he started them on Butrans and gave less immediate release opioid for breakthrough pain. asked dr if he has more patients like this,that he can start on Butrans this week? dr said he has a lot of patients taking vicodin and percocet that he just refills every month and its maintenance therapy so he thinks Butrans would be a great option but the challenge is these are his medicaid patients.dr asked about medicaid coverage? we discussed PA for caresource and medicaid patients and i focused dr on commercial insurance patients. recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44104	11/30/2011	dr said he's given Butrans patient info booklets to patients,for them to read about Butrans and follow-up with him in 2 weeks.dr said he doesn't have a lot of commercial insurance patients but the one's he does have,he's given booklets. dr said majority of his patients are medicare so he's hoping they will cover Butrans next year.i told dr i don't have any info on that right now but will keep him updated.i asked dr to start 1 commercial insurance patient on Butrans this week if he feels this is an appropriate option, dr committed to do this,we talked about OxyContin formulary coverage and dr said he easily starts patients on OxyContin no issues with insurance.i asked dr to continue starting patients on OxyContin,dr said he will do that.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	11/30/2011	talked to dr quickly about the %of adults in his practice.dr said he treats 10-20% adults,majority are children.i asked dr if he had 1-2 adult patients that were appropriate for Butrans? dr said he might.showed BUP3015,discussed 30% clinical reduction in pain levels and asked dr if this was clinically significant? dr said yes it is. asked if it was enough for dr to prescribe Butrans for those 1-2 patients? dr said he will start some patients as long as insurance covers Butrans.dr asked about medicaid coverage,we talked about PA for medicaid,focused dr on commercial insurance patients.recommended Senokot-S
PPLPMDL0020000001	Cleveland Mayfield Heights	OH OH	44106 44124	11/30/2011 11/30/2011	worked apm dept Spoke to Albina about the positioning of butrans and the indication. She said she has not seen any scripts. I referred to the FPI and discussed the section on supplemental analgesia. I explained that supplemental analgesia can be used while on butrans therapy in the event she gets some alert indicating the contrary. Provided FPI and patient info guides.
PPLPMDL0020000001	Cleveland	OH	44120	11/30/2011	i talked to Darryl, floater pharmacist, as Mark, pharmacist/narcotics buyer is off today,i showed darryl fpi,2.4 maintenance of therapy,darryl said that was helpful as he's seen Butrans scripts filled here and some pharmacists are confused on the use of immediate release opioids with Butrans.i asked darryl if he's seeing titration of Butrans? darryl said he's only here occasionally so he doesn't know.i asked if darryl could hand out patient info booklets today,if any patients are taking short-acting opioids and not controlled and then patients can talk to their HCP's about Butrans? darryl said he would do that and asked that i follow-up next week with mark to show him the Butrans fpi too.i told him i would do that.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	11/30/2011	showed dr BUP3015,we discussed opioid experienced patients,dr said she's not started anyone on Butrans.showed 30% clinical reduction page,asked dr if that was clinically significant? dr said yes.i asked dr if it was significant enough for dr to prescribe Butrans? dr said yes it was.i asked dr if she can start 1 patient on Butrans this week? dr committed to do this,we discussed initiation and titration of Butrans and i asked dr to give patient info booklet to patients showing application/rotation section,dr agreed to do this. recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	11/30/2011	showed dr BUP3015,we discussed opioid experienced patients,dr said she's not started anyone yet as she doesn't have many patients on opioids but will keep Butrans in mind,we discussed initiation and titration of Butrans and i asked dr to find 1-2 patients this week,focusing on commercial insurance patients,dr committed,recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44106	11/30/2011	talked to dr about BUP3015,opioid experienced patients and asked dr if he has any patients like this in his practice,looking at inclusion criteria? dr said yes they see a lot of these conditions,we talked about 30% clinical reduction in pain and asked dr if this was clinically significant? dr said yes it is. asked dr if its enough for him to prescribe Butrans? dr said yes and he is starting patients on Butrans. showed initiation and titration info in visual aid and asked dr to start 1-2 patients this week on Butrans.dr committed,focused dr on commercial insurance plans and discussed PA for caresource and medicaid patients. recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44113	11/30/2011	i asked Dale,PA,how he's explaining Butrans to patients and how are patients receiving that info? dale said when patients ask for more pills and he's not going to give them more he tells patients there's a different option for them called Butrans,dale said he gives patients the patient info booklet to read about Butrans,gives the script and tells them he'll follow-up in 4 weeks to assess the pain levels,side effects,discuss titration,etc.i told dale that was great he has a comfort level explaining Butrans to patients and a thorough plan in the follow-up appointment.i asked dale if he could find more patients this week to start on Butrans? dale said yes he will continue starting patients on Butrans.focused dale on commercial insurance patients.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44106	11/30/2011	talked to dr about what triggers him to start patients on Butrans,dr said when patients tell him their short-acting opioids aren't lasting long enough, ask for more pills or ask him for something else he will talk to them about Butrans.i showed dr visual aid,focused on initiation and titration of Butrans,dr said he does titrate patients dose in follow-up appointments or if patients call into office Lisa,MA,will call the Butrans script into pharmacies. i asked dr if he had more patients to start on Butrans today? dr said he may have a couple and will start them if its appropriate.focused dr on commercial insurance patients,we discussed OxyContin being an option for patients,talked about 7 tablet strengths available and formulary coverage.dr said he has some patients on OxyContin and knows its available. recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	11/30/2011	asked dr what her expectations were with short-acting opioids,when treating chronic pain conditions,showed pg.11 visual aid? dr said if patients get pain relief from short-acting opioids that's the goal. asked dr what clinical reduction she sees from short-acting opioids? dr said some patients get a 30% reduction others don't and they are just maintaining by taking pills every day for their pain.i asked dr if 30% clinical reduction in pain was significant? dr said yes it was.i asked if it was enough for dr to start 1-2 patients on Butrans? dr said yes and she will start some patients on Butrans,depends on insurance coverage.dr said majority here are medicaid or cash paying,we talked about medicaid and caresource PA's,dr said she'll keep Butrans in mind.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44106	11/30/2011	i talked to Margie,Pharmacy supervisor,about Butrans stocking and scripts.Margie said no Butrans scripts have come here yet but she still has Butrans in stock.i asked Margie who are the biggest tramadol,vicodin and percocet writers besides pain management and oncology? margie said those 2 departments write the most vicodin and percocet but internal medicine and family medicine prescribe a lot of tramadol.i asked Margie if she could give Butrans booklets to patients that are taking these short-acting opioids and not controlled,so that patients can talk to their HCP's about Butrans? margie said yes she will do that and has been giving the booklets out to patients and telling them to speak with their doctors about Butrans.told Margie i appreciated her doing this and if she speaks with any HCP's in family medicine that i can't see she can give them a Butrans FPI and BUP3015,margie said she would do that and took a couple of each. we discussed OxyContin stocking and formulary coverage.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	11/30/2011	dr said she started 1 patient on Butrans,after my last lunch with her,dr said patient is doing great on Butrans so she's happy.i asked dr if she'll start more patients like this one? dr said yes she will.dr asked about medicaid coverage? we talked about PA for caresource and medicaid and i focused dr on commercial insurance patients to start on Butrans,dr said ok,dr said she has everything she needs and will call me if she has any problems or questions.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	11/30/2011	talked to dr about how he treats his chronic pain patients,dr said he will always start with NSAID's,exercise,physical therapy and non-narcotic drugs like Cymbalta,Lyrica,Savella,etc. dr said when all of that fails,he'll consult with pain management to discuss opioids,dr said if opioids are chosen,he would start patients on low dose tramadol and see if patients pain can be controlled with that regimen.showed dr BUP3015,discussed opioid experienced patients with dr and asked if a 30% clinical reduction in pain was significant? dr said yes,any reduction in pain was a step in the right direction.told dr that's what he can expect to see with Butrans.i asked dr if he can think of 1 patient that has commercial insurance,to start on Butrans? dr said he will keep Butrans in mind in case he sees anyone that's appropriate.focused dr on commercial insurance patients and discussed patient savings card program with him.recommended Senokot-S

PPLPMDL0020000001	Beachwood	OH	44122	11/30/2011	NON-PRESCRIBER- Reviewed Butrans with Jennifer & showed her demo patch. She asked how often patients have a problem with the patch staying on for a full week. I told her Butrans is designed to stay on for a full 7 days & if patients do have a problem with adhesion, they could cover it with Bioclusive or Tegaderm type coverings. Also discussed heat warning & adverse events. Jennifer informed me that she would be keeping Butrans in mind, however, today is her last day in practice before moving to China.
PPLPMDL0020000001	Cleveland	OH	44109	11/30/2011	i asked dr how she's treating these types of pain conditions.pg.11 visual aid? dr said she starts with NSAID's,physical therapy,exercise,SSRI's/SSNRI's and when all else fails she'll consult with pain management and pm&r on patients taking any narcotics.dr said she's not comfortable prescribing narcotics at this point.dr said she likes that Butrans is a patch and dosed once week as some patients may like this option.I asked dr if she could think of 1 patient this week,like the opioid experienced patients in BUP3015,opioid experienced clinical trial,to start on Butrans? dr said she will keep Butrans in mind.recommended Senokot-5
PPLPMDL0020000001	Rocky River	OH	44116	11/30/2011	Spoke with Elani, She said they have a few patients on Butrans and she has not heard any feedback from them. I reviewed the medication guide and she agreed to hand it out with Butrans scripts. We reviewed that Butrans reaches steady state in 3 days and that Butrans can be prescribed along with supplemental analgesia. We discussed OxyContin as an option when Butrans may not provide adequate analgesia.
PPLPMDL0020000001	Bedford	OH	44146	11/30/2011	TRIALIST- Spoke with MA Roberta who said Dr Haddad is out all week for family business. Discussed & handed back "Experience" invite & asked her to make sure Dr Haddad sees it & encourage him to log on. She agreed. Also discussed savings cards for both Butrans & OxyContin.<font color=blue><b>CHUDAKOB's query on 12/08/2011</b></font>While I know that Roberta is an MA, what does she do in this practice. You spoke to her, but it was all about the Dr. Could you get better buy in by talking to her like she was as important as the doctor instead of talking as a liaison to the doctor?<font color=green><b>APSEGAS's response on 12/11/2011</b></font>I will try this with her. Thank you.<font color=blue><b>CHUDAKOB added notes on 12/15/2011</b></font>Let me know how this works. Make the person you speak to feel like they are the most important person you are talking to...because they are.
PPLPMDL0020000001	University Heights	OH	44121	11/30/2011	Told doc I understand that cost is always a concern for patients being able to afford their medications. I described the butrans patient type and the savings cards for commercially insured patients to bring down the cost of their copay and Caresource is now covering butrans for patients that have failed on tramadol/vicodin/or codeine. He said that they will still require a Prior auth and he is going to stop doing them. He also said that many of his oxycontin patients are now requiring a PA and they dont always go through. Nothing else learned. Reminded him of the oxycontin preferred formulary coverage.
PPLPMDL0020000001	Cleveland	OH	44113	11/30/2011	dr said she's starting more patients on Butrans since she's seeing good results in her patients.dr said patients are happy with Butrans and she's seeing clinical improvements in their pain levels and cognitive functioning.i asked dr to keep starting more patients on Butrans.dr committed to do this.focused dr on commercial insurance patients.recommended Senokot-5
PPLPMDL0020000001	Beachwood	OH	44122	11/30/2011	NON-PRESCRIBER- Introduced Butrans to Roberta, Dr Yokiel's new NP. Reviewed core messages & alerted her to box warning. Presented initiation guide & discussed appropriate range of patients. Showed her a demo & demonstrated disposal with disposal unit. She said she liked the way the adhesive felt & felt it would be effectively stuck on skin for 7 days. She asked about adverse events. Showed her AE rates & asked if anything seemed out of line with what she would expect. She said she has not dealt with a lot of pain medications before in her other practices, but she did not feel the rates were bad. Discussed heat warning & black box. I asked if she feels like Butrans might be something she would be able to use in practice & she said yes.<font color=blue><b>CHUDAKOB's query on 12/08/2011</b></font>This was a good trial close. By adding in the next step, which is will you use it in your practice, you can gain a firmer commitment. Do you see how this can make a difference?<font color=green><b>APSEGAS's response on 12/11/2011</b></font>Yes, I can see that. This makes sense. Thank you for the suggestion.<font color=blue><b>CHUDAKOB added notes on 12/13/2011</b></font>Thank you for taking the suggestion!
PPLPMDL0020000001	Northfield Center	OH	44067	12/1/2011	Spoke with Kate, pharmacist/manager. Inquired about Butrans stocking. She said they actually just got a prescription for one patch for a patient. Kate said it was prescribed by a physician who specializes in treating migraines. She said the patient had been taking Percocet prior to being put on Butrans. Discussed appropriate patient type & range for Butrans. Also asked about OxyContin stocking. She said they do stock it & have a few people on the 20mg dose. She said they did not need any savings cards at this time.
PPLPMDL0020000001	Sagamore Hills	OH	44067	12/1/2011	NON-PRESCRIBER- Reminded Dr Lenox of previous Butrans conversations & core messages. He said he does not like to do a lot of pain management. I agreed that it can be difficult & that appropriate patient selection is imperative. Reviewed appropriate Butrans patient type/range, including OxyContin as an option for patients beyond the Butrans range. He said he does like that Butrans is a CIII. I suggested that he think of Butrans for patients who he is comfortable putting on opioid therapy for a chronic condition as a potential option before referring. He agreed this was a good position for Butrans.
PPLPMDL0020000001	Cleveland	OH	44103	12/1/2011	talked to Nick Pharmacist,about medication management therapy and how much he does this,Nick said occasionally he'll counsel patients as it relates to opioids,Nick said usually patients just want their pills but sometimes patients will tell him their short-acting opioids aren't controlling their pain so he'll recommend products.i asked Nick if he would give Butrans patient info booklets to those patients that are asking for something different? Nick agreed to do this,showed application/rotation section in booklet and told Nick to discuss this info with patients and have patients talk to their HCP's about Butrans,Nick said that sounded good and was comfortable doing this we talked about OxyContin being an option for patients,showed appropriate patients flashcard,Nick said they have a lot of OxyContin patients that come here,but he doesnt recommend OxyContin to anyone,nick said thats the dr decision.i told Nick I understood and asked him to keep the formulary grids for reference,nick said that was helpful.recommended Senokot-5
PPLPMDL0020000001	Parma	OH	44134	12/1/2011	Spoke with pharmacist Lily & inquired about Butrans stocking. She said they do not stock it. I asked if they did at one time. She said yes but they sent it back because they did not see any prescriptions for it. Showed her patient information booklet & suggested it be given to someone who either has a prescription or who she identifies as a potential Butrans patient. Reviewed with her appropriate patient type. She asked for a refresher on Butrans. Discussed core messages. She asked if they could take opioid medications in addition to Butrans. Told her yes & showed FPI 2.4 for support. Also discussed ability to titrate after 3 days if necessary to a maximum of 20mgcd. Discussed OxyContin savings cards & gave her a package, reviewing eligibility.
PPLPMDL0020000001	Euclid	OH	44119	12/1/2011	I described an appropriate patient for butrans: less than medicare age, presenting with spondylolisthesis, maybe already taking a 2-3 tabs of vicodin. I asked doc if he had any such patients. He said a few. I asked him if he is opposed to starting a patient on butrans instead of titrating vicodin. He said he can do that. I reviewed the formulary coverage, savings cards and the caresource coverage after failure on tramadol. I asked him to try just one patient. Reminded him of the oxycontin option for more severe pain patients.
PPLPMDL0020000001	Sagamore Hills	OH	44067	12/1/2011	NON-PRESCRIBER- Dr Sevier said he still has two satisfied patients on Butrans. I asked if he has had to do any titration of dosing with either of them & he said no. Reviewed with him the core messages & discussed appropriate patient type & range, including OxyContin as an option for appropriate patients beyond Butrans. He said he would continue to keep Butrans in his mind & would try to find more patients.
PPLPMDL0020000001	Lyndhurst	OH	44124	12/1/2011	I asked doc how patients are doing on butrans. She said she has just a couple of patients that are taking and have the insurance to afford it but it is going well for them. She said one patient was taking tramadol and just didnt want to take pills. She believes that the patient is taking 10mgc. I showed her the conversion estimates if switching from another opioid. I reminded her of the oxycontin patient type and the savings cards for both products.
PPLPMDL0020000001	Solon	OH	44139	12/1/2011	I asked doc to continue to try butrans for appropriate patients.
PPLPMDL0020000001	Cleveland	OH	44127	12/1/2011	I met with Denny Yanoscik and Chuck Calalesina to review Report 8 and plan for 2012. We discussed Purdue's scheduled marketing programs for laxatives and Slow-Mag. We also planned Marcs 2012 promotional calendar and the 1st 2012 promotion for Discount Drug Mart for February.
PPLPMDL0020000001	Cleveland	OH	44127	12/1/2011	dr said she tried to start a couple Caresource patients on Butrans but they didnt approve Butrans.dr said these patients were taking short-acting opioids and had tried 2 of them but Caresource still didnt approve the PA for Butrans.i told dr i appreciated her trying to start a couple patients on Butrans and was sorry they didnt get approved.i asked dr to focus on 1-2 commercial insurance patients that would be appropriate for Butrans,showed visual aid and discussed opioid experienced patients.dr said ok she doesnt have many commercial insurance patients but will keep Butrans in mind.recommended Senokot-5
PPLPMDL0020000001	Independence	OH	44131	12/1/2011	NON-PRESCRIBER- Spoke with Denise (MA) & Janelle. I gave them portal invites for each of the practitioners & explained the interactive programs for the physicians. I asked them to be sure each physician received an invite. They agreed. Denise said she remembers that Butrans is for pain. Reviewed with them Butrans indication & core messages. Also discussed savings cards for Butrans & OxyContin.
PPLPMDL0020000001	Cleveland	OH	44105	12/1/2011	i asked dr if she's given any patient info booklets to patients? dr said yes a lot of them but no patients are interested in stopping their percocet and trying Butrans.i showed dr fpi,section 2.4 maintenance of therapy section,and discussed with dr that she can give Butrans with immediate release opioid for breakthrough pain.dr said she remembered that but its the patients who dont want to try a patch.i asked dr if she could find 1 patient this week,thats willing to try Butrans and dr can decide if patient gets percocet for breakthrough? dr said she will keep giving booklets to patients and keep trying,focused dr on BWC and commercial insurance
PPLPMDL0020000001	Cleveland	OH	44113	12/1/2011	talked to dr about his patients taking vicodin every day for their chronic pain,but not controlled and asking dr for more pills,i asked dr to stop and start patients on Butrans instead of refilling the vicodin.dr said he's trying and is giving patients the Butrans patient info booklets to read about Butrans,dr said a lot of patients havent been interested in wearing a patch,they only want their pills.dr said he'll continue talking to patients about Butrans and give booklets out thats all he can do.i told dr that was great he was talking to patients about Butrans and im confident he'll start a few patients soon that are willing to try Butrans.focused dr on commercial insurance plans.
PPLPMDL0020000001	Parma	OH	44129	12/1/2011	TRIALIST- Dr Gigliotti said it was not a good day for a discussion. He did point out that he put the Butrans patient information booklets front & center on his desk & had his initiation guide "ready" for patients. I suggested that he use the patient information booklets to help him "sell" the idea of Butrans to a patient as there is a lot of information that could be useful to them within. He said that was a good idea & that he was sure he could find a patient for Butrans. Also reminded him of savings cards for Butrans & OxyContin.
PPLPMDL0020000001	Sagamore Hills	OH	44067	12/1/2011	NON-PRESCRIBER- Re-introduced Butrans to Penny, reminding her of core messages. She asked what "equivalence" Butrans has with tramadol 50mg. I told her we have no comparative data & showed initiation guide pg 6 to help her position Butrans. Gave her portal invite & explained the program. She said she would log on. I asked if she could see herself using Butrans in patients who fit the appropriate type & range of patients & she said she would think about it & it is good to know there is another option for her, as a nurse practitioner, to prescribe.
PPLPMDL0020000001	Cleveland	OH	44135	12/1/2011	Quick call at window, Dr said that he wrote another Butrans script yesterday and he's been happy with the results. I spoke with the staff regarding managed care and they said they have not had any issues.
PPLPMDL0020000001	Independence	OH	44131	12/1/2011	REPEAT CUSTOMER- Dr Trickett said she has been trying Butrans on a few different patients. She added that coverage & cost has been somewhat of a hindrance for some of the patients. Reviewed Butrans formulary information & reminded her of savings cards for eligible patients. She said she has a couple patients who are doing well on it & that she does keep it in the back of her mind when assessing medications for a patient.
PPLPMDL0020000001	Cleveland	OH	44113	12/1/2011	i showed dr BUP3015,discussed opioid experienced patients and asked dr if he treats these types of pain conditions? dr said yes a lot of back pain and arthritis.i asked dr if there were any therapies he would like to replace for these chronic pain conditions? dr said he doesnt like prescribing narcotics even though he has to,to manage patients pain.i asked dr how he decides if an immediate release opioid isnt the right option for patients and they need something different? dr said if patients ask him for more pills or say their short-acting opioids aren't lasting long enough,then he'll talk to patients about something different.i told dr thats where Butrans is perfect.we talked about initiation and titration of Butrans,i asked dr if he will start 1-2 patients this week on Butrans? dr said he will consider it if patients are willing to wear a patch and insurance covers Butrans.focused dr on commercial insurance patients.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44106	12/1/2011	talked to Emily,Pharmacist,about Butrans stocking and scripts,emily said they have gotten a few Butrans Rx,i asked who's writing Butrans? emily said she doesnt know specific HCP names but does know some are from the cleve clinic we talked about 6 butrans core selling messages,showed visual aid and asked emily if she would give patients the Butrans patient info booklets if they are taking short-acting opioids and not controlled,so patients can talk to their HCP's? emily said she'll hand them out and liked that idea so patients can learn about Butrans through the booklet we talked about formulary coverage,focused on commercial insurance plans and discussed PA for medicaid,discussed OxyContin stocking and scripts for OxyContin,emily said majority of patients are same one's monthly getting OxyContin,not new patients.we discussed formulary coverage for OxyContin and i recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44109	12/1/2011	dr said she started a couple patients on Butrans,patients are doing well and she's happy with Butrans.i asked dr why she chose Butrans for these patients? dr said 1 patient was taking vicodin,the other percocet and these short-acting opioids weren't controlling their pain so they were asking for more pills.dr said she told them no she wasn't going to give them more pills but wanted them to try something different so she started them on Butrans.i asked dr if she has more patients like this,to start on Butrans this week? dr said yes she probably will.i asked dr if she'll start 2 more patients on Butrans this week? dr committed to do this.we discussed titration and formulary coverage for Butrans and i focused dr on commercial insurance plans and BWC.recommended Senokot-5
PPLPMDL0020000001	Westlake	OH	44145	12/1/2011	i showed that Butrans can be an option after tramadol is no longer controlling his patients pain. I asked if he would find a few patients like this to start on Butrans and he agreed. I reviewed that patients on higher doses of opioids can convert to OxyContin when they need a long acting option.

	Solon	OH	44139	12/1/2011	Alan, Lynn and I attended meeting with Mike. Alan discussed parts of the contract for Member Health and Caremark. Mike hadn't had a chance to review much of the redlines but believes it will be easy to iron out much of it. He asked Alan to submit a bid for 2013 and said the request for Admn Fees is a new concept to him and Dan and that they can work through it later. We discussed Butrans which he said was looked at by both P&T Committees and given a "may add". He recalled that he and I reviewed pricing and he thought it was workable. He will provide pricing to Neal Lund who will run it through their modeling and determine if they can work with it at 2T or 3T. He's optimistic it will work. He cannot begin to add products to the 2012 formulary until after Jan. 1 because Caremark said to stop. As a result, he and Dan will look at Butrans in January and put it at the top of the list for deciding to add. If it does go, it'll be officially on the website formulary 4-1-12.
PPLPMDL0020000001	Independence	OH	44131	12/1/2011	NON-PRESCRIBER- Dr Sundaram said he prescribed Butrans for a patient a couple of weeks ago. He said this was a younger female patient who was withdrawing from heroin. I told him Butrans is not indicated for or recommended for that. He said he knows. He added that the patient was given Buprenex in the hospital & did well on it, so she was sent home on Butrans as that is what the addiction specialist wanted for her. He asked about cost/coverage. Reviewed formulary information & savings cards with him. I asked if he had pain patients with insurance who may be Butrans candidates. He said he would try to find some. OxyContin broad formulary
PPLPMDL0020000001	Cleveland	OH	44111	12/2/2011	Quick call at window, She told me that Dr Daoud is now only going to Westlake and Lutheran now. They have a new NP who will just be working in the hospital so Barbara is glad to be back in the office full time. They have a new Dr named Dr King. We reviewed Butrans key messages and I asked if she would share the info with Dr King. She agreed. We discussed the savings program for both Butrans and OxyContin.
PPLPMDL0020000001	Lakewood	OH	44107	12/2/2011	Dr told me that he had prescribed Butrans for a patient who was taking OxyContin 40mg and he had success. He said the patient is doing really well and likes Butrans. I let Dr know that Butrans may not provide adequate analgesia for patients taking more than 40mg of oxycodone per day. We discussed that patients taking more than 40mg per day of oxycodone should be tapered down before initiating Butrans to prevent withdraw symptoms. We discussed the invitation guide and when to initiate the 5mg or the 10mg dose based on what the patient is currently taking. He asked me about patients who are taking 10mg of percocet 4 times per day and I reviewed that he should taper these patients down to 15mg of oxycodone per day and then start on the 10mg dose. I reviewed the Butrans is a CII and Dr really liked this fact so that he can write refills. We discussed that steady state is 3 days and he can titrate after that. Dr said that he has been trying many patients on Butrans but some say it is too expensive. He said that he had a Medicare patient say the cost was over \$100. I reviewed the managed care for Butrans and asked him to focus on commercial insurance. I spoke with Pat regarding managed care and the savings cards. She said that he has recently started many patients on Butrans as has been giving savings cards out. She said that ideally all of their chronic patients would be on Butrans.
PPLPMDL0020000001	Garfield Hts	OH	44125	12/2/2011	NON-PRESCRIBER- Dr Sadowski saw me & pointed to "Butrans" on the literature in my hand. He said, "Oh, I just read someplace that this might actually work for some people." I told him I have been trying to tell him this for almost a year. He said that he thinks he wants to try it on some patients now. He added that the article he read was talking about "the higher doses". Discussed 3 total strengths, with 5 & 10mcg being the two starting doses & 20mcg being the maximum dose. Also discussed titration ability after 3 days. He asked if he has co-pay cards. Showed him where they are located & let him know Deena knows where they are as well in case he forgets. I asked if he thought he could identify a few patients to get started on Butrans for him to get his own clinical experience going. He said yes & that he does not like to write short-acting opioids. Reminded him that Butrans is still a CII opioid with abuse/addiction potential. Also reminded him of OxyContin savings cards.
PPLPMDL0020000001	Lakewood	OH	44107	12/2/2011	I reviewed the key messages for Butrans, though there is not a lot of opportunity to recommend in the hospital. We reviewed OxyContin as an option when patients are taking hydrocodone or oxycodone around the clock. She said that Dr Khuri does prescribe it and I asked if she would recommend it for appropriate patients. She agreed.
PPLPMDL0020000001	Cleveland	OH	44111	12/2/2011	Quick call with Jim, we reviewed the medication guide for Butrans. We reviewed that Butrans can be used with supplemental analgesia and that Butrans can be called in and refilled. I asked if he would let appropriate pain patients know about Butrans as an option and he agreed. We reviewed OxyContin as a long action option and that it is covered on most managed care plans.
PPLPMDL0020000001	Lakewood	OH	44107	12/2/2011	She said she is doing well learning more about pain management. I reviewed the key messages for Butrans and appropriate patients for Butrans. We discussed when OxyContin may be an option for patients taking hydrocodone or oxycodone around the clock. She agreed to recommend Butrans or OxyContin for appropriate patients.
PPLPMDL0020000001	Independence	OH	44131	12/2/2011	NON-PRESCRIBER/FORMER TRIALIST- Quick call- Caught Dr Pain in the hallway. Reminder of Butrans appropriate patient type, focusing on patients who are not well-controlled on tramadol. He said he is keeping it in his mind.
PPLPMDL0020000001	Independence	OH	44131	12/2/2011	NON-PRESCRIBER- Dr Jack said he is happy to see that I have not given up on them. I asked him why I would give up when he has acknowledged that he has many patients that would be appropriate for Butrans. He said I made a good point. Reminded him of appropriate patient type & handed him portal invite & asked him to log on, letting him know that this may help him identify Butrans patients within his practice. Also delivered OxyContin broad formulary coverage message.
PPLPMDL0020000001	Cleveland	OH	44109	12/2/2011	discussed initiations presentation with dr.dr said he wouldnt start an opioid naive patient on Butrans.dr said he always starts with short-acting opioids in combination with physical therapy and exercise.dr said he will start patients on a long-acting opioid like OxyContin or Duragesic,after all short-acting opioids have failed.i told dr that was fine if OxyContin was a choice for his patients,i showed dr appropriate patients flashcard for OxyContin and told dr that he should still be choosing OxyContin for appropriate patients,however dr has choice of Butrans before OxyContin.dr said he will think about it but asked about medicaid coverage? i asked dr how big medicaid was for his practice? dr said he doesnt know the number but stated theres a lot of medicaid patients here.told dr there's a PA for medicaid and caresource patients,but i asked dr if he had BWC and commercial insurance plans? dr said yes to both.i told dr thats the easiest place to start a couple patients on Butrans. asked dr if he will start 1-2 patients today and next week,that are appropriate for Butrans? dr committed to do this.recommended spoke briefly with Chris (pharmacist). Discussed patient information booklets which he said he has some of. Let him know they could be given to patients who he identifies as potentially benefiting from Butrans based on patient type. He said he would do that. Also reviewed savings cards for both products. He said he has enough of those also.
PPLPMDL0020000001	Cleveland	OH	44125	12/2/2011	Spoke with Ken, I reviewed the use of supplemental analgesia with Butrans. We reviewed the medication guide and he agreed to hand them out to patients. He said that they have seen a few scrips for Butrans. I asked if he would let appropriate chronic pain patients know about Butrans as another option and he agreed. Reminder that OxyContin is also a long acting option and they still had savings cards.
PPLPMDL0020000001	Cleveland	OH	44109	12/2/2011	dr said he started 1 patient on Butrans and patient was doing well so he's considering a couple more patients to start on Butrans.i asked dr why he chose Butrans? dr said patient was taking a couple vicodin a day and not controlled and wanted more pills so dr told patient they were going to try Butrans and patient could have vicodin for breakthrough pain.dr said it was easy to explain and gave the patient info booklet.i asked dr if he has more patients like this 1,that have commercial insurance that he can start on Butrans today and next week? dr said yes he has a couple patients in mind.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44113	12/2/2011	i discussed patient case studies,initiations presentation,with dr and asked dr if she's thought of any patients this week that are appropriate for Butrans? dr said she had a few patients take the patient info booklets home so they could read more about Butrans and she's following up with them.dr said biggest challenge is that patients dont want to stop taking their pills.showed dr fpj,section 2.4 maintenance of therapy section,discussed with dr that patients can take immediate release opioids or non-opioid therapy with Butrans,i asked dr if she could start 1 patient today-next week,focusing on commercial insurance plan patient? dr said she will keep talking to patients and when someone is interested in trying Butrans,she'll start them.recommended Senokot-S
PPLPMDL0020000001	Lakewood	OH	44107	12/2/2011	Met Karen, Dr Grimm's nurse. He will be starting next week but then out again for vacation for a few weeks. She said that Dr Grimm will be open to meeting with reps and she is also going to talk to him about having lunch appointments. She said I schedule an appointment in Jan when Dr gets back from vacation. We reviewed the key messages for Butrans and I reviewed OxyContin as another long acting option.
PPLPMDL0020000001	Lakewood	OH	44107	12/2/2011	Dr said that he just started 2 new patients on Butrans. I asked him why he thought of it for those patients and he said he just started remembering it. He said they are chronic pain patients who were taking vicodin several times per day. He said he will continue to look for more patients. I reviewed the Evelyn case study and asked if he would start a patient like her on Butrans and he said he would. I reviewed that OxyContin is still an option when Butrans may not provide adequate analgesia.
PPLPMDL0020000001	Mayfield Hts	OH	44124	12/2/2011	Window call....i asked doc if he is starting his newly referred patients on butrans. He said he is trying when the patient has the right insurance. I reminded him that butrans may be best positioned before patients have started on something like vicodin ATC. He said he knows.
PPLPMDL0020000001	Cleveland	OH	44109	12/2/2011	worked internal medicine dept-left BUP3015,12/7/11 web conference,initiation guide and my business card for Dr.Lindheim (Dept chairman),dr jones(attended a Butrans dinner program 8/10/11,Dr. Gelehrter and Dr.Harrington-cant see any of these HCP's during working hours; worked rheumatology dept- left SAME Butrans info as above for Dr. Ballou, Dr.Magrey and Dr.Singer - cant see any of these HCP's anymore,have to leave info at front desk for HCP's.worked pm&r - see call notes on dr jaffer, dr harris, dr jaffer and dr fox
PPLPMDL0020000001	Lakewood	OH	44107	12/2/2011	Today was Dr Nageeb's last day. I let him know he will have a Purdue rep on the east said to take care of him.
PPLPMDL0020000001	Cleveland	OH	44113	12/2/2011	i talked to dr about case studies,initiations presentation,dr said it helped him to see patients and discuss their history and figure out if Butrans is appropriate or not.dr said he wouldnt start an opioid naive patient but would consider starting patients that are currently taking opioids,i showed dr BUP3015,opioid experienced patients clinical trial,and we talked about 30% reduction in pain and dr said that was impressive.i asked dr if it was impressive enough for him to start 1-2 patients,with BWC or commercial insurance,today-next week? dr committed to do this.we talked about OxyContin being an option for those patients he feels are appropriate,i showed flashcard and we focused on insurance coverage as dr said he writes a lot of OxyContin.i asked dr if he'll continue starting patients on OxyContin? dr said yes he will.recommended Senokot-S
PPLPMDL0020000001	Parma	OH	44129	12/2/2011	NON-PRESCRIBER- Quick window call- Dr Roheny said he's not seeing reps today but that he is keeping Butrans in mind. Sent back a portal invite & asked him to at least log on & have a look as it may help him identify some Butrans patients. He thanked me & walked away. Spoke with Kathy & discussed savings cards for Butrans & OxyContin.
PPLPMDL0020000001	Lakewood	OH	44107	12/2/2011	I asked Dr if she has heard feedback from the couple of Butrans patients that she started. She said that she has not and she really has not used Butrans very much. I asked why and she said no reason she hasn't thought about it much and she had not had a lot of luck with managed care. I reviewed appropriate types of patients for Butrans and asked her thoughts. She agreed it could be a good option and I asked if she would prescribe it more often. She will keep it in mind. I reviewed OxyContin as an option when patients are taking more than 40mg of hydrocodone per day.
PPLPMDL0020000001	Cleveland	OH	44143	12/2/2011	I discussed the butrans indication and the positioning for moderate ATC pain. I explained the CII status which means that it can be called in or refilled. He said thats a good thing. He said he probably does not have much potential with his patient population. I told him that butrans can be used as a first line opioid after celebrex or tramadol, if he has any patients taking those on a daily basis without sufficient relief. I explained the commercial plans and the savings cards. No commitment.
PPLPMDL0020000001	Cleveland	OH	44109	12/2/2011	i talked to Erin,Pharmacist,about what her patients with chronic pain conditions say when she provides medication management therapy,erin said some patients will tell her their short-acting opioids dont last long enough and they want something different so she'll sometimes suggest a different medication to HCP's.i asked Erin if Butrans would be an option she would recommend to patients so that patients can take a patient info booklet and talk to HCP? Erin said yes she has given a couple booklets out and will continue doing this.Erin said she likes that Butrans is transdermal and dosed once a week.i asked Erin to continue giving booklets out and focused her on commercial insurance plans,erin asked about medicaid coverage so we talked about PA for medicaid and caresource patients.
PPLPMDL0020000001	Cleveland	OH	44109	12/2/2011	talked to Stephanie,floater pharmacist,about Butrans stocking and asked who's writing Butrans? stephanie said she didnt know and couldnt look for that info in computer now.we talked about 6 Butrans core selling messages,gave stephanie butrans patient info booklet and asked if she provides medication management therapy to patients taking opioids for chronic pain? stephanie said yes they do occasionally.i asked if she would give patients the booklet so patients can talk to their HCP's? Stephanie said she would do that but i should come back and talk to Nate,pharmacist who's normally here,next week.i left booklets and formulary grid.i also confirmed OxyContin stocking with stephanie and left formulary grids.recommended Senokot-S
PPLPMDL0020000001					

	Cleveland	OH	44109	12/2/2011	showed initiations presentation to dr, discussed case studies and dr said he tried to start 3 patients this week on Butrans but 1 patient had BWC-Employee sponsored and they wanted a PA and he couldnt get Butrans approved, the other 2 patients had Caresource, we talked about the PA for Caresource and dr said he's not willing to do PA's, too much work, dr asked about BWC and commercial insurance. I told dr I was happy he tried to start a few patients as he said he would do that last time. I focused dr on BWC-state and commercial insurance patients, I asked dr why he chose Butrans for these patients? dr said he doesn't base his medication decisions on patients' numeric pain levels, dr said he looks at patients' facial features, functioning and their mood. dr said he will then decide if patients get a refill of short-acting or if they need to try something different like Butrans. dr said he doesn't even like to give 2 Percocet a day to patients. dr said he would much rather have patients try Butrans and decrease the short-acting opioids for breakthrough pain monthly, dr said some patients are just so attached to the pills they won't even consider a patch like Butrans. dr said he will continue talking to patients about Butrans and start a couple patients with focus on BWC-state and commercial plan patients. we discussed patient info booklet, focused on application/rotation and talked about initiation and titration of Butrans, dr said I could follow-up next week.
PPLPMDL0020000001	Beachwood	OH	44122	12/2/2011	REPEAT CUSTOMER- I asked Dr Tabbaa what kind of results he was getting with Butrans. He said good overall. But Dr Tabbaa said Butrans has not worked for some of his patients. I asked him to elaborate. He said some of them reported feeling sedated but did not feel pain relief. I asked if he has titrated doses for many patients. He said some of them, but he also gives them Stadol for breakthrough pain. Discussed patient information booklets & savings cards for Butrans & OxyContin. He said he has given some out but still has enough for awhile. Reminder of appropriate Butrans patient type.
PPLPMDL0020000001	Cleveland	OH	44113	12/2/2011	I discussed case studies with dr, initiations presentation, dr said he wouldn't feel comfortable starting an opioid naive patient on a long-acting opioid, dr said he would try tramadol 1st, then exercise and physical therapy and see how patient feels after that. dr said if tramadol, vicodin or percocet aren't controlling patients' pain, then he would definitely consider Butrans. dr said his biggest concern with Butrans is insurance coverage. I showed formulary grid, focused dr on med mutual and anthem as he has these plans, discussed patient savings card program with dr and asked dr if he will start 1-2 patients today-next week? dr committed to do this. recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44113	12/2/2011	showed dr initiations presentation and discussed case studies, dr said it helped to talk through these and consider Butrans for patients. dr said a lot of her patients don't want to stop taking their pills and aren't willing to wear a patch. I asked dr how she's explaining Butrans to patients? dr said she tells patients Butrans is a patch, they rotate it once a week, dr said a lot of patients worry that the patch won't work as they are used to their pills. showed dr fpi, section 2.4 maintenance of therapy section and told dr she can give patients immediate release opioid or non-opioid therapy with Butrans, dr said ok she will consider that next time. I asked dr to continue giving patient info booklets to patients and follow-up with them, if they are hesitant to start on Butrans, dr committed to do this. I asked dr if she could find 1 patient, commercial insurance, to start on Butrans today-next week? dr said she will do her best and will start someone at some point. recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	12/2/2011	discussed initiations presentation case studies with dr, dr said he wouldn't start an opioid naive patient on Butrans, dr said even though his patients have chronic pain and it may not make sense he would still try tramadol, a short-acting opioid, first and then if that fails with physical therapy and exercise, then he would consider Butrans. dr said the patients he has on Butrans are doing much better, they are functioning and feeling better overall. dr said he's happy with Butrans so far and will continue to start patients. dr said leave him more patient info booklets as every patient gets 1 and I can follow-up next week. I told dr that was great his patients are feeling better and I would see him next Friday to hear about any patients he starts today and next week, dr said ok. recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44143	12/2/2011	I discussed the butrans key selling messages and asked doc if he sees any merit to a product like butrans for his patients. He said he can see how other doctors would and it seems like a good idea he just doesn't know if he has any patients that would be right for it. He tries not to get into prescribing pain meds. I gave him a butrans portal invite and asked him to look at it.
PPLPMDL0020000001	Euclid	OH	44132	12/2/2011	Introduced doc to the butrans selling messages: indication, positioning, CII status and 7 day delivery. He asked about the molecule. I explained the buprenorphine molecule and the MOA. He asked about side effects and if they are similar to vicodin. I showed him the AE section of the sales aid particularly the incidence of skin irritation, per his inquiry. I told him that butrans can be used after NSAIDs/Tramadol failure. I gave him an initiation guide and a portal invite to learn more about butrans.
PPLPMDL0020000001	Cleveland	OH	44113	12/2/2011	briefly talked to dr as she said patients are doing great on Butrans, no problems and she's happy with the medication. I told dr that was great to hear and asked if she had more patients to start on Butrans today? dr said probably so she plans to use more Butrans.
PPLPMDL0020000001	Mayfield Heights	OH	44124	12/2/2011	I spoke to doc about the butrans indication and positioning. He immediately said that he has not written much butrans. He said he has tried to prescribe it a couple of times but he had issues with insurance. I asked him if he remembers the plan. He did not. I explained that medicare patients will not be covered. He said he has patients being referred to him that are on tramadol or some low dose of a short-acting opioid. I told him that that is an ideal patient type. He said he will try to prescribe more. I reminded him that OxyContin is still an excellent option for those patients that require a stronger opioid.
PPLPMDL0020000001	Lakewood	OH	44107	12/5/2011	Spoke with Kim, we discussed that key messages for Butrans and that Butrans is a CII and can be called in and refilled. I reviewed the use of Butrans with supplemental analgesia. I asked her if she would let appropriate patients know about Butrans as an option and she said she will. Reminder that OxyContin is an option when Butrans does not provide adequate analgesia.
PPLPMDL0020000001	Parma	OH	44129	12/5/2011	NON-PRESCRIBER- Spoke with Pauline, MA, & discussed Butrans core messages & appropriate patient type, reminding her of my previous discussion with Dr Moss. She said he rarely meets with reps. I asked if she thought he would have patients who may fit the Butrans indication. She said probably. Gave her BUP3015 study with my card & asked her to make sure Dr Moss saw the information. She agreed. Also discussed savings opportunities for Butrans & OxyContin.
PPLPMDL0020000001	Chagrin Falls	OH	44023	12/5/2011	Spoke with pharmacist, Jeff, & reviewed Butrans patient information booklets. He said he knows Dr Rood has a few patients on Butrans but did not know of anyone else who is prescribing. He did show me that he has Butrans 3 strengths stocked & tries to keep 2 boxes of each strength on hand. Discussed how information booklets can be used in patient counseling or can be given to patients who he identifies as potential Butrans patients based on patient type. Focused on patients getting chronic short-acting around-the-clock opioids filled month after month. He said he would keep a few of the booklets on hand. Also discussed e-voucher for Butrans & OxyContin savings cards, giving him one package. He asked if there was a generic for OxyContin. Let him know that it is no longer available. He asked what the "street value" of OxyContin is. I told him I did not know but that it should be cautiously prescribed & only given to appropriate patients. He agreed.
PPLPMDL0020000001	Parma	OH	44129	12/5/2011	REPEAT CUSTOMER- Dr Ortega said Butrans has been "better than he thought it would be". He added that it has worked in some patients for whom nothing else seemed to work. He told me about a patient who takes Opana 40mg q8h who does not want to be on it anymore. He asked if he could try Butrans on that patient. I reviewed with him the appropriate range of patient & told him that this patient is beyond Butrans & should be considered as a potential OxyContin patient if appropriate. Dr Ortega said he also has had success with OxyContin in treating patients for pain. Spent time on the appropriate patient type & how to initiate Butrans in patients depending on their current opioid dose. I suggested that Dr Ortega start offering Butrans as a treatment option to anyone who he thinks may benefit, even if that patient isn't complaining about his or her current pain medication. He agreed this may lead to more Butrans trials. Discussed how patient information booklets can be used for this type of discussion.
PPLPMDL0020000001	Beachwood	OH	44122	12/5/2011	NON-PRESCRIBER- Quick call with Dr Warren with reminder of appropriate Butrans patient type & once weekly dosing. Spent time with Donnie, his nurse. Discussed Butrans appropriate patient type & gave him initiation guide. Focused on patients taking around-the-clock short-acting opioids for chronically painful conditions. Discussed CII & abuse/addiction potential. Donnie said he thinks Butrans sounds like a great treatment option for many of Dr Warren's patients. He asked if a patient taking 3 Percocet per day who was asking to take 4 per day because of continued pain would be a candidate. I said a patient like this would be a good Butrans candidate. Discussed ability for patients to take supplemental analgesia in the form of opioid or non-opioid medications for breakthrough pain if necessary. I asked Donnie to help me remind Dr Warren of Butrans as a treatment option for these appropriate patients. Donnie agreed & said he would try to get a few written this week so they could start to get some experience with Butrans.
PPLPMDL0020000001	Westlake	OH	44145	12/5/2011	I let Dr know that Angela has been doing the PA's for Butrans and that they are being approved. I asked him if he has any Caresource, Commercial or BWC patients that he feels might benefit from a 7 day dose, and he said he will try to find a few patients. We reviewed Butrans starting doses and I asked for his commitment to try just a few patients.
PPLPMDL0020000001	Cleveland	OH	44113	12/5/2011	dr said she's not seen anyone lately that's appropriate for Butrans but she knows it's available and if insurance covers Butrans she'll start patients. dr said biggest challenge is medicaid is a huge plan here. I talked to dr about commercial insurance patients that are appropriate for Butrans, showed BUP3015, and asked dr if she'll start 2 patients like that, this week? dr said she will do this if they have commercial insurance or if she can get PA approved for medicaid patients. recommended Senokot-S
PPLPMDL0020000001	Lakewood	OH	44107	12/5/2011	Quick call with Joe, we reviewed that Butrans is a CII and can be called in and refilled. I reviewed the use of supplemental analgesia with Butrans. Joe said the new CVS should be open in Jan. Reminder that OxyContin is still an option when Butrans does not provide adequate analgesia.
PPLPMDL0020000001	South Euclid	OH	44121	12/5/2011	Window call...I reviewed the butrans patient type, formulary coverage and the savings card program. I reminded her that she liked the idea of butrans initially and asked her if she would give it another try. Reminded her to focus on commercially insured patients and give a savings card. She said she will see but didn't have much luck before with cost.
PPLPMDL0020000001	Parma Heights	OH	44129	12/5/2011	Spoke with pharmacist Larissa & reviewed Butrans core messages. She said she still has not seen any activity for it. Showed patient information guides & Larissa said she has some on hand. Encouraged her to give them to customers who she identifies as potential Butrans patients based on their patient type. She agreed. Also discussed OxyContin savings cards & gave her one package.
PPLPMDL0020000001	Lakewood	OH	44107	12/5/2011	I asked Dr if he will be seeing some patients this week whose pain is not well controlled on tramadol. I asked him if he would start these patients on Butrans and we reviewed the initiating guide. He said that he will use it this week.
PPLPMDL0020000001	Cleveland	OH	44121	12/5/2011	I reminded doc of the butrans patient type/positioning. I asked him if he has any patients that could benefit from a once weekly, 7 day analgesic. He said it all comes down to cost. I gave him an butrans portal invite and asked him to participate. Provide formulary grid reminder.
PPLPMDL0020000001	South Euclid	OH	44121	12/5/2011	Spoke to Bonnie about the stocking of butrans. She said she has not seen many scripts for it. I explained the positioning of butrans and that supplemental analgesics are acceptable per the FPI, in the event they get alerts indicating otherwise. I explained that some pharmacies have kicked back the script because of this. She did not recall that happening with butrans.
PPLPMDL0020000001	Parma	OH	44129	12/5/2011	NON-PRESCRIBER- Spoke with Dawn (office manager) who said Jen has officially left the practice. She said other NP's from the practice & Dr Nickels will be filling in until a permanent replacement is found. She said that Jen told her she started a couple patients on Butrans before she left.
PPLPMDL0020000001	Westlake	OH	44145	12/5/2011	Quick call, I asked Dr if he would start a few new Butrans patients this week and he said he will try. I asked if he's continued to get good feedback and he said that he has.
PPLPMDL0020000001	Parma	OH	44129	12/5/2011	NON-PRESCRIBER- Quick window call- Passed back portal invite & asked Dr Kushnar to log on to the interactive programs. Reminder of Butrans once weekly dosing & transdermal system. She said she is keeping it in mind.
PPLPMDL0020000001	Cleveland	OH	44109	12/5/2011	Spoke with Natalie, discussing appropriate Butrans patient type & reviewing Butrans savings cards & patient information booklets.
PPLPMDL0020000001	Lakewood	OH	44107	12/5/2011	worked internal medicine dept - left Butrans fpi/initiation guide, patient info booklet, formulary grid, patient savings card flashcard and web conference invites for 12/7/11.
PPLPMDL0020000001	Lakewood	OH	44107	12/5/2011	Quick call at window, I told Dr that I know he will have a chronic pain patient come in this week on tramadol whose pain is not well controlled. I asked if he would try these patients on Butrans and he agreed. I reviewed the managed care for Butrans as well as OxyContin.
PPLPMDL0020000001	Chagrin Falls	OH	44022	12/5/2011	REPEAT CUSTOMER- Spoke with MA Sherry & nurse Karen & reviewed Butrans core messages. Also discussed savings cards for Butrans & OxyContin. They did not need any Butrans cards but wanted one package of OxyContin cards. Discussed Portal Invite & asked them to ask Dr Rood to log on for interactive Butrans programs online. They agreed to give him the information.
PPLPMDL0020000001	Parma	OH	44129	12/5/2011	NON-PRESCRIBER- Quick call- Reminded Dr Taylor of lunch conversation when we discussed opioid-experienced as well as opioid-naïve patients as potential Butrans candidates. She said she is keeping it in mind but did not have time to stop to talk today.
PPLPMDL0020000001	Cleveland	OH	44106	12/5/2011	worked pm&r - dr baig and apm - fellows and attending physician calls

PPLPMDL0020000001	Cleveland	OH	44106	12/5/2011	i talked to dr about the chronic pain conditions,BUP3015 inclusion criteria and asked dr how often he see's patients with these conditions? dr said he see's a lot of back pain and arthritis patients.i asked dr how he's treating these patients? dr said most patients have tried 1 narcotic by the time he see's them so if their pain is controlled he'll refill the medication,if not he'll try another short-acting opioid and some patients have surgical procedures for their pain. i talked to dr about his patients taking tramadol for their chronic pain and when the pain isnt controlled,to start patients on Butrans,dr said he will consider Butrans for his patients but he doesnt have a lot of patients taking narcotics at this time. we discussed initiation and titration of Butrans and i asked dr to start 1 patient on Butrans this week,dr said he will do that if appropriate. focused dr on commercial plan
PPLPMDL0020000001	Westlake	OH	44145	12/5/2011	Dr said that he has tried Butrans on a few patients. i asked him what types of patients he is thinking of for Butrans. He said that in general he does not write for a lot of opioids, but he likes Butrans as an option for any patients with chronic pain where the pain is documented. He said he has tried Butrans for cancer patients, arthritis, back pain, or while a patient is waiting to get into surgery. We reviewed the initiation guide and when to start a patient on 5mcg or 10mcg based on what they are already taking. He said that most of his patients are on lower doses of opioid or opioid naive. i asked if he would continue to start new patients like the ones we just discussed and he agreed. He said he had a patient coming in later today to start. i reviewed the managed care for Butrans. He said that he does not maintain many patients on OxyContin, he prefers to refer these patients once they are taking higher doses of opioids.
PPLPMDL0020000001	Cleveland	OH	44113	12/5/2011	dr said he started 1 patient on Butrans this am,was a BWC patient taking tramadol and patient wanted something else as tramadol wasnt controlling the pain.i talked to dr about initiation and titration of Butrans and asked dr if he'll start a couple more patients today/this week,dr said he will do that.focused dr on BWC and commercial plan patients.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	12/5/2011	i talked to dr about his patients taking vicodin daily for their chronic pain,not controlled and asking him for something else,showed BUP3015 and told dr thats where Butrans could be an option.dr said he has a few patients in mind but they are medicaid so he doesnt know if he'll get PA approved.i focused dr on commercial plan patients and BWC.i asked dr if he can start 2 patients this week on Butrans? dr said he'll do his best.dr said if patients are appropriate,willing to wear a patch and dr can get Butrans approved,he'll start them.we discussed initiation and titration of Butrans and i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44106	12/5/2011	showed dr BUP3015,discussed 30% clinical reductions in pain,dr said the data is impressive and he knows Butrans is available.dr said he doesnt have a lot of patients taking narcotics so he's not seen anyone lately thats appropriate.i asked dr how often he treats the pain conditions seen in the inclusion criteria of BUP3015? dr said daily,dr said he will start some patients on Butrans once he has patients that are appropriate.i talked to dr about initiation and titration of Butrans,focused dr on commercial plan patients and asked dr to start 1 patient this week on butrans,dr committed to do this.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44113	12/5/2011	deb,PA,said she's starting more and more patients on Butrans,its going well.Deb said she gives patients Butrans patient info booklets,discusses 4 application sites with them and follows up at end of month.deb said she'll titrate patients Butrans dose at that time.i asked deb if she'll start more patients this week? deb said she will do this.focused dr on commercial insurance plans and BWC.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44106	12/5/2011	dr said he started a couple patients on Butrans last week,we talked about why he chose Butrans for these patients.dr said patients were taking tramadol,not controlled and wanted vicodin so dr wanted to try Butrans.we talked about initiation and titration of Butrans and i asked dr if he could start 2 more patients this week on Butrans? dr said he will,if patients are open to trying Butrans and he feels they are appropriate.focused dr on commercial insurance plan patients. recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44106	12/5/2011	dr said he started another patient on Butrans,dr said patient was taking tramadol and not controlled asking for something else so dr wanted to try Butrans.dr said patient started on Butrans 10mcg and seems to be doing well so far,no call backs.i asked dr when he's following up with this patient? dr said in 2 weeks.i asked dr to show patient info booklet and be sure patient's applying Butrans to 1 of the 4 approved application sites,dr said he will do that.i asked dr what else he discusses with patients? dr said side effects and he decides if the current dosage strength is appropriate or if he needs to increase the dose.we talked about titration of Butrans. i asked dr if he can start 2 patients this week,perhaps like the 1 he started on Butrans? dr said he will do his best but biggest challenge at Main Campus is that majority of patients are medicaid.we talked about PA for medicaid/caresource patients and focused dr on commercial plan patients.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44106	12/5/2011	dr said she gave a few patient info booklets out to patients last week and is following up with them in 2 weeks.i asked dr why she chose to do this? dr said both patients were taking percocet for their chronic pain,not controlled and asking her for more pills so she talked to them about Butrans,told dr that was great she's discussing Butrans with patients and asked if she could start 1 patient this week,focus on commercial plan patient? dr said if patient's willing to try Butrans and the attending physician approves,she will do that.we talked about initiation and titration of Butrans.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44106	12/5/2011	dr said he's not started anyone on Butrans yet,showed dr BUP3015,discussed opioid experienced patients and asked dr if he treats the pain conditions listed in the inclusion criteria? dr said yes he does.i asked dr how he treats these pain conditions? dr said he starts with NSAID's,physical therapy,exercise and once that fails he'll start patients on tramadol.dr said he will prescribe vicodin or percocet if tramadol doesnt control patients pain but he prefers not to prescribe these narcotics.we talked about Butrans being an option for patients right after tramadol.showed 30% reduction in pain page,asked dr if this was clinically significant? dr said yes the 30% was impressive.i asked dr if this was impressive enough for him to prescribe Butrans? dr said yes and he would consider it if patients are willing to wear a patch and rotate Butrans once a week.i showed dr patient info booklet,focused on application/rotation section and asked dr to talk to patients about this info and the side effects of Butrans,dr said he would do that.i asked dr if he can start 1-2 patients this week on Butrans? dr said he'll look and see who's coming to see him and if appropriate he will prescribe Butrans.dr asked about insurance coverage for Butrans,showed formulary grid and focused dr on commercial plan patients.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44103	12/5/2011	talked to Eric,Pharmacist,about 6 Butrans Core selling messages,asked him what feature of Butrans stood out to him? Eric said he likes that Butrans is a patch and the once weekly dosing option.i asked Eric if he will give patient info booklets to patients that are taking short-acting opioids for their chronic pain conditions and not controlled and have patients talk to their HCP's.we discussed commercial plans for Butrans.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44113	12/5/2011	dr said he's been giving patients the patient info booklet as many patients arent sold on patch technology for their chronic pain,dr said patients like their pills and mentally become attached to them.showed dr fpi,section 2.4 maintenance of therapy section and told dr that he can give immediate release opioid or non-opioid therapy with Butrans,dr said he knows that and will keep trying.i asked dr if he can start 2 patients on Butrans this week? dr said he'll do his best and keep talking to patients.recommended Senokot-S
PPLPMDL0020000001	South Euclid	OH	44121	12/5/2011	Window call...Reminded doc of the Butrans coverage with commercial plans and BWC. i asked if he has caresource/medicaid as butrans is being paid for after failure on tramadol or other short acting opioids. He said he does not have much. Provided formulary grid reminder and portal invite.
PPLPMDL0020000001	Westlake	OH	44145	12/5/2011	Dr has not started anyone on Butrans. We reviewed the key messages and managed care and I asked if he would give Butrans a try. He said that he would. He asked about the abuse potential and we discussed that Butrans is a CIII with a boxed warning regarding proper patient selection. Dr said that he does not prescribe OxyContin as he prefers to refer these patients.
PPLPMDL0020000001	Cleveland	OH	44127	12/6/2011	dr said she's given a few patient info booklets to patients taking short-acting opioids that arent controlled and asking her for something else. dr said she's not had anyone be interested to start on Butrans and biggest challenge is getting Medicaid to approve PA for Butrans.i asked dr to think of 2 appropriate patients to start on Butrans this week,focusing on commercial plans,dr committed to do this.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44130	12/6/2011	TRIALIST- Dr Fedorko said he just prescribed Butrans for a patient yesterday. i asked him to tell me about the patient. He said it was a female patient who was in pain "all over". i asked what she had been taking before. He said nothing for the pain & added that it is hard to tell sometimes if someone is in real pain. i agreed that pain can be difficult to treat & reminded him that Butrans is a CIII opioid & should be prescribed only for appropriate patients. He said he thinks most people who "need" pain medication aren't really in pain. Dr Fedorko said he was looking for a Butrans savings card to give to the patient yesterday but that he found only patient information booklets. Discussed the patient education & suggested he give those to patients who he thinks could benefit from Butrans even if he is not giving them a Butrans prescription at that visit. i told him that sometimes patients may want to try it if they know it is available. Reviewed appropriate patient type & range, focusing on patients who are not well-controlled on Vicodin or tramadol.
PPLPMDL0020000001	Cleveland	OH	44130	12/6/2011	Spoke with Dawn, pharmacist, reviewing Butrans appropriate patient type & range. Dawn said she has seen no activity for Butrans. Focused on patients who get refill after refill of tramadol or Vicodin or those who are not well-controlled on their short-acting around-the-clock opioid regimen. Presented patient information booklets & discussed how they can be used in discussions with customers where appropriate. Also discussed OxyContin savings cards & 7 tablet strengths.
PPLPMDL0020000001	Parma	OH	44134	12/6/2011	Spoke with Pam & Erika (pharmacists) who said they had seen only a couple of prescriptions of Butrans. Reviewed Butrans appropriate patient type, letting them know i am focusing with physicians on patients who are not well-controlled on tramadol or Vicodin around-the-clock. Discussed once weekly transdermal dosing & CIII opioid with abuse/addiction potential. Presented patient information booklets & let them know they could be given to customers who, based on the appropriate Butrans patient type, they think could benefit from Butrans. Also discussed OxyContin, which Pam said they do stock, & savings cards.
PPLPMDL0020000001	Euclid	OH	44117	12/6/2011	i asked doc if he has totally abandoned trying butrans for some of his appropriate patients. He said its not that he has abandoned it. He said it just doesnt come up and he does not like to switch patients if it isnt broken. i told him i understand that. i reminded him that he said he has patients taking tramadol as monotherapy. i asked him for those patients that fail on tramadol to try butrans. He said he will try that and that i would be surprised. Provided oxycontin dosing reminder.
PPLPMDL0020000001	Shaker Heights	OH	44122	12/6/2011	NON-PRESCRIBER- Quick call between patients. Positioned Butrans, with once weekly dosing, for patients who are not well-controlled on tramadol around-the-clock. Also reminded him of improving managed care. He said he will try to remember.
PPLPMDL0020000001	Cleveland	OH	44113	12/6/2011	worked pharmacy-in patient, pain management-lunch with dr shen and worked premier physician offices
PPLPMDL0020000001	Brooklyn	OH	44144	12/6/2011	NON-PRESCRIBER- Caught Dr Deeb at the window for a quick call. Passed back Butrans webinar information & discussed live, interactive case study format. i asked him to log on to participate. He said he would see. Spoke with Aubrey (MA) & Nancy (nurse), reminding them of Butrans core messages & patient type. Also discussed OxyContin savings cards but they did not need any.
PPLPMDL0020000001	Cleveland	OH	44130	12/6/2011	TRIALIST- i asked Dr Diab if he had any patients on Butrans at this point. He said he might have two or three. i asked what kind of results they are getting. He said the one who is still on it is happy with it but others have discontinued because they could not afford it. Reminded him of where Butrans does have good coverage & focused on savings cards for commercial patients. Also reminded him of OxyContin savings cards. Encouraged Dr Diab to log on to webcast for interactive Butrans discussion.
PPLPMDL0020000001	Cleveland	OH	44105	12/6/2011	dr said she's been giving patients the Butrans patient info booklet but noone has wanted to try Butrans.dr said its tough to get patients to try something new but she likes that Butrans is a patch and will continue telling patients about it.i asked dr to start 2 patients on Butrans,this week,with BWC or commercial plan insurance,that are taking percocet every day for their chronic pain but not controlled and asking her for something else.dr said she will if patients are willing to try Butrans and insurance covers Butrans.showed dr Butrans formulary grid.recommended Senokot-S
PPLPMDL0020000001	Parma	OH	44134	12/6/2011	LOYALIST- i reminded Dr Hernandez of the patient he had told me about who he had started on the 20mcg Butrans. He said she was just in for her follow-up & is doing well on it. He added that he really was not certain if it would work for her since she had been on Opana before starting Butrans, but he said the patient reports good pain relief & is happy on the Butrans. i asked if she takes any supplemental analgesia with it & he said no. Reminded him of previous discussions when we talked about converting other opioid-experienced patients over to Butrans & asked him to continue to do this. He agreed. Gave him portal invite & encouraged him to participate & give me feedback. Also discussed OxyContin for patients who are beyond the Butrans appropriate range.
PPLPMDL0020000001	Cleveland	OH	44113	12/6/2011	discussed patient case studies with dr,initiations presentation,dr said he wouldnt start an opioid naive patient on Butrans.dr said he would start patients on tramadol and if pain isnt controlled after that he would consider Butrans.i asked dr if he has any patients taking tramadol for 1 of the chronic pain conditions shown in visual aid,pg.12 dr said he's sure he does and he'll continue talking to patients about Butrans.dr said biggest challenge is convincing patients to try wearing a patch for a week and insurance coverage.i asked dr if he had 2 patients with BWC or commercial plan insurance that he could start this week? dr said he will do his best and see who comes in to see him.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44113	12/6/2011	talked to dale,PA,about patients he's starting on Butrans.Dale said majority of patients are taking vicodin or percocet and not controlled so he tells them Butrans is the only option for them.i asked how he explains Butrans to patients? Dale said he tells patients its a patch and they rotate the patch once a week and they can still have some immediate release opiod medication for breakthrough pain.i asked dale if he'll continue starting patients,focusing on BWC and commercial plan patients,this week? dale said he'll do that.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44113	12/6/2011	dr said he's giving more patients the Butrans patient info booklet to educate them and is following up with patients.i asked dr if he'll start 2 BWC patients this week on Butrans? dr said if patients ask for something else he's willing to discuss Butrans with them.i told dr i would follow-up next week

PPLPMDL0020000001	Cleveland	OH	44130	12/6/2011	NON-PRESCRIBER- Quick call as I caught Dr Popa at the window. Positioned Butrans for patients who are not well-controlled on tramadol around-the-clock for chronically painful conditions. She thanked me & walked away.
	Cleveland	OH	44130	12/6/2011	Handed back webinar information & spoke with Dawn about appropriate Butrans patient type. I asked her to encourage Dr Popa to participate in the live program. She said she would give her the information.
PPLPMDL0020000001					Spoke with Gail (pharmacy technician) & Tammy (secretary) & introduced myself & Purdue's products. Inquired about getting an appointment with Stacey, the pharmacist, to discuss more about Butrans since I have not yet been able to reach her. Tammy said they do not do appointments to discuss products. She said I could only leave information & then Stacey would contact me if she wants additional information. Gave Gail a packet of information with my card. Included information on upcoming webinars.
	Cleveland	OH	44113	12/6/2011	showed dr initiations presentation and we discussed patient case studies.I asked dr if he's seen any patients like this in his practice? dr said yes he see's a lot of patients with back pain and arthritis and thinks Butrans would be a great option for them but he hasnt seen any patients that are willing to try Butrans.I showed dr Butrans S core selling messages and asked dr how he would explain Butrans to patients? dr said he would tell them this is a once a week patch and its a narcotic for their chronic pain.I asked dr to show patients the Butrans patient info booklet focusing on application/rotation and discuss side effects of Butrans with patients,dr said he will do that and keep trying.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44113	12/6/2011	showed dr initiations presentation,discussed patient case studies and dr said she wasnt comfortable starting an opioid naive patient on Butrans.dr said she would start patients on tramadol and see if their pain can be controlled.I asked dr when does she make a change in the medication regimen? dr said when patients tell her the tramadol isnt lasting long enough or say they want more pills,then she'll consider other options.I asked dr if she would consider Butrans after tramadol fails? dr said yes she would if patients insurance covered Butrans.focused dr on BWC and commercial insurance plans.I asked dr if she'll start 2 patients on Butrans,focusing on BWC and commercial plans,this week? dr said if patients are willing to wear Butrans and give it a try she'll start them.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44113	12/6/2011	talked to Mary,Pharmacy Tech,about Butrans stocking and Mary said because Butrans isnt on the Cleveland Clinics formulary,its not in stock.Mary said I would have to speak with Jeff,Pharmacy mgr and he's out of the office today.I talked to Mary about 6 Butrans core selling messages and asked Mary what features of Butrans stood out to her? Mary said she likes that Butrans is a patch and the once weekly dosing.Mary suggested I stop back later this week or next week to try and speak with Jeff.we discussed formulary coverage and I gave Mary the Butrans formulary grid.
	Cleveland	OH	44113	12/6/2011	showed dr Butrans initiations presentation and we discussed patient case studies.dr said he likes patch technology of Butrans and is willing to start a few patients but not everyone wants to wear a patch.I showed dr BUP3015,discussed inclusion criteria with dr and asked if he treats these types of pain conditions? dr said yes.I asked dr how he treats them? dr said with short-acting opioid analgesics.I asked dr when does he make changes in the opioids? dr said when patients say their short-acting opioids arent lasting long enough or they want more pills,dr will consider a medication change.I told dr thats where Butrans could be an option.I asked dr if he had patients taking vicodin for their chronic pain? dr said yes a lot of patients are taking vicodin every day and not controlled so they will ask for more pills or an increase in dosage strength at some point.I asked dr to stop and not refill their vicodin or increase the dosage strength but to start them on Butrans.dr said he will do that if insurance covers Butrans.dr asked about medicaid coverage for Butrans.we discussed PA for medicaid patients and I asked dr to focus on commercial plan patients,dr said he will do that.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44113	12/6/2011	dr said she's starting more and more patients on Butrans,she started 1 this am that was taking percocet but not controlled so she explained that Butrans was her next option,dr said the patient info booklet is great and she gives 1 to every patient.I asked dr what feedback she's getting from patients? dr said patients like Butrans,dr said she's seeing overall general functioning improvement in patients and she's seeing reductions in pain levels that patients have never experienced with short-acting opioids.dr said she's focusing on her BWC and commercial plan patients as thats the easiest place to get Butrans approved.I asked dr if she'll find more patients this week to start on Butrans,dr said she will do that.recommended Senokot-S
PPLPMDL0020000001	Westlake	OH	44145	12/7/2011	I asked Dr what he likes about Butrans and he said that he likes that it's a patch and 7 day dosing but most of his patients are on higher doses or else he would prescribe it much more often. He said he wishes he could get more patients to agree to taper down and try Butrans but they throw a fit when he tries to cut down on their dose. We discussed other appropriate patients and he agreed to try to start patients on lower doses of opioids. We discussed patients where OxyContin may an appropriate option.
PPLPMDL0020000001	Waterford	OH	45786	12/7/2011	W - Seeing good results with the patients that he has started on Butrans. Will continue to prescribe for patients if they have insurance that will cover it. Utilized OxyContin as his long acting of choice. Likes not having coverage issues with OxyContin. I - Review and follow up of Butrans? What successes has he seen with Butrans and how does he consider patients for Butrans eligibility? Review of formulary coverage and savings card
PPLPMDL0020000001	Lakewood	OH	44107	12/7/2011	I asked Dr about how his Butrans patients have been doing and the feedback. He said for the patients who can get it covered on managed care, they are doing well. His only concern is managed care coverage and reviewed that commercial coverage will as allow as a \$15 copay. Reminder that OxyContin is also covered by most managed care.
PPLPMDL0020000001	Beachwood	OH	44122	12/7/2011	Spoke with nurse manager at pain management clinic, Debbie Macko in effort to schedule inservice or appointment with doctors and/or staff. She said she would do her best to get me in with Dr Dmitri. Debbie said he is in on Mondays & Wednesdays seeing patients. Reviewed with her Butrans core messages & discussed appropriate patient type. She said they do not prescribe a lot of medications there (although this is inconsistent with data from the doctors there). Reviewed Butrans & OxyContin savings cards, offering to leave more, but she said they did not need any since they don't use a lot of medications there.
PPLPMDL0020000001	Parma	OH	44134	12/7/2011	Spoke with floater pharmacist & presented Butrans to her. Reviewed core messages & discussed appropriate patient type, focusing on patients who are not well-controlled on chronic around-the-clock short-acting opioids like tramadol or Vicodin. Also discussed patient information booklets & asked her to leave them for Margarita. Let her know they could be used in discussions with patients or given to customers who pharmacists identify as possible Butrans patients based on their patient type. Also reviewed e-voucher for CVS customers & OxyContin savings cards.
PPLPMDL0020000001	Waterford	OH	45786	12/7/2011	W - Hasn't written for Butrans but knows Waters has written for a few patients. Likes having the option of a CIII long acting product. I - Review and follow up of Butrans for appropriate patients who meet the indication when uncontrolled on current therapy and requesting a change. Discussion of Butrans utilization after tramadol if the indication is met. Review of formulary coverage and savings card program eligibility.
PPLPMDL0020000001	Waterford	OH	45786	12/7/2011	W - Miral hasn't written for Butrans other than the one time for the patient at the nursing home. Waters sees most of the chronic pain patients but would continue to consider for appropriate patients. I - Review and follow up of Butrans for appropriate patients who meet the indication when uncontrolled on current therapy and requesting a change. Discussion of Butrans utilization after tramadol if the indication is met. Review of formulary coverage and savings card program eligibility.
PPLPMDL0020000001	Bedford Heights	OH	44146	12/7/2011	NON-PRESCRIBER- Spoke with MA Jenny & reviewed Butrans appropriate patient type & core messages. Also told her about PurdueHCP.com & asked her to give Dr Hochman portal invite & encourage him to participate in the interactive program. Passed back Butrans webinar information & asked her to give that to him as well. She agreed to do this. Also discussed OxyContin savings cards, but she said they did not need any.
	Cleveland	OH	44109	12/7/2011	dr said she remembered me talking to her about Butrans but only remembered it was a patch dr asked who are the appropriate patients,when do they change the patch and how much does it cost? showed visual aid,discussed opioid naive and experienced patients to start on Butrans,dr said she would probably start with opioid experienced patients and see how they do on Butrans before she would consider an opioid naive patient.we discussed opioid experienced patients,initiation and titration,showed patient info booklet and asked dr if she has any commercial insurance patients? dr said a few but majority of patients here are medicaid and caresource. we discussed PA for medicaid and caresource and I asked dr if she had 2 patients this week that she could start on Butrans? dr said she probably does and will consider Butrans.recommended Senokot-S
PPLPMDL0020000001	Parma	OH	44129	12/7/2011	REPEAT CUSTOMER- I asked Dr Chagin to tell me about his experience thus far with Butrans. He said he just gave it to a patient yesterday who has cerebral palsy & is in pain. He said she cannot take pills, so he felt Butrans would be a good option. He added that he asked her to call him yesterday if she had any trouble getting it or if she did not like the medication & he did not hear from her. I asked him if he has been giving it mostly to patients who have already tried some sort of opioid therapy or if he has also tried patients who have not been on opioid medications. He said both types. He said that of the patients he has heard back from, each of them reports good results with Butrans. I asked if he has had to titrate anyone's dose & he said only one person. Discussed ability for patients to take supplemental analgesia with Butrans in form of non-opioids or immediate-release opioids. He asked how long it takes to work. I told him we do not have data on that & that it depends on the person. Also told him Butrans reaches steady state in 3 days but that does not necessarily coordinate with analgesia. I asked if he would continue to identify Butrans patients & prescribe Butrans for them when appropriate & he agreed. Also discussed OxyContin q12h for appropriate patients beyond Butrans & Ryzolet as a q24h tramadol product. Recommended Senokot-S for opioid-induced constipation.
PPLPMDL0020000001	Cleveland	OH	44109	12/7/2011	dr said he's not started anyone on Butrans as majority of patients are medicaid and he's not willing to do a PA for Butrans.I asked dr if he saw clinical value in Butrans? dr said he likes that Butrans has transdermal delivery and once weekly dosing but if his patients cant get it,he wont write it.I asked dr if he has any Aetna patients? dr said yes he has a small% commercial plans.I told dr that Butrans could be an option for those patients,showed patient savings card program flashcard and formulary grid.dr said ok he would try it in a few Aetna patients if he feels Butrans is appropriate.we discussed opioid experienced patients starting on Butrans,initiation and titration of Butrans.I asked dr if he had 2 aetna patients coming in this week that he could start on Butrans? dr said he didnt know but if he does see some them he'll consider Butrans.we talked about OxyContin being an option,showed challenging flashcard and we discussed appropriate patients for OxyContin.dr said he has a few patients on OxyContin and its covered on insurance so no issues with OxyContin.I asked dr to continue starting patients on OxyContin.dr said he will.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44106	12/7/2011	discussed patient case studies,initiations presentation with dr.dr we talked about appropriate patients for Butrans,dr is focusing on patients taking a couple tablets of short-acting opioids,not controlled and asking him for something else,he's talking to them about Butrans. we discussed initiation and titration of Butrans and I asked dr if he'll start 2 patients this week,focusing on commercial plan patients,dr committed.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	12/7/2011	discussed 6 Butrans core selling messages with dr,dr said she's heard some residents and attending HCP's talk about Butrans but she didnt know what it was for.dr focused discussion on appropriate patients,showed fpi and visual aid,initiation of butrans-showed initiation guide and we discussed titration of Butrans. I asked dr if this could be an option for some of her patients? dr said probably so.dr asked about medicaid coverage? we discussed PA for medicaid and caresource patients and I focused dr on commercial insurance patients.dr said ok she'll talk to some patients and see if they are willing to wear a patch.recommended Senokot-S
PPLPMDL0020000001	Bedford	OH	44146	12/7/2011	Spoke with Oleg (pharmacist/manager) & reviewed Butrans, including appropriate patient type. Focused on patients taking 3-4 tramadol or Vicodin every day & getting refill after refill. Oleg said they have "a lot" of people like that. He said he did see a Butrans prescription recently from Dr Moufawad. I showed him patient information guide & asked him to keep them on hand & give them out if he identifies someone who could benefit from Butrans. He said one particular Vicodin patient comes to mind & added that he will give the patient the booklet when he sees him next time. He said he thinks Butrans is a good option for this type of patient & that he likes that drug is delivered over 7 days instead of a short period of time. Also discussed OxyContin stocking. He said he has a few people on the 10, 20, 60, & 80mg strengths. He said he did not need any savings cards at this time.
PPLPMDL0020000001	Cleveland	OH	44109	12/7/2011	I talked to dr about how many patients she treats in the hospital versus out-patient,with chronic pain.dr said majority of patients in hospital with chronic pain she consults pain management and/or physical medicine and rehabilitation,dr said if appropriate she'll make narcotics decisions but its usually the specialists.dr said in the out-patient setting its her decision but right now she only has a couple patients taking narcotics.showed dr visual aid,focused on opioid experienced patients and asked dr if she will start 1 patient this week that could be appropriate for Butrans? dr said she will if patient is willing to wear a patch and if insurance pays for it.dr asked about medicaid coverage for Butrans? we discussed PA for medicaid patients and Butrans.I focused dr on commercial insurance plan patients,dr said ok.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44143	12/7/2011	Window call....I reviewed the butrans patient type, 7 day delivery and CIII status. I asked him if he has any patients that fit this positioning. He said he did not know. I gave him a Butrans portal leave behind. Also gave him a formulary grid for oxycontin and butrans.
PPLPMDL0020000001	Cleveland	OH	44109	12/7/2011	I talked to dr about how he manages chronic pain patients that are on narcotics after seeing a pain specialist or physical medicine and rehab,dr said if patients are started on narcotics by a specialist,he'll continue their therapy but most likely wont increase the number of pills per month.dr said he likes that Butrans is a different option for patients being a patch and a CIII opioid but he doesnt have many patients taking narcotics so at this point he probably wont be prescribing Butrans.I told dr I appreciated his honesty and asked him to keep an open mind in case 1 patient is appropriate for Butrans he'll have all of the information.dr said he would keep Butrans in mind,focused dr on commercial plan patients.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	12/7/2011	dr said he started a patient last week,under dr chrisman's guidance,on Butrans.I told dr that was great and asked why he chose Butrans? dr said patient was taking percocet every day for pain and not controlled asking him for more pills,so dr thought Butrans would be a great option.patient got Butrans so no issues at pharmacy.I asked dr if he has more patients like this 1 that he can start on Butrans.dr said probably so and he'll talk to dr chrisman, resident program director and get guidance from her too.focused dr on commercial plan patients so they can use patient savings cards,gave dr patient savings card flashcard.recommended Senokot-S
PPLPMDL0020000001					

PPLPMDL0020000001	Cleveland	OH	44109	12/7/2011	i showed dr visual aid,pg.11,we discussed dr expectations of short-acting opioids for chronic pain conditions.dr said she wants patients to have pain be manageable. i asked dr if Butrans 30% clinical reduction shown in BUP3015,was clinically significant? dr said yes 30% is impressive.i asked if it was enough for her to start 2 patients on Butrans.dr said she will consider Butrans but hasnt seen anyone lately because she doesnt have a lot of patients on narcotics.focused dr on commercial plan patients and asked her to start 2 patients on Butrans.dr committed to do this.recommended Senokot-S
PPLPMDL0020000001	Bedford	OH	44146	12/7/2011	TRIALIST- I asked Dr Haddad about his experience with Butrans since our last discussion. He said he has written it a few times since he saw me last. I asked him what type of feedback patients have given him. He said he has not heard anything so he assumes that is good. I asked if he plans to continue to prescribe Butrans since his feedback has been positive. He agreed to do this. I gave him portal invite, explained the interactive programs, & asked him to log on. He said he would have a look. I let him know I would be interested in his feedback. I also reminded him of OxyContin savings cards & asked him to give them out with a prescription. He agreed.
PPLPMDL0020000001	Cleveland	OH	44109	12/7/2011	showed dr BUP3015,discussed opioid experienced patients and dr said he see's a lot of patients like this.dr said he treats them with short-acting opioids for awhile until the pain is no longer controlled then he'll consider a long-acting opioid.i asked dr if 30% reduction in pain levels was clinically significant? dr said yes it is.i asked dr if its enough for him to prescribe Butrans? dr said he will talk to a few patients but it depends on the patient and if insurance will cover Butrans.i asked dr to focus on commercial plan patients and show patient info booklet to explain Butrans to patients,dr said ok he will try that out and see what happens.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	12/7/2011	i showed dr BUP3015,discussed opioid experienced patients and dr said she see's patients like this.i asked dr if a 30% reduction in pain was clinically significant? dr said yes it is.i asked dr if its enough for her to prescribe Butrans? dr said she had a few patients she wanted to start on Butrans but medicaid didnt approve the PA.we talked about commercial plan patients trying Butrans and i asked dr if she had 2 patients this week that she could start on Butrans? dr said probably so and she will consider Butrans.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	12/7/2011	lunch with family medicine - see call notes on HCP's; left BUP3015,initiation guide,formulary grid,patient savings card flashcard and my business card for
PPLPMDL0020000001	Cleveland	OH	44106	12/7/2011	Dr Jones,Dr Lindheim,Dr Harrington,Dr McCreery,Dr Ricanati,Dr Gelehrter as i couldnt see any of them - NO ACCESS DEPT.
PPLPMDL0020000001	Cleveland	OH	44106	12/7/2011	i discussed patient case studies,initiations presentation,with dr. dr said he started a couple patients last week and yesterday on Butrans and is happy with the clinical results he's seeing in patients.i asked dr what feedback he is getting from patients? dr said patients like that Butrans is a patch and the once weekly dosing.i asked dr if he'll start a couple patients today,focusing on commercial insurance,that are appropriate for Butrans? dr committed to do this. recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	12/7/2011	showed BUP3015,discussed opioid experienced patients clinical trial and pain conditions,dr said he treats these conditions and for adults he'll prescribe narcotics when appropriate.i asked dr if a 30% reduction in pain was clinically significant? dr said yes it is and he'll keep Butrans in mind but doesnt have a lot of patients taking narcotics.i asked dr if he'll see 2 patients this week,that are appropriat for Butrans with commercial insurance? dr said he might and will start them if insurance covers Butrans. recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44106	12/7/2011	worked apm dept and out-patient/bolwell pharmacy
PPLPMDL0020000001	Warrensville Heights	OH	44122	12/7/2011	NON-PRESCRIBER- Positioned Butrans for patients who are not well-controlled on tramadol around-the-clock. Dr Zivic said he is keeping it mind. Reminded him of Medicaid prior-authorization requirements & OxyContin favorable managed care. He said he will try to remember & then walked away. Discussed portal invite with Michelle & asked her to encourage Dr Zivic to participate. She said she would give him the invitation.
PPLPMDL0020000001	Cleveland	OH	44109	12/7/2011	i showed dr BUP3015,we discussed pain conditions seen in the inclusion criteria and dr said he treats many of these listed.dr focused on low back pain patients.dr said he thinks Butrans is a great option for patients who are willing to wear a patch and change it once a week.dr said he only has a few patients taking narcotics and they are controlled on tramadol.i asked dr whats the next step after tramadol in his treatment plan? dr said usually another short-acting opioid like vicodin. i told dr that where Butrans could be an option,right after tramadol fails to control patients pain.showed initiation guide and discussed initiation and titration of Butrans.dr said he'll talk to some patients and see if they will be willing to wear a patch for a week and change it weekly. i asked dr if he had 2,commercial insurance,patients that he could start on Butrans this week? dr said he probably does and will think about it.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	12/7/2011	showed dr Butrans visual aid,pg.11,and we discussed pain conditions,dr said he treats a lot of back pain and arthritis.dr said he starts with short-acting opioids,after NSAIDS,exercise and physical therapy dont work.we talked about Butrans being an option for opioid naive and experienced patients,dr said he wouldnt start a naive patient on a long-acting opioid but would consider opioid experienced patients for Butrans.we discussed initiation and titration of Butrans and dr asked about insurance coverage for medical aid patients? we discussed PA for medical aid patients and i asked dr if he had 2 commercial insurance patients that he could start on Butrans this week? dr said he might and will have to see who come's in to see him.focused dr on commercial insurance plans and showed formulary grid,we discussed patient savings card program for commercial insurance patients.recommended
PPLPMDL0020000001	Cleveland	OH	44109	12/7/2011	showed dr pg.11 visual aid and we discussed pain conditions noted here.dr talked about back pain and said it is the biggest complaint with patients but she always treats their pain with immediate release opioids.dr said she was trained that way,is comfortable with this and patients are controlled with their immediate release opioids.i asked dr if patients ever ask for more pills or something different? dr said rarely dr said she knows Butrans is available and will consider it when she deems appropriate.focused dr on commercial plan patients and asked dr if she'll see 2 patients this week to start on Butrans? dr said she doesnt know but if she does she knows Butrans
PPLPMDL0020000001	Cleveland	OH	44109	12/7/2011	i showed dr BUP3015,discussed opioid experienced patients and dr said she does treat some patients with chronic pain.i asked dr if a 30% reduction in pain was clinically significant? dr said yes it is.i asked dr if she would start 2 patients,commercial insurance,on Butrans this week? dr said if patients are willing to wear a patch for a week and insurance covers Butrans,sh'e'll start some patients on Butrans.we discussed initiation and titration of Butrans and i showed patient info booklet to dr and asked dr to give booklets to patients when starting them on Butrans,dr committed to do this.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	12/7/2011	dr said she started a couple patients on Butrans last week and will continue to do so.dr said she's excited that Butrans is available and that she can prescribe it.i asked dr who the patients are,that she considers appropriate for Butrans? dr said patients taking a couple tabs of short-acting opioids,not controlled and asking her for more pills,those are the patients she's considering appropriate for Butrans.i showed dr initiation guide,discussed initiation and titration and asked dr if she'll see 2 patients this week that she can start on Butrans? dr said she probably will and as long as insurance covers Butrans sh'e'll continue to prescribe. focused dr on commercial plan patients and showed formulary grid.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	12/7/2011	i talked to dr about 6 Butrans core selling messages,dr said she likes that Butrans is a patch,once weekly dosing and that its a CII so she can call in refills.i asked dr if she would consider opioid naive or experienced patients first to start on Butrans? dr said she would most likely start an opioid experienced patient on Butrans. we discussed initiation and titration of Butrans and i asked dr if she has any patients with commercial insurance? dr said there are a few but majority of patients have medicaid and caresource insurance.we discussed PA for medical aid and caresource patients and i showed dr Butrans patient savings card flashcard and told dr her commercial patients could use the patient savings cards.dr said ok she has a few patients in mind that she could discuss Butrans with and see if they would be willing to wear a patch for a week.i asked dr if she'll see 2 patients this week that she can start on Butrans? dr said she might and will keep Butrans in mind. recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44114	12/7/2011	dr said he's starting a lot of patients on Butrans and will continue doing so as he's happy with Butrans.i asked dr what patients are saying about Butrans? dr said no complaints and they seem to like Butrans.we talked about initiation and titration of Butrans and i asked dr if he'll start more patients on Butrans this week? dr said he will do that.focused dr on BWC and commercial insurance patients. recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44114	12/7/2011	John,PA,said they are starting more patients on Butrans and are happy with Butrans.i asked John what feedback is he getting from patients? John said he's seeing overall improvements in patients general functioning and patients are happy with wearing a patch and like the once weekly dosing.i asked John how he decides if Butrans is an appropriate option? John said if patients tell him their immediate release opioids arent controlling their pain and they either want an increase in the dosage strength or more pills,he tells them Butrans is their only option.we talked about initiation and titration of Butrans and i asked John if he'll start more patients on Butrans this week? John said yes he will do that.focused John on BWC and commercial insurance patients.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	12/7/2011	dr said she's not prescribed Butrans yet as she couldnt remember who was appropriate? i showed visual aid,we discussed opioid naive and experienced patients to start on Butrans.dr said she would only be comfortable starting opioid experienced patients on a long-acting opioid.we discussed initiation,titration,showed dr patient info booklet and asked dr to give every patient she starts on Butrans this booklet,dr said ok she will do that.dr asked about insurance coverage? i showed dr formulary grid and focused dr on commercial plan patients.i asked dr if she'll start 2 patients this week on Butrans,dr committed.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44106	12/7/2011	i talked to Margie,Pharmacy Supervisor,about how much medication management therapy she provides to patients taking short-acting opioids for chronic pain.Margie said she does a little bit of education but not many patients ask questions unless they are starting a new medication.i asked Margie what the conversations are like with these patients.Margie said occasionally she'll hear patients say their short-acting opioids arent lasting long enough or they dont like taking pills.i asked Margie if she would give Butrans patient info booklets to these patients so they can speak with their HCP's about Butrans? Margie said she will do that and has given a few booklets to patients.we discussed formulary coverage for Butrans.
PPLPMDL0020000001	Mayfield Heights	OH	44124	12/7/2011	Doc came out and said, "No, I haven't written Nucynta yet." I said, "You mean Butrans.". I asked doc if she is aware of patient insurance when she goes into a room. She said she does not and just tries to prescribe what she thinks is right. I reviewed the butrans coverage with commercial plans, BWC, and Caresource after failure on short acting. She said she may go as high as 300mg/day of tramadol before switching(100mg 3x/day). She asked if she should just think of butrans for younger patients. I told her certainly younger than medicare age. Told her that 10mcg might be a starting dose if she goes to 300mg of tramadol. I reviewed the oxycontin patient type and the preferred coverage for those patients.
PPLPMDL0020000001	Westlake	OH	44145	12/7/2011	Quick follow up with Dr Gerace, he requested more patients information for Butrans and he said he started a new patients. I asked if the patient was able to get Butrans smoothly and he said he has not heard back so he thinks they did. I reviewed the managed care for Butrans and asked if he would try a few more new patients. He agreed.
PPLPMDL0020000001	Cleveland	OH	44106	12/7/2011	i talked to dr about patient case studies,initiations presentation,dr said he likes Butrans is a patch and once weekly dosing.dr said he needs fellows/residents to remind him that Butrans is available as he forgets.i asked dr about his patients taking tramadol for their chronic pain,showed visual aid,pg.11 pain conditions listed,that he refills every month even if the tramadol isnt controlling their pain.i asked dr what are the clinical benefits of doing this? dr said its maintenance therapy for many patients and when tramadol fails he'll start some patients on vicodin.we talked about Butrans being an option after tramadol.i asked dr what he needs from me to remember Butrans? dr said keep reminding him and work with fellows so they can remind him.focused dr on commercial plan patients.we talked about OxyContin being an appropriate option for patients,showed flashcard dr said he writes a lot of OxyContin and no problems getting it covered.showed formulary grid and asked dr to continue starting patients on OxyContin,dr committed to do this.recommended Senokot-S
PPLPMDL0020000001	Mayfield Heights	OH	44124	12/7/2011	Window call....asked doc if he has had any feedback from the butrans patients yet. He said not yet. I reminded him of the formulary coverage and caresource after failure on a short acting opioid or tramadol. Gave him a formulary grid for butrans and oxycontin.
PPLPMDL0020000001	Bedford	OH	44146	12/7/2011	TRIALIST- Quick call- Dr Moufawad said he did not have time today. He added that he has not had a Butrans patient but that he thinks he will soon. He thanked me & walked into a room. Spoke with MA Christina & reviewed savings cards for Butrans & OxyContin. discussing usage for patients who pay cash or who are commercially insured.
PPLPMDL0020000001	Cleveland	OH	44109	12/7/2011	dr said she's not started anyone on Butrans as she doesnt have much experience prescribing narcotics yet dr said this is her 1st year post-grad,so she's learning from other residents and the attendings about opioids.we discussed 6 Butrans core selling messages and dr said if she see's any patients who arent controlled on immediate release opioids then she'll consider Butrans.showed formulary grid and focused dr on commercial insurance plans.i asked dr to think of 2 patients that could be appropriate for Butrans and start them this week.dr said she will if she see's anyone and if insurance covers Butrans, recommended Senokot-S
PPLPMDL0020000001	Parma	OH	44129	12/8/2011	Spoke with floater pharmacist who said he has filled Butrans prescriptions at some locations. Discussed appropriate patient type, focusing on those who take chronic, short-acting around-the-clock opioids, especially if they are not well-controlled or have their dose escalated. Also discussed e-voucher for Rite Aid customers & OxyContin savings cards.
PPLPMDL0020000001	Parma	OH	44129	12/8/2011	NON-PRESCRIBER- Quick call- Passed back Butrans webinar information, describing interactive nature of the program. I asked if she would be able to participate. She said she didn't know but probably not. Gave her portal invite & let her know that could be accessed at any time. She thanked me & walked away. Spoke with MA Brittni & reviewed Butrans appropriate patient type & OxyContin savings cards. She said she would try to remind Dr Rossi of Butrans.
PPLPMDL0020000001					

PPLPMDL0020000001	Cleveland	OH	44103	12/8/2011	dr said she's starting more patients on Butrans and patients are doing well.I asked dr who are the patients she's considering to start on Butrans? dr said most of these patients have been taking percocet and arent controlled so she's starting them on Butrans.I asked dr if she would consider starting patients on Butrans,after vicodin,when vicodin isnt controlling patients pain? dr said yes she would do that.dr said biggest challenge is getting medicaid to approve the PA for Butrans.we talked about PA requirements for Medicaid and I asked dr if she'll continue starting more patients this week? dr committed to do this. I showed dr appropriate patients flashcard for OxyContin,we discussed formulary coverage and I asked dr if she will continue starting patients on OxyContin? dr said she will no problems with OxyContin and coverage.recommended Senokot-S
	Beachwood	OH	44122	12/8/2011	NON-PRESCRIBER- Reminded Dr Malkamaki of previous Butrans discussions & how enthusiastic he had been about it. I asked him what happened & what his hesitation is with Butrans. He said it is a matter of finding the right patient. He then asked me what insurances would Butrans be "easy" to get on. Discussed focusing on private insurance & BWC as the path of least resistance. Reviewed appropriate patient type. He said although he likes to avoid chronic opioid therapy, he does have a lot of patients on chronic opioids. I asked if most are on short-acting or long-acting. He said mostly short-acting, but some on OxyContin. Discussed OxyContin as an option for appropriate patients beyond Butrans range. I asked if he believed in treating chronic pain with long-acting opioids. He said yes, as long as the person really does have chronic pain. I agreed that appropriate patient selection is important & that legitimate patients only should be considered. Discussed Butrans as a CII opioid delivering buprenorphine continuously for 7 days. He asked if a patient on fentanyl 25 would be a potential Butrans patient. I showed initiation guide pg 6. He said he really wants to try Butrans to start to gain experience. I told him only he can control that. He started looking in his computer & said he thinks he found his first Butrans patient. He added that the patient was on short-acting around-th-clock opioid & has BWC insurance. He said he will prescribe Butrans for that patient as his first one.
PPLPMDL0020000001	Cleveland	OH	44109	12/8/2011	dr said he's been giving Butrans patient info booklets to patients that he feels Butrans is an appropriate option.dr said patients tend to be resistant to a patch and its all mental because they are attached to their pills.dr asked how much short-acting opioids patients can take while wearing Butrans.I told dr I didnt have a recommendation but showed dr FPI,section 2.4 maintenance of therapy,noting that he can give immediate release opioid or non-opioid therapies with Butrans.dr said ok.I asked dr if he had any patients with 1 of the pain conditions,pg.11 visual aid,that are taking short-acting opioids but not controlled? dr said yes he has a lot of patients with these pain conditions but convincing the patient to try a patch for their pain,like Butrans,and getting Caresource/Medicaid to pay for it is another challenge.I asked dr if he had any BWC or commercial insurance patients that he could start on Butrans? dr said they have some here and more at the other offices.I asked dr to start 2 patients like that,this week,on Butrans.dr said he will keep trying and talking to patients about Butrans.dr said the booklets are helpful in educating the patients and he needs to get in a habit of starting patients on Butrans.we discussed OxyContin being an option for patients,showed challenging flashcard and showed formulary grid,I asked dr if he would start a couple patients on OxyContin that are appropriate? dr said he will if appropriate.I recommended Senokot-S
	Cleveland	OH	44104	12/8/2011	dr said she has 1 patient on Butrans and hasnt started anyone else,dr said this patient was motivated to try something else and didnt want short-acting opioids.I asked dr about her other patients with 1 of the chronic pain conditions,pg.11 visual aid, that are taking percocet daily for their pain but not controlled,would Butrans be an option for them? dr said majority of her patients only want pills and arent willing to try a patch.I asked dr if that was her perspective or if patients have said this? dr said patients always ask for pills,more pills,it never ends so its both her opinion and patients have said this. I asked dr if she'll start 2 commercial insurance patients,on Butrans,this week that are appropriate and willing to try Butrans? dr said she'll do her best and will continue giving patient info booklets to patients and see if that helps educate patients on Butrans.I recommended Senokot-S
PPLPMDL0020000001	Cleveland East Cleveland	OH	44113	12/8/2011	left BUP3015,initiation guide,patient info booklets,formulary grid,web conferences in dec 2011 and my business card - for Dr.Long and Patty Paczos,PA - in rheumatology dept
		OH	44112	12/8/2011	Doc took the initiation guide and said he was going to write it. I asked him where he is thinking about writing it. He said he needs to write it for one of his staff which he thinks would be a good candidate. I asked him where else would he prescribe butrans. He said for percocet patients with chronic pain. I explained that more moderate pain patients may be more appropriate - such as those taking tramadol or vicodin. He asked for confirmation of caresource coverage with a prior auth. Confirmed that it should go through. I reviewed the butrans starting doses. He said his staff has been doing more prior auths for oxycontin now. I told him that unfortunately medicaid is now requiring. He asked for more savings cards for oxycontin.
PPLPMDL0020000001	Cleveland	OH	44195	12/8/2011	I discussed patient case studies,initiations presentation,with Anne,NP Anne said dr stanton-hicks started a couple patients on Butrans so she's explained Butrans to a few patients and so far patients are doing good on Butrans.I asked Anne why Butrans was chosen? Anne said these patients were taking vicodin and not controlled so instead of giving more pills the dr wanted to try Butrans.Anne said because she see's all of the doctors patients,she's suggesting Butrans as an option more and more.I asked Anne how she explains Butrans to patients? anne said she tells patients Butrans is a patch for their pain and they need to rotate the patch once a week. we looked at patient info booklet,focused discussion on side effects,application/rotation of Butrans and disposal of Butrans.I asked Anne to give booklets to patients she starts on Butrans,Anne said she will and has been doing that.I asked Anne if she has 2 patients this week,with BWC or commercial insurance,that she can start on Butrans? Anne committed to do this.recommended Senokot-S
	Parma	OH	44129	12/8/2011	TRIALIST- Dr Gigliotti said he wrote a Butrans prescription on Tuesday. I asked him to tell me about the patient & why he chose Butrans for him/her. He said she had been taking Percocet around-the-clock for a couple months, then got switched by another doctor to Vicodin & was taking 5 per day. He said her insurance must have paid for it because he did not hear anything back from her about it. I asked if he planned to keep the momentum going & put more patients on Butrans & he said today might be the day again. Also reminded him of favorable OxyContin managed care.
PPLPMDL0020000001	Cleveland	OH	44195	12/8/2011	I discussed patient case studies,initiations presentation,with Kathy,PA.Kathy said more HCP's are prescribing Butrans in the dept but dr mekhail and dr minzter havent started anyone yet.I asked Kathy what features of Butrans really stand out to her? Kathy said she likes that Butrans is a patch,dosed once a week and being a CII is easy because she can call in refills. I asked Kathy if she will talk to her 2 HCP's she works with and discuss Butrans with them? Kathy said she will. I showed Kathy BUP3015,discussed opioid experienced patients clinical trial with Kathy and the 30% reductions in pain and asked Kathy to show both HCP's this study,Kathy said she will do that as 30% is impressive.I asked Kathy to focus on 2 patients,with commercial insurance,to start on Butrans this week.Kathy said she will do her best with the 2 HCP's and see if she can start anyone. recommended Senokot-S
	Lyndhurst	OH	44124	12/8/2011	Quick call....doc said she just wrote a script about a week ago. She the patient was a little lady that does not tolerate much so she started on the 5mcg even though the 10mcg is better. She just wanted to see how she does first. I gave reminder on the formulary coverage for butrans and oxycontin.
PPLPMDL0020000001	Cleveland	OH	44103	12/8/2011	I discussed patient case studies,initiations presentation,with dr.dr said he's given a few booklets out to patients but not a lot of patients want to wear a patch for their pain.dr said most patients want their pills.I showed dr FPI,section 2.4 maintenance of therapy section,told dr he can give immediate release opioid or non-opioid therapies with Butrans.dr said ok he'll talk to patients and see if he can convince a few patients to try Butrans.dr asked about medicaid coverage? we discussed PA requirements for Butrans.dr asked about OxyContin coverage for Medicaid patients? we discussed PA for OxyContin,showed formulary grid and I asked dr to continue prescribing OxyContin,dr said he will do that. recommended Senokot-S
	Beachwood	OH	44122	12/8/2011	NON-PRESCRIBER- Quick call- Gave Roberta upcoming Butrans webinar information & discussed interactive nature of the program. I let her know this would be a great opportunity to hear more about Butrans & discuss it with experts. I asked if she would participate. She said she would check her calendar. Also gave her portal invite & let her know that could be accessed at her convenience.
PPLPMDL0020000001	Cleveland	OH	44102	12/8/2011	I talked to Nagla,PA,about patient case studies-initiations presentation and Nagla said 2 of the HCP's-dr carson and dr celeste have started a few patients on Butrans.Nagla said she tells patients where to apply/rotate Butrans and shows the patient info booklet.Nagla said patients are doing well on Butrans so far and she's continually recommending Butrans to all the HCP's in the practice.we discussed initiation and titration of Butrans,showed visual aid an initiation guide,and I asked Nagla if she could start 2 patients this week focusing on BWC or commercial insurance? Nagla said she will keep recommending Butrans to the HCP's and if they agree with her,she'll start patients on Butrans.recommended Senokot-S
	Westlake	OH	44145	12/8/2011	I asked how his Butrans pateint was doing, the one who was not able to swallow tablets, he said that she seems to be doing well. He said he should be seeing her for a follow up soon and he will evaluate if he needs to titrate the dose. I asked if he would start other new patients this week and he agreed.
PPLPMDL0020000001	Cleveland	OH	44118	12/8/2011	Doc came out and asked if I "still had pain pills". I told him that I do still have oxycontin and I also have butrans which is a once a week CII opioid. I asked if he was interested in hearing about it. He said he is always interested even though he may not write it. I discussed the other selling messages and the coverage and savings cards. Nothing learned.
	Cleveland	OH	44195	12/8/2011	worked anesthesia dept - call notes on kathy kraus,PA and anne crawford,NP; left BUP3015,initiation guide,patient info booklets,formulary grid,patient savings card flashcard and my business card for dr covington, dr bamford,dr may,dr kriegler and dr stillman -neuro and chronic pain; worked rheumatology dept-SAME info as above for dr deal, dr calabrese,betsy kirschner,NP and dr chatterjee
PPLPMDL0020000001	Cleveland	OH	44102	12/8/2011	I talked to Vince,Pharmacist,about Butrans 6 core selling messages.Vince said no Rx yet,he's not ordering Butrans until he see's 1 script. I showed formulary grid and we discussed commercial insurance plans for Butrans.I asked Vince to give patient info booklets,to patients with chronic pain conditions that are taking immediate release opioids daily but not controlled,so patients can talk to their HCP's.Vince said he will do this.we talked about OxyContin writers in the area and I asked Vince if he's seeing new OxyContin Rx? Vince said no more of the same patients every month.I showed OxyContin formulary grids and briefly discussed OxyContin conversion guide.recommended senokot-s
	Cleveland Hts	OH	44118	12/8/2011	Spoke to tech, Sophia, about the stocking and movement of butrans. She was aware of one or two scripts being filled but does not know if they have been refilled. I asked if she knew the prescriber. She did not know. I explained the positioning of butrans and the savings card available for commercially insured patients. I asked about the volume of oxycontin scripts. She said they have plenty of those. No issues or concerns with oxycontin.
PPLPMDL0020000001	Cleveland Heights	OH	44118	12/8/2011	Spoke to Allan about the key selling messages of butrans including the positioning before going to vicodin ATC. I asked him how often does he see vicodin being refilled month after month. He said it is common. I gave him a patient info guide and asked him to consider giving it to a patient to let their doctor know about another option. He said maybe, if a customer asks.
	Parma	OH	44129	12/8/2011	NON-PRESCRIBER- Spoke with Sheila (MA) & discussed Butrans webinar. Described interactive nature of the program & asked her to be sure Dr Gallagher gets the information. She agreed. Also discussed Butrans core messages, reminding her of my previous discussions with Dr Gallagher. She said they are not scheduling anything at this time due to being busy. Let her know I would return to follow-up & try to catch Dr Gallagher. Discussed Butrans & OxyContin savings cards but they did not need any.
PPLPMDL0020000001	Cleveland	OH	44112	12/8/2011	I Showed doc the butrans demo and discussed the CII start times and 7 day delivery. He said he actually wrote a script fr it "2 days ago". I I asked him to tell me about the patient. He said the patient had Anthem and was taking 2-3 vicodin/day which was no longer enough. The patient didnt want to go to percocet so he put him on butran. I told him that is an ideal patient type for butrans. I asked if he gave a savings card. He said he did.
	Cleveland Hts	OH	44118	12/8/2011	I asked doc if he is having better luck with patients accessing butrans through insurance coverage and at the pharmacies. He said they seem to be getting it with no more problems. He said now we just have to see if its going to work. I told him the key is going to be proper patient selection and that patients failing on tramadol or low doses of vicodin are moer appropriate for butran. I reminded him of the caresource coverage after tramadol failures. I discussed the oxycontin patient type and coverage and left a conversion guide.
PPLPMDL0020000001	Highland Heights	OH	44143	12/8/2011	I said things are going well with butrans and he is still writing it. I asked him if he has prescribed for any medicaid patients. He said he doesnt think so. I asked him if he has any caresource patients. He said of course, "who doesn't?". I told him that caresource is covering butrans after failure on tramadol or other short acting. I also asked him if patients come to him opioid naive. He said sure and that he has a opioid naive patient now but she is medicaid. I asked him to consider a 5mcg dose for patients that are referred and are opioid naive. He said he has not had any issues with coverage/insurance. I discussed the oxycontin patient and the preferred covered for those patients. He said he only has about 5 patients on oxycontin and wishes he didn't.
	Cleveland Hts	OH	44118	12/8/2011	I reviewed the butrans indication and the other key selling messages. I asked if he has any patients that may be taking tramadol ATC but now need something else for their pain. He said he was just asking dr. ganz about alternatives to tramadol. I explained that as a CII butrans can be called in and refilled. He was rushing so I gave him an initiation guide and formulary grid. I asked doc to review and try a patient. He asked about the cost. I explained that commercial patients can expect to pay about \$15 when given a savings card which he has. Reminded him of the oxycontin savings cards as well.
PPLPMDL0020000001	Parma	OH	44129	12/9/2011	Spoke with pharmacy intern & reviewed Butrans core messages. Discussed appropriate patient type & showed him patient information booklets. He said he has read about Butrans & has seen it on the shelves. Discussed ability for patients to take supplemental analgesia with Butrans in form of non-opioid or immediate-release opioid medications. Also reviewed savings via e-voucher as well as OxyContin savings cards.

PPLPMDL0020000001	Twinsburg	OH	44087	12/9/2011	NON-PRESCRIBER- Reviewed Butrans core messages with Dr Pla & reminded her of previous Butrans discussions. Spent time going over appropriate patient type, focusing on patients who are not well-controlled on tramadol. I asked how long she usually considers "chronic". She said a couple months. I asked if she has patients like the ones we have talked about & she said yes. I asked if she thought it was fair for me to ask her to try Butrans on some of those patients if they are not getting relief from their current medication. She said yes. Showed adverse events & asked if anything surprised her. She said no. Discussed managed care coverage & savings cards for those eligible. She said she would keep it in mind & asked to keep the initiation guide so that she could reference it when that appropriate patient presents. Also discussed favorable coverage for OxyContin on Medicare D
PPLPMDL0020000001	Twinsburg	OH	44087	12/9/2011	NON-PRESCRIBER- Reminded Dr Hillard of other conversations we have had about Butrans. Told him I understand that he does not do a lot of chronic opioid therapy but asked if he would agree that he does have some patients who he feels are appropriate for it. He said yes. Discussed appropriate patient type at length, focusing on those who are not well-controlled on tramadol of who he is considering sending to pain management. I asked if it was fair to ask him to try Butrans for a patient before referring them to pain management. He said this would be an area he would use it. Reviewed dosing & 3 strengths. He asked about use in the elderly & adverse events. Showed adverse events & asked if anything surprised him. He said no & that they were what he would expect with an opioid. He asked for a "dosing card". I handed him initiation guide & showed how it may help him choose the right starting dose, depending on the patient. Discussed Butrans as a CII opioid with abuse/addiction potential. He asked about managed care coverage. Discussed where access is most favorable for Butrans & reviewed savings cards. I asked if he would try Butrans on the patient type we discussed today & he said yes. He said he would keep the initiation guide on his desk so that it is in front of him to help him remember. Also discussed OxyContin q12h for appropriate patients beyond Butrans.
PPLPMDL0020000001	Twinsburg	OH	44087	12/9/2011	NON-PRESCRIBER- Introduced myself & Purdue's products to Dr LeBaron. Delivered 5 Butrans core messages & discussed appropriate patient type. Also discussed Butrans as a CII opioid with abuse/addiction potential & showed her box warning. She asked about using Butrans in the elderly. I told her Butrans can be used in the elderly & that she would want to use the same caution she would use with treating this population with other opioids. Gave her an initiation guide & discussed dosing.
PPLPMDL0020000001	Parma	OH	44129	12/9/2011	NON-PRESCRIBER- Dr Roheny said the person who he had prescribed Butrans for reported back to him that she "couldn't take Butrans". I asked him to elaborate. He said it "made her sick". I asked him to clarify but he did not tell me what "sick" meant. I asked him to tell me more about the patient & what they were taking before Butrans. He said 4 Percocet per day. I showed initiation guide & pointed out the taper to less than 15mg oxycodone before starting Butrans & explained. He said that is good to know & he was glad he told me about it. I asked him if this would deter him from identifying more Butrans patients to try. He said no. Reviewed appropriate patient type & discussed patients taking 3 tramadol or Vicodin per day who ask for an increase in dose or dosing interval. He said he would try to remember all of these details. Gave him portal invite & asked him to participate. Also discussed OxyContin as an option for patients beyond range for Butrans.
PPLPMDL0020000001	Garfield Hts	OH	44125	12/9/2011	NON-PRESCRIBER- I asked Dr Sadowski how I could help him remember Butrans when the appropriate patient presents. He said he is ready to prescribe it & just needs to have a patient who needs it come in. He added that he has read studies about how long-acting opioids & patches are effective in treating pain. He said there are many options to treat these patients. I asked him why not choose Butrans for those appropriate. He said he will when he gets a patient. Spent time with Deena reviewing patient type. She said she can think of multiple patients in his practice who could benefit from Butrans. I asked if she would start flagging the charts with patient information booklets or savings cards when she identifies one of these patients in effort to help remind Dr Sadowski when he is seeing that patient. She agreed. Also reminded Dr Sadowski of OxyContin q12h as another long-acting option for treating appropriate patients beyond Butrans range.
PPLPMDL0020000001	Cleveland	OH	44104	12/9/2011	discussed patient case studies with dr dr said she likes that Butrans is an option for patients and will keep it in mind but she doesnt have many patients on narcotics.dr said those taking narcotics are controlled and if they need more pain medicine dr said she sends patients to pain management.we talked about patients that are taking tramadol and at some point they may need something else.i asked dr to consider Butrans for those patients.dr committed to do this.i asked dr if she had 2 patients coming in today/this week that could be appropriate for Butrans? dr said she doubts it but she'll keep Butrans in mind.focused dr on commercial insurance patients.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44111	12/9/2011	Spoke with John, we reviewed the Butrans medication guide and I asked if he would let appropriate chronic pain patients know about Butrans as an option and he said he would. We discussed how to instruct apteints about proper use and application of Butrans. I reviewed that Butrans and OxyContin have savings cards to reduce the copays.
PPLPMDL0020000001	Cleveland	OH	44114	12/9/2011	i talked to dave,pharmacy manager,about importance of handing out patient info booklets to patients.showed booklet and we discussed application/rotation,side effects and disposal of Butrans.dave said patients do get medication guide with this info but he see's value in booklet as its colorful and tabbed for the patient to easily find information.I asked dave if he will hand these booklets to every patient that gets a Butrans script filled here?
PPLPMDL0020000001	Mayfield Heights	OH	44124	12/9/2011	dave said he will do that.i recommended Senokot-5
PPLPMDL0020000001	Westlake	OH	44145	12/9/2011	I asked doc if he is still getting good results from butrans. She said she is and she is loving butrans. She said it is on her "therapeutic tier" meaning she goes to butrans when patients say they have pain all the time and the dont ddo well on tramadol. I told her that is exactly where we'd like her to use butrans. I told her now butrans is being covered by caresource after frallure on tramadol/codeine/vicodin. She said that expands the potential butrans patients and that news was worth the visit to her. Thanked her for her support,
PPLPMDL0020000001	Cleveland	OH	44111	12/9/2011	Spoke with Darrel, He said that he has not had any Butrans patients in a while, he checked the computer and said that it's been since May since they've seen a script. We reviewed Butrans medication guide and I asked if he would let appropriate chronic pain patients know about Butrans as an option and he said he might if he knows the patient. We discussed the use of supplemental analgesia with Butrans. Reminder that OxyContin is an option when Butrans may not provide adequate analgesia.
PPLPMDL0020000001	Cleveland	OH	44111	12/9/2011	Quick call with Katie, we reviewed the medication guide and savings program for Butrans. We discussed the savings program for OxyContin.
PPLPMDL0020000001	Cleveland	OH	44111	12/9/2011	Quick call, I asked Dr if he would start just a few patients on Butrans who have more moderate chronic pain like the ones we discussed last time. He agreed.
PPLPMDL0020000001	Cleveland	OH	44109	12/9/2011	i talked to dr about how he explains Butrans to patients.dr said he tells patients Butrans is a pain patch and has once a week dosing and patients have to rotate the patch.i showed dr patient info booklet,we discussed application/rotation,side effects and disposal sections and i asked dr to share this info with patients.dr committed to do this.dr said he's still giving booklets to patients and will start patients on Butrans but he has a lot of Medicaid and isnt willing to do a PA for Medicaid/caresource patients. I asked dr if he has BWC and/or commercial insurance patients? dr said yes he does.i asked dr to start 2 patients with BWC or commercial insurance that he feels are appropriate,dr committed to do this.recommended Senokot-5
PPLPMDL0020000001	Mayfield Hts	OH	44124	12/9/2011	Quick call...reviewed the butrans indication and the 7 day delivery in a CII opioid. Told him that because it is a CII it can be called in or refilled. I asked doc if he has these types of patients in his practice. He said sure. I asked him to try butrans for one patient this week. Reminded him that it is covered on BWC.
PPLPMDL0020000001	Cleveland	OH	44109	12/9/2011	worked pm&r dept
PPLPMDL0020000001	Cleveland	OH	44104	12/9/2011	discussed patient case studies with dr,initiations presentation,dr said he started a few more patients recently on Butrans.i asked dr if these were his clinic patients here or nursing home? dr said these are all nursing home and patients are doing great on Butrans.i asked dr why he's not started anyone from the out-patient clinic? dr said most of his patients are medicare and he's not had luck getting Butrans approved.i asked dr if he has any commercial plan patients? dr said a few.showed dr formulary grid,discussed commercial plan patients trying Butrans.dr said he will keep Butrans in mind for them.we discussed Butrans as an option for his patients,right after tramadol,dr said he thinks thats a good place and will consider that.i asked dr if he'll start 2 patients today/next week on Butrans? dr said yes he will but only if insurance pays for Butrans.i recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44113	12/9/2011	showed dr BUP3015,discussed inclusion and exclusion criteria,dr focused on back pain patients,i asked dr if 30% reductions in pain were clinically significant? dr said yes that was impressive.i asked dr how his patients would feel about that? dr said if he saw improvements in patients general functioning and overall improvement in mood,he would be happy.dr said his concern is Butrans isnt covered on commercial plans.i asked dr why? dr said because his MA,Deb,couldnt get Butrans and she has UH.i explained to dr that Deb's UH coverage is under Prescriptions Solutions,under Premier Physicians and there is a PA in place so unfortunately Deb couldnt get the medication as she didnt meet the PA requirements.i asked dr if he had any anthem and medical mutual patients that would be appropriate for Butrans? dr said he has both of those plans so he probably does.i asked dr if he would start 2 patients today/next week on Butrans? dr committed to do this. recommended Senokot-5
PPLPMDL0020000001	University Heights	OH	44121	12/9/2011	Quick call...I discussed the butrans indication and other selling messages. I asked doc if he has any patients that may be taking traamadol or low dose vicodin that might benefit from a product like butrans. He said he is sure he does he would just have to remember the product. I told him him I would come around more frequently to discuss butrans. Gave him an initiation guide and a formulary grid.
PPLPMDL0020000001	Cleveland	OH	44109	12/9/2011	i asked dr how he decides if patients get a refill of their short-acting opioids or if another medications appropriate? dr said he looks at patients general functioning,mood,facial appearance,if patients say their short-acting opioids arent lasting long enough so they have to take more pills he's considering another medication for them.i asked dr if he'll start a couple patients right after tramadol fails to control the pain,on Butrans? dr said he'll consider it.dr said he only has 1 patient on Butrans but thats due to the fact he doesnt have a lot of patients taking narcotics. we discussed initiation and titration and focused dr on commercial insurance plans.recommended
PPLPMDL0020000001	Independence	OH	44131	12/9/2011	Spoke briefly with pharmacist Regina. Reviewed Butrans as a once weekly transdermal system of buprenorphine & inquired about stocking. She said they do not have it stocked at this time & that she was too busy with computer issues to talk today. She asked that I come back another time. Gave her PurdueHCP.com Butrans information.
PPLPMDL0020000001	Cleveland	OH	44109	12/9/2011	i asked dr what triggers him to start patients on Butrans? dr said when patients are taking tramadol or vicodin and not controlled asking him for more pills or telling him their pills arent lasting long enough,he's talking to them about Butrans.dr said its been easy to explain Butrans and patients are fine with a patch.dr said he gives some patients immediate release opioids for breakthrough pain and hasnt had any resistance from patients. dr said only challenge is getting Caresource to approve Butrans.we talked about PA for Caresource and i focused dr on BWC and commercial insurance patients.i asked dr if he'll start more patients today and next week,on Butrans? dr said he will do that.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44109	12/9/2011	i asked dr how he evaluates patients pain? dr said overall functioning and facial gestures.dr said he looks to see if patients are following through on physical therapy and exercise and are they taking their pain medications as prescribed.i asked dr how he knows when a change in medication is necessary? dr said when patients say their short-acting opioids arent lasting long enough or they are taking more than prescribed,thats when he'll look at another short-acting or consider a long-acting opioid.i asked dr if he would consider Butrans right after tramadol,fails to control patients pain? dr said he might but usually goes to vicodin.i asked dr to start 2 patients today/next week on Butrans,after tramadol doesnt control patients pain,dr said if insurance pays for it he'll consider Butrans.dr asked about Medicaid coverage.we talked about PA for Medicaid patients and i asked dr if he had BWC and commercial insurance? dr said he does but majority of chronic pain patients are Medicaid.i asked dr to focus on BWC and commercial insurance patients,dr said ok.we talked about OxyContin being an option for patients,showed formulary grid and i asked dr if he'll continue starting patients on OxyContin? dr said he will do that.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44109	12/9/2011	dr said she started a couple patients on Butrans.i asked dr why she chose Butrans? dr said 2 patients were taking vicodin and I was taking percocet for their chronic pain,they were asking for more pills saying their immediate release opioids weren't lasting long enough.dr said she wanted to try something different so she started them on Butrans.i asked dr how she explained Butrans to patients.dr said she told patients its a patch for their pain and they rotate the patch on 1 of the 4 application sites,once a week.i showed dr patient info booklet and asked her to discuss side effects,disposal,etc with patients.dr said she briefly talks to patients and then just hands them the patient info booklet.i asked dr if she has 2 patients this week,like the one's she's started,to start on Butrans focusing on BWC and commercial insurance patients? dr said probably so and she'll continue talking about Butrans to patients.recommended Senokot-5
PPLPMDL0020000001	Independence	OH	44131	12/9/2011	NON-PRESCRIBER- Quick call. Positioned Butrans for patients who are not well-controlled on chronic around-the-clock tramadol. Dr Rob said he would keep it in mind & walked into a room. Maria said Dr Rob is considering making the office a no-see. Reviewed Butrans & OxyContin savings cards with her. No savings cards were needed.
PPLPMDL0020000001	CLEVELAND	OH	44109	12/9/2011	i talked to Ron,Pharmacist,about the largest writers of immediate release opioids in the area.Ron said he gets a lot of scripts from Metro HCP's and some local:ron mentioned dr nickels,dr raheja,dr celeste and dr carson.i told Ron i work with these HCP's,showed Ron the visual aid and discussed 5 core selling messages.Ron said he's not seen any Rx here for Butrans but likes that Butrans is a patch.showed Ron patient info booklet and asked Ron if he'll recommend Butrans to patients that are taking short-acting opioids but not controlled? Ron said he will give booklets to patients.i told Ron by doing this patients can talk to their HCP's about Butrans. we discussed formulary coverage for Butrans-focus on commercial plans but discussed PA for Medicaid patients.recommended Senokot-5
PPLPMDL0020000001					

PPLPMDL0020000001	Mayfield Heights	OH	44124	12/9/2011	Quick call....I reminded doc that those newly referred patients taking tramadol or vicodin are ideal for butrans starts. I gave him a formulary grid and asked him to focus on the non-medicare patients and give a savings card. He said ok.
PPLPMDL0020000001	Lakewood	OH	44107	12/12/2011	Quick call with Chuck, we discussed the Butrans medication guide and he said he has been handing them out. He said he has a few patients on Butrans. We discussed that Butrans can be used with supplemental analgesia. I asked if he would hand out the medication guides to appropriate patients and let them know about Butrans as an option and he said he will.
PPLPMDL0020000001	Cleveland	OH	44107	12/12/2011	Spoke with Nick, I reviewed the Butrans medication guide and how to teach patients about the proper use and application of Butrans. I reviewed that Butrans is a CII and the use of supplemental analgesia with Butrans. I asked him if he would let appropriate chronic pain patients know about Butrans as an option and if they would give them a medication guide to hand to their Dr. He said that he would.
PPLPMDL0020000001	LAKEWOOD	OH	44107	12/12/2011	Spoke with Ronnie and tech, we reviewed that Butrans can be used with supplemental analgesia. I reviewed the medication guide and they still have some to hand out to the patients. I asked if they might let patients know about Butrans as an option to discuss with their doctor and they would if the patient asked about what other options they could try. Reminder that OxyContin is still a long acting option for patients taking short acting opioids around the clock.
PPLPMDL0020000001	Lakewood	OH	44107	12/12/2011	I reviewed the case studies with the Dr. He told me about a few patients that he started on Butrans but were taking more than 40mg of oxycodone per day. I let him know that it is important to titrate these patients down to 15mg of oxycodone per day before starting them on Butrans 10mcg. He said that he understood this and was going to continue to switch patients from percoet to Butrans. I asked what he likes about Butrans and he said that it is a CII and can be refilled so that patients don't have to come in. We reviewed when OxyContin may be an appropriate option.
PPLPMDL0020000001	Cleveland	OH	44109	12/12/2011	I asked dr how he decides if patients get a refill of short-acting opioid or if a long-acting opioid is appropriate. dr said he will usually give patients a couple refills but if he hears them say its not lasting long enough or they are calling the office early every month for refills, he may consider a long-acting opioid. I told dr he can choose Butrans for these patients. I showed dr BUP3015, opioid experienced clinical trial and we discussed inclusion and exclusion criteria and 30% reduction in pain. dr said he knows Butrans is available, he's giving booklets to patients and will be following up with them and he'll get there its just taking him longer to get patients started on Butrans. I asked dr if he'll start 2 patients this week, focused on BWC or commercial plan patients? dr committed to do this. focused dr on BWC and commercial insurance patients and recommended Senokot-5
PPLPMDL0020000001	Hudson	OH	44236	12/12/2011	Spoke with floater pharmacist. Discussed Butrans core messages & appropriate patient type. Focused on patients who are not well-controlled on tramadol around-the-clock. Presented patient information booklet & discussed how they can be used for patient counsel or given to patients who the pharmacist identifies as potential Butrans candidates based on their patient type. She said she likes to give out patient information when possible.
PPLPMDL0020000001	Cleveland	OH	44106	12/12/2011	Reviewed automatic savings for CVS customers through the e-voucher program & discussed OxyContin savings cards. dr said he has all of the clinical info that he needs on Butrans but doesn't have any patients in mind that he can start on Butrans at this time. dr said since he joined the anesthesia/pain management dept a few months ago, he's not prescribing a lot of narcotics. dr said he prefers surgical procedures for patients with chronic pain but will keep Butrans in mind. showed dr BUP3015, we discussed inclusion and exclusion criteria and the 30% reduction in pain. dr said he likes the data its impressive and will keep Butrans in mind when he see's appropriate patients. I asked dr if he had 2 patients this week that he could start on Butrans? dr said he didn't know but would consider Butrans if he deems it appropriate. focused dr on commercial plan patients and recommended Senokot-5
PPLPMDL0020000001	Hudson	OH	44236	12/12/2011	NON-PRESCRIBER- Re-introduced Butrans to Dr Chase, reviewing core messages. He said he has not prescribed it yet. Spent time going over appropriate patient type & range, including OxyContin as an option for patients beyond Butrans range. He said as a family practitioner, he does not see a lot of chronic pain conditions & tries to refer chronic pain issues to pain management when possible. Discussed once weekly dosing with the ability for patients to take supplemental analgesia if necessary. Also discussed titration ability after 3 days to a maximum of 20mcg. Discussed Butrans as a CII opioid with abuse/addiction potential & advised to only consider patients with legitimate pain. He said that it can be difficult to determine at times. I agreed that appropriate patient selection can be challenging. Reviewed managed care & savings cards.
PPLPMDL0020000001	Hudson	OH	44236	12/12/2011	NON-PRESCRIBER- Introduced myself & Purdue's products to Dr Margocs. She said she had not had any experience with Butrans so far. Delivered core messages & alerted her to the fact that Butrans is a CII opioid with abuse/addiction potential. Spent time going over appropriate patient type, focusing on legitimate pain patients who are not well-controlled on tramadol around-the-clock for a chronically painful condition. Discussed ability for patients to take supplemental analgesia with Butrans, titration ability after 3 days, & maximum dosage of 20mcg. Presented initiation guide to help reinforce appropriate patient range. She said she found the information to be "interesting". She added that usually they try to refer out if someone has a chronic pain issue & she does not have a lot of experience in dealing with this as she is still in her residency.
PPLPMDL0020000001	Cleveland	OH	44106	12/12/2011	I talked to dr about appropriate patients for Butrans. showed opioid experienced patients in visual aid. dr said he is only starting patients if fellows recommend Butrans to him because he forgets about it. I asked dr if he'll see a few patients this week that are appropriate. to start on Butrans? dr said he's sure he will. I asked dr to start 2 patients on Butrans this week. dr committed. recommended Senokot-5
PPLPMDL0020000001	Hudson	OH	44236	12/12/2011	NON-PRESCRIBER- Reminded Dr Russ of previous Butrans conversation & asked what his experience has been. He said he has not used it. Reviewed Butrans core messages & spent time going over appropriate patient type. Focused on patients for whom he prescribes tramadol 3 times per day who then want an increase in dose or dosing interval upon follow-up. Discussed considering a switch to Butrans for this type of patient. He said this makes sense. He asked what the maximum dose for Butrans is. I told him 20mcg is the maximum dose recommended. He asked if patients could put on a 20 with a 5mcg patch. I told him it is only recommended to use one system at a time at a maximum dose of 20mcg. Discussed Butrans as a CII opioid with abuse/addiction potential. Also reviewed managed care coverage & savings cards for Butrans & OxyContin. I asked if the type of patient we discussed today presents if he would feel comfortable prescribing Butrans & he said yes.
PPLPMDL0020000001	Hudson	OH	44236	12/12/2011	TRIALIST- Dr Tosino said he has a few patients on Butrans now & that one actually was just in. I asked him about the kind of feedback he has been given. He said the patient who just left is doing very well on it & is very happy with her results. I asked him what the patient had been on prior to making the switch to Butrans. He said she had tried a variety of different short-acting medications, none of which seemed to work for her. He added that she seemed like a legitimate pain patient so he offered Butrans to her to see if that would help control her pain. Dr Tosino said again that she is very happy with her results. I asked what dose he put her on & he said 5mcg. Discussed ability to titrate after 3 days if necessary to a maximum dose of 20mcg. I asked if he had other patients who presented like this one if he would write Butrans for them as well & he said yes. He also asked me for additional savings cards, which I provided. Also discussed savings cards for OxyContin.
PPLPMDL0020000001	Solon	OH	44139	12/12/2011	NON-PRESCRIBER- Quick call- Passed back Butrans portal invite & described interactive nature of the online programs. I asked him to log on as this could help him better position Butrans in his practice. He said he would take a look at it. Also reminded him of OxyContin favorable managed care coverage. He said he writes it "all the time".
PPLPMDL0020000001	Cleveland	OH	44104	12/12/2011	dr said she has 1 patient on Butrans and that patients doing great. told dr that was great and asked if she had more patients like this 1? dr said she probably does but most of her percoet patients dont want to try a patch for their chronic pain. I asked dr if she's shown the patient info booklet to these patients and discussed Butrans? dr said a few patients she's given the booklets to and she's following up in 2 weeks but others dont want to try a patch at all. showed dr visual aid, opioid experienced patients section and asked dr to start 2 patients on Butrans this week, focusing on commercial insurance. dr said she will consider it. recommended Senokot-5
PPLPMDL0020000001	Lakewood	OH	44107	12/12/2011	I asked what results he thinks his patients might expect to get from Butrans. He said he really didn't know since he hasn't tried it, I reviewed the opioid experienced clinical trial data and asked his thoughts on the reduction in pain scores. He said he thought it was significant and agreed to try Butrans on these patient types.
PPLPMDL0020000001	Parma	OH	44134	12/12/2011	REPEAT CUSTOMER- Dr Mandat said he is really getting good results with Butrans & has had a few new starts since our last discussion. I asked what type of feedback his patients have been giving him. He said they report good pain relief. He added that he just had a patient in today for whom he prescribed Butrans. He said that this patient was on dialysis, so he chose Butrans for him & he is doing very well on it. I asked if he would continue to prescribe & he said yes. Showed him savings cards & presented patient information booklet. Described how they can be used in discussing Butrans with a patient. He said they would be very helpful & asked me to leave a few. Also recommended Senokot-5 for opioid-induced constipation.
PPLPMDL0020000001	Lakewood	OH	44107	12/12/2011	I asked what the downside would be to his patients if he tried Butrans for them. He said that it's expensive and may not be covered. I reviewed that if he focuses on commercial insurance patients will have as low as \$15
PPLPMDL0020000001	Cleveland	OH	44113	12/12/2011	dale, PA, said he started 1 patient today on Butrans. I asked Dale why he chose Butrans? dale said patient was taking percoet, 2 pills a day, and not controlled asking for more pills so he started patient on Butrans. we discussed patient info booklet and focusing on application/rotation info with patients. Dale agreed to do this. I asked dale if he has more patients this week that he can start on Butrans? dale said he's sure he will today but dr shen is going on vacation from 12/13/11 - 12/27/11 so he wont be seeing that many patients who need a change in their opioid regimen. focused dale on BWC and commercial insurance patients. recommended Senokot-5
PPLPMDL0020000001	Lakewood	OH	44107	12/12/2011	I asked Dr if he sees any benefit of Butrans for his patients. He said the 7 dosing. I asked if he had a few patients on tramadol who are not well controlled who he can try Butrans on and he agreed.
PPLPMDL0020000001	Lakewood	OH	44107	12/12/2011	I asked her why she decided to try Butrans for the one patient that she started. She said that she sees it as another option instead of vicodin around the clock. I asked if she had other patients on tramadol whose pain is not well controlled who she can start on Butrans and she said she will keep it in mind. Reminder that OxyContin is an option when Butrans 20mcg dose not provide adequate analgesia.
PPLPMDL0020000001	Cleveland	OH	44113	12/12/2011	dr said she started a couple more patients today on Butrans, told dr that was great and asked if she'll start more patients today on Butrans? dr said yes she will as this is her last day of work until dec 27th. I showed dr butrans initiation guide and patient info booklet and asked her to continue starting patients and give booklets to patients showing application/rotation info. dr said she and nurses give booklets to patients and she'll continue starting patients. focused dr on BWC and commercial insurance patients. recommended Senokot-5
PPLPMDL0020000001	Parma	OH	44129	12/12/2011	NON-PRESCRIBER- Quick call- Dr Taylor saw me through the window & said she has not had anyone to put on Butrans yet but that she is keeping it in mind & is ready when someone comes in. Spoke with Mary & discussed savings cards for Butrans & OxyContin. Also told Mary about managed care coverage for both products. She said they have enough savings cards for now. She said she would let Dr Taylor know about managed care.
PPLPMDL0020000001	Cleveland	OH	44106	12/12/2011	worked apm dept
PPLPMDL0020000001	Cleveland	OH	44106	12/12/2011	showed dr BUP3015, inclusion criteria and asked dr about the pain conditions listed if there were any therapies he would like to replace? dr said not really he feels the opioids have a place in treatment of chronic pain but he prefers to try surgical procedures. dr said he has a few patients on narcotics and is considering Butrans for patients. I asked dr if he could start 2 patients this week on Butrans? dr said he will look and see who comes in to see him and yes he'll consider Butrans for patients. focused dr on commercial insurance plans. recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44106	12/12/2011	showed dr pg.11 visual aid and we discussed pain conditions that dr treats. dr focused on arthritis patients and back pain-majority of patients here. dr said he will give narcotics but always starts with short-acting opioids to see if that manages pain. I asked dr when does he choose a long-acting opioid? dr said when all short-acting opioids fail. I asked dr if he has any patients like the opioid experienced patients. showed this section in visual aid, that could be appropriate for Butrans? dr said he probably does and will consider Butrans. dr said its up to the attending HCP's to say Butrans is an acceptable option for patients so he'll recommend Butrans to the attending HCP's and see what they say. focused dr on commercial plan patients and asked dr if he'll start 2 patients this week on Butrans? dr said if patients insurance covers Butrans and attending HCP's approve he will do that. recommended
PPLPMDL0020000001	Lakewood	OH	44107	12/12/2011	Quick call, I asked Dr how the 2 patients he started on Butrans are doing. he said he has not heard any feedback yet. I asked what he will do if the patients say that they are not getting good pain relief and he said he will titrate. I reviewed that he can do this after 3 days. Reminder that OxyContin is an option when Butrans does not provide adequate analgesia.
PPLPMDL0020000001	Mogadore	OH	44260	12/12/2011	Dr said he has not written BLTrans and honestly doesn't remember & asked if I could review it again because it sounds like something he would like. I reviewed indication, dosing and titration. HE asked if this is less abuseable and I said it has the same potential for abuse as any other c3 medication and referred to section 9 in the FPI. HE said he would definitely write it if covered, I reviewed managed care and savings cards program he said he would write it definitely. I reviewed Oxycontin dosing and managed care coverage.
PPLPMDL0020000001	Cleveland	OH	44104	12/12/2011	I showed dr Butrans visual aid, discussed opioid experienced patients. dr said he started a few patients on Butrans. I asked dr why he chose Butrans for them? dr said patients were taking percoet every day for their pain but not controlled and were asking him for more pills, so dr wanted to try Butrans. we discussed initiation, titration and side effects of Butrans. I asked dr if he has more patients like this that he can start on Butrans today? dr said today's his last day and he wont be back till the new year. 2012. I told dr i would follow-up with him the 1st week in jan 2012. dr said that would be fine. showed formulary grid and focused dr on commercial insurance patients. dr asked about medicaid coverage, we discussed PA for medicaid. recommended Senokot-5

PPLPMDL0020000001	Cleveland	OH	44106	12/12/2011	dr said he started a couple patients on Butrans,dr hayekes patients,i asked why he chose Butrans for these patients? dr said patients were maxed on tramadol and he wanted to try Butrans before going to vicodin.dr said patients will be back in 2 weeks for a follow-up so he'll know more then.we talked about titration and discussing side effects with patients and giving them the Butrans patient info booklets,dr said he gives those to patients.i asked dr if he has 2 patients this week,like the one's he started,that he can start on Butrans? dr said probably so and he'll consider it.dr said biggest challenge is medicaid/caresource coverage.we discussed PA for caresource patients and i asked dr to continue focusing on commercial plan patients.dr said he would do that.recommended Senokot-S
PPLPMDL0020000001	Mogadore	OH	44260	12/12/2011	Dr said he is still writing Butrans as long as managed care allows him to. I asked what do you mean, are you having difficulties and he said sometimes. I said have those obstacles prevented you from writing as much and he said some. HE asked if there are any changes and I said Caresource is paying for Butrans as long as they failed one of the 4 short acting. HE said hopefully that is that easy. I asked are your patients getting the success and he said yes, o i said do you see any sense in going to Vicodin from Tramadol if the patient is chronic. HE said as long as insurance will pay. I asked if he is using supplemental analgesic and he said yes, in most cases. I reviewed dosing for Oxycontin and he said he has some patients on it but is done with patients escalating and always calling because they are out. HE would rather refer. I said there may be some that he feels comfortable with who he has been treating for years, I said for those, write Oxycontin
PPLPMDL0020000001	Cleveland	OH	44102	12/12/2011	i talked to Amol,Pharmacist,about Butrans 6 core selling messages.Amol said he's not seen any Rx for Butrans and probably wont until we get better coverage on medicaid plans.we talked about PA for medicaid and caresource patients.i asked Amol who are some of the biggest short-acting opioid writers in area? Amol said he wasnt comfortable sharing that info but would recommend Butrans to patients that are appropriate and give patient info booklets to them so they can talk to their HCP's about Butrans.i told Amol that would be great and appreciated it. confirmed OxyContin stocking and gave formulary grids.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44114	12/12/2011	i talked to Joel,Pharmacy Mgr,about Butrans 5 core selling messages.Joel said Butrans sounds like a great product but he see's all of the patients here with chronic pain only wanting their pills.Joel said its rare if patients want to stop their pills and try a patch.i showed Joel Butrans FPJ,section 2.4 maintenance of therapy section,and we discussed the fact that patients can take immediate release opioids or non-opioid therapy with Butrans,Joel said that was fine but until HCP's start prescribing Butrans,patients will keep asking for pills only. we discussed Butrans formulary coverage,showed grids and Joel said majority of patients are medicaid,we discussed PA for medicaid and caresource patients.Joel said he'll order Butrans when he see's the 1st Rx.confirmed OxyContin stocking,Joel said these are the same patients monthly getting their OxyContin so no new Rx for OxyContin.showed formulary grids and recommended Senokot-S
PPLPMDL0020000001	Lakewood	OH	44107	12/12/2011	I asked Dr if he sees Butrans benefitting any of his patients. He said that he feels that his patients will not want to give up their pills or pay the higher expense. I asked him to not switch any patients who are on a stable dose of short acting, but rather patients taking tramadol whose pain is not well controlled and they are looking for another option. I let him know that the expense is as low as \$15 per month and he said it was reasonable. I asked if he would try a patient who is looking for a medication adjustment and he agreed. He said that many of his patients are on higher doses of opioids and we discussed when OxyContin may be an option.
PPLPMDL0020000001	Mogadore	OH	44260	12/12/2011	Dr peaked into lunch and asked what is new and I asked if he had any new patients nad he said he tried someone but wastn sure if it went through or not, he hasnt heard back. I told him about Caresource COverage and criteria. HE asked about medicare and I said PA but he can write low dose Oxycontin, it is 2nd tier on CCRX and aarp
PPLPMDL0020000001	Cleveland	OH	44106	12/12/2011	i talked to Wes,Pharmacist,about Butrans 6 core selling messages and formulary status.Wes said i should follow-up with him in 2012 for another formulary review because right now the P&T committee wont add Butrans to the formulary.Wes said the P&T committee members were focused on acute pain patients as thats majority in the hospital so Butrans didnt have a place at this time.i talked to Wes about Pain management HCP's prescribing Butrans,showed formulary grids and we discussed PA for caresource patients.Wes said if more HCP's prescribe Butrans maybe the P&T committee will reconsider Butrans,at this time its still a NO. we discussed OxyContin stocking and Wes said the strengths they have in the hospital are all they can stock in the Ommi cell so they dont have room for more strengths.we discussed formulary coverage for OxyContin and i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44106	12/12/2011	i showed dr BUP3015,inclusion criteria and asked dr if she's treating these pain conditions? dr said yes they see everything here i asked dr how she chooses an opioid for patients? dr said she always starts with tramadol and when patients are maxed out on tramadol,200mg,she'll consider vicodin.i asked dr at what point is a long-acting opioid appropriate? dr said thats the last choice for her.dr said she believes in surgical procedures and not a lot of narcotics for patients.i showed 30% reduction in pain page,BUP3015,asked dr if that was clinically significant? dr said yes it is.i asked dr if its significant enough for her to start 2 patients on Butrans this week? dr said she'll consider it but thats up to the Attending HCP's to approve her choice.focused dr on commercial insurance plans and recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44106	12/13/2011	i talked to Steve,Pharmacy Mgr,nothing new learned about Butrans or OxyContin.Steve said they havent filled any Butrans scripts here but he's giving patient info booklets to those chronic pain patients that tell him their pain isnt controlled with their short-acting opioids and Steve tells patients to talk to their HCP's about Butrans.Steve said i could leave more booklets and follow-up in 2012. confirmed OxyContin stocking with Steve and Steve said not many new Rx for OxyContin,same patients monthly getting their OxyContin.i showed Steve OxyContin formulary grids for commercial and Medicare plans and Steve said he'll keep these for reference.i recommended
PPLPMDL0020000001	Cleveland	OH	44103	12/13/2011	i talked to Abdul,Pharmacist,nothing new with Butrans-no Rx yet,Abdul said he doesnt think many HCP's will write Butrans until medicaid coverage gets better.we talked about PA for medicaid and caresource patients.i asked about OxyContin if he's seeing any new Rx? Abdul said not really,mainly same patients every month nothing new with OxyContin either.showed formulary grids and we discussed appropriate patients for OxyContin.recommended Senokot-S
PPLPMDL0020000001	Westlake	OH	44145	12/13/2011	Spoke with Jenn, we discussed the medication guide for Butrans and how to instruct patients about how to use Butrans. I reviewed that Butrans can be used with supplemental analgesia and that Butrans is a CII and can be called in. I asked if she would let appropriate pain patients know that Butrans is another option and she agreed. We reviewed that OxyContin is an option when Butrans may not provide adequate analgesia.
PPLPMDL0020000001	Brooklyn	OH	44144	12/13/2011	Spoke with David (pharmacist/manager). He said he has seen some movement of Butrans at this location & that they stock all 3 strengths. Reviewed with him the appropriate patient type, focusing on patients who take chronic short-acting opioids around-the-clock. Asked if he had patient information booklets on hand- he checked his shelf & said he does have some. Showed him a booklet & discussed how it can be used with patients who have a prescription for Butrans or for those who he thinks could benefit from Butrans based on their patient type. I asked if he would do this. He agreed. Discussed OxyContin & savings cards. He said he does not have anyone on it regularly & does not dispense very much of it. He added that he has some cards & will give them out when he gets a prescription.
PPLPMDL0020000001	Westlake	OH	44145	12/13/2011	Spoke with Lisa, I reviewed our last conversation and asked if she was able to let any patients know about Butrans as an option, she had not yet. I asked if she would just let any appropriate patients know that Butrans is another option that can talk to their doctor about and she agreed. We discussed that OxyContin is an option when Butrans does not provide adequate analgesia.
PPLPMDL0020000001	Parma	OH	44129	12/13/2011	NON-PRESCRIBER- Dr Jugulion said he had attended a convention about 6 months ago & Butrans was the topic of one of the lectures. He said he found it to be very interesting although he does not prescribe any narcotics. He said he got "burned" early in his practice by a patient who was addicted to morphine. I agreed that caution has to be exercised in prescribing opioids & that one should take all measures possible to protect one's practice. Also discussed importance of appropriate patient selection. He said he remembers learning from the lecture that Butrans isn't as abuseable as other narcotics. I told him that Butrans is a CII opioid & does carry abuse/addiction potential. I asked him to be just as cautious in prescribing Butrans as he would with any other opioid medication. Showed him a demo patch & discussed structure of the patch, including adhesive matrix. Also discussed OxyContin as an option for patients beyond the appropriate range for Butrans.
PPLPMDL0020000001	Cleveland	OH	44113	12/13/2011	i talked to dr about patients that are opioid experienced,not controlled and considering Butrans as an option,showed BUP3015 opioid experienced clinical trial,dr said he started 1 patient today on Butrans.i told dr that was great and asked why he chose Butrans? dr said patient was taking vicodin,not controlled and dr thought this patient would be willing to wear a patch and remember to rotate patch once a week.showed dr patient info booklet,asked if he discussed this info with patient? dr said he talked a little bit to patient about 4 application sites on each side of body but Stephanie,MA,discussed the booklet sections with patient.i asked dr if he has 2 more patients,like this 1,that he can start on Butrans this week? dr said he will keep looking,every day he looks to see who could be appropriate and gives patient info booklets to patients so he thinks thats helping met with Denny to plan for call on Ron Wheeler and we filled out paperwork for February promotion. Denny and I then called on Ron Wheeler at DDM to discuss 2012 plans and February promotion as well as to get planogram corrected and move Colace to a lower shelf. See Ron Wheeler (Discount Drug Mart) notes.
PPLPMDL0020000001	Cleveland	OH	44113	12/13/2011	dr said he started 1 patient on Butrans,nursing home patient,got coverage and patient's doing well.i asked dr if he had commercial insurance patients that are taking short-acting opioids daily but not controlled? dr said yes.i showed dr opioid experienced patients,visual aid,asked dr if he has 2 patients like this that he can start on Butrans this week? dr said he will think about it and see who comes in this week.dr said it all depends on insurance and he wants to make sure commercial plans cover Butrans,i showed dr Butrans formulary grid and we discussed patient savings card program for commercial plan patients.recommended Senokot-S
PPLPMDL0020000001	Stow	OH	44224	12/13/2011	Dr said he has used Butrans, I asked him how often he sees patients who come in on short acting a week who are ready for a medication change and he said he sees patients all week long like that. I asked him, now that there is Butrans, why would he go to Vicodin and he said that is a good point. I said when he sees patients likethat, can he fit Butrans in and he said yes. He asked what is the coverage and I told him about Caresource, commercial and BWC. I also spoke with Lisa in BWC and she said she has not seen any PAs for BWC.
PPLPMDL0020000001	Cleveland	OH	44113	12/13/2011	worked offices in hospital -lunch with dr farooqi,spoke with dr sharma and dr bhimani
PPLPMDL0020000001	Cleveland	OH	44195	12/13/2011	worked spm dept-left BUP3015,initiation guide,formulary grid and my business card for dr rosenquist,dr vrooman,dr mekhail and dr stanton-hicks as i couldnt see any HCP's. worked chronic pain-left SAME info for dr covington and dr mathews; worked neurology dept-left dr bamford same info as above with patient info booklets
PPLPMDL0020000001	Lyndhurst	OH	44124	12/13/2011	Spoke to Megan about the stocking and movement of butrans. She said she really had not seen that much. I asked if she knows if patients have gotten it refilled. She said not that she recalled but maybe another pharmacist has. She has not seen one in a few months. I explained the positioning, supplemental analgesis, and the savings cards. She has not had any issues with oxycontin and still sees plenty of it.
PPLPMDL0020000001	Cleveland	OH	44130	12/13/2011	TRIALIST- I showed Dr Diab the Butrans formulary grid & told him that patients on all these plans could get Butrans for an average of \$15 if using the savings cards he has. Also showed OxyContin grid & let him know that OxyContin is covered on over 90% of lives nationally. He said this was good, thanked me, & walked into a room.
PPLPMDL0020000001	Cleveland	OH	44130	12/13/2011	TRIALIST- Dr Fedorko said he thought he had some good Butrans news for me but he forgot what it was. He added that he did just put someone on it. I showed him the savings cards with patient information guide & reminded him to give them out to patients. Also reminded him of favorable managed care coverage for commercial plans. He said he would try to remember who he put on Butrans so he could tell me about them next time. Also showed OTC samples & recommended Senokot-S for opioid-induced constipation.
PPLPMDL0020000001	Westlake	OH	44145	12/13/2011	I asked Dr what he likes about Butrans, he said that it really works for some patients. I asked if he had a few new patients to start this week and he said he will keep Butrans in mind.
PPLPMDL0020000001	Cleveland	OH	44114	12/13/2011	dr said she's continually starting patients on Butrans and is happy so far with the clinical results.i asked dr who are the patients she feels are appropriate for Butrans? dr said patients taking a couple vicodin or percocet that are asking for more pills,she's talking to them about Butrans and starting them.i asked dr if she will start a few more patients this week on Butrans? dr committed to do this and i focused dr on BWC and commercial insurance plans.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44143	12/13/2011	I tried to ask doc about his experience with prescribing butrans. He said he did not have time to talk ans asked me to leave him some info. I provided him a copy of the opioid naive clinical trial and reminded him to focus on non-medicare patients.
PPLPMDL0020000001	Brooklyn	OH	44144	12/13/2011	Quick call with Michele. She said she has not had any movement with Butrans. Discussed insurance coverage & BWC as well as automatic savings for eligible customers through the e-voucher. Also reviewed OxyContin savings cards but Michele said they did not need any more at this time.
PPLPMDL0020000001	Cleveland	OH	44114	12/13/2011	dr said he's starting more patients on Butrans every week and patients are doing well.dr said these are patients taking a couple vicodin or percocet every day but not controlled and asking him for more pills,so he's not refilling the short-acting opioids and is telling patients Butrans is their option.i focused dr on application/rotation info-patient info booklet and asked dr to focus on BWC patients.dr said he is doing this but there are some medicaid patients he would like to start on Butrans,we discussed PA for medicaid and caresource patients.i asked dr if he has more patients he can start on Butrans this week,dr said yes he does.recommended Senokot-S
PPLPMDL0020000001	Euclid	OH	44117	12/13/2011	Quick call....i reminded doc of his commitment last week to prescribe butrans for those patients on tramadol and no longer control. He said he is going to and he tried to write for one patient but they did not want a patch. He said he will keep trying. Told him that after 300mg of tramadol 10mcg of butrans would be a good starting dose.

PPLPMDL0020000001	Westlake	OH	44145	12/13/2011	I asked Dr if he continued to get good feedback from his Butrans patients. He said he has. I asked about how many patients he currently has on Butrans and he said a couple. I asked if he thinks that more patients would benefit from Butrans and he said yes, he will look for some new patients to that might benefit.
PPLPMDL0020000001	Cleveland	OH	44129	12/13/2011	LOYAL CUSTOMER- Quick call- Caught Deb at the Parma office. She said she has been starting more patients on Butrans & has had success. She said she plans to continue doing this. Spoke with Dawn, manager, & discussed this location's schedule. Deb will be coming in January on Monday's permanently with Caryn working Tuesday/Thursday & Mayra working Wednesday. Dawn said she will try to remind each of them of Butrans where
PPLPMDL0020000001	Cleveland	OH	44103	12/13/2011	I talked to dr about her opioid experienced patients that could be appropriate for Butrans,dr focused on her percoct patients.dr said she's starting patients on Butrans almost weekly depends on her getting PA's approved by medicaid.I asked dr if she had a couple patients this week that she could start on Butrans,focusing on her commercial plan patients? dr said she will do that but majority are medicaid so she'll have to do the PA's for these patients to get Butrans.we talked about initiation and titration,showed visual aid for discussion,we talked about OxyContin being preferred on UHC/AARP which is a top plan for dr,I asked dr if she'll choose OxyContin for her UHC/AARP patients? dr said she will know its the lowest branded copay,showed formulary grid.recommended Senokot-5
PPLPMDL0020000001	Stow	OH	44224	12/13/2011	Abby just got her prescribing license finalized last week and has only been prescribing this week very little due to computers down. I reviewed Butrans again, dosing and titration and patient type. She said she has not been using BUTrans but nothing of anything else either. She said she will be seeing mainly follow up patients and refilling their meds. I said she will then be seeing when the patients will need medication changes. I said when patient is on Tramadol, instead of going to Vicodin she can go to Butrans,. She said she will keep Butrans in mind.
PPLPMDL0020000001	Cleveland	OH	44195	12/13/2011	dr said he's starting more patients on Butrans and is seeing good results.I asked dr why he's choosing Butrans? dr said some patients are taking vicodin and others percoct for their pain and its not controlling the pain so he's trying Butrans.I showed BUP3015,we discussed opioid experienced clinical trial and I asked dr if he would continue starting patients on Butrans this week? dr said yes he would.we discussed initiation and titration of Butrans,I focused dr on commercial and BWC patients.dr asked about OxyContin insurance coverage,I showed formulary grids,left savings cards and asked dr if he'll start a few patients on OxyContin this week? dr said yes he will but he doesn't start a lot of patients on OxyContin.I recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44113	12/13/2011	I talked to dr about Butrans being an option for his opioid experienced patients,showed BUP3015 and discussed inclusion and exclusion criteria,dr said he has a lot of patients on vicodin that he would like to start on Butrans but not every patient wants to try a patch.I asked dr to discuss Butrans with 2 patients,focusing on commercial insurance,show patients the patient info booklet and start them on Butrans this week,dr committed to do this.we discussed initiation and titration of Butrans and I recommended Senokot-5
PPLPMDL0020000001	Parma	OH	44134	12/13/2011	LOYALIST- Dr Hernandez told me again about the patient who had been on Opana who is getting good results with Butrans 20mcg. He said he was pleasantly surprised at the success. He added that Butrans is working for his patients so he likes prescribing it & will continue to do so. Discussed titration. Dr Hernandez said he does not believe that a patient would get "breakthrough pain". He went on to say that if a patient is experiencing pain while on a medication, that patient is not on the right dose of their medication. He said that if a patient he starts on Butrans or OxyContin reports that they need something for breakthrough pain, he simply titrates the patients dose of Butrans or OxyContin to the next higher dose & that resolves the breakthrough pain reported by the patient. I agreed that titration & frequent discussions between physician & patient should occur. Dr Hernandez said again that he will keep using Butrans & OxyContin.
PPLPMDL0020000001	Richmond Heights	OH	44143	12/13/2011	Window call...I asked doc if he has any patients that are taking tramadol as monotherapy for their pain on a daily basis. He confirmed that he did. I asked him how high he titrates those patients before going on to another product. He said it depends. I asked him to consider going to butrans after failure on tramadol and instead of going to maybe vicodin. He said he would look at 'it'. Gave him study on opioid experienced patients and gave a formulary grid. Let him know that Caresource will cover butrans with a PA after tramadol. Gave an oxycontin formulary grid also.
PPLPMDL0020000001	Stow	OH	44224	12/13/2011	janet is new PA and just started this week so has not finished all paper work and has not prescribed yet. I reviewed Butrans indication, dosing and titration, patient types and managed care coverage. She said she is going to be doing most of the BWC there and patient follow ups and said that she sees this as something she can write. I said I will follow up to see if she has had any questions.
PPLPMDL0020000001	Cleveland	OH	44113	12/13/2011	dr said he's been giving Butrans patient info booklets out but hasn't started anyone yet,I told dr that was great and asked when he's following up with these patients? dr said in 2 weeks so he'll talk to patients and see if they want to try Butrans.dr asked about insurance coverage for Butrans? I showed dr Butrans formulary grid and we discussed patient savings cards for commercial plan patients.I asked dr if he had 2 opioid experienced patients,showed visual aid,that aren't controlled on their short-acting opioids? dr said he has a lot of chronic pain patients that are taking short-acting opioids daily and not controlled.I told dr that's where Butrans could be an option.we discussed initiation and titration of Butrans and I asked dr if he could start those 2 patients on Butrans this week? dr said he's working this week,then on vacation 2 weeks till the new year,so he'll see what he can do.I focused dr on Commercial plan patients.dr asked about medicaid or caresource coverage,we discussed PA for both plans,recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44114	12/13/2011	John,PA,said he and dr marshall are continually starting more patients on Butrans,I asked John what triggers him to choose Butrans for patients? John said when patients are taking 1-2 tabs a day of vicodin or percoct and that dosing regimen isn't controlling the pain,he talks to patients about Butrans and starts them. we talked about initiation and titration of Butrans,showed visual aid with this info and I asked John if he'll start more patients this week? John said he will do that.I focused John on BWC patients.recommended Senokot-5
PPLPMDL0020000001	Akron	OH	44307	12/13/2011	Dr. Brown's clinical experience in sleep therapies, my role as a Medical Liaison with Purdue Pharma, possible future collaborations<hr>Telephone call to Dr. Brown to renew acquaintance and discuss his background in sleep therapy. He has a very strong ambulatory care program at Akron General; pharmacists in the Ambulatory Care service did all of the medication management (including sleep therapies) under a collaborative agreement. I described my role as an ML with Purdue Pharma. Dr. Brown is open to discussing possible future collaborations.
PPLPMDL0020000001	Cleveland	OH	44124	12/13/2011	Window call...Reminded doc of the butrans CII status, 7 day delivery and the positioning after tramadol failures. I asked him to try just one patient on butrans who may be failing on tramadol. I asked him to log onto the butrans portal to learn more about it. He said he would see. He need oxycontin savings cards.
PPLPMDL0020000001	Richmond Heights	OH	44143	12/13/2011	Spoke to tech, Katrina, about the movement of butrans. She said that they have a couple of patients on it regularly and come in for refills. I asked her if she recalls the use of a savings card. She did not but also does not recall they copays being too high. I explained the savings with the card and the availability online. Pharmacist was busy but gave and FPI for him.
PPLPMDL0020000001	Stow	OH	44224	12/13/2011	Dr said he mainly does procedures. I asked if there is any cases where he does the prescribing and he said no, he cannot take the time to review medications with them, he is only doing injection and going through that with the patients. HE said he was just talking about Butrans at their meeting last night and he said they were talking about adding Buprinorphine to their drug screening.
PPLPMDL0020000001	Mayfield Hts	OH	44124	12/13/2011	Quick call....I asked doc how much medicaid he sees in his practice. He said he has some as well as medicaid. I told him that while butrans may still be restricted with medicare, Caresource will pay for butrans after failure on tramadol. He said "really?" and he the would have to remember that. Left formulary grids for butrans and oxycontin
PPLPMDL0020000001	Parma	OH	44129	12/13/2011	NON-PRESCRIBER- Reminded Dr Moysaenko of previous lunch conversation about Butrans & refreshed his memory on core messages. Discussed once weekly dosing & delivery of buprenorphine over 7 days. He asked how Butrans compares with fentanyl. Showed initiation guide pg 6, letting him know patients on fentanyl were excluded from studies. Went over appropriate Butrans patient range, discussing OxyContin as an option for patients beyond Butrans. He asked what the street value is. I told him I did not have information on this but reminded him that Butrans is a CII opioid with abuse & addiction potential & advised him to use caution when prescribing. He agreed. He asked about insurance coverage. Discussed favorable coverage on commercial insurance plans. He asked if it was on formulary at the hospital. Let him know I am working on it & that the hospital has ordered Butrans before. I asked if it was fair of me to ask him to try some of the types of patients we reviewed today on Butrans & he said he would do that.
PPLPMDL0020000001	Stow	OH	44224	12/13/2011	I asked Dr what success stories is he seeing with his patients and he said the patients like Butrans and are doing well. HE said as long as insurance covers it. I asked which ones are not and he said medicare and I said they are going to be mainly PA> I asked how much of his practice is commercial and he said 50%, reviewed managed care with them as well as Caresource. HE said they only see Caresource. He said when a patient is on 4 pills a day, that is when he will switch to long acting. Barry said why not change when they are on 2 pills of Hydrcodone or when they are on Tramdol and ready for medication switch and he said that is possibility. I asked how often is he seeing patients who are on short acting and are ready for medicaiton change and he said all of the time. HE said alot of his patients are on higher doses and are not appropriate for Butrans and I said no they are not. HE said he is happy with it and will continue to write.
PPLPMDL0020000001	Westlake	OH	44145	12/13/2011	Introduction to Dr Yonan, he was already familiar with Butrans and said that he just started a new patient yesterday. I asked him to tell me about the patient and he said they were taking vicodin around the clock. I asked what he likes about Butrans and he said that he is finding that patients do not get a high from Butrans. I let him know that we have no data to support that, and that Butrans is a CII with risk of abuse and addiction. He said these are his thoughts from his clinical experience. He had questions about the savings program and that the patient that he started was on Anthem. He did not give her a savings card. I reviewed that patients can go to Butrans.com to print out a savings card and he was going to call the patient to make sure she gets \$40 off her copay. We discussed the OxyContin savings program and well as managed care coverage.
PPLPMDL0020000001	Parma	OH	44129	12/14/2011	REPEAT CUSTOMER- Followed up with Dr Chagin regarding the pain management assessment tools information he requested from me at my last lunch. Discussed PartnersAgainstPain.com & reviewed with him the resources that are available to him as a health care provider. He asked me about House Bill 93. I told him I did not know of the specifics but encouraged him to go online to Partners Against Pain site to get resources & tools to help him with pain management & protecting his practice. Also reviewed Butrans appropriate patient type & reminded him of savings cards available for eligible patients should someone present today or tomorrow. Finally, reminded him of OxyContin as an option for patients beyond that Butrans appropriate range. He thanked me for the resources & information & went into a room.
PPLPMDL0020000001	Westlake	OH	44145	12/14/2011	Quick call, I asked Dr if he had given Butrans another try for patients taking tramadol like we discussed last time. He said that he has not but he agreed to to find some appropriate patients.
PPLPMDL0020000001	Garfield Hts	OH	44125	12/14/2011	Spoke with Heather & reviewed Butrans core messages, reminding her of what Butrans is & who it is for & not for. She said she has seen it on the shelves but has not yet dispensed any herself. Spent time going over the appropriate patient type, focusing on patients who take tramadol 3-4 times per day chronically or those on low-dose Vicodin. Discussed once weekly dosing & automatic savings through e-voucher program for eligible CVS customers. Also discussed OxyContin savings cards but she said they did not need any at this time.
PPLPMDL0020000001	BEDFORD	OH	44146	12/14/2011	Spoke with pharmacist Marcus. He said he sent Butrans back as it was not moving but he will order it if he gets a prescription. I asked him if he fills a lot of prescriptions for short-acting opioids taken by patients chronically. He said yes & added that most patients are taking Percocet. I asked what about patients taking 3-4 tramadol or Vicodin per day. He said he fills a lot of those. Reviewed with him appropriate patient type & range. I showed him patients information booklet with him & discussed how it can be used for patients who have a prescription or those who he identifies as potential Butrans patients based on their patient type. He agreed that this would be a good idea as he knows of some patients who could benefit from Butrans. Discussed OxyContin 7 tablet strengths, all of which he says he stocks. Also reviewed savings cards but he did not need any at this time.
PPLPMDL0020000001	Bedford	OH	44146	12/14/2011	REPEAT CUSTOMER - I asked Dr Moufawwad when he was going to prescribe Butrans. He said he is planning on prescribing Butrans now as he is "expecting good news this week." He did not indicate what type of news this was that would impact his prescribing. Reviewed appropriate patient type with him & reminded him of savings cards available for Butrans & OxyContin.
PPLPMDL0020000001	Maple Heights	OH	44137	12/14/2011	NON-PRESCRIBER- Caught Dr Gene at the window for a quick call. I passed back a Butrans initiation & titration guide & let him know it would be a useful tool in identifying potential Butrans patients. Also reminded him of the appropriate patient type, positioning Butrans for patients who are not well-controlled on 3-4 tramadol per day. He thanked me & said he would have a look through the guide.
PPLPMDL0020000001	Cleveland	OH	44113	12/14/2011	I talked to deb,PA,about the patients she's starting on Butrans.deb said most patients are taking 4-5 pills,vicodin 5/325,a day and when they tell her their pain isn't controlled,she's starting them on Butrans and giving some vicodin for breakthrough pain.I showed BUP3015,we discussed opioid experienced patients clinical trial and I asked Deb if she'll start more patients this week on Butrans? deb said she will do that. Deb said only challenge is insurance,she's not getting Butrans approved,after the PA for her Caresource patients.I asked Deb to focus on BWC and commercial insurance.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44113	12/14/2011	dr said he started another patient on Butrans this week.dr said he's waiting for medicaid approval of the PA.I asked dr if he had BWC and commercial patients that he could start on Butrans this week? dr said he's sure he does and will continue starting patients.I showed patient info booklet to dr and asked dr to give these booklets to patients when he starts them on Butrans,dr said he does that and will continue.recommended Senokot-5
PPLPMDL0020000001	Cleveland	OH	44109	12/14/2011	talked to Debbie,RN,for Dr.Forde about patients that are appropriate for Butrans,showed BUP3015,and asked Debbie if she saw a place for Butrans in dr forde's practice? Debbie said absolutely but it comes down to insurance.Debbie said a lot of patients have medicaid here,we discussed PA for medicaid patients and I asked debbie if she could talk to dr forde about 2 patients that she knows are appropriate for Butrans and start them? debbie said yes she will do that.showed formulary grid and gave Debbie the "Discover" invite and web conferences for dec 2011 on Butrans.

PPLPMDL0020000001	Cleveland	OH	44113	12/14/2011	i talked to dr about BUP3015, discussed opioid experienced patients clinical trial, asked dr if she's seeing these types of pain conditions? dr said yes. showed 30% clinical reduction, asked dr if this was clinically significant? dr said yes it is. i asked if its enough for her to start 2 patients on Butrans? dr said she will consider it. dr said its tough for a lot of patients to try a patch because they only want their pills. i showed dr FPI, 2.4 maintenance of therapy, told dr that she can give immediate release or non-opioid therapies with Butrans, dr said ok she'll consider that. i focused dr on BWC and commercial insurance patients. recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	12/14/2011	dr said she started a patient on Butrans and patient was excited to try Butrans so dr is happy and is going to think of more patients to discuss Butrans. i asked dr why she chose Butrans? dr said patient was taking 2 percoct daily, not controlled and asking for more pills so she wanted to try Butrans. dr said this patient was open and willing to wear a patch for a week and will remember to rotate the patch every week. dr said not every patient is that reliable. i talked to dr about Butrans patient info booklet, dr said she gives this to patients and it really helps educate them. i asked dr if she has 2 more patients like this 1, to start on Butrans? dr said probably so and it depends on insurance. i focused dr on BWC and commercial insurance patients, dr said ok she'll look to see who comes in this week. recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44106	12/14/2011	i talked to dr about patients that are opioid experienced, showed visual aid, asked dr if he see's these types of patients often? dr said yes all the time. i asked dr if he's considering Butrans for them? dr said some patients he is but insurance is a big factor. i showed dr formulary grid, focused dr on commercial insurance patients and asked if dr has 2 patients with commercial insurance that he can start on Butrans this week? dr said he didnt know but will keep thinking of Butrans. dr said he knows Butrans is available. recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	12/14/2011	worked out-patient pharmacy and pm&r dept- saw dr huang
PPLPMDL0020000001	Cleveland	OH	44113	12/14/2011	dr said he's still starting patients on Butrans, i asked dr who is the appropriate Butrans patient? dr said patients taking 4-5 pills, vicodin 5/325, daily and not controlled. dr said these are the patients that he starts on Butrans and gives some vicodin for breakthrough. dr said he knows Butrans is another option for his chronic pain patients and he'll continue talking to them about it. i asked dr if there were any drawbacks with starting patients on Butrans? dr said only drawback is insurance and he has a lot of caresource, dr said caresource hasnt been approving Butrans with the PA and now caresource wants a PA for every medication, monthly. dr said its very frustrating to treat patients when he cant prescribe what he feels is best for patients. i asked dr if he'll start 2 patients on Butrans, this week, focusing on BWC and commercial insurance? dr said he will do that if patients are willing to try Butrans and as long as insurance pays for Butrans. i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44113	12/14/2011	dr said he's not started anyone on Butrans but knows its available. i asked dr whats preventing him from starting patients on Butrans? dr said a lot of patients dont want to wear a patch for their pain and like their pills. we talked about FPI, section 2.4 maintenance of therapy and i told dr he can give immediate release or non-opioid therapies with Butrans. dr said ok he'll think about it. dr asked about medicaid coverage. we discussed PA for medicaid and i asked dr if he will start 2 patients on Butrans, focused on BWC and commercial insurance, this week? dr said if patients are willing to wear a patch and insurance covers Butrans, he'll start a few
PPLPMDL0020000001	Cleveland	OH	44106	12/14/2011	i talked to dr about his patients taking tramadol daily for their chronic pain and i asked dr if he would consider Butrans right after tramadol? dr said he would consider that if insurance covers Butrans. i asked dr if he'll start 2 patients today on Butrans, focusing on commercial insurance? dr said he will keep talking to patients about Butrans and will do his best to start a couple patients. recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44122	12/14/2011	worked pain management dept
PPLPMDL0020000001	Warrensville Heights	OH	44106	12/14/2011	NON-PRESCRIBER- Showed Dr Zivic a demo patch. He said that actually the patient who was in one of his exam rooms would be a good candidate for Butrans clinically, but that she has Medicare Part D insurance. Reviewed managed care coverage, focusing on commercial insurance plans. Reminded him that OxyContin has favorable Medicare Part D coverage. He said he would keep that in mind & then walked into a room.
PPLPMDL0020000001	Cleveland	OH	44109	12/14/2011	i talked to Chris, Pharmacist, and confirmed Butrans stocking. Chris said a few Rx for Butrans have come from Family Medicine and Pain management but majority are coming from PM&R and its mainly dr greenwood. i discussed 6 Butrans core selling messages with Chris and i asked Chris if he would continue giving patient info booklets to those patients getting their scripts for Butrans. Chris said they give them out and will continue doing that. i showed Chris Butrans formulary grid, focused on commercial plans but Chris asked about BWC and medicaid patients so we talked about these plans. confirmed OxyContin stocking and we discussed formulary coverage. i asked if Rob, Pharmacy manager was available to see me? Chris said he was in a meeting and i could try back Friday and check in then or call Rob for an appointment. i recommended Senokot-S
PPLPMDL0020000001	Westlake	OH	44145	12/14/2011	Quick follow up, i asked if he had heard any feedback from the patient that he started and he said he has not. i let him know to keep me posted on managed care and how the patient is doing as i want to make sure everything goes smoothly and managed care is covered.
PPLPMDL0020000001	Cleveland	OH	44113	12/14/2011	i talked to Mike, Pharmacy Mgr, about 6 Butrans core selling messages. Mike said he's not seen any patients with Butrans on at this facility, but thinks its a great option for patients. Mike said to keep him updated on any insurance changes, if medicare covers Butrans in 2012. mike said CME courses are always a plus for him and his pharmacy staff. i told mike to go to the website purdue's medical education catalog, mike said he will look at that.
PPLPMDL0020000001	Parma	OH	44129	12/15/2011	Spoke with floater pharmacist Heather. Reviewed Butrans core messages with her & discussed appropriate patient type/range. Focused her on patients who are taking chronic short-acting around-the-clock opioids, especially if they comment to her that they are not getting adequate relief. Discussed dosing & titration up to a maximum 20mcg. i showed her patient information booklets, discussing how they can be used in patient counsel & asked her to leave them for Fred. She agreed. Also discussed automatic savings through e-voucher as well as OxyContin savings cards.
PPLPMDL0020000001	Westlake	OH	44145	12/15/2011	Dr complained to me that he is trying to get his patients to try Butrans, but they say they do not want a patch and they want to keep all of their pills. i discussed that he could start patients on Butrans before they ever start taking vicodin around the clock and he agreed but said that he does not have many patients like this. Dr said that he will keep trying and will be strict in not allowing his patients to titrate their dose of short acting and only offer Butrans as another option. We discussed that OxyContin may be an option for many of his patients as well.
PPLPMDL0020000001	Cleveland	OH	44109	12/15/2011	dr said he's trying to start patients on Butrans but medicaid isnt approving the PA's, dr said he's frustrated. i asked dr who are the appropriate patients for Butrans? dr said patients taking a couple vicodin or percoct every day that arent controlled and asking him for more pills. dr said he talks to patients about Butrans at that point and if insurance covers Butrans he'll start them. i asked dr if he had 2 patients this week that he could start on Butrans, focusing on BWC or commercial insurance plans? dr committed to do this. recommended Senokot-S
PPLPMDL0020000001	South Euclid	OH	44121	12/15/2011	Window call. i reminded doc of the butrans 7 day delivery of analgesia and that it can be called in and or refilled. i asked her if she will give it another try for an appropriate patient instead of going to hydrocodone
PPLPMDL0020000001	Parma	OH	44129	12/15/2011	ATC. She said she would try to give it another try. Gave her a formulary grid and asked her to focus on those patients.
PPLPMDL0020000001	Cleveland	OH	44105	12/15/2011	TRIALIST- Dr Gigliotti told me again about the last patient who he put on Butrans. He said he never did hear anything from the insurance, so it must have been covered. He also said he has not heard from the patient herself, so he considers that a good sign as well. Reviewed the appropriate patient type, discussing OxyContin as an option for patients beyond Butrans range.
PPLPMDL0020000001	Cleveland	OH	44130	12/15/2011	dr said she's still giving patient info booklets out to patients she feels are appropriate for Butrans. told dr that was great and asked who are the appropriate patients? dr said patients taking a couple percoct a day for their chronic pain but asking for more pills, dr said she doesnt want to give more pills and thinks patients just need another option. we talked about initiation and titration of Butrans and i told dr to continue giving patient info booklets out and focus on 2 patients with BWC or commercial insurance that she can start on Butrans, dr committed to do this.
PPLPMDL0020000001	Cleveland	OH	44113	12/15/2011	NON-PRESCRIBER- Reminded Dr Lash of Butrans core messages. Spent time going over appropriate patient type & range, discussing OxyContin as an option for patients beyond Butrans appropriate range. Discussed dosing & titration ability after 3 days to a maximum 20mcg dose. Also discussed inclusion criteria & conditions that may cause pain chronically. Also discussed the ability to take supplemental analgesia with Butrans in non-opioid medications or immediate-release opioids. He said he did not think an opioid would be very effective as breakthrough medication. i asked why. He said that if buprenorphine is occupying the mu opioid receptors, how could an opioid added make any difference. Showed FPI 2.4 as support that those medications can be used with Butrans, but let him know that acetaminophen or ibuprofen could also be used. i asked if he could see himself using Butrans in the type of patient we discussed today. He said yes. He added that when he first heard about Butrans it did not seem all that interesting to him, but now he can see himself using it. Discussed savings cards for both products, but Dr Lash said he is very lazy about giving them out & asked me not to leave any because he would probably forget to give them. Discussed OxyContin 7 tablet strengths. He said he uses the intermediate strengths & finds that OxyContin is a good, effective medication for patients in true pain.
PPLPMDL0020000001	Cleveland	OH	44103	12/15/2011	i talked to dr about her patients she's started on Butrans, dr said they are doing well, no complaints. dr said she's still having a challenge trying to get Butrans approved by medicaid with a PA but she's not giving up. i focused dr on commercial insurance patients for Butrans and dr said she knows thats easier with the Patient savings cards but she doesnt have a lot of those patients with chronic pain. dr said majority of patients with chronic pain are medicaid. i asked dr if she'll start a couple patients today and tomorrow on Butrans? dr committed to do this. recommended senokot-S
PPLPMDL0020000001	Cleveland	OH	44195	12/15/2011	i talked to Brittany, Pharmacy Tech, confirmed stocking of Butrans and OxyContin. Brittany said no Rx for Butrans and she doesnt understand why. Brittany said the HCP's in Taussig Cancer Center write a lot of short-acting opioids for patients with various types of cancer pain so she's surprised noone has started patients on Butrans. showed Brittany Visual aid, we discussed 5 core messages and Brittany talked about Butrans having transdermal delivery and once weekly dosing. i asked Brittany if patients ever say their short-acting opioids arent controlling their pain? Brittany said she would do that. told her i would follow-up in the new year
PPLPMDL0020000001	Cleveland	OH	44195	12/15/2011	anne, NP, said she hasnt started anyone on Butrans this week but knows its available and will continue talking to dr stanton-hicks about their patients who could be appropriate. i showed visual aid and we discussed opioid experienced patients. i asked anne if she'll start 2 patients on Butrans, this week, focusing on commercial insurance or BWC? Anne said as long as dr approves, she'll do that. recommended Senokot-S
PPLPMDL0020000001	Lyndhurst	OH	44124	12/15/2011	Spoke to Steve about the movement of butrans and oxycontin. He said he may have had one or 2 butrans in the past month. i asked if he recalls if the patient used a savings card. He card not recall but he does not remember any issues. i explained allowable use of supplemental analgesia per the FPI, in case he gets any indication otherwise that might effect his filling of the script. He said oxycontin has been steady with just a few regular
PPLPMDL0020000001	Westlake	OH	44145	12/15/2011	i asked Dr if he has seen any patients taking tramadol around the clock this week. He said he has a few. i asked if these patients might benefit from Butrans 7 day dosing and he said most of them are older with Med D or Medicaid. i asked him to try Butrans if any of these patients are commercial insurance and he agreed. i asked if he had some patients who are taking 10mg vicodin or percoct around the clock who may be appropriate for OxyContin and he said he does.
PPLPMDL0020000001	Cleveland Hts	OH	44118	12/15/2011	Quick call... i asked doc if he is continuing to have success with patients being able to get butrans. He said he has not heard anything since that one cleveland clinci employee. i asked if he has gotten on feedback on how well butrans is working. He said not yet and that he has told patients to give it a couple of weeks.
PPLPMDL0020000001	Cleveland	OH	44103	12/15/2011	showed dr BUP3015 and discussed opioid experienced patients clinical trial, i asked dr if he see's pain conditions listed in inclusion criteria? dr said yes, i asked how he manages chronic pain? dr said short-acting opioids. i asked dr at what point will he consider a long-acting opioid? dr said once patients have tried all short-acting opioids and nothing else is working, then he'll consider a long-acting opioid. i asked dr if he would consider starting patients on Butrans, right after tramadol? dr said he might if medicaid paid for Butrans. i talked to dr about PA for medicaid patients and focused dr on commercial insurance patients. i asked dr if he'll start 2 patients this week that are appropriate? dr said he'll think about it. we talked about OxyContin being an option for patients and dr said he writes a lot of OxyContin and patients can get it covered by insurance. recommended Senokot-S
PPLPMDL0020000001	Highland Heights	OH	44143	12/15/2011	Window call. ...reminded doc of the coverage for butrans and oxycontin and the respective savings cards. Nothing learned.
PPLPMDL0020000001	South Euclid	OH	44121	12/15/2011	Doc said he has a patient in mind for butrans - an older woman who would like to try the patch. He wrote a script but forgot to give a savings card. i gave him more but explained the availability online and at some of the
PPLPMDL0020000001	Cleveland	OH	44195	12/15/2011	pharmacies. i asked if the patient was medicare or commercially insured. He said she had Aetna medicare. i explained that she may or may not be able to use the savings card.
PPLPMDL0020000001	Cleveland	OH	44127	12/15/2011	i talked to Steve, Pharmacist, confirmed Butrans and OxyContin stocking. Steve said he was really busy and couldnt talk today but said he had plenty of patients savings cards and booklets so i should follow-up in the new year
PPLPMDL0020000001	Cleveland	OH	44127	12/15/2011	dr said she tried to start a couple patients on Butrans, but medicaid didnt approve the PA because patients hadnt tried a long-acting opioid 1st. asked dr if she had a couple commercial insurance patients that she could start on Butrans? dr said a couple but not many. we talked about initiation, titration of Butrans and discussed patient info booklet. i told dr i appreciated her trying to get a few patients started on Butrans but asked her to focus on 2 commercial plan patients today and tomorrow, dr committed to do this. recommended Senokot-S

PPLPMDL0020000001	Cleveland	OH	44130	12/15/2011	TRIALIST- I reminded Dr Kansal of previous conversations when he has told me about the difficulties in switching patients from short-acting to long-acting opioids. He said this is true. I asked him if he prescribes OxyContin. He said yes. I asked him why, then he couldn't see a place for Butrans. He said the mindset of the patient is different. I asked him to elaborate. He said if you ask a patient if they want to put on a patch for pain once a week or take 2 pills per day, the patient will almost always want the pill option. I asked him if this is because a patient wouldn't want to "give up" their pills. He said yes. I reminded him that patients can take supplemental analgesia with Butrans if necessary & also discussed titration of Butrans after 3 days if needed. He said that was a good point & he had forgotten that. I asked him if he ever has to increase someone's dose of short-acting opioid. He said yes. I asked isn't that an acknowledgment that what they are taking isn't working. He said yes. I asked if he felt a patient like this, who was not getting relief on their current medication would be a Butrans candidate. He said that was a good idea & he would try it. Also discussed OxyContin as an option for patients who are beyond the Butrans range.
PPLPMDL0020000001	Parma	OH	44129	12/15/2011	NON-PRESCRIBER- Positioned Butrans for patients who do not get adequate relief on 3-4 tramadol or Vicodin per day. Dr Paat asked me how often the 20mcg gets prescribed. I told him the 20mcg is a titration dose with 5 & 10 being the two starting doses. Discussed ability to titrate after 3 days up to a maximum 20mcg dose. He asked if patients could take hydrocodone with Butrans. I told him patients can take either opioid or non-opioid medications for breakthrough pain if necessary. I asked if he thought he would have someone coming in within the next few days who could benefit from Butrans & he said yes. Also reminded him of favorable Medicare Part D
PPLPMDL0020000001	East Cleveland	OH	44112	12/15/2011	Doc said the problem he has with butrans is that it is for those patients are just starting to have pain and his patients have been in pain for years. I read the exact indication and reviewed the positioning. He said he can think of one patient that he might try. The patient is currently just taking Tylenol with codiene. He could not recall what strength they were on but he remembered that I told him most of his patients would start on 10mcg. He said he is going to try but he does not want to be bothered with prior auths as they are already doing to many for other products including oxycontin. He said he would try.
PPLPMDL0020000001	Cleveland	OH	44103	12/15/2011	I talked to Amy, Pharmacy Manager, about some of the biggest short-acting opioid writers in the area. I knew all of the HCP's Amy mentioned: dr celeste, dr carson, dr nickels, dr boyd and dr robson. I talked to Amy about 6 Butrans core selling messages and I asked Amy if she would continue giving patient info booklets out to those patients she feels are appropriate for Butrans so they can talk to their HCP's about Butrans. Amy said she will do this confirmed stocking and recommended Senokot-S
PPLPMDL0020000001	Independence	OH	44131	12/15/2011	NON-PRESCRIBER- I asked Dr Sundaram how we were going to find him a Butrans patient. He said he actually just saw someone who might be a good candidate but the patient is self-pay. He asked the cash price for Butrans. I told him price will vary from pharmacy to pharmacy but showed WAC pricing sheet. Dr Sundaram said this patient is very well off & may pay out of pocket for Butrans. Reminded him to give the patient a savings card so he/she could save \$40 per month. I asked him to tell me more about the patient's condition. Dr Sundaram said the patient actually lost his job because his pain was affecting him at work. The patient was taking Tylenol to try to help with the pain. Dr Sundaram said he prescribed Ultram today but perhaps Butrans would have been a better option. He said he would find out what the patient wanted to do & would prescribe accordingly. Discussed OxyContin favorable managed care/savings cards as well.
PPLPMDL0020000001	Cleveland Hts	OH	44118	12/15/2011	Quick call...I reminded doc of the butrans positioning and other selling messages. I asked him if he sees opportunity to prescribe it for his patients. He said sure he just has not had a chance to look at the info I left him the last time. Reviewed the oxycontin flexible dosing options for moderate to severe pain and the availability of savings cards.
PPLPMDL0020000001	Sagamore Hills	OH	44067	12/16/2011	REPEAT CUSTOMER- Dr Scanlon said he has been prescribing Butrans & actually just prescribed it for a female patient before walking into breakfast. I asked if he typically gives patients refills of Butrans when giving them a prescription. He said yes. I asked if he could expand his utilization of Butrans since he has said that it is getting good results with it. He said he would try & that he has been trying to use it more. Reviewed appropriate patient type. Also discussed using patient information booklets to "sell" the concept of Butrans to appropriate patients. Dr Scanlon agreed to try this. Also discussed savings cards for Butrans & OxyContin. He asked for more Butrans
PPLPMDL0020000001	Independence	OH	44131	12/16/2011	Spoke with pharmacist David & reviewed Butrans core messages. Went over appropriate patient type, focusing on patients who take chronic short-acting around-the-clock opioids. Gave him patient information booklets & showed him how they can be used to help answer customer questions regarding Butrans. Also suggested he give them to customers who fit the appropriate Butrans patient type if he thinks they would be a good candidate. He agreed to do this. Also discussed OxyContin savings cards, but he said he did not need any more at this time.
PPLPMDL0020000001	Independence	OH	44131	12/16/2011	NON-PRESCRIBER- Dr Jack said he needs to think about Butrans more & that he can't believe it has been almost a year of me trying to get him to prescribe it. Reviewed core messages & asked him what he has to lose by trying it on a few appropriate patients. Reviewed appropriate patient type with him, focusing on patients who are not well-controlled on around-the-clock tramadol or Vicodin. Discussed OxyContin as an option for appropriate patients beyond Butrans range. Reminded him of once weekly dosing in a CII opioid & reminded him of abuse/addiction potential. Pointed out his savings cards. He said he would put a savings card in his pocket in effort to help him remember. I asked him to just find one or two appropriate patients to start. He agreed this was fair.
PPLPMDL0020000001	Sagamore Hills	OH	44067	12/16/2011	NON-PRESCRIBER- Reminded Dr Mike of previous Butrans conversations & reviewed core messages with him. I asked him his thoughts. He said he does not like to prescribe opioids. I agreed that appropriate patient selection is essential & asked if he would agree that opioids are sometimes warranted for certain patients in legitimate pain. He said yes but that it can be difficult to determine who truly has pain. He added that he does prescribe opioids occasionally. Reviewed with him the appropriate patient type, focusing on patients who are not well-controlled on 3-4 tramadol or Vicodin per day. Discussed OxyContin as an option for appropriate patients beyond Butrans range. Discussed Butrans delivering buprenorphine over 7 days. Also discussed ability to take supplemental analgesia with Butrans if necessary. Discussed warnings & precautions & Butrans as a CII opioid with abuse & addiction potential. Dr Mike said one of his concerns with Butrans would be that with a "steady" release of drug, patients may "get used to" the dose & then would need more & more. I agreed that physical tolerance is possible with all opioids. He said he would keep Butrans in mind for patients who he prescribes opioids.
PPLPMDL0020000001	Cleveland	OH	44102	12/16/2011	dr said he saw andrea yesterday and is looking for patients to start on Butrans. dr talked about his hydrocodone patients. i asked dr to start a couple patients on Butrans instead of increasing the hydrocodone dose and focus on BWC and/or commercial insurance patients. dr said he will do that.
PPLPMDL0020000001	Cleveland	OH	44111	12/16/2011	Quick call, I asked Dr who he thinks Butrans can benefit. he said he's not sure yet as he needs to gain experience. I asked if he would start some patients to see who can benefit and he agreed.
PPLPMDL0020000001	Cleveland	OH	44109	12/16/2011	dr said he started a few more patients on Butrans this week. i asked dr if he'll continue choosing Butrans for his patients? dr said yes he will. i asked dr where he's finding Butrans is appropriate? dr said after tramadol or vicodin, if patients aren't controlled and asking for more pills he discusses Butrans with them and some patients get immediate release opioid with Butrans and others have to take non-opioid therapy. i told dr that was great he sounds like he's getting more comfortable with Butrans and i asked dr if he'll start a couple more patients today? dr said as long as patients have the insurance coverage, he will. i focused dr on commercial and BWC patients.
PPLPMDL0020000001	Cleveland	OH	44109	12/16/2011	worked pm&r dept
PPLPMDL0020000001	Independence	OH	44131	12/16/2011	NON-PRESCRIBER- Quick call at the window- Positioned Butrans for patients with commercial insurance who are not well-controlled on tramadol around-the-clock. Also reminded Dr Pai of favorable Medicare Part D coverage for OxyContin.
PPLPMDL0020000001	Cleveland	OH	44113	12/16/2011	i showed dr visual aid, pg. 11 pain conditions, dr focused on patients with back pain, dr said there are so many patients with chronic low back pain and they are all taking short-acting opioids. i asked dr if she has a couple patients taking tramadol that aren't controlled and dr could start them on Butrans? dr said she has a lot of patients she would like to start on Butrans but not all of them are willing to wear a patch. dr said most patients just want their pills, nothing else. i showed dr fpi, section 2.4 maintenance of therapy section, noting she can give immediate release opioid or non-opioid therapy with Butrans. dr said ok she will talk to a few patients and see if she can convince them to try Butrans. i focused dr on commercial insurance patients. recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44113	12/16/2011	i talked to Justin, Pharmacist and Maria, Pharmacy Technician. Justin said he just ordered more Butrans and dr boh1 started a few more patients this week on Butrans. i asked Justin if patients are asking him any questions about Butrans when they get their scripts filled? Justin said no but he makes sure patients have the patient info booklets. i asked what types of insurance these patients have? Justin said some patients have Caresource and they are getting Butrans approved with a PA and trial of short-acting opioids. 1 patient had Anthem-Medicare Part D and dr boh1 did a PA for this patient and medicare approved Butrans and the others were BWC. we talked about Butrans formulary coverage and i asked Justin to continue giving patient info booklets to patients, he committed to do this. confirmed OxyContin stocking and Justin said he is still seeing a lot of patients get switched to Opana ER and sometimes to Opana, immediate release, from OxyContin. we discussed OxyContin formulary coverage and i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	12/16/2011	dr said he has 1 patient on Butrans and patients doing good. dr said no calls from this patient is a good sign. i asked dr if he has a couple more patients like this that he can start on Butrans? dr said he probably does. we talked about initiation and titration of Butrans and i focused dr on BWC and commercial insurance patients.
PPLPMDL0020000001	Cleveland	OH	44109	12/16/2011	dr said he started 1 patient on Butrans this week. i asked dr why he chose Butrans? dr said patient was taking vicodin and wasn't happy with this and wanted something different so he talked to the patient about Butrans. we discussed initiation and titration of Butrans and i asked dr if he has 2 patients like this 1 that he can start on Butrans today? dr said he's not sure who's coming in but he'll look today and next week and will start a few more patients. focused dr on BWC and commercial insurance patients. recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	12/16/2011	dr said he's not started anyone on Butrans but he gave a few patient info booklets to those patients that were hesitant about trying Butrans because it's a patch. i showed dr visual aid, discussed 5 core selling messages and dr focused on Butrans being transdermal and dosed once a week. i asked dr if he had 2 patients, BWC or commercial, that he knows is appropriate for Butrans? dr said he has a few patients in mind and will talk to patients next week. i told dr he does have an option of OxyContin for those patients that are ready for a long-acting opioid and aren't willing to try Butrans. dr said he knows OxyContin is available and writes a lot of it. showed formulary grid and i asked dr if he'll continue starting patients on OxyContin? dr said he will do that. recommended Senokot-S
PPLPMDL0020000001	Parma	OH	44129	12/19/2011	NON-PRESCRIBER- Introduced myself & Purdue's products to Dr Laluk. Reviewed Butrans core messages with him & discussed who the appropriate patient for Butrans could be. Showed initiation guide & focused him on pg 6, going through appropriate Butrans patient range, & discussing OxyContin as an option for appropriate patients beyond Butrans. Discussed various conditions that cause chronic pain, including osteoarthritis, spinal stenosis, & spondylolysis. Dr Laluk asked about insurance coverage. Discussed focusing on commercial insurance, where Butrans is obtainable. He asked what adverse events to expect. Showed him adverse event rates. He said some of the rates look a little higher than he would expect. He asked if it really works for 7 days. Told him Butrans is not for everyone & that Butrans is designed to release buprenorphine for 7 days. Showed core visual aid pg 6. Discussed savings cards for both products. Dr Laluk said he does have patients who fit the appropriate Butrans patient type & that he would keep Butrans in mind, although he does not often have to change or increase their medication. Discussed ability to take supplemental analgesia with Butrans. He said this was important.
PPLPMDL0020000001	Lakewood	OH	44107	12/19/2011	Spoke with Heather, we reviewed the medication guide and she said she does have them to hand out patients. I asked if she would let appropriate chronic pain patients know about Butrans as an option and she said she will if the patients want to discuss anything. Reminder that OxyContin is an option when Butrans does not provide adequate analgesia.
PPLPMDL0020000001	Lakewood	OH	44107	12/19/2011	Dr said that he is trying to convert patients who are on OxyContin to Butrans. He asked me how to initiate these patients based on which dose of OxyContin they are taking. I reviewed that patients taking OxyContin should be tapered down to 15mg of oxycodone per day before initiating 10mg Butrans. We reviewed titration. Dr asked how to initiate a patient taking 40mg of OxyContin and I reviewed that Butrans may not provide adequate analgesia for this patient and that he should taper them down to 15mg of oxycodone per day to prevent symptoms of withdrawal. He said he still maintains a lot of patients on OxyContin but where patients are willing to try something else, he is converting to Butrans and giving vicodin for break through. He said that he likes that Butrans is a CII. He asked about insurance coverage and we reviewed managed care for Butrans and OxyContin.
PPLPMDL0020000001	Northfield	OH	44067	12/19/2011	NON-PRESCRIBER- Spoke with nurse, Maggie, & reminded her of previous Butrans discussions with Dr Marshall. She said he was too far behind to talk today. Reviewed appropriate patient type & range with her, including OxyContin as an option for patients beyond the Butrans range. Also discussed once weekly transdermal dosing. Reviewed savings cards for both products with her. She said she would discuss it with Dr Marshall & promised to give him the initiation guide I left for him. Offered OCT samples, which she accepted.
PPLPMDL0020000001	Parma	OH	44129	12/19/2011	LOYAL CUSTOMER- Quick call- Passed back PurdueHCP.com lever & discussed interactive nature of the online Butrans programs with Dr Ortega. I encouraged him to log on to participate as this may help him identify more Butrans patients from his practice & would give him additional information. He said he would do this. Also reminder for OxyContin as an option for appropriate patients beyond Butrans. He said he is always keeping both in

	Beachwood	OH	44122	12/19/2011	Spoke with pharmacist, Shelly, who said she has not filled any Butrans prescriptions since our last discussion. She added that she had one customer who had a prescription for two patches & he got them, but she never got any feedback from him, & another customer had a prescription, Shelly ordered it, & the patient never returned to pick it up. Reviewed Butrans appropriate patient type & discussed ability to take supplemental analgesia with Butrans if necessary. Shelly said they really do not have a lot of pain management patients filling prescriptions there. She said most of them would probably not be willing to change medications. Discussed patients who get escalating doses as potential Butrans patients since that may indicate that their current medication may not be controlling their pain adequately. Discussed automatic savings via e-voucher & OxyContin savings cards. She said the customers who get OxyContin from her regularly have Medicare or Medicaid, so she did not have a need for the savings cards.
PPLPMDL0020000001	Lakewood	OH	44107	12/19/2011	I asked if he has been happy with the results he's seen with Butrans and he said that he has only heard back from one patient, but the feedback was good. I asked if he had more patients who would benefit from 7 day Butrans and he said he is starting to remember to think of Butrans and he agreed to start more new patients.
PPLPMDL0020000001	Lakewood	OH	44107	12/19/2011	I asked Dr if he had other pateints who could benefit from 7 day Butrans. He said he is keeping it in mind and agreed to prescribe.
PPLPMDL0020000001	Lakewood	OH	44107	12/19/2011	Quick call, I asked if she had a few patients who could benefit from 7 day Butrans and she said she is thinking of Butrans for a few patients taking tramadol. I reviewed the initiating guide.
PPLPMDL0020000001	Beachwood	OH	44122	12/19/2011	NON-PRESCRIBER- Quick window call- Passed back BUP3015 study & let Dr Warren know I was a study for Butrans done in opioid-experienced patients. I asked him to review it & told him it may help him become more comfortable with Butrans efficacy. Spoke with Donnie & asked if he had discussed Butrans with Dr Warren since my last visit. He said he did encourage him to use it because he thinks it would be a good option for a lot of their patients. Reviewed once weekly dosing, CII, & delivery system. Donnie said he would mention this again to Dr Warren.
PPLPMDL0020000001	Lakewood	OH	44107	12/19/2011	I reviewed the case studies and asked his thoughts. He said that he has a patient like Evelyn who he would like to start on Butrans. He said that she was taking about 200mg of tramadol per day and we reviewed how to initiate 5mcg Butrans and titrate if needed. He said that he will start her when he sees her next but he didn't know when that would be. We reviewed the managed care for Butrans and he said she has commercial insurance. We reviewed OxyContin managed care for Med D patients.
PPLPMDL0020000001	Woodmere	OH	44122	12/19/2011	Spoke briefly with a pharmacist who said she was too busy. Inquired about Butrans stocking & delivered Butrans overview (once weekly transdermal system for moderate to severe chronic pain) but she said she wasn't going to check to see if they have it. Offered OxyContin savings cards but she did not want any. Left PurdueHCP.com leaver for her to review at her convenience.
PPLPMDL0020000001	Lakewood	OH	44107	12/19/2011	Dr said he still has not started patients on Butrans. I reviewed the case studies and asked his thought about the patient types. He said he will keep Butrans in mind as an option after tramadol is no longer controlling the patients pain, but most of the patients he sees are like John and are more appropriate for OxyContin as an option. He said he has many patients on OxyContin and he's starting to get managed care issues. I asked which plans and he thought it was PAS being needed for Medicaid. We reviewed the managed care for both Butrans and OxyContin. I asked if he would try a few patients on Butrans and he agreed. He agreed to continue to use OxyContin as an option when patients are taking higher doses of opioids.
PPLPMDL0020000001	Independence	OH	44131	12/19/2011	REPEAT CUSTOMER- Dr Trickett said some of the patients she has put on Butrans are no longer on it. I asked her why they discontinued- was it lack of efficacy or adverse events. She said one patient did not like the way Butrans made her feel & that she said she just felt "weird" on it. Dr Trickett said another patient reported similar side effects. I asked if this was going to hinder her prescribing of Butrans. She said no. I asked what it typically is that causes her to choose Butrans for a patient. She said usually if they aren't doing well on short-acting opioids, she will try Butrans for them. Dr Trickett mentioned that cost has been a problem for at least one patient, but added that it was an older patient with Medicare. Discussed where Butrans is covered & reviewed savings cards. Also discussed OxyContin savings cards, which she said she could use more of. Provided one package.
PPLPMDL0020000001	Westlake	OH	44145	12/20/2011	Spoke with Dan, we reviewed the Butrans medication guide and how to teach patients about proper use and application of Butrans. We reviewed the use of supplemental analgesia with Butrans and that Butrans is a CII and can be called in and refilled. I asked if he would let appropriate chronic pain patients know about Butrans as an option and he said he would if he talks to them. Reminder that OxyContin is an option when Butrans may not provide adequate analgesia.
PPLPMDL0020000001	Cleveland	OH	44111	12/20/2011	Spoke with Dan, we reviewed Butrans medication guide and that Butrans is a CII and can be used with supplemental analgesia. We discussed Butrans as another option for patients taking tramadol around the clock, I asked if he would let these types of patients know about Butrans as an option and he agreed. Reminder that OxyContin is a long acting option when Butrans 20mcg does not provide adequate analgesia.
PPLPMDL0020000001	Middleburg Heights	OH	44130	12/20/2011	NON-PRESCRIBER- Spoke with Janet (MA) & introduced Butrans, discussing core messages & reviewing appropriate patient type. Also discussed savings cards for OxyContin & Butrans. Worked with Janet to schedule a lunch with physicians & staff to educate them more on Butrans & OxyContin.
PPLPMDL0020000001	Garfield Hts	OH	44125	12/20/2011	NON-PRESCRIBER- Quick call with Dr Sadowski- Positioned Butrans for appropriate patients for whom he finds himself escalating their dose of tramadol or Vicodin. Dr Sadowski said he is keeping it in mind & then walked out. Spoke with his MA, Deena, & told her about Butrans portal & online programs. Gave her information on how to log on & asked her to go through it with Dr Sadowski. She agreed. Also re-visited with her the topic of flagging appropriate patient charts when she identifies someone who could benefit from Butrans.
PPLPMDL0020000001	Parma	OH	44129	12/20/2011	NON-PRESCRIBER- Introduced Butrans to Dr Cowan, delivering core messages & alerting him to box warning. Discussed appropriate patient type & range & presented initiation guide, pointing out the chart on pg 6. Discussed OxyContin as an option for appropriate patients beyond Butrans range. Dr Cowan said he has always preferred MS Contin to OxyContin. I asked him why that was. He said he was not sure. Discussed Butrans as a CII opioid with once weekly dosing. Also reminded him that because Butrans is an opioid, it does carry abuse & addiction potential. He asked about dosing. Discussed 3 available doses, titration after 3 days to a maximum 20mcg, & ability to take supplemental analgesia with Butrans if necessary. Also showed him demo kit & discussed adhesive matrix. Demonstrated use of disposal unit. Dr Cowan said Butrans seems like an interesting option & he is glad to see that he has another option for treating his patients who need chronic opioid therapy.
PPLPMDL0020000001	Parma	OH	44129	12/20/2011	NON-PRESCRIBER- Introduced Butrans to Dr Eicher, delivering core messages & alerting him to box warning. Presented initiation guide & pointed out page 6. Spent time going over appropriate patient type & range, including OxyContin as an option for appropriate patients beyond Butrans range. I asked his thoughts. He said he thought Butrans seemed interesting & like something he would use in practice. Discussed Butrans as the only long-acting CII opioid & advised that he be just as cautious in prescribing Butrans as he would be with other opioid medications due to abuse/addiction potential. Discussed starting doses, titration, & ability to take supplemental analgesia with Butrans. Dr Eicher said he was happy that there is another option now for treating this type of pain patients. Also discussed OxyContin 7 tablet strengths. He said he was not aware of the 15, 30, & 60mg doses.
PPLPMDL0020000001	Cleveland	OH	44130	12/20/2011	Spoke with floater pharmacist filling in today. Discussed Butrans as a once weekly transdermal system of buprenorphine for moderate to severe chronic pain. Discussed insurance coverage & savings programs for Butrans & OxyContin. No savings cards were needed. Also presented patient information booklet for Butrans & left 3 of them to be put with the Butrans. Discussed how they can be given to patients with a prescription or customers who the pharmacist identifies as potential Butrans candidates based on their patient type.
PPLPMDL0020000001	Mayfield Hts	OH	44124	12/20/2011	Window call...I ask doc if he is still identifying appropriate butrans. He said he is trying to and thinks of butrans for newer patients. I told him that's a great place especially if they are just taking NSAIDS, tramadol or just a few tabs of low dose vicodin per day. He said he is going to do that.
PPLPMDL0020000001	Cleveland	OH	44130	12/20/2011	TRIALIST- Quick call- Delivered messaging to Dr Diab for Butrans providing buprenorphine for 7 days & once weekly transdermal application. He just waved & walked into a room.
PPLPMDL0020000001	Cleveland	OH	44130	12/20/2011	TRIALIST- Presented patient information booklets from the sample room to Dr Fedorko & showed him how it can be used to talk to patients about Butrans as an option to treat their moderate to severe chronic pain. Dr Fedorko showed me the application sites for Butrans & said he knows all about it, walking into a room.
PPLPMDL0020000001	Cleveland Hts	OH	44118	12/20/2011	Doc said he just wrote a script for butrans today. I asked him to tell me about the patient. He just said that it was an older woman that did not want to take a bunch of pills. I asked him what coverage she has as an older person is likel to be medicare. He said it was medicare because it required a prior auth. I explained that medicare will be the most difficult at going through and that it may be covered for the first month. I showed him the commercial plans and that medicare patients may be more appropriate for low dose oxycontin from a cost perspective.
PPLPMDL0020000001	Mayfield Heights	OH	44124	12/20/2011	Provided savings cards for oxycontin and butrans per our previous conversation. He asked if they would expire soon. I told them that they will both be honored until 03/12. He said he has 1 or 2 patients that can use the oxycontin cards. When patients did come in with butrans he thiks they had a card with them. Gave him a couple of butrans patient info guides as well.
PPLPMDL0020000001	Westlake	OH	44145	12/20/2011	Quick call, I reviewed the managed care for Butrans and asked if he had any commercial insurance patients who could benefit from 7 day Butrans. He said he will continue to use Butrans.
PPLPMDL0020000001	Westlake	OH	44145	12/20/2011	Dr said he just saw Amy and they discussed using Butrans for patients taking low dose vicodin or percocet instead of increasing their dose of short acting. I reviewed the managed care and asked if he would try just a few commercial patients and see how they do. He agreed. Reminder that OxyContin is an option for patients when Butrans 20mcg does not provide adequate analgesia. Spoke with Juan regarding savings cards and formulary
PPLPMDL0020000001	Westlake	OH	44145	12/20/2011	I asked Dr to tell me about recent patients that he started on Butrans and how they are doing. He said that he hasn't started a ton of patients, but has used it as an option mostly instead of vicodin for patients. I reviewed that this is a great patient for Butrans and reviewed the initiation guide. I asked him to continue starting new patients and he agreed.
PPLPMDL0020000001	Cleveland	OH	44129	12/20/2011	LOYAL CUSTOMER- Quick call- Deb said she "loves" Butrans & is getting great results. I offered Butrans savings cards & patient information booklets for this location. Deb said she needed patient information booklets because she was looking for one earlier when she started a patient on Butrans. I let her know that I submitted her idea for Spanish patient information booklets & that because of that, they are currently being translated to Spanish & will be available in the future. Deb said this would be very helpful & was pleased. Spent time with Dawn discussing Butrans patient type & managed care.
PPLPMDL0020000001	Westlake	OH	44145	12/20/2011	Quick follow up, I asked if his patient was able to get a savings card for Butrans and he said yes the pharmacy had one. I asked if he has been happy with the results and he said he has. Reminder about managed care for Butrans and Med D for OxyContin.
PPLPMDL0020000001	Parma	OH	44129	12/20/2011	NON-PRESCRIBER- I asked Dr Roheny if it was not for managed care, what limitations he would see with Butrans. He said he wants to use it more. I told him he was the only one who can control that & asked him why he doesn't then. He said the only patients he has who he could use it for have Medicare. I asked him if that means he has no working patients, for example, who have chronic low back pain or osteoarthritis who would be appropriate for Butrans. He said he might have one or two. I asked him why not try Butrans for those one or two then. He said maybe he would do that. He asked me how long Butrans has been out. I told him we launched in January. He said he cannot believe it has been out almost a year & he has not tried anyone on it. I told him again he is the one who can control this & asked if he would just try it for those one or two patients who he told me about. He agreed. Reminded him of favorable Medicare coverage for OxyContin.
PPLPMDL0020000001	University Hts	OH	44118	12/20/2011	Window call...Reminded doc of the butrans patient type, once weekly dosing, and CII status which means it can be called in and refilled. Provided Butrans portal invite and formulary grids for butrans and oxycontin. Nothing learned.<font color=blue>-b>CHUDAKOB added notes on 01/01/2012</b>-</font>Next time you have a window call, ask one of the questions in your next call objective instead of a reminder call. This is an area we will work on in the coming year.
PPLPMDL0020000001	Westlake	OH	44145	12/20/2011	Dr said that he had a patient who was taking high doses of short acting opioids around the clock. He said she kept asking him for more pills and he refused and sent her to pain management. He said when she came back to him the CCF pain management Dr started her on Butrans and cut back on her tablets. He never thought that she would have been appropriate for Butrans or willing to even try a patch instead of give up any of her pills. He said that this has opened his eyes that he may be able to taper some of these patients down on their short acting and start them on Butrans. He said he still has many patients taking OxyContin.
PPLPMDL0020000001	Mayfield Heights	OH	44124	12/20/2011	Window call...Reminded doc of the butrans positioning - for patients falling on tramadol and low dose vicodin. Gave him a formulary grid and asked him to focus on those plans for the best chance at success.
PPLPMDL0020000001	Parma	OH	44129	12/20/2011	NON-PRESCRIBER- Reminded Dr Lee of our previous Butrans discussion. He said he had forgotten about it. Reviewed 5 core messages & discussed Butrans as the only long-acting CII opioid available. Also alerted him to box warning & Butrans abuse/addiction potential. Dr Lee asked how Butrans is dosed. Showed initiation guide, focusing on page 6. I asked Dr Lee if he does a lot of chronic opioid therapy. He said yes. He added that he usually prescribes fentanyl. Re-focused him on more "moderate" pain & showed initiation guide again. He said he sees now where Butrans fits in & that he is even more interested in it, knowing it is for the more "moderate" pain patients. Showed him demo patch & discussed adhesive matrix. Dr Lee said he will keep Butrans in mind & that it is nice to have another option for this type of patient. Also discussed OxyContin 7 tablet strengths & OxyContin as an option for patients beyond Butrans range.

PPLPMDL0020000001	Cleveland	OH	44143	12/20/2011	I reviewed the appropriate butrans patient type - after tramadol failures. He said thats where he tried to write it but patients complained that it was too expensive even with a prior auth. I reminded him that commercially insured patients will have the best chance for success. I asked him to give it another try for the right patient.
PPLPMDL0020000001	Lyndhurst	OH	44124	12/20/2011	I asked doc to continue to identify butrans patients as those failing on tramadol throughout the holidays. She said she will be off from christmas to after new years so she isnt sure how much opportunity she will have. She said the patients that are on it seem to like it (butrans). I offered more savings cards but she said she had enough to get her through. I asked if she is still giving oxycontin savings cards as well. She does for new patients but doesnt have new oxycontin patients often.
PPLPMDL0020000001	Macedonia	OH	44056	12/21/2011	Spoke with Nancy & reviewed Butrans overview with her. Discussed appropriate patient type & range. Also showed FPI 2.4 & discussed ability for patients to take supplemental analgesia with Butrans in the form of immediate-release opioids or non-opioid medications. Nancy said she has not seen any Butrans activity since the initial prescription that was filled there several months ago. I asked if she knows why the customer did not get refills. She did not know. Discussed automatic savings through e-voucher & OxyContin savings cards.
PPLPMDL0020000001	Parma	OH	44134	12/21/2011	LOYALIST- Dr Hernandez said he continues to get good results with Butrans. I asked him what strength most of his patients are on. He said it really varies. He added that he starts them all at 5 & then will titrate if necessary. I asked how he determines what type of medication (ie an opioid like Butrans or OxyContin or a non-opioid medication) he chooses to help with someone's pain. He said it depends on the source of the pain. He went on to say that if the patient has pain due to a nerve issue (ie carpal tunnel or neuropathy), he chooses a medication like Lyrica. He said if the pain is of another nature, he chooses medications like Butrans or OxyContin. I asked if he would continue to prescribe Butrans & OxyContin in appropriate patients & he said yes.
PPLPMDL0020000001	Maple Heights	OH	44137	12/21/2011	NON-PRESCRIBER- Quick call with Dr Dale- Positioned Butrans for patients with commercial insurance who are not well-controlled on tramadol around-the-clock for their moderate to severe chronic pain. Also reminded him of broad formulary coverage for OxyContin.
PPLPMDL0020000001	Beachwood	OH	44122	12/21/2011	Spoke briefly with Alan, pharmacist, & reviewed Butrans. Inquired about activity. He said he fills about one a month or so. Discussed ability to take supplemental analgesia with Butrans in either non-opioid medications or immediate-release opioids. Showed FPI 2.4. Also discussed savings cards for both Butrans & OxyContin.
PPLPMDL0020000001	Westlake	OH	44145	12/21/2011	Quick call thru window, I asked Dr if he had any push back for managed care for Butrans and he said he hasn't tried any patients lately. I asked if he had patients who could benefit from 7 day Butrans and he said he will keep it in mind.
PPLPMDL0020000001	Westlake	OH	44145	12/21/2011	Quick call, I asked Dr hwo his Butrans patients are doing and he said they haven't come back in, but they haven't called yet. I asked if he would continued to find patients who might benefit from 7 day dosing and he agreed.
PPLPMDL0020000001	Bedford	OH	44146	12/21/2011	TRIALIST- Quick window call- Passed back Butrans formulary grid, reminding Dr Haddad of favorable commercial insurance coverage with Butrans & also handed him OxyContin CCRx alert, pointing out favorable Medicare D status for OxyContin. Dr Haddad said he is keeping them in mind, thanked me, & walked away. Spoke with Roberta (MA) & discussed managed care & savings cards for Butrans & OxyContin.
PPLPMDL0020000001	Westlake	OH	44145	12/21/2011	Quick call with Deanna, she said he might have seen one patients on Butrans. We reviewed the medication guide and she agreed to give them to new Butrans patients. Reminder that OxyContin is an option when Butrans 20mcg does not provide adequate analgesia.
PPLPMDL0020000001	Maple Heights	OH	44137	12/21/2011	NON-PRESCRIBER- Dr Gene said he just prescribed Butrans for a female patient. I asked him to tell me more about her. He said she was an 80 year old woman who has a spinal compression fracture. I asked what she was taking before Butrans. He said nothing, but that she had a lot of pain. He said that she paid over \$160 for the months supply of 5mcg patches, but she reports that she is doing well on it so far. He said that her Medicare plan would not cover it, so he wrote a letter explaining why she needs to be on Butrans. He said he hopes they will start to pay for it for her because he does not want her on fentanyl or another "strong" opioid. I reminded him that Butrans is a CIII opioid with the same attendant risks of other opioid medications. He said he knows but he feels it is the best option for her. I asked if he has other patients, perhaps who have commercial insurance, who he can think of who may benefit from Butrans. He said yes & that he has been thinking of other patients who he can try on it since he has had good results with the one he chose so far. Also discussed OxyContin 7 tablet
PPLPMDL0020000001	Cleveland	OH	44114	1/2/2012	I talked to dave,pharmacy mgr, about how his conversations sound with patients when providing patient counseling on opioids.dave said a lot of patients just ask about side effects and sometimes will ask for his opinion on other options available to them.I asked dave if he's been recommending Butrans to patients that he feels are appropriate and giving patients the patient info booklets so they can talk to their HCP's? dave said he's given a few booklets out and will continue doing so if he feels patients are appropriate.we talked about appropriate patients for OxyContin,showed visual aid and dave said he never recommends OxyContin to HCP's for patients,dave said thats up to the HCP to make any changes as it relates to OxyContin.we discussed formulary coverage and I recommended Senokot-S
PPLPMDL0020000001	Parma	OH	44129	1/2/2012	Spoke with Heath, pharmacist, reviewing Butrans. He checked his shelf & said that he has not dispensed any but does have it in stock. He did add, however, that the box they have on hand expires in May of this year.
PPLPMDL0020000001	Cleveland	OH	44114	1/2/2012	Reviewed with him the appropriate patient type, discussing patients who take chronic refills of tramadol or Vicodin. Discussed once weekly dosing & strengths available. Also discussed automatic savings via e-voucher & OxyContin savings cards. He said he does not need any additional savings cards.
PPLPMDL0020000001	CLEVELAND	OH	44109	1/2/2012	I talked to Laura,Pharmacy mgr,about medication management therapy,Laura said she provides some patient counseling on opioids and has given a couple patients the Butrans patient info booklets so they can talk to their HCP's.Laura said no Rx yet for Butrans but she likes the product and thinks it's just taking longer for HCP's to start patients on Butrans.showed visual aid,we discussed 6 core selling messages and laura talked about Butrans being a patch and once weekly dosing as 2 features she thought were great options for some patients.we discussed formulary coverage and discussed appropriate patients for OxyContin,Laura said she doesnt recommend OxyContin to any patients that the HCP's decision to make any changes with OxyContin. we discussed formulary coverage for OxyContin and I recommended Senokot-S
PPLPMDL0020000001	PARMA	OH	44134	1/2/2012	I talked to Ron,Pharmacist,about Butrans 6 core selling messages,Ron said he's not seen any Rx for Butrans but thinks Butrans transdermal system and once weekly dosing option could be an option for some patients.Ron focused on opioid experienced patients,I showed visual aid and we discussed these patients starting on Butrans.I asked Ron if he would give patient info booklets to those patients he feels are appropriate,per our discussion,Ron agreed to do this.we talked about appropriate patients for OxyContin,showed conversion guide and asked Ron if he's seen any new Rx for OxyContin? Ron said not lately,same patients getting OxyContin Rx.we discussed formulary coverage for OxyContin and savings cards.recommended Senokot-S
PPLPMDL0020000001	Parma	OH	44134	1/2/2012	Spoke with floater pharmacist. Discussed Butrans indication, dosing, & appropriate patient type. Focused him on patients who take short-acting opioids around-the-clock for chronic conditions. He pointed out the Butrans boxes on the shelf. He said he has filled prescriptions at other locations. Let him know that Butrans savings is automatic for CVS customers through Relay Health's e-voucher. Also discussed OxyContin savings cards. He said to check with the regular pharmacist to see if he wants savings cards as he was unsure.
PPLPMDL0020000001	Westlake	OH	44145	1/2/2012	Spoke with Darrel, we reviewed Butrans appropriate patients and the medication guide. I asked if he would let appropriate patients know about Butrans as an option and he agreed. We reviewed the savings program for both Butrans and OxyContin.
PPLPMDL0020000001	Cleveland	OH	44130	1/2/2012	Spoke with Allison & reviewed Butrans core messages to refresh her memory. She said she has not seen any prescriptions for Butrans. Reviewed appropriate patient type as well as the ability to take supplemental analgesia with Butrans. Also discussed e-voucher & automatic savings as well as OxyContin savings cards.
PPLPMDL0020000001	Rocky River	OH	44116	1/2/2012	Quick call with Stan, we reviewed the medication guide for Butrans and what to tell appropriate patients, he said he has a few patients on Butrans. I asked if how they are doing and what the feedback is and he said he has not heard anything. I asked if he would let patients know Butrans as another option and he said he might. Reminder that OxyContin is still a long acting option as well.
PPLPMDL0020000001	Parma	OH	44134	1/2/2012	Spoke with pharmacist James, who said he has yet to dispense a Butrans prescription. Reviewed appropriate patient type, focusing on patients taking chronic around-the-clock short-acting opioids. Discussed once weekly transdermal dosing. Also reminded him that savings for Marc's customers is automatic through the e-voucher program. He checked his OxyContin savings cards & did not need any additional cards at this time.
PPLPMDL0020000001	Cleveland	OH	44109	1/2/2012	I talked to Ron,Pharmacy Mgr,about what patients say to him when he provides patient counseling on opioids,Ron said patients usually say their short-acting opioids dont last long enough and will sometimes ask him for suggestions on other opioids.Ron said he's given a couple Butrans patient info booklets to patients so they can talk to their HCP's.we discussed formulary coverage for Butrans and Ron said he's still not seen any Rx for Butrans but will keep giving patient info booklets to those patients he deems appropriate.we talked about appropriate patients for OxyContin and formulary coverage,Ron said no new Rx for OxyContin just the same patients monthly getting their OxyContin scripts.recommended Senokot-S<font color=blue><b>CHUDAKOB's query on 01/13/2012</b></font>Good opening question Amy! Sound like it generated some good discussion.<font color=green><b>BROOKAM's response on 01/17/2012</b></font>-thanks Barry!<font color=blue><b>CHUDAKOB added notes on 01/18/2012</b></font>-Thanks for trying something different.
PPLPMDL0020000001	Lakewood	OH	44107	1/2/2012	Quick call with Aduwa, we reviewed Butrans and OxyContin savings programs. I asked if she would give out medication guides to appropriate pain patients and let them know that Butrans is an option and she agreed.
PPLPMDL0020000001	Cleveland	OH	44130	1/2/2012	Reminder that Butrans can be used with supplemental analgesia.
PPLPMDL0020000001					NON-PRESCRIBER- Reviewed Butrans core messages with Dr Popa. She said she knows she can "do better" in using Butrans. Reviewed appropriate patient type. I asked her what she typically does when a patient on tramadol wants refill after refill or asks for an escalating dose or dosing interval. She said she usually refuses because she does not "like to deal" with that type of patient. Advised that Butrans is a CIII opioid with abuse & addiction potential. I asked what her thoughts were on trying patients like this on a transdermal system that delivers buprenorphine over 7 days. She said she thought it may be good for them. She asked if Butrans is more or less abusable than tramadol or Vicodin. Reminded her that Butrans is a CIII opioid & because it is an opioid, she should use just as much caution in prescribing as she would with other opioid medications. I asked if she would try Butrans on appropriate patients after tramadol, before referring to pain management. She agreed. Reviewed OxyContin 7 tablet strengths available.
PPLPMDL0020000001	Euclid	OH	44123	1/2/2012	Spoke to Ben and Tech, Jessica, about the stocking of butrans. Jessica confirmed that it is stocked and Ben said that he has had a few scripts but he has had issues with all but one requiring PAs. He thinks they were all medical. I explained the commercial coverage focus and gave a formulary grid. I asked if he recalled the prescriber(s). He did not. He said he has on patient taking it without any issues.
PPLPMDL0020000001	Parma Heights	OH	44129	1/2/2012	Spoke with Larissa, pharmacist, reviewing Butrans core messages. She said Dr Levin writes a lot of Suboxone & Subutex. Discussed Butrans indication, letting her know that Butrans is only for pain. I asked if she knows if he prescribes for pain. She said she was not sure. She did not have any further recommendations on what area physicians may be interested in hearing more about Butrans. Discussed savings cards for Butrans & OxyContin & discussed OxyContin 7 tablet strengths.
PPLPMDL0020000001	Euclid	OH	44119	1/2/2012	Spoke to Laurel about the stocking and movement of butrans. She personally had not seen/filled any scripts. She confirmed that she had the 10 and 20mcg. I discussed the indication and the positioning. Gave her a patient info guide to give to potential customers which explained proper application. I asked about oxycontin scripts and she said that has been steady. I offered savings cards for oxycontin but she said most patients have reasonable out of pocket expense. They also have a lot of medicare/medicaid.
PPLPMDL0020000001	Euclid	OH	44119	1/2/2012	Spoke to Joan about the Butrans indication and positioning. I asked her if she was aware if doc had prescribed any yet. She said not that she is aware of and he has been out for about a week and is still out. Left a butrans initiation guide and formulary grid.
PPLPMDL0020000001	Parma	OH	44134	1/2/2012	REPEAT CUSTOMER- I asked Dr Mandat if he finds that his Butrans patients are requesting refills. He said he probably has 4 hospice patients on Butrans at this point. He added that each of them has had refills of Butrans. I asked if the patients typically take supplemental analgesia with Butrans or if they are just on Butrans alone. He said they all take supplemental analgesia. Supported this by pointing out FPI 2.4, reminding him that patients can take supplemental analgesia in the form of opioid or non-opioid medications. Also reminded him of savings cards & patient information booklets in his sample closet. He requested additional Senokot-S & Colace samples, which I provided.
PPLPMDL0020000001	Cleveland	OH	44109	1/2/2012	worked pm&r dept, internal medicine, family medicine and rheumatology departments - left Butrans fpi,initiation guide,patient info booklet and formulary grid for each hcp in departments
PPLPMDL0020000001	Brooklyn	OH	44130	1/2/2012	Spoke with pharmacist Danielle, who said they probably get about one to two Butrans prescriptions per month. Discussed ability for patients to take supplemental analgesia while taking Butrans. Also discussed automatic savings via e-voucher for Butrans & OxyContin savings cards. She requested one package of OxyContin cards, which I provided.
PPLPMDL0020000001	Euclid	OH	44123	1/2/2012	Spoke with Mary Jo briefly about the stocking of butrans. She said she was busy due to the first of the month. She only confirmed that they no longer had butrans as it sat on the shelves for months without moving so they sent it back. Provided her a copy of the patient info guide.

PPLPMDL0020000001	Euclid	OH	44119	1/2/2012	Spoke to Taneeka, about the stocking and movement of butrans. She checked and confirmed that they did have it stocked(must have been autoshipped) but also confirmed that they had not dispensed it. I explained the indication and the positioning. Gave her a couple of patient info guides and explained the proper application of the patch. She said the volume of oxycontin and been steady and no issues with access or questions about the
	Westlake	OH	44145	1/3/2012	Dr was on his way out, I asked if he has been having good success with Butrans, he said patients were doing well. I asked Juan what he has been hearing and he said he really has not heard anything good or bad. He said that he has recommend Butrans as an option to the Dr for some patients, but he said the Dr has not written many scripts lately. We reviewed the managed care for Butrans and I asked if he would continue to remind the Dr about Butrans as an option when he sees appropriate patients. He agreed. I reviewed the savings programs for both Butrans and OxyContin and to continue to use the cards in to 2012.
	Cleveland	OH	44130	1/3/2012	Dr Fedorko asked me to tell the medical student who was with him all about Butrans. Delivered Butrans core messages. The student said he had not yet heard of Butrans. Discussed Butrans as a CIII opioid with abuse & addiction potential. Dr Fedorko shared with the student that he has a few patients on Butrans who are doing well on it. Discussed appropriate patient type, focusing on patients who are taking 3-4 tramadol or Vicodin per day who may want a different option to treat their pain. Discussed OxyContin as an option for patients beyond appropriate Butrans range.
	Cleveland	OH	44102	1/3/2012	I talked to Vicky, Pharmacy mgr, about 6 Butrans core selling messages, showed visual aid and asked Vicky what features of Butrans stood out to her, Vicky said transdermal delivery and one butrans, 7 days buprenorphine. Vicky said she's not seen any Rx for Butrans lately but has given patient info booklets to those patients she feels are appropriate. I showed Vicky opioid experienced patients section, visual aid, discussed these patients and I asked Vicky if she'll continue giving booklets out? Vicky committed to do this. We talked about appropriate patients for OxyContin and discussed formulary coverage. recommended Senokot-S
	Cleveland	OH	44109	1/3/2012	talked to dr about opioid experienced patients-showed visual aid, dr said he has a lot of patients like this in his practice but majority are medicaid and they arent covering Butrans. I asked dr to find 2 commercial insurance patients this week that he can start on Butrans? dr said he will do that. recommended Senokot-S
	Cleveland	OH	44102	1/3/2012	talked to Nagla, PA, about opioid experienced patients, nagla said she see's a lot of patients like this and has been suggesting Butrans to the HCP's. I asked Nagla if she will start 2 commercial patients this week on Butrans? Nagla committed to do this. recommended Senokot-S
	Westlake	OH	44145	1/3/2012	Quick call at window, I let him know that the savings cards for Butrans would still be valid for 2012. I asked how his current patients are doing and he said they are doing well. I asked if he would continue to start new patients and he agreed.
	Mayfield Heights	OH	44124	1/3/2012	Window call....asked doc how his trial experience with butrans has been. He said so far so good. I asked if patients have been refilled. He said he wrote it with refills so he will see. I asked him to try another patient this
	Cleveland	OH	44143	1/3/2012	Quick call....reminded doc of the butrans patient type, once weekly dosing and that commercially insured patients can save up to \$40 off their co pay. I asked him if he would try an appropriate pateint this week. No
	Westlake	OH	44145	1/3/2012	Dr said he has about 10-15 patients on Butrans now and has been having good results. He said he has a patient right now in a room who is taking tramadol around the clock and he would like to try her on Butrans. I asked what managed care and he said Medicaid so he decided not to switch her. I asked if he would start some more new Butrans patients and he agreed.
	Westlake	OH	44145	1/3/2012	Dr told me that he had started a patient on Butrans because she did not want to take any short acting opioids. He said it was for back pain. I asked how the patient was doing and he said she did well but only used Butrans for about 3 weeks. I asked why and he said the pain got better. I reviewed the indication for Butrans and that it is only indicated for chronic pain. He said that he understood this but just wanted to try it anyway for this patient. I reviewed OxyContin as an option instead of short acting around the clock and he said he has many patients on OxyContin.
	Cleveland	OH	44130	1/3/2012	I asked Dr Dab if he ever uses the intermediate strengths of OxyContin, such as the 15, 30, or 60mg doses. He said he usually just uses the 10, 20, or 40mg strengths. Let him know that OxyContin offers 7 tablet strengths, allowing for flexibility in dosing if/when he needs to titrate a patient's dose. He said that was "a good idea". Also reminded him of favorable managed care coverage, including coverage on CCRx Medicare D plan. Also discussed Butrans managed care coverage/savings cards, reminding him that commercial plans will be his path of least resistance for getting it covered for patients at a reasonable co-pay.
	Westlake	OH	44145	1/3/2012	I reviewed that OxyContin is still a long acting option and he said most of his patients are on OxyContin. I asked how they are doing and he said fine, but they always ask for an increase in their dose and they are frustrating to treat. I asked if he has been able to try a few new patients on Butrans and he said he hasn't really switched anyone yet, but he will start talking to more patients about Butrans as he would prefer that they try Butrans instead of increasing their dose of short acting. He put the Butrans medication guides in the waiting room.
	Cleveland	OH	44109	1/4/2012	dr said he's continually starting patients on Butrans and patients are doing well so no complaints. i asked dr who are the patients he's starting on Butrans? dr said some patients have been taking tramadol and others vicodin, every day for their chronic pain, but werent controlled and dr thought Butrans would be appropriate. i asked dr if he has more patients like this to start on Butrans this week? dr said he's sure he does and he'll continue starting patients on Butrans, focused dr on BWC and commercial plan patients. recommended Senokot-S
	Cleveland	OH	44109	1/4/2012	dr said she started another patient on Butrans and is interested to see what clinical results she gets from Butrans. I asked dr why she chose Butrans for this patient? dr said patient was taking percocet every day, pain wasnt controlled so instead of increasing percocet dose she wanted to try Butrans. I showed opioid experienced patients section, visual aid and asked dr if she has more patients like the 1 she started? dr said yes she has a lot of patients that are appropriate for Butrans but not every patient wants to wear a patch for their pain and it depends on insurance. i focused dr on commercial plan patients and BWC, i showed dr formulary grid and i asked dr if she could start a couple BWC or commercial plan patients this week on Butrans? dr said she will do that as long as insurance pays for Butrans. recommended Senokot-S
	Maple Heights	OH	44137	1/4/2012	Spoke with Steve, pharmacist. Reviewed Butrans indication, dosing, & appropriate patient type. He said they do have it on the shelf but see zero prescriptions for it. I asked what type of managed care mix he sees at this location. He said they have probably 80% Medicaid or Medicare, including several dual eligible patients. Reviewed managed care coverage for Butrans & OxyContin. He said that because they see so much government insurance at this location, they did not need any savings cards.
	Cleveland	OH	44143	1/4/2012	Window call....I asked doc if he has any patients that might benefit from a once weekly transdermal analgesic for their moderate ATC pain. He said maybe. I gave him a formulary grid and initiation guide pointing out the CIII status and the three dosing options.
	Cleveland	OH	44104	1/4/2012	dr said she has 1 patient on Butrans and patient is doing great, i asked dr if she has more patients like this that she can start on Butrans? dr said not really, dr said majority of her patients taking vicodin and percocet only want their pills and arent willing to try a patch. dr said she's talked to several patients about Butrans that she feels are appropriate but patients arent willing to try Butrans. i showed dr Butrans patient info booklet and asked if she could give these to patients she feels are appropriate but perhaps need some education on Butrans? dr said she will try that. i asked dr if she could start 2 patients this week on Butrans, that she feels are appropriate? dr said she will do her best, focused dr on commercial plan patients. recommended Senokot-S
	Cleveland	OH	44113	1/4/2012	dr said he started 1 patient 2 weeks ago and has been giving patient info booklets to those patients he feels are appropriate for Butrans but are hesitant to start on Butrans. i asked dr if he has more patients like the 1 he started, that have BWC or commercial insurance, that he can start on Butrans this week? dr said he does and will continue starting patients on Butrans. recommended Senokot-S
	University Hts	OH	44118	1/4/2012	Quick call....reviewed the butrans indication and the 7 day delivery in a CIII narcotics. I asked him to try butrans for one patient this week. Reminded him that it is covered on BWC similar to oxycontin and most commercial plans. Provided formulary grids.
	Cleveland	OH	44121	1/4/2012	Quick call....I asked doc if he thinks that a product like butrans provides any benefits to his patient population. He said he did not know and but thought that butrans would be too expensive for his medicare patients. I asked him to try one patient that may have a commercial plan such as medical mutual or anthem. I reviewed the plans on the formulary grid.
	Cleveland	OH	44109	1/4/2012	dr said he started 1 patient on Butrans a few weeks ago and patient is happy doing well on Butrans. i asked dr why he chose Butrans for this patient? dr said patient was taking vicodin every day, pain wasnt controlled and dr suggested the patient try Butrans and see what happens, so far patient hasnt called back so dr is happy. i asked dr if he has more patients like this that he can start on Butrans? dr said he has a lot of patients he would like to start on Butrans but it comes down to insurance coverage. we discussed BWC and commercial plan patients starting on Butrans, showed formulary grid. showed dr visual aid, opioid experienced patients section and asked dr if he can think of a few patients today or tomorrow that may be appropriate for Butrans? dr said yes he will think about it and if insurance covers Butrans, he'll start some more patients. recommended Senokot-S
	Cleveland	OH	44114	1/4/2012	dr said she's not started any patients on Butrans recently but does have some patients on Butrans and they are doing fine. i showed dr visual aid, opioid experienced patients, and asked dr if she treats patients like this? dr said yes she has a lot of patients that she can start on Butrans and will be starting more. i asked dr if she'll start a couple BWC patients this week on Butrans? dr committed to do this. recommended Senokot-S
	Cleveland	OH	44106	1/4/2012	i asked dr what he's hearing from patients that triggers him to consider Butrans? dr said all patients are different, some will ask for something else or if he feels patients are maxed out on short-acting opioids he'll consider a long-acting opioid. dr said biggest challenge here at main campus is that majority of patients are medicaid. i asked dr if he had a couple commercial plan patients that are opioid experienced, showed visual aid, dr said he may have a few. i asked dr if he could start those commercial patients on Butrans this week? dr said if he feels Butrans is appropriate, he'll do that. recommended Senokot-s
	Cleveland	OH	44114	1/4/2012	dr said he started more patients on Butrans over the past 2 weeks, dr said these are mainly his percocet patients that he doesnt feel percocet is controlling the pain so he's starting patients on Butrans. i asked dr if he's discussing application/rotation info with patients? dr said sometimes but he usually just gives patient info booklet. I showed patient info booklet and asked dr to show patients the application/rotation info in booklet, dr agreed to do this. i asked dr if he'll start more BWC patients this week on Butrans? dr said he will do this. recommended Senokot-S
	Cleveland	OH	44109	1/4/2012	worked pm&r dept
	Cleveland	OH	44104	1/4/2012	dr said he's not thought of Butrans lately but does have 1 patient on Butrans who is doing well. i asked dr if he has more patients like this 1 he started? dr said he has a lot of patients taking short-acting opioids that are appropriate for Butrans but it comes down to insurance and if the patients are willing to wear a patch. i showed dr commercial plans formulary grid and focused dr on these patients, showed visual aid opioid experienced patients and asked dr if he treats patients like this? dr said yes he does. i asked dr to think of 2 patients this week like this, that have commercial insurance, to start on Butrans, dr said he will consider that if insurance covers
	University Heights	OH	44121	1/4/2012	I asked doc if he has BWC patients that may be taking short acting tabs for their moderate to severe pain. He said some. I asked him to try one of those patients on butrans 5mgc for loe dose opioid patients, and 10mcg if they are taking greater than 30mg of a morphine equivalent. He said as long as he doesnt have to fill out any forms. Told him there should be no PA required for BWC patients. REviewed the CCRx coverage of oxycontin at a preferred status.
	Cleveland	OH	44106	1/4/2012	dr said he started a patient a couple weeks ago on Butrans, i asked dr to tell me about the patient he started on Butrans, dr said patient was taking a couple percocet a day and not controlled so dr thought Butrans could be an option. i showed visual aid, opioid experienced patients, and asked dr if he see's these patients? dr said yes all the time, i asked dr if he could start a couple patients today, like the one he started recently on Butrans? dr said he will do that but depends on insurance. dr said there's a lot of medicaid patients here and medicaid not covering Butrans. i asked dr if he has a couple commercial plan patients that he could start on Butrans today? dr said he's not sure but will keep Butrans in mind for commercial plan patients. recommended Senokot-S
	South Euclid	OH	44121	1/4/2012	Window call.... Asked doc about the patient he said he had in mind for butrans - were they able to get their script filled. He said that he had to re-write the script and give another savings card because the patient lost both. He said he had not back from them since so he thinks they got it. I reminded him of the 5 and 10mcg starting doses. Gave an initiation guide. <font color=blue>cb</font>CHUDAKOB's query on 01/13/2012<b></font>-Good job of asking a question on this "window call". It appears you did learn something on this call.<font color=green>cb</font>SIMERTOC's response on 01/16/2012<b></font>-Thanks.<font color=blue>cb</font>CHUDAKOB added notes on 01/18/2012<b></font>-Thank you! Keep working on this.
	Cleveland	OH	44106	1/4/2012	worked pain management dept

PPLPMDL0020000001	Cleveland	OH	44130	1/4/2012	I asked Dr Kansal where he saw a place for long-acting opioids like Butrans & OxyContin if, as he has told me, patients are unwilling to switch from short-acting opioids to long-acting opioids. He said if he is the first physician someone sees for their pain, he puts them on a long-acting medication rather than short-acting. I asked how often this occurs. He said almost never. He added that patients almost always see other physicians first & are already on short-acting opioids when they come to see him. He asked me when he would ever see a patient for their pain before another physician. I asked what about an established patient who complains of pain due to osteoarthritis. He asked me if I thought that patient should be put directly on a narcotic. I told him he was the physician & would be the one to determine if that would be appropriate & asked if he would first go to an NSAID/COX-2. He said he would only ever use a non-steroidal for osteoarthritis & would never use a narcotic medication for that condition. I asked about a patient who presents with pain due to spinal stenosis. He said that patient would have gotten pain medications from another doctor by the time they saw him. I asked if he would keep an open mind & would at least offer Butrans & OxyContin as an option to patients as appropriate & he Dr Chagin asked me to tell the PA student who was with him about Butrans. Reviewed with her Butrans core messages. She said she had not heard of it yet. Presented initiation guide & discussed dosing, CII, abuse/addiction potential. Dr Chagin said Butrans might have been good for the patient they had just seen, but added that the patient was taking Vicodin plus Percocet multiple times per day, so he probably was not a candidate for Butrans. I agreed that this patient may be out of the appropriate Butrans range. I asked Dr Chagin if he would consider that patient for an appropriate dose of OxyContin q12h. He said he had not thought of that, but that would be a good idea. He asked how he would initiate OxyContin in this patient. Showed him conversion/titration guide & showed him the pages for hydrocodone & oxycodone products. He said he would definitely try changing this patient to OxyContin q12h because he is unhappy with what the patient is currently on. Discussed abuse/addiction potential of all opioid medications, including Butrans & OxyContin. I asked how many refills he gives patients of Butrans when he first prescribes it. He said sometimes one but likes them to follow-up or call him first. I asked if this is the point when he would evaluate & titrate if necessary & he said yes. Reviewed dosing/titration. I asked Dr Chagin if he would continue to identify Butrans patients & prescribe accordingly & he agreed.
	Parma	OH	44129	1/4/2012	I asked doc if he has had a chance to prescribe butrans as he promised he would. He said not yet. (?) I showed him the 3 strengths and asked which strength he was likely to use. He said the 5mcg. I explained that the 5mcg is more for opioid naive patients or those taking just a couple of tablets of low dose opioid. I told him that patients can titrate to 10mcg if necessary after 3 days. He noticed the 3rd tier status for all the commercial plans and objected. I explained that the savings card will offset the cost to patients on those plans. He said that this year will be the year for butrans. Thanked him in advance.
PPLPMDL0020000001	Euclid	OH	44119	1/4/2012	Quick call- Caught Dr Taylor between patients. I passed back information on PurdueHCP.com, describing the interactive nature of the programs for Butrans. I told her I thought it may be of value to her as she evaluates who is & is not appropriate for Butrans. She said she might have a look if she can find the time. Also reminded her of OxyContin 7 tablet strengths for flexibility in titration. She waved, thanked me, & walked into a room.
	Parma	OH	44129	1/4/2012	Window call....introduced butrans indication, CII status, 7 day delivery and other selling messages. Gave him formulary grid and savings cards. He said he does not like using savings cards. I explained the savings of up to \$40. Nothing learned.<font color=blue><b>CHUDAKOB's query on 01/13/2012</b></font>During this "window call, you got out the indication, what looks like most of the selling messages, you had time to give a formulary grid and discuss the savings cards. It appears you got some time with the physician. Why was there nothing learned?<font color=green><b>SIMERTOC's response on 01/16/2012</b></font>I was blurring it out and he wasn't exactly engaged.<font color=blue><b>CHUDAKOB added notes on 01/18/2012</b></font>That is where you come in. Asking him a good question my help get him engaged.
PPLPMDL0020000001	Cleveland	OH	44121	1/4/2012	Window call....Briefly reviewed the butrans indication, CII status, 7 day delivery. I asked her if she would give butrans another try for a patient currently failing on tramadol and is younger than medicare age. She said she would try. I asked her to be sure to give a savings card.
	South Euclid	OH	44121	1/4/2012	I asked Dr Gigliotti if he finds that he uses all 7 of the OxyContin tablet strengths that are available. He said he uses "a lot" of OxyContin & does use all the tablet strengths. He added that he likes the 60mg dose & finds that many patients end up on that strength. I asked if he continually evaluates patients' pain medications & keeps OxyContin in mind as an option offering q12h dosing with the flexibility of 7 strengths. He said he does & will keep doing it. He also added that he looks for Butrans patients but just hasn't seen anyone lately. Discussed managed care coverage for both products.
PPLPMDL0020000001	Parma	OH	44129	1/4/2012	Dr Moufawad said with it being a new year, he will have new Butrans prescriptions. I asked him if he is ready to prescribe & he said yes. I asked what type of patient he is thinking of. He said he has a few patients taking 3-5 Percocet per day who he is considering switching to Butrans, allowing one Percocet per day for breakthrough pain. I told him it sounds like he is on the right track. Discussed OxyContin as an option for patients beyond the Butrans appropriate range. He said he is not going to accept patients into his practice who are on high doses of opioids.
	Bedford	OH	44146	1/4/2012	I talked to George, Pharmacist, about Butrans stocking. George confirmed they have 1 carton of Butrans 5mcg. we discussed importance of stocking all dosage strengths. I showed butrans visual aid and we discussed appropriate patients for Butrans. George focused on opioid experienced patients. I asked if George ever recommends medications to patients when providing medication management therapy? George said he will occasionally recommend medications to patients and have them talk to their HCP's. I asked George if he would recommend Butrans to patients so they can talk to their HCP's about Butrans and give them patient info booklets? George committed to do this. we discussed OxyContin stocking and formulary coverage. I recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44106	1/5/2012	I discussed 6 Butrans key selling messages with dr, dr talked about transdermal delivery and once weekly dosing. I showed dr appropriate patients section, visual aid, asked dr which type of patient she would most likely prescribe Butrans for? dr said her patients taking tramadol or vicodin that arent controlled and are always asking for something else. I showed dr opioid experienced patients section, asked dr if she has patients like this, dr said yes. I asked if dr she can start 2 commercial insurance patients this week on Butrans? dr said she will talk to some patients, see if they are interested in trying Butrans and as long as insurance pays for it she's happy to try Butrans in a few patients. told dr I would stop back in a week to hear how those discussions went with 2 patients and answer any questions, dr said that was fine. recommended Senokot-S
	Cleveland	OH	44113	1/5/2012	I asked Dr Pai where OxyContin currently fits into his practice. He said that he typically uses it when a patient is taking Percocet multiple times per day. He added that many of the patients who he has on OxyContin or either older patients or have malignancies. I asked him what does he finds himself using most frequently. He said usually 10mg or up to 20mg. He added that his patients often have a difficult time finding 15mg OxyContin at retail pharmacies so he tells them to get their prescription filled at the outpatient pharmacy at the hospital. I asked him at what point he usually switches someone from Percocet to OxyContin- is it a matter of how high their dose is? He said that once someone is on Percocet 3 times per day & wants an increase in dose, he will make the switch to a q12h dose of OxyContin. I asked how he would make the determination between a low dose OxyContin patient & a Butrans candidate. He said he would use Butrans more on patients who were not well-controlled on tramadol whereas he would use OxyContin on patients who were in "more severe" pain. He said he just recently gave Butrans to a patient who had been taking tramadol for chronic pain. Also discussed the importance of appropriate patient selection & advised that like all opioids, OxyContin does carry abuse/addiction potential.
PPLPMDL0020000001	Independence	OH	44131	1/5/2012	Reminded him of favorable Medicare D coverage for OxyContin.
	East Cleveland	OH	44112	1/5/2012	I asked doc if he sees any merit to a product like butrans which a 7 day CII analgesic. He said he is sure there is some merit but many of his patients need stronger meds. I told him that oxycontin may be more appropriate for those patients but maybe he has just a few that might be appropriate for butrans. He said maybe and that he will look for those patients.
PPLPMDL0020000001	Cleveland	OH	44112	1/5/2012	I asked doc if he has had any feedback from the patients he tried on butrans. He said he does not know as he didnt hear anything back from them. I asked if he wrote the script(s) with refills. He said he must have. I asked him if he would continue to try it for a fair trial. He said to let him know about upcoming talks on butrans.
	Cleveland Hts	OH	44118	1/5/2012	Quick call....I asked doc how his patients are doing on feedback/if he has gotten any feedback. He said no not yet and that he has been gone for 10 days on vacation. I asked him if he would continue to prescribe butrans in the meantime. He said yes, as long as the patients can get it. I assured him that butrans is well stocked in area pharmacies.
PPLPMDL0020000001	Cleveland	OH	44113	1/5/2012	dr said he's not started anyone on Butrans recently. dr said he's continually looking for new patients to start on Butrans and will start more patients but biggest challenge is that medical aid wont pay for Butrans and thats the biggest plan he has here. we talked about dr starting a couple BWC or commercial insurance patients and dr said he will keep that in mind.
	Cleveland Hts	OH	44118	1/5/2012	I reminded doc of the butrans indication asked him where he thinks he would use it. He said it might be good for tramadol patients. I told him about the 5 mcg for opioid naive and 10mcg for opioid experienced patients taking 300mg of tramadol. Showed him the initiation guide. Reminded him of the commercial insurance coverage, savings cards similar to oxycontin.
PPLPMDL0020000001	Cleveland	OH	44195	1/5/2012	worked Neurology dept-left left Butrans fpi, initiation guide, formulary grid, patient info booklets, BUP3015 and my business card for dr bamford dr mays, dr covington-chronic pain. worked anesthesia/pain management-same promotional items for Dr. Mintzer, Dr. Mekhal, Dr. Cheng, Anne Crawford, Kathy kraus, Dr. Vrooman and Dr. Katyal. worked rheumatology-same info as above for dr calabrese, betsy kirchner, NP, dr chatterjee and dr deal.
	Highland Heights	OH	44143	1/5/2012	Window call...I reminded doc of the butrans patient type - one falling on low dose of tramadol or other short acting. He said he knows and has been on vacation. I reminded him to focus on commercial insurance plans for butrans and that oxycontin patients with CCRx are now being covered at a preferred 2nd tier status.
PPLPMDL0020000001	Fairview	OH	44111	1/6/2012	Quick call with Tom, we reviewed Butrans medication guide and indication. I asked if he would let appropriate patients know about Butrans as an option and he said that he would. He said he thought he saw a script but didn't remember who wrote. We reviewed OxyContin as an option instead of short acting around the clock.
	Cleveland	OH	44113	1/6/2012	I showed dr confident traveler flashcard for OxyContin, discussed managed care coverage for OxyContin and dr said he has a lot of patients on OxyContin and no issues with insurance coverage at the moment. told dr that was great and asked who's the appropriate patient for OxyContin? dr said patients who are maxed out on their short-acting opioids and arent getting pain relief, he'll consider a long-acting opioid. I asked dr if he'll continue prescribing OxyContin for these patients? dr said yes he will. I asked dr how Butrans could fit into his practice? dr said he wasn't sure he thinks of Butrans as another Duragesic patch so not sure where he will use Butrans in his practice. showed dr Butrans visual aid, discussed appropriate patients and I asked dr if he would consider Butrans right after tramadol? dr said he might. dr said it depends on patient if patient is willing to wear a patch for a week and if insurance covers Butrans, showed formulary grid and asked dr if he can think of 2 patients today or next week with commercial insurance that he can start on Butrans? dr said he'll think about it and will give it a dr said he's given a few patient info booklets out to those patients he feels are appropriate for Butrans. I asked dr who are the appropriate patients for Butrans? dr said patients taking short-acting opioids around the clock for their chronic pain but arent controlled. I told dr that was good he had those patients in mind and showed dr Butrans indication in visual aid. we discussed appropriate patients, dr focused on opioid experienced. I asked dr if he can think of 2 patients today that may be appropriate for Butrans? dr said he knows of a couple patients that he wants to start on Butrans but he thinks they will be in next week or week after. I asked dr if he'll start them on Butrans? dr said yes he will do that. focused dr on commercial insurance patients. recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44113	1/6/2012	Reviewed Butrans core messages with Dr Mike. Discussed the importance of appropriate patient selection. He said one of the things he does not like about treating patients for pain is you cannot tell by looking at an X-ray if someone has pain. He said that he always worries about getting sued for malpractice for prescribing opioids if the patient ends up abusing it or taking it not as they are directed to. I asked if he finds that documentation of details about patient interaction helps with this. He said it does but it becomes difficult because a doctor's charts can always be questioned as well. Discussed Butrans as a once weekly option for appropriate patients for whom Dr Mike is considering opioids for moderate to severe chronic pain. He agreed to keep it in mind. Also discussed OxyContin, offering 7 tablet strengths for flexibility in dosing/titration.
	Sagamore Hills	OH	44067	1/6/2012	I reminded Dr Roheny of our previous conversation when he told me that he wanted to use more Butrans. I asked if he has put this into practice yet. He said no. I asked how many Vicodin refills he has written recently & he said "a lot". I asked if he had thought of Butrans for any of those patients. He did not answer. Reviewed appropriate patient type & managed care coverage. Dr Roheny asked if dosing is 5, 10, & 15mcg. Handed him initiation guide & pointed out doses of 5, 10, & 20mcg. He said he would try to be a better prescriber this year. Also discussed OxyContin q12h as an option for appropriate patients beyond Butrans range.
PPLPMDL0020000001	Parma	OH	44129	1/6/2012	Dr Rood said his patients on Butrans are doing well. He added that one female patient who is on Butrans 20mcg no longer requires any type of short-acting medication for breakthrough pain as she is completely controlled on Butrans alone. Showed him patient information booklet & discussed how they can be given to appropriate patients so that they can make an informed decision on if they think Butrans might be something they would want to try for their moderate to severe chronic pain. He agreed that this would be helpful in discussions with patients. Dr Rood said he does not have a lot of patients who he could convert over, but he does have some & he has no clinical objections to Butrans. I asked if he would consider Butrans for a patient who had not yet been on opioid therapy. He said he would probably not go to Butrans first. Discussed OxyContin q12h as an option for appropriate patients beyond Butrans range. He said he does see a place for it although he thinks that it is still over-prescribed. Discussed importance of appropriate patient selection, also reviewing that both Butrans & OxyContin are opioids & carry abuse & addiction potential.
	Chagrin Falls	OH	44022	1/6/2012	I asked if he had tried patients taking tramadol on Butrans like we discussed. He said he hasn't but he said he will try. He said he has not due to his bad experience with managed care. I asked him to find a few commercial insurance patients and he agreed.
PPLPMDL0020000001	Westlake	OH	44145	1/6/2012	

PPLPMDL0020000001	Cleveland	OH	44113	1/6/2012	dr said she's been giving patient info booklets out to patients but hasn't started anyone yet. I told dr that was great and asked why she chose to give booklets to these patients? dr said patients were maxed on tramadol and she thought Butrans would be a different option instead of converting patients to another short-acting opioid. I asked dr if she'll continue handing out booklets? dr said yes she will do that. I asked dr if there are 2 patients, commercial insurance, that she can think of where Butrans would be an option? dr said she has a few patients coming into office in the next few weeks and she'll talk to them and see if they are willing to try Butrans. focused dr on tricare and commercial insurance patients. recommended Senokot-S
PPLPMDL0020000001	Mayfield Hts	OH	44124	1/6/2012	I asked doc where he is seeing the best results with butrans. He said he only has a few patients on it but he likes it for older patients that may already be on other medications. I reminded him to just stick with those patients that have commercially insured plans like Anthem, medical mutual, etc. He said he would. Gave him a formulary grid for butrans and oxycontin.
PPLPMDL0020000001	Cleveland	OH	44109	1/6/2012	worked pm&r -left dr malkamak, dr harris, dr fox and dr daffari Butrans patient info booklets, formulary grids, initiation guides, BUP3015 clinical trials and my business card for each dr as I couldn't see them today. worked internal medicine-left dr jones, dr lindheim and dr gelehrter same info as above. worked family medicine-left dr chrisman, dr forde, dr krofina, dr liu and dr magoulas all of the same info
PPLPMDL0020000001	Westlake	OH	44145	1/6/2012	Quick call at his other office, I reviewed the managed care for Butrans and savings cards for both Butrans and OxyContin. I asked if he had any patients today he could start on Butrans and he said he will.
PPLPMDL0020000001	Sagamore Hills	OH	44067	1/6/2012	Dr Scanlon showed me that he had just written a Butrans prescription for the 5mgc dose for a patient. He added that he has been prescribing Butrans because he is having good success with it. Discussed patient information booklets. I asked if he has been using them when he talks to patients about Butrans. He said yes & that he sometimes gives the booklets to patients to read about & allows the patient to then decide if they would like to try Butrans to treat their pain. I told him it sounds like he is doing the right thing. Discussed OxyContin with 7 tablet strengths as an option for patients who are beyond the appropriate range for Butrans. Dr Scanlon said he finds OxyContin to be effective in treating patients' pain & he does use it when patients are in more severe pain. I asked Dr Scanlon if he would continue to offer Butrans & OxyContin as an option when appropriate & he agreed.
PPLPMDL0020000001	Cleveland	OH	44135	1/6/2012	Quick call, Dr wanted more patient medication guide. He said that he has been starting a lot of patients on Butrans and has been getting good results. I did not have time to gain further information.
PPLPMDL0020000001	Cleveland	OH	44143	1/6/2012	Discussed the butrans selling messages over lunch - indication, positioning, CIII status, once weekly application. Also went over the proper application and disposal, formulary coverage and savings cards. He asked if the patch can be cut. I told him no and that it should not be altered in any way. He remembered that it was a CIII and can be called in. He wanted to know what the cash pay cost is. I asked him to focus on commercial (and younger than medicare) patients. He said their practice has a lot of medicare. He thought butrans would have been good after darvocet went off the market. told him that Butrans may still be an option for former darvocet patients.
PPLPMDL0020000001	Chagrin Falls	OH	44022	1/6/2012	He said he would see about prescribing. Quick call- Gave Dr Hudson an OxyContin conversion guide & asked her where OxyContin currently fits into her practice. She said she thinks she uses it a lot. Discussed 7 available tablet strengths, offering flexibility in dosing & titration. Also asked about her experience with Butrans. She said she would not prescribe it. I asked her why not. She said she does not know enough about it & she "doesn't want someone overdosing". I agreed that she should use caution in prescribing Butrans, as with all opioids. I asked what information I could provide to help her feel more comfortable with Butrans. She said nothing & that it just needs to be out for longer before she is
PPLPMDL0020000001	Mayfield Heights	OH	44124	1/6/2012	Doc said he didn't have much time to talk. I asked him if he has any concerns about trying butrans for patients instead of titrating them on vicodin or other short acting. He said no and that he would do better. Gave him a formulary grid and initiation guide.
PPLPMDL0020000001	Cleveland	OH	44111	1/6/2012	We reviewed the dosing for OxyContin, Dr said that he is still prescribing OxyContin often and he especially likes Butrans for cancer patients. We reviewed the initiating guide for Butrans and he said many of his patients are on higher doses of opioids, but he does have a few patients taking tramadol. He said he will try it.
PPLPMDL0020000001	Cleveland	OH	44143	1/6/2012	Discussed the butrans selling messages over lunch - indication, positioning, CIII status, once weekly application. Also went over the proper application and disposal, formulary coverage and savings cards. Doc asked about the molecule and if there is MU activity. Told him it is buprenorphine and is a partial agonist with some mu activity. He also asked if butrans can be used to treat addiction. I told him that butrans is only indicated for pain. He said he would think about it.
PPLPMDL0020000001	Euclid	OH	44132	1/6/2012	Discussed the butrans selling messages over lunch - indication, positioning, CIII status, once weekly application. Also went over the proper application and disposal, formulary coverage and savings cards. He asked about the effect of renal impairment. I explained that the pk profile of butrans is not altered during the course of renal failure (per sec 8.7). He also asked about skin sensitivity. I showed him the AE profile and the incidence of application site pruritis. He said the biggest problem will be cost. I asked him to focus on commercially insured patients and be sure to give them a savings card. He said he might prescribe tramadol as high as 100 QID. I showed the approximate starting dose of 10mcg for those patients.
PPLPMDL0020000001	Waterford	OH	45786	1/13/2012	W - Has written Butrans a few patients and likes what he has seen thus far. Started the patient on 10mcg/hr from vicodin. I - Butrans follow up and review of appropriate patient selection when the indication is met. Butrans for patients who are uncontrolled on their current therapy and a change has been requested. Review of the ability to titrate with Butrans after 72hrs and the use of supplemental analgesia can be utilized if necessary. Review of formulary coverage and savings card program eligibility.
PPLPMDL0020000001	Waterford	OH	45786	1/13/2012	W - Vickie hasn't written for Butrans but knows that Dr. Waters has a couple of times and maybe even Miral. Will continue to keep in mind as an option when a long acting agent may be needed. I - Review of Butrans indication, 7 days of buprenorphine delivery in 1 application with a CIII scheduling. Use of initiations guide to define appropriate patient selection when the indication is met. Patients who request a change from their current therapy due to uncontrolled pain. Review of formulary coverage - commercial plans with a 3T status. Savings card program eligibility.
PPLPMDL0020000001	Cleveland	OH	44111	1/13/2012	Spoke with Dr in the hospital, he asked me how Butrans is going. I asked him how it's going for him. He said he hasn't really had a chance to try a lot of patients. I asked if he thinks a 7 day patch as a place in his practice. He said he should try it and see and I asked if he would.<font color=blue><b>CHUDAKOB added notes on 01/19/2012</b></font>Seeing a Dr. in the hospital? Great idea!!! Good work!!!
PPLPMDL0020000001	Fairview	OH	44111	1/13/2012	Spoke with Katie, she said they had 2 patients on Butrans but it may be down to one now. She said they are instructing the patients on how to use Butrans and handing out the medication guide. She asked if the savings program was extended and I reviewed the savings programs for Butrans and OxyContin.
PPLPMDL0020000001	Cleveland	OH	44111	1/13/2012	I learned that Barbara is in charge of handing out patient info and savings cards. She or the nurses usually take the calls from patients who say their pain is not well controlled on their current medication. I asked what she usually does, she said they usually have to come in to see the doctor but it just depends on the patient and what they are currently taking. I reviewed Butrans as an option and she said she would remind the Drs about it as an option. She did not know what their hesitation was in prescribing Butrans.
PPLPMDL0020000001	Independence	OH	44131	1/13/2012	I asked Dr Jack what the odds were that someone he was seeing today would ask for an increase or change in their chronic Vicodin prescription. He said that the chances of that are very good. I told him that I have an option for a potential solution & reviewed with him that that patient may be a candidate for Butrans once weekly. I let Dr Jack know that the patient could take immediate-release opioids or non-opioids for supplemental analgesia if necessary. I asked if he would prescribe Butrans for that patient if appropriate. He did not answer. Dr Jack grabbed the titration guide out of my hand & said that at some point all of this "will click". Reminded him of OxyContin savings cards before he walked away.
PPLPMDL0020000001	Cleveland	OH	44125	1/13/2012	Spoke with pharmacist, Chris, & reviewed Butrans with him. Also went over appropriate Butrans patient type & range. I let him know I am focusing with physicians on prescribing Butrans for appropriate patients who are not well-controlled on 3 tramadol per day & who are refilling their chronic opioid over & over. Chris said he thought this was a good patient type to work with for Butrans. Discussed OxyContin savings cards & Chris requested one package. I asked him if he remembered any new OxyContin prescriptions recently or if it is only continuing prescriptions. He said that he doesn't know for sure as he has not been paying attention but said he would let me
PPLPMDL0020000001	Waterford	OH	45786	1/13/2012	W - Miral said that she initiated therapy with Butrans on a couple patients last month and hasn't seen them back yet. The patients were both started on 10mcg/hr of Butrans and had been on vicodin but needing stronger therapy. I - Butrans follow up and review of appropriate patient selection when the indication is met, patients are uncontrolled on current therapy and a change has been requested. Use of initiation/titration guide to discuss the ability to titrate after 72hours and that 20mcg/hr is the max dose. Use of the initiation guide to also discuss the use of supplemental analgesia can be utilized with Butrans. Review of formulary coverage and savings card
PPLPMDL0020000001	BEACHWOOD	OH	44122	1/13/2012	Spoke with pharmacist Bill who said he has not filled any Butrans prescriptions. Spent time reviewing appropriate patient type. Focused on patients taking chronic tramadol around-the-clock. I asked Bill if this sounded like customers he can think of. He said yes. I asked him if he would feel comfortable recommending Butrans to those patients or their physicians when he notices they are getting their tramadol refilled over & over. He agreed to do this & added that he felt that patients would appreciate that. Discussed ability to take supplemental analgesia for breakthrough pain if necessary. Also discussed OxyContin savings cards. He requested one package. I asked if he has seen any new OxyContin patient starts lately. He said not that he can think of. He added that they are very picky when it comes to whose OxyContin prescriptions they will fill. Bill said it has to be a patient who they trust. I agreed that OxyContin does carry abuse/addiction potential & that he should be aware & cautious when filling prescriptions.
PPLPMDL0020000001	Beachwood	OH	44122	1/13/2012	Spoke with nurse, Donnie, who said Dr Warren was too busy this morning to see me. Reviewed with him Butrans & appropriate patient type & asked him if patient profile of Emma sounded like patients who Dr Warren sees. He said yes. I asked if Donnie knows any specific reason Dr Warren has not at least tried Butrans. He said he knows of nothing. He said he would try to get me an appointment with Dr Warren for later today or next week. Discussed OxyContin savings cards, but Donnie said he does not need them. I asked if he knows if any new patients have been started on OxyContin lately. He said not that he knows of.
PPLPMDL0020000001	Cleveland	OH	44111	1/13/2012	Spoke with Braylon, I asked if he has seen any new Butrans scripts, he said he hasn't but they have a few patients on Butrans. We reviewed the medication guide and use of supplemental analgesia. He said that he would hand the booklets out to new patients. I asked if he's seen new scripts for OxyContin and he said they seem to always have new OxyContin patients.
PPLPMDL0020000001	Independence	OH	44131	1/13/2012	Quick call with Dr Rob. Attempted to stop him with him Butrans & OxyContin savings cards. He just thanked me & walked away.
PPLPMDL0020000001	Garfield Hts	OH	44125	1/13/2012	I asked Dr Sadowski if he thought it made sense to use Butrans for patients taking chronic tramadol 3 times per day who were not well-controlled. He said that he has been thinking about Butrans. I asked if he could think of a specific patient who fit that description. He said he is "thinking of patients for Butrans." Reminded him that he could start a patient like the one we are discussing at a 5mcg dose of Butrans & can allow breakthrough medication if necessary. Dr Sadowski showed me a Butrans patient information booklet & told me that he even has Butrans information on his desk. Reminder for OxyContin 7 tablet strengths.<font color=blue><b>CHUDAKOB's query on 01/19/2012</b></font>Clarifying question: What types of patients are you thinking of for Butrans? What is stopping you from trying it on those patients? Instead "reminding him" after he said he is thinking of a patient, try a clarifying question. Your thoughts?<font color=green><b>APSEGAS's response on 01/20/2012</b></font>-it's worth a shot! Thank you.<font color=blue><b>CHUDAKOB added notes on 01/25/2012</b></font>-Try to replace the word remind in your sales presentation!
PPLPMDL0020000001	Cleveland	OH	44111	1/13/2012	Met new NP, she is working mostly in-patient at the hospital and Barb moved to in-office. She had not heard of Butrans, and we reviewed the key messages. She asked if Butrans was on formulary at the hospital yet and I let her know that we are discussing it with CCF. She agreed to look at the information further. We reviewed OxyContin as an option that she can recommend in the hospital, she said that she does see it used for patients especially when they come in and are already taking OxyContin.
PPLPMDL0020000001	Independence	OH	44131	1/13/2012	Roman said he thinks OxyContin is a great drug & that he prescribes it frequently. I asked if he is still starting new patients on it & he said yes. Also discussed titration with the flexibility of 7 tablet strengths. Also discussed savings cards, reminding him that patients with any type of government insurance are not eligible to use them. He said it can be expensive even with the cards. I asked him why he hasn't been using any Butrans. He said that he is not going to use it because it is way too expensive & no one can afford it. I asked if he knew what plans gave him problems. He said he does not have the time to keep track of who has what insurance. Discussed commercial insurance coverage. Roman said he tried to prescribe it for about 7 patients & each of them called back saying it was over \$100. I told him it sounded like they were Medicare D plans. He said he has no time to think about insurance. He also added that he "thinks" someone did try it & liked it for awhile but then started getting headaches while she was on it. He said she liked it at first then discontinued. He went on to say that he was disappointed in the dinner program because no one would give him any off-label uses for Butrans. I told him he would not get that from me or any other representative of Purdue, including a speaker. Roman said he likes the idea of a once weekly patch & had thought Butrans would be something that he would prescribe a lot of.

PPLPMDL0020000001	Cleveland	OH	44111	1/13/2012	Spoke with Linda and Don Zabricki, clinical manager. I learned that the hospital is no longer doing in-servicing on the floors with the nurses. I asked what would be the best way to get the education about OxyContin, Butrans and Senokot to the floors of the hospital, and she said that I should consult with Mike and/or Don to find out if they could provide the product education and information at their meetings. Don thought that it would be valuable to review the providing relief preventing abuse brochure at our next in-service with the pharmacy. Linda informed me that the hospital is going to have the pharmacist much more involved in patient care and on the floors to help educate the nurses. Their hope is to educate the pharmacists who will then educate the nurses. She set me up with an appointment with Mike Hoying so that I can discuss Butrans and how I can be involved with helping to educate the pharmacists on our products and pain management.
PPLPMDL0020000001	Brooklyn	OH	44144	1/16/2012	Introduced myself & Purdue's products to Laura, MA. Reviewed Butrans core messages, appropriate patient type, & savings cards. Also discussed OxyContin savings cards & offered OTC samples. Worked with Laura to schedule appointments with the practice. She said Butrans sounded like something Dr Koepeke may be interested in. I asked her to give him Butrans information with my card & she agreed.
PPLPMDL0020000001	Lakewood	OH	44107	1/16/2012	Dr said that he has not started any new patients on OxyContin recently, he does not see any new patients. We reviewed the conversion guide and converting to the 10mg OxyContin for patients taking short acting around the clock. Dr said that he had many patients complain that they did not feel well when they switched to the OxyContin reformulation. (reported as AE)We reviewed the key messages for Butrans and he said he just forgot about it, he said that managed care is an issue as most of his patients are Med D and Medicaid. He said he does have some BWC patients and he would consider using Butrans here. We reviewed that OxyContin has coverage for Medicare and Medicaid patients. I met Leena, NP student and reviewed Butrans key messages and OxyContin conversion guide.
PPLPMDL0020000001	Parma	OH	44129	1/16/2012	Quick call with Dr Ortega at the window. He said he is busy as he is getting ready to take his trip to the Philippines, where he will be until February 20. Reminded him of patient savings cards for Butrans & OxyContin & also asked him to continue to give patients Butrans patient information guides when appropriate. He agreed. Spent time with Cindy. Reviewed managed care for Butrans & OxyContin. She said she just got a notice from BWC that they will not cover the 15mg dose of Opana ER for a patient. She asked me if I knew anything about it but I told her I did not.
PPLPMDL0020000001	Hudson	OH	44236	1/16/2012	Spoke with Beth who said she has seen no Butrans activity. Presented Butrans patient information booklets & reviewed appropriate patient type, focusing on patients who get chronic short-acting opioids. I asked if she would give the booklets to patients who she thinks could benefit from Butrans. She agreed. Also discussed OxyContin savings cards & eligibility.
PPLPMDL0020000001	Parma	OH	44134	1/16/2012	Spoke with floater pharmacist & reviewed Butrans core messages. He said he has filled prescriptions for Butrans at other locations. Discussed appropriate patient type, focusing on patients who take chronic short-acting opioids, especially if they are not well-controlled on their dose. He said this is a common patient type. Reviewed ability to take supplemental analgesia while on Butrans. Also discussed automatic savings via e-voucher & OxyContin savings cards.
PPLPMDL0020000001	Hudson	OH	44236	1/16/2012	Spoke with MA Melissa & reviewed Butrans with her. Discussed appropriate patient type, focusing on patients who call too soon for refills of short-acting opioids like tramadol or Vicodin. Melissa said she does get those calls occasionally. Discussed savings cards for Butrans & OxyContin, neither of which they needed. I asked her to give Dr Seiple Butrans Opioid-Naive clinical trial backgrounder & she agreed.
PPLPMDL0020000001	Parma	OH	44129	1/16/2012	I asked Dr Taylor what she thought the downsides of Butrans are. She said that patients do not "want to give up pills". Reminded her that patients could take supplemental analgesia while on Butrans. I asked if she thought patients would be more likely to be willing to try Butrans if they knew this & it was explained to them during patient counsel. She said maybe but added that she thinks it will have to be a "new" patient who gets put on Butrans. I asked what she meant by "new". She said someone who is not already on a short-acting opioid. I asked her if she would at least offer patients Butrans, letting them know that they can take supplemental analgesia if necessary for breakthrough pain. She agreed. Discussed the importance of appropriate patient selection for all opioid medications. Dr Taylor said that she has been using OARRS a lot recently due to House Bill 93 requirements. I asked if she felt that her practice was more protected this way. She said yes. I asked Dr Taylor if she has had any new OxyContin starts recently. She said she has not. I asked why. She said because she has cut back on the amount of pain management that she does & therefore doesn't write as many new opioids. Reviewed OxyContin & Butrans managed care coverage & gave her one package of OxyContin savings cards.
PPLPMDL0020000001	Brooklyn	OH	44144	1/16/2012	Started to review Butrans with Dr Hilton, discussing once weekly dosing in a transdermal system of buprenorphine. Also reviewed Butrans as a CII opioid with abuse/addiction potential. Dr Hilton said she did not want to discuss Butrans or OxyContin & added that she does not "write any of those" medications. I asked if she has any patients who take tramadol or Vicodin for pain from a condition such as osteoarthritis or spinal stenosis. She said that she has no patients on those medications. Discussed importance of appropriate patient selection & agreed that she should be cautious in prescribing any opioid medication, prescribing only for those in legitimate pain. She said that when a doctor writes pain medications chronically, "the DEA comes for you". She also said that she wishes Darvocet was back on the market. I asked her what it was about Darvocet that she liked so much. She said that it was "not as abusable" as other opioid medications. I asked if she would be interested in discussing resources & tools to help her in her practice for patients in pain, but she declined.
PPLPMDL0020000001	Cleveland	OH	44144	1/16/2012	Showed Dr Paul the "Emma" patient profile & reviewed it with her. I asked if this patient mirrored what she saw in her own clinical practice. She said she does see patients who sound like "Emma". Also showed Butrans study inclusion criteria & asked if she treats patients for pain associated with osteoarthritis & spinal stenosis with opioids. She said yes & added that she starts with NSAID's or COX-2's, then goes to tramadol & then Vicodin if they are still not well-controlled. I suggested that she may find a place for Butrans in patients who have been prescribed tramadol & who upon follow-up require a change in their medication. She agreed that this would make sense. Reviewed transdermal delivery system, seven day dosing, & Butrans as the only long-acting CII opioid. Discussed abuse/addiction potential & appropriate patient selection. She asked about what adverse events she could expect. Showed her rates & asked if anything stood out. She said no. She asked about contraindications, so I reviewed them with her. Dr Paul agreed that Butrans was a logical choice for the type of patient we discussed but added that most of her patients who she treats with chronic opioids are elderly. Discussed managed care for this population. Dr Paul said she does not do prior authorizations. She added that her patients with commercial insurance are not treated with chronic opioids. Discussed OxyContin for patients beyond Butrans & reviewed managed care coverage.
PPLPMDL0020000001	Cleveland	OH	44113	1/16/2012	I talked to Justin, Pharmacist, about physicians writing Butrans. Justin said only a few doctors wrote in past few weeks- dr shen and dr boh. He has seen some patients get titrated, we discussed titration of Butrans. Justin showed initiation guide and I asked if Justin has been giving booklets out to patients? Justin said yes he's given the patient info booklets out and also recommended Butrans to a few patients so they can talk to their HCP's about Butrans. We discussed appropriate patients for OxyContin. Justin said a lot of the same patients getting their OxyContin monthly no new Rx. I asked Justin if he would recommend OxyContin to HCP's for patients when appropriate? Justin said he might do that but depends on relationship with dr. confirmed OxyContin stocking and left formulary grids. recommended Senokot-S
PPLPMDL0020000001	Parma	OH	44129	1/16/2012	Reminded Dr Moysaenko about previous Butrans conversation when he told me that he could think of a few patients who may benefit from Butrans. I showed him patient information booklet, telling him I wanted to review something by him. I presented booklet & discussed how they can be used in patient discussions when he is telling them about Butrans or giving it to patients as an option. He agreed that this would be a useful tool. Reviewed core messages with him & asked him to at least offer Butrans to appropriate patients who he thinks would be good candidates. He agreed. Also OxyContin 7 tablet strengths for flexibility in titration reminder & recommended Senokot-S for opioid-induced constipation, leaving samples.
PPLPMDL0020000001	Cleveland	OH	44109	1/16/2012	worked internal medicine, pm&r, rheumatology, neurology and family medicine- couldnt see any HCP's had to leave info-left Butrans fpj, initiation guide, patient info booklet, formulary grid and my business card for every HCP on my target list
PPLPMDL0020000001	Lakewood	OH	44107	1/16/2012	I asked Dr who the patients are that he is thinking of Butrans. He said chronic back pain, fibromyalgia. He asked about managed care and I reviewed the managed care grid and savings program. Dr had a patient who he tried to write Butrans for and the cost was \$200 and not covered on Medicare. I redirected Dr to consider OxyContin for this patient where Med D plans are covered. Dr on mission trip for next 2 weeks in the Philippines.
PPLPMDL0020000001	Cleveland	OH	44109	1/16/2012	TRIALIST-dr said he has 2 patients on Butrans and 1 patient is doing extremely well-pain is controlled and improvement in overall functioning. dr said other patient is taking Butrans 10mcg and she said within the 1st 3 days of wearing Butrans it was too strong and she thinks its because she sweats a lot and gets hot at night. dr said he's going to lower the Butrans dosage strength to 5mcg for this patient. I reported AE info below. I asked dr if he has other patients, like the 1 who is doing well on Butrans, that he can start this week? dr said yes he does. I asked dr if he would consider starting a patient on Butrans after the 1st tramadol dose wasn't controlling that patient's pain? dr said he would consider that but he would have to talk to the patient and see if patients willing to try Butrans. I asked dr to describe to me how he discusses Butrans with his patients. dr said he tells patients Butrans is a patch and dosed once a week. I gave dr Butrans patient info booklets and asked him to give this to patients for education on Butrans and start 2 patients this week. dr committed to do this. focused dr on commercial
PPLPMDL0020000001	Parma	OH	44134	1/16/2012	I reminded Dr Mandat of our previous conversation when he told me that all of his Butrans patients take supplemental analgesia. I asked him how he decides whether he will titrate a patient's Butrans dose or add supplemental analgesia. He said he prefers long-acting medications whenever possible, especially for patients in care facilities. He went on to say that this is because it decreases the frequency of nursing visits to that patient to administer medications. I gave him Butrans opioid-naive clinical trial backgrounder & asked him to review it. He agreed.
PPLPMDL0020000001	Lakewood	OH	44107	1/16/2012	Spoke with Joe, we reviewed the Butrans medication guide and I asked if he ever needs to counsel patients. He said not really. Only if their medication is not working, which he rarely hears from vicodin patients. I asked if he would let patients know about Butrans as an option and he said he would. He said he has 2 patients on Butrans but, said that one patient on Butrans discontinued because he said he thinks it wasn't working for the patient. He did not know which dose or if the patient titrated. We reviewed that Butrans can be used with supplemental analgesia. He said he does not hear much about OxyContin any longer, that they tend to abuse vicodin now, we reviewed that OxyContin is still a CII and can be abused. New CVS should open in April-May.
PPLPMDL0020000001	Cleveland	OH	44111	1/16/2012	Spoke with Aimee, she is a floater, but has seen Butrans around at other pharmacies. I asked what questions her patients have that will prompt her to counsel them, she said that they ask how much medication they can take and about side effects. I asked if she would let them know about Butrans as an option and give them a medication guide and she said she would. We reviewed that Butrans is a CII and that it can be called in and refilled. We reviewed the OxyContin conversion guide and she will carry it with her. We reviewed the savings programs for Butrans and OxyContin.
PPLPMDL0020000001	Parma	OH	44129	1/17/2012	Spoke with MA Sheila & discussed savings cards for Butrans & OxyContin. Sheila said they needed OxyContin cards but not Butrans. Reminded her of appropriate Butrans patient type & asked her to give Dr Gallagher the Butrans Opioid-Experienced clinical trial backgrounder with my card. Also gave her OTC samples which she said they can always use. I also left my card to request an appointment with Dr Gallagher. Sheila said he is not doing any at this time.
PPLPMDL0020000001	Cleveland	OH	44113	1/17/2012	dr said he's still talking to patients about Butrans, thinks Butrans is a great product just not for everyone, dr said he has a couple patients on Butrans but so many of his patients dont want to try a patch and only want their pills. I asked dr who is the appropriate patient for Butrans? dr said patients taking 4-5 tabs daily of the 5/325mg vicodin, that arent controlled and are asking him for more pills, dr said thats when he will talk to them about Butrans. I asked dr if he would consider Butrans as an option, right after 2 tabs of vicodin 5/325 werent controlling the pain instead of increasing the amount of pills daily? dr said he might but usually he would give patients 3 pills a day, then 4 and eventually 5 pills daily is max. I asked dr what the clinical reasoning was for this? dr said he just does this as patients like trying the pills first then something like Butrans they might consider later on. I asked dr if he had 2 patients this week, BWC or commercial insurance, that he could start on Butrans? dr said he will do his best and talk to some patients and see what happens. focused dr on commercial insurance patients
PPLPMDL0020000001	Cleveland	OH	44129	1/17/2012	Quick call with Caryn between patients. I showed her a Butrans patient information booklet & asked her to start giving them to patients who she identifies as potential Butrans patients, even if she is not giving them a prescription. She said she is going to be leaving the practice. Spoke with Dawn who said Caryn will be leaving Cleveland Back & Pain. She added that Deb Torres will be practicing there Mondays & Wednesdays & Myra Gold will be there Tuesdays & Thursdays. I asked Dawn if any of the practitioners have been prescribing Butrans. She said she has not seen anything lately at all. Reviewed appropriate patient type & reminded her of where Butrans is covered. She said she would try to keep reminding the prescribers.
PPLPMDL0020000001	Cleveland	OH	44130	1/17/2012	Dr Fedorko asked if he can write Butrans for a patient in a nursing home. Reviewed managed care coverage. Discussed appropriate patient type as well as OxyContin as an option for appropriate patients beyond Butrans. I reminded Dr Fedorko of previous conversations when he told me that patients on short-acting opioids do not want to change their medication to a long-acting option. I showed him patient information booklets & discussed how they can be used in patient counsel. I also suggested that Dr Fedorko give them to appropriate patients who fit the indication, even if he assumes they will not want to change their medication. He said that he is glad that I told him that because that is something he will do. Showed him how the booklets educate patients so they can make an informed decision on whether or not Butrans would be a good option for them. Dr Fedorko said again that he will start giving the information booklets to appropriate patients. Also discussed Senokot-S for opioid-induced constipation & showed him samples.

PPLPMDL0020000001	Cleveland	OH	44125	1/17/2012	Spoke with pharmacist Emily & reviewed Butrans dosing & delivery system. She said she does not think they have dispensed any. Reviewed appropriate patient type, focusing on patients who get chronic refills of short-acting around-the-clock opioids. I asked if this is a commonly seen scenario. She said somewhat. I asked if she has seen any new prescriptions for OxyContin or if she is only seeing continuing prescriptions. She said it is mostly continuing, but occasionally, they will get a new prescription. Discussed savings cards for OxyContin & gave her one package.
PPLPMDL0020000001	Independence	OH	44131	1/17/2012	I showed Dr Sundaram the Butrans patient information booklet & asked if he gives patients resources like that. He said he does. I asked his thoughts on giving those booklets to appropriate patients when he refills a short-acting around-the-clock opioid prescription for them so that patients can educate themselves on a possible option. He said he thinks it is worth a try. Dr Sundaram told the medical student that was with him that Butrans is buprenorphine in a patch. Reviewed dosing & appropriate patient type. Also discussed favorable OxyContin managed care status & gave him CCRx alert. Gave OTC samples & recommended Senokot-S for opioid-induced Spoke with Georgia, technician, who said Jackie was assisting a customer. I reviewed the Butrans appropriate patient type & savings cards for both Butrans & OxyContin. I also asked her to check the shelf for Butrans patient information booklets that I had given to Jackie. She said they are still there. I asked her to remind Jackie to give them out to appropriate patients & she agreed. She said they do not need any additional savings cards for either product.
PPLPMDL0020000001	Parma	OH	44129	1/17/2012	I talked to Stan, Pharmacist, about Butrans 5 core selling messages, Stan said he's seen a lot of Butrans Rx here but doesn't know who's writing them and doesn't have time to look that info up today. Stan said I can follow up with Curt, pharmacy mgr, and maybe he'll share that info with me. Stan said they are handing out savings cards and patient info booklets and didn't need anything. I asked Stan what features of Butrans stood out to him? Stan said transdermal delivery, once weekly dosing and the fact that Butrans is a CIII so HCP's can call in refills. I asked Stan if he would hand out patient info booklets to patients taking opioids for their chronic pain but aren't controlled so that patients can speak with their HCP's about Butrans? Stan said he will do that. confirmed OxyContin stocking and we discussed appropriate patients for OxyContin, Stan said they fill a lot of OxyContin and its on hospital formulary but he doesn't know who is writing OxyContin besides the oncologists. recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44195	1/17/2012	I talked to Cynthia, Pharmacist, about Butrans and she said no Rx yet and they don't have Butrans in stock. I showed Cynthia visual aid, 5 core selling messages and asked her what features of Butrans stood out? Cynthia said transdermal delivery and 7 day application. Cynthia said some patients may like this option. I discussed appropriate patients with Cynthia, she focused on opioid experienced patients. I asked her if she provides patient counseling to those patients taking opioids for chronic pain? Cynthia said occasionally they do that. I asked Cynthia if she would give patient info booklets to those patients asking for something different, so that they can talk to their HCP's about Butrans? Cynthia said she will do that and asked me to follow-up with Dave, pharmacy mgr, end of month as he's on vacation now. Cynthia said I should talk to Dave about giving patient info booklets out and I reminded Dr Kushnar of previous Butrans conversations when she told me that she thought she had a few patients who she continually refills tramadol or Vicodin for who may benefit from Butrans. She said she has not put anyone on Butrans yet. I asked what clinical concerns she has. She said she really does not have any but she wonders if patients would want to make that change. Reviewed appropriate patient type & range & reminded her of core messages. I showed her patient information booklets & asked her what her thoughts were on giving the booklets to patients when she refills or increases the dose of a patient's current short-acting around-the-clock opioid so the patient can educate themselves on a possible option for them. She said she thinks that is a great idea. She added that she will tell Lucy, her NP to do the same thing & that she would put the booklets in the room where both she & Lucy will be able to see them. Reminded her that patients can take supplemental analgesia if necessary while on Butrans & discussed titration to a maximum 20mcg dose. Also discussed OxyContin for appropriate patients beyond Butrans. Dr Kushnar said she has a few trusted patients on OxyContin & she thinks it is a good medication for those patients. She added that she has decided not to prescribe any new Percocet scripts because she thinks people abuse it too much. I agreed that opioids carry abuse & addiction potential & encouraged her to be cautious in prescribing any of them. OTC-font color=blue><b>CHUDAKOB's query on 01/26/2012:</b></font>Looks like a great call where you gained a solid commitment for some action. Did you leave her many booklets for her rooms-<font color=green><b>APSEGA's response on 01/29/2012:</b></font>She said due to limited space, she would keep them in the office space that she shares with Lucy. She did not want additional booklets at this time.<font color=blue><b>CHUDAKOB added notes on 01/31/2012:</b></font>OK
PPLPMDL0020000001	Cleveland	OH	44130	1/17/2012	I asked Dr Diab for what type of patient Butrans is a realistic option. He said, "someone who needs it & someone who's insurance pays for it." I asked him what he meant by someone needing it. He said it would be someone who is not well-controlled on their short-acting opioids. He said those are the patients who can especially benefit from it. I asked if that is a common scenario. He did not answer. He said that he thinks Butrans is a good drug that he likes but that insurance companies are just not paying for it & he does not have the time to justify his clinical choices for medications to insurance companies. I asked if he knows what type of insurance a patient has when he goes in to see them. He said he does not & that he bases his choices for medications on the patient, their condition, & what his findings are with that patient. I asked if that means he still attempts to prescribe Butrans for appropriate patients. He did not answer. He said there are cheaper alternatives to Butrans. I asked him what he means. He said he would go to an oral long-acting or fentanyl. He said that clinically he has no problems with Butrans & added that I should not worry because restricted managed care happens when medications come to market & then coverage eventually gets better. He added that it happened with OxyContin as well. Reminded him of OxyContin's favorable managed care coverage & savings cards for eligible patients for Butrans & OxyContin.
PPLPMDL0020000001	Cleveland	OH	44104	1/17/2012	TRIALIST: dr said the 1 patient she started on Butrans had an allergic reaction to the adhesive. dr said she had the patient rotate Butrans, all of the application sites, but the patient got a red rash around the patch site so dr had to stop Butrans. dr said patient was put back on vicodin and is in pain again. dr said this patient was getting good pain control with Butrans but because of this allergic reaction she had to stop. I asked dr if this will prevent her from starting other patients on Butrans? dr said no she is talking to patients about Butrans but its very hard to switch them to something new like Butrans. dr said patients are so used to their pills that all they want. I showed dr fpi, section 2.4 maintenance of therapy, we discussed patients taking immediate release opioids or non-opioid therapy with Butrans. dr said ok she'll keep that in mind. I asked dr if she would consider starting 2 patients on Butrans, this week, that are taking hydrocodone daily for their chronic pain but not controlled instead of converting them to another immediate release opioid? dr said yes she will do her best and keep talking to patients and see if anyone will try Butrans. I focused dr on commercial plan patients. we discussed patient savings card program for commercial plan patients.
PPLPMDL0020000001	Mayfield Heights	OH	44124	1/17/2012	Debbie asked if there were any changes in formulary coverage with butrans. I told her no and reviewed the formulary grid. Also let her know about the coming voucher for 1 month free trial. She like the idea of that. She asked if she could counsel patients to apply 2 5mcg patches if they say 5mch is not enough. I told her that the FPI does not recommend the use of more than 1 patch and has not been studied. She asked about the onset of analgesia. I told her that it has not been studied but measurably levels in the blood have been found after 17hrs. She said she loves butrans and will continue to prescribe it. She introduced me to a new PA in the office, Met the new PA in Hillcrest Pain mgmt. Introduced her to butrans - discussed indication, CII status, and 7 day delivery. She asked about cost. I explained the commercial coverage and the coming 1 month free trial voucher.
PPLPMDL0020000001	Mayfield Heights	OH	44124	1/17/2012	Discussed proper application and rotation of the patch
PPLPMDL0020000001	Westlake	OH	44145	1/17/2012	I reviewed the Med D pull through for OxyContin and asked if this information will influence his decision to choose OxyContin. He said that it does since managed care dictates what they can and can't prescribe and anytime he can get things covered without a prior auth and high copays it is less of a hassle for him. I reviewed the 7 tablet strengths and he said he has many patients
PPLPMDL0020000001	Mayfield Heights	OH	44124	1/17/2012	Spoke to Giovanni and Jessica about the stocking and movement of butrans and oxycontin. Giovanni is new to CVS (4 days) and not familiar with the volume. Jessica said they have a lot of transient customers and does not see alot of oxycontin scripts and has not seen any butrans scripts since she's been there. I discussed the positioning and and dosing of where butrans should be used. Giovanni asked about formulary coverage/insurance. I reviewed the grid and the savings cards. They did not think they needed any savings cards.
PPLPMDL0020000001	Mayfield Hts	OH	44124	1/17/2012	I asked doc what feedback he has gotten from Butrans patients. He said some good, some just ok. He just had one patient today that complained of skin rash on his arm but doc instructed him to apply some hydrocortisone. I asked doc if patient was rotating the patch regularly. he confirmed that the patient was rotating. I asked which dose he tends to initiate at. He said 5 or 10mcg.
PPLPMDL0020000001	Cleveland	OH	44113	1/17/2012	LOYALIST:DEB,PA,said she's starting patients on Butrans every week.I asked Deb what these patients were taking that prompted her to initiate Butrans therapy? Deb said patients were taking vicodin,4-5 tabs of 5/325mg daily and not controlled so she's starting them on Butrans.I asked Deb if she ever see's patients taking tramadol that aren't controlled and need a medication adjustment? Deb said yes.I asked Deb if she would wedge Butrans into her treatment plan right after tramadol? deb said she would consider that.I asked deb if she'll see more patients this week taking tramadol or vicodin that need medication changes? deb said yes every day.I asked deb if she would start these patients on Butrans? Deb committed to do this.I left more savings cards and patient info booklets per Deb's request.
PPLPMDL0020000001	South Euclid	OH	44121	1/17/2012	I asked doc about her past experience with butrans. She said that she only had a tiny bit and it didn't work for the patient but the patient had been on many other agents without success.I explain that that probably wasn't the right patient type and they might have been more appropriate for low dose oxycontin. She said she doesn't treat "that kind of chronic pain". I asked her if she treats low back pain, OA, and she said she did. Showed her the profile of the opioid naive patient and she agreed that she see those types. She then left.
PPLPMDL0020000001	Cleveland	OH	44104	1/17/2012	dr said she likes that Butrans is available,as an option for patients but all of her patients are taking immediate release opioids as needed.dr said none of her patients have chronic pain and when they do have chronic pain,she sends them to pain management.dr said she doesn't like dealing with narcotics and chronic pain patients.I asked dr how she defines "chronic" pain? dr said if patients ask for more pills,after the 1st dose,and their pain is longer than 3 months,she sends them to pain management.we talked about 5 core selling messages,dr focused on opioid experienced patients who would be appropriate for Butrans and said right now she doesn't have a place for Butrans in her practice.
PPLPMDL0020000001	Cleveland	OH	44121	1/17/2012	I opened the call by asking do when was the last time he initiated oxycontin for a new start patient. He said not recently and that he is trying to get away from prescribing narcotics. He said he just got a letter from an insurance company for a patient on oxycontin that now requires a PA. He said it was a commercial patient that has been on it for a while. He will write it but doesn't really want to. I suggested butrans as an alternative and has the same indication as oxycontin. Rereviewed the selling messages and he thought that as soon as he writes it a PA would be required. I told him to focus on the commercial plans and avoid medicare/medicaid. I asked him if he really sees a place for it in his practice. He said maybe. Reviewed the commercial coverage for both and gave savings cards.
PPLPMDL0020000001	Cleveland	OH	44127	1/17/2012	NON-PRESCRIBER: I showed dr Butrans fpi,visual aid and discussed 5 core selling messages with dr.dr said he's never heard of Buprenorphine or Butrans,dr focused on opioid experienced patients and said he has a lot of chronic pain patients that Butrans could be appropriate for but he has medicare and medicaid.dr asked about Butrans coverage on these plans,i discussed both with dr.dr said he doesn't prescribe CII long-acting opioids,OxyContin,Duragesic or even long-acting morphine.dr said if there is medicare coverage for Butrans he will consider prescribing for his elderly patients.i told dr there isnt any medicare coverage at the moment but i will follow-up with him if there are any changes.i asked dr if he treats any commercial insurance patients? dr said a few.I asked dr to review the information and focus on 1 patient he could start on Butrans this week, dr said Spoke with Sally, pharmacy technician, & introduced myself & Purdue's products. Asked to speak with pharmacy director, Stacy, but Sally said she was in a meeting. I asked Sally if Stacy ever meets with representatives. She said occasionally she does or their clinical pharmacist will. I asked her what the best way to get in touch with Stacy to discuss any type of opportunity they may have for me to do in-services with nurses & other staff members is. She suggested I leave information with my card & she would make sure that Stacy saw it. I left OxyContin information with my card.<font color=blue><b>CHUDAKOB added notes on 01/26/2012:</b></font>Stay persistent. This is the only way they will know that you are serious and that what you have is important.
PPLPMDL0020000001	North Olmsted	OH	44070	1/18/2012	Spoke with Jill, we reviewed Butrans medication guide, that Butrans is a CIII and the use of Butrans with supplemental analgesia. We discussed the appropriate patient types of Butrans and OxyContin. We discussed the savings cards for Butrans and OxyContin.
PPLPMDL0020000001	Parma	OH	44129	1/18/2012	Dr Gigliotti said he was pressed for time. I showed him the patient information booklets, describing to him how they can be used to discuss Butrans with patients on short-acting around-the-clock opioids to see if they would want to try it as an option to treat their pain. I suggested he do this so that patients at least know it is an option for them. He agreed.
PPLPMDL0020000001	Westlake	OH	44145	1/18/2012	Quick call. I asked Dr why he likes Butrans, he said it works. I asked if he would continue to start new patients and he agreed.
PPLPMDL0020000001	Cleveland	OH	44114	1/18/2012	LOYALIST: dr said he's starting more patients on Butrans every week and patients are doing great on Butrans.I asked dr to share with me who is the appropriate Butrans patient? dr said patients taking 1-2 percocet every day and not controlled,asking him for more pills,dr said he will not give them more percocet and tells them their only option is to start on Butrans.dr said some patients will get percocet for breakthrough but most don't.I asked dr if he would consider Butrans an option,after patients are taking 2 hydrocodone daily but not controlled? dr said yes he will but right now he's been focused on percocet patients.I asked dr to expand his clinical experience with Butrans and consider 2 patients this week,that are taking 1-2 hydrocodone every day for their chronic pain but not controlled,to start them on Butrans,dr said he will do that.I focused dr on BWC and commercial insurance patients.I talked to dr about his CCRX patients that are appropriate for OxyContin,dr said he doesn't prescribe OxyContin and won't but appreciated the insurance information.recommended Senokot-S

PPLPMDL0020000001	Cleveland	OH	44109	1/18/2012	worked family medicine-i left Butrans fpi,initiation guide,patient info booklet,formulary grid and my business card for dr chrisman,dr forde,dr adebambo,dr liu,dr magoulais and dr krofina; internal medicine-i left same info dr lindehim,dr jones,dr ricanati,dr harrington and dr gelehrer.
PPLPMDL0020000001	Richfield	OH	44286	1/18/2012	Introduced myself & Purdue's products to Janet Cnadr, RN, director of nursing. She said they are interested in pain management in-services for nursing staff as knowledge is lacking in that area. She added that nurses need education on long-acting medications, including OxyContin. She said Dr Menyah is the Medical Director at that facility & Dr Sundaram also goes there to see patients. Janet said they use Absolute Pharmacy in North Canton.
PPLPMDL0020000001	Cleveland	OH	44106	1/18/2012	TRIALIST-dr said he started a couple patients on Butrans the last few weeks,dr said the only challenge is getting medicine to approve Butrans.we discussed commercial insurance patients and i asked dr if he has a couple patients with commercial insurance that will be coming in today? dr said probably so.i asked dr if these patients are taking an immediate release opioid for their chronic pain,yet not controlled and needing a medication adjustment,is he willing to start them on Butrans? dr said he will consider that as long as the patients are willing to try wearing a patch and insurance covers Butrans.i showed dr Butrans patient info booklet,focused on application/rotation and side effects and asked dr to show patients this info,dr said he tells patients that Butrans is a patch dosed once a week and they have to rotate the patch on 1 of 4 application sites,dr said Lisa,His Med Assist,shows patients the booklet so he doesnt do that.i asked dr to focus on 2 patients today that he can start on Butrans,dr said he will do that.we discussed OxyContin being an option for patients,i showed confident treaters flashcard and we discussed formulary coverage,dr talked about medicare patients and i asked dr if he'll continue choosing OxyContin for patients he feels are appropriate? dr said yes he will do that.recommended Senokot-S dr said she's been starting more patients on Butrans and all of patients are caresource that require a Prior Authorization.i told dr i have heard this from other HCP's but i didnt even think Butrans would be covered as its an NDC block.dr said Caresource is approving the PA's so she's happy more patients are getting started on Butrans.i asked dr if she could focus on commercial and BWC patients,to start on Butrans this week? dr said yes she will do that.dr said she's getting good results with Butrans so she'll continue prescribing,doctors medical assistant,Jasmin,said an elderly woman patient of dr shen's called this morning saying she had shortness of breath and has chronic asthma and is wearing Butrans.Dale novak,PA in office,spoke with patient and told patient to remove Butrans.Jasmin said dr is going to see this patient this afternoon.Jasmin asked me if a patient with chronic asthma could take Butrans? i showed Jasmin and dr shen the FPI,contraindications,and said no patients with chronic asthma shouldnt be started on Butrans.dr said she appreciated that reminder and Jasmin took fpi.i recommended Senokot-S for opioid induced constipation.
PPLPMDL0020000001	Cleveland	OH	44114	1/18/2012	Jan is the Health Services Director in CLE and works with Dr.Lehner. She works with 18 CNPs who each cover 3-4 facilities or 45 facilities in total. They provide bed-side care with everyday service. They are special needs or dual eligibles so the CNPs must understand several disease states including mental health, diabetes, Pain, CHP, etc. They hold monthly staff meeting so March may be a good meeting to attend. She especially liked the Pain PACT and plans to order it online. i will then coordinate a conference call with her and MBK. She didn't think the LELE program was a fit but liked other pain resources including Pain Mngt Kit and Comfort assessment journal. She would evaluate the CNPs pain education as "Not Well-Managed" and really welcomed all of our resources. She's also interested in conversion guides especially from SAOs to LAOs. A lot of what they use is tylenol because many of the CNPs don't understand conversions.
PPLPMDL0020000001	Parma	OH	44129	1/18/2012	I asked Dr Chagin what typically triggers him to prescribe Butrans for a patient. He said it really just depends on the patient & he has tried all types of patients. I showed him the "William" patient profile & asked him if he sees patients like him in his practice. He said yes. I asked if that is a type of patient for whom he would prescribe Butrans. He said yes. I asked if he has tried any patients who were not already on an opioid on Butrans. He said he has. Discussed tools he can use for his practice, including DARRS. He said he has been using all the tools i provided him with. Dr Chagin said he likes that Butrans is not abusable. I told him Butrans IS an opioid & does carry abuse & addiction potential. I asked Dr Chagin to continue to identify Butrans patients & he agreed. I reminded him of the patient he had told me about who was taking Vicodin & Percocet who we had discussed as a potential OxyContin patient. I asked if he has converted that patient or if he is still considering it. He said he has not yet seen that patient back but is considering that switch. Reminded him to use the conversion/rtation guide to assist him in the conversion. Dr Chagin said the patient takes Percocet with Vicodin for breakthrough.
PPLPMDL0020000001	Cleveland	OH	44113	1/18/2012	TRIALIST-dr said she started a few patients on Butrans in the past few weeks.i asked dr why she's chosen Butrans for these patients? dr said 1 patient was taking vicodin and another patient was taking percocet,daily for their chronic pain, that wasnt controlling the pain so she wanted to try Butrans and got it approved.i showed dr visual aid,opioid experienced patients section,we discussed initiation and titration of Butrans and i asked dr if this seemed easy to start patients on Butrans? dr said yes once patients are willing to try Butrans and wear the patch for a week and remember to rotate Butrans weekly,dr said she's been getting approval from Caresource so thats helping her start more patients on Butrans.we discussed commercial insurance patients and showed formulary grid and dr said majority of her patients are medicaid but she does have a few commercial patients so she'll keep that in mind.i asked dr if she has 2 patients this week that she feels Butrans could be appropriate? dr said probably so and she'll start patients if she can get it approved.i recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44113	1/18/2012	TRIALIST-i talked to dale,PA,with dr shen,about the patients he's starting on Butrans.dale said a lot of the patients have been taking vicodin or percocet but arent controlled and ask him for something else,he's starting them on Butrans.i showed initiation guide,discussed titration and i asked dale if he'll start a few more patients this week on Butrans? dale said yes he will.i focused dale on commercial insurance and bwc patients.recommended i reminded Dr Zivic of previous conversations when he has told me that he believes in the concept of long-acting opioids to treat pain. I asked him if, when he has a patient who is taking a short-acting oxycodone like Percocet around-the-clock, he ever considers converting those patients over to OxyContin, a q12h dose of oxycodone. He said he does do this. I asked if there is a specific trigger, such as the dose of Percocet, that causes him to go to OxyContin. He said no. He said it usually depends on the patient & their pain level. He added that he usually does not discontinue the patient's Percocet when he starts them on OxyContin & allows patients to take it for breakthrough pain. Dr Zivic said he has had success treating patients with OxyContin. He said he heard there has been a shortage or some sort of problem with OxyContin availability. I told him i did not know of any such issue.
PPLPMDL0020000001	North Olmsted	OH	44070	1/18/2012	Reminded him of favorable managed care status & gave him a conversion/titration guide. He said i have given him a lot of them. I told him he can put them in various locations to help him in converting patients from short-acting opioids to OxyContin. I reminded him that i have also given him a Butrans initiation/titration guide & reminded him of savings cards for both Butrans & OxyContin.
PPLPMDL0020000001	Parma	OH	44134	1/18/2012	Spoke with Paula, we i asked what questions pain patients have that prompt her to consult with a patient. She said they sometimes ask about certain side effects and if they are normal, or they may have concerns about the warnings. I reviewed the medication guide and i asked if she would talk to patients about Butrans and hand them a medication guide, she said she would. We reviewed the savings cards for Butrans and OxyContin.
PPLPMDL0020000001	Cleveland	OH	44114	1/18/2012	Dr Hernandez told me about a patient who had been on 30mg Opana who he transitioned to Butrans 20mcg. He added that she is doing great on it. He also said he has a patient who had been on OxyContin 20mg who he switched to Butrans 20mcg who is also doing well. He said he knows that 20mcg is not a starting dose, but his patients are doing well. He added that he has a patient for whom 20mcg was not "quite enough", so he told the patient to cut one of the 20mcg in quarters & wear one quarter of it with the 20mcg, giving the patient 25mcg. Told him this is not recommended & has never been studied. He said he knows. I showed him "William" patient profile & asked him if he sees patients like this regularly. He said yes. I asked if this is the type of patient for whom he would prescribe Butrans. He said he "would now". He added that since he has had success converting patients from high doses of opioids like Opana to Butrans, he would. I asked if, when he makes a medication change, it is due to the patient's pills or their pain. He did not answer. He said BWC is going to stop paying for Vicodin & Percocet & that they already stopped paying for Suboxone. He added that he wants to stop taking all insurance & just have a cash pay policy. I asked if he would continue to prescribe Butrans & he agreed.
PPLPMDL0020000001	Cleveland	OH	44114	1/18/2012	Tidr said she just started another patient on Butrans,i asked dr to tell me about that patient and why she chose Butrans? dr said this patient was taking 3-4 hydrocodone a day for her chronic pain and the pain wasnt controlled,dr said she started this patient on Butrans and now the patients overall general functioning has improved and the patient is happier.i asked dr how she determines if a patient is taking tramadol and not controlled,would she start that patient on Butrans or go to hydrocodone? dr said she would go to hydrocodone because if patients are only taking 1-2 pills a day or they have 30 pills for a month or 3months,dr said she doesnt feel that warrants a long-acting opioid.dr said she will start patients on Butrans when they are taking 3-4 hydrocodone every day,dr said she wont increase the pills or convert them to percocet,she will start them on Butrans.i asked dr if there was a clinical benefit of going from 1 short-acting opioid like tramadol to hydrocodone? dr said there wasnt any clinical benefit,its cost a lot of times and she would rather wait to have patients start on Butrans as it'll cost more for patients than hydrocodone.dr said it all comes down to how many pills/per day patients are taking that prompts her to make a change and start patients on Butrans.i asked dr if she will start a couple patients this week on Butrans? dr agreed to do this.we discussed CCRX patients getting OxyContin at lowest branded co-pay,dr said she only has few pts on OxyContin
PPLPMDL0020000001	Cleveland	OH	44115	1/18/2012	Anona said their relationship with Medco is changing as they're receiving more real-time RPH data to assist with their CM responsibilities. Med Mutual is still not allowing drug companies to do inservices rather they have a resource center for drug info. The disease states they're focusing on is RA, Hep C and MS. They're also still only looking for education with CEs. Medco is still the PBMand Sonny is in RPH but she wonderd is the company will move away from just following Medco in all formulary decisions. The company has purchased a network in SC, GA and IN but membership is still the same. I provided product status updates since launch and made her aware of a drug we'll be launching soon - Intermeezo. The CMs will be interested in receiving data on this because insomnia is a real problem so contact her when i have them. There are more CMs who are retiring so a LELE program might be something they'll want to revise in a few months. Follow up with Anona at that time. The Financial Investigative Group has uncovered an \$8M fraud case that she said was huge.
PPLPMDL0020000001	Bedford	OH	44146	1/18/2012	I asked Dr Moufawad if he has been starting more patients on Butrans to expand his experience. He said yes. I showed him patient information booklets & discussed how they can be used in discussing Butrans with patients when he is starting them on it. He said he would do this. Dr Moufawad said one of the patients he started on Butrans got itchy. He added that the patient had been on OxyContin 20mg q12h prior to being switched to Butrans 10mcg. He said the patient has not yet discontinued Butrans & he is going to see him/her back to determine what to do with their dose. I also mentioned OxyContin savings cards, which he said he could use more of, so i left one package. He added that he is not starting any new patients on OxyContin due to "the stigma", but he will continue patients who are already on it. He asked me to focus on Butrans with him instead of OxyContin. Spoke with MA Christina- She said she is usually the one who gives out savings cards/patient information as patients leave. Discussed managed care coverage for Butrans & OxyContin. Gave her Butrans formulary grids & walked her how to utilize them. Asked if she makes a copy of patients' prescription cards with their medical insurance cards. She said she does not, but would like to start doing that since she also does prior authorizations. She hung up Butrans formulary grids for reference. Also discussed putting Butrans patient information & savings cards in potential patients' charts.
PPLPMDL0020000001	Cleveland	OH	44114	1/18/2012	I reported this AE below:John,PA,told me 1 patient called the office saying he cut Butrans in 1/2 because it wasnt strong enough.John told this patient he can NOT cut Butrans in 1/2 and needed to see the doctor for a medication adjustment and they can increase his Butrans to 10mcg/hr,patient is coming into office this week.John said all of the other patients are doing great on Butrans,John said he and dr marshall have been focused on the percocet patients and arent giving percocet for breakthrough pain.i asked John how he explains Butrans to patients? John said he gives patient info booklet to them,tells them this is their homework to read through booklet and he tells them Butrans is a once weekly patch and they must rotate every week on 1 of the 4 application sites,John shows the sites on body and gives patients a script.i asked John to discuss side effects and disposal of Butrans and he said he will do that.i asked John if he'll start a couple more patients this week on Butrans,focusing on BWC and commercial insurance? John committed to do this.recommended Senokot-S
PPLPMDL0020000001	N Royalton	OH	44133	1/19/2012	Spoke with John (7), pharmacist, & reviewed Butrans with him, including core messages & appropriate patient type. Alerted him to box warning & heat alert. Also discussed patient information booklets & gave him a few for their shelf, letting him know they can be given to patients with a prescription, or patients who he thinks could benefit from Butrans based on their patient type. Discussed savings via e-voucher for Butrans & OxyContin savings cards for those eligible.
PPLPMDL0020000001	Cleveland	OH	44109	1/19/2012	dr said she's started a couple patients on Butrans and they are doing well,dr asked for more patient info booklets as she gives these 2 patients before starting them on Butrans.i told dr that was great she's started a few patients and asked what prompted her to choose Butrans for these patients? dr said these patients were taking 2 percocet daily for their chronic pain but not controlled so she wanted to try Butrans instead of increasing the percocet,dr said patients easily got Butrans from the pharmacy and are happy,i showed dr visual aid,opioid experienced patients section,asked dr if she has more patients coming in this week,similar to the patients she started on Butrans? dr said she probably does but it comes down to patients acceptance of trying a patch for their pain and if their insurance will cover Butrans.i focused dr on BWC and commercial insurance patients and asked if she could start 2 patients this week on Butrans? dr said she will do that if patients are appropriate and insurance covers Butrans.i asked dr at what point is OxyContin appropriate? dr said she waits as long as possible before starting patients on OxyContin,dr said she will prescribe OxyContin but rarely we discussed appropriate patients for OxyContin,conversion from short-acting opioids to OxyContin and i focused dr on medicare and commercial insurance patients for OxyContin.i asked dr if she will start 2 new patients on OxyContin this week? dr said she will think about it.recommended Senokot-S
PPLPMDL0020000001	Beachwood	OH	44122	1/19/2012	Reminded Roberta of previous Butrans conversations. Reviewed with her the appropriate patient type & range. She said she usually just writes refills of what a patient is already on & does not do a lot of medication switches as she is still getting settled with pain management. Discussed the option of Butrans for appropriate patients & reviewed dosing. Gave her an initiation guide which she agreed to review to further her knowledge about

	Cleveland	OH	44113	1/19/2012	dr said he's not started anyone on Butrans yet as he's nervous that patients will get their scripts and come back to him saying they lost them.i asked dr if this happens a lot with the opioids he currently prescribes for chronic pain? dr said yes it does.i told dr i have no control over what his patients will do but can empathize with him and understand his concerns.i showed dr visual aid.pg.11,we discussed pain conditions,dr talked about low back pain patients,dr focused on opioid experienced patients.dr said he has a lot of patients taking tramadol and vicodin that he thinks are appropriate for Butrans so he will start a couple people and see what happens.dr asked which plans cover Butrans? i showed dr formulary grid,we discussed patient savings card program for commercial patients.i asked dr if he had 2 patients that had low back pain,coming in this week,that he could start on Butrans? dr said he probably does and will look to see who is coming into the office.dr said he will try it though and see what clinical results he gets from Butrans.dr asked if Purdue is still making OxyContin? i told dr yes and asked what his comfort level is with OxyContin? dr said he rarely prescribes OxyContin unless its nursing home or hospice patients.i showed dr OxyContin flashcard,do you find it challenging? and we discussed appropriate patients for OxyContin,focused dr on medicare and commercial patients and asked dr if he had few patients to start on OxyContin? dr said he will consider it
PPLPMDL0020000001	North Royalton	OH	44133	1/19/2012	Spoke with pharmacist Cheryl, reviewing Butrans appropriate patient type. Also discussed supplemental analgesia with Butrans, titration ability after 3 days, & maximum dose of 20mcg. She said she has not seen much activity for it. i asked if he ever makes medication suggestions to patients. She said rarely, but sometimes. Let her know patient information booklets can be given to patients who she thinks may benefit so they can talk to their doctor about it. Also discussed OxyContin q12h & 7 tablet strengths. She said she sees mostly 10, 20, & 40mg.
PPLPMDL0020000001	Cleveland	OH	44195	1/19/2012	i talked to Curt,Pharmacy Mgr,about Butrans Rx's,Curt said he's not seen much activity lately but knows some HCP's are prescribing.i asked Curt who is prescribing Butrans? Curt said he didnt know off hand but hasnt seen a lot of Rx's for Butrans lately.Curt said he has Butrans in stock and asked if i talked to Sabrina Spikes,in-patient pharmacy,regarding the Virtual sample program at CCF? i told Curt i spoke with Sabrina last year but i will re-contact her about this program.Curt said if he had virtual samples/vouchers for Butrans in the computer system it would help him in pharmacy and increase Cleveland Clinic physicians use of Butrans.Curt asked me to leave savings cards and booklets and i asked Curt if he would recommend Butrans to appropriate patients,handing them booklets so they can speak to their HCP's? Curt said he will do that.i asked if he's seeing new Rx for OxyContin? Curt said occasionally,i asked if he gives the OxyContin savings cards to patients,when appropriate? Curt said he doesnt really need them for OxyContin.i showed Curt the OxyContin formulary grid,focused on medicare and commercial patient starts and asked Curt to share this info with physicians if patients are ready for a long-acting opioid and OxyContin could be an option,Curt said he doesnt recommend OxyContin to HCP's but he
PPLPMDL0020000001	Solon	OH	44139	1/19/2012	Spoke briefly with pharmacist who said his time was limited. Inquired about Butrans activity, which he said has been zero. Discussed patient information booklets, describing how they can be used in patient counsel or given to potential Butrans patients based on their patient type. He said he would put them on the shelf. Reviewed appropriate patient type, focusing on those on chronic low-dose short-acting opioids around-the-clock. Also reviewed OxyContin savings cards, but he said they did not need any.
PPLPMDL0020000001	Cleveland	OH	44103	1/19/2012	i talked to Tim,Pharmacist,about 6 Butrans core selling messages.Tim said they dont stock CII or CIII opioids and he didnt have Butrans in stock.Tim said the wholesaler autoshipped Butrans to their store last year but they ended up sending it back because of their policy about not stocking CII or CIII opioids.i asked Tim if he saw a place for Butrans in appropriate patients (showed visual aid opioid naive and experienced patients)? Tim said yes there is a place for it but they wont stock it here.Tim said i can follow-up with Joe,owner of Sheliga Drug,if i have further questions.
PPLPMDL0020000001	Beachwood	OH	44122	1/19/2012	i asked Dr Yokiell what typically triggers him to start a patient on OxyContin. He said when he notices a patient is taking short-acting medications around-the-clock, he will try them on OxyContin. He added that many time, the patient is taking Percocet around-the-clock before he goes to OxyContin. He also added that sometimes patients like the convenience of q12h dosing, while others prefer to take short-acting medications instead. He said he tries to assess the patient & figure out what will be best for each of them. Dr Yokiell said he likes OxyContin & does use it frequently. He said he likes that people cannot abuse the reformulation as easily as they could the original formulation. i told him we have no data to support that. He said he knows. He said when patients were switched from the old to new formulation, many of them complained, but now that has diminished. i asked how patients who are new to the brand respond to it & he said he hears no complaints from them. Reminded him of favorable managed care coverage & savings. Discussed Butrans as an option for patients on less high doses of opioids. Dr Yokiell said it is difficult for him to use because most of his patients are on such high doses of opioids, Butrans is not an appropriate option for them. Focused him on patients he does have who take lower doses of opioids & asked him to write Butrans for those appropriate patients. He said he would.
PPLPMDL0020000001	Stow	OH	44224	1/19/2012	Abby said she has not written Butrans but has treated several pateints who were on it through Dr Yuang. i asked her what does she think is going to go wrong if she starts a patient on Butrns and She said she doesnt see new consults, she usually does medication adjustments and follow ups and i said medication adjustments are the best time to start someone on Butrans. i said when she sees those patients does she see any reason to continue them on a short acting and she said no. We reviewed dosing and where she would start patients and managed care coverage. She said she would definately try it in someone, she had to go.
PPLPMDL0020000001	Stow	OH	44224	1/19/2012	Dr said he has been trying to write Butrans but it has not been covered and i asked what type of insurance do they have and he said he thinks commercisl and i said sometimes patients medical insurance is different than prescriptions. i said BWC is also covering it and i asked him what types of medication therapy are these patients coming off of and he said all patients come in on some sort of opioid. HE then said he had to go because he got there late. i gave him the opioid experienced study to review until next time.
PPLPMDL0020000001	Cleveland	OH	44109	1/19/2012	dr said he's started a few more patients on Butrans,needed savings cards and booklets.i told dr that was great news to hear he's gaining some clinical experience with Butrans and asked dr why he's been choosing Butrans? dr said these patients had been taking vicodin for years and not controlled asking him for something else so he wanted to try Butrans.i showed dr visual aid,opioid experienced patients section,i asked dr if he will see more patients like the one's he started,this week? dr said probably so.i asked dr if he will start those patients on Butrans when he needs to make a medication change? dr said he will do that.i focused dr on commercial insurance patients and BWC.recommended Senokot-S
PPLPMDL0020000001	Cleveland	OH	44109	1/19/2012	worked pm&r dept-see call notes on dr fox and dr huang
PPLPMDL0020000001	Parma	OH	44129	1/19/2012	Quick window call with Dr Paat. Positioned Butrans for patients taking 2-3 tramadol, hydrocodone, or oxycodone per day around-the-clock & reminded him that patients can take supplemental analgesia while on Butrans if necessary for breakthrough pain. Sent back Butrans formulary grid & also reminded him of favorable OxyContin coverage.
PPLPMDL0020000001	Mogadore	OH	44260	1/19/2012	Dr said he has written a couple of Butrans.HE said one patient was an older man who he thought would be perfect who had a lot of neuropathic pain and alot of issues and has a hard time with pills so he thought this would be good but wasn't covered. i said it is usually PA with Medicare. We reviewed case studies and i asked him what type of patient does he see more and he said probably the patient who is on Tramadol. HE said he would try it again. i asked when the last time he wrote Oxycontin and he said he has some patients, usually his old ladies, he refers all others. We reviewed low doses and managed care with MedD plans
PPLPMDL0020000001	Stow	OH	44224	1/19/2012	Spoke w/ Gregg and Marcy and they said they are not stocking all products simply bc they do not have the room. if they have Butrans script they can just go downstairs to Acme. Marcy said they process about 70-80 scripts a day in that pharmacy. They may get it in someday, still working out all of the kinks. Gave them formulary coverage and dosing.
PPLPMDL0020000001	Cleveland	OH	44113	1/19/2012	dr said he hasnt started anyone on Butrans yet but thinks this is more for hospite/nursing home patients.i asked dr why? dr said he thinks it'll be easier to start someone on a new product.dr said a lot of his patients in office like their pills and dont want to try anything new.i asked dr if he would be willing to discuss Butrans with 2 patients,commercial insurance,show the patient info booklets? dr said yes he will do that he just doesnt know if patients will want to try Butrans.i told dr he will never know until he talks to patients.dr looked at Butrans demo patch and Butrans carton,asked about insurance coverage,i focused dr on commercial insurance and showed formulary grid,we discussed patient savings card program.i asked dr if he will start 2 patients on Butrans,showed visual aid-dr focused on opioid experienced patients,between now and next week? dr said he will talk to a few patients and see what he can do.i asked dr where OxyContin fits into his treatment plan? dr said he writes a lot of OxyContin for nursing home patients.i focused dr on CCRX patients,showed grid and asked dr if he will start a few CCRX patients on OxyContin this week? dr said he will do that if appropriate.dr requested savings cards for patients with high co-pays and he has a few cash paying patients for OxyContin.
PPLPMDL0020000001	Independence	OH	44131	1/19/2012	i reminded Dr Trickett of our last conversation when she told me that she usually goes to Butrans when a patient is not well-controlled on their short-acting opioid medication. i asked her what determines whether she goes to a long-acting opioid or if she increases their dose of short-acting opioid. She said that in general, she does not like short-acting opioids, so she uses a long-acting option whenever possible. She added that once she can see that a patient's pain is going to last for a longer period of time, it is time to switch them to a long-acting. Discussed commercial insurance coverage & savings cards. She said the few patients she does have on Butrans are doing fine. Discussed dosing & titration to a maximum of 20mcg dose. i asked if she would continue to prescribe Butrans when a patient's short-acting around-the-clock opioid is not working. She agreed. Also reminded her of OxyContin q12h as a long-acting option for patients beyond Butrans & reminded her of favorable managed care status.
PPLPMDL0020000001	Cleveland	OH	44195	1/19/2012	worked neurology-left Butrans patient info booklet,initiation guide,BUP3015/opioid experienced clinical trial,formulary grid and my business card for Dr.Bamford,Dr.Mays,Dr.Kriegler and Dr.Stillman.left SAME info for Dr.Covington-chronic pain-see him on 1/26 at 7am lecture. worked apm-left SAME info for Dr.Cheng,Dr.Stanton-Hicks,Dr.Rosenquist,Dr.Vrooman,Dr.Samuel and Dr.Mekhal. Worked Rheumatology-left Dr.Deal,Dr.Calabrese,Betsy Kirschner(NP)and DR Chatterjee SAME Butrans info-couldnt see any HCP's only can leave info for HCP's.
PPLPMDL0020000001	Mogadore	OH	44260	1/19/2012	Joe said he started patient on Butrans, i asked how he is doing and he said he did well on the product and i asked if he is still on Butrans and he said he didnt think so, he gave him enough to get through football season, he is a referee with bad knees waiting to see orthopedic and i asked him was it acute pain and he said no, but he did not want to take pills and needed something to get him through the last month of season. i said other than him, how often do ou see patients who are like him who have chronic pain and he said he sees them alot. We went through patient case studies in vis aid. HE said he sees more like the one on Tramadol. HE said he feels comfortable treating patients who are older with chronic pain, not anyone under 60. HE said younger patients if he feels are going to be chronic he will send to pain manager. i said the problem with committing toButrans in older patients is that patient most likely will have medicare which does not cover it. i said can you see using this in your patients who may be working in 40s or 50s and you have been treating and he said yes, he will use it there. HE said he does not use Oxycontin, cannot write it as PA-
PPLPMDL0020000001	Solon	OH	44139	1/19/2012	With Kendra Kormos, Dan Doucette. Butrans - to be discussed next on 1/20/12 at P&T conference call. Going to try to get feedback on Butrans. Didn't require any additional information. Pricing included in contract. Will notify us on Feb 14th. Caremark Med D - coinsurance language will be adjusted. LICs issue - Mike will follow up with Jim Dixon on identification of plans.MemberHealth Med D - Indemnification clause - lawyers may need to address. Mike will discuss with lawyers. Agreed to all other terms.Dan described how co-insurance rates are set by CMS -in Part-D, as more brands come off the market, this affects the co-insurance diffs &#8211; they will depreciate. CMS and the actuaries will dictate the differentials not the PBMs or the plans. The co-insurance differentials and co-pays vary per CMS region as the utilization of brands and generics affects them. In the NE, consumers tend to use more brand products whereas the West Coast consumers tend to use more generics. Overall, MH&#8217;s co-insurance rates will decrease from 28% at 2T to 24% and 3T will decrease from 53% (?) to 47%. Discussed Intermezzo. Mike said Ambien -well aware of insomnia. Dan said he has MOTIN. Issue is that they have contract with Lunesta - 70% rebate. If looked at as a competitor, can't add Intermezzo. Discussed different indication. Going to see if they can differentiate it and it won't affect contract.
PPLPMDL0020000001	Stow	OH	44224	1/19/2012	Janet said she has not written Butrans soley because she has been in process of finishing up paperwork and just seeing other mid levels patients but hasnt been writing scripts but will be soon and she said she remembers Butrans and likes it because it is a once a week and schedule 3. i reviewed dosing and patient types with her and she said she definatley will use and i said in the mean time Dr or PA you are working with and she said no problem
